for no loss to the property in his charge except that which is caused by gross negligence on his own part. During the Gaonic period the regulation was made that all placing of property in the hands of a trustee had to be done, if at all possible, in the presence of the court, in order to avoid future disputes.

Lit.: Maimonides, *Hilchoth Malveh Veloveh* 16:8; *Shulhan Aruch, Hoshen Mishpat* 56.

TRUTH. For religious philosophy, truth assumes an importance and meaning beyond the significance given to it either in the ordinary life of common sense or in the arts and sciences. In every day life, a proposition is held true if it corresponds to the known and given facts of existence; when we speak of an artistic creation as true we mean that it is consistent with the formal, conventional canons laid down by the artform itself; a theory is considered scientifically true if it can be shown to be useful in the control of nature and as further simplifying the classification of natural phenomena. While the truths of religious philosophy partake of the descriptive, logical and pragmatic qualities of other truths, religion introduces types of truth which do not conform invariably, much less inevitably, to the experiences of daily life, and which are neither strictly scientific nor yet wholly artistic. The essence of religious truth is its prospective and aspirational character; it concerns itself not so much with how things are as with how they ought to be. Religion teaches the larger truths, the eternal verities, which are more than scientific discoveries and artistic creations, although indeed not alien to them.

Judaism conceives life pragmatically; that is, it believes that the world is so organized that true happiness can be achieved only by the practice of the highest morality; the very core of Jewish doctrine is the moral order of the universe, and this is its greatest truth. God has so made man that he can attain his summum bonum only by living in justice, mercy and humility; thus are integrated the logical and instrumental views of the nature of truth. That mercy is good is a type of truth which depends for its verification more on the sympathetic imagination of men than on the physical laboratory; but Judaism insists that the trueness of even such truth must be open to test in actual life. Other faiths have drawn boundaries between revealed and rational truth, and many Jewish thinkers have accepted this dichotomy; but in the final analysis it is of the very genius of Judaism to look upon all truth as "natural." The staunchest believers within Jewry do not conceive the supernatural as extranatural. The great moral truths which Judaism teaches are valid in the first place only because they make for the good life. The essential truth of Judaism is the interrelation between happiness and morality. The Hellenic and the Hebraic spirits are mainly distinguished one from the other in that for the former what is beautiful is also good and true, whereas for the latter what is true is also good and beautiful. Judaism conceives it as its most significant task to hold out before men the eternal validity of this truth despite the numerous individual aberrations encountered in life.

Besides the moral truths there is another type of truth taught by religion, namely, theological truths which frequently rely on faith rather than on the results of experience. Now faith is of two kinds: a mental image which produces a worthy emotion, as when one has faith in one's friend; and belief in that which, because of the weakness or lack of proof therefor, one would in other phases of life ordinarily reject but which one accepts because of such a logically extraneous reason as the power of external authority. Judaism has known both patterns of faith; but since the emphasis in Judaism is on right conduct rather than sound dogma, the Jew's faith has largely been of the first type. And indeed the second type of faith is in a sense inharmonious with the spirit of Judaism, since all ideational formulations within it must stand the ultimate test of human experience, as has already been indicated. Thus what is true of moral truths in Judaism is mainly true also of its theological truths; none of them demands an abeyance of reason for its acceptance, and all of them are grounded in human experience. The Jewish concepts of God, immortality and life's final purposes are all so formulated that any thinking man may accept them without the force of authority or tradition. Truth in Judaism, both ethical and theological, is not a matter of capricious divine fiat, but rather an expression of a rational universe and its just God. Revealed truth (or revelation) is a historical rather than an aspirational matter, and one will accept or reject any specific act of revelation as the evidence therefor conforms to or diverges from his usual criteria for historical truth. So far as revelation is interpreted as inspiration rather than as mechanical revelation, it is of course a daily occurrence in the creations of genius, and it thus partakes of the nature of other religious and artistic, if not also scientific, truth.

The practical problem of truth as a virtue in social relations is, at first sight, a simple matter, since everyone feels that he knows what truth is, and all men agree on the importance of truthfulness. Under critical scrutiny, however, several facts appear. Common sense, philosophy and religion concur that society, based as it necessarily is on intercommunication, would be impossible without the practice of truthfulness among men. In other words, truth-telling is good because it is of pragmatic value. The adage that honesty is the best policy is testimony to this view, and while it may conceivably not be the best policy for the individual in any given case, it surely is the only practice which could sustain society as a living organism. And since it is so important for society, the view has been crystallized in sayings and moral maxims that truth does pay in the long run and that prevarication does not pay.

Jewish literature takes cognizance of this lower view of truthfulness. "He that hath a perverse tongue falleth into evil" (*Prov.* 17:20). "The lip of truth shall be established for ever; but a lying tongue is but for a moment" (*Prov.* 12:19). The Talmud advises: "Teach thy tongue to say, 'I do not know,' lest thou be caught in a lie" (*Ber.* 4a; *Derech Eretz Zuta,* chap. 3). The punishment of the liar is that he is not believed even when he tells the truth (*Sanh.* 89b). In the long run the deceiver gains nothing from his deceit (*A.Z.* 11b). The truth stands, but not falsehood (*Sab.* 104a, in a play on the letters of the Hebrew words). True words are recognized: one's face betrays a lie (*Sotah* 9b). Persons do not lie about what is likely to come to light (*R.H.* 22b).

Judaism treats truth as it does all the other great ethical conceptions; having satisfied itself of the positive and necessary value to mankind of the concept, it sets about sanctifying it as a divine demand, consistent with its view of the moral integrity of the universe. Since truth is a necessary and worthy social instrument, it is conceived as a divine command; the ethical teaching thus escapes its commercial quid pro quo basis (tell the truth because it pays; honesty is the best policy), and becomes a holy and noble demand from God Himself. Be honest because the Lord commands you; and one ought so to love God as to want nothing but to obey Him. Thus does natural morality evolve into ethical religion, achieving divine sanction without losing its solid realistic roots.

Jewish writings are replete with direct simple commands on truthfulness and honesty as demands of God and not motivated by promises of utilitarian benefit. "Thou shalt not bear false witness against thy neighbour" (*Ex.* 20:13; cf. also *Deut.* 5:17). "Keep thee far from a false matter . . . for I will not justify the wicked" (*Ex.* 23:7; this verse is understood by the rabbis as referring not only to outright falsehood but even to indirect and subtle prevarication; for instance, a silence that may lead to misunderstanding; many other types are given; *Shebu.* 31a). "Lord, who shall sojourn in Thy tabernacle? . . . He that . . . speaketh truth in his heart" (*Ps.* 15:1-2); the Gemara deepens the conception of the psalm by the interpretation that one ought not only to keep what one has uttered with the mouth but even what one has merely had in mind (*Mak.* 24a).

The prophets condemn the people for their forsaking of the truth. "Truth has stumbled in the broad place, and uprightness cannot enter. And truth is lacking" (*Isa.* 59:14). "They have taught their tongue to speak lies" (*Jer.* 9:4). The psalmist complains: "They speak falsehood every one with his neighbour" (*Ps.* 12:3); but he rejoices that in the Messianic era "Mercy and truth are met together; righteousness and peace have kissed each other. Truth springeth out of the earth" (*Ps.* 85:11-12).

The wisdom literature naturally has its say on the truth. "Lying lips are an abomination to the Lord; but they that deal truly are His delight" (*Prov.* 12:22). Ben Sira writes that truth is its own reward: "The birds will resort unto their like; so will truth return unto them that practise her" (*Sirach* 27:9); "true dealing shall endure for ever" (*Sirach* 40:12; cf. also 4:28; 20:24). In the story of the three young men who strove to excel each other in wisdom (*I Esdras* 3 and 4) appears the famous panegyric of truth (4:34-40): "As for the truth, it endureth and is always strong; . . . with her there is no accepting of persons and rewards . . . neither in her judgment is any unrighteousness. Blessed be the God of Truth." "And all the people then shouted, and said, Great is truth, and mighty above all things" (verse 41).

The Talmud looks upon falsehood as theft, since when one tells a lie he steals the mind or opinion of his hearer (*goneb da'ath*), and achieves his purpose by misrepresentation of the facts. It is forbidden to "steal the mind" of any man, according to *Hul.* 94a. The "thief" of *Zech.* 5:4 is taken by the rabbis to mean the person who sues for money to which he knows he has no claim, thereby causing the defendant to take the name of the Lord in vain (*Ex.* 20:7; *Deut.* 5:11) by being put to an unnecessary oath (*Shebu.* 39a; *Shulhan Aruch, Hoshen Mishpat* 228:6-7). "And ye shall not wrong one another" (*Lev.* 25:17) is understood by the Gemara as covering a prohibition against verbal misrepresentation (*B.M.* 58b; an extended and high-minded discussion in which wronging with words is held a worse act than with mere money; for instance, it is wrong to invite to a meal one who you know can not accept the invitation; to inquire about merchandise without the intent of purchase is wrong because false hope is raised in the merchant; see also *Pes.* 112b; *Kid.* 32b). One's children may learn to lie if one breaks promises to them (*Suk.* 46b, in reference to *Jer.* 9:4). While it is not in the power of the courts to punish the liar (*'ehad befeh ve'ehad beleb,* one whose mouth differs from his heart), such a one none the less incurs God's displeasure (*B.M.* 49a; *Pes.* 113b). To go back on one's word is tantamount to worshipping idols (*Sanh.* 92a). False flattery and hypocrisy are roundly condemned in a long discourse in *Sotah* 41b; the scoffer, liar, hypocrite and slanderer are for ever debarred from God's fellowship (*Sotah* 42a; cf. also *Sanh.* 103a). Only the person whose inner life accords with his outer mien (*tocho kebaro*) is worthy of studying God's law (*Ber.* 28a). The Mishnah teaches that the very world order is impossible without truth (*Aboth* 1:18).

Thus the evolution of the notion of truth ascends from its earliest status as of practical value in daily life to its becoming a divine demand to love truth and peace (*Zech.* 8:19). The final phase of the metamorphosis of this concept turns truth into a characteristic of God, and even equates Truth with God, making Truth God Himself. Jeremiah proclaims that "the Lord God is the true God" (*Jer.* 10:10); the Talmud renders the phrase thus: The Lord God is true (or Truth, since the Hebrew word *'emeth* is primarily a substantive and adopts the adjectival connotation only derivatively; *Ber.* 14ab). And this has become the standard interpretation in Jewish religious life and in its liturgy; the three passages of the Shema end with the sentence: "I am the Lord your God" (*Num.* 15:41); and then follows a doxology which begins with the word *'emeth.* The Talmud knows of an old and well-established practice that the word *'emeth* is always read together with, and as if it were a part of, the concluding words of the Shema, thus: "the Lord your God is Truth" (*Ber.* 14ab; cf. also *Tur Orah Hayim* 66). The rabbis, in discussing the night prayer to be said before retiring, indicate that one ought at least to express a sentiment similar to that of the verse: "Into Thy hand I commit my spirit; Thou hast redeemed me, O Lord, Thou God of Truth" (*Ps.* 31:6; *Ber.* 4b). And finally, the very seal of God is Truth (*Sab.* 55a; *Sanh.* 64a).

In the late medieval literature much is found concerning truth and falsehood, the holiness of the one and the wrongness of the other, as well as the practical consequences of their respective practices.

A few selections give the mood and temper of the medieval Jew on the question of truthfulness. In the preface to his commentary on the Pentateuch, Abraham ibn Ezra writes that truth is the center of the circle (of life). Maimonides, in the introduction to his commentary on *Aboth,* advises men to listen to the truth without regard to the character of the speaker. Moses Narboni, in his commentary on the *Guide to the Perplexed* (section 22), says that the truth is its own clearest testimony. The *Zohar,* commenting on *Num.* 13:27, makes the shrewd remark that a person about to tell a lie opens with a word of truth so that the lie may be the better believed. Several popular Jewish aphorisms on the truth follow: Truth is neither ashamed nor afraid; Know the truth and you will know its Master, i.e. God; the truth is a light to the eyes, but the lie is a net for the feet; Truth can not contradict truth; To know the truth and deliberately to rebel against it is the greatest evil. A well-known humorous interpretation of why so few persons give heed to the truth is that they avert their eyes from the naked truth out of modesty (cf. Waxman, M., *Mishle Yisrael,* 1933, under Emeth, Sheker, Rammauth).

TSCHERNIKOWSKI, SAUL, Hebrew poet, b. Michailovka, province of Taurida, Russia, 1875. His family was distinguished for great bodily vigor, heroic conduct and wide education. Tschernikowski read Russian at the age of five and began to learn Hebrew at seven. Unlike other Jewish children of the time, he did not go to Heder or Yeshiva, since the little village in which his family lived possessed no such institutions and it was only through two traveling teachers from Latvia that he received a formal Jewish education. Through them he became a Zionist. As a child Tschernikowski read avidly every book that came into his hands, including works of non-Russian authors.

Saul Tschernikowski. From a painting by Leonid Pasternak

The desire to write awoke in him at an early age. When he was twelve he wrote a play and a long poem, "Uriah the Hittite," which he illustrated himself; characteristically, this poem took an opposite view from that of the Bible. In 1890 he entered a private commercial school at Odessa, where he remained two years. In 1892 his first poem appeared in the Baltimore Hebrew weekly *Hapisgah*. The next year he entered the official commercial school and was graduated in 1896. Two years later he wrote his first book, *Hezyonoth Umanginoth* (Visions and Songs; poems, Warsaw, 1898).

In 1899 he left for Heidelberg where he studied medicine. During his first two years there he studied philosophy under Kuno Fisher, also Italian and the history of religion. He received the degree of M.D. after spending two years in Luzerne, Switzerland. He then returned to Russia and became a doctor in the community hospital of Melitopol. For a while he was a political prisoner. After he was released he was accepted as doctor in the community Zemtzvo of the Kharkhov province. He came to St. Petersburg in 1910, and in 1914, with the outbreak of the first World War, he volunteered for service in the Russian Army, and was sent to the front, where he remained until 1916. He returned to St. Petersburg and worked in the military hospital. He was assistant director of the department of hygiene and statistics of the Red Cross. After the Bolsheviks came to power in 1917. Tschernikowski went to South Russia.

At the end of 1919, he went on a special mission to Crimea and to Caucasia. Until 1922 he was a military doctor in the hospitals of both the "Reds" and the "Whites." In those same years, he translated Homer and Plato into Hebrew. At the end of 1922 he went to Constantinople, Turkey, and from there to Berlin. He lived in Germany and visited various other countries, among which was the United States. In 1925 Tschernikowski went to Palestine to take part in the opening ceremonies of the Hebrew University. He worked as a surgeon in the Kupath Cholim Hospital, and then returned to Germany. In 1931 he returned to Palestine and was appointed doctor of the city schools in Tel-Aviv. He was later made an honorary citizen of that city. During the years 1929 to 1932, after he had completed forty years of literary work, all his works, comprising ten volumes, were published by the Jubilee Committee in Tel-Aviv and in Berlin. In Tel-Aviv, in 1937, all his works appeared in one volume.

At the invitation of the Finnish government, Tschernikowski went to Finland in 1935 to participate in the centennial celebration of the Finnish epic *Kalevala* (Tschernikowski translated this poem into Hebrew). He received the award of the Finnish White Rose, and a diploma from the Academy of Athens in honor of his translations of Homer and Plato. In 1943 Tschernikowski was still living in Palestine. In 1940 there appeared in Jerusalem a new book of his poems, *See Here, Earth,* which received the Bialik Prize.

Tschernikowski came upon the literary scene at the same time as did Bialik. But in their conceptions and reactions, these two great figures in modern Hebrew literature represented two different worlds. Bialik felt the suffering of his generation in a personal as well as in a national sense. Enveloped by the shadows of the synagogue and impelled by a great unrest, he came with a desire for light, life and salvation. His words found an immediate response in the hearts of his contemporaries. His generation sensed that he was *its* poet, and he was crowned Jewish poet laureate.

Tschernikowski came without this heritage. "Have I been born before my time or has God delayed my coming?" he asks. His early poems are simple and unsophisticated, and they are not distinctively Jewish in either form or content. Tschernikowski is the poet of strength and of life. He never succumbs to vague emotions and moods of doubt. He is self-centered and derives pleasure from his constant struggle with the chaotic world. His diction is firm, concise and plastic.

The poet draws his great strength from both Nature and his nation's past. In his veins flows, not the blood of the victims of the pogroms, not the blood of the martyrs of the Spanish Inquisition, but the blood of the sons of the desert, "the conquerors of Canaan." Before the elemental forces all boundaries are lost. There remains but one man, one God, one cosmos. The brook, the forest and the wave speak to the poet, and though he may not understand their message, he responds to their voices.

Because of his conception of Nature, Tschernikowski is regarded as the poet of Greek beauty. It is no wonder that he has so often been called the poet of paganism. Tschernikowski's paganism is significant in the light of Jewish life which holds up learning as the most praiseworthy way.

His love songs are simple and breathe the spirit of youth —youthful love, stolen kisses, sweet promises and broken hearts—the play of light and shadow. Tschernikowski understands love as a relationship between man and the world rather than a relationship between man and woman. He would feed all the hungry and give drink to the thirsty.

Tschernikowski hears man sing many songs. He sings of suffering and love and longing. The song of the farmer hovers lightly over the fields; it is the song of human freedom. In the temples rises the song of the faithful who adore the greatness of God. There is the song of the blacksmith, which sings of strength in the darkness of the smithy. The hammer beats out the rhythm, and the whir of a sword being sharpened is the song of those who rule the earth. Everything lives and sings in a harmonious melody.

The poet elevates Man to the heights, that he shall become the master of human destiny. Not only did God descend from Heaven, but He even bequeathed the earth to man. He is with us and within us. He is not a God of spirit. He is a God of emotion. He has become fused with Man.

Tschernikowski entitled these poems "visions of a false prophet," for the traditional, true prophets of Israel had seen other visions. He belongs to that class of Jewish poets, both ancient and modern, who do not follow in the footsteps of traditional, rabbinic Judaism. To him Jewish life in the Diaspora is a tragedy, for, alas, his great and heroic people has grown old and meek, and its God too,

has aged. This is intolerable to Tschernikowski, who is the poet descendant of the strong and the brave. Thus, the Jewish poet finds himself before the "Statue of Apollo."

Be it that Tschernikowski's poetry is essentially human and all-embracing in character, he remains, nevertheless, one of the greatest Jewish poets. He wrote about many historical characters, among which pieces is a dramatic poem on Bar Kochba. He wrote also of Jewish martyrdom in "Passover of the Dejected," "The Massacred of Tirmonia," and "Baruch of Mayence." In the latter poem, Tschernikowski writes with great love and understanding of this martyr of the Crusaders' massacre in a German town, who seeks revenge for the lost lives of his loved ones. The poet's soul cries out against the lot of the Jew, but he does not despair. Tschernikowski is not a poet of surrender; he would lead his people in battle against the enemy rather than commiserate with them over their fate.

In "See Here, Earth," Tschernikowski has written a hymn to the Eretz Israel of the modern pioneers.

In his *Idylls,* Tschernikowski has achieved a high degree in the mastery of narrative poetry. These poems express his love for the simple folk, and reveal a mellowness of tone and atmosphere, a softness of feeling and an over-all glow of good humor which hitherto lay dormant in the poet.

In addition to his own striking and original creative poetry, Tschernikowski has contributed in a large measure to Hebrew literature through his prose works and his translations. Among the former are "Immanuel of Rome," philological studies, and short stories. In his masterful translations Tschernikowski is seen as a man of wide cultural interests. He translated the *Iliad,* the *Odyssey,* the Finnish epic *Kalevala,* the works of Horace, epics from Babylonian, Persian, Russian and Serbian mythology, Longfellow's *Hiawatha,* Plato's *Symposium,* Goethe's poems, Anacreon's songs and numerous other valuable literary gems.

TSCHLENOW, JEHIEL, Zionist leader, b. Kremenchug, Lithuania, 1864; d. London, 1918. By profession a physician, he was one of the leading personalities of Zionism in Russia from 1891 on, and participated actively in the struggle waged by the Chovevei Zion against the maladministration of the Palestinian colonies by the officials of Baron Edmond de Rothschild. Tschlenow joined the political Zionist movement of Theodor Herzl after the First Zionist Congress of 1897, and appeared as a leading figure at the subsequent Zionist congresses. In the Uganda conflict he assumed the leadership of the Zione Zion group.

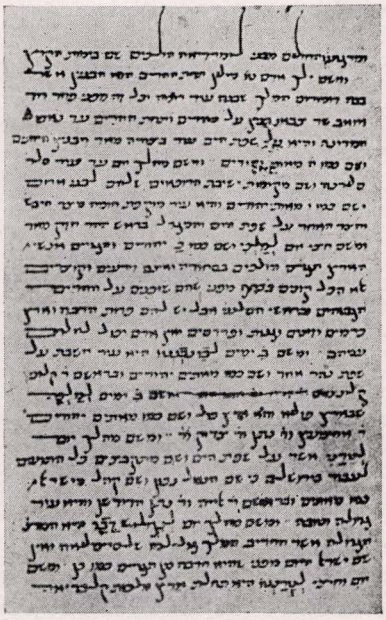
In 1906 Tschlenow convened the Helsingfors conference, which initiated the so-called "Gegenwartsarbeit" and the participation of Zionists in the politics of their countries. In 1910 he became one of the leaders of the Russian Zionist Organization, and was elected a member of the Actions Committee of the World Zionist Organization at the Eleventh Zionist Congress at Vienna in 1913. He then moved to Berlin, but the first World War compelled him to return to Russia. In 1915 he went to Copenhagen, and afterward to London, but returned to Russia after the revolution of 1917 and advocated the convening of a general Jewish congress in Russia. In 1918 he removed to London, where the Zionist head office had been set up in the interim, but died shortly thereafter. During the period from 1911 to 1914 he was actually the leader of the World Zionist Organization.

Tschlenow's Zionist writings include: *Palästina oder ein anderes Land* (Berlin, 1906); *The Jewish National Fund, Its Activity in the Past and in the Immediate Future* (Russian; Moscow, 1909); *The Development of Political Zionism and the Problems of the Present* (Russian; St. Petersburg, 1907); *Fünf Jahre Arbeit in Palästina* (Berlin, 1913); *Der Krieg, die russische Revolution und der Zionismus* (Copenhagen, 1917). His writings were edited by Samuel Eisenstadt (Tel-Aviv, 1937).

Lit.: *Tschlenow-Buch* (Yiddish; 1918); *Memorial Volume for Jehiel Tschlenow* (Hebrew); Berson, L., *Album zum Andenken an Tschlenow* (1919); *The Maccabean,* March, 1918.

TUBAL-CAIN, according to *Gen.* 4:22, a son of Lamech, and the "forger of every cutting instrument of brass and iron." Since the Septuagint renders his name as Thobel, some scholars have supposed that this was the original form of the name; Frankel, however, believes that the latter part dropped out because of the similar words *ḳai en* that follow it. Other suggestions are that Tubal is the eponymous ancestor of a people of that name, or a corruption of the god of fire, Gibil, or that it is a Persian word for smelting in brass and iron. Cain or Kain is the Arabic term for smith. Jeremias and others have connected Tubal-cain's activity with Lamech's song in verses 23 and 24, holding that it refers to the making of the first sword.

TUCHOLSKY, KURT, satirist, b. Berlin, 1890; d. Gothenburg (Göteborg), Sweden, 1935. A radical pacifist, he was a prolific contributor to *Die Weltbühne,* and was its chief editor for some time after the death of Siegfried Jacobsohn. He published grim political satires in newspapers and periodicals under the pseudonyms of Theobald Tiger, Peter Panther, Ignaz Wrobel and Kaspar Hauser. After the Nazis came to power in Germany in 1933, Tucholsky went into exile in Sweden, where he committed suicide in 1935.



Tucholsky's works include: *Rheinsberg, ein Bilderbuch für Verliebte* (1912; 99th ed., 1931); *Der Zeitsparer* (under the pseudonym of Ignaz Wrobel; 1913); *Fromme Gesänge* (under that of Theobald Tiger; 1920); *Träumereien an preussischen Kaminen* (under that of Peter Panther; 1920); *Ein Pyrenäenbuch* (also under that of Peter Panther; 1927; 11th ed., 1931); *Mit 5 P.S.* (1927; 25th ed., 1929); *Das Lächeln der Mona Lisa* (1928; 26th ed., 1931); *Deutschland, Deutschland über alles* (1929; 50th ed., 1931); *Schloss Gripsholm, Eine Sommergeschichte* (1931); *Lerne lachen ohne zu weinen* (1931).

Lit.: *Revue d'Allemagne* (1930) 219-36.

TUCK, SIR ADOLPH, art publisher and communal leader, b. Highbury, England, 1854; d. London, 1926. He was the brother of Gustave Tuck. He entered the art business of his father, Raphael Tuck, and became chairman and managing director of Raphael Tuck and Sons, Ltd., Art Publishers to their Majesties the King and Queen, London. Tuck was also extraordinary director of the Scottish Equitable Life Assurance Society, and he served as treasurer of Jews' College, London. In 1894 he introduced picture postcards into the British Empire. He was created a baronet in 1910. He was a member of the Committee of the Jews' Free School, a member of the Jewish Board of Guardians and of the Jewish Religious Education Board, and a member of the Council of the Anglo-Jewish Association and of the United Synagogue.

Gustave Tuck

A page from a precious old manuscript by Benjamin of Tudela

TUCK, GUSTAVE, communal worker, b. Highbury, England, 1857; d. London, 1942. He was vice-chairman of his father's firm, Raphael Tuck and Sons, Ltd., Art Publishers to their Majesties the King and Queen, London, and succeeded his brother, Sir Adolph Tuck, as its chairman and managing director (1926-37). Tuck was also president of the New York branch of the firm. He was treasurer and, from 1929 to 1934, president of the Jewish Historical Society of England, a member of the Board of Deputies of British Jews, and a noted philanthropist. Tuck reconstructed and equipped the famous Mocatta Library of University College, London, and presented to the College the Gustave Tuck Theater.

TUCKER, SOPHIE, singer and actress, b. Odessa, Russia, about 1884. She was brought to the United States in her earliest infancy. Although her childhood and early youth were spent in Hartford, Conn., she made her first singing debut in a cafe in New York city. Later she worked in nickelodeons and graduated into black-face performances at Tony Pastor's on the Bowery. Her voice, of unusual volume, was adapted to melodramatic and sentimental material, as exemplified by *Some of These Days* (1911), various mammy songs, and the *Yiddishe Mamma* that she made famous.

Sophie Tucker's first engagement for the Ziegfeld *Follies* of 1909 ended in a quick dismissal because she was to be only a fill-in and her voice drowned out the competition of the show's star. But her later work in vaudeville, in night clubs and in variety placed her on the top of the roster, in regard to both popularity and earnings. She was as well-known in London as in the United States; in 1936 she organized, in London, a special performance for the King George V National Memorial Fund. She was for a time president of the American Federation of Actors. She appeared in several talking films, including *Honky-Tonk* (1929). In 1941 she appeared with George Jessel in *High Kickers.*

TUDELA, city in Spain, in the former kingdom of Navarre. It possessed one of the oldest and most important Jewish communities in Spain during the Middle Ages. Its history is comparatively well known, due to the preservation of a considerable part of its old archives. The city was conquered by Alfonso I of Aragon in 1115. Upon the surrender of the city, the Moors, the former rulers, were assured in the treaty of protection against encroachment by the Jews. Simultaneously, however, the conqueror granted the Jews, who had fled from the city during the siege, the right to return to their homes, and extended to them such privileges as were customary for Jewish communities in that period. These rights were confirmed and amplified by an act of Sancho II of Navarre (1170). The Jews removed to the fortified section of the city at that time.

In addition to the famous Jewish traveler, Benjamin of Tudela, eminent Jewish physicians and financiers ranking high in the service of the kings of Navarre lived in Tudela during the 12th cent. The commerce and trade of the Jews of Tudela must have reached a high state of development during the 13th cent. The Jewish community annually leased the public bazaar and the shops of the silversmiths and shoemakers from the sovereign, apparently in order to sublet the same, mainly to Jews.

A preserved document of the Hebrew statutes of the Jewish community of Tudela of the year 1305 furnishes an interesting insight into the juridical and social relations of the community, and illustrates the struggles between the upper and the lower classes.

An interesting community leader of that period was the merchant Ezmel (Abenabez) de Ablitas, who conducted enterprises far beyond the realm of Navarre. Following the general Jewish persecutions raging in Navarre in 1328 and the pestilence of 1348, the community was almost annihilated. It recorded but ninety taxpayers in 1391; the general Jewish persecutions occurring in Spain in 1391 seem to have affected Tudela but indirectly. Nevertheless, the community felt impelled to set up, by a Hebrew decree, a commission whose task it was to enforce the strict observance of

Jacob Tugendhold

the religious laws, in the hope that the community would be saved from imminent extinction.

There are no records of any importance concerning the Jews of Tudela from the 15th cent. on. With the total expulsion of the Jews of Navarre, the community was dissolved in 1498.

TUDELA, BENJAMIN OF, *see* BENJAMIN OF TUDELA.

TUGENDHOLD, JACOB, educator and author, b. Zialoczyec, near Cracow, Poland, 1791; d. Warsaw, Poland, 1871. He studied at the University of Breslau, and came to Warsaw in 1817. Here, for nearly fifty years, he was active as government censor, author and principal of a school which he founded in 1819. Tugendhold also established and directed various Jewish philanthropic and scientific institutions, and organized government-supported schools for Jewish children.

Among his many studies in Polish dealing with the ethical advancement of the Polish Jews or defending Judaism was *Jernbaal czyli mora o zydach* (1828), in which he favored Polish assimilation. He tried largely to propagate the ideas of enlightenment that he put into practice in the school under his supervision. Tugendhold also translated into Polish Shalom Cohen's epic poem, *Hatzalath Abram Meur Kasdim,* and Moses Mendelssohn's *Phädon.* As a strict adherent of the Haskalah movement he relentlessly opposed Hasidism.

WOLF TUGENDHOLD, his brother, was a teacher and government censor in Vilna.

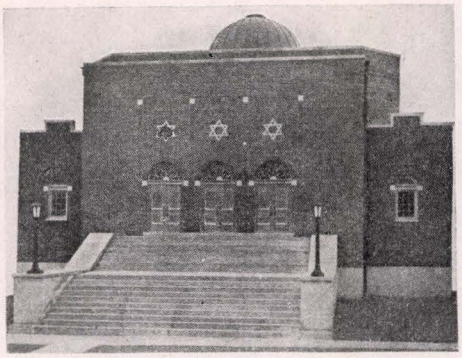
TULCZYNER, DER, *see* BARUCH MIEDZYBOZH.

TULSA, a city of Oklahoma, which included, in 1943, approximately 1,800 Jews in its total population of 142,157 (census of 1940). Jews began coming to Tulsa about 1900. Several Jewish merchants were established in the region when it was still part of the Oklahoma Indian Territory, and a number of Jews of Tulsa were active in the conferences which led to statehood for Oklahoma (1907), notably Leo Meyer, who helped write the state constitution and served as state treasurer from 1907 to 1909.



About 1907, Minyan services had begun to be held in the homes of members of the community. These gatherings became the nucleus of the Orthodox Congregation B'nai Emunah, permanently organized in 1916. Rabbi Morris Teller served from 1918 to 1928, and was succeeded by Harry H. Epstein (1928-29) and Oscar Z. Fasman (1930-40). The old synagogue was replaced by a new structure in 1942. The well-established congregation had, in 1943, a membership of about 175 families. Rabbi Morris H. Finer was then spiritual head of B'nai Emunah.

As more Jews migrated into the growing town, a Reform congregation was formed, in December, 1914, and incorporated under the name of Temple Israel, joining the Union of American Hebrew Congregations in 1915. In 1943 Ely E. Pilchik was rabbi. The congregation then had a membership of about 170 families. Pilchik's predecessors in the pulpit of Temple Israel included Jacob B. Menkes, Charles B. Latz, Samuel S. Kaplan, Benjamin Kelson, Jacob B. Krohngold, Hyman A. Iola, and Abraham Shusterman.

In addition to the congregational schools and auxiliaries, Tulsa Jewry maintained, in 1943, several active organizations: a lodge of the B'nai B'rith (chartered in 1916), a section of the National Council of Jewish Women, a chapter of Hadassah, a district of the Zionist Organization, and a branch of the Pioneer Women. The community also established the Jewish Charities, an affiliate of the city's Community Chest. In 1938 the Tulsa Jewish Community Council was founded to coordinate all fund-raising and allocation activities and to govern all cultural, civic-protective, and other matters pertaining to the welfare of the community. Under the auspices of the local section of the National Council of Jewish Women the *Jewish Review,* a monthly periodical (established about 1920), was being issued at Tulsa in 1943. With the upbuilding of the community, Tulsa Jewry became sensitive to all Jewish life, and in its responsiveness and activity approached being a model Jewish community in a smaller United States city.

Economically, the Jews of Tulsa engaged as oil producers, and operators of pipe and supply companies (an auxiliary of the oil industry). They were also general merchants and in the professions. Julius C. Livingston, oil merchant, and prominent in Jewish affairs, was active in the chamber of commerce and in community fund drives. Travis I. Milsten was secretary (1932-34) and vice-president (1934) of the Tulsa County Bar Association, as well as treasurer (1933) and vice-president (1934) of the Junior Chamber of Commerce. Maurice Sanditen, prominent merchant, was elected to the board of directors of the Tulsa Chamber of Commerce (1943). Leo Meyer had, in 1943, been serving as a member of the park board for many years.

ELY E. PILCHIK.

Temple Israel in Tulsa, Oklahoma

TUMIM, I. (pseudonym, Isaac Reingold), poet and parodist, b. Russia, 1878; d. Chicago, 1903. He came to the United States at the age of fifteen, and entered the sweatshop garment industry as an operator. The working conditions aggravated his physical weakness, and he became a victim of tuberculosis. Despite the difficulties of his life, Tumim made a name for himself in Yiddish circles of the West as a lyricist, especially for his imitations of English musical comedy lyrics.

He wrote also parodies of the accepted Yiddish librettists, and his work was set to music and sung at workers' concerts. Among the lyrics that appeared in print, with a musical score, were *Der Veltzinger* (1894); *A Bintel Blumen* (1895); and *Mashindlech*.

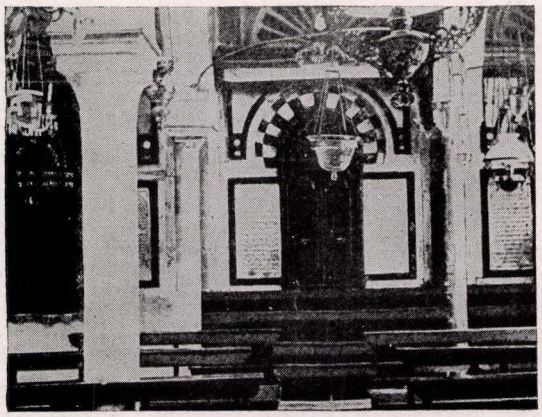
TUNIS AND TUNISIA. Tunisia is a French colony on the northern coast of Africa, with a population of 2,600,000, including 54,243 Jews (1926). It was formerly a vassal state of Turkey and, from 1881 on, a French protectorate.

According to old Jewish tradition, Jews had already settled in Tunisia before the destruction of the First Temple (586 B.C.E.). Excavations prove that Jews lived in Tunis at the beginning of the Christian Era. After the destruction of Jerusalem by Titus (70), many Jews came to settle in Tunisia. These first settlers took to agriculture, cattle breeding and trade. They separated into different tribes and paid a certain amount of tribute to Rome. Under the Roman regime and later under the rule of the Vandals, the Jews became quite wealthy and their number increased so rapidly that Christian ecclesiastical assemblies enacted a series of special anti-Jewish measures. After the disruption of the Vandal state in 534, Justinian issued an edict placing the Jews on an equal level with the pagans. In the 7th cent. the Jewish population in Tunisia increased through the influx of Spanish refugees who escaped from persecution by the Visigothic kings. According to Arabian historians, they intermarried with the native Berbers and converted several of their powerful tribes to Judaism. When Tunisia fell under the rule of the caliphate of Baghdad a new Jewish influx ensued.

In the year 788 Imam Idris severed the connection with the Baghdad caliphate, and part of the Jews of Tunisia joined the army of Idris and formed an independent military division. After a short time they refused Idris further support, being unwilling to fight against their coreligionists who remained loyal to the caliphate. After Idris became conqueror he avenged himself, compelling the Jews to pay an annual high poll tax and to supply girls for the harem.

When the Aglabites became the masters of Tunisia (800-909), the condition of the Jews improved, and especially the community of Kairwan flourished. When the Jews, together with the members of other faiths in Kairwan, were suppressed by Sirid-al-Moisa (1016-62), many Jews fled to Tunis, which gained in importance.

Under the Almohades (from 1146 on) the Jews experienced very difficult times; for they as well as Christians were compelled either to adopt the Mohammedan religion or to leave the country. Many Jews in Tunisia embraced the Islamic faith; but with this conversion they also aroused distrust on the part of the government, which compelled them to wear a special garb and a yellow cap. In the first half of the 13th cent. the condition of the Jews in Tunisia improved considerably. Important communities were flourishing in Kairwan, in the city of Tunis, on Djerba Island and in other places. In the capital of Tunisia, however, Jews were not permitted to settle in the city proper, as they were regarded as "foreigners"; they had to live outside of its walls.



A glimpse of the Jewish section in Tunis

Later they obtained permission to live in a special section, "Hira," within the city, which until 1857 remained the ghetto of Tunis. The trade and commerce of the country were controlled by Jews, who were frequently administrators of government monopolies. Even the office of the government tax collector was filled by a Jew (from the 14th cent. on). He also had the function of acting as an intermediary between the government and its Jews. At his advice, the government gave its approval to those elected to the Council of Elders, heading the community, and to the elected rabbis; all decisions of the Council of Elders had to be ratified by him.

From 1535 to 1574 Tunisia was under Spanish rule, which brought great suffering to the Jews in Bizerte, Sura and Sfax. In the 16th cent. the immigrants from Spain established their own congregation, Kehal Gerush (Congregation of the Exiles). After Tunisia returned to the rule of the Turks the Jews again acquired religious liberty and autonomy. Nevertheless, even then they were the prey of both the arbitrary officials and the fanatic rabble. The men were forced to wear a special garb, consisting of a collarless and sleeveless blue blouse, wide black trousers, black slippers and a small black cap. Only in winter were they permitted to wear stockings. They were allowed to ride only on saddleless donkeys and mules. Their fate changed for the better only when European diplomatic representatives intervened in behalf of the Christians and, by implication, also of the Jews. From 1813 to 1816 Mordecai Manuel Noah served as United States consul to Tunisia. In 1881 Tunisia came under the French protectorate, and the Jews received equal rights with the Mohammedan population.

Tunis was the seat of a Talmud Torah (founded in the middle of the 17th cent.). Among its pupils was the important Talmudic scholar, Isaac Lombroso, chief rabbi of Tunis (1710-52), and author of the Talmudic commentary *Zera Yitzhak* which, after his death, appeared as the first

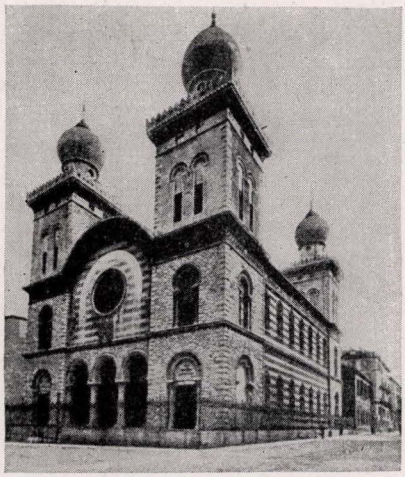
Interior and ark of the Great Synagogue in Tunis

printed Hebrew book in Tunis. In the 18th and 19th centuries Tunis also had a number of great rabbis who were endowed with the right to pronounce judgment in commercial and civil actions. ISAAK MARKON.

In the 20th Century. According to the census of 1926, there were 54,243 Jews in Tunisia, exclusive of those of non-Tunisian nationality, such as French or Italian Jews. More than half of them lived in the capital, the city of Tunis (28,143, or 10 per cent of the total population); the rest were to be found mainly in the cities of Sousse (5,000), Djerba (on the island of Djerba, 3,832), Sfax (3,385), Gabès (2,849), Gafsa (2,104), Bizerte (1,907), Béja and Kairwan (about 1,000 each). The community of Tunis was composed of two large native groups, the Touensa, of Tunisian origin, and the Grana Jews, descendants of Portuguese and Italian immigrants. Each of these two groups (and of the numerous smaller immigrant groups, including Palestinian, Moroccan, Bedouin, White Russian and other Jews) had its own charitable institutions, synagogues and cemeteries. The chief rabbi (grand rabbin) of Tunis was appointed and compensated by the state, while the rabbis of the various communities were appointed by decree of the Bey, and received salaries from their community. The Jews of Tunisia were subject to the jurisdiction of the indigenous (native) courts, except as regards questions dealing with their personal statutes and questions of succession, which were referred to the Tribunal Rabbinique.

The majority of the Tunisian Jews in the 1930's were poverty-stricken, engaged in small handicrafts, chiefly tailoring, woodwork, shoemaking and the manufacture of cheap jewelry, and in petty shopkeeping. Their ghetto was once described as "the seventh circle of hell." Only a small number were lawyers, doctors, teachers and merchants. Most of them were strictly religious, and only a few were influenced by the culture of the French rulers, although in the capital as well as in other cities schools for Jewish children were maintained by the Alliance Israélite Universelle. In 1934 the foundation of a new large synagogue was laid. Before Mussolini's adoption of the racial policy, the majority of the Jews in Tunisia were pro-Italian. There was also a strong pro-Zionist sentiment among them; two of the periodicals (*L'avenir sioniste,* of Tunis, and *Le réveil juif,* of Sfax) were Zionist, while a third was independent (*La justice,* of Tunis).

There was always some anti-Jewish feeling in evidence in Tunisia; this was increased by the presence of three large more or less inimical ethnic groups: the French, the Italians and the Arabs. In 1917 to 1918 it resulted in widespread pogroms, despite the fact that many Jews from Tunisia were fighting during the first World War in Europe and at the Dardanelles. Anti-semitism was chiefly spread by one local Italian organ, *L'unione,* of Tunis, and the anti-Jewish propaganda carried on by the Italians increased in 1938 to such an extent that the Jewish community turned to the French resident and asked him to intervene.



After the collapse of France (June, 1940), in conformity with the anti-Semitic decrees of the Vichy regime similar decrees were introduced into Tunisia, aiming at the elimination of Jews from business and the professions by "regulating" their enterprises and assets and by barring them from all the professions from which the Jews in France had been ousted. In December, 1940, the Tunis Bar Association Council was dissolved, and a special board, free of Jews, was appointed by the government. In January, 1942, a special "ghetto fish market" was set up. Only one Jewish periodical was permitted for the whole community.

The Jews, like the other inhabitants of Tunisia, suffered severely from the war conducted there. In late 1942 and in the early months of 1943 the Nazis forced the Jewish population of Tunis to work on the fortifications of the city, while all synagogues and Jewish-owned institutions and business enterprises were closed; German and Italian soldiers, together with pro-Axis Arabs, looted Jewish-owned houses and other property. Two hundred and fifty prominent Jews of Tunisia were imprisoned and threatened with shooting "if the Jews continue to help the Allies." The Allied offensive in the winter of 1942 to 1943 revived the Jews' hopes for an improvement in their situation. Early in May, 1943, the United Nations wrested the whole of Tunisia from Axis control, captured the entire Nazi and Italian army, and liberated also the Jews of Tunis and Bizerte. ALFRED WERNER.

TUNKEL, JOSEPH (Der Tunkeler), Yiddish writer, b. Bobruisk, Russia, 1881. He studied in the Yeshiva at Kaunas, and later at the art school in Vilna. His first published work, in the form of poems, appeared in 1901; later he turned to the writing of satirical and humorous sketches. He came to the United States in 1906, remaining until 1910, during which period he founded the *Kibitzer* (1908) and later was one of the founders of the *Kundes.* After his return to Europe, Tunkel settled in Warsaw, where he was a contributor to the *Moment* and *Haint,* and also acted as correspondent for publications in other parts of Europe and in the Americas. His many satirical novels portray the weaknesses and defects in the lives of the Jewish masses of Poland, and were of great influence in the education of these masses.

Among Tunkel's books were: *Der Krumer Shpiegel* (1917); *Oif tzu Klaimersht* (1920); *Ich Lach fun Eich*

The principal synagogue in Turin

(1922); *Mit die Fiess Aroif* (1924); *A Reise Iber Russland* (1925); *Fort a Yid kain Eretz Yisroel* (1931); *In Guten Mut* (1933); *Gelechter on a Tzeit* (1935). Tunkel was also the founder of a literary monthly, *Sambatyan,* in Warsaw. In 1940 he came to New York city, where he was living in 1943.

TURIN (in Italian, **Torino),** city in the province of Piedmont, Italy, with 3,786 Jews among its 600,000 inhabitants (1938). Although information as to the presence of Jews in Turin dates back to the 4th and 5th centuries, when Bishop Maximus endeavored to sever the social relations between the Jews and Christians, there are no coherent sources available as to Jews in Turin prior to the year 1424. The tax records of these Jews, who were money lenders, indicate that they were of French or German descent. The authorities of Turin decided to confine the Jews to a special section of the city in 1425.

The code of Duke Amedeo VIII (1430) confirmed the validity of the old laws dealing with the Jews. The right of residence for them in Turin was not to exceed a period of ten years, at the expiration of which they were forced to file a petition for renewal; for its granting they had to pay a special tax known as *censiva Judaeorum.* Duke Emanuele Filiberto banished the Jews from his dominion in 1560 and 1566, but they were soon permitted to return to the city and were even granted special privileges (1568). Furthermore, the duke admitted foreigners, especially Jews expelled from Spain or Portugal, to settle in his state; he even promised immunity to Marranos returning to Judaism. His object was thereby to promote the maritime trade of his state, but he did not succeed in carrying out his plans due to the opposition of the pope and of the king of Spain. A special official, with the title of *Conservatore,* to administer Jewish affairs, was appointed probably during the regime of his successor, Carlo Emanuele.

The condition of the Jews in Turin changed for the worse under the reign of the kings in the 18th cent. and it was not until the French Revolution (1789 on) that their lot began to improve. Immediately upon the arrival of the French the Jews received full political and civil freedom (1798), but lost it again in the following year when the city was occupied by the Austrian and Russian army. When, later, the French returned to the city, the Jews reobtained their emancipation. However, after the defeat of Napoleon and the re-establishment of the dynasty, they were again relegated to their old inferior position. Although King Victor Emanuele I exempted them from wearing the Jew-badge and gave them the right to engage freely in commerce and trade (1816), they were permitted neither to attend universities nor to run for public office. They remained in this state until March, 1849, when King Carlo Alberto issued a proclamation granting full religious freedom to all his subjects; in July of that year the Jews were placed on an equal basis with the rest of the population. Thereupon the Jews of Turin began to build a magnificent synagogue, but due to lack of means could not bring it to completion. The city purchased the unfinished structure and converted it into the Museo del Risorgimento Italiano (Mole Antonelliana).

TURKESTAN, a term which for a long time was used to designate the regions between the Caspian Sea and Tibet. East Turkestan forms a part of China, whereas the lands of West Turkestan were successively conquered by Russia in the second half of the 19th cent. Subsequent to the Russian Revolution of 1917 five Socialist Soviet Republics, the Kazakh, Turkmen, Uzbek, Tajik and Kirghiz Soviet Republics, were constituted in what was approximately the territory of Turkestan. The nucleus of Jewish population in these states is that of the Bokharan or native Central Asiatic Jews who have conserved as their language a Persian dialect intermingled with Hebrew and Eastern Turkish words, called Tajik-Jewish by the Russians and by the Tajik Jews themselves. The ranks of these native Bokharan Jews were swelled by Russian and other European Jews who came after the Russian conquest.

The Union of Socialist Soviet Republics did a great deal for the development of Central Asia. The opening in 1930 of the Turkestan-Siberia railroad (Turksib), which crosses Kazakhstan, as well as a large-scale effort to reclaim land for agricultural purposes, were accompanied by a mass settlement of Jews in the Kazakh Republic. While the census of 1926 recorded only a small group of Jews in that state, in 1939 a total of 19,000 Jews were found to be living in Kazakhstan. In parallel manner, the Jewish population of Uzbekistan had grown from 38,000 in 1926 to 51,000 in 1939, whereas the Jewish population in the other three republics remained very small.

According to an investigation published by *Soviet-*

skaya Aziia in 1931, only 42 per cent among the native Jews could read, and their reading was limited mostly to the prayer-book. Under the influence of the large number of schools established by the several governments, this state of affairs changed rapidly. In 1938 fifty-three separate titles of books with a total publication of 79,000 were published in Tajik-Jewish. A magazine with a yearly circulation of 19,000 copies and a newspaper with 581,000 yearly copies were also published in that idiom.

Following the German Nazi invasion of the Soviet Union in the summer of 1941, great numbers of Jews were evacuated to Uzbekistan, Tajikistan and Kazakhstan. They included not only Jews from White Russia, the Ukraine and Moscow, and other cities of the Western regions of Russia, but also from the Baltic states, as well as refugees from Poland, freed from internment camps in European Russia, as well as from the northern provinces of Roumania. Over one million Jews found refuge in Uzbekistan alone, among them tens of thousands of Jewish colonists from the Crimea who were scattered over collective settlements in the Uzbek republic. The offices of the Moscow Jewish religious community were also evacuated to Tashkent, and engaged in the organizing of material and cultural assistance to the newly settled masses (report of the Jewish Telegraphic Agency).

Tashkent thus became a new center of Jewish life and Yiddish culture. The Jewish Art Theatre, the Leningrad Jewish Operetta Company and the Kiev Jewish Variety Theatre toured the cities and towns of Central Asia and won acclaim also from the non-Jewish population. A large number of outstanding Yiddish authors organized a Yiddish section of the Uzbek Writers' Union late in 1941, and engaged in patriotic work in connection with Russia's war effort.

TURKEY, a republic of Asia Minor and adjoining territory in the Balkan peninsula which superseded the Ottoman Empire, with a population of about 14,000,000, including 78,730 Jews (1935).

1. History. Historically, the Jewry of Turkey formed three groups: Jews who had lived in the Byzantine Empire, and came under Turkish rule after the fall of the Byzantines; emigrants from Spain, Portugal and Italy, the so-called Sephardim; and emigrants from Austria, Hungary, Russia, Germany and Poland, the so-called Ashkenazim.

In the 14th cent., when the Turks appeared in those regions which now belong to Turkey, i.e. Thrace, Anatolia and Asia Minor, they found only small Jewish communities which had been founded in the Roman period. Brusa was the first city with a Jewish population which was conquered by the Turks. The Jews who suffered much under the Byzantine rulers began to breathe freely under Islam. The Turks gave them religious liberty, and otherwise did not molest them, so that they lived there in complete security. At that time there began for the Jews of the Near East a long period of peace which compensated them for the sufferings which Jewry experienced in the Occident.

Until the 19th cent. the Jews were under the Turkish regime, unrestricted by any special laws. Many of them enjoyed the favor of the sultans, who quite often chose Jews as their physicians, and also appointed Jewish advisers, scholars and ministers, on whom the Jewish population could always depend as their defenders in the royal courts; this resulted in exceedingly friendly relations between Islam and Jewry. But although the history of the Jews in Turkey is full of glory for individual Jews, the masses were steeped in ignorance and poverty. The autocratic government, being bound to no solid and legal system, cared neither for the masses of the Turkish people nor for those of the other subjects.

The first sultans, Orchan, Murad I, Mohammed I, and Murad II (1326-1421) introduced the tax called Khanadji, through which the Jews acquired the right to own land in both city and country. The two cities of Brusa and Adrianople, which, with their Talmudic colleges, soon had become the center of the Jewish settlement in Turkey, began to be populated with Jews from the neighboring countries who were seeking an asylum under Mohammedan rule.

In 1453 Constantinople was conquered by the Turks. Its conqueror, Mohammed II, was very sympathetic toward the Jews. The large community of Constantinople became now the political and cultural center of the Turkish Jews. Under the reign of Mohammed II the famous scholar and first Hacham Bashi (chief rabbi) of Turkey, Moses Capsali, was the representative of the Turkish Jews in the state council (Divan). After the persecutions suffered by the Jews in the Byzantine period and as compared with the existence of the Jews in the Western countries, the life of the Jews seemed so peaceful that in 1479 Rabbi Isaac Zarfati, then living in Turkey, sent a circular letter to all Jewish communities in Germany and Hungary, urging the Jews to leave their countries for Turkey. As a matter of fact, the sultan received the victims of the Christian countries of Spain and Portugal with hospitality. Sultan Bayazid II (1481-1512) is reported to have said to his courtiers: "You call Fernando [Ferdinand, king of Spain, who in August, 1492, had the Jews there expelled] a wise king—he who impoverished his own land and enriched ours!" The immigration of the Spanish Jews greatly enriched Turkey both materially and culturally; along with the Spanish language and literature they brought into Turkey a highly developed culture, the best physicians and great scholars, among whom the Hamon family was especially famous. At the beginning of the 16th cent. there were in Turkey about 100,000 Marranos. Later in the 16th cent. Constantinople had forty-four synagogues.

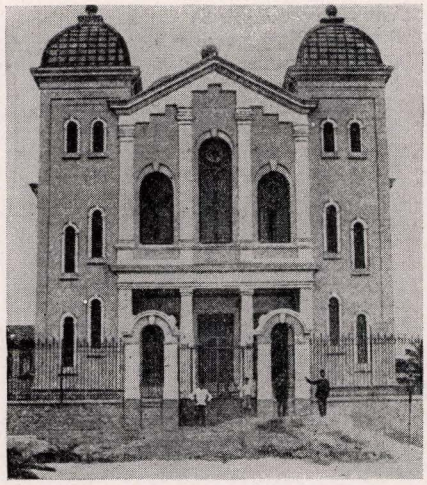
The Spanish emigrants, the Sephardim, founded great communities in Smyrna and Salonika, and they soon played a prominent role in Jewry, a role which they have succeeded in retaining until the present. The immigration of the Ashkenazim, which began in the same period, had no such great influence. The Ashkenazim had their own synagogue, and kept apart.

Under the reign of Suleiman the Magnificent (1520-66) and Selim II (1566-74) the Jews attained their greatest prominence. Suleiman appointed a Jew, Shealtiel, to the post of spokesman for the Jewish nation and gave him the title of Kahiya; like all courtiers, he had free access to the palace. Suleiman also rebuilt the walls of Jerusalem and Tiberias. When, in the reign of Suleiman, the ritual murder accusation was spread in Turkey, the sultan issued an edict directing that in the future every accusation of ritual murder brought against the Jews claiming that they were using human blood in the baking of the unleavened bread (Matzoth) was to be tried and judged not by a common court, but in the presence of the ruler.

After the conquest of Hungary by the troops of the sultan, the keys of the city of Buda were handed to the victorious general, Ibrahim Pasha, by a Jew, Joseph ben Solomon, who headed a deputation of citizens of Buda.

When Suleiman, after his visit to Buda (1526), returned to Turkey, he ordered 2,000 Jews from Buda to follow him; he settled them in various parts of his empire. The descendants of Joseph ben Solomon, with the surname "Alaman" (meaning "the German"), were still living in Turkey in the 20th cent., exempt from all taxes and assessments.

Under the reign of Sultan Selim II, successor to Sultan Suleiman, there lived in Turkey a prominent Jew, Don Joseph Nasi, Duke of Naxos, the former Marrano João Miquez. As the sultan's favorite and chief adviser, he exerted considerable influence on European affairs. There lived in Turkey, too, at the same time, his relative, Donna Gracia Mendesia, who contributed much to the favorable situation of the Jews in Turkey through her wealth and wisdom. An example of the great influence which Joseph Nasi and Gracia Mendesia exerted is the Ancona incident, when they established a boycott of the port of Ancona in order to retaliate for the persecution of the Jews by the pope.



With the reign of Selim II began the decline of the Turkish Empire which, accompanied by the decadence of Turkish Jewry, continued into the 19th cent. The later sultans made the life of the Jews difficult by means of continuous chicanery and special laws. Murad III (1574-95) even issued an order calling for the death of all Jews in the empire, but Solomon Ashkenazi succeeded in preventing the execution of this order.

Individual Jews, such as Solomon Ashkenazi, Esther Kyra and the physician Fonseca, still achieved success in the realm of politics, but as a whole the history of the Jews in Turkey became more and more a series of struggles in a defense against accusations of ritual murder which time and again were brought chiefly by Greek Catholics and Jesuits living in Turkey. In addition, there were epidemics, conflagrations and earthquakes which brought great disaster upon the Jewish sections. In 1702 the Jews were forbidden to wear yellow slippers; they were ordered to cover their heads and feet with shawls and black leather. In 1728 all Jews who owned houses in front of the mosque of the Walid sultans were obliged to sell their houses to Mohammedans, lest the mosque be contaminated by their presence.

The unfavorable condition in Turkey led in the 18th cent. to the establishment of a colony of Turkish Jews in Vienna, where they enjoyed certain privileges.

In the 16th cent. Turkey was the center of Cabala, the forerunner of Hasidism. The works of Joseph Caro, Isaac Luria and Hayim Vital made a profound impression upon the Jewish masses. Solomon Molcho, David Reubeni and others presented themselves as "prophets," or "kings of the Jews." But the most important agitation was caused by the appearance of Sabbatai Zevi; this agitation spread over the whole of Turkey, and had its reverberations also in Europe. The movement came to an end with Sabbatai Zevi's conversion to Islam. His disciples formed a small sect, the Dönmehs, which was still in existence in the 20th cent.

In the 19th cent. equal legal rights were granted to the Turkish Jews. In 1839 and in 1856 they were accorded, at least theoretically, equality before the law, security of life, honor and property, the free exercise of public worship, the right of founding communities, access to administrative positions, the reorganization of the system of taxation and of court procedure, and the right of performing military service. In the 19th cent. the Jewish communities in the provinces of Turkey, particularly in Palestine, were in abject poverty and on a low spiritual level. The Jewish philanthropists Moses Montefiore and Baron Edmond de Rothschild did their utmost to better the condition of the Palestinian Jews; the Alliance Israélite Universelle also endeavored to elevate the cultural level of the Turkish Jews. As a result of their efforts, Turkish cities were granted schools in which Jewish children were able to receive a European education and to be prepared for various professions and attainments. By accepting Mohammedan children also, the Alliance Israélite endeavored to strengthen the friendly relations existing between both groups; indeed, many young Turks who had been educated in its schools remained loyal friends of the Jews after attaining to high positions.

2. Cultural Life. The awakening of the true spiritual life of the Jewish masses in Turkey did not begin until the 15th cent. The Spanish Jews who came to Turkey before the great expulsion from Spain (1492) brought with them the first seeds of the development of the cultural sciences. In the 16th cent., after the arrival of the large masses of emigrants, their spiritual life began to take on a more varied form. It proceeded to shape itself into a Spanish-Jewish culture interwoven with oriental elements. In the 15th and 16th centuries Jewish thought had been dominated almost exclusively by rabbinic and Talmudic studies. The following attained to considerable importance: Joseph Caro, author of the *Shulhan Aruch;* Moses Almosnino, famous preacher and author in the fields of philosophy and astronomy; the scholars Solomon and Judah ibn Verga, the former the author of the *Shebet Yehudah;* Amatus Lusitanus, famous physician and author of a number of medical books; Abraham Zacuto, author of the *Sefer Yuhasim;* Elijah Capsali, author of a history of Venice and of Turkey; the poet Israel Nadjara.

In the 16th and 17th centuries there lived in Turkey Joseph Solomon Delmedigo, an opponent of Cabala, and a great number of important rabbis, such as Isaac and Joseph Pardo, Astruc ibn Sanchi, and the family of Solomon Algazi, from which came many important scholars. The Ashkenazic rabbis included Abraham Gedaliah, Ephraim Ashkenazi and Hezekiah da Silva.

As a result of the development of the printing press and of book publishing there appeared in Turkey in the 18th cent. a great number of translations of scholarly works from other languages. Important Jewish scholars were Jacob Kuli, author of a Bible commentary, and Abraham Toledo, author of *Copias de Joseph* and of a poem about the Biblical Joseph.

In the 19th cent. Turkish Jewish scholars occupied themselves with secular studies in addition to Talmudic research. Abraham ben Isaiah Dayyan of Aleppo wrote two ethical works, *Zichron Hanefesh* (1842) and *Holech Tamim* (1850), a glossary and responsa. Other

A provincial synagogue in Turkey

Turkish Jewish literature of this period consisted mostly of translations. The first Jewish newspaper published in Spanish, *Puerta del Oriente,* appeared at Smyrna in 1846, but Jewish journalism did not experience any great development. Most of the approximately thirty newspapers published in Turkey in Hebrew, French and Spanish were short-lived. JACQUES GOLDBERG.

3. In the 20th Century. The fact that Turkey, at the end of the 19th cent. and in the first years of the 20th, was under the influence of the great European powers was favorable for the position of the national minorities, especially the Jews. At the beginning of the 20th cent. about 150,000 Jews (2.7 per cent of the total population) were living in European Turkey, 210,000 Jews (1.1 per cent of the total population) in Asiatic Turkey, and 12,000 in Tripoli; thus the country then had a total of about 375,000 Jews, of whom 65,000, including from 7,000 to 8,000 Ashkenazim, lived in Constantinople (Ruppin, Arthur, in *Zeitschrift für Demographie und Statistik der Juden,* October, 1908). Several Jews were members of the Young Turkish Committee of Union and Progress, such as Chief Rabbi Hayim Bedjarano, one of the greatest authorities on the Turkish language, and played a leading role in the coup d'état of 1908 which brought definite emancipation to the Jews, among others.

In the Balkan wars and in the first World War numerous Jews served on all fronts. After the War the community in Constantinople increased to 90,000, owing to the influx of refugees from Russia, while the total number of Jews in Turkey reached 200,000, although Syria, Palestine and Mesopotamia had been separated from Turkey. During the occupation of Istanbul by the Allied Powers agitation in favor of Zionism was carried on in the city, but the movement disintegrated when Istanbul was recovered by the Turkish national troops and the government of Kemal Pasha started a nationalist policy of complete Ottomanization which was applied also to the Jews. In the first post-War years much assistance was given to the community and to the refugees by the Jewish Colonization Association and by the American Jewish Joint Distribution Committee.

In 1923 minority rights were stipulated for the Jews in the Treaty of Lausanne. However, the Jews voluntarily undertook to forego these rights, being assured by the government that the existing equality of all citizens, irrespective of race or creed, had rendered these minority rights superfluous. In a letter signed by Jewish notables and addressed to Kemal Pasha (February 6, 1926) the Jews of Turkey renounced these rights, thus depriving themselves of the chance of protesting to the League of Nations because of the frequent violations of the minority guarantees. Yet the destruction of Jewish cultural autonomy had started as early as 1923, when all teachers in Jewish schools were ordered to teach in the Turkish language, and no exception was made even for the schools maintained by the French Alliance Israélite Universelle. In 1923 all Jewish schools were ordered closed on Friday, the Moslem day of rest, and in 1926 the Turkish language was declared to be the only medium of instruction. The separation of church and state deprived the chief rabbi of Turkey of his position as Jewish representative and the Jewish religious and cultural organizations of their official status. At the same time, a decree drastically curtailed the travel rights of all non-Moslem groups (1925), and Jews were excluded from the chamber of commerce and dismissed from the transportation and communication agencies. The government adopted a hostile attitude toward Zionism, and banned all Zionist activities.

When, in 1934, thousands of Jews were forcibly removed, without explanation, from the Dardanelles region and Thrace, it was feared that this act was the start of an anti-Jewish policy after the German model. But an investigation of the case was immediately undertaken by Minister of the Interior Shukry Bey; the Turkish Fascist organization, Hali Ferkassi Ismeli, was proscribed and its organ, *Milli Inḳilap* (The National Revolution), was suppressed; the leaders of an anti-Semitic riot staged at Adrianople in that same year were punished, and a communiqué condemning anti-Semitism was issued by Premier Ismet Pasha. Referring to the mass emigration of Jews, a leading newspaper had previously (November, 1930) urged the government to abandon its anti-Jewish policies to prevent the loss of the Jews who "are distinguished for their creative intelligence and productive activity." The situation actually improved; Doctor Abrevaya, professor of general pathology at the University of Istanbul, was made member of the parliament, Jewish refugee professors from Germany were given teaching positions at Turkish universities, and even the policy of barring refugees from reaching Palestine via Turkey was modified.

In recognition of the government's liberal attitude, the Association of Turkish Culture, founded by young educated Jews for the purpose of spreading Turkish customs and language among the Jews of Turkey, issued an appeal to all Turkish Jews to use the Turkish language instead of Ladino; it was read in all synagogues in Turkey on Rosh Hashanah of 1938. After the death of Kemal Pasha (November, 1938) there was some fear that certain reactionary elements might attempt to create a Jewish problem in Turkey after the German model; but all endeavors to start anti-Semitic disturbances were frustrated by the swift action of the new president, Ismet Inonu. He revoked a police order to expel foreign Jews, and issued a declaration stating that the Jews were equal citizens and that Turkey was proud to have given asylum to prominent persons who fled barbarous persecution. In the following year Premier Refik Saygam declared to the press that there never was nor would be a Jewish question in Turkey and that the Turkish Jews, as far as the government was concerned, were Turks, not Jews. While under Nazi pressure, in May, 1942, all Jews serving on the staff of the official Turkish News Agency were dismissed, the Turkish government firmly refused an official request of the German embassy for the extradition to the Reich of German Jewish refugees.

The number of Jews in Turkey continuously de-

Chief Rabbi Isaac Sakhi of Turkey

creased in the post-War years: from 81,872 (55,592 in Europe; 26,280 in Asia) in 1927 it dropped to 78,730 in 1935 (separate figures for Europe and Asia were not available at that time). In 1927 more than half of Turkish Jewry were concentrated in Istanbul (47,035); 16,501 resided in Izmir (Smyrna), and 6,096 in Edirne (Adrianople). In 1941 Istanbul had a Jewish population of about 35,000, and the Jewish population of Adrianople remained unchanged.

In 1943 Abraham Galanté was elected a member of the Turkish National Assembly. ALFRED WERNER.

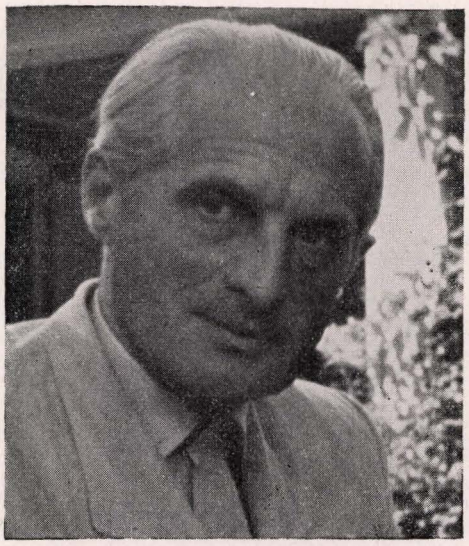
TURÓCZI-TROSTLER, JÓZSEF, philologist and educator, b. Moskóc, Turócz County, Hungary, 1888. He studied literature at the Universities of Budapest and Berlin, and received the Ph.D. degree. Prior to the first World War he taught at the state secondary school of Temesvár, and after the War, during the period of the revolutions, he was made a university professor. Having been demoted from this position by the counter revolution, he taught, from 1920 on, at the girls' Gymnasium of the Jewish community of Pest. In 1939 he was named assistant director of that school.

Turóczi-Trostler investigated the influence of European trends of thought on the cultural development of Hungary. Of cosmopolitan erudition, he showed Hungary its place in the European community by stressing its cultural interdependence with the rest of Europe. He was thus working unpolitically against the spiritual and political autarchy which was professed by Hungary in the 1920's and 1930's.

Among Turóczi-Trostler's significant works are: *Der Entwicklungsgang der ungarischen Literatur* (2 vols., 1928-30); *Die Anfänge der ungarischen Persönlichkeitsdichtung* (1933); *Ungarns Eintritt in das literaturhistorische Bewusstsein Deutschlands* (1930-35); *A magyar szellemi élet forrásai a XVI és XVII. században* (Sources of Hungarian Cultural Life in the 16th and 17th Centuries).

A distinguished historian of German literature, he published, among many other books in this field, *Stefan George* (1920); *Zur Stoffgeschichte von Schillers Balladen* (1915); *Ujabb irányok a német irodalomtörténeti kutatásban* (New Trends in the Research of the History of German Literature; 1923); *Wassermann* (1927); *Goethes Herz ein Kieselstein* (1928). Together with the poet Lőrinc Szabó, he published three volumes of translations from Goethe.

TUSKA, a Jewish family active in United States communal life from the middle of the 19th cent. on. The first member of the family to arrive in the United States from Germany was MORDECAI TUSKA (d. Rochester, N. Y., 1871), who became rabbi of B'rith Kodesh in Rochester in 1849 and retained the post until 1861. His son, SIMON TUSKA (b. Germany, 1835; d. Memphis, Tenn., 1870), studied at the Breslau Jewish theological seminary after his graduation from the University of Rochester. He became the first rabbi of the Reform congregation in Memphis, serving until his death.



BENJAMIN TUSKA (b. Memphis, 1867; d. New York city, 1933) was the son of Simon Tuska. He graduated from Johns Hopkins University, received the law degree at Columbia University, and practised law in New York city. Active in numerous Jewish activities, Tuska was for many years president of the Educational Alliance and a trustee of the Fred L. Lavanburg Foundation. In 1931 he turned over to the Semitic division of the Library of Congress a collection of 278 volumes of Judaica and Hebraica formerly owned by his father.

TUWIM, JULIAN, Polish poet and playwright, b. Lodz, Poland, 1894. He studied at the Gymnasium and university in Lodz, at the same time devoting himself to the study of Russian and Polish literature. His first volume of poems, *Czyhanie Na Boga* (Craving for God), which appeared in 1918, and his second group, *Sokrates Tanczacy* (The Dancing Socrates), a year later, won him recognition as a writer. He continued to publish poems which were published in the best literary magazines and collected in volumes. His tenth volume, *Wiersze Zebrane* (Collected Poems; Kazimierz, 1933), was hailed by Czachowski, historian of Polish literature, as a demonstration of true poetic talent. Tuwim received the highest award of the Polish Academy of Literature and a prize from Lodz; he was hailed all over Europe as the Polish Pushkin.

In addition to enriching Polish poetry, Tuwim translated many Russian works into Polish, especially Pushkin (for which he received the prize of the Polish Pen Club), Balmont and Briusov, the Russian epic *Saga of Igor* and poems of the French writer, A. Rimbard. He wrote books on various subjects of Polish interest, in connection with such fields as witchcraft, folklore philology, drunkard's slang, and the history of the epigram. He published three books of nursery rhymes, one of which, *Lokomotywa* (*Locomotive;* 1938), was translated into English and French. He wrote several musical comedies and many songs and satirical sketches; he was literary co-director of the Teatr Polski in Warsaw, president of the Union of Polish Playwrights and Composers and one of the founders and leading spirits of the Union of Polish Musicians and Playwrights.

Tuwim's poems have been translated into many languages. Three of his books were published in Hungarian, Czech and French; a selection, *The Selected Work of Julian Tuwim,* was published in the United States in 1942. Some of his poems were translated into fifteen languages and reprinted in anthologies and magazines all over Europe.

Jewish life rarely appears in his writings, and his sharp satire touches on Jews in only a few of his poems. This satire, however, has a Jewish basis and is reminiscent of the work of Heine. Due to his being a Jew, Tuwim never received full recognition in Poland;

Julian Tuwim

though hailed as the greatest Polish poet of his time, he was never elected to the Polish Academy of Arts and Letters. He escaped from Poland after the Nazi invasion in 1939 and two years later came to the United States, where he was living at White Plains, N. Y., in 1943. Z. TYGEL.

TWELVE TRIBES. The nation of Israel, especially in the time of the Judges and early kings, was considered as consisting of twelve tribes, corresponding to the twelve sons of Jacob-Israel. Actually the number must have been larger, for not only was Joseph the title for the two separate tribes of Ephraim and Manasseh, but there were various other clans of which there are notations in the Biblical narratives: Gilead, Machir, Caleb, Jerahmeel and the Kenites. The Song of Deborah (*Judges* 5) mentions only ten tribes altogether: Ephraim, Benjamin, Machir, Zebulun, Issachar and Naphtali, who participated in the fighting, and Reuben, Gilead, Dan and Asher, who remained aloof. Simeon, Levi and Judah are not mentioned; Machir presumably developed into Manasseh, and Gilead into Gad. The Blessing of Moses (*Deut.* 33) mentions all the traditional twelve tribes except Simeon; the Blessing of Jacob (*Gen.* 49) has the complete number. Bible scholars have suggested that the number of tribes was a varying one, and that the division of the nation by Solomon into twelve districts, each of which was to support the royal household for a month in the year (*I Kings* 4:7), aided in establishing the traditional number of twelve for the tribes.

The classification of the sons of Jacob by the latter's wives (*Gen.* 29 and 30) serves to divide the tribes into the following groups:

Older Leah Tribes: Reuben, Simeon, Levi, Judah.
Younger Leah Tribes: Issachar, Zebulun.
Zilpah Tribes: Gad, Asher.
Rachel Tribes: Joseph (Ephraim and Manasseh), Benjamin.
Bilhah Tribes: Dan, Naphtali.

These groupings may be based on historical reminiscences of the early history of the tribes. Thus Reuben, Simeon and Levi were among the first to enter Canaan; Simeon and Levi met with disaster (*Gen.* 49:7) and were thenceforth more or less subordinate to Judah, apparently an old name which in the time of David was expanded to cover a number of clans. The Rachel tribes occupied the center of the country and were apparently in alliance. The tribes of the handmaids, Zilpah and Bilhah, were apparently subordinate, and had more of a Canaanite intermixture.

Although the twelve tribes as separate entities disappeared as the nation consolidated under the kings, the idea of twelve tribes lingered until much later times. Thus, Ezekiel apportions the land among twelve tribes (*Ezek.* 48); the *Letter of Aristeas* gives the number of the translators of the Torah as seventy-two, six for each tribe; and the author of the apocalypse preserved in *Revelation* gives the number of those sealed for salvation as 144,000, or 12,000 for each tribe (*Rev.* 7:4-8).

TYGEL, ZELIG, writer and organizational executive, b. Warsaw, Poland, 1890. He studied in the Warsaw Yeshiva and at the University of Warsaw (1915-18). He became a journalist, writing for Yiddish, Hebrew and Polish newspapers. In 1919 he was attached to the section of Henry Morgenthau's mission to Poland that was engaged in a study of the economic situation. In 1920 Tygel came to the United States.

In the United States Tygel continued to write for the Yiddish press. His writings appeared also in Anglo-Jewish periodicals. But his activities were not limited to journalism. He established an American branch of the Zeire Zion (affiliated with the Palestinian labor party, Hapoel Hatzair), and was national secretary from 1921 to 1923. From 1924 to 1940 he was executive director of the Federation of Polish Jews in America; in 1935 he founded the World Federation of Polish Jews Abroad, which in 1943 had branches in many countries; and he helped found (1940) the American Friends of Polish Jews to aid the Jews of Poland. He was active in winning recognition for Haym Salomon's services to the American Revolution, and he helped secure passage by Congress of the bill providing for land for a monument (1936).

Tygel published in Yiddish a history of the Jewish tailors of Warsaw (1916), a history of the Jewish community in Warsaw (1918), and studies of Jewish personalities (1928). His Hebrew writings include a collection of stories for children (1918). He is author (in English) of: *Palestine Today* (1935); *Haym Salomon, His Life and Work* (1925); *Let's Talk It Over* (1939; based on his weekly column for Anglo-Jewish papers, with an introduction by Charles Edward Russell). He was a contributor to this encyclopedia.

TYPES. An abundance of literature has appeared, since the middle of the 19th cent., dealing with the attempt to classify mankind into races and racial types. The Jews especially have attracted the attention of racists and antiracists alike. The entire question of race and types has been given unprecedented significance since the advent of Hitler.

Science has not yet clarified its position with respect to races and racial types. This neglect on the part of genetics, medicine, sociology, anthropology and ethnology has led politically-minded individuals and special interest groups to claim that their prejudices have scientific sanction. Hogben points out how confused the sciences are; each science believes some other science has the facts concerning races and types, and each bases its misconception upon this conjecture. Indeed, little satisfactory work exists in any of the natural or social sciences to supply an adequate basis for distinguishing races of mankind. Most of the investigations have been amateurish, arbitrary and accidental.

Jews and non-Jews have raised the question and have answered it variously. In general, there are two motives underlying the insistence upon the existence of Jewish types. There are well-meaning though misled individ-

uals who are inclined more toward wishful thinking than scientific investigation. They have argued for the purity of the Jewish race and for recognizable Jewish types mainly out of pride in the oneness and uniqueness of the Jewish people. On the other hand, there is a group of individuals who have emphasized, out of malice or ignorance, the existence of Jewish types in order to further certain religious, political, economic or social prejudices by stigmatizing the Jews. This has been the technique of Nazi science and propaganda as exemplified by Julius Streicher and *Der Stürmer*. Thus, unfortunately, an air of pseudo-science has been given to modern anti-Semitism, while science has avoided its responsibility to state clearly and explicitly its position in relation to this problem (Montagu).

Geneticists have not been able to agree upon the true relationship between nature and nurture, that is, heredity and environment. By the same token, it is not possible to prove the existence of Jewish types as a result of inherited characteristics or acquired traits. Yet much that is written by Jews and non-Jews begins with the assumption that racial types exist and then seeks corroborative evidence in terms of causes in the environment or in the heredity of the Jewish people.

Anthropology and anthropometry have attempted to classify the Jews according to such physical characteristics as color and type of hair, color of the eyes, size of the head, shape of the head, standing height, sitting height, color of the skin, texture of the skin and shape of the nose. Social psychologists have tried to identify certain psychological types, such as, the Ghetto type, the Shylock, the mendicant, the peddler, the supersensitive, the sensual, the radical, and the intellectual Jew. Ethnographers have attempted to classify Jews in terms of culture groups, such as the Sephardim, Ashkenazim, Falashas, Yemenites, and Chinese Jews. Physiologists have sought to distinguish Jews not so much on the basis of morphological or structural characteristics, as on the basis of Jewish stamina and illness, blood groups, or even the Jewish odor. The pseudosciences of phrenology and physiognomy have given rise to a classification of Jews in accordance with profiles. Experimental psychologists, for example, Jaensch, have gone so far as to identify the Jews as the unstable anti-type which is degenerate and biologically different from the normal type. Attempts have been made, with little success, to classify Jews according to posture, gait, and mien. The psycho-physical and cultural traits involved in gesticulation, language, and mental capacity are equally unknown.

The efforts of the geographers to classify Jews have led only to further confusion, for they hold that geographically the Jews fall into four groups: the Mediterranean; the West European; the Yiddish-Khazar in Crimea, Caucasus, and Central Asia; and the East European. This classification has little real value in identifying Jewish types or distinguishing Jews from the rest of mankind, for each group contains within itself extreme variations and gross differences. Whatever characteristics are ascribed to Jews in certain geographical areas are usually the characteristics also of the non-Jewish population of those same localities. The extent to which differences in environment change the anthropological type is not known. Doubtless, flora, fauna, climate, geology and other biofactors have marked influence. Moreover, no single group of Jews has yet been found to be pure and unmixed. Even the generally accepted distinction, Sephardim and Ashkenazim, does not represent pure groups, for each is, in and of itself, the result of mixing.

The Jews were probably derived from a Babylonian stock and must have been a mixture before they entered the land of Canaan. There was a further admixture of Canaanites, Arabs, Hittites, Philistines, Phoenicians, Greeks and innumerable other peoples. Certainly after the destruction of the Temple and the dispersion, it is impossible to assume a group that may be characterized sociologically or anthropologically as a Jewish race, even excluding proselyte groups such as the Idumeans, Falashas, Yemenites, the Jews of China or the Khazars.

An anatomical study of the characteristics of the Jewish people based upon the form of the skull, the capacity of the skull, the color of the hair and eyes, the form of the face and the form of the nose has never been made scientifically or on any significant scale, yet conclusions have been drawn concerning all of these physical characteristics. It is assumed that the Jews are mainly brachycephalic, of dark hair and eyes, of dark complexion, with a narrow face, and a long, figure-six nose. Nazi propaganda has made much use of this in caricaturing the Jew. Attention has been called also to the fact that a narrowness of chest and smallness of hand and foot are prevalent among the Jews.

All these assumptions have created a being who is essentially a straw man. No evidence exists that the form and size of the skull of the Jew is not normally distributed, that the color of the hair and eyes of the Jew does not vary from very light to very dark, that the form of the face and size and shape of the nose are the same for all Jews and different from all non-Jews. In reality, so far as physiological, morphological and anatomical characteristics are concerned, the Jews, as a whole, are as varied as the rest of mankind; they are distributed, according to any one or all of these characteristics, normally from extreme to extreme.

The struggles of the 19th and 20th centuries gave to science a political, nationalistic point of view and to politics a new weapon in the form of science-tinged anti-Semitism. Numerous arguments pro and con have been advanced by Graetz, Weisenberg, Vogt, Renan, Guenther, Luschan, Gobineau, Chamberlain, Brutzkus, Fishberg, Tennenbaum, Boas and others. The variety of theses, both for and against the existence of Jewish types, is due mainly to the confusion of terminology and the inadequacies of science. Although there is much literature, there is little valid and reliable research. Whatever research has been done, has been colored by the prejudices of the investigator or the inferences of the interpreter from inexact and insufficient evidence. For example, conclusions concerning the cephalic index of all Jews have been drawn on the basis of one of the most widespread compilations of statistical data. It involves twenty-five countries of the world and a total of 4,901 cases (Brutzkus). The statistical manipulation of the data, however, was improper since the sampling was not random and the technique of averaging averages was not sound. The same defects are to be found in the compilation from eighteen studies involving 3,779 cases (Graeber).

Other works have dealt with the physical characteristics of the Jews. Variations in eye and hair color are so great that no reliable interpretation may be made. All human beings vary in texture of hair, shape of the head, breadth of nose, color of skin, stature and innumerable less obvious traits. It is not known to what extent these are determined by heredity or environment. Even if it should be assumed that they are determined largely by heredity, the effects of geography cannot be ignored. It is impossible, on the basis of physical characteristics, to distinguish Jews from all other hu-

man beings. The conclusions that have been drawn concerning the purity of Jewish types and the purity of races are based upon averages which have less significance than is generally assumed. Attempts have been made to identify the Jewish type or Jewish types. Evidence, however, exists which seems to indicate that there are those among the Jews with fair hair and dark hair, with light eyes and dark eyes. Rapid elocution and brusqueness in acting have been described as characteristics of Jews which distinguish them from other people. On the other hand, Jews are said to be timid and to possess an embarrassed expression which makes them seem always ready for flight.

Physically and psychologically, the Jews do not constitute a type nor is there a typical Jew. Those characteristics that have been selected as typical of the Jew are, in the main, traits borrowed from non-Jewish people with whom the Jews mixed or in whose proximity they lived over a period of years. The so-called Jewish nose is a case in point. The best that anthropology and anthropometry can do is to state that there is a considerable amount of intermixing and that the same characteristics appear again and again.

Race is not an objective reality. Physical anthropologists have been too long concerned with what exists solely in the minds of those who wish to create such a concept. By averaging the characteristics of a given group they have attempted to create racial types, which in fact do not exist. The concept of race is based upon a series of fundamental assumptions without scientific evidence.

The racist theory "that 'something' called 'race' is a fixed and unchangeable part of the germ plasm which, transmitted from generation to generation, unfolds in each people as a typical expression of personality and culture" (Montagu) is fallacious and confusing. The word race is not used dispassionately but involves a large number of emotional prejudices. It is a feeling that arouses almost automatic action. Education and, perhaps, the elimination of the word "race" seem necessary to overcome the deeply ingrained conditionings and prejudices.

It has never been determined whether similarity of environment or unity of race gives rise to the general impression that Jewish types do exist. It may be that the artificial segregation of the Jews, as a separate group with common interests, similar environment, one religion, and a unified cultural heritage, has made for a demarkation of Jewish types. Arguments have been proposed on both sides. There is as much cogency in those that assume the existence of Jewish types as in those that deny it. There is, however, no more scientific justification for the maintenance of either point of view, than for stating that the lips or the nose or the hair or the eyes are characteristic of Jews. "Experiment and experiment alone can decide the limitations imposed by whatever genetic differences distinguish one racial group considered as a fictitious whole from another racial group considered as a fictitious whole" (Hogben). At best, only an attitude of sceptical experimentalism can be maintained.

Many open-minded individuals agree that proof of the existence of racial types is lacking. Yet they raise the question why it is that cultures of different races differ so much from one another. The answer is found in terms of common experiences, for culture is a function of experience. Despite the fact that there is no genetic or somatic basis for a Jewish race or Jewish types, there may be a sameness of experience of all Jews everywhere in the world. This experience is based upon a oneness of a people joined by religion, tradition and culture. It is the result of the faith of the Jewish people in a common destiny, and a common hope. It may be this experience that has created a culture which distinguishes the Jew from the non-Jew. This culture is caused by and, in a sense, causes a psychological development and a pattern of behavior based upon certain ethical, moral principles.

"Insofar as the Jews constitute a 'racial type,' they should be longheaded since this is a distinctive Semitic character. But Einstein is, like a large proportion of Jews, extremely broadheaded. The Jewish problem indeed is, from the standpoint of biology, a particularly illuminating one. The ancient Jews were formed as a result of crossing between several groups of markedly distinct types. Later there has always been a certain amount of crossing between the Jews and non-Jewish inhabitants of the countries where they settled, the most striking example being the Black Jews of Northern Africa and the famous historical case of the Chazars of South Russia. The result is that the Jews of different areas are not genetically equivalent and that in each country the Jewish group overlaps the non-Jewish in every conceivable character. The word Jew is valid more as a socio-religious or pseudo-national description than as an ethnic term in any genetic sense. Many 'Jewish' characteristics are without doubt much more the product of the Jewish tradition and upbringing and especially of reaction against pressure and persecution, than of heredity" (Huxley).

TYRE (Hebrew *Tzor*), royal city of the Phoenicians, famous in antiquity for its world trade. King Hiram of Tyre is mentioned in the Bible in connection with the building operations of Solomon (*I Kings* 5:15; 9:27). The old city was built on a small island near the sea. Later this island was joined to the mainland by a causeway thrown up by the soldiers of Alexander the Great when he besieged the city; this has been expanded on both sides by an accumulation of sand. Tyre was never in Jewish territory, but some Jews lived there in the Biblical period and still more in later times. In the 2nd cent. the Tanna Simeon ben Yohai lived there. The markets of Tyre, which drew abundantly from the fruitful surrounding district, were visited by Jews. During the Middle Ages the city fell under the rule of successive empires, such as the Persians, the Byzantines, the Arabs and the Crusaders. For a time, probably from 1071 to 1109, it was the seat of the Palestinian Gaonate. The modern city, known as Sur, has about 5,500 inhabitants. Its former trade has been absorbed by Beyrouth (Beirut).

TYROL (TIROL) AND VORARLBERG, federal provinces of the Austrian republic which, in 1938, were incorporated into Greater Germany. As early as the 14th cent. Jews were living south of the Brenner Pass in those parts of Tyrol which, from 1918 on, belonged to Italy, such as Bozen (Bolzano), Meran, Riva, Rovereto, Brixen (Bressanone) and Trent (Trento). At the time of the Black Death (1348-49) the Jews in

Tyrol were persecuted, likewise for the alleged murder of Simon of Trent. Again, in the 15th cent., the Jews of Lienz were accused of a ritual murder, and in 1520 all Jews were expelled from Tyrol. Nevertheless, soon thereafter they returned in small numbers to the capital, Innsbruck, and to Bozen, but for over three centuries they were merely tolerated there. A number of Tyrolese Jews served in the Austrian army during the Napoleonic wars. The Bavarian edict against the Jews was in force in Tyrol from 1813 to 1815. It was not until after 1867, when full civil rights were granted to all Jews of the Austrian-Hungarian monarchy, that Jews settled in Tyrol in larger numbers, and founded communities at Innsbruck and Meran. In the era of the Austrian republic (1918-38) practically all the 350 Jews of Tyrol (Northern Tyrol) lived in the capital, Innsbruck. After the occupation of Austria by the Nazis (1938) the Jews were forced to leave Tyrol, and in 1943 no Jews were living in the German-occupied part of Tyrol. The history of the Jews in Southern Tyrol was, from its occupation by the Italians in 1918 on, the same as that of Italian Jewry.

According to the municipal law of Feldkirch, Jews were living in the province of Vorarlberg as early as the 14th cent. The only Jewish community, however, was established at Hohenems in 1617, when the Jews were granted far-reaching privileges by Count Caspar. Except for the years 1676 to 1688, when the Jews were expelled from Hohenems and found refuge at Sulz, another town in Vorarlberg, a Jewish community existed at Hohenems continuously until 1938, when the small community, then consisting of only a dozen persons, was dissolved by the Nazis. In 1943 no Jews were living in Vorarlberg. Among the rabbis who officiated at Hohenems were the noted Löb Ullmann, Abraham Kohn and Daniel Ehrmann. The families of the cantor Salomon Sulzer and of the physician Eugen Steinach came from Vorarlberg.

U

UJPEST, industrial town, suburb of Budapest. It was founded in 1835 by the Jew Izsák Löwy and his brothers on territory owned by Count István Károlyi. Löwy obtained from the count a charter in which equality of rights and freedom of trade were incorporated for all members of the new settlement. Thus the origins of the town and the Jewish community of Ujpest are common. The Jewish community was founded by about forty members, and included the Neuschloss and the Wolfner families, subsequently founders of important timber and leather industries respectively. Izsák Löwy provided funds for a synagogue which was built in 1839; in the following year a school was founded. Löwy was elected chief magistrate.

Ujpest had 1,525 Jewish inhabitants in 1870; in 1895 their number was 3,500 and in 1930 there were 11,400 Jews in a total population of 67,400. Jews were the owners of many important industries. Among the Jewish citizens of Ujpest Endre Antal was attorney general of Pest county and Lajos Lissauer justice of the court of appeals. In 1936 there were twenty-three Jews among the sixty members of the city council.

The Jewish community had two synagogues and a six-grade elementary school. Eleven distinct organizations devoted themselves to Jewish cultural and charitable work. Among the rabbis of Ujpest were Lajos Venetianer, Hebraist and historian, and Dénes Friedmann, co-editor of *Magyar Zsidó Szemle.* Abraham Wachsmann-Leichtag, a Jewish scholar of Ujpest, completed in 1936 a dictionary of the Talmud and Midrash including 42,000 items (in manuscript). Streets of Ujpest named after Venetianer and Izsák Löwy were renamed in the days when public life in Hungary took its cues from German Nazism.

UJVÁRI, PÉTER, author and journalist, b. Tolcsva, Hungary, 1869; d. Budapest, 1931. His father, Wolf Groszmann, was rabbi at Nové Zámky (Érsekujvár). Ujvári was educated at Yeshivas in Hungary.

At the age of twenty, he worked on a Szeged daily newspaper; later he became an assistant editor in that city. From 1907 on he lived at Budapest where, in addition to writing for daily newspapers, he contributed to the Jewish periodical press. In 1907 there appeared his novel *Az új kereszténу* (The New Christian), a portrait of the Hungarian Jew turned Christian. Many other novels were published in serials in the pages of *Egyenlőség* and other Jewish newspapers. Ujvári became a chronicler of many kinds of Jewish life in Hungary: Jewish life in Upper Hungary, centering upon the study of the Torah, and the life of urbane "Israelites" at Budapest.

From 1920 to 1923 Ujvári lived at Kolozsvár, where he became a staff member of the Hungarian-Jewish daily *Uj Kelet.* Later he went to Slovakia, where he made several futile attempts at establishing a Hungarian-Jewish literary periodical. He edited *Szombat* (The Sabbath) in his home town, Nové Zámky; this was to continue an illustrated weekly newspaper, of identical title, which he had begun to publish at Budapest in 1919 and which was submerged in the revolutions of that year. He made another effort with the periodical *Judea* at Pressburg (1926), and with *Uj Judea* at Kassa in the same year. These ventures having

proved unsuccessful, he returned to Budapest where he became editor-in-chief of *Országos Egyetértés* (National Concord), a Jewish weekly.

During these years of peregrination his health had become seriously impaired. Although he was one of the best craftsmen of contemporary literary realism and had introduced a new figure to the world of literature, that of the Hungarian country Jew, his achievements were spurned by the official literary forums. Nor did he have the emotional hold on the Hungarian Jewish public that such writers as Sholom Aleichem and Isaac Loeb Peretz had on theirs, for Hungarian Jews were "Israelites," that is, Jews eager to forget their past. If Ujvári had chosen Yiddish as a medium of expression, he would have been a great figure in Yiddish letters but, since he wrote in Hungarian, only some of his writings (translated into Yiddish, English or German) reached the Jewish public outside of Hungary.

Next Ujvári set out on a project which was as successful as the means to achieve it were meager. In 1929 appeared the *Magyar Zsidó Lexikon* (Hungarian Jewish Encyclopedia), which Ujvári edited. This 1,000-page compilation contains, in addition to articles on theology, a complete record of the cultural and economic contributions of Hungarian Jews to civilization. Literary data are especially plentiful and make this work a valuable source for the history of Hungarian literature. Numerous articles on Hungarian Jewish history, based on the study of the recently discovered documents, were contributed by László Ujvári, a son of Péter Ujvári.

Two years after issuance of this work, Ujvári succumbed to illness. It was then that his representative work, *A mécs mellett* (By Candle Light), was published. This book, a stirring account of his years as a Yeshiva student, a German version of which had been published under the title *Beim Lämpchen,* was believed to have inspired *La Rose de Shaaron,* a novel by the French authors Jean and Jérôme Tharaud. He also left the manuscript of a great work, *Mózes élete és alkotása* (The Life and Work of Moses).

Ujvári was active in various organizations for the welfare of newspapermen. He helped found their national organization; in 1915 he was appointed executive secretary of the association of Budapest newspapermen. He was president of the pension fund of Transylvanian journalists and of the association of Hungarian journalists in Slovakia. In 1912 Ujvári was secretary general of the movement for uniting the Orthodox and Reform Jewish communities of Hungary.

Some of Ujvári's other works include *Legendák és krónikák* (Legends and Chronicles; 1906); *Echod; Matronita,* a Cabalistic novel; *Messiásvárók* (The Messiah Will Come); and *Leviathan,* a drama. His short stories were published in the Jewish periodical press of Hungary, Germany and Czechoslovakia, and in the Yiddish press of Poland and the United States. ANNA BETTELHEIM.

UKBA, MAR, the name of three exilarchs, the most noted of whom occupied the office from 890 to 913. He was engaged in a dispute with the Gaon of Pumbeditha, Kohen-Zedek, who persuaded the caliph to depose Ukba. The latter, however, won the favor of the caliph's secretary, and was restored to his office. Thereupon Kohen-Zedek again worked upon the caliph, and Ukba was banished. He went to Kairwan, in northern Africa, where he was received with high honors, and there spent the rest of his days.

UKRAINE, Soviet Republic within the Union of Socialist Soviet Republics. The Ukraine territory includes the former provinces of Kiev, Yekaterinoslav, Podolia, Poltava, Kharkov, Chernigov, the two provinces of Odessa and Donetz, which were created out of portions of former provinces, and, finally, a part of the province of Volhynia.

Jewish communities arose in the earlier Ukraine, whose boundaries were not identical with those of the present republic, in the course of the 16th cent. Cardinal Commendoni, who traveled through the Ukraine in 1565, reported that the Jews there owned land, carried on commerce, and engaged in the practice of medicine as well, but that they were occupied chiefly as lessees (Arendar). In the Ukraine, where Polish great landed proprietors held sway, the Jews were employed by them as lessees and renters of their estates, and served also as farmers of the state taxes.

Since the relations between the landed proprietors on the one hand and the vassal peasants and Cossacks on the other in the Ukraine were extraordinarily bad, and since for this reason uprisings were of very frequent occurrence, the Jews, as the result of their position as lessees whose task it was to collect the revenues for the proprietors with every means at their disposal, became the object of hatred by the masses of the population, and the victims of the populace's rebellions. Thus, in 1637, during the uprising of Pavliuk, 200 Jews were murdered. The Cossack rebellions which began in 1648 and continued until 1658 with intermissions assumed a particularly dreadful character. The hordes of Hetman Bogdan Chmielnicki murdered large numbers of Polish landed proprietors and thousands of Jews, and annihilated hundreds of Jewish communities during that fearful decade. In 1649 a treaty of peace was signed between the Cossacks and the Polish King Jan Casimir; by its provisions, Jews were permitted to reside "neither as owners nor as lessees nor as inhabitants in the Ukrainian cities in which there were Cossack regiments," i.e. in the voivodeships or provinces of Chernigov, Poltava, Kiev, and part of Podolia.

One year later, in 1650, the war between the Cossacks and the Poles was renewed, but it resulted unfavorably for the Cossacks. In the treaty concluded in 1651 one of the provisions accepted by Chmielnicki was his recognition of the right of the Jews "to be inhabitants and lessees on the estates of His Royal Grace and of the Szlachta (nobility)."

In that part of the Ukraine which remained attached to Poland after 1667, when the union of that part of the Ukraine lying to the left of the Dnieper River with the kingdom of the Muscovites took place, the Jews, in the course of the 18th cent., again frequently became victims of the numerous uprisings of the Haidamacks, bands of fugitive vassal peasants and Cossacks who avenged themselves through murder and plundering on the Polish landed proprietors and the Jewish lessees. Such uprisings occurred in the first decade of the 18th cent. under the leadership of Palei and Samas, again in 1734 and 1750, and in 1768 under Shelesniak and Gonta. On every occasion Jews and Poles were massacred by the thousand, and many Jewish communities were destroyed. Especially gruesome was the destruction by the Haidamacks of the city of Uman, where about 20,000 Jews and Poles are believed to have been killed. The catastrophe of Uman remained for a long period of time a painful memory of the Jews.

In that portion of the Ukraine which was united with Russia in 1667 the Jews were later persecuted repeatedly by the Hetmans. In July, 1721, Hetman Skoropadski issued a decree to have all Jews expelled by October of that year, with the exception of such as would submit to baptism; similar decrees were issued frequently in subsequent years. The legislation in the

Administration headquarters at Stalindorf (1940), center of the Jewish National District in the Ukraine

Ukraine with reference to the Jews was gradually adapted to the general Russian pattern; up to the partition of Poland (1772) the latter type of legislation was in general rigidly anti-Jewish. On the occasion of the decree issued by the Russian ministerial cabinet of the year 1740 with reference to the expulsion of the Jews from the Ukraine, it was established that in Little Russia, as the Ukraine was officially known in Russia, there were only 292 Jewish men and 281 Jewish women.

ISAAC LEWIN.

Under Soviet Rule. When the revolution broke out in March, 1917, energetic attempts were made in the Ukraine to attain to independence, and the land became a nominally independent "people's republic" ruled by the "Central Rada." Vladimir Temkin (Tiomkin) was the leader of the Ukrainian Jews in 1917, serving as minister of Jewish affairs and as president of the Jewish National Council in the Ukraine until the Bolshevists came to power in the latter part of that year, as the result of the October revolution. By the decree of January 9, 1918, called "Statute of Personal Autonomy in the Ukrainian People's Republic," national autonomy was granted to the "national minorities," including the Jews. Like the other minorities, the Jews were to form a national union whose communal and group organs were to be accorded state authority and whose supreme organ or representative body was to be a Jewish national council; there was also to be created a ministry for Jewish affairs. In 1918 Jacob Wulf Latzky-Bertholdi became minister for Jewish affairs of the Ukrainian Republic, but some time later was forced by the regime of the anti-Semitic Hetman Skoropadski (a descendant of the anti-Jewish Hetman Skoropadski of the year 1721) to resign his office.

However, this condition wherein the Jewish national council existed, as well as the ministry for Jewish affairs, was only of brief duration. Immediately thereafter there broke out in Russia a violent civil war of which the Ukraine became one of the chief theatres. During this period the Ukrainian Jews suffered from extraordinarily severe pogroms. In 1920, however, with the triumph of the Soviet rule in the Ukraine, the same Soviet regime was set up in the Ukraine as in the rest of Russia, and the regulations and decrees enacted for Soviet Russia applied in the Ukraine as well.

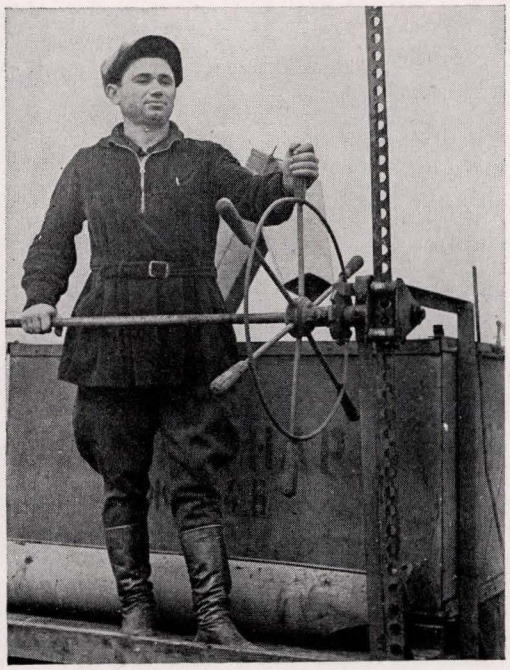
Until the Soviet regime managed to consolidate its position and its authority in the Ukraine occasional disorders occurred in the following period. In June, 1920, at Kiev peasants drove fifty-five Jews into a synagogue in one of the suburbs and then burned it to the ground. Many Jews in Kiev and the surrounding district were badly afflicted by an epidemic of typhus, especially severe among Jewish refugees who fled into the city from the outlying regions. A committee of Kiev Jews was formed to help them. Massacres of Jews occurred at Grigoriopol, Kolis, Kutchergan, Miastivka, Mogilev-Podolsk, Staroushitza and Stidnitza. In July, 1920, Professor Israel Friedlaender, of the Jewish Theological Seminary of America, of New York, and Rabbi Bernard Cantor, envoys of the American Jewish Joint Distribution Committee seeking to perform relief work among the Jews of the Ukraine, were murdered by Ukrainian bandits near the town of Yarmolince. A crowded synagogue at Tonshva was burned down by anti-Jewish rioters. In October there were pogroms in eleven towns of the province of Kiev, and in seven of Volhynia. Severe anti-Jewish pogroms were staged in November and December, 1920, by stragglers from the army of Simon Petlura. Attacks by the Petlurist soldiers were so severe that in April, 1921, a Jewish militia force was organized at Kiev to protect their communities and those in other parts of the Ukraine; in that year and in the succeeding two years this defense force proved an effective means in pacifying the country. Massacres occurred in December, 1920, also in Dubrovno and in the province of Homel; these were caused by the Goliaka (criminal bands). With the complete repulse of the Petlurists by the Red armies and their withdrawal into Galicia and Roumania, anti-Jewish attacks in the Ukraine ceased.

Pinchus Krasny was appointed minister for Jewish Affairs in June, 1920, and in the following May was reappointed to the post. In 1921 there was a continual stream of Jewish emigration from the Ukraine, especially to Constantinople and to Palestine, with many of those emigrating to the Turkish metropolis finally finding their way to Palestine. By the end of 1921 all anti-Jewish organizations in the Ukraine had been suppressed. By the beginning of 1922 all banditry and consequent attacks on Jews by bandits had been eliminated by the government. By 1922 there were large numbers of Jewish farmers in the Kiev district, where many Jews, failing to secure grants of land from the government, hired out to peasants as day laborers. In that year there was a considerable decline in emigration of Jews from the Ukraine, due to increased physical security and to the improved economic situation.

In 1923, when the representatives of the Polish government in the Ukraine refused to grant visas to Jews there who wished to return to their native Poland, the Ukrainian government retaliated by suspending all repatriation of Poles. The Jewish self-defense units in the Ukraine were disbanded by the Soviet government in that year on the ground that, the land being thoroughly stabilized, there was no longer any need for them. In summer the Ukrainian commissariat for foreign affairs declared the repatriation of Lithuanian citizens suspended, and stated that all citizens of Lithuania, Poland and Latvia who remained in Russia after September, 1923, were to be considered Soviet citizens.

From 1923 on there was a definite decline in the number of pupils enrolled in and in the attendance at the Yiddish schools in the Ukraine, the parents preferring to send their children to the public schools so that they might be prepared there to fit into the country's economic and cultural life. Jewish education was hampered also by a scarcity of teachers. In 1923 there was a total of 8,182 Jewish children attending the government schools, while only 700 (about 7 per cent of the total number of Jews in the city) studied in the Yiddish schools. In that same year 25 per cent of the schools in the Ukraine were closed by the government, and some 15,200 Jewish students attended the institutes (formerly universities). The Soviet government requisitioned a number of synagogues in the Ukraine, as elsewhere in the Soviet Union, for secular purposes. Late that year the Soviet government decreed that Yiddish was no longer to be recognized as an official language of the Ukraine, but it did not interfere with the previous legal provision that instruction in the schools was to be given in the mother tongues of the several groups of pupils.

Despite the issuance, early in 1924, of a decree by the Soviet government abolishing all secular and religious private schools, a number of Heders and Yeshivas continued to function in various parts of the Ukraine, some of them with the permission of the government. That summer, according to estimates made by the Ukrainian commissariat of agriculture, a total of 12,500 Jewish families were engaged in agriculture in the Ukraine. Several months previously the Soviet Republic of the Ukraine voted to discuss with the federated Soviet government the question of assigning land owned by the Soviet government in Northern Crimea and in the southern part of the Ukraine for the colonization of Jews, and to seek from it a special fund for the establishment of colonies, together with the aid of Jewish organizations in other countries.



Jewish agricultural experts at Stalindorf in the Ukraine

In July, 1924, the American Jewish Joint Distribution Committee set aside the sum of $400,000 for Jewish colonization work in Soviet Russia, and the Ukrainian government took steps to alter the land laws so as to permit the more impoverished strata of the Jewish masses in the cities and towns to settle on the soil. In the following spring the Central Agricultural Bank authorized all its branches throughout Russia and the Ukraine to grant Jewish farmers the same credits as were granted to peasants.

A decree issued by the Ukrainian government (1924), that after August 1st of that year all persons who were employed in governmental posts had to know how to read and write Ukrainian, led to the loss of thousands of positions by Jewish government employees who knew Russian but not Ukrainian. In addition, this Ukrainization process led to the dismissal of large numbers of Jewish workmen. In the Ukraine, as elsewhere in Russia, there was organized a "Jewish national center," under permission granted by the Soviet Central Executive Committee that localities in which Jews formed a majority could organize Soviets with Yiddish as their official language.

In 1925 Jewish as well as non-Jewish cemeteries in parts of the Ukraine were desecrated by vandals. Later that year local authorities throughout the Ukraine were urged by the people's commissariat for internal affairs of the Ukraine to form groups to guard the cemeteries, and to compel local religious organizations to pay part of the expense of engaging watchmen.

Aron Narodetsky, a prize-winning combine operator (1940) on the Maifeld collective in the Ukraine

Meeting of the board at the Jewish collective farm of Maifeld

In that year there were in the Ukraine 342 schools with Yiddish as their official language, attended by 56,394 children. There were also a Yiddish department at the Institute for Public Education, with 110 students; and four teachers' training schools, with 400 students. The 5,000,000 persons belonging to minorities living in the Ukraine included 1,555,000 Jews in 1925. In May of that year the chairman of the Soviet of People's Commissars, at the All-Ukrainian Congress of Soviets convening at Kharkov, asserted that the Ukrainian government considered the creation of separate Jewish districts or even of a separate Jewish region in the Ukraine a good policy, with the administration thereof in the hands of the workers and peasants, and with full linguistic independence.

Unemployment among Jews was particularly great in the Ukraine and poverty widespread in 1925 and 1926. It was expressed as the definite policy of the Soviet government to foster the settlement of Jews on the land, with the aid of foreign Jewish organizations. In 1925 the Soviet government allotted 62,130 desiatins of land (a desiatin is 2.7 acres) for Jewish colonization in the Ukraine, in addition to a large number of desiatins assigned for that purpose in southern Ukraine in 1924. In 1926 the total of land assigned for Jewish colonization in the Ukraine was 94,000 desiatins (.3 per cent of the total), although the Jews formed 6 per cent of the total Ukrainian population at that time. M. Butzenka, secretary of the Central Executive Committee of the Ukraine, reaffirmed the Jews' right to equal participation in Russian and Ukrainian economic life. In 1926 some 500 Jewish families in the Ukraine were settled on farms near the towns in which they lived.

According to a census taken in the Ukraine on April 1, 1926, the Jews who were members of trade unions totalled 127,162 (12.8 per cent of the total of all trades union members in the Ukraine). These were distributed as follows: needle trades, 6,614; leather trades, 7,321; printing trades, 4,957; woodworkers, 2,763; manufacture and sale of food products, 16,113; paper mill workers, 401; textile workers, 1,713; chemical trades, 3,462; building trades, 4,766; sugar mills, 3,379; metal workers, 7,777; mining, 831; railroads, 632; local transportation, 3,876; water works, 523; public communication, 384; education, 8,556; the arts, 3,498; public health, 14,377; clerks at soviet institutions or

trade establishments, 28,269; communal workers, 4,326; farm hands and forest workers, 1,474. However, unemployment among Jewish artisans in the Ukraine was so great that relief had to be brought in from foreign countries, and in the spring of 1928 the Ukrainian Soviet ordered all local soviets to relieve unemployment among the Jews by undertaking public works of various kinds and by furnishing the unemployed with tools.

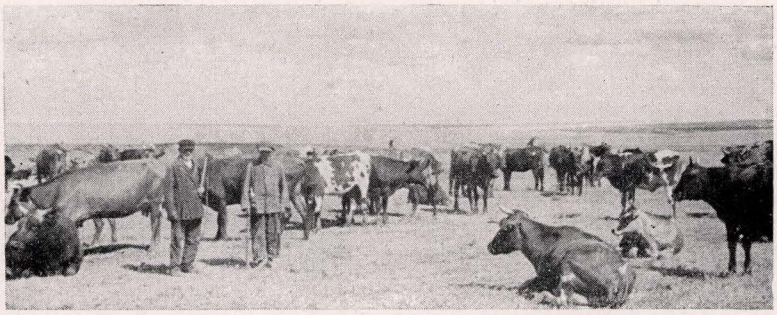
In 1939, according to the statistics compiled in L. Zinger, *Dos Banaite Folk* (1941), the total number of Jews in the Ukraine was 1,532,800, with 1,310,300 (85.5%) living in urban districts, and 222,500 (14.5%) in the villages. In the cities and urban centers the Jewish men totalled 597,984 and the women 712,369, and in the village settlements the number of Jewish men was 111,559 and that of the Jewish women was 110,915. In 1936 to 1937 the distribution of the Jews in the various branches of industry, mining, the professions and other occupations and handicrafts was as follows (percentage of the total of the employed Jews in the Ukraine): electrical trades, 1.0; coal, 0.4; peat industry, 0.1; metallurgy, 2.7; machinery and manufacturing, 25.7; electrotechnical branches, 2.6; ore mining, 0.1; mining of minerals, 0.5; chemistry, 2.8; building materials, 3.6; textiles, 2.4; leather and furs, 1.4; shoe industry, 5.9; needle trades, 16.2; paper industry, 0.5; printing, 4.4; food industry, 17.5; other industries and occupations, 14.2. In the same years (1936-37) the distribution of Jewish workers and employees according to the chief branches of economy was: in industry, 36.2; in building and construction, 4.4; in agriculture, 2.5; in transportation, 1.9; in communications, 0.4; in communal administration, 2.3; in trade and commerce, 11.6; in the various food branches, 4.5; cultural workers and employees, 16.3; in art, 1.5; in public health, 9.7; institutional workers, 8.7.

There were anti-Jewish attacks on several Jewish colonies in the Ukraine in 1928 and 1929, as well as some anti-Jewish agitation. Five Ukrainian peasants were sentenced to death for raiding a Jewish colony and killing several Jews. At Petrovsk two Jewish farming colonies were attacked, their houses being looted and their livestock and machinery stolen.

As a result of anti-religionist activities in the Ukraine and elsewhere in Russia, the synagogues in the Ukraine were reduced from 1,034 in 1917 to 934 in 1929, and the number of rabbis from 1,050 to 830. In mid-1929 a synagogue in Kineshma was converted into an apartment house, and one month later thirteen large synagogues and thirty smaller ones in all parts of the Ukraine were converted into workers' houses or used for other purposes. The general Soviet prohibition of the teaching of religion in classes or in schools was scrupulously enforced in the Ukraine as well, and the conducting of Heders and Yeshivas was opposed or suppressed. As in the rest of the Soviet Union, every effort was made to dissuade Jews from the observance of Jewish rites and ceremonies, not so much by the government itself as by militant anti-religious and atheistic groups.

Economic conditions continued poor for the Ukrainian Jews in 1929 to 1931, thousands of them being on the very brink of starvation. Artisans found it extremely difficult to find work or to pay the heavy taxes to which they were subjected. In many cases the tax collectors seized their goods or their machinery and tools for non-payment of taxes. Later the government ordered the taxes reduced and the confiscated goods and machinery returned; a special commission was established in the Ukraine to protect artisans from future seizures of their assets by superzealous officials.

The years 1929 to 1931 saw also a great decline in Yiddish as the vernacular of the Jews in the Ukraine; there was a total increase of 16 per cent in the number of Jewish workers who gave up Yiddish in this period. This was due in part to pressure by the Ukrainian government that all workers learn the Ukrainian language. Many Jewish workers were discharged from their employment in the cooperatives for not speaking Ukrainian, and in October, 1929, the Ukrainian commissariat of education actually ordered a mild reform of the Hebrew alphabet, consisting chiefly of the elimination of the letters customarily used at the end of words.



According to official statistics published in 1932, there were 10,000 Jews employed in the heavy industries in the Ukraine in that year, including the manufacture of locomotives, electrical mechanization and the assembly of tractors. In April the local authorities of Kiev were ordered by the All-Russian Central Executive to restore to the Jewish community there its sole remaining synagogue which they had confiscated.

In 1933 a total of 1,000 additional Jewish families were settled on farms in the Ukraine. In that year, according to a report of the Komzet, 80,000 Jews in the Ukraine were engaged in agriculture, part of a total of 200,000 Jews settled on the land in all parts of Russia from 1925 to 1933. In 1935 there were in the Ukraine three autonomous Jewish regions, Kalinindorf, Stalindorf and Zlatapol. The 11,000,000-ruble (about $6,000,000) indebtedness of the Jewish agricultural collectives in the Ukraine and in other regions of the Soviet Union was cancelled by Soviet decree. Of especial importance for the Jews of the Ukraine was the general Soviet decree of October 9, 1934, restoring full civic rights of all sextons, cantors, clergymen and religious functionaries of all denominations, who had been deprived of their rights as enemies of the Soviet government, and removing them from the list of declassés, if they had been engaged in productive and socially useful labor for the preceding period of five years.

In February, 1937, the sum of ten million rubles ($2,000,000) was granted by the Agro-Joint (American Jewish Joint Agricultural Corporation) and by the Soviet government for the expansion and continued development of the Jewish agricultural colonies which the Agro-Joint had founded in the Ukraine and in Crimea from 1924 on. Part of this sum, which was used especially for irrigation and industrial projects and for a continuation of the electrification of the colonies, was furnished by the colonies themselves. Funds were provided by the Government Agricultural Bank for the settling of additional farming families on the land in 1937. In 1938 the total of Agro-Joint colonies in the Ukraine and Crimea reached 242, but in that year the Agro-Joint, ORT and Jewish Colonization Association began the liquidation of all their work and their assets in the Soviet Union, including the Ukraine; by the end of 1938 all such work had been totally discontinued.

After the Nazi Occupation. In June and July, 1941, the German Nazis invaded and took possession of a large part of the Ukraine. A large number of Jews were evacuated from the Ukraine to Uzbekistan, Tajikistan and Kazakhstan, territories in the former Turkestan. Many Jews flocked to Kiev, capital of the Ukraine, the Jewish population of which increased to about 200,000. Nazi anti-Jewish propaganda was severe, for the Ukrainians were urged to "liberate themselves from the domination of the Jewish Bolshevist clique in the Kremlin." Many additional thousands of Jews migrated from the Ukraine to the interior of Russia. Hetman Skoropadski, who in the first World War had been appointed by the Germans head of the short-lived "Ukrainian State," joined the Nazi forces invading the Ukraine in 1941 also, and conducted propaganda in which he attempted to persuade the Ukrainians to rebel against "the Jewish Bolsheviks."

Ukrainian Jews were compelled to do forced labor for the Nazi armies, and to wear white armlets bearing the Shield of David (the six-pointed Jewish star).

Herds of cattle on the Jewish collective farm "Yakir" before the German invasion

With the aim of stirring up the Ukrainian peasants in the conquered province, the Mendel Beilis blood accusation was revived by the Nazis and spread by radio and pamphlet.

In August, 1941, the notorious Eichmann, formerly Gestapo head in Vienna, was appointed head of the Gestapo in the Ukraine with complete authority to deal with the Jews there as he saw fit. Two months later great massacres of Jews in the Ukraine behind the battle lines took place. Thousands of Jews unable to retreat with the Soviet armies into the interior of Russia were mowed down by Nazi machine gun fire. In the course of these massacres, which were reported to have begun as early as the month of August, 1941, more than 50,000 Jewish men, women and children were murdered in Kiev alone. Nazi troops and agents spread anti-Jewish reports among the Ukrainian population, which, however, remained sympathetic toward the Jews, refusing to participate in the massacres and in many instances giving shelter to refugee Jews from the Ukraine, Poland and other parts of Eastern Europe.

In November, 1941, large numbers of Jews from Bucovina and Roumania were deported to the Ukraine, where they were interned in makeshift ghettos. Reports spread by the Nazis in the Ukraine that the Jews of the province were responsible for the massacre of many Ukrainian nationalists in Lemberg at the time when the city was occupied by the Soviet troops failed to set the Ukrainian population against the Jews, and Ukrainian leaders in Nazi-occupied Galicia cooperated in relief and administrative problems. Later reports showed conclusively that particularly the entire Jewish population of Kiev had been murdered by the Nazis in the previous massacres on the ground that they had served as "Soviet spies and guerrillas." When, in mid-December, all Jews remaining in Kiev were ordered to report to the Nazi military authorities, large numbers of Jewish women killed their children and then themselves, and many elderly Jews committed suicide as well, fearing a new massacre. Other cities and towns in the Ukraine were the scenes of massacres of Jews by Nazi machine gun troops in December, 1941. A concentration camp was set up at Transnistria, in the Ukraine, to which Jews were deported from Bucovina, Bessarabia and Transylvania, and other districts.

In early January and in April, 1942, the Nazi authorities made new attempts to incite the Ukrainian population against the Jews through anti-Semitic propaganda. All these attempts remained unsuccessful. New massacres of Jews in Ukrainian towns, including Novozibkovo, in the district of Kiev, and Unich, occurred in September and October, 1942. In the latter month large numbers of Jews were deported from Limbourg, Liége and Antwerp, Belgium, to the Ukraine.

UKTZIN ("stalks"), twelfth and final tractate of Toharoth, the sixth and last division of the Mishnah. It contains three chapters, and discusses cases in which the root, stalks and hulls of plants may become unclean or convey uncleanliness from the objects to which they are attached. The third chapter enumerates how various objects may become unclean, such as spices, fish, milk and honeycombs. The last verse of the tractate acts as a conclusion for the entire Mishnah, and

A pre-Nazi view of the vast vineyards of the Maifeld collective farm which produced a bumper crop in 1940

gives two sayings of the rabbis, one dealing with the reward of virtue, the other with the blessing of peace. The Halachic material of Uktzin seems to have been assembled at an early date (*Hor.* 13a).

The Tosefta to the tractate consists of three chapters, and discusses similar subjects. There is no Gemara to it in either Talmud.

ULLMAN, a family active in the mercantile and communal life of New Haven, Conn. The family was founded by Morris and Minnie (Fleischner) Ullman, who arrived in New Haven from Bavaria in 1847.

Isaac Morris Ullman (b. New Haven, 1863; d. New Haven, 1930), their son, was known for his political and civic enterprise. He was for many years the minority leader in the Republican Party of the state. On the staff of Governor George E. Lounsbury, Ullman served as colonel, and later he was quartermaster general for Governor Rollin S. Woodruff. He was president of the New Haven Chamber of Commerce, and for a time on the board of education. As chairman of the board of the New Haven Hospital, Ullman played an important role in combining that institution with the expanded Yale Medical School during the 1920's. A leader in the Community Chest movement of the country, he served as the first president of the New Haven Community Chest. Chosen treasurer of the American Jewish Committee in 1922, he held that post at the time of his death. In 1928 he established a scholarship at Yale in memory of his wife, Flora Adler Ullman, daughter of Max Adler, New Haven civic leader.

Louis M. Ullman (b. New Haven, 1866; d. New Haven, 1928) was the brother of Isaac Morris Ullman, and associated with him as a political and communal leader. He served as a major on the staffs of Governors Lilley, Lounsbury and Woodruff. He was married to Sophie Osterweis, daughter of Lewis Osterweis, pioneer Connecticut cigar manufacturer.

Jacob B. Ullman (b. New Haven, 1870; d. New Haven, 1906), a third brother, was a judge of the common pleas court at the time of his death. He was the youngest man up to that time to hold such judicial position in Connecticut, and the first of his faith. He was married to Mollie Steinert, daughter of Morris Steinert, long prominent in New England musical circles and donor of the Steinert Collection of antique musical instruments to Yale University.

ULLMAN, SAMUEL, civic leader, b. Germany, 1840; d. Birmingham, Ala., 1924. He served during the Civil War in the Confederate Army, and was severely wounded in action. In 1884 he removed from Natchez, Miss., to Birmingham, where he became active in civic life and Jewish affairs. He was a member of the Birmingham board of education for eighteen years, and for eight years its president. He was a minister of Temple Emanu-El, in Birmingham, from 1891 to 1894. The Ullman Memorial Library and a plaque were dedicated in Birmingham as a tribute to his memory (November, 1929).

Lit.: Birmingham News, Nov. 10, 1929; Cohen, George, *Jews in the Making of America* (1924) 98; Wiernik, Peter, *History of the Jews in America* (1931) 233.

ULLMANN, ADOLF (DE BARANYAVÁR), political economist, b. Budapest, 1857; d. Budapest, 1925. His father, Móric G. Ullmann, was knighted for outstanding contribution to the economic life of Hungary. Adolf Ullmann studied at the academy of commerce at Budapest, and entered the employ of the Hungarian General Credit Bank, where he gradually rose to a leading position, succeeding Baron Zsigmond Kornfeld as president on the latter's death in 1909. Ullmann shared with Kornfeld in the responsibility for major financial operations which improved the finances of the Hungarian state. His large-scale activities in founding and expanding industries promoted the industrial development of Hungary in peace and increased its industrial efficiency in war.

A member of the board of directors of more than twenty-five banking and industrial enterprises, Ullmann was vice-president of the national industrial association of Hungary. He was decorated with the Hungarian iron cross order of the third class, and with the commander's cross of the Francis Joseph order. In 1910 he was appointed a member of the upper house of the Hungarian parliament, .and in 1918 he was made a baron. He was a contributor on financial subjects to the most important dailies of Austria-Hungary. As the result of a trip to the United States he published *Amerikai bankügyek* (American Banking Affairs; 1908).

ULLMANN, SÁNDOR (DE ERÉNY), jurist and philanthropist, b. Budapest, 1850; d. Ischl, Austria, 1897. He studied and practised law, and published several books dealing with commercial and industrial law. From 1884 to 1892 he sat in the lower chamber of the Hungarian parliament.

Ullmann was knighted, at the age of thirty, in posthumous recognition of his father's services who, as a vice-president of the Hungarian Commercial Bank of Pest, had made a signal contribution to building the economic life of Hungary. Upon the occasion of his being raised to the rank of nobility, Ullmann established a 3,000-gulden research fund at the Hungarian Academy. He was known also as a founder and benefactor of the Budapest polyclinic and a patron of writers.

ULLSTEIN, family of publishers in Berlin. The establishment by 1933 was the largest publishing business in Europe, if not in the world.

The founder of the business was Leopold Ullstein (b. Fürth, Bavaria, 1826; d. Berlin, 1899). While he was still alive three of his five sons (altogether he had ten children) entered the firm. These were, chronologically: Hans Ullstein (b. Berlin, 1859; d. Berlin, 1935), who entered the firm in 1889 and was its legal counsel for many years; Louis Ullstein (b. Berlin, 1863; d. Berlin, 1933), who entered the firm in 1881 and became the business head of the establishment; Franz Ullstein (b. Berlin, 1868; from 1941 on he resided in New York city), who studied law, entered the parental business in 1894, became publisher and editorial director, and finally, during the years preceding the advent of Nazism, was the firm's leading spirit.

Rudolf Ullstein (b. Berlin, 1873; in 1943 he resided in New York) entered the firm in 1901, and became its technical director. He also supervised the famous Ullstein Printing Plant in Berlin-Tempelhof (completed in 1926). Hermann Ullstein (b. Berlin, 1875; in 1939 he settled in New York) was the youngest of the five brothers. He received a commercial education which took him to Russia. He entered the parental firm in 1902, and became director of the magazine and book departments.

Among Leopold Ullstein's grandsons, Louis' son, Heinz Ullstein, and Hans' son, Karl Ullstein, likewise entered the firm.

Leopold Ullstein married twice. His second wife was non-Jewish. The sons from this marriage (Franz, Rudolf and Hermann) were half-Jewish.

Leopold Ullstein

Leopold Ullstein was the son of the wholesale paper merchant H. H. Ullstein. He left the parental business in Fürth at the age of twenty-two in order to seek larger fields in Berlin. His progressive political opinions soon gained him contact with Eugen Richter, Ludwig Löwe and others, and led to his election as member of the Berlin city council (1871-76). From 1876 on he worked exclusively for the enlargement of his publishing firm, which he started on July 14, 1877, when he bought the moribund *Neues Berliner Tageblatt* together with the printing firm of Stahl and Assmann for 60,000 marks. The paper had shortly before been established by several dissatisfied editors in competition with the then ten-year old *Berliner Tageblatt* (Mosse), but they could not make a go of it.

Leopold Ullstein brought the paper out in the evening instead of the morning, changed the masthead to *Deutsche Union,* and soon gave the paper up altogether because he was unsuccessful in propagating his political views. At the same time (1878) he bought the *Berliner Zeitung,* which he merged with the *Berliner Bürgerpost* and later with the *Deutsche Union.* Within a short time he increased the new paper's circulation to 40,000, a then unheard of figure. Among its editors in those days were Gustav Karpeles and Adolph Kohut. Thereafter the undertaking grew remarkably.

In 1888 the *Berliner Abendpost* came into existence in order, by means of an especially worked out system, to make a Berlin newspaper available to provincial readers. Its circulation soon rose to 70,000. A decade later there followed the *Berliner Morgenpost* (already under the direction of his sons), which achieved the largest circulation of any German daily (600,000). The old *Berliner Zeitung* was changed in 1905 to *B. Z. am Mittag* (*Berliner Zeitung am Mittag*). It was the first German daily which was sold not by subscription, but by street vendors. Also added were the *Berliner Allgemeine Zeitung* and the *Montagspost,* and in 1914 the highly dignified German daily *Vossische Zeitung,* which was bought from Lessing's heirs. The last link in this chain was *Tempo* (1928), which attempted to introduce into Germany to a certain degree the type of paper represented by the American tabloid. The Ullstein dailies had their own picture and news services, as well as a wireless receiving station.

No less important was the magazine department of the Ullstein establishment. From 1894 on it published the world-famous *Berliner Illustrirte Zeitung,* whose top circulation at one time exceeded 2,000,000. Other periodicals, published weekly or bi-weekly, were *Die Grüne Post* (for rural readers), *Das Blatt der Hausfrau* (a family magazine), *Die Sieben Tage* (broadcasting), *Die Koralle* (natural sciences and technique), *Der heitere Fridolin* (for children); and the monthlies *Der Uhu* (entertainment), *Der Querschnitt* (art and literature), *Die Verkehrstechnik* (traffic, aviation and automobiles), *Die Bauwelt* and *Deutsches Bauwesen* (building and architecture). The combined circulations of all the Ullstein publications, exclusive of books, was nearly a half-billion.

The third branch of the house was formed by the Ullstein Book Publishing Company (Ullstein Buchverlag) and the Propyläen-Verlag, bought from Georg Müller in 1919. Their output included the *Gelbe Ullsteinbücher* (light fiction), *Musik für Alle* (music arranged for home use), the *Tausend Worte* series (language books for the learning of English, French, Italian, Spanish and Russian), memoirs of Count Andrassy, von Bülow, Count Bernstorff, Count Czernin, Carl Fürstenberg, Karl Helfferich, von Holstein, Stresemann and Count Witte. There were histories of literature, garden books, popular scientific works, and novels of many contemporary authors, such as Erich Maria Remarque's unequalled world-record novel *Im Westen Nichts Neues* (English trans., *All Quiet on the Western Front*), books by Vicki Baum and Lion Feuchtwanger, and the writings of Carl Zuckmayer, Alfred Neumann and many others. The Propyläen-Verlag published many picture collections, the works of the great classical writers of all countries, the great twenty-four-volume Propyläen history of art, and the ten-volume history of the world. A twenty-volume encyclopedia was in the making in 1933.

Among the hundreds of editors, correspondents and contributors who aided the products of the Ullstein Company to achieve world renown were the following Jews: Vicki Baum, Georg Bernhard, Arthur Bernstein, Anton Bettelheim, C. A. Bratter, Lothar Brieger, Bruno Buchwald, Max Deri, Max Dessoir, Adolf Donath, Hermann Dupont, Julius Elban, Julius Elias, Arthur Eloesser, Erich Eyck, Norbert Falk, Georg Froeschel, Ludwig Fulda, Artur Fürst, Manfred Georg, Moriz Goldstein, Fritz Götz, Stefan Grossmann, Konrad Heiden, Adolf Heilborn, Georg Hermann, Erwin Honig, Monty Jacobs, Egon Jacobsohn, Gustav Karpeles, Richard Katz, Paul A. Kirstein, Alfred Klaar, C. Z. Klötzel, Kurt Korff, Rudolf Lennhoff, Franz Leppmann, Richard Lewinsohn, Heinrich Lewy, Max Marschalk, M. Mayer-Mahr, Willy Meisl, Erich Mendel, Wilhelm Meyer-My, Carl Misch, Max Osborn, Max Reiner, Paul Schlenther, Paul Schlesinger (Sling), Rudolf Stahl, Ludwig Stein (Diplomaticus), Hugo Steiner, Walter Trier, Erich Urban, Ernst Wallenberg, Wolfgang Weisl, Adolf Weissmann, Max Wolf. Jewish employees in non-editorial executive positions were Emil Herz, Arthur Hess (Buchverlag), Erich Magnus, Bruno Russ (advertising) and Kurt Szafranski (magazines).

What Leopold Ullstein had bought in 1877 for 60,000 marks had grown to an estimated 60,000,000 marks in 1933 and had to be sold that year for 12,000,000 marks to a consortium behind which Hitler's own Franz Eher Verlag hid. When the three surviving brothers were finally able to leave Germany after paying all state fees, they literally did not have a cent.

For a time the Nazis did not dare change the name of the firm, whose trade mark, an owl upon a stone, had become a symbol. Later the firm was called the Deutscher Verlag, and a good many of the most infamous Nazi publications are printed on the same machines which had been created by progressive leadership. Among these Nazi papers is Josef Goebbels' own *Das Reich.*

JOHN F. OPPENHEIMER.

mann, "We Blundered Hitler Into Power," *Saturday Evening Post,* July 13, 1940; idem, *The Rise and Fall of the House of Ullstein* (1943).

ULMAN, JOSEPH N., jurist, b. Baltimore, 1878; d. Baltimore, 1943. After attending local schools and Marsten's University School, he entered Johns Hopkins University, where in 1898 he received the A.B. degree. In the same year he matriculated in the Columbia University Law School, from which he graduated in 1900 with the M.A. degree. Admitted to the Baltimore bar in 1901, and to the bar of the United States Supreme Court in 1913, he was appointed to the Supreme Bench of Baltimore in 1924. He was elected to the same office in 1926, and reappointed in 1941. From 1908 to 1928 he was a member of the faculty of the University of Maryland Law School.

Apart from his work in the Baltimore Supreme Court, Ulman's chief legal interest was in the direction of prison reform. Through numerous addresses which he was called upon to deliver in various parts of the country, many prison reforms which he advocated were effected in many states of the Union.

Besides writing many leading articles in the *Yearbook* of the National Probation Association, in the *Journal of Criminal Law and Criminology,* and in various other leading legal publications, he was author of: "Law as a Creative Force" (in Lowry's *Readings in Social Case-Work,* 1939); the introduction to *Divorce in Maryland,* by Marshall and May (1932); "The Trial Judge's Dilemma" (in *Probation and Criminal Justice,* edit. Sheldon S. Glueck, 1933); *A Judge Takes the Stand* (1936).

In 1934 he was appointed chairman of the Committee on Prison Labor by the National Industrial Recovery Administration, and in 1935 he was named by President Franklin D. Roosevelt chairman of the Prison Industrial Reorganization Administration. He was a member of the Advisory Committee on Criminal Justice, and was associate editor of the *Journal of Criminal Law and Criminology* from 1936 on. Ulman was often called by successive governors of Maryland to head legislative commissions dealing with prison labor and the operation of criminal law in the state, and was the sponsor of the development of the probation department of the Baltimore Supreme Bench. He was closely associated with the Jewish charities of Baltimore, and for many years served as president of the Hebrew Benevolent Society.

ULMANN, ALBERT, broker and author, b. New York city, 1861. He studied at the College of the City of New York, and was later a member of the New York Stock Exchange. He founded and edited the *Manufacturing Jeweler* (Providence, R. I., 1884) and the *Jewelers' Weekly* (New York, 1885).

His published writings include: *New York's Historic Sites* (1902); *A Landmark History of New York* (1907); *Tales of Old New York* (1917); *New Yorkers: Stuyvesant to Roosevelt* (1928); *Maiden Lane—Story of a Single Street* (1931); *Money Talks* (1937). He was a member of the New York Historical Society. In 1932 Ulmann delivered an address, "George Washington and the Jews," before The Judaeans at a celebration of the George Washington Centenary (published in *Judaean Addresses,* vol. 4, 1933).

ULMANN, BENJAMIN, painter, b. Blotzheim, Alsace, France, 1829; d. Paris, 1884. He studied at the École des Beaux Arts at Paris under Drölling and Picot, and in 1859 won the Prix de Rome. His paintings, marked by skill of composition and charm of color as well as by a predilection for scenes of terror, include *Sulla at the House of Marius* (Luxembourg Museum); *The Bell-Ringer of Nuremberg; Lorelei.*

Ulmann also created decorative panels at the Palais de Justice, Paris. His paintings won medals of the second and third class at the Paris Salons of 1859 and 1872; in the latter year he was made a chevalier of the Legion of Honor.

Joseph N. Ulman

Lit.: *Artists of the Nineteenth Century and Their Works* (1880).

ULMANN, SALOMON, chief rabbi of the Central Consistory of the French Jews, b. Zabern, Lower Alsace, France, 1806; d. Paris, 1865. He studied for the rabbinate under Rabbi Moïse Bloch in Strasbourg, and later studied also at the École Centrale Rabbinique. Ulmann's first rabbinical position was at Lauterburg, Lower Alsace, in 1834; he served as chief rabbi of Nancy from 1844 to 1853, and finally was elected to the position of chief rabbi of the Central Consistory of the Jews of France, serving from 1853 until his death. In 1856 Ulmann convened at Paris a central conference of the chief rabbis of the various communities of France, which he had helped to organize; this conference decided in favor of introducing the organ into the synagogue and of instituting the ceremony of confirmation for both Jewish boys and girls.

Ulmann wrote *Catéchisme, ou éléments d'instruction religieuse et morale à l'usage des jeunes israélites* (Strasbourg, 1845), a highly useful work of which a third edition was published after his death (Paris, 1871), and a Hebrew essay, "Debar Torah Leabbir Yaakob" (A Word of Law on the Mighty One of Jacob), which was published in the periodical *Zion* (vol. 1, p. 169). He was a chevalier of the French Legion of Honor.

UNCLEAN ANIMALS, *see* DIETARY LAWS.

UNETHANNEH TOKEF, a well-known hymn of the Kedushah (sanctification) for Rosh Hashanah and Yom Kippur, describing the majesty of God's judgment over each human being, who nevertheless is able to "avert the evil decree by means of repentance, prayer and good deeds." For although the Almighty God is unattainable and is far above the world, His care for the weak and mortal sons of earth is inexhaustible. Rabbi Amnon of Mayence is believed to have been the

author of Unethanneh Tokef. Jewish legend states that he was a rich man who had his hands and feet cut off by the archbishop of Mayence after Amnon had rejected all his efforts to convert him to Christianity. According to the legend, Amnon, at his own request, was brought into the synagogue on New Year's Day, where, just before the reciting of the Kedushah, he improvised the hymn Unethanneh Tokef and then died. Several days later, as the result of a dream in which Amnon appeared to him, Rabbi Kalonymus learned the hymn and gave it wide dissemination among the Jews. However, the style, language and widespread currency of the hymn indicate an earlier date of composition and that it originated in the Orient.

UNGAR, HERMANN, author, b. Boskowitz, Moravia, 1893; d. Prague, 1929. He was an attaché at the Czechoslovakian embassy in Berlin. In 1921 he published his first book, a collection of narratives, *Knaben und Mörder,* which was favorably received because of its realistic approach and psychological depth. The book was followed by the equally realistic novels *Die Verstümmelten* (1924) and *Die Klasse* (1927). Ungar's play, *Der rote General,* which was successfully staged in Berlin (1928) with Fritz Kortner in the title role, alluded to the fate of Leon Trotsky and Walther Rathenau. In 1930, after his death, Ungar's comedy, *Die Gartenlaube,* was performed in Berlin. In the same year a volume of his short narratives, *Colberts Reise,* was issued posthumously.

UNGER, ERNST, surgeon, b. Berlin, 1874; d. Berlin, 1938. He studied under Ernst von Bergmann, and upon completion of his medical studies established himself in Berlin, where he opened a private hospital whose modern medical equipment caused great publicity in professional circles. Many physicians used his institute. During the first World War this hospital was changed into a military hospital. Besides attending to it, Unger was in charge of the surgical department of the Hospital Berlin-Schöneberg. In 1920 he received a call as directing physician to the surgical department of the Rudolf Virchow Hospital in Berlin, where he stayed until the Nazis' rise to power.

His scientific papers, published in numerous professional organs, embrace not only the field of surgery, but the whole field of medicine. The art of his knife was highly esteemed by the public, which admired in him the clever surgeon rather than the man of medical thought.

UNGER, JOSEF, teacher of civil law, and Austrian statesman, b. Vienna, 1828; d. Vienna, 1913. "I was born in the year 1828, but I have seen the light of the world as late as 1848," Unger used to say, referring to the Austrian revolution of 1848 in which he participated, having been elected by the students' body to its central committee and to the delegation which presented the wishes of the Viennese university students to the minister of the interior on May 16th.

Unger received the Ph.D. degree from the University of Königsberg (1850), and in the same year was appointed assistant librarian at the university library in Vienna, but lost his position on account of his revolutionary affiliations. In 1852 he became lecturer at the University of Vienna, and in the following year was called to Prague as assistant professor at the age of twenty-five. He resumed teaching at his own alma mater in 1855, to be appointed full professor of jurisprudence two years later.

Unger was one of the most beloved university teachers in Vienna. An outspoken liberal, he entered politics with his work, *Zur Lösung der ungarischen Frage, ein staatsrechtlicher Vorschlag,* written in collaboration with another forty-eighter, Adolf Fischhof, and advocating a dual monarchy for Austria and Hungary in order to come to terms with the latter; it was published anonymously in 1861. In 1867 he was elected member of the Lower Austrian diet, and subsequently of the Reichsrath; two years later Emperor Francis Joseph I appointed him life member of the Herrenhaus (upper house), where he became the whip of the Liberal Party. From 1871 to 1879 he was a minister without portfolio in the progressive cabinet formed by Prince Auersperg; as "Sprechminister" he was one of the most noted figures of the cabinet and a strong advocate of "Ausgleich" (peaceable settlement with Hungary) and of constitutional and other reforms. He resigned upon the prime minister's defeat. In 1881 he was appointed president of the Reichsgericht, the supreme court of administration.

Unger, who had started as a follower of the thinkers Georg Wilhelm Friedrich Hegel and Eduard Gans (doctoral thesis, *Die Ehe in ihrer welthistorischen Bedeutung,* 1850), turned, under the influence of the standard work, *System des heutigen römischen Rechts,* by the German jurist Friedrich Karl von Savigny, to contemporary Roman law and subsequently to Austrian civil law. He was the first to furnish a thorough commentary on the *Allgemeines Bürgerliches Gesetzbuch* of 1811, but this main work of his, *System des österreichischen allgemeinen Privatrechts,* which gained him European fame and became the basis for the general study of Austrian civil law, remained a torso (vol. 1, 1856; vol. 2, 1857-59; vol. 6, 1864).

His other published works include: *Über die wissenschaftliche Behandlung des österreichischen gemeinen Privatrechts* (1853); *Die Verträge zu Gunsten Dritter* (1869); *Handeln auf eigene Gefahr* (1891); *Handeln auf fremde Gefahr* (1894). He published, together with Julius Glaser, *Sammlung von zivilgerichtlichen Entscheidungen des kaiserlich-königlichen obersten Gerichtshofes* (vols. 1-26, 1859-92), a collection of high court decisions on civil law.

Unger, who mastered Latin, Greek, Spanish, French and Italian, also retained to the end of his life a keen interest in music; he was one of the most active members of the Gesellschaft der Musikfreunde in Vienna, and instrumental in the erection of its building. Among the many decorations which he received was the Grosskreuz of the Leopoldsorden. The jurist Rudolf von Ihering dedicated the second volume of his work, *Der Zweck im Recht,* jointly to Julius Glaser and Josef Unger. A son of a Jewish business man, Unger, under the influence of his Catholic stepfather, renounced Judaism at an early age.

UNGER, LESTER JARECKY, physician, b. New York city, 1888. He studied at Columbia University (M.D., 1913), and in 1922 became assistant professor of surgery at the New York Post-Graduate Medical School and Hospital, and in 1930 assistant professor of clinical surgery at Columbia University. In 1914 he devised the Unger blood transfusion method, which was internationally used. Together with Alfred F. Hess, he conducted researches on rickets, sunlight and ultra-violet rays. In 1943 he and John T. Moorhead published a paper describing their successful use of red blood corpuscles as a dressing for wounds, burns and ulcers, opening up new possibilities for rapid healing.

UNGVÁR (in Czechoslovakian, **Užhorod**), city in Hungary. Following the first World War it was awarded to Czechoslovakia, and became the capital city of the Czechoslovakian province of Carpatho-Ukraine (Ruthenia). In 1930 Ungvár had 8,384 Jews in a total population of 22,624 (37.1%). The civil rights of the Jews were practically abolished after the return of Ungvár to Hungary. When Czechoslovakia was dismembered in 1939, Ungvár was returned to Hungarian sovereignty.

The Jewish community of Ungvár is believed to have been in existence from the middle of the 18th cent. on, although the first document referring to it is that of the founding of a Hebrah Kaddisha (Jewish burial society) as late as 1778. As the commercial and governmental center of its region, Ungvár attracted large numbers of Jews, especially from the second half of the 19th cent. on. The influence of neighboring Galicia on religious life in Ungvár was a marked one. Ungvár was a stronghold of Orthodoxy; a Reform community founded at the time of the national Jewish congress did not attract any numerically important following.

Among the rabbis of Ungvár were Meyer Eisenstadt, a pupil of Moses Sofer, and Lazar Löw. From 1930 on Joseph Kohn was the spiritual leader. The community maintained a hospital, founded in 1807, and a Yeshiva and Talmud Torah with large attendances. In 1926 a Hebrew elementary school was founded; in 1934 it obtained permission to organize the four lower grades of a Gymnasium. This Hebrew Gymnasium, called Yabneh, imparted a Jewish education in the religious spirit of Ungvár.

UNION OF AMERICAN HEBREW CONGREGATIONS, an association of congregations in the United States and Canada, with headquarters in Cincinnati, Ohio, founded by Rabbi Isaac Mayer Wise, and devoted to stimulating the growth and development of Judaism in America, more especially and latterly, as interpreted by the Liberal (Reform) wing. Its purposes as reflected in the constitution adopted at the meeting of the organization, in 1873, were to establish a seminary for the education of rabbis, to stimulate popular Jewish education, to organize new congregations and "to provide such other institutions which the common welfare and progress of Judaism will require." The causes which it advanced and the institutions which it created follow along these lines.

Its first president was Moritz Loth, and its first secretary Lipman Levy, who served for forty-four years, until 1917. Levy's successor, Rabbi George Zepin, served until his retirement in 1941. Among the prominent rabbis associated with Wise in the founding of the Union were Max Lilienthal of Cincinnati, Max Samfield of Memphis, Lippman Mayer of Pittsburgh, and Samuel Wolfenstein of St. Louis. Among the laymen were Bernhard Bettmann, Julius Freiberg, Henry Mack, Adam A. Kramer and Henry Adler of Cincinnati, Lewis N. Dembitz of Louisville, Magnus Butzel and Simon Heavenrich of Detroit, Samuel Woolner of Peoria, Ill., and Jacob Rosenberg and Lazarus Silverman of Chicago.

General Trend of Development. The Union was organized in 1873 with an initial membership of twenty-eight congregations, located in the Central West and in the South. In 1943 it numbered 307 congregations in all parts of the United States and three in Canada. While its main trend was in the direction of the development of Jewish religious life, from time to time it espoused many related causes because at the close of the 19th cent. the congregation was considered the unit of Jewish organization and was accorded a position of undisputed leadership in Jewish life. Thus, while the Union established the Hebrew Union College in the third year of its existence (1875) and while it early began the publication of educational literature and the organization of new congregational units, it also had tasks more remote from congregational life.

In 1876 the Union absorbed, by mutual consent, the existing Board of Delegates of American Israelites, the same thenceforth functioning as a standing Board of the Union until 1925. This board published the first census of Jews in the United States in 1880. The rights of Jews in foreign countries received its constant attention. The condition of the Jews in Morocco, Roumania and Russia were materially improved, on various occasions, through the intervention of the State Department at Washington at the instance of the Board. Frequent agitation against unjust treatment of native Jews in Russia and American Jewish citizens traveling in Russia led finally to the abrogation of the treaty between the United States and that country in 1913. Conditions surrounding immigrants to the United States were greatly improved through the activities of the Board and through presentations made by the Board to the Department of Immigration on behalf of individual immigrants. The Union, in 1882, appointed committees in its congregations to receive and assist immigrants, and later chartered the Hebrew Immigrant Aid Society. Beginning with 1876 and until 1886 the Union, on the recommendation of the Board of Delegates, collected funds to settle Jews upon farms and to establish Jewish farm colonies. The defense of civil rights in the United States included combatting sectarianism in the public schools, opposing the introduction of disqualifying clauses in state and federal constitutions based on religious affiliations, and the attempted exclusion of Jews from the United States Army and Navy.

Method of Operation. The Union maintained a central office in Cincinnati. It also had a regional office in New York city, housed in premises belonging to Temple Emanu-El, which served as local headquarters for the New York Federation of Reform Congregations, the New York State Federation of Temple Sisterhoods, and the New York Federation of Youth Societies, branches of the national bodies.

The Union organized three national federations of subsidiary units of the congregations: the Sisterhoods (1913), the Brotherhoods (1916), and the Youth Groups (1939). Their national offices and executive staffs were located in the Cincinnati office. These federations, auxiliaries of the Union, also pursued various independent activities for the benefit of their memberships.

The Council of the Union is its highest legislative authority. It is composed of delegates appointed by the member congregations and meets biennially in various cities; the three federations conduct their separate and similarly organized biennial conventions concurrently, in the same city. The 38th Council met in New York city in 1943. The Council serves as a forum for democratic discussion of issues that affect not only the Union, but Jews and Judaism in general. It elects an Executive Board, composed of sixty-five members in 1943, which is in charge of the business of the Union and which appoints, in cooperation with the Central Conference of American Rabbis, the boards and commissions that conduct the specific activities of the Union.

The various departmental boards, commissions, and committees, as well as the three federations, present annual reports to the Executive Board which undertakes to finance these departments, in part or whole, as each situation requires. The Executive Board retains control of a group of activities which are conducted for the benefit of all departments. These have varied from year to year, but include such projects as fund raising, public information, radio broadcasting, and an annual tour of the congregations.

Rabbinical Seminary. The first institution established by the Union was the Hebrew Union College in Cincinnati in 1875. The College graduated 459 rabbis, of whom 270 were serving congregations (1943) in the United States, three in Canada, and five in Europe, Asia and South Africa. Eighty-five rabbis served in various educational and social service capacities. There were also twenty-five graduates serving as chaplains in the United States Army and Navy.

The Union cooperated with the Hebrew Union College in maintaining the Hebrew Union College Press.

Popular Jewish Education. The organization of schools and classes and the publication of Jewish literature were some of the interests stressed at the first Union Council. In 1886 the Hebrew Sabbath School Union was organized, under whose auspices these aims were consistently pursued by the Union. Several committees under various titles continued this activity, the one in 1943 being the Commission on Jewish Education. David Philipson was chairman from 1903 to 1942, when he was succeeded by Solomon B. Freehof. Emanuel Gamoran served as educational director beginning in 1923. The Commission published 175 volumes on Jewish history, literature, religion and Hebrew; also fifty plays for the elementary youth and adult departments, and for teacher training classes. It published a quarterly magazine, *The Jewish Teacher.* From September, 1922, to June, 1940, the Union published a children's magazine, *Young Israel.*

In May, 1943, the Union began the publication of the illustrated monthly *Liberal Judaism.*

From time to time the Union established teachers' seminaries, notably one in Chicago in 1906 and one in New York in 1923. Local agencies were founded for this purpose, when these were discontinued. The Union conducted extension courses along these lines through annual meetings of state teachers' associations and through periodic seminars held in various cities. It also conducted a correspondence school, with a registration of 200 pupils. The Union cooperated with the Jewish Education Committee of New York in the conduct of an experimental religious school and in providing for supervision of religious schools.

Synagogue Extension. In 1903 the Union established a Department of Synagogue Extension which devoted its efforts to organizing synagogal units in all parts of the United States and Canada. These activities resulted not only in the growth of the Union from 115 congregations in 1903 to 307 in 1943, but also in a revival of interest in about 1,000 small communities where scarcity of numbers did not warrant permanent organization. Over one hundred communities were visited each year, circuits were established in the neighborhoods adjacent to resident rabbis, and intercounty, state and regional meetings were conducted periodically. Regional rabbis fostered this work and regional conventions were organized in nine large areas.

Jewish University Students. Beginning with 1906 the Union maintained an extensive activity for Jewish university students, organizing study circles and student synagogues; at one time it operated in eighty educational institutions. The Union organized the first Hillel Foundation at the University of Illinois, but relinquished this field to the Hillel Foundations.

Promotion of Synagogue Activities. The Department of Synagogue Activities conducts a wide variety of activities designed to modernize and fructify synagogue life. It was established in 1932 under a commission. A cooperating Committee on Jewish Ceremonies added to the richness of Jewish Temple services by creating a modern Megillah, a Temple Hanukah lamp, a robe and ornamental crown, and instituted new ceremonial rituals to enhance the observance of Hanukah, Purim, Pesach and other occasions. Jacob D. Schwarz was (1943) director of synagogue activities.

This department published a monthly magazine, *The Synagogue,* editorially centered on such problems as the financial management of the congregation, increasing the synagogue constituency, Temple ceremonial, democratizing the synagogue and coordinating its activities. It also published *The Jewish Scene,* a monthly religious interpretation of the Jewish news, and *Broadcasting the Jewish Scene,* for club use. It issued handbooks for congregational officers, liturgical music for solo voices, and Sabbath sermons for congregations without rabbis.

Youth Work. A youth department was founded in 1933. The Commission on Jewish Education produced for this activity a body of literature for the use of Youth groups of the synagogues and a directional literature for the guidance of the clubs along recreational and social service lines. In 1939 the National Federation of Temple Youth was organized, numbering 123 youth societies in 1943. It functioned through state and regional subsidiary federations which conducted periodic assemblies of an educational character. The National Federation of Temple Youth maintained a leadership training course in cooperation with the Chicago Bureau of Jewish Education, and annually arranged week-end educational and recreational seminars at various young folks camps. This department published two magazines, *The Youth Leader,* a quarterly designed for club directors and officers, and *Jewish Youth,* a quarterly for the general membership.

Pensions for Rabbis. In 1917 Jacob H. Schiff gave the Union $100,000 to start a fund for old age pensions for rabbis. Plans for old age pensions were approved by the Central Conference and the Union in 1942.

Pioneering Activities. The Union was the earliest American Jewish body operating nationally in the field of promoting interest in Judaism. Its development served as a pattern closely followed by many Jewish groups. Almost all its activities, such as the organization of a seminary for rabbis, the defense of Jewish rights, the creation of a body of literature for Jewish education, the organization of new units through a field service, stimulating the religious interests of Jewish university students, the creation of a literature of apologetics in popular form, the promotion of new activities within the synagogue, youth work and a system of old age pensions for rabbis, were paralleled in many Jewish organizations serving various clienteles.

In 1943 the officers of the Union were: Adolph Rosenberg, president; Harry N. Gottlieb, Frederick F. Greenman, Jacob W. Mack, and Eugene B. Strassburger, vice-presidents; Herbert C. Oettinger, treasurer; Rabbi Maurice N. Eisendrath, director; Rabbi Louis I. Egelson, administrative secretary; Rabbi George Zepin, honorary secretary.

The following served as president or as chairman of the board of the Union since its creation in 1873: Moritz Loth (1873-89), Julius Freiberg (1889-1903), Samuel Woolner (1903-7), Louis J. Goldman (1907-11), J. Walter Freiberg (1911-21), Charles Shohl (1921-25), Ludwig Vogelstein (1925-34; chairman of the board), Jacob W. Mack (1934-37; chairman of the board), Robert P. Goldman (1937-43), Adolph Rosenberg (1943-).

Lit.: The year books of the Union of American Hebrew Congregations; the year books of the Central Conference of American Rabbis; May, Max B., *Isaac Mayer Wise, a Biography;* Philipson, David, *The Reform Movement in Judaism* (new ed., 1931); idem, *Reminiscences of Isaac M. Wise* (1901).

UNION CITY, a city of New Jersey, with a population of 56,173 (census of 1940), including, in 1943, approximately 6,000 Jewish inhabitants. Union City was formed by the amalgamation of Union Hill and West Hoboken, N. J.

An early organization of the Jewish community in this region was the mutual benefit society Linas Hazedeck of Hudson County, founded in 1883. Temple Israel of West Hoboken merged with Temple Emanuel of Union Hill (organized in 1901), to form Temple Israel-Emanuel, the leading Orthodox congregation of Union City in 1943. Rabbi Harold Hirschman was then spiritual head of the congregation. The community supported also the Orthodox Temple Beth Jacob and Temple Ohab Sfard, neither of which, however, had a resident rabbi.

A movement to organize a community center, starting in 1923, culminated successfully under the leadership of Samuel Harber, in 1927, when the new building of the Jewish Community Center of North Hudson was dedicated at Union City. The Center, serving not only the residents of Union City, but those of neighboring West New York, Weehawken and North Bergen as well, housed the activities of the Y.M.H.A. and the Y.W.H.A., and instituted an extensive physical education and cultural program. Funds raised annually were apportioned among the main projects of the Jewish community, including the Center itself, the United Jewish Appeal, the Temples, the Home for the Orphans and Aged and the Talmud Torah, of which Rabbi Harold Hirschman, spiritual head of the community, was principal in 1943. Through the Center, underprivileged children were given summer vacations.

In the second World War the Jewish Community Center engaged in numerous war activities, and approximately 250 young men connected with the Center were in active service (1943). Paul Salzman was executive director of the Center in 1943.

Active members of the Jewish community of Union City in 1943 included Dr. Benjamin Moskowitz, Alexander Tannenbaum, Herman L. Springer, Harry B. Cooper, Harry Malakoff, Samuel Solomon, Samuel Moskowitz, Dr. Milton J. Stark, Joseph Bialkin, Isador Haber, Samuel Harber, Benjamin M. Halpern, Walter Leichter, Dr. A. A. Oliner, Moses J. Sultzer, James Rosen, Abraham Watsky, Max Willner, H. David Zerman, Bluma Dooken, Fannie Miller, Mollie Rappaport and Jane Friedman. Jews in public office and public service included Isador Haber, at one time district court judge; Morris Umansky, district court judge (1929-36); and Mervin Herzfeld, recorder. Abraham Lieberman was judge (1943) of Weehawken Police Court. Dr. Joseph Shapiro was appointed medical director of Union City public schools in 1919, and continued in office for many years. Samuel Spingarn became counsel to the board of education of Union City in 1926, and remained in office for over a decade.

At Union City, known for its manufacture of embroideries, laces, and the like, Jews were engaged mainly in business, in 1943, with a sprinkling working in industry and about 5 per cent occupied in the professions. PAUL SALZMAN.

UNION LIBÉRALE ISRAÉLITE, French Jewish organization advocating and practising a progressive form of ritual. It was founded in Paris in 1907, and never officially became part of the consistory. The Union was headed by Louis-Germain Lévy as rabbi; he was the author of the special prayer-book which the congregation used. Its synagogue was located at 24 Rue Copernic, in the 16th arrondissement (ward).

In addition to services on Friday night, Saturday morning, Sunday morning and holidays, religious instruction was given on Sunday and Thursday mornings, in preparation for Bar Mitzvah or confirmation. A monthly magazine, *Le rayon,* began publication in 1912, with a supplement, *Le petit rayon,* for juvenile members. After the fall of Paris in 1940, the synagogue was closed. Lévy was variously reported as having remained in Paris and as having left the city for other sections of France.

UNION OF ORTHODOX JEWISH CONGREGATIONS OF AMERICA, an organization founded in 1898, in New York city, to "advance the interests of positive Biblical, Rabbinical, Traditional and Historical Judaism." The preamble to the constitution also affirmed the adherence of the members "to the authoritative interpretation of our Rabbis as contained in Talmud and Codes."

Among the rabbis and laymen from the United States and Canada present at the founding session, which was held in the Spanish and Portuguese Synagogue, were Henry Pereira Mendes, who was chosen first president, Bernard Drachman, Lewis N. Dembitz, who opened the first session, Meldola de Sola of Montreal, who was made first vice-president, Henry M. Schneeberger, second vice-president, H. Sarasohn, third vice-president, and Philip Klein.

From its establishment the Union continued to speak for that large proportion of the Jews who were in some way affiliated with an Orthodox Jewish congregation. There were about 2,500 Orthodox Jewish congregations in the United States and Canada (1943). One of the accomplishments of the Union was the founding of Yeshiva College (1928), the only Jewish College of Liberal Arts and Sciences, by guaranteeing to the Regents of the State of New York a productive income on $500,000 during the first five years of its existence.

The Union also published a uniform maximum and minimum curriculum for Talmud Torahs, removed kashruth supervision from the realm of commercialism by endorsing and supervising nationally-known products without charge, and published more than 300,000 copies of tracts on the various phases of Judaism. By organizing the Jewish Sabbath Alliance the Union aided the many Orthodox students and government workers who were unwilling to take examinations on the Sabbath. The Rabbinical Council of America was recognized by the Union as its legal rabbinic authority.

The presidents of the Union, after Mendes, were Bernard Drachman, Charles H. Shapiro, Julius J. Dukas, Rabbi Herbert S. Goldstein, William Weiss, and Samuel Nirenstein, who was president in 1943.

Among the auxiliary groups of the Union were Young People's and Habonim (high school) organizations and a Women's Branch. The Women's Branch was organized in New York city in 1924, with Mrs. Philip Klein as the first president. Composed of 170 sisterhoods from twenty states, the Women's Branch provided speakers, prepared cultural programs for meetings, published and distributed leaflets regarding the holy days and festivals, and organized the Hebrew Teachers Training School for Girls, the Jewish University Club, and Habonoth, a national organization of high school girls' groups. Succeeding Mrs. Klein as presidents of the Women's Branch were Mrs. Nachman Ebin, Mrs. Herbert S. Goldstein, who held the office for thirteen years, and Mrs. Isidor Freedman, who was president in 1943. HERBERT S. GOLDSTEIN.

UNION OF ORTHODOX RABBIS OF THE UNITED STATES AND CANADA (AGUDATH HARABBONIM), an organization founded in New York city in 1902 by a group of European-ordained rabbis, for the purpose of "placing Orthodox Judaism in America on a firm basis."

The officers of the convention were Abraham G. Lesser, of Cincinnati, Ohio, chairman, and Yehudah Israelite, of

Chelsea, Mass., secretary. Sholom Elchanan Jaffe, B. Abramowitz and Benjamin S. Rabbiner, all of New York city, Abraham G. Lesser, of Cincinnati, Moses S. Margolies, of Boston, Bernard L. Levinthal, of Philadelphia, Chaim Jacob Silver, of Worcester, Mass., Asher L. Zarchy, of Louisville, Ky., and Moses S. Sivitz, of Pittsburgh, were made members of the executive committee, with power to conduct the business of the Union.

The functions of the Union are: (1) to arrange for religious instruction in parochial schools and Talmud Torahs; (2) to enforce the observance of the Sabbath, dietary and other laws; (3) the regulation of marriage and divorce; (4) the placement of rabbis in communities; (5) to provide that only recognized (by the Union) rabbis be permitted to grant divorces and to perform the Halitzah ceremony; (6) the establishment and inspection of ritual baths.

The Union contributes to the support of the Yeshiva Rabbi Isaac Elchanan of New York, to the Beth Medrash Letorah of Chicago, to the Mesivta Torah Vodaath, Mesivta Chaim Berlin and the Yeshiva Rabbi Israel Meir Hacohen of Brooklyn, as well as to various other Yeshivas in the United States and Palestine. During the first World War it established the Ezrath Torah Fund, to alleviate the condition of persecuted rabbis and spiritual leaders in foreign lands. After the occupation of Poland by Germany (1939) it established the Vaad Hahatzalah (Emergency Committee for Yeshivas) to help the exiled Yeshivas of Poland and Lithuania reestablish themselves in Palestine and the United States, and to support the rabbis and students who had fled to Siberia and other parts of Russia.

Officers of the Union are elected at its annual convention. In 1943 they were: praesidium: Israel Rosenberg, of Brooklyn, Eliezer Silver, of Cincinnati, Bernard L. Levinthal, of Philadelphia; honorary presidents, Joseph Konvitz, of Newark, Chaim Isaac Bloch, of Jersey City, Joseph Beer Soloveitchik, of Boston, Isaac Siegal, of Jersey City, and Louis Seltzer and Moses Rosen, of Brooklyn. Louis Seltzer was executive director, Benzion Notelovitz, of Louisville, was treasurer, and Shayah Karlinsky, of New York city, was chairman of the executive committee. Among the presidents of the Union were: Moses S. Margolies, Sholom Elchanan Jaffe, Bernard L. Levinthal, Israel Rosenberg, Eliezer Silver and Joseph Konvitz. LOUIS SELTZER.

UNION ÖSTERREICHISCHER JUDEN (originally Österreichisch-Israelitische Union), founded in 1885 at the suggestion of Joseph Samuel Bloch, editor of the *Österreichische Wochenschrift,* for the protection of the civil rights of the Jews as citizens of Austria. Its tasks were to work closely together in the solution of questions involving Jewry, to improve religious teaching, to propagate the knowledge of Jewish history among the Jews and to fight against anti-Semitic movements. Upon the suggestion of the Union, a Jewish theological seminary was founded in Vienna. However, the Union's plan of coordinating the Jewish communities of Austria in a Jüdischer Gemeindebund never fully materialized. The Union established a legal aid society for all Jews whose rights as citizens were abused or who in some other way suffered injustice. In 1898 the Union founded the Hilfsverein für die notleidende jüdische Bevölkerung in Galizien, a society to aid the destitute Jewish population in Galicia. The Union issued, from 1888 on, a monthly magazine, *Mitteilungen der österreichisch-israelitischen Union,* and from 1892 on the *Kalender für Israeliten,* with a guide through all the Jewish communities of Austria.

With the dismemberment of the dual monarchy (1918) the efficiency and membership of the Union also began to diminish. The publication of the *Mitteilungen* and of the *Kalender* had to be abandoned, since instead of more than 400 communities furnishing the Union with thousands of members, only that of Vienna and those of the provincial cities of the Austrian Republic were left.

In 1921 the Österreichisch-Israelitische Union changed its name to Union deutsch-österreichischer Juden and later to Union österreichischer Juden. The viewpoint of the Union was definitely antagonistic to Zionism, but it supported Jewish colonization in Palestine, without any political trend. It also participated in the Jewish Agency for Palestine constituted at Zurich in August, 1929. The Union was in close relationship with the Central-Verein deutscher Staatsbürger jüdischen Glaubens. Its organ was the weekly *Wahrheit.*

The president of the Union for a number of years was the industrialist Siegmund Mayer, author of the works *Ein jüdischer Kaufmann* and *Die Wiener Juden (1700-1900).* His successor was the physician Jacob Ornstein. The last president of the Union was Hermann Oppenheim. The organization was dissolved in March, 1938, when Austria was occupied by the Nazis.

UNION OF SEPHARDIC CONGREGATIONS, THE, an organization founded in New York city in 1929 by leaders both of the old Spanish and Portuguese synagogues of New York city and Philadelphia and those of the Sephardim in America with a later background of the Balkans, Greece, Turkey and Syria. Its purpose was the promotion of the religious interests of Sephardic Jews. Among the first sponsors were Cyrus Adler, Solomon Solis Cohen and H. Pereira Mendes. Its primary aim was to give cohesion and the strength of union to the scattered and comparatively weak synagogue units of the Sephardim who had arrived in the United States during the first two decades of the 20th cent. In effect its contacts have extended through the whole Sephardic diaspora, in Latin America, Canada, Europe, the Azores, Rhodesia, India, Iraq and the Orient.

Looking toward the maintenance of the traditional Sephardic ritual, it prepared and published Sephardic Hebrew prayer-books with English translation; it helped to provide adequate religious leadership through trained Sephardic rabbis, cantors and teachers. The Union supported Sephardic rabbinical students and rescued Sephardic religious leaders from Nazi hands. It gave continuous support to the Teachers' Training School in Oporto for Portuguese Marranos. It conducted propaganda for a more general adoption of the Sephardic pronunciation of Hebrew, and represented Sephardic interests before American governmental authorities. David de Sola Pool was elected president when the organization was founded, and in 1943 he still occupied that post.

UNITED COMPANY OF SPERMACETI CANDLERS. The manufacture of spermaceti candles was introduced into North America at Newport, R. I., in the middle of the 18th cent. by the Rivera family, which originally came from Spain. Within a short period after the establishment of the first factory by Jacob Rodrigues Rivera, the industry became the most outstanding in Colonial Rhode Island, supplying all the colonies and many foreign countries with its products. By 1761 a syndicate of the Spermaceti Candlers was formed, which is said to have been a Colonial forerunner of the Standard Oil syndicate. While the membership in this syndicate was not predominantly Jewish, all the known Jewish manufacturers and merchants of spermaceti products joined and signed the agreement. The first agreement was signed on November 5, 1761, for a period of "Seventeen Kalendar months," and was to be

effective until April 5, 1763. The syndicate was to be known under the title of "United Company of Spermaceti Candlers."

In its various articles agreement was reached on a maximum price to be paid for "common merchantable Spermacity Body brown Oyl," and also "that we will not at any time within Said Term by any means either directly or indirectly by ourselves or otherwise for us, sell within the Limits of New England our respective Spermaciti Candles for less value then one Shilling and Ten pence half penny Sterling per pound besides one Shilling Sterling more for each box." They also agreed not to manufacture any matter for persons not members of the United Company as well as to restrict the manufacturing of any one firm in the Company to the needs of the time.

Among the signatories to the agreement were the following Jewish firms: "Naph. Hart & Co."; "Aaron Lopez & Co."; "Collins & Rivera." Naphtali Hart and Company consisted of Naphtali, Samuel, Abram and Isaac Hart. Aaron Lopez and Company consisted of Aaron Lopez himself. The Rivera with the firm of Collins and Rivera was Jacob Rodrigues Rivera.

Apparently after Jacob Rodrigues Rivera introduced the manufacture of spermaceti candles into the Colony, by the time of the formation of the United Company the industry had passed into the hands of non-Jewish merchants primarily.

On April 13, 1763, another agreement was signed by "We the Subscribers, Manufacturers of Spermaceti Candles" meeting at "Providence in N. E." The agreement was for a year, and stipulated in part to be for "our General and Particular Interest." This agreement contained in the main the same articles as the first one, although in no place is the name "United Company of Spermaceti Candlers" mentioned.

While, in the first agreement, out of eight firms only two were completely Jewish and one was of a Jewish and non-Jewish partnership, in this second agreement, out of the eight firms which signed, at least four were Jewish, with the possibility of a fifth. The Jewish firms appearing in this agreement are "Aaron Lopez"; "Moses Lopez"; "Naphtali Hart and Co." and "J. Rivera and Co." MORRIS A. GUTSTEIN.

UNITED JEWISH APPEAL. Functioning from 1939 on as the United Jewish Appeal for Refugees, Overseas Needs and Palestine, the United Jewish Appeal, Inc. was formed in 1934 when the Joint Distribution Committee and the Keren Hayesod conducted a combined drive in 1934 and 1935. The first such combined drive, called the Allied Jewish Appeal, was held in 1930. In 1938, the Joint Distribution Committee and the United Palestine Appeal (by this time consisting of both the Keren Hayesod and Keren Kayemeth) reached an agreement regarding the distribution of funds raised in communities conducting combined or welfare fund drives. Out of this understanding came the decision for the reestablishment of the United Jewish Appeal for the following year, with the addition of the National Refugee Service (then known as the National Coordinating Committee) as a beneficiary.

Against the background of terrible suffering for the Jews in Europe and of the determined will of American Jews for centralized and comprehensive effort, the United Jewish Appeal was established as the single fund-raising body for the American Jewish Joint Distribution Committee, the United Palestine Appeal and the National Refugee Service. The newly-formed campaign organization launched a nationwide drive in January, 1939, summoning Jewish communities throughout the country to raise a quota of 20 million dollars for overseas relief and rehabilitation, for the rebuilding and development of the Jewish National Home in Palestine and for the adjustment of refugees in the United States. Abba Hillel Silver and Jonah B. Wise were elected national chairmen of the campaign, which confronted American Jewry with the challenge to discard past standards of giving and meet its greatly increased responsibilities through enlarged contributions.

During one year, for a short period in the early part of 1941, the agencies launched independent campaigns when they could not agree on the distribution of funds. But the sentiment among Jewish communities for a continuation of the United Jewish Appeal was overwhelming and the agencies resumed their fund-raising activities in a unified drive. In 1942 William Rosenwald, president of the National Refugee Service, was named as a national chairman of the United Jewish Appeal to serve together with Silver and Wise in the greatest campaign organization of American Jewry.

During the life-span of the United Jewish Appeal larger sums were raised for overseas relief, Palestine settlement and refugee aid in the United States than at any other time in the history of the communal development of the Jews of that country. From 1939 to 1943 the United Jewish Appeal raised a total of some $58,000,000. As the single channel for fund-raising for the three great organizations operating overseas, in Palestine and in the United States, the United Jewish Appeal has reflected the will of American Jews in dealing with the gravest threat to Jewish survival in modern times. The emergence of the United Jewish Appeal as a factor in the development of Jewish communal consciousness has far transcended the limited sphere of campaigning or fund-raising. Not only did the United Jewish Appeal serve to raise the standards of giving to new levels, but it exerted a powerful influence in educating American Jewry to a deeper understanding of its growing responsibilities in all phases of Jewish life.

The following were, at the end of 1942, the officers of the United Jewish Appeal: national chairmen—William Rosenwald, Abba Hillel Silver and Jonah B. Wise; honorary chairmen: Paul Baerwald, Louis Bamberger, Albert Einstein, Harry Friedenwald, Henry Ittleson, the Honorable Julian W. Mack, Henry Monsky, James N. Rosenberg, William J. Shroder, Max C. Sloss, Ferdinand Sonneborn, Nathan Straus, Henrietta Szold, Edward M. M. Warburg, Mrs. Felix M. Warburg and Stephen S. Wise. The co-chairmen were James H. Becker, Solomon Goldman, Israel Goldstein, Monroe Goldwater, James G. Heller, Louis E. Levinthal, Mrs. David M. Levy, Louis Lipsky, Charles A. Riegelman and Morris Rothenberg; co-treasurers: I. Edwin Goldwasser and Charles J. Rosenbloom; executive vice-chairmen: Isidor Coons and Henry Montor. The executive committee was composed of Albert Abrahamson, Abner Bregman, David M. Bressler, Louis Broido, the Honorable David Diamond, Sylvan Gotshal, Joseph C. Hyman, Edmund I. Kaufmann, Al Paul Lefton, Albert H. Lieberman, Abraham L. Liebovitz, Richard P. Limburg, Rabbi Irving Miller, Charles Ress, Irving H. Sherman, Simon Shetzer, Jacob Sincoff, Elihu D. Stone, Mrs. Roger W. Straus and officers. MEYER F. STEINGLASS.

UNITED PALESTINE APPEAL, the fund-raising agency in America for the Palestine Foundation Fund (Keren Hayesod) and the Jewish National Fund (Keren Kayemeth Leyisrael). The name United Palestine Appeal was first projected on the American Jewish scene in 1925, when the Keren Hayesod and Keren Kayemeth Leyisrael pooled their fund-raising activities. This merged drive was in existence for four years; then in 1929 the Keren Hayesod launched its own campaign in the United States under the name of

American Palestine Campaign, and the Keren Kayemeth Leyisrael returned to its independent activities.

In 1930 the American Palestine Campaign shared, for one year, with the Joint Distribution Committee a campaign called the Allied Jewish Appeal. In 1934 and 1935 the Keren Hayesod again merged its campaign with that of the Joint Distribution Committee to form the United Jewish Appeal.

In the latter part of 1935 negotiations were completed for the launching, on January 1, 1936, of the United Palestine Appeal, to raise funds on an equal basis for the Keren Hayesod and the Keren Kayemeth Leyisrael. Insofar as the Keren Hayesod is concerned, the activities include the promotion of immigration, colonization, education, economic, industrial and agricultural development, cultural activities and other phases of a program for enlarging the capacity of Palestine to absorb Jewish immigration. The Jewish National Fund is primarily concerned with acquiring land, and sharing in its improvement and afforestation.

The United Palestine Appeal also makes provision, through an annual grant, for the Mizrachi Palestine Fund, freeing the latter organization from the need of directing a campaign of its own. The Mizrachi Palestine Fund maintains in Palestine Orthodox agricultural and educational activities supplementary to those financed by the Keren Hayesod and the Keren Kayemeth.

In 1939 the United Palestine Appeal joined in the reestablishment of the United Jewish Appeal, Inc., forming what became known as the United Jewish Appeal, Inc., for Refugees, Overseas Needs and Palestine. The corporation is jointly and equally representative of the United Palestine Appeal and the American Jewish Joint Distribution Committee. In addition, the United Palestine Appeal had the benefit of the net income from traditional collections of the Jewish National Fund which, under the terms of the agreement of the United Jewish Appeal, Inc., are permitted to be made.

When the fund-raising activities of the United Palestine Appeal were merged with those of the Joint Distribution Committee (which subventions the National Refugee Service) in the United Jewish Appeal, a different type of U.P.A. organization was evolved, emphasizing educational and promotional activities beyond those ordinarily accompanying a fund-raising campaign. Through the publication of a monthly bulletin called *U.P.A. Report,* through the distribution of motion pictures and literature, through national, regional, and local conferences, and through other forms of contact with Jewish leaders and communities throughout the country, the United Palestine Appeal has endeavored to retain its identity as the instrument through which the Jews of America provide their support to the Keren Hayesod and the Keren Kayemeth Leyisrael.

From January 1, 1936, to December 1, 1942, the U.P.A., through income from independent campaigns and from its share of the income of the United Jewish Appeal, received $20,777,701.

At the end of 1942 the officers of the United Palestine Appeal, with headquarters in New York city, were: Abba Hillel Silver, national chairman; Albert Einstein, Julian W. Mack, Henry Monsky, Nathan Straus and Henrietta Szold, honorary chairmen; Stephen S. Wise, Louis Lipsky, Solomon Goldman, Israel Goldstein, Louis E. Levinthal and Morris Rothenberg, national co-chairmen; Charles J. Rosenbloom, treasurer; Abraham L. Liebovitz and Jacob Sincoff, associate treasurers; Barnett R. Brickner, Leon Gellman, James G. Heller, Edmund I. Kaufmann, Charles Ress, Elihu D. Stone, Robert Szold, Joe Weingarten and David Wertheim, vice-chairmen; and Henry Montor, executive director.

HENRY MONTOR.

UNITED STATES.[1] **1. The United States and Jewish Ideals.** The United States, at its inception, presented to the world a new conception of a national government—one that was not based on loyalty to a family or a single ethnic group, one that had no state church, and one based on the free union of sovereign states and the will of the entire people acting through their elected representatives. In all these features a large part was played by the influence of ideas conveyed to the founders of the republic through the medium of the Hebrew Bible.

The Pilgrim and Puritan colonists studied the Pentateuch as the basis of all moral law, and modeled their own statutes upon it. Practically all the colonies of New England cited freely from the Bible in directing their own legislative or judicial bodies. Thus the New Haven Code of laws (1655) contains seventy-nine topical statutes, of which a little over half derive their origin and authority from the laws of the Hebrew Bible. By the time the United States came into being the principle of the authority of the Mosaic law as a guide for government had been thoroughly established.

The influence of the Biblical story of the creation of man and the tracing of the descent of all humanity from the same source played a part in the acceptance of the doctrine of the Declaration of Independence, "that all men are created free and equal." The institution of elected representatives to control the government also gained strength from Biblical precedents. The idea of the separation of the legislative, judicial and executive functions of the government goes back to principles of Montaigne, who was himself of Jewish descent. Finally, the ideas of religious liberty were a testimony to the spirit of the 18th cent. in which Jews were given the opportunity to demonstrate that they, too, could contribute to the commonweal. Thus, while the form of the United States government owes its origin to many historical and ideological factors which were current at that time, there is no doubt that these were strengthened and assisted by the idealism and democratic ideas initiated by the Jewish people.

2. The United States and Jewish Interests Abroad. It has been the general policy of the United States government not to interfere with the domestic affairs of other countries; hence, though sympathy was often expressed for the distressing situation of the Jews in other continents, an active expression of this sympathy on the part of United States official representatives has taken place only in extreme instances. The first of these was at the time of the Damascus Affair of 1840, when Secretary of State John Forsyth sent a dispatch to John Gliddon, American consul at Alexandria, Egypt, urging him to use his efforts to aid the Jews who were falsely accused of ritual murder and to express the sympathy of the people of the United States for these victims of religious persecution.

In 1850, when the United States negotiated a trade treaty with Switzerland, the first clause contained a stipulation that its benefits should not extend to other than Christians. President Millard Fillmore, in a message to Congress, took exception to this clause, and Secretary of State Lewis Cass wrote to the American minister at Bern, Theodore S. Fay, instructing him to use all measures to effect the removal of the restric-

[1] Details on the history of the Jews in the United States are found in the article AMERICA and those immediately following, in the articles on the states and important cities, those on the presidents of the United States, and in such general articles as those dealing with art, science, literature, finance, physicians, mathematics, exploration, music, theatre, occupations and statistics. This article deals only with three subjects relating to the United States which are not found in other articles.

tions. This effort was only partly successful; an amended treaty, which still allowed restrictions, was ratified in 1855. It was not until 1874 that all the disabilities against Jews in Switzerland were removed.

In 1863 Secretary William H. Seward instructed the American consul at Tangier to use his good offices to check the atrocities then being perpetrated against the Jews of Morocco. The government took similar steps in Morocco through its diplomatic officials or special representatives in 1878, 1880 and 1881.

In 1872 pogroms in Roumania against the Jews were brought to the attention of the United States government through Consul Benjamin F. Peixotto, who had been sent there by President Ulysses S. Grant in 1870 with express instructions to urge upon that country the same principles of equality as observed in the United States. Peixotto's sheltering of refugees during the pogroms was approved by Secretary of State Hamilton Fish, and throughout Peixotto's term, which lasted until 1876, he labored in behalf of the Roumanian Jews.

While the United States did not participate in the Berlin Congress of 1878, both John A. Kasson, United States minister to Austria, and Bayard Taylor, minister at Berlin, used their influence to urge that the rights of the Jews be given consideration in the deliberations.

In 1885, when the Austrian government declined to accept the appointment of Anthony M. Keiley as minister at Vienna because his wife was a Jewess, Secretary of State Thomas F. Bayard made vigorous protest in the name of religious liberty to the Austrian government, which was, however, of no effect.

In 1902 Secretary of State John Hay sent a note to American diplomatic representatives abroad, instructing them to present to the governments to which they were accredited strong representations against the persistent violations by Roumania of her promises about the Jews in the Treaty of Berlin. As a result there were some very slight alleviations of the situation of the Roumanian Jews.

In a number of instances the United States protested to Russia because of discriminations against Jews who were American citizens and who, in violation of the commercial treaty of 1832, were denied admission into Russia. Notable instances of such protests occurred in 1880, 1882 and 1895. In 1902 the House of Representatives passed a resolution calling upon the United States government to act on this matter through its diplomatic representatives, but Secretary of State John Hay informed them that previous efforts had been made to no avail. The Kishinev pogrom of 1903 caused a wave of horror in the United States and President Theodore Roosevelt took the unusual step of transmitting a petition to the czar, signed by numerous citizens of the United States, to the United States minister at St. Petersburg, directing him to deliver it in person (it is reproduced in vol. 5, p. 583). Finally, in 1911 the United States Congress, unable to obtain satisfaction from the Russian government, abrogated the commercial treaty with Russia.

During the drawing up of the peace treaties at Paris in 1919, at the close of the first World War, President Woodrow Wilson and the United States representatives labored in behalf of the protection of the Jews in Eastern Europe and for the securing of minority rights for them in various countries. Ambassador Henry Morgenthau, Sr., was sent by President Wilson to investigate and to make a report on the treatment of the Jews in Poland.

In 1922 the United States Congress, in both houses, passed resolutions endorsing the establishment in Palestine of a national home for the Jewish people, in almost the same language as the Balfour Declaration.

During the Nazi persecutions of 1933 and after, the chief efforts of the government were directed toward alleviating the plight of refugees. No official statements were made, though numerous government officials denounced the Nazi persecutions in their capacity as leading individuals. The most significant act of the government was the withdrawal of Ambassador Hugh R. Wilson from Germany after the attacks on the synagogues in November, 1938. With the entrance of the United States into the second World War in December, 1941, the question of Jewish rights abroad became one of the issues to be settled at the final termination of the conflict in the spirit of the Atlantic Charter and the Four Freedoms.

The Statue of Liberty, emblematic of the ideals of the United States as transmitted from Bible ideals

3. The Jews and United States Political Parties. A survey of the relations of the Jews of the United States to the various political parties is sufficient to dispel the myth of a specific "Jewish vote." On the contrary, Jews have tended to divide among the major political parties in the same manner as other groups in accordance with their own social and economic interests or political ideals.

During the American Revolution most of the Jews, being engaged in commerce and importation, joined with others of the same group in espousing the cause of independence. A smaller group of older families were loyalists, while in some cases, as in that of the Franks family, there was a division of loyalties. There was little political activity among the Jews in the period prior to the Civil War; the Jews most active in public service were members of the old Republican Party, the ancestor of the later Democratic Party. On

POPULATION STATISTICS

In 1943 there was an estimated number of about 4,841,000 Jews in the continental United States, plus about 2,000 in the territories. They were divided as follows:

States:

Alabama	14,390	Montana	1,800
Arizona	1,755	Nebraska	14,500
Arkansas	8,500	Nevada	660
California	150,175	New Hampshire	3,328
Colorado	21,375	New Jersey	259,970
Connecticut	93,080	New Mexico	1,180
Delaware	5,200	New York	2,206,300
District of Columbia (see Washington, D.C.)	19,000	North Carolina	7,000
Florida	24,000	North Dakota	2,500
Georgia	24,000	Ohio	183,500
Idaho	1,050	Oklahoma	4,500
Illinois	388,000	Oregon	11,650
Indiana	28,000	Pennsylvania	435,000
Iowa	14,000	Rhode Island	27,850
Kansas	9,250	South Carolina	2,000
Kentucky	18,000	South Dakota	1,963
Louisiana	16,000	Tennessee	25,000
Maine	9,000	Texas	49,196
Maryland	76,000	Utah	1,900
Massachusetts	262,945	Vermont	2,000
Michigan	95,000	Virginia	25,000
Minnesota	37,500	Washington	18,000
Mississippi	4,600	West Virginia	7,000
Missouri	87,600	Wisconsin	40,000
		Wyoming	1,000

Important Cities:

Atlanta, Georgia	12,000	Memphis, Tenn.	6,500
Atlantic City, N. J.	10,000	Milwaukee, Wis.	29,600

Panama Canal Zone	500	Virgin Islands	60

the slavery issue and in the Civil War the Jews divided according to their localities; there are no records of Jewish Copperheads in the North or Unionists in the South. Naturally there were almost no Jews in the anti-foreign Know Nothing Party which enjoyed a brief career just before the Civil War. Judah P. Benjamin was a member of the Confederate cabinet and numerous Jews fought in the Confederate army; David Einhorn, August Bondi and Moses Mielziner were noted anti-slavery leaders and many Jews served in the Union army, the most notable being Major Leopold Blumenberg, later provost-marshal at Baltimore.

Immigrants looking toward the country in which they can find equality

Following the Civil War the majority of the Jews, residing in the north, followed the dominant Republican Party. When Jewish immigration swelled after 1881 and the immigrants settled in the cities, the latter, like most immigrant groups, tended to follow the local party machines, which were predominantly Democratic. Small groups of Jews, swayed by political influences they brought with them from their native soil, joined anarchist or socialist organizations. There has never been any perceptible number of Jews in the Prohibition movement. Jews were to be found in both sides of the split in the Republican Party in 1912; Oscar S. Straus followed Theodore Roosevelt and ran for governor of New York on the Progressive (Bull Moose) ticket. During the period from 1920 on there were numbers of independent Jewish voters, a movement that paralleled the increase of independent voting.

After the depression of 1929, Jews joined in the shift from the Republican Party. Many were attracted by the ideals of the New Deal of Franklin D. Roosevelt; a much smaller number became affiliated with more radical movements. A number of Jews participated in the formation of the American Labor Party. In the period just before the entrance of the United States into the second World War, the larger number of Jews, because of their sympathy with their afflicted brethren abroad were, like most of the groups with connections in Europe, inclined to favor the interventionist side, particularly after the flirtation of the isolationists with anti-Semitic groups in the United States.

In 1943 the American Jewish Conference was organized, to meet in July and to take action on the problems of Jews all over the world.

UNITED SYNAGOGUE OF AMERICA, THE. The United Synagogue of America was organized on February 23, 1913, in the Assembly Hall of the Jewish Theological Seminary of America. Among the men associated in this organization were Solomon Schechter, who was its leading spirit, Herman H. Abramowitz, Cyrus Adler, Solomon Solis Cohen, Louis Ginzberg, Meyer Goodfriend, Julius Greenstone, A. M. Hershman, Charles I. Hoffman, Mordecai M. Kaplan, Charles H. Kauvar, Jacob Kohn, Samuel C. Lamport, William Levy, M. Pinansky, Herman H. Rubenowitz, Michael Salit, Louis Sickles and Elias L. Solomon. The first president of the United Synagogue was Solomon Schechter. He was followed by Cyrus Adler, Louis Ginzberg, Elias L. Solomon, Herman H. Abramowitz, S. Herbert Golden, and Nathan Levy. Louis J. Moss was president in 1943.

The purpose of this organization is stated in the Preamble, as follows:

To assert and establish loyalty to the Torah and its historical exposition,

To further the observance of the Sabbath and the dietary laws,

To preserve in the service the reference to Israel's past and the hopes for Israel's restoration,

To maintain the traditional character of the liturgy, with Hebrew as the language of prayer,

To foster Jewish religious life in the home, as expressed in traditional observances,

To encourage the establishment of Jewish religious schools, in the curricula of which the study of the Hebrew language and literature shall be given a prominent place, both as the key to the true understanding of Judaism, and as a bond holding together the scattered communities of Israel throughout the world.

It shall be the aim of the United Synagogue of America, while not endorsing the innovations introduced by any of its constituent bodies, to embrace all elements essentially loyal to traditional Judaism and in sympathy with the purposes outlined above.

The Women's League of the United Synagogue was organized in 1917, headed by Mrs. Solomon Schechter. The Young People's League of the United Synagogue was organized in 1920, and its first president was Israel Goldstein. The National Federation of Jewish Men's Clubs was established in 1930, under the leadership of Edward C. Weinrib.

When organized, the United Synagogue numbered some twenty congregations. In 1943 the United Synagogue and its affiliated organizations numbered over one thousand affiliated and associated congregations, sisterhoods, men's clubs and young people's organizations. The United Synagogue established the first student center at Columbia University. It served also as a dormitory for out-of-town students of the Jewish Theological Seminary. Additional students' houses were established at the University of Pennsylvania and Temple University. The Columbia University students' house was discontinued when the Jewish Theological Seminary erected its own buildings at 122nd Street and Broadway. The United Synagogue cooperated with the Seminary in establishing a fund for the Solomon Schechter chair in theology in 1924. Among the other important achievements of the organization was the utilization of radio for educational purposes. It was the first Jewish religious organization in the field. It also erected the Synagogue Center at Jerusalem, conducted by the Yeshurun congregation.

One of the more important activities of the United Synagogue was the organization of new congregations where they were needed and the strengthening of older and badly organized congregations. About 150 important congregations in the United States owe their existence to the extension department of the United Synagogue. Among them are Temple Emanuel of Hartford, Conn., Temple Emanuel of Providence, R. I., Beth El Zedeck of Indianapolis, Ind., B'nai Zion of Chicago, Ill., Congregation Beth Israel, of Vancouver, B. C., and Beth Shalom of Pittsburgh, Pa. Hundreds of other congregations were strengthened and hundreds of religious schools, young people's societies, sisterhoods and men's clubs were organized in every part of the United States.

Its publications include: *Manual for Teaching Biblical History,* by Eugene Kohn; *Curriculum for Hebrew Schools,* by Alter Landesman; and *Bible Story,* by Sulamith Ish-Kishor. About 1940 there was established a Commission on Jewish Education of the United Synagogue and the Rabbinical Assembly, headed by Rabbi Alter Landesman and Rabbi Morris Goodblatt. This Commission published the Harishon Series, a series of elementary textbooks by Dr. Simon Greenberg, and *The Wishing Hour,* by George Bellak and Leah Jaffa.

The Young People's League published program material for the various festivals and bulletins and booklets on such topics as debating and conducting high holiday services. It published also a *Sabbath Prayer Book,* compiled by Elias Sidney, and *Guiding Jewish Youth,* by Samuel M. Cohen, a training course for leaders in synagogue clubs. The National Federation of Jewish Men's Clubs published a men's club manual, and *Jewish Child Guidance,* by Samuel M. Cohen; *An All-Year Round Program for Men's Clubs,* by Joseph Miller; and much other program material.

The official periodical of the United Synagogue is the *Synagogue Center,* which is published quarterly. In 1943 it published also *The Jewish School and Democracy,* a monthly periodical for rabbis, principals and teachers, which provides guidance and material for correlating the work of the school and the war effort. SAMUEL M. COHEN.

Women's League of the United Synagogue of America. The Women's League was founded in 1917 by Mrs. Mathilde Schechter, as a memorial to her husband, Solomon Schechter. Mrs. Schechter served as president until the following year. She was succeeded by Mrs. Charles I. Hoffman of Newark, who became honorary president in 1927, when she was succeeded by Mrs. Samuel Spiegel, the incumbent in 1943.

The first activity of the League was the creation of a Jewish students' house at Columbia University; this was followed by activities for Jewish students on the campuses of almost every college in the United States. From its very inception it provided educational programs for sisterhood meetings, such as plays and papers on timely topics; in addition, it sent out speakers to address meetings. It supplied organizations with a monthly digest of current Jewish events and monthly messages from the national president.

The publications of the League include: *Friday Night Stories for Children; The Three Pillars, or Thought, Practice and Worship for the Jewish Woman,* by Deborah Melamed; *Modern Problems of Jewish Parents,* by Jacob Kohn; *The Adventures of K'tonton,* a holiday story book by Sadie Rose Weilerstein; *Handbook for Jewish Women's Organizations,* originally written by Deborah Melamed, and revised and enlarged by Sarah Kussy and Emma Bienenfeld; *The Jewish Home Beautiful,* by Althea Silverman and Betty Greenberg; *My Country 'Tis,* a pageant by Althea Silverman; *The Women's League Outlook,* a quarterly edited by Mrs. Israel Davidson from 1930 to 1942 and since then by Mrs. Maxwell James; cards containing the benedictions for various occasions and prayers; phonograph records of liturgical melodies.

In 1943 the League had 375 Sisterhoods in the United States and Canada affiliated with it, and was divided into fourteen branches according to geographical location. The branches held semi-annual conferences, and the national organization had annual conventions. The

League was of great importance in educational and cultural work, radio programs, the raising of funds, and other projects auxiliary to the work of the United Synagogue. It was especially interested in providing for the Synagogue Center in Jerusalem and in the creation of scholarships (since 1940 the Cyrus Adler and Mathilde Schechter Memorial Scholarships) for students at the Jewish Theological Seminary of America.

UNITY OF GOD, *see* ATTRIBUTES OF GOD; GOD.

UNIUNEA EVREILOR PAMANTENI (Union of the Native Jews in Roumania), the large political organization that played a considerable role in the Jews' fight for emancipation in Roumania. It was founded at Bucharest in 1909 in answer to the violent anti-Semitic agitation and in opposition to the restrictive anti-Jewish legislation. Overcoming the hostility of Roumanian non-Jewish circles and the indifference or passivity of the Jews themselves, this organization became a powerful factor in the political life of Roumania. By August, 1916 (the date of Roumania's entrance into the first World War) there was hardly a town in Roumania without a branch of this organization in function. In order to influence the population in favor of the Jews and to attain equal civil rights, pamphlets about the dire economic situation of the Jews were issued and memoranda concerning anti-Jewish laws and anti-Semitic movements were submitted to the government and the political parties. Prior to the country's entrance into the War, more than a million and a half pamphlets, in addition to other propaganda material, were distributed.

At the beginning of 1913 the periodical *Infratirea* (Fraternization) was founded which, under the editorship of Constantin Graur and Saniel Labin, soon acquired a large circulation, being read by both Jews and non-Jews. In the same year, after the Roumanian-Bulgarian war, the anti-Semites tried to prevent a Congress for Emancipation, convoked by the Union, from being held, whereupon the Union issued a statement, signed by Adolph Stern and Saniel Labin, at that time the leaders of the Union, to the effect that "the Jewish population, if barred from discussing its problems openly and peacefully, would see itself forced to defend its rights by every possible means." This statement was made in defiance of special gatherings of the anti-Semites and the menace of pogroms, and was considered by the Roumanian press as a revolutionary step.

After the first World War, facing the anti-Semitic agitation that rose again after the conclusion of the peace treaties, the Union had to protect the newly acquired civil rights of the Jewish minority. It changed its name to Uniunea Evreilor Romani (Union of the Roumanian Jews) and under the leadership of Wilhelm Filderman (elected president in 1923) was active in safeguarding Jewish interests. Affiliated for a time with the Liberal Party of Bratianu and Duca, the Union, owing to an electoral agreement with this party, managed to send Filderman to the Chamber and Horia Carp to the Senate on Liberal tickets. A competitor of the Union was the other Jewish political organization of Roumania, the Jewish Party, based on Zionist ideology, which had an electoral agreement with the National Peasants' Party; in 1937, however, endangered by the Iron Guard and the anti-Semitic movement of Cuza and Goga, the two Jewish parties established a common Consiliul Central (Central Jewish Council) consisting of the leaders of both organizations. In 1939 the Union, like the Council and all other Jewish bodies, was forced to discontinue its work under the pressure of the government.

UNIVERSALISM AND PARTICULARISM.

1. Universalism. Universalism is that theory or doctrine of religion which views the entire universe as a unit, the creation or emanation of one, single, and therefore universal, God.

The implications of universalism are far-reaching. It denies absolutely the existence of gods or of supernatural beings or powers other than God Himself. It affirms that He is universal in time as well as in space, eternal. A corollary of this doctrine of the eternality of God, the Creator, is that creation was not momentary, merely at the beginning of existence, but is continuous, that accordingly God controls or governs the universe, that divine purpose animates existence and fixes a definite goal for all human living and striving, that therefore men, both nations and individuals, live, more or less consciously, in accordance with divine purpose, either fulfilling it, and so realizing their destiny, or frustrating it, and so living contrary to God's will for them. A further corollary of the doctrine of universalism is the unity of mankind, that nations and individuals have relationship with each other, a duty to or a purpose for each other; that all men are children of the universal Creator or Father, are therefore brothers, that mankind therefore constitutes one vast, universal family; and that accordingly the duty of man, in fulfillment of eternal, divine purpose, is eventually to achieve this universal family unity, this brotherhood of individuals and nations. This will result in the cessation of all warfare and strife, hatred and competition, injustice and oppression, and the establishment of universal and eternal peace, justice, truth and love. The attainment of this goal by men is God's universal purpose for His creatures. History is but the record of man's way of living and of his attempt, or failure to attempt, to achieve this destined goal. In this sense the universal God, eternal in time, is the God of History. All this is implicit in the concept or doctrine of universalism.

We find intimations or dawning perceptions of universalism fairly early in literature, the formal record of world thought, as for example in the well-known hymn of Ikhnaten, the Egyptian king of the first half of the 14th cent. B.C.E., which extols the universal character of the sun, conceived as the deity, Aten, and perhaps also in early Babylonian writings, which vaguely ascribe certain universal powers or functions to the supreme deity, Marduk. But this is not at all universalism in the truest sense. True universalism was first conceived by the prophets of Israel; not by any one prophet alone, but in its manifold implications, it was, as they put it, revealed by God to a succession of prophets through a period of almost 300 years.

The first true universalist, not merely in Israel, but in all history, was the prophet Amos. Until his time Israel had conceived of its God as a purely national deity, under the name of Yahveh. It was Yahveh's business, as a national God, to protect and prosper His people in all their affairs, to give them victory in warfare, political power and economic well-being in their dealings with neighboring nations, freedom from plague and other national calamities, and general good fortune and happiness. Should misfortune befall the people, and thus indicate divine displeasure, the deity could easily be appeased by the redoubling of sacrifices and proper ceremonial repentance. In truth he had to let himself be appeased and not permit his people to suffer too greatly, and especially not to be conquered and destroyed by its enemies; for his existence was inseparably bound up with its, and should it perish and disappear completely he in turn would be left a god without a people to worship him and sacrifice to him, a god therefore who had no reality whatever, no actual existence. Israel believed, at the time of Amos, i.e. 751 B.C.E., that at the exodus from Egypt Yahveh had entered into enduring covenant with it, had taken it as His people and agreed to be its God, in the strictly national sense; He might therefore have relations

with no other people whatever, just as it, in turn, might worship no other god. Whatever it might do, and however Yahveh might be angered, He could not cast Israel off, for He was covenanted to it, and moreover, His existence and His reputation as a god were inseparably bound up with its existence and its prosperity. And at just this particular period, when, for the moment, the power of both Assyria and Egypt, Israel's mighty neighbors, was at low ebb, and a certain international chaos obtained, popular belief in Israel began to affirm that Yahveh, its national deity, was indeed a great God, and that He had destined Israel for great things, perhaps even for an empire comparable to, and, it might be, even supplanting the empire of Assyria.

The Assyrians had evolved the concept of world-empire. They aspired to world-conquest and world-domination and the ruthless exploitation of conquered peoples. But this very concept of world-empire necessarily implied also a concept of world-unity, of all nations united in some way and for some all-inclusive purpose. And now that at least Israel's court party and militaristic element were, in their turn, cherishing dawning hopes that Yahveh might have destined Israel to take Assyria's place in world-leadership, the concept of world-unity became current in Israel also.

To this concept of world-unity Amos gave a new, unexpected and startling, even revolutionizing, interpretation. Yahveh was more than a national God, the God of Israel alone; He was a world-God, Whose power and dominion extended beyond Israel and shaped the destinies of other peoples. He had established Israel in Palestine; but He had also brought the Arameans from Kir and settled them in Syria, and the Philistines from Caphtor and settled them in Philistia. Actually Israel was to Yahveh no more than were the lowly Ethiopians. From all peoples He demanded strict conformity to ethical standards of conduct. Therefore, just as He had once made a covenant with Israel and taken it as His people, so now, should He for any reason, for example, Israel's iniquity and faithlessness to its covenant obligation, so choose, He could cast Israel off and repudiate His covenant with it. Nor would this affect His existence or reputation as a god in the least; for again, should He so choose, so Amos clearly implied, He could take some other nation to be His people. And actually this was Yahveh's present intention, not to bring Israel to world-empire, but to reject it utterly, to allow the Assyrians to destroy His people because of its faithlessness to its covenant obligation and its persistent refusal to repent. Such was, in brief, Amos' message.

Actually this was not yet complete, thoroughgoing universalism; but it was the first positive step in that direction. Amos had rejected the basic principle of national religion, of the eternal and inseparable relationship of one specific god with one specific people, and had affirmed instead the basic principle of universal religion, that God's power and solicitude and also His standards of conduct for nations reach out beyond the confines of the single nation and embrace all peoples, and that He can use any people as the agent or instrument of His purpose; and even more, that God's existence and reputation are quite independent of the existence of any one, single people and of His relations with it. In some, and very positive, respects Amos still adhered to the fundamental principles of national religion, as, for example, in his tacit assumption that Yahveh could have specific, intimate relations with only one nation at a time, and also in his implicit affirmation that in exile in a distant, foreign land it would be impossible for Israel to worship Yahveh. Undoubtedly he had a dawning apperception of all that universalism implied, but no real understanding of its full content. That would have been too great a revelation, a step forward too sudden and too vast for any single prophet. But at least in Amos' message the basic implications of universalism were present, either definitely formulated or else in germinal form; and in this sense Amos was the first true universalist in history.

In the Southern Kingdom Amos' spiritual disciple, Isaiah, developed the doctrine of universalism significantly. Not only did he affirm directly what Amos had only implied, that Assyria, the great, world-conquering nation, was but the tool in God's hand, the agent of His purpose, but he added the compelling thought that Assyria was the responsible, and therefore at least the half-conscious, agent of divine purpose, and that, in consequence, should Assyria ever swerve from this divine commission in order to further its own selfish purposes, Yahveh, the world-God, Whose radiance fills the entire universe, would hold it accountable and would discipline it, too, as it deserved.

One other teaching of Isaiah had an immense, even though indirect, significance for the evolution of the doctrine of universalism, as eventually formulated by Judaism. Amos had proclaimed that because of its sin, its faithlessness to its covenant obligation and its rebelliousness against Yahveh, He would cast it off completely and bring about its destruction as a nation. And then, should He so choose, as He probably would, Yahveh could take some other nation as His people, and He would be its god. Isaiah was confronted with this very issue in 735 B.C.E. when, shortly after the accession to the throne of the young king Ahaz, Jerusalem was besieged by the federated Aramean and Israelite armies, and it seemed as if it must surely fall. The destruction of Israel, the Northern Kingdom, at the hands of Assyria was impending, as, no doubt, the prophet could see clearly. Was this to be likewise the destruction of the Southern Kingdom, Judah, and with it of the entire people of Israel? In this crisis Isaiah announced a new message, a distinct modification of the message of Amos. Within the faithless and sinful nation there was a small, righteous group, i.e. himself, the prophet, and his immediate followers, who had hearkened to his message and were endeavoring, as a small group, to live even as Yahveh had commanded. In the general destruction of the faithless people Yahveh could not, as a God of justice, permit this little, faithful group to be destroyed along with the sinful mass of the people. In both the Northern and the Southern Kingdoms He would preserve this tiny righteous remnant, and in due time He would build it up to become a new nation, a new Israel, tested and proved, which would never again be faithless to Him. And this new Israel, and not a foreign nation, Yahveh would take as His people in place of the old, faithless Israel, which He had had to destroy.

Undoubtedly, in his doctrine of the righteous remnant as the nucleus of the new Israel and in his consequent rejection of Amos' implied teaching that Yahveh would take a strange nation to become His new people, Isaiah reverted in the direction of nationalism. But despite this, Isaiah's doctrine of the righteous remnant and the new Israel was of tremendous significance in the unfolding of the scheme of universalism.

The next significant advance in the unfolding of the concept of universalism was made by Jeremiah, particularly during the last period of his prophetic activity, between 597 and 586 B.C.E. In 597 Jerusalem was besieged and captured by the Babylonians. Conforming to a relatively humane policy, the Babylonian king, Nebuchadrezzar, deposed the young king, Jehoiachin, and in his stead set Zedekiah upon the throne. He contented himself with carrying away into captivity in Babylonia a few thousands of the people, recruited, as was but natural, from the ranks of those classes of society who would be most likely to instigate a rebellion, should conditions ever become ripe for this.

By this time Jeremiah had been a prophet for almost thirty years. In his youth he had been a spiritual disciple of Hosea, and had reaffirmed the message of this prophet, but with application to his own Southern Kingdom and the conditions of his own day, i.e. that because of its faithlessness to its covenant obligation and its consequent iniquity Yahveh must cast off the sinful nation completely. True, Hosea had held out a hope, in principle, that if Israel would but repent and sincerely return unto Yahveh, He, in turn, would take it back as His people and would renew His covenant with it, would betroth it unto Him, this new repentant people, by a covenant which would endure forever. Now, with advancing years, and beholding, as it seemed, the doom of Israel rapidly approaching, Jeremiah fused Hosea's doctrine of the renewed covenant with a repentant Israel with Isaiah's doctrine of the righteous remnant. He proclaimed that the exile, with all its tribulations, was to be, not for destruction, as the earlier prophets had proclaimed, but for discipline and regeneration. Through suffering, which it would recognize as a divine dispensation, Israel in exile would become aware of the enormity of its faithlessness to Yahveh and would repent and return to Him; and He, in turn, once Israel's regeneration was complete, would take it again as His people, and once again He would become its God. And as the mark of His reborn favor, He would

then restore it, as His people, to its native land, Palestine. But this was not to be at all the fortune of the entire people. Only that portion which had been carried into exile and could there undergo the discipline of suffering, which would lead to eventual repentance and regeneration, might participate in this restoration to Palestine and to the role of Yahveh's people. The remainder of the nation, the large mass which had remained in Palestine, and therefore was not subject to the regenerative discipline of exile, and which could therefore not repent and return to Yahveh in sincerity, as the prophet apparently believed, was doomed to be rejected by Yahveh, even as rotten figs are cast out and can not be used. But with the regenerate and now thoroughly righteous and restored Israel Yahveh would make a new covenant, an eternal covenant, never to be repudiated or broken.

Jeremiah made one other significant contribution to the concept of universalism, as it was shaping itself in Jewish thought. At some time between 597 and 586 B.C.E. he sent a letter to the exiles in Babylonia (*Jer.* 29:1 et seq.) in which, among other things, he counseled them to pray to Yahveh for the welfare of the community in which they had settled. Amos had affirmed that Yahveh could be worshiped only in Palestine, His land, and Hosea had apparently reaffirmed this principle (*Hosea* 3:4). Jeremiah was the very first prophet to declare that Yahveh could and should be worshiped in a foreign land. By this utterance Jeremiah proclaimed that Yahveh was more than a local deity, inseparably linked with one particular and very small land, that He was indeed a universal God, filling the entire universe, present at all times in every place of that universe and able to be worshiped in consequence wherever His people might come to dwell.

Jeremiah's expectations of the complete regeneration of Israel in exile were doomed to disappointment. The effect of the experience of exile was the very antithesis of what he had proclaimed. Nonetheless somehow the belief now became deeply rooted in the consciousness of all Israel that God had indeed enacted a new covenant with His people, a covenant which would endure forever and which would under no condition ever be broken. Despite this, however, so it must have seemed, no improvement in Israel's way of life nor closer and more loyal conformity to divine ordinances could now be discerned. This condition constituted an utter paradox. How was it possible to reconcile the concept of a just and righteous God, who demanded of His people strict adherence to a way of life which He had revealed to it, but whose demand the people consistently ignored and even defied, with the concept of the new and eternal covenant of this just God with this very same, sinful people? In the course of the gradual unfolding of Judaism during the next two and a half centuries four different solutions of this paradox were offered. Two of these solutions had direct, and the other two had indirect, bearing upon the development of the doctrine of universalism.

The first of these was formulated by the prophet Ezekiel, his doctrine of "for His name's sake" (*Ezek.* 36:16-36; 39:-20-29). This doctrine maintains that Yahveh is above all else a universal God. More desired by Him than anything else are the recognition of His universal character by all the nations of the earth and their homage to Him as universal God. But, the prophet argues, what will the nations think of a god who could not even protect his own people and keep them firmly established in their native land? Certainly the nations would not understand that Israel's exile was but the well deserved punishment at His hands for its faithlessness to Him. They could interpret this circumstance of Israel in exile only as an indication of Yahveh's true impotence. Therefore, in order that the nations might become convinced of the universal power and authority of Yahveh, He had no alternative but to restore Israel to its native land and resume relations with it. But with a sinful people Yahveh, a righteous God, could not possibly have relations. Therefore, of His own accord, as an act of sheer grace, and not because of any merits whatever on Israel's part, Yahveh would remove from its breast the heart of stone, the stubborn heart which had impelled it to sin, and put in its place a heart of flesh. And with Israel, thus regenerated and made righteous, Yahveh could now justifiably have the relations of god to his people. This program, when at last completed, must convince the nations of Yahveh's omnipotence and bring them to do homage to Him as universal God.

It was a forced and artificial doctrine and in no wise convincing; yet it persisted in Jewish thought and theology for approximately two centuries. It is the first conscious and positive affirmation in prophetic teaching that Yahveh was the universal God.

Ezekiel's great successor, the prophet generally known as Deutero-Isaiah, developed further, far-reaching implications of the principle of universalism. His prophetic message was delivered about 540 B.C.E., when the Neo-Babylonian empire was about to be succeeded by the Persian empire under Cyrus. In the face of dominant Zoroastrian dualism, which, under changing political and cultural circumstances, seems to have had some appeal to Jews, both those of Babylonia and those of Palestine, Deutero-Isaiah affirmed absolutely that Yahveh was the one world-God, the only One, the Eternal One. "I am the first, and I am the last, and beside Me there is no God" (*Isa.* 44:6). As the one, universal and eternal God He is, in contradistinction to Zoroastrian dualism, the Creator of evil as well as of good, the Fashioner of darkness as well as of light. As the eternal God He is the God of history. Human existence is not an accidental, but a divinely purposed condition. Divine purpose runs through all of history; it establishes a way of life which all men must lead and a goal toward which all conscious human living must tend. All nations must, in the fulfillment of divine purpose, come to recognize Him as the universal God, to renounce their native gods and to abjure their idols and render true homage to Him, and to live the life which He has intended for all mankind.

But how shall they be made to comprehend this all-embracing truth? The prophet's answer to this imperative question was that Israel was to be the mediator of this truth to the nations. Israel, to whom in the past God's way of life had been revealed, had through a double measure of discipline in exile become sufficiently regenerate to be restored to its native land, in order that it might at last begin to fulfill its destiny, that it might consciously become God's servant, and that, through its worship and its own living, it might bear testimony of Him and of His way of life unto the nations. "Ye are My witnesses, saith the Lord, and My servant whom I have chosen" (*Isa.* 43:10). In this role Israel was to be "a light unto the nations, a covenant unto the peoples." Through its service and its testimony of God revelation and understanding were to come unto mankind, and thus all mankind was to be brought to live God's life and to enter into covenant relations with Him. Then mankind will have been redeemed from the consequences of its previous sinfulness, and then, in truth, through Israel God's salvation will have reached to the ends of the earth.

Such, in brief, is Deutero-Isaiah's doctrine of universalism. It is by no means Judaism's final word on universalism. Nonetheless, in a period of slightly more than two centuries, from Amos to Deutero-Isaiah, Judaism had passed through the successive stages and had at last evolved a complete and accepted formulation of the doctrine of universalism.

The natural practical application of Deutero-Isaiah's scheme of universalism would be, of course, a program of proselytism to Judaism. Jeremiah had paved the way for this with his affirmation that Yahveh could be worshiped outside of Palestine, in any spot on the earth's surface. Ezekiel had affirmed, in turn, that the homage of the nations was desired by Him; and Deutero-Isaiah had defined wherein this homage would consist and how it would be achieved. In 516 B.C.E., at the climactic moment of the dedication of the second Temple, upon the New Year's Day, Zechariah proclaimed a program of conversion to Judaism, to the worship of Yahveh, of both nations, as nations, and of individuals from within the various nations. "Thus saith the Lord of hosts: It shall yet come to pass, that there shall come peoples, and the inhabitants of many cities; and the inhabitants of one city shall go to another, saying: Let us go speedily to entreat the favour of the Lord, and to seek the Lord of hosts; I will go also. Yea, many peoples and mighty nations shall come to seek the Lord of hosts in Jerusalem, and to entreat the favour of the Lord. Thus saith the Lord of hosts: In those days it shall come to pass, that ten men shall take hold, of all the languages of the nations, of the skirt of him that is a Jew, saying: We will go with you, for we have heard that God is with you" (*Zech.* 8:20-23).

There is ample evidence that during the quarter of a century following Zechariah's message there was considerable proselytism to Judaism, if not on the part of nations, as Zechariah had announced, at least on the part of individuals. *I Kings* 8:41-43 reflects this trend. The movement was, however, short-lived. A recrudescent nationalism, beginning at some time in the first decade of the 5th cent. B.C.E., put a check upon the proselyting movement and proceeded to relegate the proselytes to a position of inferior rank within the Jewish religious community. An anonymous prophet took up the cudgels vigorously for them and affirmed that these proselytes were as dear to God as native Jews and that their worship was quite as acceptable to Him, for "My house shall be called a house of prayer for all peoples" (*Isa.* 56:1-7). Nonetheless, the proselyting movement was doomed. The final blow was dealt it, shortly after 458 B.C.E., by the drastic legislation in *Ezek.* 44:6-9. This period of proselyting was brief but fruitful. It was the first and, while it lasted, probably the most unrestricted movement of proselytism Judaism has ever known, a positive and concrete expression of the principle of universalism.

Within this same period, probably toward the end of the first decade of the 5th cent. B.C.E., at the hands of the prophet Malachi, universalism received what was probably its most extreme formulation in Jewish thought. He announced, speaking in the name of God (1:11, 14b): "For from the rising of the sun even unto the going down of the same My name is great among the nations; and in every sanctuary where incense is offered or a true sacrifice is brought, it is brought to My name; for great is My name among the nations. . . . For a great King am I, saith the God of hosts, and My name is revered among the nations." This seems to affirm the principle that no matter where the sanctuary nor what the local name of the deity to whom sacrifices are offered anywhere in the world, actually it is offered to the universal God of Israel, for He is the King of the universe, the sum total of all local and national deities, in whom all gods are included. Despite its reaffirmation by Philo, some five centuries later, this extreme and somewhat bizarre formulation of the concept of a universal God was definitively rejected by Judaism and so found no incorporation in Jewish doctrine.

Measured by the true spirit and doctrine of Judaism, still another program of universalism was unfolded in the brief period from about 490 to 485 B.C.E. It was bound up with the thesis that of old God had promised to the patriarchs, Abraham, Isaac and Jacob, that, because of their piety, their posterity should become a nation numerous and powerful and should "inherit the gate of their enemy" (*Gen.* 22:17). It was now thought that the moment for the fulfillment of this promise had come. This fulfillment would consist in the restoration of Jewish national independence under a Davidic king and the wide expansion of Jewish political dominion, and perhaps even the establishment of a vast Jewish empire to supplant the present Persian empire. The program of this movement is set forth in the war-legislation in *Deut.* 20, a literary product of this period. With Yahveh fighting in the ranks of Israel's army, Israel would be irresistible, and the nations would of course succumb. As each was attacked, it was to be offered terms of peace. These terms involved voluntary submission to Israel's dominion and conversion to Yahveh's worship. But should the conquered nation or city not accept these terms, then all its males were to be massacred and the women and children reduced to slavery. In this way all the world would be brought to the worship of Yahveh, and Israel's world-dominion would be established. This bizarre program, a strange and unreal fusion of nationalism with universalism, so completely foreign to the true spirit of Judaism, could, of course, not persist long or come to aught but complete failure.

Yet it did lead to concrete action, to a brief, desperate and altogether unsuccessful attempt of the little Jewish nation in Palestine, or at least of the extreme nationalists among them, to regain political independence and to set a descendant of David upon the throne. This revolution was planned for and inaugurated at the moment of the death of Darius I and the accession of Xerxes to the Persian throne in 485 B.C.E. In a few short months the revolution was completely crushed by a coalition of the little neighboring states, with Edomites, Moabites and Ammonites in the van, and encouraged and supported by the Persians themselves. The land was overrun and the people massacred; Jerusalem was besieged and captured; its walls were destroyed and its gates burned; the Temple was sacked and burned in part; countless thousands of the people, and especially its youth, who had escaped the general massacre, were taken captive and sold as slaves in the slave markets of the Mediterranean world. This, and not the Babylonian exile of a century earlier, was the great dispersion. But a small handful of the former nation remained in Judea, a remnant so small and in such pitiful circumstances that even some forty years later Nehemiah spoke of them as "the remnant that are left of the captivity" (*Neh.* 1:2-3).

This bitter catastrophe, comparable only, in all Jewish history, to the after-effects of the Roman conquests in 70 and 135 C.E. and the tragic experiences of the Jewish people in the present day, called forth one of the most significant formulations of the principle of universalism in all Jewish literature. It is set forth in the so-called "Songs of the Suffering Servant," found for the most part in *Isa.* 42:1-4; 49:5-7; 50:4-10; 53:1-12. Very fittingly these passages are incorporated in the writings of Deutero-Isaiah, for the author, an anonymous writer who lived about 460 B.C.E., was a direct disciple of Deutero-Isaiah in spirit, thought and literary form. He reaffirmed the message of that great prophet, that Israel was the servant of God, chosen by Him to "be a light unto the nations, a covenant of the peoples," to redeem the nations from the consequences of their iniquitous way of life. But now, because of this bitter and decimating catastrophe, Israel, that small, unhappy remnant of the nation still resident in Palestine, had become the suffering servant, beaten, crushed and humiliated by those very nations. But its very sufferings would be the means of their redemption; through its wounds and its stripes they would be healed. If God demanded suffering as the just punishment for iniquity and rebelliousness, as it seemed that He did, then its altogether unjustified and innocent suffering would be the expiation for the sins of the nations, even those very nations who had inflicted these wounds upon the servant. This is, of course, the doctrine of vicarious atonement. Judaism formulated it in these Songs and, as it were, experimented with it, only, however, ultimately to reject it completely. This doctrine seems to have persisted, however, in the thought and teaching of certain peripheral Jewish sects, especially among the Jewish inhabitants of Galilee, and, as is well known, became the basic principle of Christianity. Nonetheless, although the doctrine of vicarious atonement was discarded completely by Judaism, the figure of the Suffering Servant itself has played a significant role in Jewish history and thought, for in it, throughout the course of Judaism's long, tragic history, Jewish writers and preachers have discerned the complete symbolization of Israel in its seemingly interminable, tragic role as the true Suffering Servant, the scapegoat of mankind, the innocent victim of mankind's hostility and persecution, patiently bearing through all its suffering the sins of mankind and hoping, aspiring, laboring faithfully, undeviatingly for the ultimate redemption and salvation of mankind and the inauguration of God's way of life among men.

Quite naturally the catastrophe of 485 B.C.E. completely changed the course of thought in Judaism. The mass of the people could not share in the exalted vision of the author of the Servant Songs. Their natural reaction, after they began to recover from the initial effects of the great catastrophe, was in the direction of a revived nationalism. With the return to Palestine of Ezra in 458 B.C.E. and of Nehemiah in 444 B.C.E., each bringing in his train a considerable body of particularist Babylonian Jews, the particularist and isolationist spirit became dominant in Judaism and shaped the course of Jewish thought and the evolution of Judaism throughout subsequent Jewish history. In its initial stages this particularism was extreme and absolute, even to the degree of advocating the total exclusion from the Jewish community and from the practice of Judaism of all offspring of intermarriages of Jewish men with foreign women. Proselytism was, of course, now discontinued completely, despite a certain, vigorous opposition to this nationalistic and isolationist tendency, as manifest in the books of *Jonah* and *Ruth,* both undoubtedly products of this period. The program of Judaism had now become thoroughly isolationist, and antithetical in every way to the principles and procedures of universalism.

But this extreme particularism obtained only for a time, approximately three-quarters of a century. The spirit of universalism was too inherent in and fundamental to Judaism ever to be eradicated. Invariably in Jewish history, after the initial nationalistic and isolationist reaction to a great catastrophe affecting the entire Jewish people, the spirit of universalism gradually reasserts itself in Judaism and formulates a new program of action and of positive relations with the rest of the world, based upon the enduring principles formulated by Israel's prophets and culminating in the teachings of Deutero-Isaiah. The present occasion was no exception. Gradually the extremes of isolationist doctrine and practice were modified.

Accordingly, at some time in the 4th cent. B.C.E., the authors of the Priestly Code formulated their doctrine that Israel was destined by God to be unto Him "a kingdom of priests, and a holy nation" (*Ex.* 19:6). The implications of this doctrine are significant. Obviously it is in some respects the counterpart of the doctrine of the prophets, and especially of Deutero-Isaiah, of Israel as the "prophet-people," the "servant of God." As the "priest-people" Israel was to play a role closely similar to that of the "prophet-people." Just as the priest is a holy personage, sacred unto God, and with his sanctity hemmed in and safeguarded by all manner of taboos, mostly of ritual character, which shape his entire course of life, and just as the priest, through his functioning at the altar, mediates between the mass of the people and God and effects atonement on their behalf and remission of sins, so now Israel, the "priest-people," was to play the role of mediator between God and the nations of the world, the lay masses of mankind. It was to be holy unto God in the same manner as the priest was holy unto Him; and just as, through his ministrations and way of life, the priest effected atonement for the laity and brought forgiveness of sin, so Israel, through its role as the "priest-people," would work atonement for mankind and bring remission of the sins of the world, and thus purge mankind of its iniquities and achieve that very redemption from sin and salvation of which Deutero-Isaiah had spoken.

But this would be achieved, not at all in the manner which Deutero-Isaiah had envisaged, but by the ritual procedures and techniques basic to the entire theory of priesthood. Just as the priest had to endure all manner of ritual taboos and deny himself many privileges in which the laity might freely indulge, so too Israel, the "priest-people," had to conform to many taboos, largely of a separatistic character, such as circumcision, the dietary laws, prohibition of intermarriage, an extensive sacrificial system, and the like, in order to preserve its distinctive, sacred character inviolate and eternally to qualify itself to function as God's appointed "priest-people." Through Israel's ceaseless discharge of its divinely appointed priestly role and through its unending ministry of atonement at the altar for the sins of mankind, mankind, constantly sinning, would be constantly redeemed, in precisely the same manner as Israel itself, likewise constantly sinning, is purged of its sin and redeemed through the priestly ministrations of the annual Day of Atonement. In this program of redemption and salvation Israel must necessarily remain the eternal priest-people, ever "holy unto God," a unique separatistic role indeed, yet at the same time thoroughly universalistic in character.

But in the theology of the Priestly Code atonement and remission of sin, while achieved through ritual, do not result from mere mechanical procedure. They must be preceded by sincere contrition for sin, repentance and a positive urge to live henceforth a righteous life, conforming to the divinely fixed standards of righteousness. Israel, as the priest-people, must conform to a stricter way of life, hemmed in by various taboos and observant of certain more precise and inclusive principles of morality, than the lay mass of mankind. But the latter too, in the universalistic divine scheme of things, were, according to the doctrine of the Priestly Code, likewise subject to divine rules of life, conduct and worship. They, too, must observe the Sabbath as a day of abstention from work, must not take human life or eat the blood of the animals which they slaughter for food, and blood revenge must in principle be exacted for all manslaughter (*Gen.* 9:1-7). In a very positive sense the Decalogue, too, in its final, expanded, Priestly form, as recorded in *Ex.* 20:1-14, was intended by God to become, through Israel's ministrations, the way of life for all mankind. In the post-Biblical period the rabbis reaffirmed this universalistic principle, as formulated in the Priestly Code, and presented a systematic organization of divinely instituted rules of life incumbent upon mankind at large in its scheme of the so-called seven Noahide laws.

Such was the theory and program of universalism as formulated by the priestly leaders of Judaism in the 4th and 3rd centuries B.C.E. Obviously it represents actually a practical harmonization of the antithetical principles of universalism and particularism. In its broad outlines it found acceptance and more precise definition and application in normative Judaism, particularly as this was interpreted and expanded by the later Pharisees. For this see the article UNIVERSALISM OF JUDAISM, THE.

2. Particularism. Particularism is that tendency in religion according to which a certain group enjoys a special privilege in relation to God which sets it apart from the rest of humanity. In Christian theology, for instance, particularists would limit salvation to the elect. Similarly, in Judaism the term particularism has been applied to such doctrines as that of the Chosen People or tendencies which arose to separate the Jews from other peoples by forbidding intermarriage or by special rules of holiness.

This type of particularism in Judaism, however, was never a hindrance to its universalism, and merely represented a reaction to dangers to which Judaism was exposed by historical conditions. In the time of the Babylonian Exile, for instance, the transplanted community was in danger of losing its identity, and such prophets as Ezekiel strove to keep it separate from outside influences in order to maintain it intact. The campaign of Ezra and Nehemiah against intermarriage, about a hundred years later, protected the feeble Palestinian community from a similar danger of dilution and disappearance. In both *Ezekiel* and the priestly legislation the emphasis on holiness and the ritual prohibitions, though they might be called particularistic, were rather the discipline to be imposed on a chosen group which had a special mission to perform for the world, to be "a kingdom of priests, and a holy nation" (*Ex.* 19:6). Israel was to be the interpreter of God to the nations, and as such had to consecrate itself by special disciplines.

During the 1st and 2nd centuries C.E., when the Jews were rising in revolt against Rome, laws were passed now and then to limit relations with non-Jews and to prohibit learning their language. The Talmud indicates that this was a war measure, designed to hamper the activities of traitors (*Yer. Sotah* ix, 24c; *Yer. Peah* i, 15c). These were war measures; after the revolts they no longer applied, and there is no evidence that the Jews tried to keep themselves apart from the non-Jews. The segregation in ghettos, the wearing of the Jew-badge and other separative measures were not inaugurated by Jews, but forced upon them.

Finally, the doctrine of the Chosen People, although it singled out Israel for especial distinction, was always coupled with the thought that the choice was not one of special favor, but of special service to all humanity.

UNIVERSALISM OF JUDAISM, THE.

The words "universalism," "particularism," "nationalism" and "legalism" which are often used in the discussion of Judaism as a religion are not the products of the Jewish genius. They are abstract words.

Israel thought about God, about life, about itself and about the world in very concrete terms of religious experience, as moderns would say, or revealed religion as the creators of Judaism felt that experience to be. A study of these thoughts clearly shows that Judaism has always been a universal religion.

The distinction has been made by non-Jewish theologians between universalism and particularism in religion as applied to Judaism. George Foot Moore, in his monumental

work on Judaism (*Judaism in the First Centuries of the Christian Era, The Age of the Tannaim,* vols. 1 and 2, 1927), says (vol. 1, p. 219, note 1): "Inasmuch as in this contrast, particularism frequently implies a depreciatory judgment, while these 'ism' words of themselves suggest a conflict of theory or principle, this terminology should be eschewed by historians." Indeed, the insistence upon the particularistic character of Judaism by some writers is intended to depreciate it. Moore himself holds (vol. 1, pp. 22-23): "The Jews were the only people in their world who conceived the idea of a universal religion, and labored to realize it by a propaganda often more zealous than discreet." These two statements of Moore give the key to the understanding of Judaism as a universal religion. On the one hand, it expanded; on the other hand, it had a distinctive method of its own. As Moore well points out, the "law," the so-called "legalistic" character of Judaism, did not prevent it from seeking and obtaining converts. Moore (vol. 1, p. 228) states: "If there be but one God (as Judaism taught) there can be only one religion and the idea of unity in religion carries with it the idea of universality."

As a matter of fact, there exists today no universal religion in the sense that there is no religion which is accepted by all mankind. That religion in the deeper sense is one, but that, because of the varieties of human beings, religions are many, might be said to be the expression of Israel's belief and hope. Judaism believed and hoped that some day the world will become united in spirit, in the worship of one God, in the words of the prophet Zechariah with which every Jewish service on weekdays and festivals closes: "And the Lord shall be King over all the earth; in that day shall the Lord be One, and His name one" (*Zech.* 14:9). At the time of the rise of Christianity, Normative Judaism, as Moore calls it, had become a completely universal religion. The universality of a religion, if we are not to define it by its actual acceptance by the whole world, may be adequately characterized by its ideas about God and man and by its hospitality, its openness and accessibility to every human being irrespective of his origin.

Whether one takes the critical view of the development of these ideas in the Bible or takes the traditional view as given in the claim which the Bible makes for itself, it does not make any difference. Judaism had become completely universal. No new idea has since been added, although new applications of the inherited ideas may have been made.

The Scripture presents us with the idea of one God Who says of Himself: "I am the Lord, that is My name; and My glory will I not give to another" (*Isa.* 42:8); "I am the Lord, and there is none else; I form the light, and create darkness; I make peace, and create evil; I am the Lord, that doeth all these things" (*Isa.* 45:6-7); "Before Me there was no God formed, neither shall any be after Me. I, even I, am the Lord; and beside Me there is no saviour" (*Isa.* 43:10-11); "Thus saith God the Lord, He that created the heavens, and stretched them forth, He that spread forth the earth and that which cometh out of it, He that giveth bread unto the people upon it, and spirit to them that walk therein" (*Isa.* 42:5). God is presented to us as the creator of the universe, as the Holy One whose supreme qualities are justice and lovingkindness. There is nothing in nature or in history that is outside of His domain. He has no competitors. He is the all-holy One.

As to man, the ideas about him were also complete. The religion is universal because it declares that man is created in the image of God. It is the great Akiba who says (*Aboth* 3:18): "Beloved is man, for he was created in the image of God; a special love was shown him in that it was made known to him that he was created in the image of God, for it is said, In the image of God made He man." The same Akiba formulated the whole law in the commandment, Love thy neighbor as thyself. Such formulations were quite common. Therefore, when Jesus was asked to formulate the law, he said that it was love of God and love of one's neighbor. And as Moore points out (vol. 2, p. 84): "The Law, in a nutshell, in its summaries, is solely moral." When, therefore, in the controversy as to which is the more important verse, Ben Azzai, as against Akiba, says that, superior to the statement "Love thy neighbor as thyself," is *Gen.* 5:1, "This is the book of the generations of Adam. In the day that God created man, in the likeness of God made He him," it is plain that the religion is completely universal in its conception of man. The unity of mankind is established in that all are descended from Adam. Moore says (vol. 1, p. 445): "That God made from one (ancestor) every race of man to settle all over the face of the earth . . . was universal Jewish doctrine." No human being was shut out from Him by Jewish teaching.

The word for religion in the Jewish Scriptures is *berith,* which means "covenant," and describes the relation of God to man, mutual responsibilities and obligations. The Jewish Scriptures speak of the covenant which God made with Noah as a representative of the human race (*Gen.* 9:8-17), the sign of which covenant was the bow (rainbow) in the cloud. God makes the promise never to destroy the human race. It is upon this conception of the covenant between God and the human race that the conception of what is called the Noahide laws is based. These were considered, on the whole, fundamental laws of morality and the rejection of idolatry. This conception had a great influence upon the thought of Israel in the interpretation of Judaism in its relation to the world. Upon it the conception of the righteous Gentile is based, and it leads up to the great statement: "The pious (or righteous) of the nations of the world have a portion in the Olam Haba (the world to come)." The phrase "the world to come" has a twofold connotation: the world of the kingdom of God on earth, and the hereafter, in a world beyond this. Now the righteous of all the Gentile world have this portion (*Sanh.* 105a; Maimonides, *Hilchoth Teshubah* 3:5 and his commentary on the Mishnah, *Sanh.* 10:2). It was such Gentiles who were regarded as righteous and who were considered God-fearing who came to be known by the technical term *ger toshab,* the incomplete proselyte.

Speaking again of formulations of the Law, Moore makes the remark (vol. 2, p. 84): "One would seek far in the scripture to find a finer ideal of the virtues of man than *Psalm* 15 and the essence of religion *has never been so pregnantly expressed* as in *Micah* 6:8." This famous verse, "It hath been told thee, O *man,* what is good, and what the Lord doth require of thee: only to do justly, and to love mercy, and to walk humbly with thy God," is a climax of what went before. The Lord has a controversy with his people. His people ask, Wherewith shall I go before the Lord, etc. And the answer would naturally be: It hath been told thee, O Israel. Instead of that, we have "O, man." The Moral Law was from the start intended for man. It is universal. It is the Torah of the prophets, from Moses to the last, which is the creative power in Judaism. The whole world was envisaged by Judaism as eventually coming to acknowledge God. There are the magnificent visions of *Isa.* 2 and *Micah* 4, of "the end of days" when the nations will come flowing to the mountain of the Lord asking that God teach them of His ways and declaring that they will walk in His paths and that He shall judge between the nations, and that the nations will beat their swords into ploughshares and nation will not lift up sword against nation, neither shall they learn war any more. That the nations were envisaged by Judaism from the point of view of a universal religion is proved by what Moore says (vol. 1, p. 230, note one): "The providential care of God for all mankind and the future recognition of the true God by all nations are common themes in the psalms." The spirit of these psalms is summed up in the last words of the 150th psalm: "Let every thing that hath breath praise the Lord."

Concerning this God and His Law and concerning the belief that this one God will in the end of days be worshipped by the whole world, Israel or the Jewish people considered itself as taught by its religion, as a witness. It felt that its mission in the world was to help bring about the triumph of the teachings of its religion. Kaufmann Kohler (*Jewish Theology,* p. 323) says: "The central point of Jewish theology and the key to an understanding of the nature of Judaism is the doctrine: 'God chose Israel as his people.' The election of Israel . . . its historic mission is to be the bearer of the most lofty truths of religion among mankind." Israel is the most unique people on the face of the earth today. Its peoplehood has been emptied of all nationalism or conceptions of nationality. As Schulman says ("A Basis for Union in Israel," *Contemporary Jewish Record,* vol. 5, No. 5, p. 481): "It became converted as a group to its historic destiny, a witness to God. It was transformed from a secular

nationality into a religious community. It became a universal religion or better, a church." There took place a complete fusion of people with religion, and as he points out in his essay on Israel (*Central Conference of American Rabbis Year Book,* vol. 45, 1935, pp. 288-89), Israel, as a complete fruition of its conversion to this religion, received a new name. It was called the Keneseth Israel. The word Keneseth is the exact counterpart to the word Ecclesia. The man who coined this term deliberately differentiated Israel from the new church that had arisen, and that is what Israel is today. It is the last name by which Jewry has been designated in history.

This term occurs in many Midrashim, especially in *Midrash Song of Songs.* The full significance of it has not been appreciated until now, but it is the best description of what Jewry scattered in the world really is. Israel is today a religious community, as a result of the teaching of the religion which was complete at the time when the word Keneseth was coined.

The choosing of Israel was not because of any merit in Israel, and does not imply any superiority of Israel, but it was because it was singled out for a definite work in history, or, as the rationalist would say, because it chose God, therefore God chose it. And *Deut.* 26:17-19 actually says this: "Thou hast avouched the Lord this day to be thy God . . . And the Lord hath avouched thee this day to be His own treasure. . . ." The singling out in the Scripture began with the ancestor of Israel, Abraham, as it is stated in *Gen.* 18:19, "For I have known him [or singled him out], to the end that he may command his children and his household after him, that they may keep the way of the Lord, to do righteousness and justice." Here we have very clearly the statement that the whole mission of Israel from the beginning was to bear witness to a God Who is above all interested in righteousness and justice. It is interesting to observe that Moore (vol. 1, p. 538), referring to the *Midrash Tanhuma,* edit. Buber (footnote 5), calls attention to the fact that when God saw that Abraham was to arise, He said: "Now I have found a rock (*petra*) on which to build and establish the world." The Midrash deliberately uses this word "rock" in order to emphasize the contrast with the saying that Peter was the *petra* (rock) upon which the new church, the Christian, was built. Or the New Testament borrowed from the Jewish Haggadah.

The covenant made with Abraham or the choosing of him was consummated in the covenant made with Israel at Mount Sinai, which is described in *Ex.* 19:5-6, "Now therefore, if ye will hearken unto My voice indeed, and keep My covenant, then ye shall be Mine own treasure from among all peoples; for all the earth is Mine; and ye shall be unto me a kingdom of priests, and a holy nation." The usual translation of the Hebrew word *goi* is "nation," but, strictly speaking, the word ought to be translated by "group," so that in the sentence quoted Israel is to be a group of people consecrated to the Lord. Herbert Loewe, in his article on Judaism (Hastings, James, edit., *Encyclopaedia of Religion and Ethics,* vol. 7, p. 584), points out that the words usually translated by "people" and "nation" had no such connotation in the Hebrew or in ancient Semitic thought. In the Semitic world human beings were not grouped according to physical origin or blood. They were grouped around their god. "Consanguinity" is the characteristic of nations in the biological sense in the modern world. Therefore the Jews never thought of themselves as a nation contrasted with other nations in the ancient world. As the writer of this article says in his essay on Israel (*Central Conference of American Rabbis Year Book,* vol. 45, 1935, p. 292): "There was no such thing as nation in the modern sense of the word." Therefore the Jews were neither in ancient times a nation in the modern sense of the word, nor are they a nation today. They are a historic community which, according to Scripture, was consecrated to serve God.

Israel, therefore, became the missionary to the world of the one true God, and that was and is Israel's function in history. The prophet known as Deutero-Isaiah (*Isa.* 42:1-7) gives the philosophy of Jewish history, and describes the relation of Israel to God and to the nations of the world. In *Isa.* 42:1 the prophet says of Israel in the name of God: "Behold My servant, whom I uphold; Mine elect, in whom My soul delighteth; I have put My spirit upon him, he shall make the right to go forth to the nations." He says (verse 6): The servant of the Lord is called in righteousness, he is to be a "light of the nations." In *Isa.* 49:6 the prophet says of God: "Yea, He saith: 'It is too light a thing that thou shouldest be My servant to raise up the tribes of Jacob. . . . I will also give thee for a light of the nations, that My salvation may be unto the ends of the earth.' "

Such a conception of the character of Israel as chosen by God to do a certain work did not imply any special prerogative or any comparison of inferiority or superiority as between it and the Gentile world. In *Isa.* 19:24-25 we read this remarkable sentence: "In that day shall Israel be the third with Egypt and with Assyria, a blessing in the midst of the earth; for that the Lord of hosts hath blessed him, saying: 'Blessed be Egypt My people and Assyria the work of My hands, and Israel Mine inheritance.' " It is plain that all peoples were precious in the eyes of Israel's God. Each of them may have had its own function to perform as Israel had its own assigned to it by God.

That Deutero-Isaiah's conception of Israel as the servant of God in history was not intended to stimulate racial pride or to inflate the superiority complex is very clear from what the prophet tells us in *Isa.* 42:19, "Who is blind, but My servant? Or deaf, as My messenger that I send?" The prophet, while depicting the exalted function of Israel in spirit and at its best, realized that Israel in the flesh might have faults and imperfections like any other group of human beings. The prophet Deutero-Isaiah does not believe that Israel was chosen by Providence in order to be happier than other human groups. He anticipated the tragedy, the experience of Israel in history, in that wonderful description of the suffering servant of the Lord, *Isa.* 52:13 to 53:12, and especially verses 3, 4 and 5 of the 53rd chapter. He had already, in *Isa.* 49:7, spoken of Israel as "despised of men." Here he gives the terrifying picture of the martyr suffering for the iniquities of the world. And Israel suffers doubly. Amos said of Israel (*Amos* 3:2) that because God singled it out from all the families of the earth, He would visit upon it its iniquities. The election of Israel, according to Amos, means not privilege, but a stricter accountability. On the other hand, the world, because of its own sins and iniquities, its prejudices and hatreds, makes Israel's career a martyrdom. Israel therefore becomes the priest-people of God; it becomes the suffering anointed of God.

In the course of Israel's education and development as the servant of God there arose the phrase *malchuth shamayim,* which literally means "kingdom of heaven." Israel waits for the time when all men will serve the one true God. This supremacy of God is called kingdom of heaven. The word "heaven" in this phrase is merely a synonym for God. And when Jesus prays for God's kingdom to come, he is simply praying as a Jew. That was the universal Jewish conception in his time. This kingdom is accepted by Israel in the Shema: "Hear, O Israel: the Lord our God, the Lord is One." When a Jew makes his profession of faith in the Shema, he accepts the "yoke of the kingdom of God." As Solomon Schechter (*Some Aspects of Rabbinic Theology,* p. 67, note 1) says, quoting *Midrash Deut.* 2:31, "What is the kingdom of God? It is the Lord our God, the Lord is one." And he also says (p. 65): "Kingdom of heaven is a term less expressive of an accomplished fact than of an undefined and indefinable ideal." It comes to what Moore says that kingdom of heaven or kingdom of God really means—the triumph of the true religion. It is for such triumph that Israel felt itself to be waiting in the world.

As the religious mission of Israel took possession more and more of the spirit of the people and influenced more and more profoundly the teachers and leaders, the religion of Israel became conscious of its universal destiny, its appeal to all mankind. As Moore says (vol. 1, p. 324): "This made Judaism the first great missionary religion of the Mediterranean world." And he calls attention to the fact that the Jews did not send out missionaries expressly to proselytize among the heathens. They were themselves settled by thousands "in all the great centers and innumerable smaller cities. . . ." He continues: "Their religious influence was exerted chiefly through the synagogues which they set up for themselves but which were open to all whom interest or curiosity drew to their services." A wide propaganda for Judaism took place. It lasted for some time and, as Moore says (vol. 1, p. 353): "Against all such attempts of pagan

or Christian rulers to shut up in itself and prevent its spread, the Jews persisted in their missionary efforts to make the religion God had revealed to their fathers the religion of all mankind."

With respect to the admission of proselytes, there naturally were stricter or narrower and more liberal or broader conceptions. This difference is best illustrated in the story about Shammai and Hillel, to whom there came a candidate for proselytism who said that he wanted to be told the whole Torah or Law while he was standing on one foot. Shammai drove him away. Hillel, with his geniality, his lovingkindness and lovableness, said to him: "What thou wouldest not have done unto thee, do not unto thy fellowman. This is the whole Torah; the rest is commentary. Go and learn" (*Sab.* 31a). As the Jewish religion had a distinctive character which can be described by one word, Law, it taught the duty of man's obeying the Law of God. And this Law was both moral and ceremonial, both elements considered as integral to the religion. A complete proselyte accepted the whole Law. But there was also a wide and liberal view with respect to the God-fearing Gentile expressed in such a statement as: "The rejection of idolatry is the acknowledgment of the whole Law" (*Sifre Num.*, paragraph 111; *Sifre Deut.*, paragraph 54; *Hul.* 5a, and parallels), and (in note 1 on this page) Moore refers to *Meg.* 13a, which says: "One who renounces idolatry is called in Scripture a Jew." The Jews did not feel the urge to convert the God-fearing Gentile who observed the Noahide laws because otherwise he might not find salvation. A righteous Gentile would find salvation in the Olam Haba. But they were very happy if the righteous Gentile became a complete proselyte when he accepted the full yoke of the kingdom of God. Moore (vol. 1, p. 329) says: "The laws for the Gerim or proselytes put them, so far as religious duties and privileges go, on the same footing with Israelites by birth. This is true not only of religious commandments and prohibitions, but before the civil law. Leviticus 24:22, 'You shall have one civil law; the proselyte (ger) shall be treated like the native born, for I am the Lord your God'." And especially to be noted are *Num.* 15:16, "One law and one ordinance shall be both for you, and for the stranger that sojourneth with you," and *Num.* 15:26, "And all the congregation of the children of Israel shall be forgiven, and the stranger (*ger*) that sojourneth among them; for in respect of all the people it was done in error." As the climax of this group of sentences there is the great commandment in *Lev.* 19:34, "The stranger (*ger*) that sojourneth with you shall be unto you as the home-born among you, and thou shalt love him as thyself; for ye were strangers in the land of Egypt: I am the Lord your God." And when one considers that the great commandment is given in the same chapter, verse 18, "Thou shalt love thy neighbour as thyself: I am the Lord," it is plain that the commandment to love one's neighbor embraced the non-Jew in its scope.

It is interesting to observe that, as Schechter puts it, the weighty matters of the Law always connected with the phrase "I am the Lord thy God" have to do with the conception of the Kingdom. The Ger therefore was received as a perfect equal. Now Moore seems to refer the Hebrew word "Ger" only to the time when it came to have a technical meaning, as in the phrase "Ger Tzedek," the complete proselyte. The "Ger" for him is the proselyte. The usual translation for "Ger" in the Scriptures is "stranger," a more comprehensive term than "proselyte." Moore, quoting *Lev.* 24:22, translates "Ger" by "proselyte" and puts the Hebrew word in parentheses. Such translation implies an extreme critical view of the time of the origin of the law with respect to the "Ger," the stranger, as given in the Scriptures. What is to be emphasized is the broad universal outlook of Judaism with respect to the non-Jew, whether he be proselyte or the stranger that sojourneth. He is to be treated with love. He is to enjoy the blessings of abstinence from labor on the Sabbath. The treatment of the stranger was one of the best proofs of the universality of Judaism as a religion. The proselyte was considered as coming under the "wings of the Shekinah" (*Midrash Ruth* to *Ruth* 2:12). Moore says (vol. 1, p. 348): "There is no way of estimating statistically the results of Jewish propaganda in the centuries that fall within the limits of our inquiry, but they were indisputably very large, even if only proselytes in the proper sense be taken into account. The converts were of many races and all ranks in society." The Christian Scripture (*Matt.* 23:15) itself testifies that Pharisaic or Tannaitic Judaism received converts gladly.

The reception of proselytes never ended in Israel. Today any human being who sincerely desires it is accepted by the religion of Israel or Judaism. That conversion in great measure ceased after Christianity arose resulted from the fact that the Jews, persecuted as they were, had enough to do with watching their steps and not incurring the wrath of the powers by any propaganda for their religion. When Christianity came upon the scene it was, from the point of view of Judaism, a sect. Originally the first Christians differed in nothing from Judaism except that, to use the words of Moore, "they attached the Messianic hope to his (Jesus') person." Schulman (*Jewish Quarterly Review*, New Series, vol. 18, No. 4, p. 344) says: "Then indeed because of it (this attachment) there finally came a time when, as Moore puts it, Christianity was not looked upon as a 'heresy' in Judaism but as a wholly different religion."

When Christianity spread through the influence of Paul's apostleship to the Gentiles, an altogether new criterion was established: the belief in Christ as the savior and redeemer. A new religion had arisen with dogmas which were not acceptable to those who professed Judaism. Law was the condition of fellowship with God, primarily and essentially, as Moore makes clear, the Moral Law. The universality of Judaism did not cease. Judaism simply had different conditions for the admission of proselytes from those which Christianity laid down, and every church self-evidently has its own conditions.

That Christianity had a providential mission in the world was recognized by two great Jewish thinkers, Maimonides, in his *Yad Hahazakah* (*Hilchoth Melachim* 11:4, Amsterdam ed., uncensored), and Judah Halevi, in his *Kuzari* (4:23). Both speak their appreciation of the work which Christianity was doing to prepare the world for the kingdom of God. But the Jew continued with his consciousness of mission. If, in addition to the cause of persecution which prevented him from being unduly zealous for the spread of his religion, another factor is to be added, we can say that it was the great tradition never absent from Judaism that salvation was not dependent upon joining the Jewish community. A righteous Gentile would find salvation if he walked by the light of his own conscience. And there is the great sentence of the prophet Malachi (*Mal.* 1:11): "For from the rising of the sun even unto the going down of the same My name is great among the nations; and in every place offerings are presented unto My name, even pure oblations; for My name is great among the nations, saith the Lord of Hosts." This is perhaps the most eloquent expression of what moderns would call liberalism that is to be found in the Bible, either Jewish or Christian. For what the prophet meant to say was that even those who did not acknowledge the God of Israel by name were, despite their various worships, unconsciously serving Him. The prophet was surrounded by a heathen world full of idolatry, and yet he spoke as he did. Judaism with its universal spirit did not cease to hold to the conception of the kingdom of heaven or God. The hope of Israel continued, in the words of Deutero-Isaiah speaking in the name of God, "For My house shall be called a house of prayer for all peoples" (*Isa.* 56:7).

This hope became of the essence of Judaism. It abides with every Jew today, and is voiced in the prayer-book. The liturgy naturally expresses the living faith of the people. And so we must make the general observation that what has become known in Christendom as a distinctive characteristic of its religion, the calling of God "father," is altogether Jewish in origin. The prayer-book is full of the expressions "our Father" and "our King." The phrase "our Father Who art in heaven" is a well-known formula for prayer. Moore (vol. 2, pp. 204-5) makes this very clear. He says: "It is worth noting also that the phrase Father in Heaven is peculiar to the rabbinical sources which represent normative Judaism in distinction from the sects. . . . In the New Testament it is found only in the Gospel of Matthew (with one exception, Mark 11:25) in which the Palestinian impress is much stronger on both thought and expression than in the others." And on p. 211 he says: "When God is called Father Who is in heaven, this does not indicate that the age had a new conception of God. . . . This is the type

of piety in which Jesus and his immediate disciples were brought up." And this is the type of piety which was Jewish to the core.

In his daily prayers the Jew, on weekdays, the Sabbath and festivals, was made conscious of the universality of his religion. The unity of God is, of course, professed at every service. Every morning prayer also has the phrase "In thy goodness renewest the creation every day continually" (Singer, S., and Abrahams, I., *The Authorised Daily Prayer Book*, revised ed., p. 37). This meant that God was active in His universe all the time, a living God, not an absentee God. Every Jewish service closes with the prayer (*The Authorised Daily Prayer Book*, pp. 76-77): "We therefore hope in Thee, O Lord our God, that we may speedily behold the glory of Thy might . . . when the world will be perfected under the kingdom of the Almighty, and all the children of flesh will call upon Thy name, when Thou wilt turn unto Thyself all the wicked of the earth. Let all the inhabitants of the world perceive and know that unto Thee every knee must bow, every tongue must swear . . . let them all accept the yoke of Thy kingdom, and do Thou reign over them speedily, and for ever and ever. For the kingdom is Thine, and to all eternity Thou wilt reign in glory; as it is written in Thy Law, The Lord shall reign forever and ever. And it is said, And the Lord shall be king over all the earth: in that day shall the Lord be One, and His name One." This expression of the hope for the universal kingdom of God of which all human beings will be part with which every service closes is especially voiced in the solemn service for the Jewish New Year (Rosh Hashanah) and also in the service for the Day of Atonement (Yom Kippur): "Now, therefore, O Lord our God, impose Thine awe upon all Thy works . . . that all works may fear Thee and all creatures prostrate themselves before Thee, that they may all form a single band to do Thy will with a perfect heart, even as we know, O Lord our God, that dominion is Thine . . ." (*The Authorised Daily Prayer Book*, p. 239). And in the Additional Service, the Musaf for the New Year Day, in its three divisions known as Dominion, Memorial and the Sounding of the Shofar (Malchuyoth, Zichronoth and Shofaroth), there is sounded the universal message. At the very beginning stands the prayer, "Therefore we hope in Thee, O Lord our God. . . ." This was the original place for that prayer, from which it came into use for every service. In *The Authorised Daily Prayer Book* (pp. 249-50) we read: "Our God and God of our fathers, reign Thou in Thy glory over the whole universe, and be exalted above all the earth in Thine honour, and shine forth . . . that whatsoever hath been made may know that Thou hast made it, and whatsoever hath been created may understand that Thou hast created it, and whatsoever hath breath in its nostrils may say, the Lord God of Israel is King, and His dominion ruleth over all." Then the prayer goes on to say: "Thou rememberest every deed that hath been done. . . . O Lord our God, Who lookest and seest to the end of all generations. . . . Yea, the remembrance of all works cometh before Thee. . . . Of Noah also Thou wast mindful in thy love, and didst visit him with a promise of salvation and mercy. . . . So his remembrance came before Thee, O Lord our God. . . ." This is the memorial of the covenant with the human race mentioned above, and it is put on the same level with the memorial of the covenant made with the ancestors of Israel (*ibid.*, p. 253). The psalms and the prophets with their universalism are quoted.

It is pertinent to remark in this connection that the grace after every meal which a pious Jew says begins: "Blessed art Thou, O Lord our God, King of the universe, Who feedest the whole world with Thy goodness, with grace, with lovingkindness and tender mercy; Thou givest food to all flesh, for Thy lovingkindness endureth forever." This prayer in itself would prove beyond doubt that the religion observed and practised by the Jews is a religion universal in character because it envisages all human beings and thanks God for His grace and mercy to them.

Until about the end of the first half of the 19th cent. there was, on the whole, unanimity in Israel with respect to the interpretation of the inherited religion, and it can be said that with respect to fundamentals there is still that unanimity. But we must note the profound influence which Reform Judaism exerted in revitalizing, after centuries of persecution of the Jew, the consciousness of the universality of Judaism as a religion and the mission of Israel as a historic community consecrated to the service of God. Reform Judaism did not announce any new idea bearing on the question of the universal character of Judaism. But it gave a new interpretation and application of that character. Reform Judaism was, on the whole, a spiritual response which its representatives thought necessary to the political emancipation of the Jews in the Western world.

The chief characteristic of Reform Judaism is its elimination from the prayer-book of all reference to a restoration of the Jewish state and of the ancient Temple with its service in Palestine. It eliminated from the prayer-book every petition for a restoration of Israel as a whole, as the historic community, to Palestine. It also eliminated the belief in and the hope for a personal Messiah. As Kaufmann Kohler says in his article on David Einhorn (*Jewish Encyclopedia*, vol. 5, p. 78), it rejects the belief in a personal Messiah and identifies the Messianic future with the progress of humanity. In other words, Reform Judaism drops one view of the Messianic era, that which refers to the restoration of Israel as a political entity. It stresses more than ever that other view of the Messianic era, the establishment of God's kingdom on earth in a world of nations and governments united in truth, justice and peace, and that God will reign in men's hearts so that, to use the phrase from the Rosh Hashanah liturgy (*The Authorised Daily Prayer Book*, p. 239): "When iniquity shall close her mouth, and all wickedness shall be wholly consumed like smoke, when Thou makest the dominion of arrogance to pass away from the earth."

Reform Judaism also rejected the idea that Israel was exiled from Palestine because of its sins and therefore must pray to be restored in order to be able to appear before God and to fulfil its obligations as in the Temple of old (*The Authorised Daily Prayer Book*, p. 234: "But on account of our sins we were exiled from our land, and removed far from our country, and we are unable to go up in order to appear and prostrate ourselves before Thee, and to fulfil our obligations in Thy chosen house . . . ; bring our scattered ones among the nations near unto Thee, and gather our dispersed from the ends of the earth. Lead us with exultation unto Zion Thy city, and unto Jerusalem the place of Thy sanctuary with everlasting joy"). While Reform Judaism looks upon this prayer with reverence, appreciates its beauty, and understands the piety of Orthodox Jews who utter it, there is no provision by Reform Judaism for it in its prayer-book.

The omission of this prayer is the most striking thing about the Reform liturgy. What it means is that Israel as interpreted by Reform Judaism does not consider itself as a punished sinner in its dispersion over the world, but rather as in free lands at last, completely emancipated for its work as a witness to God over the whole earth. It feels that the people of Israel or, better, the Keneseth Israel as a whole, has outgrown identification with any one particular land. Its destiny is to be scattered over the whole world, with the sons and daughters of Israel loyal and patriotic citizens of the lands in which they dwell.

Reform Judaism is well expressed in what has come to be known historically as the Platform adopted by the Pittsburgh Rabbinical Conference in 1885 (see *Central Conference of American Rabbis Year Book*, vol. 45, 1935, pp. 198-99). The first paragraph of this Pittsburgh Platform says: "We recognize in every religion an attempt to grasp the Infinite One," and it goes on to say: "We hold that Judaism presents the highest conception of the God-idea as taught in our holy Scriptures. . . ." This is a true statement of the universal spirit of Judaism as a religion. It repeats the thought of the prophet Malachi (*Mal.* 1:11) with respect to God's name being great among the nations.

The fifth paragraph states: ". . . . We consider ourselves no longer a nation but a religious community, and therefore expect neither a return to Palestine, nor a sacrificial worship under the administration of the sons of Aaron, nor the restoration of any of the laws concerning the Jewish state."

The third paragraph declares: "We recognize in the Mosaic legislation a system of training the Jewish people for its mission during its national life in Palestine, and today

we accept as binding only the moral laws and maintain only such ceremonies as elevate and sanctify our lives. . . ."

This was perfectly sound doctrine, and described the creative force in Judaism; it emphasized the authority of the prophetic Torah, the Moral Law, as the essence of Judaism and as superior to the ceremonial law.

For our subject, what is of importance is to emphasize that Judaism as a religion does not become any the less universal if it retains the Mosaic ceremonial laws, as does Orthodox Judaism. As Schulman says (article "Israel," *Central Conference of American Rabbis Year Book*, vol. 45, 1935, pp. 280-81): "All positive historic religions have symbols in addition to their fundamental truths and the ceremonial law, adapt it as we may in accordance with new circumstances, is still for us the symbol of our characteristic religion. And religions that do not emphasize *law* find other symbols. For some religions, *dogma* might be a symbol." Every church has the right to determine its own symbols and to decide what the conditions for conversion to it are. The ceremonial law was never regarded as an instrument for excluding the non-Jew.

When some say that Reform Judaism has been more universalistic than Orthodox Judaism, it must be remembered that Reform Judaism never entered upon a propaganda of conversion. It felt that the time for attempting to convert others is over. Those who come to Israel are willingly accepted.

The rise of Zionism or the neo-nationalistic movement in modern Jewish life compelled Reform Judaism to make some reaction to it. It was natural that in all the lands of the Western world in which Jews had been emancipated politically there should be voiced an objection to neo-nationalism as a philosophy of Jewish life on the part of those who represented in this or that form the great movement known as Reform Judaism. It seemed to these elements that Zionism or neo-nationalism was a rejection of the philosophy of Jewish life for which they stood. But, on deeper thought, neo-nationalism seemed to be more than such rejection. It was in fact an altogether new thing in the history of the Jews. It is sometimes said that the neo-nationalistic philosophy is a reversion to "particularism" in Judaism. This is an incorrect view. There was no particularism in Judaism when Judaism arrived at its mature development, as has been shown above. Judaism claimed no monopoly on its God. On the contrary, it recognized its God as the Creator and Father of all mankind, and mankind was welcome to Judaism as a religion. The neo-nationalistic philosophy took no stand with respect to religion as such. It was professedly and essentially a secular and political movement. What it aimed at was to restore the Jews as a secular nation in Palestine. It was something entirely different from the philosophy of Jewish life represented by Orthodox Judaism with its pious prayers for the restoration of Israel to the Holy Land and for the rebuilding of the Temple and the reestablishment of the service connected with it, all of which would come about when the Messiah would arrive. The neo-nationalist philosophy or Zionism thought of Israel as a "goi," a nation, like other "goyim," nations.

Whatever religious attitude an individual neo-nationalist may take, neo-nationalism itself is something novel in Jewish history. It breaks with the conception of the conversion of Israel from a people in the ordinary sense into a Keneseth Israel, the Ecclesia Israel. It denies the complete fusion of people with religion which is upheld by both Reform and Orthodox Jews. Therefore the neo-nationalist movement is not a particularistic movement in the sense that it denies the universalism of Judaism. It is a movement which, in accordance with the Western nationalistic thinking of the late 19th and early 20th centuries, looks upon the Jews as constituting a nation, irrespective of their religion. This neo-nationalist movement, therefore, not only challenged Reform Judaism, but it really challenged the whole religious tradition of Israel.

Reform Judaism in the United States took a very clear stand against the neo-nationalist philosophy when, at the convention of the Central Conference of American Rabbis in 1920, it declared its position with respect to the question of the relation of the Jewish people as a whole to Palestine. After a thorough debate, Statement XI in vol. 30, p. 141, of the *Central Conference of American Rabbis Year Book* was adopted. The Conference said:

"We believe that Israel, the Jewish People, like every other religious communion, has the right to live, to be at home, and to assert its message in every part of the world.

"With confidence in the free institutions of Great Britain, we rejoice in and recognize the historic significance of such a British Mandate for Palestine, in that it will offer the opportunity to some Jews who may desire to settle there to go there, and to live full, free and happy lives. And if facilities are offered for an appreciable number to go there from lands in which they suffer from religious, political or economic persecution they may be enabled so to shape their communal life that, inspired by the hallowed associations of the land in which Israel's Prophets announced world-redeeming ideas, they may become a great spiritual influence.

"While we thus rejoice, we do not, however, admit that this historic event is what it has been called, the *Geulah* or the Redemption of Israel. Convinced that the mission of the Jew is to witness to God all over the world, emphasizing the religious function of Israel, and rejecting any assertion of Jewish nationality, which it has long ago outgrown, we hold that Israel's Redemption will only be realized when the Jew will have the right to live in any part of the world, and, all racial and religious prejudice and persecution ended, Israel will be free as a religious power and integral part of all nations to give world service."

This statement expresses the philosophy of Jewish life as represented by the tradition of Reform Judaism in every land of the Western world. As is said in the article "A Basis for Union in Israel" (*Contemporary Jewish Record*, vol. 5, No. 5, p. 480): "Israel must be emancipated as a spiritual *entity* even as the documents of the French Revolution and the American Revolution politically emancipated the Jew in the Western world." And (pp. 489-490): "Israel must be recognized as a great spiritual community which still has a work to do in the world in its own way."

Judaism as a religion, tracing its history from the Bible to the present, is a universal religion. In its uncompromising monotheism it proclaims the unity of God and the unity of humanity made in His image. As the *Union Prayer Book* issued by the Central Conference of American Rabbis (revised ed., part 2) says in the solemn prayer in the concluding service for the Day of Atonement (p. 365): "Hear, O Israel, hear all mankind: The Lord our God the Lord is one; then Thy house will be called a house of prayer for all peoples and all nations will flow unto it."

This spirit of the universalism of Judaism has been admirably acknowledged by Professor William Ernest Hocking in his book *Living Religions and A World Faith* (p. 212). He says: "And wherever any faith has all-but-exclusive prevalence there is always at least one other, Judaism, borne not by converts but by its own people voluntarily or involuntarily scattered. Firm in its distinctive qualities and prepared through its unobtrusive presence, its rapid numerical increase, and *the inherent rationality and realism of its simple creed* [the italics are by the writer of this article] to commend itself when the more pretentious claimants by their very complexity fail any longer to convince, it waits to inherit the earth spiritually as residuary legatee. It conceives itself as the ultimate world faith, not through the effort of man but by the act of God."

For the triumph of Judaism's message and for the establishment of God's kingdom on earth, Keneseth Israel waits. For ages it has suffered and hoped and persisted in its faith.

UNIVERSITIES, institutions of higher learning, generally composed of several branches conducted by the teachers of one or more sciences and called faculties; they are endowed with the privilege of ordaining and granting degrees, and offer courses of instruction.

I. Medieval Times. In some regards the Hellenistic high schools, especially at Alexandria, were models for medieval and modern universities. Philo and other Jewish Hellenists probably were connected with Greek and Roman high schools. Christian and Islamic universities were on principle opposed to any participation of Jewish teachers or students. In 853 the caliph prohibited Jews from studying medicine in any language save Hebrew or Syriac. However, tolerance usually prevailed in Islamic countries, and many learned Jews were members of the universities at Baghdad, in Northern Africa and in Islamic Spain. The modern center of Islamic learning owes its origin to the Jew Yakub ibn Killis, a convert to Islam who suggested to the caliph the idea of founding El Azhar at Cairo.

The Christian universities of the Middle Ages issued partly from cathedral or monastery schools but became autonomous institutions. Some universities were expressly founded to defend the orthodox Catholic doctrine against heretics and Jews, while others served the interests of cities or princes. The term *universitas* did not mean universality of studies but guild, corporation, community, uniting teachers and students. Because medieval guilds always had an outspoken religious character, Jews were on principle excluded from the *universitas literarum,* as they were from the guilds of merchants and workmen.

Since the earliest post-Biblical times the Jews had high schools and academies of their own which were devoted to the study of the Bible and the Talmud. A high standard of learning prevailed in the Jewish academies of Babylonia, and later on of Spain, Southern Italy, Northern France and the Rhine valley. The teachers of these Yeshivas were by no means strangers to secular sciences, as astronomy, geometry, languages, sociology, and although they generally were not ready to systematize their secular instruction but gave their pupils only accessory and occasional information, many of them were renowned because their knowledge extended beyond the bounds of Jewish learning. Above all, most of them were authorities on the Hebrew language, and they often taught it to Christian professors or helped them interpret Hebrew texts. Rabbis were now and then called by universities to decide a philological or even philosophical discussion. Thus, in the middle of the 15th cent., Elijah Delmedigo was consulted by the Universities of Padua and Florence.

The erudition of Jewish sages in secular sciences was mainly a matter of self-instruction by reading, traveling or corresponding with other scholars, except in the case of the study of medicine. Only in Italy were Jewish students admitted to universities. They studied generally to prepare themselves for the medical profession because only the Jews of the island of Capri were permitted to exercise the profession of a lawyer outside the Jewish community. In 1340 Gentile da Foligno, a Jew, was appointed professor of medicine at the University of Padua, for centuries the most liberal university of Europe.

A legend attributed the foundation of the academy of Salerno to a Roman and a Greek Catholic, a Jew and a Mohammedan. In fact Jews took an active part in founding and maintaining the University of Salerno which became famous in the 10th cent. and reached its apogee in the 12th cent. Moses ben Solomon de Salerno, and Donnolo of Tarento, the first European Jew known by name as an author of scientific books, were among its most renowned teachers. The foundation of the University of Montpellier was also mainly due to the initiative of the Jews of Southern France, who were intermediaries between Islamic and Christian studies. Jacob ben Machir ibn Tibbon was dean of the faculty of medicine at Montpellier in 1300. In the 16th cent., the Marrano Antoine Sasportas was dean. Bonet Meshullam ben Solomon Abigdor was an outstanding Jewish professor at this university. On the other hand, the legend that Jews were connected with the foundation of Oxford University is not true insofar as their relations were hostile. Only baptized Jews taught Hebrew at Oxford. Baptized Jews were also regularly professors of Hebrew at the Sorbonne, Paris, until the expulsion of 1394. At this occasion, more than one of the professors of the Sorbonne expressed their fear that the emigrating teachers would return to Judaism. Baptized Jews, such as John Tremel and Philipp Ferdinand, were readers in Hebrew at Cambridge in the 16th cent. At the beginning of the 17th cent. a convert to Protestantism, James Levita, and possibly another convert too, was reader in Hebrew at Oxford. The great philologist Casaubon had a Jewish secretary, named Jacob Barnet, from 1609 to 1613. Antonio Maria de Verona, a Jew, was received with great honors at Oxford in 1626, and Alexander Arniedi taught Hebrew there even before the resettlement of the Jews in England. At the end of the 17th cent., Isaac Abendana, brother of the London Hacham, became reader in Hebrew at Oxford, but the Christian character of this university was maintained until 1871.

The baptized Jews Paul Staffelstein and Emanuel Tremel were readers in Hebrew at the University of Heidelberg in the 16th cent.

The Council of Basel had, in 1434, forbidden any university to grant a Jew a degree, but at least in Italy Jewish students continued to attend the universities and probably received degrees. The University of Padua, after its reconstruction in 1517, was frequented by Jews of all the countries of Europe. Perhaps it was the great anatomist Vesalius, former professor at Montpellier, who effected the liberal admission of Jewish students there. From 1517 to 1721, 229 Jews were graduated at Padua. Jacob Mantino was appointed professor of medicine at the University of Bologna in 1529, and afterwards he became professor at Rome. Isacco de Perugia, called Hercules Hebraeus, was professor at the University of Pisa in 1550.

In the 16th cent. the number of Jews studying at Italian universities had become so large that Rabbi David Provenzali and his son Abraham intended to create a great Jewish university in order to prevent their coreligionists from attending Christian schools. They sent a program to several Jewish communities, announcing courses in logic, mathematics, medicine, Latin, Hebrew, Biblical and Talmudic studies, but their plan evidently was a failure.

II. Modern Times in Europe. HOLLAND. After the end of the 16th cent., the Dutch University of Leyden, founded in 1574, attracted most of the Jewish students of medicine. It did not even specify the religious denomination of its students in the *matricula,* so that it is difficult to estimate the number of Jewish students there. At Leyden, the contact between Jewish and non-Jewish learned men became more extensive and intensive than it had ever been in the history of Europe since the end of antiquity. These relations became by far more important even than those between

the humanists of the 15th and 16th centuries, for instance Reuchlin, and Jewish scholars. The Hebrew and Arabic manuscripts of the library of Leyden attracted many Jewish scholars, and during their stay at this center of Dutch intellectual life there was a lively interchange of ideas between the professors of the university and the visitors. In 1625, Isaac Gabbai came from Constantinople, and Zaad Abraham from Morocco in 1626. In 1647 Rabbi Moses came from Poland, and Isaac Roccamora from Spain in 1648. In 1658 Moses ben Michael came from Jerusalem, Isaac Abendana from Hamburg, and in 1659 Israel de Coa from Andalusia. All these Jewish scholars taught the non-Jewish professors Hebrew and the interpretation of Hebrew, Syriac, Arabic, Persian and other oriental texts. The famous Justus Joseph Scaliger studied the Talmud with the aid of several Jewish scholars. Jacob Alting was taught by Rabbi Gumprecht ben Abraham, and Manasseh ben Israel was the private teacher of Dionysius Vossius. Moses Nathan of Leyden taught Hebrew regularly, although he was not an officially appointed teacher. This great Jewish influence upon the professors of Leyden lasted until the end of the 18th cent. and assured the scientific supremacy of the school of Leyden in philology and history for one and a half centuries. All the other Dutch universities were also open to Jewish students, even Utrecht, in a city where Jews were not allowed to reside between 1720 and 1789.

GERMANY AND AUSTRIA. The Dutch example paved the way to the German universities for Jewish students, from the middle of the 17th cent. on. Benjamin Levi Buxbaum probably was the first Jew to be admitted to a German university. He studied at Heidelberg by 1650. Then Frederick William, the Great Elector of Brandenburg, opened his universities at Frankfort on Oder and Duisburg to Jewish students. In 1659 Jacob Cohn from Massow, Pomerania, was matriculated as a student at Frankfort, and in 1663 Joel Bloch from Meseritz. In 1678 Gabriel Felix (Selig) ben Moses from Metz and Tobias Cohn ben Moses Nerol from Poland, both Jewish students at Frankfort, were granted a scholarship and permitted to teach Hebrew by a special decree of the Great Elector, who intended also to nominate Jews as members of the planned academy of Tangermünde which, however, did not come into existence. Many Jews studied at Duisburg, the second university of Brandenburg from the middle of the 17th cent. At Giessen, in Hesse, Abraham Heimann, who studied in 1697, was possibly not the first Jewish student to be admitted there. At Heidelberg twenty Jews were matriculated as students between 1724 and 1807. But it was not until 1721 that Moses Salomon Gumpertz of Metz became the first Jew to receive a degree from a German university, that of Frankfort on Oder. The second Jew graduated from a German university was Moyses Sobernheim, who received his degree from the Prussian University of Halle in 1724. The third was Seligmann Elkan Bacharach, graduated from Heidelberg in 1728.

In 1673 the University of Heidelberg planned to appoint Baruch Spinoza professor of philosophy, but he refused. Although in the 18th cent. almost all the universities of Germany were opened to Jewish students, and many Jews received degrees from them, the appointment of a professing Jew as professor, even as lecturer, was considered impossible. The first Jewish lecturer at a German university probably was Nathan Friedlaender, an accoucheur, who in 1810 became lecturer of medicine at the University of Berlin, which had just been founded, before any principle of making appointments had been established. An order in council of King Frederick William III of Prussia admitted (1812) Jews to teaching positions. But the government met with the resistance of the faculties and the students who became more and more nationalists. The philosopher Fichte, president of the University of Berlin in 1812, brought much trouble upon himself when he energetically protected the student Joseph Leyser Brogy, a Jew from Poland, against the crowd of the students, the senate and almost all his fellow professors. It was against the opposition of the faculties that the Prussian minister of public education, Baron von Altenstein, enforced the right of Jewish students to receive degrees from Prussian universities. In 1816, Ferdinand David Koreff, a favorite of the powerful chancellor Von Hardenberg, was appointed professor of physiology at Berlin, notwithstanding the violent opposition of the faculty. Koreff took an active part in the organization of the University of Bonn, which was founded in 1818. He later was converted to Protestantism, hoping to appease his adversaries.

In 1822 the order in council of 1812 was repealed, and no Jew could hope to get an appointment at a Prussian university. The jurist Eduard Gans, however, tried stubbornly to be admitted to a professorship, putting his trust in his protectors Hegel and other high-placed personages, but he had to accept Protestantism before he got the desired post. The same fate befell Johann Ludwig Casper, who became lecturer of medicine in 1824 and assistant professor in the following year after he was converted to Protestantism. The Prussian government even favored the appointment of baptized Jews between 1822 and 1848. Thus the convert Neander was professor of theology at Berlin. Other converts, F. A. Philippi, F. A. Loewe, Ferdinand Benary, all of them ardent Lutherans, also became professors of theology. The linguist Agathon Benary owed his lecturership to his conversion, but he was not promoted to a higher post because of his political liberalism. In 1836 Gabriel Gustav Valentin was appointed professor of physiology at Bern, Switzerland. He was so surprised that he warned the senate of the University of Bern, announcing that he was a Jew. The senate answered that Valentin's religion did not matter but only his scientific merits. Valentin was the first Jew to obtain a full professorship in a district where the German language was spoken. The mathematician Ries, a Jew and a member of the academy of sciences of Berlin, who in this quality was authorized to lecture at the university, voluntarily resigned this right in 1842, in order to avoid difficulties. For many years, the great scientist Johannes Müller, the influential physician Schönlein, Alexander von Humboldt and many other celebrities memorialized the Prussian government, urging it to disregard the rule of exclusion in the case of Robert Remak, because of his outstanding merits as a physiologist. But Remak, a professing Jew, had to wait until 1847, when Jews were, at least on principle, admitted to teaching positions in Prussia. In 1850 Hermann (Chaim) Steinthal became lecturer on philosophy at Berlin; in 1851 the botanist Robert Caspary and the scientist Nathanael Pringsheim were also admitted as lecturers. The number of professing Jews who became lecturers and assistant professors at Prussian universities steadily increased. But Jewish regular professors were rare in Prussia before 1918.

In 1848 Leopold Zunz demanded the creation of a chair for the Science of Judaism at the University of Berlin, and in 1850 and 1853 the trustees of the Veitel Heine Ephraim Foundation offered to finance a chair for rabbinic literature when the government would create it. All these demands were defeated by the

faculty, while the government remained neutral, and there was no readership in the Science of Judaism at a German university until the founding of the University of Frankfort (1914). However, in France, England and other countries such chairs were created. Some teachers of the Hochschule für die Wissenschaft des Judentums, such as Jakob Barth, Joseph Horowitz and Eugen Mittwoch, became also lecturers on oriental languages or history at the University of Berlin.

The first unbaptized Jew to be nominated professor at a German university was the jurist and historian Josef Rubino. He was imposed on the University of Marburg by the reactionary government of Hesse in 1832, against the opposition of the faculty, whose members were mostly liberals. The faculty took its revenge by treating Rubino with neglect at every opportunity. In 1842 Rubino was baptized, and subsequently his position was normalized.

The first German university which became liberal towards professing Jews was Heidelberg. The political economist Heinrich Bernhard Oppenheim became lecturer there in 1840, the jurist Alexander Friedlaender in 1843. The orientalist Gustav Weil was the first Jewish assistant professor at Heidelberg. Moritz Abraham Stern was appointed professor of mathematics at Göttingen, in 1859. He was the first professing Jew to be admitted to a full professorship at a German university. A few years later, Hermann Cohen became professor of philosophy at the University of Marburg, without such unpleasantness as had happened when Rubino became professor at the same university.

The first Jewish lecturer at the University of Vienna was the renowned physician Hermann Zeissl in 1850. He became professor in 1860. The jurist Wolfgang Wessely became the first Jewish lecturer at Prague in 1848. The second was the orientalist Saul Isaak Kaempf.

There are no reliable statements concerning the number of professing or baptized Jews appointed lecturers or professors from 1848 on. They became so numerous that anti-Semites repeatedly denounced the alleged Judaization (*Verjudung*) of the German universities. Actually, many of these Jews were popular teachers who attracted students to their universities and educated qualified younger scholars or officials. Thus at Berlin there were: the physicist and chemist Gustav Magnus; the chemist C. T. Liebermann; the ophthalmologist Julius Hirschberg; the alienists Emanuel Mendel and Hermann Oppenheim; the physicians Hermann Senator and James Adolf Israel; the jurists Levin Goldschmidt, Heinrich Dernburg, James Goldschmidt, Martin Wolff; the historians Otto Hirschfeld and Hermann Dessau; the political economist Ignatz Jastrow, one of the best academic educators of his time; the philologist Max Herrmann, who was ordered in 1933 by the Nazi government to continue his lectures, and who opened his course by demanding that Nazi students who denied German Jews their German nationality leave his auditorium; the historian of art Adolf Goldschmidt; the musicologist Max Friedländer; the philosophers Georg Simmel, Max Dessoir, Ernst Cassirer. The University of Bonn owes much of its renown to the philologist Jacob Bernays, the jurist Ernst Landsberg, and the physicist Heinrich Hertz, who discovered the electrical waves. The University of Göttingen was in a state of decay until the Indologist Theodor Benfey, the great mathematicians Felix Klein and Hermann Minkowski, and the eminent philosopher Eduard Husserl attracted a new stream of students. The University of Breslau would have been almost without importance had it not been for the jurist Wilhelm Eduard Wilda, the physiologist Rudolf Heidenhain, the botanist Ferdinand Cohn, the ophthalmologist Hermann Cohn, the dermatologist Albert Neisser, the laryngologist Jacob Gottstein, the chemists Albert Ladenburg and Lothar Meyer, the historian of philosophy Jacob Freudenthal. When Germany (1871) annexed Alsace and Lorraine, Bismarck ordered that the best German scholars be appointed to the reorganized University of Strasbourg. Many of them were Jews, such as the jurist Paul Laband, the astronomer Berthold Cohn, the mathematician Georg Cantor and the historian Harry Bresslau. The University of Königsberg was proud of so great a philologist as Karl Lehrs, and of the Latinist Ludwig Friedländer. Outstanding professors at Heidelberg were Jacob Henle, anatomist, Victor Moritz Goldschmidt, chemist, Leo Koenigsberger and Moritz Cantor, mathematicians, Eugen Täubler, historian, and Georg Jellinek, jurist. Noted Jewish professors at other universities included: at Freiburg the jurists Heinrich Rosin and Otto Lenel, the philologist Emil Levy, the philosopher Jonas Cohn, the astronomer Berthold Cohn; at Munich, the physicist Leo Graetz, the chemist Adolf von Baeyer, the philologist Ludwig Traube, founder of medieval philology, and the mathematician Alfred Pringsheim.

Although the Austrian government barred the Jews from the university as much as it was permitted by the constitution, the physicians Max Leidesdorf, E. Politzer, Max Kassowitz, Moritz Benedikt, Moritz Heitler, the chemist Adolf Lieben, the jurists Joseph Unger, Karl Samuel Grünhut and Hans Kelsen, the philologists Theodor Gomperz and Adolf Mussafia, the musicologist Guido Adler and the philosopher Wilhelm Jerusalem became world-renowned academic teachers, while Sigmund Freud gained wide influence.

It is impossible to list all the Jewish donors who generously endowed German universities, especially their institutes of research. The University of Frankfort owes its existence mainly to Jewish philanthropists, and Jews contributed considerably also to the founding of the University of Hamburg.

Hungary. The first Jewish professor at the University of Budapest was the great orientalist Ignaz Goldziher, while the able historian Henrik Marczali was denied an academic position. He finally became a member of the academy, but not until after he had acquired world-wide renown.

Poland. Simon Askenazy was an eminent Polish historian who taught at the Universities of Lwów and Warsaw.

Russia. In Czarist Russia no Jew could secure a professorship. The orientalist Daniel A. Chwolson was an international authority.

Denmark. At Copenhagen, the lectures of Georg Brandes attracted international attention. Afterwards the great physicist Niels Bohr, his brother, the mathematician Harald Bohr, the historian of art Emil Hanover, the political economist Marcus Rubin, the chemist G. von Hevesy, the woman archeologist Lis Jacobsen established the standard of learning at this university.

Sweden. In Sweden, Georg Levison became, before 1787, professor of medicine. The most important professors of the history of Swedish literature were Jews, such as Karl Warburg, Johan Henrik Schueck, Oscar Levertin and Martin Lamm. Astronomy was taught by Robert Rubenson, and physiology by Robert Bárány, Nobel Prize winner. Rabbi Gottlieb Klein had great success in interesting Swedish students in the science of Judaism and the history of the Jews.

Italy. The liberal kingdom of Italy removed all obstacles from the path of learned Jews who tried to secure teaching positions. The historian of literature Alessandro d'Ancona, professor at Pisa, and the jurist

Giorgio del Vecchio exercised great influence with the rising generations of Italy, and the criminologist Cesare Lombroso, professor at Pavia and Turin, gained world-wide fame. There were several Italo-Jewish dynasties of professors, such as the Errera family, the Morpurgos, the Ascolis, the Foas, and the Enriques, whose members excelled in almost all sciences.

FRANCE. In France, Michel Berr (1780-1843) was the first Jew to practise law. Adolphe Franck was the first Jew to be admitted as a member of the philosophical faculty of the Sorbonne, Paris. Jewish professors excelled especially in philosophy, such as Frédéric Rauh, Henri Bergson, Léon Brunschwicg, Ernest Durckheim and Lucien Lévy-Bruhl; in history, such as Élie Halévy, Camille Bloch, Louis Halphen, Henri Hauser and Louis Eisenmann; in philology, such as Michel Bréal, the founder of semasiology, and Arsène Darmesteter; and, above all, in oriental languages, such as Joseph and Hartwig Derenbourg, James Darmesteter, Joseph Halévy, Jules and Salomon Oppert, and Sylvain Lévi. Lucien Lévy and his son Paul, and Jacques Hadamard and Carvalho were outstanding mathematicians. Gustave Cohen, historian of the medieval theatre, was one of the most popular teachers of the Sorbonne. Hippolyte Bernheim, professor at Nancy, laid the basis for the scientific knowledge of the subconscious and unconscious activity of the human mind.

ENGLAND. Although the Test Act was abolished in England in 1828, and public positions were no more reserved only to members of the High Church, the old universities remained subject to these restrictions until, in 1871, the University Test Act opened all British universities to nonconformists and Jews. But as early as 1826 the University College of London had been founded; in 1836 this became the University of London. Its charter provided that no test of religion had to be required either from any of its professors or other teachers. The foundation of the University College was mainly due to the initiative of Isaac Lyon Goldsmid, who worked together with the poet Thomas Campbell and Lord Brougham, but was the "central figure" of the preparatory committee. Goldsmid went to Germany to study the organization of the most modern universities. He became a member of the council of London University, and was followed by his sons Sir Francis and Sir Julian Goldsmid. H. Hurwitz became the first reader in Hebrew at London. In 1885, Sir Philip Magnus took an active part in the reorganization of London University, among whose most respected professors were Raphael Meldola and Philip Joseph Hartog, chemists, Theodor Esterman, mathematician, Theodor Goldstücker, Indologist, Abraham Wolf, philosopher, Charles Gabriel Seligman, ethnologist, and Sidney Lee, historian of literature. At Cambridge, Solomon Schechter was the first reader in rabbinic and Talmudic literature. He was followed by Israel Abrahams, and afterwards by Herbert Loewe. Sir Israel Gollancz was a noted professor of philology at Cambridge, where Lassa Francis Oppenheim was the greatest authority on international law, and Sir Charles Waldstein, later on named Walstone, was one of the best reputed archeologists. Charles Samuel Myers, psychologist, was among the outstanding Cambridge professors in 1943. The first modern Jewish lecturer at Oxford was Frederick Samuel Boas, historian of literature. In 1943 Cecil Roth was reader in post-Biblical Jewish literature at Oxford. Samuel Alexander taught philosophy at Manchester, where Chaim Weizmann was professor of chemistry. Hugh Goitein was professor of law at Birmingham, which university was organized by the grammarian, Professor E. A. Sonnenschein. Joseph M. Yoffey taught anatomy at Bristol, Richard I. Aaron was professor of philosophy at Wales University, Selig Brodetsky professor of mathematics at Leeds, Sir Aurel Stein, the ethnologist and archeologist, was professor at several Hindu universities in India. Coleman Philippson, a jurist of international authority, was in 1943 professor of law at Adelaide, Australia.

The following is a roster of leading educators and administrators (living and dead) associated with schools of higher learning in various parts of the world (except the United States), arranged according to subjects (with individual biographies of most of these published in the alphabetic order throughout these ten volumes). (Figures in parentheses indicate the years of their service with the institutions named.)

ARCHEOLOGY

Hirschfeld, Gustav, 1847-95, University of Königsberg (1879-95)

Loewy, Emanuel, 1857-1938, University of Rome (1889-1914)

ASTRONOMY

Cohn, Fritz, 1866-1922, University of Königsberg (1905-9), then director of the Astronomical Institute, Berlin (1909-22)

Freundlich, Erwin Finlay, 1885- , Potsdam Astrophysical Observatory, and director of the Potsdam Einstein Institute; then University of Istanbul (1933-37) and University of Prague (1937-39)

Marcuse, Adolf, 1860-1930, Handelshochschule in Berlin (1907-30)

Oppenheim, Samuel, 1857-1928, University of Vienna (1903-28)

Schwarzschild, Karl, 1873-1916, University of Göttingen (1901-9), director of the Potsdam Astrophysical Observatory (1909-16)

BIOLOGY, BOTANY, ZOOLOGY

Cohn, Ferdinand Julius, 1828-98, University of Breslau (associate professor from 1872 on, the first professing Jew in Prussia to attain such position), founder of the Institute of Plant Physiology, Breslau (1866) and its director (1871 on)

Errera, Leo Abraham, 1858-1905, University of Brussels (1890-98), and director of the Botanical Institute (1898-1905)

Metchnikoff, Élie, 1845-1916, University of Odessa (1870-82)

Nusbaum-Hilarowicz (Nussbaum), Josef, 1859-1917, University of Lwów (1902-6), director of the Zoological Institute of Lwów (1906-9)

Pringsheim, Nathanael, 1823-94, University of Jena (-1868), founder of the Jena Institute of Plant Physiology (1864)

Sachs, Julius, 1832-97, University of Bonn (1861-67), University of Freiburg (1867-68), University of Würzburg (1868 on)

Strasburger, Eduard, 1844-1912, University of Jena (1869-81), University of Bonn (1881-1912)

Warburg, Otto, 1859-1938, University of Berlin (1897 on)

Wiesner, Julius Ritter von, 1838-1916, University of Vienna

CHEMISTRY

Cohen, Ernst Julius, 1869- , University of Utrecht, Holland (1902 on)

Cohen, Julius Berend, 1859-1935, University of Leeds (1904-24)

Ehrlich, Paul, 1854-1915, Universities of Berlin, Göttingen and Frankfort

Errera, Giorgio, 1860-1933, University of Pavia (1917-32)

Errera, Jacques, 1896- , Universities of Brussels (1930-40), Cambridge, Manchester and Aberdeen

Eulenberg, Albert, 1840-1917, Universities of Greifswald (1874-82) and Berlin (1882 on)

Goldschmidt, Heinrich, d. 1937, University of Oslo (1900 on)

Goldschmidt, Victor Moritz, 1888- , Universities of Oslo (1914-29) and Göttingen (1929-35, director of the Mineralogical-Petrographical Institute)
Haber, Fritz, 1868-1934, University of Berlin (1906-11), then director of the Kaiser Wilhelm Institute for physical chemistry and electro-chemistry (1911 on)
Heilbron, Ian Morris, 1886- , Royal Technical College (1919-20), University of Liverpool (1920-33), University of Manchester (1933-38)
Ladenburg, Albert, 1842-1912, University of Breslau
Lewin, Louis, 1850-1929, Technical School of Berlin (1919-29)
Lieben, Adolf, 1836-1914, Universities of Palermo (1862-67), Turin (1867-71), Prague (1871-75) and Vienna (1875 on)
Liebermann, Carl, 1842-1914, Technical School of Berlin
Liebreich, Oscar Matthias Eugen, 1839-98, Institute of Pharmacology of the University of Berlin (1872 on)
Lippmann, Eduard, 1842-1919, University of Vienna (1875-1919)
Loewi, Otto, 1873- , University of Graz (1909-38)
Lothar, Julius Meyer, University of Tübingen (1876-95)
Magnus, Rudolf, 1873-1927, University of Utrecht, Holland (1908-27, except for the period of the first World War)
Marckwald, Willy, 1864- , University of Berlin (1899-1930)
Meldola, Raphael, 1849-1915, University of London
Meyer, Victor, 1848-97, Universities of Zurich and Heidelberg
Michaelis, Leonor, 1875- , University of Berlin (1908-22), then Medical School of Nagoya, Japan (1922-26)
Natanson, Jakob, 1832-84, University of Warsaw (1862-84)
Oppenheimer, Carl, 1874-1942, Agricultural Academy in Berlin (1908 on)
Pfeiffer, Ignác, 1867- , Budapest Technicum (1912-20)
Pick, Ernest Peter, 1872- , University of Vienna (1924-38), and dean of its medical faculty (1932-33)
Ravenna, Ciro, 1878- , University of Bologna (1906-20)
Sackur, Otto, 1880-1914, University of Breslau (1911-14)
Schiff, Hugo, 1834-1915, Istituto di Studi Superiori, Florence (1863-87), then its director (1887 on)
Simon, Franz Eugen, 1893- , University of Breslau (1931-33)
Toch, Maximilian, 1864- , University of Peking, China, and National Institute of Technology, China
Wallach, Otto, 1847-1931, University of Göttingen (1889-1915)
Weizmann, Chaim, 1874- , University of Manchester (until 1916)
Willstätter, Richard, 1872-1942, University of Munich (1915-25)
Zondek, Bernhard, 1891- , Biochemical Institute, Stockholm (1933-34), then Hebrew University, Jerusalem (1934-)

Geology

Lévy, Auguste-Michel, 1844-1911, Collège de France
Salomon, Wilhelm (Salomon-Calvi), 1868- , University of Heidelberg (1912-33), also director of its Geologico-Paleontological Institute (1908 on), then University of Angora, Turkey (1934-)

History

Bloch, Camille, 1865- , University of Paris (1924-40)
Blum, André, 1881- , École du Louvre, Paris
Bresslau, Harry, 1848-1926, University of Strasbourg (1890-1919), rector (1904-5)
Dessau, Hermann, 1856-1931, University of Berlin (1900-22)
Errera, Carlo, 1867- , Universities of Pisa (1905-12) and Bologna (1912 on)
Galanté, Abraham, 1873- , University of Stamboul (1918-)
Glotz, Gustave, 1862-1935, the Sorbonne, Paris (1913-35)
Halphen, Louis, 1880- , Universities of Bordeaux (1910-28) and the Sorbonne, Paris (1928 on)
Hirschfeld, Otto, 1843-1922, University of Berlin (1904-22)
Lattes, Elia, 1843-1925, Accademia Scientifico-Litteraria, Milan
Léon, Paul, 1874- , Collège de France, Paris (1933 on)
Levi, Adolfo, 1878- , University of Pavia (1922-38)
Lumbroso, Baron Giacomo, 1844-1925, Universities of Pisa, Palermo and Rome
Mayer, Gustav, 1871- , University of Berlin (until 1933, when he was dismissed by the Nazis)
Philippson, Alfred, 1864-1939, Universities of Bern (1904-6), Halle (1906-11) and Bonn (1911 on)
Philippson, Martin, 1846-1916, University of Brussels (1875-90)
Prinz, Gyula, University of Pécs, Hungary (1918 on)
Riess, Ludwig, 1861-1928, University of Tokyo (1887-1902)
Rosenberg, Arthur, 1889-1943, University of Berlin (until 1933)
Schueck, Johan Henrik Emil, 1855- , University of Lund, Sweden (1890-98), University of Upsala, Sweden (1898-1905), head of the University of Upsala (1905-18)
Simson, Bernhard von, 1840-1915, University of Freiburg (1877-1905)
Sobeski, Michael, 1877- , University of Poznan, Poland (1919 on)
Stern, Alfred, 1846-1936, University of Bern (1873-87), Swiss Federal Technical Academy (1887-1928)
Täubler, Eugen, 1879- , Universities of Zurich and Heidelberg
Valentin, Hugo Mauritz, 1888- , University of Upsala, Sweden (1931 on)
Wertheimer, Eduard, 1848- , University of Kolozsvár (1877 on), then Academy of Law, Pressburg

History of Art

Fischel, Oskar, 1870-1939, University of Berlin (until 1933, when he was dismissed by the Nazis)
Goldschmidt, Adolph, 1863- , University of Berlin (1893-1903, 1911-30), University of Halle (1904-11)
Meller, Simon, 1875- , University of Budapest (1919-)
Panofsky, Erwin, 1892- , University of Hamburg (1921-33)
Saxl, Fritz, 1890- , University of Hamburg (1918-33), also director of the Warburg Institute (at Hamburg, 1918-33; at London, 1933-)
Sternberg, Lev Yakovlevich, 1861-1927, Geographical Institute, Leningrad

Language and Literature

Abraham of Lunel, University of Avignon, France (about 1537-93)
Amari, Michele, 1806-89, University of Pisa (1859-60), Istituto di Studi Superiori, Florence (1860-62, 1864-73)
Ancona, Alessandro d', 1835-1914, University of Pisa (1861 on)
Anton, Karl (Moses Gerson Kohen), 1722- (date of death unknown), University of Helmstedt, Germany
Ascoli, Graziadio Isaia, 1829-1907, Milan Academy (from about 1854 on; he served also as its president)
Aufrecht, Theodor, 1822-1907, Universities of Edinburgh (1862-75) and Bonn (1875-89)
Barth, Jakob, 1851-1914, University of Berlin
Bénédite, Georges Aaron, 1857-1926, Collège de France
Benfey, Theodor, 1809-81, University of Göttingen (1862 on)
Boas, Frederick Samuel, 1862- , Oxford University (1887-91), Queens College, Belfast (1901-5)
Bréal, Michel, 1832-1915, Lycée Louis-le-Grand (1859 on), Collège de France (1866 on)
Darmesteter, Arsène, 1846-88, the Sorbonne, Paris (1877-88)
Darmesteter, James, 1849-94, École des Hautes Études, Paris (1875-94)
Fraenkel, Eduard David Mortier, 1888- , Universities of Kiel (1923-28), Göttingen (1928-31) and Freiburg (1931-33), then Oxford University (1935 on)
Fraenkel, Jonas, University of Bern (-1943)
Friedländer, Ludwig, 1824-1909, University of Strasbourg (1892-1909)
Friedmann, Wilhelm, 1884-1943, University of Leipzig
Fürst, Julius, 1805-73, University of Leipzig
Goldstücker, Theodor, 1821-72, University College of London (1852-72)

Gollancz, Sir Israel (1864-1930), King's College of the University of London (1903 on; also, later, dean of its faculty of arts)
Gomperz, Theodor, 1832-1912, University of Vienna (1873-1901)
Halász, Ignác, 1855-1901, University of Kolozsvár, Hungary (1893 on)
Halévy, Joseph, 1827-1917, École des Hautes Études, Paris (1879 on)
Horovitz, Joseph, 1874-1931, Mohammedan Anglo-Oriental College at Aligarh, India (1906-9)
Lamm, Martin, 1880- , University of Stockholm (1919 on)
Laqueur, Richard, 1880- , Universities of Giessen and Tübingen (dismissed in 1933 when the Nazis came to power)
Lee, Sir Sidney, 1859-1926, University of London (1913-26)
Lehrs, Karl, 1802-78, University of Königsberg (1845 on)
Levi, Ezio, 1884-1941, University of Naples (1926-38)
Lévi, Sylvain, 1863-1935, École des Hautes Études, Paris (1883-94), Collège de France (1894 on), later also director of oriental studies at the University of Strasbourg
Lewy, Julius, 1895- , University of Giessen (1930-33)
Mahler, Ede (Eduard), 1857- , University of Budapest (1914-28)
Mittwoch, Eugen, 1876-1942, University of Berlin (director of the seminary for oriental languages, 1928-35)
Morley, Edith Julia, 1875- , University of Reading, England (1908-40)
Morpurgo, Salomone, 1860-193-, University of Bologna
Munk, Salomon, 1803-67, Collège de France, Paris (1865-67)
Mussafia, Adolfo, 1834-1905, University of Vienna (1860-1905)
Neumann, Karl Friedrich, 1793-1870, University of Munich (1831 on)
Norden, Eduard, 1868-1937, Universities of Greifswald (1893-98), Breslau (1898-1906) and Berlin (1906-33)
Obermeyer, Jakob, 1845-1935, Vienna Institute for Oriental Languages (1880-98)
Oelsner, Herman, 1871-1923, University College of North Wales (1903-4), Oxford University (1909-13)
Olschki, Leonardo, 1885- , University of Heidelberg (1908-32), University of Rome (1932-38)
Oppert, Gustav Solomon, 1836-1908, Presidency College, Madras, India (from 1872 to about 1893)
Oppert, Julius (Jules), 1825-1905, school of languages of the Bibliothèque Nationale (1857 on), then Collège de France
Sabbadini, Salvatore, 1873- , Liceo Dante, Trieste (1902-38)
Schipper, Jacob, 1842-1915, Universities of Königsberg (1872-77) and Vienna (1877-1915)
Simonyi, Zsigmond, 1853-1919, University of Budapest (1889 on)
Solmsen, Felix, 1865-1911, University of Bonn (1907-11)
Sonnenschein, Edward Adolf, 1851-1929, Mason College, Birmingham, England (1883-1900), University of Birmingham (1900-18)
Spitzer, Leo, 1887- , University of Istanbul (1933-36)
Sternbach, Leo, 1864- , University of Cracow (1892 on)
Vámbéry, Arminius, 1832-1913, University of Budapest (1864-1905)
Warburg, Karl Johan, 1852-1918, Universities of Gothenburg (1891-1906) and Stockholm (1906 on)
Weil, Gotthold, 1882- , University of Frankfort (1931-33; dismissed by the Nazis)
Weil, Gustav, 1808-89, University of Heidelberg (1861-89)
Winternitz, Moritz, 1863-1937, Prague University (1911 on)
Witkowski, Georg, 1863-1939, Leipzig University (1920-33)
Yahuda, Abraham Shalom Ezekiel, 1877- , University of Madrid (1915-22)

Law

Ascoli, Max, 1882- , University of Genoa (1926-31)
Asser, Tobias Michael Carel, 1838-1913, University of Amsterdam (1862-93)
Bernstein, Karl Ilyich, 1842-94, director of the Institute of Roman Law, Berlin
Ehrenberg, Victor, 1851-1929, University of Leipzig (1911-22)
Errera, Paul Joseph, 1860- , University of Brussels (also rector, 1909-11)
Freudenthal, Berthold, 1872-1929, University of Frankfort
Friedberg, Emil Albert, 1837-1910, Universities of Halle, Freiburg and Leipzig (1865-69)
Gans, Eduard, 1798-1839, University of Berlin (1820 on)
Glaser, Julius Anton, 1831-85, University of Vienna (1860 on)
Goitein, Hugh, 1896- , University of Birmingham, England
Goldschmidt, Levin, 1829-97, University of Berlin (1875 on)
Goodhart, Arthur Lehman, 1891- , Oxford University (1931-)
Goudsmit, Joel Emanuel, 1813-82, University of Leyden, Holland (1858 on)
Grünhut, Karl Samuel, 1844-1929, University of Vienna (1874-1915), also twice dean of its faculty of law
Günzburg, Niko, 1882- , University of Ghent, Belgium
Jellinek, Georg, 1851-1911, Universities of Vienna (1883-89), Basel (1890-91) and Heidelberg (1891 on)
Jolowicz, Herbert Felix, 1890- , dean of the Faculty of Law, University of London (1937-)
Kelsen, Hans, 1881- , Universities of Vienna (1919-30), Cologne (1930-33) and Prague (1936 on)
Kisch, Guido, 1889- , Universities of Königsberg (1920-22), Halle (1922-24, 1925-33), Prague (1924-25), and dean of the faculty of law, University of Halle (1925-26)
Landsberg, Ernst, 1860-1927, University of Bonn (1899 on)
Lattes, Leone, 1887- , University of Modena (head of the department of criminal anthropology, 1923-38)
Lenel, Otto, 1849-1935, Universities of Kiel (1882-97), Strasbourg (1897-1911), and Freiburg (from 1911 on)
Litten, Fritz Julius, 1873- , University of Königsberg (1905 on)
Loening, Edgar, 1843-1919, Universities of Dorpat (1877-83), Rostock (1883-86) and Halle (1886 on)
Loening, Richard, 1848-1903, University of Jena (1882-1903)
Lombroso, Cesare, 1835-1909, University of Turin
Lyon-Caën, Charles, 1843-1935, the Sorbonne, Paris (1872-1919)
Manes, Alfred, 1877- , University of Berlin (1926-35)
Mayer, Marum (Max) Samuel von, 1797-1862, University of Tübingen (1839 on), and rector (1849-50)
Mendelssohn-Bartholdy, Albrecht von, 1874-1936, Universities of Würzburg (1905-20) and Hamburg (1920-22)
Meyers, Eduard Maurits, 1880- , University of Leyden, Holland (1910-40)
Nussbaum, Arthur, 1877- , University of Berlin (1918-34)
Ottolenghi, Salvatore, 1861-1934, Universities of Sienna, Italy (1893-1902), and Rome (1902 on)
Pikler, Gyula (Julius), 1864- , University of Budapest (1903-19)
Rittner, Edward, 1845- , University of Lwów
Rosenstock-Hussy, Eugen, 1888- , University of Breslau (1923-33)
Rubino, Josef (Karl Friedrich), 1797-1864, University of Marburg (1843 on)
Supino, Davide, 1850-1937, University of Pisa (rector, 1898-1920)
Szászy-Schwartz, Gusztav de, 1858-1920, University of Budapest (1901 on)
Taubenschlag, Rafael, 1881- , University of Cracow (1913-39), University of Aix-en-Provence, France (1939-40)
Unger, Josef, 1828-1913, University of Vienna (1857 on)
Vecchio, Giorgio del, 1878- , University of Rome (1920-39; rector, 1925-27; dean, 1930-39)
Ventura, Mison (Michon), 1883- , University of Istanbul (1913 on)
Vivante, Cesare, 1855-1939, Universities of Parma (1882-89), Bologna (1889-98) and Rome (1898-1930)
Volterra, Edoardo, University of Bologna (-1939)
Weiss, André, 1858-1928, University of Dijon, France (1881 on)
Wessely, Wolfgang, 1801-70, University of Prague (1861-70)
Wilda, Wilhelm Eduard, 1800-56, Universities of Breslau (1842-54) and Kiel (1854-56)
Wolff, Martin, 1872-1939, University of Berlin (1921-33)

Mathematics

Blaschke, Wilhelm, 1885- , University of Hamburg (1919-33; rector, 1927-28)
Brodetsky, Selig, 1888- , University of Leeds (1924-)
Cantor, Georg Ferdinand, 1845-1918, University of Halle (1879 on)
Cantor, Moritz, 1829-1920, University of Heidelberg (1877 on)
Hadamard, Jacques, 1865- , Universities of Bordeaux (1893-97) and Paris (1897 on)
Jacobi, Carl Gustav Jacob, 1804-51, Universities of Königsberg (1829-43) and Berlin (1843-51)
Landau, Edmund Georg Hermann, 1877-1938, University of Göttingen (1909-34)
Levi-Civita, Tullio, 1873-1942, Universities of Padua (1898-1918) and Rome (1918-38)
Lévy, Lucien, 1853-1912, director of scientific studies, Collège Sainte-Barbe (1885-90)
Lévy, Paul, 1886- , École Polytechnique (1920-30), École Nationale Supérieure d'Aéronautique (1930 on) and École Supérieure des Mines, Paris (1925 on)
Lichtenstein, Leon, 1878-1933, University of Münster (1920-22)
Mannheim, Victor Amedée, 1831-1906, École Polytechnique, Paris (1864-1901)
Minkowski, Hermann, 1864-1909, Zurich Polytechnic (1896-1902)
Mises, Richard Martin Edler von, 1883- , director of the Institut für Angewandte Mathematik at the University of Berlin (1920-33), then University of Istanbul (1933-40)
Mordell, Louis Joel, 1888- , College of Technology at the University of Manchester, England (1921 on)
Ostrowski, Alexander, 1893- , University of Basel (1927 on)
Palache, Juda Lion, 1886- , University of Amsterdam (1925 on)
Pasch, Moritz, 1843-1930, University of Giessen (1875-1911)
Pincherle, Salvatore, 1853-1936, University of Bologna (1881-88)
Rethi, Mór, 1846-1925, University of Kolozsvár, Hungary (1874-86), Technical School of Budapest (1886-1925)
Rosenhead, Louis, 1906- , University of Liverpool (1933-)
Schur, Issai, 1875-1941, University of Bonn (1913-16)
Sylvester, James Joseph, 1814-97, University College, London (1837-41), Oxford University (1883-97)
Toeplitz, Otto, 1881- , Universities of Kiel (1913-20) and Bonn (1928-33)
Vivanti, Giulio, 1859- , University of Milan
Volterra, Vito, 1860-1940, University of Rome (1900-31)

Medicine

Ascoli, Maurizio, 1876- , University of Catania, Italy (1911-20, 1922-27; director of its medical clinic, 1927 on)
Benedict, Henrik, 1871-1926, University of Budapest (1908-18)
Berger, Emil, 1855- , University of Paris (1890-96)
Bernheim, Hippolyte-Marc, 1847-1919, University of Nancy (1878-1919)
Bloch, Bruno, 1878- , University of Zurich (1916 on)
Blumenthal, Ferdinand, 1870- , University of Berlin (1905-14), director of the Institute for Cancer Research (1917-33), University of Belgrade (1933-38)
Brieger, Ludwig, 1849-1919, University of Berlin (1897 on)
Cohn, Hermann, 1838-1906, University of Breslau
Cohnheim, Julius, 1839-84, Universities of Kiel (1866-72), Breslau (1872-76) and Leipzig (1876-84)
Fano, Giulio, 1860-1930, Universities of Genoa (1894-1900), Florence (dean of the faculty of natural science, 1908-16) and Rome (dean of the faculty of natural science, 1916 on)
Finály, Henrik Lajos (de Kende), 1825-98, University of Kolozsvár, Hungary (1872 on)
Foà, Carlo, 1888- , Universities of Palermo, Messina, and Padua (until 1924), then University of Milan (director of its Institute of Physiology, 1924 on)
Foa, Pio, 1848-1923, University of Turin (1884-1900; president of the university, 1900 on)
Freund, Wilhelm Alexander, 1833-1917, University of Strasbourg (director of its obstetrical and gynecological clinic, 1879 on)
Goldschmidt, Harald Naptali Julius, 1857-1923, Agricultural and Veterinary College, Copenhagen (1888 on)
Goldstein, Kurt, 1878- , Universities of Königsberg (1912-14), Frankfort (1914-30, also director of the Neurological Institute, Frankfort, 1914-30) and Berlin (1930-33)
Goldziher, Vilmos, 1849-1916, University of Budapest (1896 on)
Gottstein, Jacob, 1832-95, University of Breslau (1890-95)
Henle, Friedrich Gustav Jacob, 1809-85, Universities of Zurich (1840-44), Heidelberg (1844-52) and Göttingen (1852 on)
Henoch, Eduard Heinrich, 1820-1910, director, Berlin clinic for children's diseases (1878-93)
Jacobson, Ludwig Lewin, 1783-1843, University of Kiel (1816 on)
Kaposi, Moriz, 1837-1902, University of Vienna (1875 on, also director of its clinic for skin diseases, 1875 on)
Langstein, Leopold, 1876-1933, Kaiserin-Auguste-Viktoria-Haus, Berlin-Dahlem (1909-33; also its director, 1909-33)
Liebermann, Leó, de Szentlörinc, 1852-1926, University of Budapest (1902 on; dean of its medical faculty, 1908 on)
Melchior, Max Joseph, 1862- , University of Copenhagen (1919-33; also chief of its clinic of dental surgery)
Minkowski, Oscar, 1858-1931, University of Strasbourg (1891-1900), director of the City Hospital of Cologne (1900-3) and of Greifswald (1904-9)
Muller, Hermann Joseph, 1890- , Institute of Genetics, Moscow (senior geneticist, 1933-37)
Neisser, Max, 1869-1938, University of Frankfort (1901 on), founder (1909) of the State Institute of Hygiene (president, 1909-33)
Neumann, Heinrich (de Héthárs), 1873-1939, University of Vienna (chief of the university clinic, 1919-29; professor, 1929 on)
Onodi, Adolf, 1857-1919, University of Budapest (1910-19)
Oppenheim, Maurice, 1876- , University of Vienna (1915 on)
Orshanski, Isaac Grigorievich, 1851- , University of Kharkov, Russia (1894 on)
Pagel, Julius Leopold, 1851-1912, University of Berlin (1898)
Pick, Arnold, 1851-1924, German University of Prague (1886-1921; also director of its psychopathic clinic)
Pick, Ludwig, 1868- , University of Berlin (1909 on)
Pincherle, Maurizio, 1879-1939, University of Siena, Italy (1924-27)
Poll, Heinrich, 1877-1939, University of Hamburg (1924 on)
Romberg, Moritz Heinrich, 1795-1873, University of Berlin (1845-51)
Saenger, Max, 1853-1903, University of Prague (1899-1903)
Schenk, Leopold, 1840-1902, University of Vienna (1896-1902)
Schiff, Moritz, 1823-96, Universities of Bern (1854-63), Florence (1863-76) and Geneva (1876 on)
Schwartz, Philipp, 1894- , Pathological Anatomical Institute of the University of Istanbul (1933 on; also its director)
Schwimmer, Ernö, 1837-98, University of Pest (1891-98)
Senator, Hermann, 1834-1914, University of Berlin (1899 on)
Singer, Charles, 1876- , University of London (University College)
Snapper, Isadore, 1889- , University of Amsterdam (1919 on)
Sorsby, Arnold, Royal College of Surgeons, London (1933-34, 1941-42)
Stilling, Jacob, 1842-1915, Universities of Turin, Italy, and Strasbourg (1884 on)
Strassmann, Fritz, 1858- , University of Berlin (1921-26)
Stricker, Salomon, 1834-1898, Pathological Institute, Vienna (1868 on)
Tandler, Julius, 1869-1936, University of Vienna (dean of the medical faculty, 1914-17)
Unna, Paul Gerson, 1850-1929, University of Hamburg (1929)

Volterra, Mario, 1901- , Universities of Cagliari (1935 on) and Florence (until 1938)
Wassermann, August von, 1866-1925, Robert Koch Institute for Infectious Diseases, Berlin (head of the department of experimental therapy and serum research, 1906-13) and Kaiser Wilhelm Institut, Berlin (director of research department of experimental therapy, 1913-25)
Weil, Edmund, 1880-1922, University of Prague (1915-19; director of the serological department of its Institute of Hygiene, 1919-22)
Winternitz, Wilhelm, 1835-1917, University of Vienna (1899-1910)
Zeissl, Hermann von, 1817-84, Allgemeines Krankenhaus, Vienna (also its chief physician, 1869-82)
Zuckerkandl, Emil, 1849-1910, Universities of Graz (1882-88) and Vienna (1888 on)

Musicology

Adler, Guido, 1855- , University of Vienna (1898-1927)
Friedländer, Max, 1852-1934, University of Berlin (1903-18)
Hanslick, Eduard, 1825-1904, University of Vienna (1870 on)
Hornbostel, Erich von, 1877-1935, University of Berlin (1917-33)
Marx, Adolf Bernhard, 1795-1866, University of Berlin (1830-32; music director, 1832-56)
Sachs, Kurt, 1881- , University of Berlin (until 1934)

Philosophy

Alexander, Samuel, 1859-1938, Victoria University, Manchester (1893-1924)
Basch, Victor Guillaume, 1863- , the Sorbonne, Paris
Bergson, Henri Louis, 1859-1941, Collège de France (1900-21)
Brunschvicg, Léon, 1869- , the Sorbonne, Paris (1909-40)
Cassirer, Ernst, 1874- , University of Hamburg (1919-29; rector, 1929-33)
Cohen, Hermann, 1842-1918, University of Marburg (1876-1912)
Durkheim, David Émile, 1858-1917, University of Bordeaux (1887-1902)
Franck, Adolphe, 1809-93, the Sorbonne and Collège de France
Goldstein, Julius, 1873-1929, Technische Hochschule, Darmstadt (1925-29)
Husserl, Eduard, 1859-1938, Universities of Göttingen (-1916) and Freiburg (1916-33)
Karl, Joel, 1864-1934, University of Basel (1897 on)
Koigen, David, 1879-1939, Ukrainian University, Kiev (1912-20)
Kroner, Richard, 1884- , University of Kiel (1929-33)
Lazarus, Moritz, 1824-1903, Universities of Bern (1860-68; rector, 1863-64) and Berlin (1873-96)
Lévy-Bruhl, Lucien, 1857-1939, the Sorbonne, Paris (1899 on)
Liebert, Arthur, 1878- , University of Belgrade (1933-38)
Milhaud, Gaston Samuel, 1858-1918, University of Montpellier (1900-5) and the Sorbonne, Paris (1905 on)
Misch, Georg, 1878- , Universities of Marburg (1911-16) and Göttingen (1916-33)
Richter, Raoul Michael, 1871-1912, University of Leipzig (1905-12)
Shestov, Lev, 1866-1938, University of Paris (1922-38)
Spitzer, Hugo, 1854-1937, University of Graz (1903-24)
Wertheimer, Max, 1880- , Universities of Berlin (1921-29) and Frankfort (1929-33)

Physics

Artom, Alessandro, 1867-1927, Royal College of Engineering, Rome (and founder of its School of Telegraphy and Telephony)
Ascoli, Moise, 1857-1921, University of Rome (1891 on)
Bárány, Robert, 1876-1936, University of Upsala, Sweden (1917-36)
Dessau, Bernardo, 1863- , University of Perugia, Italy
Einstein, Albert, 1879- , University of Prague (1911-12), Technical School, Zurich (1912-14), and Kaiser Wilhelm Academy of Science (director, 1914-33)
Epstein, Paul Sophus, 1883- , University of Moscow (1907-13)
Franck, James, 1882- , Universities of Göttingen (1920-33) and Copenhagen
Hertz, Gustav Ludwig, 1887- , University of Halle (1925 on; also director of its Institute of Physics)
Hertz, Heinrich, 1857-94, University of Bonn (1889-94)
Joffe, Abram Fedorovich, 1880- , St. Petersburg Technical Institute and University (1915-17), and president of the Physico-Technical Institute
Magnus, Heinrich Gustav, 1802-70, University of Berlin (1845-69)
Magnus, Sir Philip, 1842-1933, Catholic University, London (1866 on), and principal of Finsbury Technical College (1883-85)
Mandelshtam, Leonid Isaakovich, 1879- , University of Novorossisk (1914 on), Tiflis and Odessa Technical Institutes (-1925), Pokrovsky State University, Moscow (1925 on), and University of Moscow (-1943)
Ornstein, Leonard Salomon, 1880-1941, University of Groningen (president, 1931; director of its physical institute, 1920 on)
Pontremoli, Aldo, 1896-1928, University of Milan (1924-28)
Rüdenberg, Reinhold, 1883- , Technische Hochschule, Berlin-Charlottenburg (1917-27)
Warburg, Emil, 1846-1931, Physikalisch-Technische Reichsanstalt, Berlin (director, 1905-22)

Physiology

Bernstein, Julius, 1839-1917, Universities of Heidelberg (1869-73) and Halle (1873 on)
Kisch, Bruno, 1890- , University of Cologne (1925-36)
Kronecker, Hugo, 1839-1914, University of Bern (1885 on)
Mayer, Sigmund, 1842-1910, Institute of Histology, University of Prague (director, 1880-84)
Valentin, Gabriel Gustav, 1810-83, University of Bern (1836-81)
Warburg, Otto Heinrich, 1883- , Kaiser Wilhelm Institut für Zellphysiologie, Berlin-Dahlem (1930 on)
Winterstein, Hans, 1879- , Universities of Rostock (1910 on) and Breslau (1927-33), University of Istanbul (and director of its Institute of General Physiology, 1933 on)

Political Science

Bachi, Ricardo, 1875- , Universities of Macerata, Parma and Genoa, and Royal High Institute of Economic Sciences, Rome (1926-38)
Bonn, Moritz Julius, 1873- , Munich Handelshochschule (rector, 1911-20), Berlin Handelshochschule (1920-33)
Cohn, Gustav, 1840-1918, University of Göttingen (1884 on)
Ehrenberg, Richard, 1857-1921, University of Rostock (1899 on)
Errera, Albert, 1842-94, University of Naples (in the 1880's on)
Finzi, Moïse, 1830-1913, Istituto Tecnico, Florence
Ginsberg, Morris, 1889- , University of London, School of Economics and Political Science (1929-)
Gumplowicz, Ludwig, 1838-1909, University of Graz
Jastrow, Ignatz, 1856-1937, University of Berlin (1919 on), Commercial High School, Berlin (rector, 1906-9)
Laski, Harold Joseph, 1893- , London School of Economics and Political Science of the University of London (1920-)
Lederer, Emil, 1882-1939, University of Heidelberg (1920-33)
Levy, Hermann, 1881- , University of Technology, Berlin-Charlottenburg (1921 on)
Liefmann, Robert, 1878- , University of Freiburg (1904-33)
Loria, Achille, 1857-1936, Universities of Siena (1881-91), Padua (1891-1903) and Turin (1903 on)
Lowe (Löwe), Adolf, 1893- , Universities of Kiel (1930-31) and Frankfort (1931-33)
Mannheim, Karl, 1893- , University of Frankfort (1930-33), London School of Economics and Political Science of the University of London (1933-)
Maslov, Peter Pavlovich, 1867- , University of Kharkov (in the 1930's)
Milhaud, Edgard, 1873- , University of Geneva (1914 on)

Morpurgo, Emilio, 1836-85, University of Padua (1866 on; later rector)
Oppenheimer, Franz, 1864- , University of Frankfort (1919-29)
Sharfman, Isaiah Leo, 1886- , Imperial Pei-Yang University, Tientsin, China (1910-14)
Silverman, Herbert A., 1896- , University College, London (head of the Department of Adult Education, 1929 on) and Vaughan College, Leicester, England (director, 1929 on)
Tesoro, Georges A., 1904- , University of Bari, Italy (-1938)
Waley, Jacob, 1819-73, University College, London (1853-65)

PSYCHOLOGY

Dessoir, Max, 1867- , University of Berlin (1920-33)
Katz, David, 1884- , Universities of Rostock (1919-33) and Stockholm (1937-)
Lewin, Kurt, 1890- , University of Berlin (1927-33)
Myers, Charles Samuel, 1873- , King's College, Cambridge, England (1906-9)
Revesz, Geza, 1878- , University of Budapest (1919-20) and Municipal University, Amsterdam, Holland (1932 on)

TECHNICAL SCIENCE

Rubenson, Robert, 1829-1902, University of Upsala, Sweden (1870 on)
Schlesinger, Georg, 1874- , Technical University, Berlin (1904-33), University of Brussels (1934-39)

OTHER COUNTRIES. In South Africa, four Jews were among the pioneer founders of the South African College, later the University of Cape Town, where Rabbi Alfred P. Bender taught Hebrew, and Jack Smith and Max Gorfinkel were lecturers in anatomy.

Many Jewish scholars were professors at Japanese universities, such as Albert Mosse, Ludwig Riess, and Emil Lederer. Even more came as refugees from Germany to Ankara, to the universities of Asia, Australia, the British Empire and both Americas. Many of them were forced to move once or even several times. The part which Jewish professors played in The Hebrew University, Jerusalem, is quite different from that played by their coreligionists at other universities.

HUGO BIEBER.

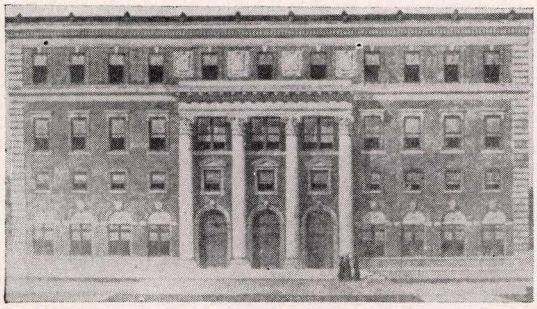
J., *De Academie te Leiden* (1857); Azemard, Émile, *Étude sur les Juifs de Montpellier* (1924); Lenz, Max, *Geschichte der Friedrich-Wilhelms-Universität Berlin* (1918); Bellot, H. Hale, *University College, London 1826-1926* (1926); Kisch, Guido, *Die Prague Universität und die Juden* (1935).

III. American Universities and the Jews. 1. Colonial Times. In pre-Revolutionary times Jews were not welcomed in the Puritan colleges, which were really sectarian colleges intended for the training of denominational ministers.

Harvard, "mother of colleges" and "school of prophets," had no Jewish students during the first century and a half of its existence, but in 1720 awarded a degree to and then received as instructor in Hebrew an immigrant Algerian Jew, Judah Monis, on condition that he be baptized. Monis was the author of the first Hebrew grammar in America.

Yale College records before the close of the 18th cent. several Jewish names on its student rolls; some of these were apparently Christians of Jewish descent, but the three Pinto brothers, Abraham, Solomon, and William, were considered Jews by President Ezra Stiles.

The University of Pennsylvania, at Philadelphia, however, founded by Benjamin Franklin, pursued a more liberal policy, as did also King's College (later Columbia University) in New York city and Brown University at Providence, R. I. The first Jewish graduate at King's College, in 1774, was Isaac Abrahams, a physician. At the University of Pennsylvania, Moses Levy was a student in 1772, and somewhat later his brother Sampson Levy was also enrolled. Both became prominent lawyers and civic leaders. Both King's College and Brown University sought and obtained Jewish aid in securing funds for maintaining the struggling institutions in their infancy. In 1762 King's College was assisted through the formation, in London, of a committee to raise funds for the college by Moses Franks, a former resident of New York city, whose brother-in-law was prominently identified with the college. In 1776 Brown University, in appreciation of generous contributions received from Southern Jews, adopted a resolution "that the Children of the Jews be admitted to the college with all privileges." It is doubtful, however, if any Jewish students were entered at the time.



2. The Early Republic. Jewish enrollment grew considerably during the following century, and several distinguished alumni emerged. At Columbia, Sampson Simpson, later the founder of Mount Sinai Hospital, was graduated in 1800. At Yale College, Judah P. Benjamin, "the brains of the Confederacy," was a student, but did not graduate; at Harvard, Elias Yulee, brother of the future United States Senator David Yulee, was enrolled. The Gratz family at Philadelphia was generously represented both at the University of Pennsylvania and at Franklin College in Lancaster. The first Jew to matriculate at the United States Military Academy at West Point was Simeon B. Levy, the hero of "Maumee Rapids."

Two Jews were honored with appointments to trusteeships. Rabbi Gershom Mendez Seixas, the youthful and patriotic rabbi of Shearith Israel Congregation of New York city, was in 1784 named a member of the board of regents of King's College, and served for forty-one years. When, three years later, its name was changed to Columbia College, he was made also one of its incorporators. Moses Levy, of Philadelphia, served on the board of the University of Pennsylvania, his alma mater, for a quarter of a century. The first Jewish member of the faculty at Columbia University was Lorenzo da Ponte, a visiting instructor in Italian, in 1831. The first Jewish medical graduate was Dr. Daniel M. Peixotto (1816), an early president of the New York County Medical Society. Other Jewish scholars took an active interest in establishing medical colleges in the South.

3. Jewish Students. In the 20th cent. the number and proportion of Jewish students increased at a remarkable rate, as the Jewish population of the country was growing and as the university population was expanding generally. Various studies at different periods establish this fact. In 1915 there were 7,300 Jewish students, or 3.1% of the total student population, according to the Department of Synagogue and School Extension of the Union of American Hebrew Congregations. In 1918 to 1919 they numbered 14,837, or 9.7% of the students in 106 large institutions, according to the Bureau of Jewish Social Research (*American Jewish Year Book,* 1920-21, pp. 383-93). In 1926 there were 25,348, or 10.7% in some sixty-seven colleges, according to the Council of American Jewish Student Affairs.

In 1934 to 1935 the most elaborate study of all was made by Rabbi Lee J. Levinger for the B'nai B'rith Hillel Foundations, covering 1,319 institutions (published privately as *The Jewish Student in America,*

George Wolf

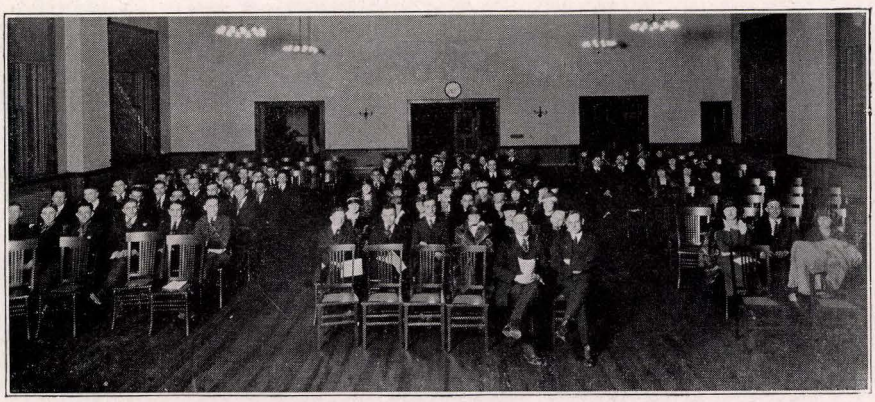
Students' Building, presented to Barnard College by Jacob H. Schiff

1937). This study found 105,000 Jewish students, or 9.1% of all the students in the country. 477 institutions had no Jewish students, while 842 had one or more. But 62% of the Jewish students were attending seventeen great institutions which had each over 1,000.

About half the Jewish students were attending public institutions, and 40% privately endowed colleges, leaving only 10% for the many church-supported institutions in the country. The overwhelming majority attended universities (67.2%) and colleges (22.1%), with very few in the junior colleges (1.6%) and teachers' colleges (2.3%). In the last two groups, as well as in the colleges, the Jews were below the proportion of all students, while in the great universities they were considerably higher (67.2% for the Jews, 42.7% for all students). In professional schools Jews were somewhat above also, for these institutions held 6.8% of the Jews, but 4.8% of all students.

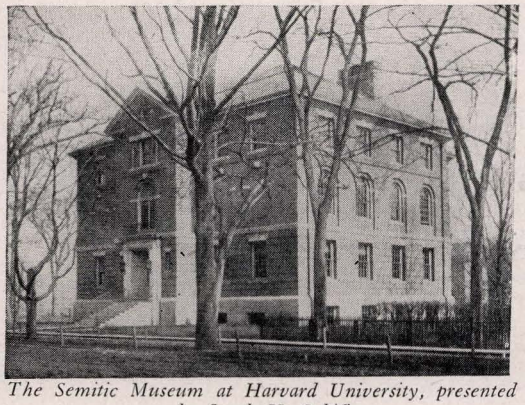
The total proportion of Jewish students was amazingly high, being two and one-half times as great as the proportion of Jews in the general population. This fact of the high percentage of Jewish students held true in every section of the country, from New York city, where half the college students were Jews, to the southwest, where only 1.5% of the students were Jewish as compared to .7% of the general population.

4. Women Students. The preponderance of Jewish students was far greater among men than among women. In fact, whereas there were 1.33 men to every woman in college enrollment as a whole, among Jews there were 1.93 men to every woman. That is, 57% of all students were men, while 66% of Jewish students were men. Evidently, the difference was caused by the great number of Jewish men preparing for the professions, for the Jewish women also were somewhat higher in percentage among students than among the general population.



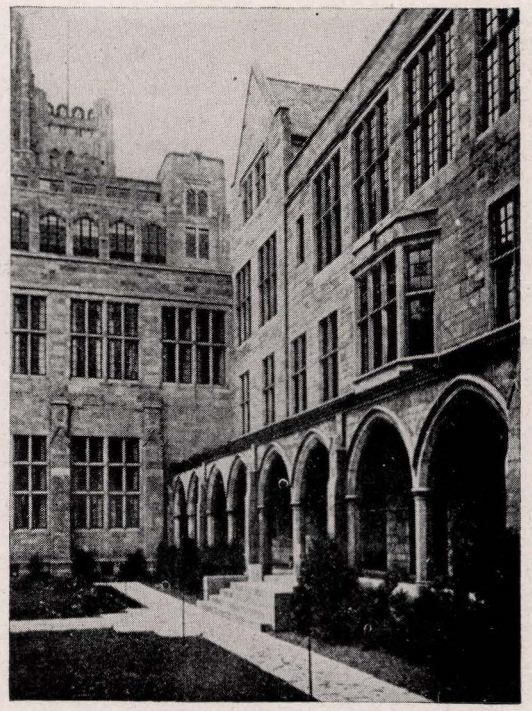
There were 35,000 Jewish women attending colleges and universities in 1934 to 1935. Of these, a little over half were found in coeducational institutions, and slightly under half in women's colleges. In New York city the proportion was even reversed, because of the great Jewish enrollment in Hunter College, in common with all the New York city institutions of higher learning. Many of the more exclusive colleges for women, as well as a smaller number of those for men, had quotas for Jewish students, but it is significant that the Jews always were able to fill their quotas, and often with students of very high standing.

Mrs. Annie Meyers was the first woman student at Columbia University; she was one of the founders of Barnard College, and served on its board of trustees from its inception. Mrs. Alfred F. Hess, Mrs. Jacob H. Schiff and Mrs. Isaac L. Rice were prominent benefactors of the college. Miss Ruth Lewison was, in 1943, a member of the Hunter College Corporation; on the faculty in that year were Elizabeth Vera Loeb, Anna Jacobson and Dora Askowith. Among the alumnae of Hunter College was Lillian D. Wald (d. 1940), founder of the Henry Street Settlement. Dean Adele Bildersee, formerly of Hunter, was, in 1943, on the faculty of Brooklyn College. On the whole, however, few Jewish women served in women's colleges.

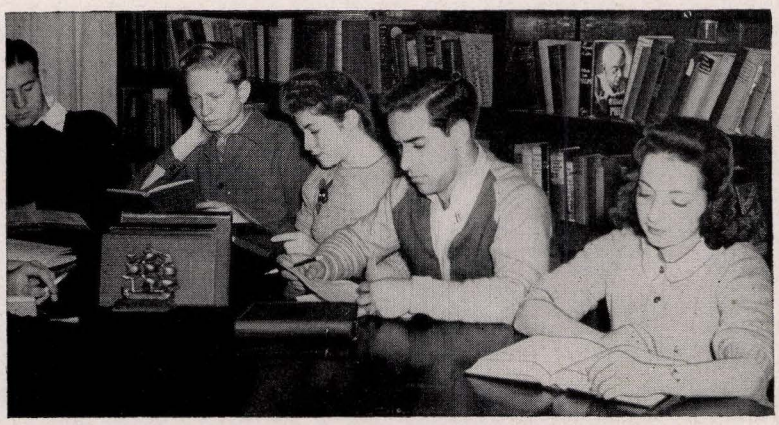


5. Jewish Life on the Campus. The oldest Jewish college organization is the Zeta Beta Tau fraternity, founded in 1898 in New York city as a group for Jewish study, but soon afterward converted into a Jewish social fraternity, and its name changed from Hebrew to Greek to conform to college practice. The first professional fraternities among Jewish students were Sigma Epsilon Delta for dental students, founded in 1901, and Phi Delta Epsilon for medical students, founded in 1904. The oldest sorority is Iota Alpha Pi, founded in 1903.

These social groups multiplied with the increase of the Jewish student body and its continued exclusion from the general fraternities and sororities. In 1941 there were 12 national Jewish social fraternities with 265 active chapters, 5 national social sororities with 90 chapters, and 17 professional fraternities with 185 chapters. The total in 1941 was 34 national social organizations with 540 local chapters, and from 85,000 to 88,000 members, in addition to a few local organizations without national affiliation. These provided social life and housing for their members, and seemed to cover the field quite adequately. Many of them had projects of a Jewish or social service character, but their chief purpose was social.



When Zeta Beta Tau turned from a study club into a fraternity the Intercollegiate Menorah Association



Meeting of the Jewish students' association at the University of Wisconsin

The Semitic Museum at Harvard University, presented by Jacob H. Schiff

(above) Levy Mayer Law School Building at Northwestern University; (left) library of the Hillel Foundation at the University of Illinois

Hillel Foundation building at the University of California

was organized at Harvard in 1906 to serve in the former capacity. The Intercollegiate Zionist Society, founded in 1915, was later disbanded and was succeeded by Avukah in 1925. The B'nai B'rith Hillel Foundations were founded at the University of Illinois in 1923, and developed until in 1942 they had seventy-five local establishments, including full-time foundations with a house and a director, and part-time counsellorships. Avukah listed sixty-five chapters and Menorah fifty. In addition, the United Synagogue of America sponsored two Student Houses in Philadelphia, and a number of student congregations were organized through rabbinical conferences and local congregations.

All these organizations together seemed to be working effectively to teach Jewish culture to the college students, as well as to express their own interests as Jews. Many colleges, however, still lacked religious or cultural organizations for their Jewish students.

6. Jews on College Faculties.

Below is a list of outstanding Jewish professors and administrators (living and dead) in colleges and universities throughout the United States, arranged according to subjects. Individual biographies of most of these are published in alphabetic order throughout these ten volumes. (Figures in parentheses indicate the years of their service with the institutions named.)

Archeology

Tanzer, Helen H., 1876- , Brooklyn College (1929-37)

Astronomy

Schlesinger, Frank, 1871- , University of Pittsburgh (1905-20)

Biology

Loeb, Jacques, 1859-1924, University of Chicago (1892-1910)
Stadler, Lewis J., 1896- , University of Missouri (1936-)
Taubenhaus, Jacob Joseph, 1884-1937, Texas Agricultural and Mechanical College
Waksman, Selman A., 1888- , Rutgers University (1930-)

Chemistry

Alexandre, William, Duke University School of Medicine (about 1930-42)
Bacharach, George, 1888- , Fordham University (1921-31), then Brooklyn College
Gomberg, Moses, 1866- , University of Michigan
Loeb, Morris, 1867-1912, New York University
Lowy, Alexander, 1889-1941, University of Pittsburgh
Mendel, Lafayette Benedict, 1872-1932, Yale University
Myers, Henry Coffinberry, 1864- , Washington University (1896-99), also Pacific University in Oregon (1925-36)
Papish, Jacob, 1887- , Cornell University (1929-)
Rosanoff, Martin André, 1874- , Mellon Institute of the University of Pittsburgh (1914-19), also Duquesne University (1933-40)
Salant, William, 1870- , University of Georgia (1919-29)
Shereshefsky, Judah Leon, 1896- , Howard University (1930-)
Silver, Alexander, University of Pittsburgh (1912-)
Stieglitz, Julius Oscar, 1867- , University of Chicago (1905-)
Sure, Barnett, 1891- , University of Arkansas (1927-)

History

Gottschalk, Louis Reichenthal, 1899- , University of Chicago (1927-)
Kohn, Hans, 1891- , Smith College, Northampton, Mass. (1934-)
Padover, Saul K., 1905- , West Virginia Teachers' College (1930-31)
Schapiro, Jacob Salwyn, 1879- , Columbia University (1922-)
Tannenbaum, Frank, 1893- , Columbia University (1937-)

History of Art

Gottschall, Morton, 1894- , City College (1934-)

Languages and Literature

Adler, Felix, 1851-1933, Cornell University (1874-76), also Columbia University (1902-8)
Blondheim, David S., 1884-1934, Johns Hopkins University (1913-34)
Bloomfield, Maurice, 1858-1928, Johns Hopkins University (1881-1926)
Caplan, Harry, 1896- , Cornell University (1930-)
Cohn, Adolphe, 1851-1930, Harvard University (1885-91), also Columbia University (1891-1916)
Deutsch, Monroe E., 1879- , University of California (1930-)
Ember, Aaron, 1878-1926, Johns Hopkins University (1924-26)
Farbridge, Maurice Harry, 1893- , State University of Iowa (1927-29)
Fineman, Hayim, 1886- , Temple University (1910-29)
Gottheil, Richard James Horatio, 1862-1936, Columbia University (1887-1936)
Jastrow, Morris, 1861-1921, University of Pennsylvania
Kandel, Isaac Leon, 1881- , Teachers College of Columbia University (1923-)
Leon, Harry Joshua, 1896- , University of Texas (1934-)
Luria, Max Aaron, 1891- , Brooklyn College (1934-)
Peritz, Ismar John, 1863- , Syracuse University (1904-33)
Popper, William, 1874- , University of California (1922-)
Rypins, Stanley Israel, 1891- , University of Minnesota (1922-27), also Brooklyn College (1931-)
Sachs, Julius, 1849-1934, Teachers College of Columbia University (1902-17)
Schaffer, Aaron, 1894- , University of Texas (1928-)
Spingarn, Joel Elias, 1875-1939, Columbia University (1909-11)
Teixeira, Anisio Spinola, Teachers' School of the Institute of Education, Rio de Janeiro (1932-)
Warshaw, Jacob, 1878- , University of Missouri (1924-)
Waxman, Samuel Montefiore, 1885- , Boston University (1920-)
Weill, Felix, 1871- , College of the City of New York (retired in 1939)
Werner, Adolph, 1859-1919, College of the City of New York
Wiener, Leo, 1862-1939, Harvard University
Winkler, Max, 1868-1930, University of Michigan

Law

Adler, Herman Morris, 1876-1935, University of California
Diamond, David, 1898- , University of Buffalo
Freund, Ernst, 1864-1932, Columbia University and the University of Chicago Law School
Glueck, Sheldon, 1895- , Harvard Law School
Gray, Herman Arnold, 1894- , New York University (1922)
Isaacs, Nathan, 1886- , University of Pittsburgh (1920-23), Harvard University (1924-)
Michael, Jerome, 1890- , Columbia University (1927-)
Morris, Clarence, 1903- , University of Texas (-1943)
Nussbaum, Arthur, 1877- , Columbia University (1934-)
Oppenheimer, Benton S., 1878-1937, University of Cincinnati
Peyser, Julius I., 1875- , National University Law School (1917-42)
Redlich, Josef, 1869-1936, Harvard University (1929-31)
Schiller, Herbert Maurice, 1893- , University of Utah (1940-)
Treiman, Israel, 1900- , Washington University Law School (1936-)
Wormser, Isaac Maurice, 1887- , Fordham University

Mathematics

Cohen, Abraham, 1870- , Johns Hopkins University (1914-40)
Dantzig, Tobias, 1884- , University of Maryland (1926-)
Dresden, Arnold, 1882- , Swarthmore College (1927-)

Ettlinger, Hyman Joseph, 1889- , University of Texas (1925-)
Kasner, Edward, 1878- , Columbia University (1910-)
Neumann, John von, 1903- , Princeton University (1931-33), then Institute for Advanced Study, Princeton
Rosenbach, Joseph Bernhardt, 1897- , Carnegie Institute of Technology (1935-)
Szasa, Otto, 1884- , Brown University (1934) (formerly University of Frankfort, 1921-33)
Szego, Gabriel, 1895- , Stanford University (1938) (formerly University of Königsberg)
Wiener, Norbert, 1894- , Massachusetts Institute of Technology (1932-)

MEDICINE

Abrahamson, Isador, 1872-1933, New York University and Bellevue Hospital Medical Colleges (1915 on)
Abt, Isaac Arthur, 1867- , Northwestern University Medical School (1908-)
Arkin, Aaron, 1888- , West Virginia University School of Medicine (1914-22)
Einhorn, Max, 1862- , Post-Graduate Medical School and Hospital, New York (1899-1922)
Epstein, Ephraim M., 1829-1913, University of South Dakota
Eshner, Augustus Adolph, 1862- , Philadelphia Polyclinic and College for Graduates in Medicine (1895-1918)
Falk, Isidore Sydney, 1899- , University of Chicago (1929)
Falk, Kaufman George, 1880- , New York University Medical College (1933-36)
Fishberg, Maurice, 1872-1934, New York University
Flexner, Simon, 1863- , Johns Hopkins University (1891-99), University of Pennsylvania (1899-1903), Rockefeller Institute for Medical Research (1903-35)
Forchheimer, Frederick, 1853-1913, Medical College of Ohio (1897-1913)
Freiberg, Albert Henry, 1868-1940, University of Cincinnati (1902-38)
Freund, Hugo Abraham, 1881- , Wayne University College of Medicine, Detroit (1911-12)
Friedenwald, Aaron, 1836-1902, College of Physicians and Surgeons, Baltimore (1873-1902)
Friedenwald, Harry, 1864- , University of Baltimore (1902-29)
Friedenwald, Julius, 1866-1941, University of Maryland School of Medicine (1894-1936)
Gold, Henry Raphael, 1893- , Baylor University College of Medicine (1934-)
Goldstein, Max A., 1870-1941, St. Louis University Medical School (1900-12)
Herzog, Maximilian Joseph, 1859-1918, Loyola University (dean of the medical department, 1913-16)
Hirsch, Isaak Seth, 1880- , New York Post-Graduate Medical School (1914-17), also College of Medicine in New York University (1926-)
Keller, Henry, 1877- , New York School of Clinical Medicine (1915-36)
Levine, Max, 1889- , Iowa State College (1925-)
Loeb, Leo, 1869- , Washington University (1915-36)
Loeb, Robert, 1895- , Columbia University College of Physicians and Surgeons (1928-)
Malamud, William Zev, 1896- , College of Medicine of the State University of Iowa (1931-41), also Boston University School of Medicine (1941-)
Meyer, Willy, 1858-1932, New York Post-Graduate School and Hospital (retired in 1918)
Moschcowitz, Alexis Victor, 1865-1933, College of Physicians and Surgeons, Columbia University (1913-33)
Moses, Arthur, Colegio Pedro II, Brazil (from 1906 on), also University of Rio de Janeiro Medical School
Myerson, Abraham, 1881- , Tufts College Medical School (1922-42), also Harvard University Medical School (1942-)
Oberndorf, Clarence Paul, 1882- , Columbia University (1936)
Oppenheimer, Bernard Sutro, 1876- , Columbia University (1936-)
Pappenheimer, Alwin Max, 1878- , Columbia University (1923-)
Portis, Sidney Alexander, 1894- , Loyola University (1930-36)
Pribram, Ernst, 1879-1940, Rush Medical College (1928-40)
Riesman, David, 1867- , University of Pennsylvania (1912-33), also Philadelphia Polyclinic (1900-18)
Rigler, Leo George, 1896- , University of Minneapolis (1929)
Ringer, Adolph Irving, 1883- , Fordham University (1917-20)
Robinson, Victor, 1886- , Temple University School of Medicine (1929-)
Sachs, Ernest, 1879- , Washington University School of Medicine (1919-)
Schamberg, Jay Frank, 1870-1934, Philadelphia Polyclinic and College for Graduates in Medicine, also head of the department of dermatology, Graduate School of Medicine, University of Pennsylvania (1919-34)
Schamberg, Morris I., 1875- , Columbia University Dental School
Schapira, Samuel William, 1872-1936, Fordham University Medical School
Schour, Isaac, 1900- , University of Illinois, College of Dentistry (1935-)
Schwab, Sidney Isaac, 1871- , Washington University Medical School (1917-)
Shwartzman, Gregory, 1896- , New York Homeopathic Medical College (1923-27)
Solis-Cohen, Jacob da Silva, 1838-1927, Philadelphia Polyclinic
Spiegel, Ernest A., 1895- , Temple University School of Medicine (1931-)
Spivack, Julius Leo, 1889- , Cook County Graduate School of Medicine (1922-32), also head of the school (1932-35)
Spivak, Charles David, 1861-1927, Denver School of Medicine (1900-7)
Stetten, Dewitt, 1881- , New York University College of Medicine (1931-)
Taussig, Albert Ernst, 1871- , Washington University
Taussig, Frederick Joseph, 1872- , St. Louis University (1911-)
Tulipan, Louis, 1884- , New York University College of Medicine (1934-)
Unger, Lester Jarecky, 1888- , New York Post Graduate Medical School
Weinberger, Bernhard Wolf, 1885- , New York University College of Dentistry (1929-31)
Weiss, Emil, 1893- , Loyola University School of Medicine (1931-33)
Weiss, Samuel, 1885- , New York Polyclinic Medical School and Hospital (1927-)
Weiss, Soma, 1899-1942, Harvard University (1939-42)
Wiener, Meyer, 1876- , Washington University School of Medicine (1910-)
Winkelman, Nathaniel, 1891- , Temple University School of Medicine (1928-36), then Pennsylvania University School of Medicine (1936-)
Winternitz, Milton Charles, 1885- , dean of the Yale Medical School (1920-35)
Wiseman, Joseph R., 1881- , Syracuse University (1919-)
Wolfsohn, Julius Masr, 1883- , Leland Stanford University 1913-)
Yaskin, Joseph Charles, 1891- , University of Pennsylvania Graduate School of Medicine (1936-)
Zabotinsky, Alejandro, 1880-1941, University of Buenos Aires (1926-41)
Zenner, Philip, 1852- , University of Cincinnati (1900-10)
Zingher, Abraham, 1885-1927, Bellevue Medical College

PHILOSOPHY

Boas, George, 1891- , Johns Hopkins University (1933-)
Cohen, Morris Raphael, 1880- , College of the City of New York (about 1912-38)
Edman, Irwin, 1896- , Columbia University (1935-)
Flexner, Abraham, 1866- , first director, Institute for Advanced Study, Princeton (1930-39)
Husik, Isaac, 1876-1939, University of Pennsylvania (1922-39)
Wolfson, Harry A., 1887- , Harvard University (1925-)

PHYSICS

Goudsmit, Samuel Abraham, 1902- , University of Michigan (1932-)
Langsdorf, Alexander Suss, 1877- , Washington University (1904-20), also dean of the schools of engineering and architecture (1910-20, 1929-)

PHYSIOLOGY

Erlanger, Joseph, 1874- , Washington University (1910-)
Jastrow, Joseph, 1863- , University of Wisconsin (1888-1927)
Markowitz, Jacob, 1901- , Georgetown Medical School (1930-32)

POLITICAL SCIENCE

Boas, Franz, 1858-1942, Columbia University (1899-1937)
Epstein, Ralph Cecil, 1899- , University of Buffalo (1929-35), then dean of the School of Business Administration (1935-)
Feis, Herbert, 1893- , University of Cincinnati (head of the economics department, 1926-29)
Feldman, Herman, 1894- , Dartmouth College (1929-40), dean of the School of Business and Civic Administration, College of the City of New York (1940-)
Hollander, Jacob H., 1871-1940, Johns Hopkins University
Jászi, Oscar, 1875- , Oberlin College (1925-)
Lerner, Max, 1902- , Williams College (1938-)
Levene, Ricardo, 1885- , University of La Plata (1915-20), also University of Buenos Aires (1920-31), president, University of La Plata (1931-)
Link, Paul, 1903- , Industrial College of Buenos Aires (1925-)
Loeb, Isidor, 1868- , University of Missouri (1899-1925), also dean of the university faculty (1910-16), and dean of the faculty of business and public administration (1916-25); Washington University (dean of the faculty of business and public administration, 1925-40)
Peixotto, Jessica Blanche, 1864-1941, University of California (1918-35)
Perlman, Jacob, 1898- , University of North Dakota (1928-33)
Rowe, Leo Stanton, 1871- , University of Pennsylvania (1904-17)
Salz, Arthur, 1881- , Ohio State University (1934-)
Samuel, Joseph, 1881- , College of the City of New York (head of department, 1940)
Sapir, Edward, 1884-1939, University of Chicago (1925-31), Yale University (1931-39)
Strauss, Leo, 1899- , Graduate Faculty of Political and Social Science, New York city (1941)
Taussig, Frank William, 1859-1940, Harvard University (1901-35)
Viner, Jacob, 1892- , University of Chicago (-1943)
Wessel, Bessie Bloom, 1889- , Connecticut College (1938-)
Wolfson, Theresa, 1897- , Brooklyn College (1935-)

PSYCHOLOGY

Kantor, Jacob Robert, 1888- , University of Indiana (1923-)
Klein, David Ballin, University of Texas (-1943)
Münsterberg, Hugo, 1863-1916, Harvard University (1897-1916)

TECHNICAL SCIENCE

Weil, Joseph, 1897- , University of Florida (1930-37), dean (1937-)
Wolman, Abel, 1892- , School of Sanitary Engineering, Johns Hopkins University (1937-)

7. Jewish Trustees and Benefactors. In all, perhaps thirty Jews served on college corporations, and another twenty or so on college committees. Columbia University had Benjamin N. Cardozo; New York University, Percy Straus; City College of New York, Moses J. Stroock, who was chairman of its board; Harvard University, Judge Julian W. Mack and Jesse Isidor Straus; and, in addition, Harvard invited a dozen distinguished Jewish businessmen and civic leaders in various parts of the country to serve on its various committees, among these Felix M. Warburg, Colonel Arthur Lehman and Justice Irving Lehman. Judge Horace Stern was (1943) a trustee of the University of Pennsylvania.

In the 20th cent. prosperous Jews revealed themselves as generous benefactors of American institutions of higher learning. Jacob H. Schiff and Felix M. Warburg distributed large sums among many colleges. Julius Rosenwald was perhaps the most munificent Jewish contributor to American universities. The University of Chicago has Rosenwald Hall, the Epstein Clinic and the Epstein Art Building, and the Lasker Foundation for Medical Research. At Harvard the campus displays the Schiff Semitic Museum, and the Lehman, Straus, and Sachs buildings. Frederick Brown and the Straus family actively assisted New York University, which maintains also the Guggenheim School of Aeronautics. At Columbia University there are the Speyer School of Education and the Pulitzer School of Journalism. The College of the City of New York is endowed with the Lewisohn Stadium. Morris Falk endowed the Falk Clinic at the University of Pittsburgh. In addition to these specific funds, the Conrad Hubert estate liberated several millions for American universities; the Simon Guggenheim Fund for Traveling Fellowships encourages study in foreign universities; the Fels Foundation established research in psychology; and the Felix Fuld estate of $5,000,000 was utilized for founding at Princeton the Institute for Advanced Study under the direction of Dr. Abraham Flexner, formerly of the Rockefeller Institute. Thousands of scholarships, prizes, fellowships and endowment gifts totalling many millions of dollars were made by Jews to various universities.

8. Hebraic Studies. The Puritan colleges were saturated with Hebraic theological studies. To this day most important universities maintain departments in Hebrew or Semitics. Yale, Pennsylvania, Chicago, Columbia, Harvard, California, Cornell and others devoted elaborate departments to Semitic research, and participated in Holy Land excavations. Christian savants dominated in these fields, but a group of Jewish scholars also found their way to the Semitic divisions, including Richard J. H. Gottheil and Salo W. Baron at Columbia, Harry A. Wolfson at Harvard, Emil G. Hirsch and Louis Mann at the University of Chicago, William Popper at the University of California, Marcus Jastrow at the University of Pennsylvania, and William Rosenau at Johns Hopkins. Jewish endowments are the Semitic Museum endowed by the late Jacob H. Schiff, the Lucius Littauer chair in Jewish philosophy at Harvard, and the Nathan J. Miller chair in Jewish history and literature at Columbia. One of the early instructors in Hebrew at New York University was Abram S. Isaacs. In 1943 many Jewish students held fellowships in Semitics, and several attended also the American Schools of Oriental Research at Jerusalem. The director of this school for several years was Nelson Glueck, of the Hebrew Union College.

LEE J. LEVINGER.

UNIVERSITY, HEBREW, IN JERUSALEM, *see* HEBREW UNIVERSITY.

UNLEAVENED BREAD, *see* MATZOTH; PASSOVER; SEDER.

UNNA, PAUL GERSON, dermatologist, b. Hamburg, Germany, 1850; d. Hamburg, 1929. He was the founder of modern skin pathology. Unna established several dermatological clinics and was made professor

of dermatology at the newly founded University of Hamburg in 1929. In his work *Entwicklungsgeschichte und Anatomie der Haut* (1883) he gave a histological analysis of the horny layer, the cells of the roots of the hair and of the nails, as well as of the functions of the flexible tissues, with many original findings. He taught how to derive biochemical conclusions from the diversities of the staining process and thus to observe the life of the tissues. Unna also discovered the origin of soft chancre. In addition, he made studies on leprosy, tuberculosis and syphilis.

His published writings include: "Allgemeine Therapie der Haut" (*Handbuch der allgemeinen Therapie,* edit. Eulenburg, 1898); *Technik der leprosen Haut* (1910); *Biochemie der Haut* (1913); *Kriegsaphorismen eines Dermatologen* (1916). In 1882 he founded, together with Oskar Lassar and Hans Hebra, the *Monatshefte für praktische Dermatologie,* later published as *Dermatologische Wochenschrift.* He was author of *Histologischer Atlas zur Pathologie der Haut* (1897-1910) and co-author of *Internationaler Atlas seltener Hautkrankheiten.*

Lit.: Festschrift dedicated to Unna by his friends and pupils (1910); Unna's autobiography (*Selbstdarstellung,* 1929).

UNSHLIKHT, IOSIF STANISLAVOVICH, professional revolutionary, and former Communist Party and Soviet government official, b. Mlawa, Poland, 1879. Born into a Polish Jewish middle-class home, Unshlikht received both his middle and special technical education in Warsaw. He was trained as an electrotechnician. His activities in the revolutionary working class movement began in early youth in Poland. In 1900 he joined the Social Democratic Party of Poland and Latvia (S.D.P. of P. and L.), and from 1900 to 1913 he was an active party worker functioning as organizer, propagandist and agitator in various working class centers in Poland under the party name of Iurovsky. Continually hounded by the secret police and the Polish Black Hundreds, he had to work completely underground and keep moving from city to city as a member of the Warsaw, Lodz and other committees of the Social Democratic Party of Poland and Latvia. He was a delegate to its fifth and sixth party congresses, and to the fifth congress of the Russian Social Democratic Labor Party (1907).

In 1911 Unshlikht headed the opposition in his party fighting against working with the liquidators and for the support of Lenin. Right up to his arrest in 1913 he was active in his party. He had been arrested in 1902, 1903, 1906, 1907 and 1909. He was exiled many times, but managed each time to return to Poland illegally and continue with his work. In 1914, however, he was evacuated from Warsaw to Moscow. In 1916 he was arrested in Moscow and exiled to Tutura, in Irkutsk (Siberia).

Several weeks before the February Revolution Unshlikht escaped to the city of Irkutsk and joined up with the local Bolsheviks. In April, 1917, he moved to Petrograd, where he was elected to the Petrograd Soviet. He was a Bolshevik member of the Constituent Assembly. In July, 1917, the Provisional Government had him arrested and interned. He was released from prison in time to help in the preparations for the armed uprising—the October Revolution. In the days of the October Revolution Unshlikht was a member of the Petrograd Military Revolutionary Committee.

In 1918 and 1919 he was active in White Russia and Lithuania. He was on the Central Committee of the Communist Party of the Combined Republics of Lithuania and White Russia, and was military commissar there. In December, 1919, he was sent to the Western front as a member of the Revolutionary Military Soviet. In April, 1921, after peace with Poland was concluded, Unshlikht was appointed vice-chairman of the Cheka, and stayed at this post until the autumn of 1923. In 1923 he was appointed to the Revolutionary Military Soviet of the USSR, and put in charge of supplies for the Red Army. Together with Frunze, he organized the military reforms then being instituted. Frunze was appointed army and navy commissar on February 6, 1925, and soon afterward Unshlikht was named as his assistant. He held this post until June, 1930. During this period he did much to build up the country's civilian defense organizations, and in 1927 was elected vice-chairman of Osoaviakhin, the Soviet civilian defense organization.

In 1930 he was appointed to the presidium of the Supreme Council of National Economy of the USSR, and from 1930 to 1933 he was vice-chairman of the Soviet Planning Commission. From 1933 to 1935 he was chief of the Civilian Aviation Administration. In February, 1935, at the seventh congress of the Soviets, he was elected secretary of the Union Soviet of the USSR. He was also acting secretary of the Central Executive Committee of the USSR. At the thirteenth party congress (1924) Unshlikht was elected to the Central Revision Commission of the Communist Party, and at the fourteenth (1925), fifteenth (1927), sixteenth (1930) and seventeenth (1934) party congresses he was elected to alternate membership in the Central Committee of the Communist Party.

At the eighteenth party congress held in 1939 he was not reelected to this office. He had been relieved of all duties in 1936. In that year he was arrested for complicity in anti-Soviet activities and sentenced to confinement.

UNTERBERG, ISRAEL, manufacturer and communal worker, b. Lithuania, 1863; d. New York city, 1934. He was one of the outstanding figures among the Orthodox Jews of New York, both in business and in philanthropic affairs. Being particularly interested in the promotion of religious training, he helped to found (1921) the Jewish Education Association. He was elected its first president, and held the post until his death. In this position he gave scholarships in religious education to thousands of boys and girls. In 1925 he gave to the Jewish Theological Seminary of America, of which he was a director, the building that houses its Teachers College. With his wife, Bella Unterberg (b. New York city, 1868; d. New York city, 1915), he made possible the establishment of a chair in Talmudic philology at The Hebrew University.

Unterberg's communal philanthropic activities in New York city and elsewhere did not stop at education. He was a charter member and trustee of the Federation for the Support of Jewish Philanthropic Societies, and for twenty-five years a director of Montefiore Hospital. He assisted his wife in the establishment of the 110th Street Young Women's Hebrew Association. As a member of the executive committee of the Jewish Welfare Board he was very active during the first World War. In 1929 he was elected a non-Zionist member of the Council of the new Jewish Agency.

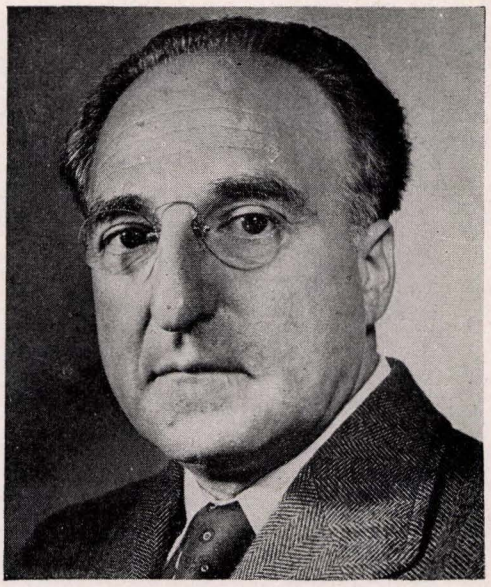
UNTERMEYER, JEAN STARR, poetess, b. Zanesville, Ohio, 1886. She was educated in Zanesville, and later studied at the Kohut Preparatory School and at Columbia University in New York. In 1907 she married Louis Untermeyer, whom she divorced many years later.

Although Mrs. Untermeyer's first volume of verse, *Growing Pains,* was published in 1918, it was not until later that she chose literature as her sole field of activity; in 1924 she carried her earlier ambition to be a singer to fruition sufficiently to make her debut in Vienna and London. By that time her second book of poetry, *Dreams Out of Darkness,* had appeared (1922).

In her writing, the emotional lucidity achieved by a concentration of feeling burned to crystallization by the workings of a dominant intellect made her one of the strongest woman poets of her time. The womanliness of her verse was of a heroic quality, despite the fine, even the miniature, form of the verse itself. And though rarely translated into an open phrase, her Hebraic heritage was one of the elements that entered into the austere structure. Technically, Mrs. Untermeyer depended on an inner melody, which carried the emotion more temperamentally forward than outward rhythm. This volatility of tempo was perhaps the most feminine aspect of her poetry.

Winged Child (1936) was the third of Mrs. Untermeyer's volumes. *Love and Need* (1940) was a collection of her verse, containing some that had not previously been published. This retrospect volume gave even better evidence than the earlier ones of the beautiful quality of her writing from the youthful beginning of her career into her years of maturity, through experiences that had touched on all the depths of human suffering.



Mrs. Untermeyer also translated Oscar Bie's *Schubert, the Man,* the official biography of the Schubert Centenary (1928). She was a lecturer and teacher at the Writers Conferences at Olivet College in Michigan in 1936 to 1937, and received the Ford Madox Ford chair of creative literature in that college in 1939.

UNTERMEYER, LOUIS, author and editor, b. New York city, 1885. He had a partial high school education, and for the rest was self-taught. Until 1923 he combined a literary career with that of business, and was the vice-president and manager of a large jewelry firm. After 1923 he devoted himself entirely to literary work.

His earliest original publication was a series of parodies, *The Younger Quire* (1910). Subsequently numerous books of his own verse, prose, criticism, translations and of anthologies edited by him appeared. Among these were *Challenge* (1914); *Roast Leviathan* (1923); *Moses,* a novel (1928); *Poetry: Its Appreciation and Enjoyment* (1934); a translation of Heinrich Heine (1917) and of Ernst Toller's *Masse-Mensch* (1924); *Modern American Verse* (1919); *Modern American Poetry* (1921; 5th ed., 1942); *Modern British Poetry* (1920); *This Singing World,* an anthology of poems for children (1923); *American Poetry from the Beginning to Whitman* (1931); *The Book of Living Verse* (1932); *Heine: Paradox and Poet* (1938). His autobiography, *From Another World,* appeared in 1939.

A Treasury of the World's Great Poetry (1942) was widely hailed as one of the most comprehensive surveys of verse that had appeared in English.

It is not obscuring Untermeyer's other achievements to point out that his greatest usefulness as well as his lasting distinction is in the role of anthologist. To this work he brought the double assets of a discriminating taste and a wide personal acquaintance with contemporary poets. His reading of the literature of the past, with a view to screening poetry for his many collections, has been commendably comprehensive.

Louis Untermeyer

As poet in his own right he will be remembered for some excellent light verse, parodies and burlesques, done in the days when he delighted in facile technical acrobatics. It must be admitted in all fairness, however, that Untermeyer, if we discount his consciously grandiose moments, has succeeded in expressing effectively his indignation at social wrongs. *Caliban in the Coal Mines,* much reprinted and anthologized, is an excellent example of Untermeyer at his best in this field.

Untermeyer has lived, loved, suffered, exulted, even as others whose hurt sensitivities and rapt moods have resulted in adding even slightly to our sum total of creative literature. When he has fallen short of the best in himself it has been because of a tendency to overproduction brought on perhaps by habits acquired during his early journalistic years. His severest as well as his most charitable critics must agree, however, that occasionally he has managed to hold himself to the exacting standards of craftsmanship and content that he has acclaimed in others. ELIAS LIEBERMAN.

Jean Starr Untermeyer

UNTERMYER, SAMUEL, lawyer and communal worker, b. Lynchburg, Va., 1858; d. New York city, 1940. He received his law degree from the Columbia Law School in 1878, and entered practice the following year. He remained in active practice for sixty-one years, until his death.

Untermyer was a leading figure in the legal and civic life of his time. In his private practice he achieved early in life distinction and success. The scope of his professional activities was very broad. He did not confine himself to corporate practice, but appeared in cases and proceedings involving civil, criminal, corporate and international law. Untermyer represented William G. McAdoo, Secretary of the Treasury, and John Skelton Williams, Controller of the Currency, successfully defending them against charges of conspiracy brought by the Riggs Bank in Washington. He was counsel in very many important litigations, representing the Waters-Pierce Oil Company in its long controversy with the Standard Oil interests. In addition to his work as an advocate in court, he was constantly engaged as an adviser in very great financial transactions; he managed the Utah Copper Company consolidations with other companies, for which he received a fee of $775,000 from the grateful stockholders. Indeed, during his time there were few outstanding legal proceedings in which he was not professionally interested, and he met with success in every phase of private practice.

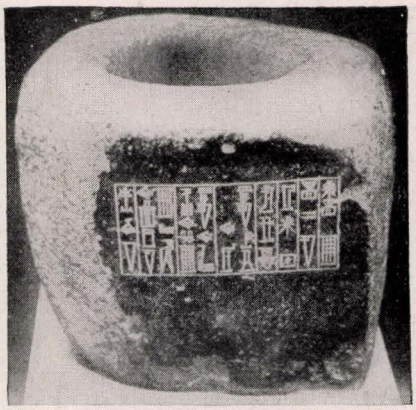
But far more important in his own mind were the public investigations and proceedings in which he engaged from human and patriotic motives—without compensation and often at great personal expense. He was counsel for the Congressional Committee known by the name of its chairman as the Pujo Committee, which investigated financial conditions for the purpose of presenting remedial legislation. As a result of this and other inquiries in which he was interested, the Federal Reserve Act, the Federal Trade Commission Act, and other like measures designed to curb financial excesses were either enacted or amended. He took a large part in drafting and presenting this legislation. For years he urged before Congress and before the New York state legislature the regulation of the New York Stock Exchange; and was active in preparing and urging appropriate legislation for that purpose. He was an ardent advocate before courts, legislatures and in the tribunal of public opinion of the state and federal regulation of public utilities. He vigorously espoused the cause of woman suffrage. Untermyer was an independent Democrat of great influence in the counsels of his party, but he never desired public office, and on one occasion declined to consider a suggested nomination as a Democratic candidate for United States senator from New York.

The forthrightness of his actions on behalf of Jewish rights became especially prominent in 1923, when Untermyer served as attorney for Herman Bernstein, who sued Henry Ford because of the articles published in Ford's *Dearborn Independent,* attacking the Jews and Bernstein. Ford apologized to Bernstein in 1927, and even then Untermyer made it clear that far from congratulating and complimenting Ford on his retractions, he considered it only to be expected that Ford would "try to right the evil that has been done." Later, after the advent of Hitlerism, Untermyer once more rejected all compromises with acquiescence and became president of the Non-Sectarian Anti-Nazi League to Champion Human Rights, which marshalled public opinion to a defense against Nazi propaganda

Samuel Untermyer

and directed a counter-boycott against German goods. Earlier, until 1926, Untermyer had been vice-president of the American Jewish Congress, and he was also for several years president of the Palestine Foundation Fund. He was a believer in the principles of Zionism in so far as applicable to those Jewish populations which were subject to oppression.

Untermyer's impact on the public life and institutions of the United States was highly beneficial. Soon after his death the New York *Herald Tribune,* a newspaper opposed to him in politics and in no way affiliated with him in any manner, made the following estimate of his career on its editorial page:



"In the law, in finance, in politics, in civic and social causes, Samuel Untermyer identified himself so prodigiously with the public affairs of New York that it is hard to imagine what the place would have been like without him. Certainly there would have been missing from its intricate pattern of growth one conspicuous thread of vitality weaving in and out of the entire fabric."

ALVIN UNTERMYER (b. New York city, 1882), lawyer, was a son of Samuel Untermyer. He studied at Princeton (A.B., 1904), Columbia Law School (1905), and at New York Law School (1906). He was admitted to the bar of the state of New York in 1906, and became a member of his father's law firm. During the first World War he served as a captain of field artillery in the United States Army.

IRWIN UNTERMYER (b. New York city, 1886), judge, was a son of Samuel Untermyer. He studied at Columbia University (B.S., 1907; LL.B., 1910), and then entered his father's law firm. He was elected to the Supreme Court of the State of New York for a term that began in 1929, and was still serving in that capacity in 1943. He was assigned to the Appellate Division of the First Department.

GEORGE GORDON BATTLE.

UR OF THE CHALDEES (Hebrew, *Ur Kasdim*), name of the Babylonian city in which Abraham lived before his father's migration to Haran in northwestern Mesopotamia. The problem of its location is complicated by the fact that all recensions of the Greek Bible have "land of the Chaldees" instead of "Ur of the

A stone door-socket found at Ur

Chaldees" in all four Biblical passages where the name occurs. Another difficulty is introduced by the fact that the Chaldeans did not migrate into Babylonia from the deserts of Arabia until the 9th cent. B.C.E., long after the time of Abraham, so "Chaldees" is in any case substituted for some more archaic name.

However this may be, there can be no doubt that the Ur of Hebrew tradition is the great city of Ur in southern Babylonia, which was situated in the heart of the region occupied by the Chaldeans, on what was then the lower course of the Euphrates, about 150 miles southeast of Babylon. The site (now called el-Muqayyar) was partly excavated by Sir Leonard Woolley (1922-34), with extraordinary results. Ur was founded far back in the fourth millennium, perhaps even before 4000 B.C.E., and remained important down to the middle of the second millennium, after which it rapidly declined in importance, though rebuilt several times during the last millennium of its history. The site was certainly occupied down to the late 5th cent. B.C.E., and probably continued as a small town into the Greek period.

According to the Babylonian king-lists there were three important dynasties which had their capitals at Ur; the best-known was the Third Dynasty of Ur, at the end of the third millennium B.C.E., from which tens of thousands of cuneiform business tablets are known. At least five centuries earlier are the rich remains of the Royal Tombs of Ur, which grace the British Museum and the University Museum in Philadelphia. WILLIAM F. ALBRIGHT.

URBACH, ERICH, physician, b. Prague, Bohemia, 1893. He received the M.D. degree from the University of Vienna (1919), and was instructor of dermatology there from 1928 to 1938, when he was ousted by the Nazis. In 1936 he was appointed physician-in-chief of the department of allergy of the Krankenhaus der Kaufmannschaft in Vienna. Urbach came to the United States in 1938, and was in that year made associate of the University of Pennsylvania, in the department of skin diseases; in 1942 he served as allergist to the Jewish Hospital, Philadelphia.

Urbach's published books include *Klinik und Therapie der allergischen Erkrankungen* (1935); *Das Heufieber und seine Behandlung* (1937); *Hautkrankheiten und Ernährung* (translated into English, Spanish and Russian); and *Lipoidstoffwechselerkrankungen der Haut.*

Lit.: Kagan, Solomon R., *Jewish Contributions to Medicine in America* (1939) 651.

URBINO, city in central Italy, with a population of 20,000, including about seventy Jews (1930). The earliest authentic information as to the presence of Jews in the city dates from the 15th cent. From this it may be inferred that they had an important part in the brilliant economic rise of Urbino at that period. They earned their living by trading in money and precious metals, by leather tanning and by manufacturing wool. There were also Jewish physicians in Urbino.

From the beginning of the 16th cent. the condition of the Jews changed for the worse; in 1508 their privileges were taken away, and the wearing of the Jew badge was made compulsory. Yet for the time being they continued in the money trade, a Jewish physician was appointed city doctor, and several Jews were admitted to the court of the dukes of Urbino. In spite of this, Duke Guidubaldo approved of the legal order in 1553 to confiscate and burn the Talmud, and in 1555 the wool industry and trading in woollen products was forbidden to Jews. In 1558 the duke banished 1,500 Marranos who had taken refuge in Urbino after their expulsion from the Papal States. In 1589 the Jews were not allowed to enter the streets during church processions or the tolling of the church bells. Many Jews therefore emigrated from Urbino.

In 1632, when the city came under papal authority, there were only sixty-four families (369 persons) in Urbino, almost all of whom were poor and exempt from paying taxes. The economic condition of the Jews did not begin to improve again until the 19th cent., when the community could afford to have its own synagogue. When, in 1860, Urbino was annexed to Piedmont, the Jews received full civic rights.

URDANG, GEORGE, pharmacist, b. Berlin, 1882. He came to the United States in 1938, and in 1943 was at the University of Wisconsin, in Madison, Wis. Urdang was known in Germany as the editor of the *Pharmazeutische Zeitung,* and gained an international reputation as the founder and director of the International Society for the History of Pharmacology. In 1938 he was made an honorary member of the American Pharmaceutical Society. His main interest was the history of pharmacy and its influence on art.

In 1924 he published *Der Apotheker in der deutschen Literatur.* In 1935, in collaboration with Adlung, he published in Germany *Grundriss der Geschichte der deutschen Pharmazie,* and in 1940, together with Eduard Kremser, he published at Philadelphia his *History of American Pharmacy,* a unique work in the United States. Urdang arranged and described the pharmaceutical collection of the firm of E. R. Squibb and Sons, and in 1943 was engaged on a similar task for the pharmaceutical library of the University of Wisconsin.

URI PHOEBUS BEN AARON HALEVI (known also as Uri Witzenhausen), printer, b. Amsterdam, Holland, 1613; d. Amsterdam, 1715. He was a son of Aaron Halevi, Hazan at the Neveh Shalom Synagogue of Amsterdam, and a grandson of Moses Halevi, founder and first Haham of the Spanish-Portuguese congregation of that city. Uri Phoebus first worked as a typesetter for Immanuel Benveniste, in whose establishment he printed the Pappenheim edition of the *Mishle Hachamim* (1656). In 1658 he

David sends the letter ordering the death of Uriah. From the painting by Govaert Flinck

opened in Amsterdam an establishment of his own. His trademark was a pot and two fishes.

Here he printed, among other works: a Sephardic Mahzor; *Shulhan Aruch, Hoshen Mishpat,* with the commentary *Sifthe Kohen* of Shabbethai Hakohen; a Yiddish translation of the Bible by Jekuthiel Blitz, a proofreader in Uri Phoebus' employ.

In 1693 Uri Phoebus, for unknown reasons, transferred his establishment to Zólkiew, a small town near Lemberg in Galicia, where he continued printing rituals, calendars and other works in Yiddish. Nothing definite is known about the authenticity of authorship of two works attributed to Uri Phoebus, one an "evening prayer" in Yiddish published in Amsterdam in 1677, and the other *Memoria para as siglos futuros* in the Portuguese language, which appeared in 1710.

Lit.: Steinschneider, Moritz, "Jüdische Typographie," Ersch and Gruber, *Allgemeine Entzyklopädie,* section 2, vol. 28, pp. 65-66; Hillesum, in *Centraal Blad voor Israelieten in Nederland* (1900) 599.

URIAH, 1. Hittite warrior of David, listed as one of the thirty or thirty-seven chief heroes of the latter's army (*II Sam.* 23:39). He was killed in battle during the siege of Rabbah in Ammon, through a treacherous withdrawal of the forces supporting him, by order of David, who used this means of covering up his intrigue with Uriah's wife, Bath-sheba, and marrying her. This act was severely denounced by Nathan, and Uriah has become proverbial for a wronged person.

2. priest in Jerusalem in the time of Ahaz and Isaiah (*Isa.* 8:2). He may be identical with the Urijah who was directed by Ahaz to build an altar of burnt-offering in the Temple at Jerusalem on the pattern of one which the king had seen in Damascus (*II Kings* 16:10-16).

3. prophet, son of Shemaiah, of Kiriath-jearim, who prophesied in the time of Jehoiakim. Like Jeremiah, he expected that doom would befall Jerusalem and the nation. When the king sought to slay him, Uriah fled to Egypt, but was brought back thence by officers of Jehoiakim and killed (*Jer.* 26:20-23).

Lit.: The Biblical dictionaries and commentaries.

URIEL ("fire of God"), one of the four archangels in Jewish angelology. He is not mentioned in the Bible, but is described in *Enoch* 20:2 as lord of the angels and of hell, and the relater to the patriarch Enoch of the sufferings of the damned; in *II Esdras* he propounds difficult questions to Ezra and gives him instruction. In other passages he is identified with the angel who wrestled with Jacob, as destined to execute justice on the wicked giants, and as one of those who buried Adam and Abel. His name frequently occurs in amulets and magical inscriptions; sometimes it is replaced by Panuel or Nuriel.

Lit.: See under ANGELS; Horodezky, S. A., in *Klausner Anniversary Book* (1937) 277-82.

URIEL DA COSTA, *see* ACOSTA, URIEL.

URIM AND THUMMIM, two objects that are mentioned in various passages of the Bible as part of the equipment of the Israelite chief priest. They are usually explained as being a sort of sacred lot or oracle, which gave the answer "yes" or "no" in response to a question that was addressed to the Deity (*Ex.* 28:30; *Deut.* 33:8). The method of using them is described in *I Sam.* 14:41, where the better text underlying the Septuagint is to be followed. There the will of God is sought by proposing a series of questions, each serving to eliminate one possibility, until the final question sets forth an alternative which points definitely to the solution of the problem and thus permits a definite and decisive answer.

See also DIVINATION.

URUGUAY, the smallest of the South American republics, covering 72,000 square miles (about the size of the New England States, or about half the size of Montana), one of the most prosperous and progressive

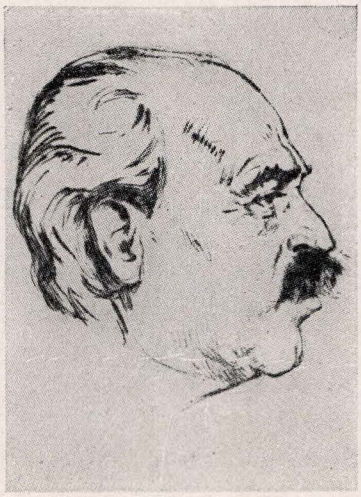
of the Latin American nations. It had in 1940 a population numbering 2,135,000, of whom 50,000 were Jews. About 30,000 Jews were living in Montevideo, the capital, with a total population of 520,000; the others were spread over the country. Prior to 1910, there were only a few Jews living in Uruguay. At the end of the first World War, the Jewish population of Uruguay was 1,700, nearly three-fourths of whom were of the Sephardic strain, the rest consisting of Jews coming from Russia and Roumania, in addition to a few families of Alsatian origin. From 1919 on Jewish immigration into Uruguay increased considerably because the neighboring republic of Argentina established stricter passport regulations than Uruguay had.

After 1933, when the Nazis rose to power in Germany, and the Jews of Poland, Czechoslovakia, Roumania and other countries began to fear either German invasion or the establishment of fascist regimes, the government of Uruguay departed from its previous liberal practice and restricted immigration from Germany and the rest of Central Europe. About 5,000 Jewish refugees, however, succeeded in obtaining permission to settle in Uruguay. Others were prevented from debarkation or expelled. General Alfredo Baldomir, who was elected president of Uruguay in the spring of 1938, promised to admit a larger number of Jewish refugees from Europe, and was ready to collaborate with Uruguayan Jewish organizations and those of the United States, but failure of the conference held at Evian (1938) influenced adversely the attitude of the Uruguayan cabinet. Nevertheless, the president remained well-intentioned toward efforts made by Jewish organizations to change the mind of his cabinet concerning the additional settlement of Jews in his country. 2,200 Jews entered Uruguay during 1939 and 373 in 1940. At any rate, President Baldomir was prepared to protect the Uruguayan Jews against the rising tide of anti-Semitism.

Like other nations in Latin America, the people of Uruguay in general continued to be liberal-minded, and any suggestion of racial superiority was rejected by them. There were no political differences between Jews and non-Jews until the end of the 1920's. The earliest Jewish immigrants took no part at all in politics or in the government of the country, but when their children, born or raised on Uruguayan soil, began to identify themselves with local and national interests, the situation of the Jews became precarious through no fault of their own.

Despite the fact that Uruguay is the smallest of all the South American countries, Montevideo (its capital) is the strategic key to the Rio de la Plata basin, which gives control not only of the whole territory of Uruguay but also of Paraguay, Bolivia and Northern Argentina. Montevideo therefore became the center of Nazi activity for the entire South American continent, Nazi propaganda headquarters for Latin America, including Central America, being located in the Uruguayan capital. At the same time the South American propaganda and other important offices of the Comintern had their center in the same city.

Anti-communist feeling increased even more due to the economic activity of the Communist Party in Uruguay and to its political agitation. It gained control of a cooperative bank which extended to its nearly 5,000 members many attractive advantages but finally was forced to seek a moratorium (1940), causing financial distress among many of its depositors. Nazi propagandists succeeded, at least temporarily, in identifying Jews and communism and in arousing anti-Jewish sentiment among the general population as well as among the former depositors of the bank and all the others whose business interests were injured by its failure. The political importance of the Uruguayan communist party and participation of Jews in communist activity was greatly exaggerated by the Nazis and their cohorts; for the party polled no more than 5,000 votes at the election, only 6 per cent of which were estimated to be those of Jews.



The Nazis were eager to exploit anti-communist feelings among the people of Uruguay for their own sinister ends and to attack the Jews. They organized German-born troops and combined anti-Semitic activity with the attempt to obtain political control of the whole country. A dangerous Nazi plot against Uruguayan independence was uncovered in 1940, but the government was forced, by pressure on the part of Germany, to drop the trial against the indicted Nazi leaders. Until Uruguay severed diplomatic relations with Germany in 1943, the Jews of Uruguay suffered much from anti-Semitic propaganda, whose very character was not recognized by a large part of the population. In 1937 the Jews of Uruguay organized the Asociacion de Defensa Contra el Anti-Semitismo, which instituted law-suits to stop the stream of anti-Jewish publications and obtained some successes, especially in winning the support of non-Jewish intellectual leaders. In the same year the intellectual groups of Montevideo organized a radio program called Hora Cultural Israelita to broadcast daily topics of Jewish interest with the active aid of the foremost non-Jewish Uruguayan authors and artists. A Yiddish radio program was also established. Montevideo had in 1943 a Sephardic, an Ashkenazic and a German Jewish community. Each of these had a synagogue and a rabbi.

There were five Jewish schools, where instruction was in Yiddish, the children attending also government schools, while Yiddish instruction was given either in early morning or in afternoon shifts. Montevideo also had (1943) a permanent Yiddish theatre, and there were several daily newspapers published in Yiddish, and a periodical, *Voz Hebrea* (Hebrew Voice), edited by Señor Mauricio Milies, president of the Asociacion de Defensa Contra el Anti-Semitismo. In 1941 a bill, introduced in Parliament, sought to prohibit the publication of newspapers in "foreign and exotic languages which are difficult to control." This measure, allegedly taken to curb Axis propaganda, affected particularly the Yiddish press, until (April 12, 1942) foreign-language publications professing democratic ideas were permitted to appear.

The East European Jewish community of Montevideo was very active in founding cooperatives, among them the Jewish Cooperative Bank, which distributes 70 per cent of its profits among Jewish communal and cultural causes and organizations. In 1938 the first Jewish agricultural colony, Tres Arboles, was founded. On the occasion of its first anniversary it was highly praised alike by the government and by the non-Jewish press of Uruguay. HUGO BIEBER.

URY, LESSER, painter, b. Birnbaum, Posen, Germany, 1861; d. Berlin, 1931. He began his artistic studies at the Academy of Düsseldorf when he was seventeen years old, and after a long quest for the right teacher he proceeded to Belgium, where he found an understanding master in Portaels, at that time (1879) president of the Academy in Brussels. One year later he went to Paris, and became a pupil of Jules Lefevbre. There he found his true self, painting street scenes in the city, and then, changing from the metropolis to the little village of Vollouvet, seeking the freer air of landscape. In 1886 he finally settled in Berlin, exhibit-

Lesser Ury

ing there for the first time in 1889. He won recognition from the aged Adolf Menzel, and in 1890 received the Michael Beer award, which gave him a trip to Italy.

While in Berlin he painted, again, the city street with all the variety of life, and then, again, retired to the country, Holstein this time, to paint the mellower beauty of nature. Finally, in the middle 1890's, he turned to Biblical subjects. In 1896 he finished his great mural, *Jerusalem,* formulating with the personal vision of a modern the greatness and tragedy of this symbol of Judaism. The triptych of the following year, *Man,* reveals his struggle to understand human life, and his urge to express its meaning. In 1899 he conceived the tragic figures of *Adam and Eve* and, in 1901, his monumental *Jeremiah.* Almost a decade later another very personal vision, *Moses Conjuring the Darkness,* took form.

After that Ury turned back to observing nature as it appeared to him in town and country. The poetry of his art was expressed in colorful and harmonious presentation instead of philosophical conception. He caught tone values, and rhythms of forms in ample variety, and his pictures grew richer and quieter at the same time. Occasional still lifes and portraits disclose the full range of his soul and his palette. An impressive portrait of *Bronislaw Huberman* belongs to 1916. Another artist-portrait, that of *Otto Brahm,* exists in two versions, one in the possession of Max Reinhardt, the other, at Gerhart Hauptmann's.

In 1926 Ury went to London, and two years later to Paris, where, at the peak of his artistic development, he reviewed and set down a new aspect of the birthplace of his art. His starting point having been Paris at the period of impressionism, the artist concentrated on the problems of light and color in striving to win new aspects of nature. From personal "blue" tones of his earlier development his style evolved into a light and bright chromatism. Toward the end of his career, psychological dimension, which had been quiescent for a long time, came again to the fore, expressing itself now in self portraits. In 1931 a comprehensive one-man show of his lifework was undertaken by the National Gallery in Berlin. Ury died, however, before the opening of the exhibition, intended to honor one of Germany's foremost painters, who in his youth, to quote Ludwig Gurlitt, "had to put up with much abuse because he did not care to idealize according to old prescriptions."

USHA, city in Galilee, situated in the neighborhood of Tiberias and Sepphoris. It is mentioned in the Talmud as one of the places near which Judah ben Baba ordained five disciples in the time of the Hadrianic persecutions (about 135 C.E.) and as the seat of the Sanhedrin (*Sab.* 31a). It is particularly notable as the meeting place of a synod, consisting of seven rabbis, which met there about 140 to reorganize the Jewish communities and to pass laws about Jewish life after Antoninus Pius had put an end to the repressive measures of Hadrian. The following regulations are reported to have been made (*Keth.* 49b-50a):

1. Parents must support their minor children.
2. If a man has deeded his property to his sons, the latter must assume the support of him and his wife.
3. One who spends freely may not use more than a fifth of his means.
4. Parents should be patient with sons until they are twelve; after that they may put them on their own responsibility.
5. If a wife sells part of her property while her husband is living, he may claim it from the purchasers after her death.

The following are mentioned elsewhere in the Talmud:

6. The Hallah, in six instances where it may have become unclean, must be burned (*Sab.* 15b).
7. An enactment about the ethrog (*Tos. Shebi.* 4:21; *R.H.* 15a).

There is an account of the banquet given at the conclusion of the session, with the complimentary speeches made by the rabbis to the hospitable inhabitants of Usha, in *Midrash Song of Songs* 2. Usha was the seat of the school of Judah ben Ilai. It remained the meeting place of the Sanhedrin until the time of Judah Hanasi, who made his residence, first in Shefaram, then in Sepphoris.

Lit.: Krauss, S., in *Jewish Encyclopedia,* vol. 11, pp. 645-46.

USHA, *see* COLONIES, AGRICULTURAL.

USQUE, ABRAHAM, printer and publisher, b. Lisbon, Portugal. He lived in Italy in the 16th cent. He was the son of Solomon Usque. As a Portuguese Marrano, with the name of Duarte Pinel, he fled from Lisbon to Ferrara, Italy (after 1543). There he established a printing press and produced sufficient Jewish literature in Hebrew, Spanish and Portuguese to satisfy the great demands of the fugitive Marranos. Before his departure from his native town Usque had published a grammar, *Latinae grammaticae compendium,* and the *Tractatus de calendis* (Lisbon, 1543).

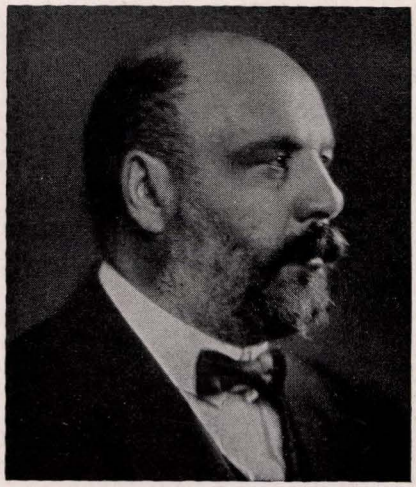
Usque's outstanding achievement is the famous Ferrara Bible, which bears the title *Biblia en lengua española traducida palabra por palabra de la verdad hebrayca por muy excelentes letrados.* He is said to have enlisted the aid of over one hundred experts in rendering a true and accurate Spanish translation of the Hebrew Biblical text.

The first edition of this work, printed in Gothic letters, was started after 1543, and was published on March 1, 1553. The cost of the enterprise was partly defrayed by the Spanish Marrano, Yom Tob ben Levi Athias. Two copies of this Bible were struck off to be submitted to the Inquisition. One copy was dedicated to Duke Ercole de Este II, the other to Donna Gracia Mendesia. Further editions of the Ferrara Bible were issued at Salonika (1568); by Samuel de Cesares

at Amsterdam (1611); and at the same city in 1630, 1646, 1661, 1695, as well as at various other places and periods.

Among numerous other books, Usque printed also a new ritual entitled *Messa de la anima* (Shelter for the Soul), and two large editions of the *Zohar*. Commenting on Usque's production, Gotthold Ephraim Lessing remarked that it was sufficient reason to learn Spanish in order to be able to read the Ferrara Bible.

Lit.: Graetz, H., *History of the Jews,* vol. 4 (1927) 475, 576, 581; Kayserling, M., *Geschichte der Juden in Portugal* (1867) 268; Karpeles, Gustav, *Geschichte der jüdischen Literatur,* vol. 2, pp. 221-22; Rossi, *Wörterbuch der jüdischen Schriftsteller.*



USQUE, SAMUEL, poet and historian of the 16th cent. He was related to Solomon Usque (Duarte Gomez) and to Abraham Usque. He lived first in Ferrara, Italy, and then in Safed, Palestine, where he died. He won a place among the Jewish historians through his valuable work *Consolaçam as Tribulaçoens de Israel* (Consolation for the Sorrows of Israel), a poem in prose, divided into three dialogues held by the shepherds Icabo, Numeo and Zicareo, which he wrote in Ferrara in 1552. In the first two dialogues, Icabo, or Jacob, representing the Jewish people, and Numeo, or Nahum, depict the history, the ordeals and tribulations of the Jewish people from the time of Jacob to the destruction of the Second Temple by Titus, and in the third, Zicareo, or Zechariah, relates the experiences of the Jews in Europe from the time of the Visigothic king Sisebut to the days of the poet. This dialogue, intended to keep the Marranos in the Jewish faith and prevent them from yielding to apostasy, proclaims the hope for a brighter future.

This first Portuguese Jewish poem, which Usque dedicated to his patroness Gracia Mendesia, through whose munificence it was published and circulated, is considered of permanent value, for in its composition the poet, who had mastered several languages, drew his material from a great number of historical sources. Because it attacks the Inquisition, the poem was placed by the Catholic church on the list of prohibited writings. The Christian scholar Mendes dos Remedios had the verses reprinted in 1907. Usque approved of the Messianic movement in Safed, and is said to have agitated in behalf of David Reubeni.

Lit.: Graetz, H., *History of the Jews,* vol. 4 (1927) 558-61; Dubnow, S., *Weltgeschichte des jüdischen Volkes,* vol. 6 (1927) 20, 152-53.

USQUE, SOLOMON (often known by his Spanish name of Duarte Gomez), Marrano poet and merchant, b. Portugal; he lived in several Italian cities in the 16th cent. Together with his son, Samuel Usque, he fled from the Inquisition in Portugal, and settled successively in Ferrara, Venice and Ancona. As business representative of Don Joseph Nasi, Duke of Naxos, he was authorized by the Turkish court to travel to France and demand payment of a debt owed to the house of Mendes-Nasi by King Charles IX.

Usque translated Petrarch's sonnets, cantos, sextains and madrigals into Spanish, and dedicated these works to Alexander Farnese, prince of Parma and Piacenza (Venice, 1567). He reproduced not only the meter and rhyme, but also the style of the works of the great Italian poet, and thus won general acclaim. He wrote a canto on the six days of creation, which he dedicated to Cardinal Carlo Borromeo; it was published at Genoa in 1573. Usque was the first Jewish dramatist since the 2nd cent. B.C.E. Ezekiel the Alexandrian, and was the author of *Esther,* the first Jewish drama in the Spanish language (Venice, 1619).

Menahem Mendel Ussishkin

Lit.: Kayserling, M., *Sephardim* (1859) 96, 141 et seq.; Rossi, *Wörterbuch der jüdischen Schriftsteller;* Karpeles, Gustav, *Geschichte der jüdischen Literatur,* vol. 2 (1921) 230.

USSISHKIN, MENAHEM MENDEL, Zionist leader, b. Dubrovna, Russia, 1863; d. Jerusalem, 1941. He was descended from a Hasidic family and received a traditional Jewish training, supplemented by a secular education in the schools of Moscow, where he graduated from the Technical Institute as an engineer. Deeply impressed by the anti-Jewish decrees issued by Czar Alexander III, Ussishkin in 1882, at the age of nineteen, established a branch of the Chovevei Zion in Moscow. He joined the Bilu, the first group of Russian Jewish students who decided to abandon their careers for a pioneer life in Palestine, but in spite of his ardent wishes and efforts, he missed being admitted to the first limited detachment of pioneers which left Russia for the Holy Land. Five years later, in 1887, Ussishkin was elected a delegate to the Second Congress of the Chovevei Zion, held at Druznik, Lithuania, and in 1889 he joined the Bene Mosheh, a secret society for a national end founded and directed by Ahad Haam (Asher Ginzberg) for the purpose of rallying the scattered attempts made by Jews to colonize Palestine. In 1892 Ussishkin paid his first visit to Palestine.

The Bene Mosheh disbanded in 1896. In the same year Ussishkin met Theodor Herzl in Vienna, and was one of his earliest supporters when the First Zionist Congress was held at Basel in 1897. The Congress elected Ussishkin a member of its presidium, and subsequently he took a leading part in the organization of the Jewish Colonial Trust while, on the other hand, he had to devote much of his energy to fighting with the czarist authorities for the toleration of propaganda for Zionism among the Jews of Russia, and actively participated in the struggle for the political interests of the Russian Jews against the czarist government.

When, in 1903, Joseph Chamberlain, British colonial secretary, suggested to Herzl the project of a large autonomous Jewish settlement around Nairobi, Kenya, and the outline of a charter covering the project was submitted by the British government to the Sixth Zionist Congress, Ussishkin became the leader of the opposition to this project, which was misnamed the "Uganda project" and was definitely rejected by the Zionist Congress in 1905. Ussishkin was also opposed to Herzl while advocating, contrary to Herzl's views, the immediate colonization of Palestine, and as a

member of both the Zionist Greater Actions Committee and the Odessa Committee, whose president he became in 1906, he organized active support for Jewish colonists in Palestine. He also led the opposition to David Wolffsohn, Herzl's successor. Jointly with Chaim Weizmann, he propagated "synthetic Zionism," which meant colonization in Palestine as a preparation for political ends. Ussishkin and Weizmann were closely associated also in promoting the cultural program which culminated at the Eleventh Zionist Congress in the decision to establish the Hebrew University. Ussishkin was a determined adversary of the Yiddishists, and insisted on the speaking of Hebrew. When, together with Weizmann and Nahum Sokolow, Ussishkin appeared as spokesman of the Jewish people at the Paris Peace Conference, he addressed the conference in Hebrew. His was the first Hebrew address before a diplomatic assembly.

After organizing and heading (1917) the preliminary parliament of the Jews of the Ukraine, Ussishkin settled in Palestine in 1920. In the same year he became chairman of the Zionist Commission, and in 1922 president of the Jewish National Fund. During his leadership more than 400,000 dunams of land (a dunam is about one-fourth of an acre) were purchased, and Emek Zebulun, Emek Jezreel, Emek Hepher and Upper Galilee were redeemed. To attain this purpose Ussishkin made many tours of European countries, the United States and Canada. From 1920 to 1923 Ussishkin was a member of the Zionist Executive, but entered into a serious conflict with Weizmann and the British administrators, and at the Thirteenth Zionist Congress, held in 1923, he resigned in order to concentrate his efforts on increasing the Jewish National Fund and promoting cultural institutions. Many donations were made in 1938 in honor of Ussishkin's seventy-fifth birthday, and in 1939 they were used for the establishment in Northern Palestine of Kfar Menachem Ussishkin.

Ussishkin's last public words were uttered in a radio message to the Jews of Russia, exhorting Palestinian and Russian Jewry to keep their ties unbroken. All Jewish activity in Palestine was suspended during the time of Ussishkin's funeral. He was buried in "Nicanor's Cave," uncovered in 1930 during the excavations by Professor Eliezer Lipa Sukenik. Ussishkin's archives were given to the National and University Library, Mount Scopus, Jerusalem. HUGO BIEBER.

USURY. The term usury originally meant any interest charged for the "use" of money transferred as a loan from one person to another; later, its use was restricted to the meaning of excess of interest beyond what was considered a fair degree. Although the charging of interest was a well-established practice in the commercial civilization of Mesopotamia, it was considered wrong in the agricultural civilization of Palestine; hence the Bible forbids the taking of any interest ("usury," *neshech*) in the case of loans. The sole exception was that of the "stranger" (*nochri*), who might be charged interest, presumably because there was some risk involved in the loan (*Ex.* 22:24; *Lev.* 25:36-37; *Deut.* 23:20-21).

Talmudic law accepts this Biblical law as its basis, and even fortifies it in every way possible, even forbidding minor favors and acts for the benefit of the lender, lest they constitute a sort of usury. The regulations on the subject are dealt with in detail in *B.M.* 5. The church took the same view as the Bible.

During the Middle Ages, however, the development of trade and commerce made some form of credit necessary, and the law against all taking of interest became a stumbling-block. The only way around it was to take advantage of the exception provided for in the Bible law and to rule that both Jews and Christians could loan money on interest to those of other faiths. Since the majority of those seeking credit were Christians, the Jews were forced, almost entirely against their will, into the business of lending money. Since risks were great and interest rates were high, the charge of usury in the modern sense was often leveled against them. Actually they were less exacting in their charges than their Christian contemporaries, but the charge furnished a convenient excuse for plundering or expelling the Jews. Eventually the regulation of loans and interest passed from the church to the government, and money lending became finance.

UTAH, a Rocky Mountain state of the United States, having a total population of 550,310 (census of 1940) and a Jewish population of about 1,900 (1943). In 1943 it was estimated that 1,600 of the Jewish population lived in Salt Lake City, 100 in Ogden, 30 in Provo, and between 125 and 175 in the smaller cities and towns of Utah.

Several of the early Mormon settlers were of Jewish descent, including Alexander Neibur and Orson Hyde. The latter went on a mission to the Holy Land in 1940, and published an article urging Jews to return to Zion.

Among the early Jewish settlers were Julius Gerson Brooks and his wife, who came from Galena, Ill., in 1854. Others were Eli and Nelson Ransohoff, Ichel and Abraham Watters, Samuel and Emanuel Kahn, Isidor Morris, Frederick and Samuel Auerbach and Louis Cohn. Most of these came to Utah between 1852 and 1866.

The first Jewish congregation in Utah, B'nai Israel, was founded in Sa' Lake City in 1874. The Jewish Relief Society was organized in 1873 and reconstituted in 1888. In 1892 a B'nai B'rith lodge was established. Congregation Montefiore (Orthodox) was founded at Salt Lake City in 1899, and Shaarey Tzedek in 1916.

Congregation B'rith Sholem was organized in the city of Ogden in 1890. Its original name was Ohab Sholem, but in 1921, a year before its incorporation, the name was changed. It was Orthodox, having as its first rabbi Ben Alcoff, who served from 1917 to 1918. The congregation, in 1943, had no permanent rabbi.

Rudolph Kuchler of Ogden was a member of the state assembly (1906-8). Simon Bamberger of Salt Lake City was governor of Utah (1914-21). The names of other Jews who were prominent in Utah are to be found in the article SALT LAKE CITY.

Louis C. Zucker was a member of the faculty of the University of Utah.

See also SALT LAKE CITY. LEON L. WATTERS.

UTICA, a city of New York state on the Mohawk River, with a population of 100,518 (census of 1940), including about 3,200 Jewish inhabitants in 1943. Utica was chartered as a city in 1832, and it was about that period that Jews first settled there. These pioneer Jews were from East Prussia and Poland. They first organ-

ized themselves into a temporary congregation in 1848 and called themselves the House of Jacob. In 1857 there was a Hebrew Society of Utica, which purchased the first burial ground that year. In 1876 we find mentioned in the Oneida county clerk's office the Hebrew Society Shaara Torah of Utica, which bought an additional plot of ground adjoining the cemetery. In 1943 Utica Jewry supported four Orthodox congregations. The House of Jacob is recorded as established again in 1877, and it would appear that a Methodist church was bought and remodeled into a synagogue. The House of Israel was founded in 1888. In 1904 a group of Jewish settlers from Poland founded the House of David. The synagogue Shaarai Tefillah was established in a new section of Utica in 1924. The four Orthodox congregations of the city were, in 1943, headed by one rabbi, I. David Essrig.

A modern congregation called Beth El was established in 1904 and, without permanent quarters, it met for a number of years on the high holy days, and at various times conducted a Sunday school. The leaders and members of this group formed the nucleus for the Conservative Temple Beth El, the large Utica congregation which was established and incorporated in 1919. First to occupy the pulpit of Temple Beth El was Rabbi Reuben Kaufman (1919-23). He was succeeded by Rabbi Isidor Hoffman (1924-28) and Rabbi S. Joshua Kohn, who, elected in 1930, was still the incumbent in 1943.. The Temple developed a Hebrew and Sunday school as well as a Hebrew high school.

Among the earlier Utica organizations were Ladies of Temple Beth El (1904), a Hebrew Free School (1904), and the Y.M. and Y.W.H.A. (1907). Later, in 1915, the Hebrew Free School remodeled two houses and erected a large building called the Hebrew Free School. The Utica section of the National Council of Jewish Women was organized in 1919 by Mrs. Myron S. Liberman. When the Community Chest was formed in Utica the Council of Jewish Women organized the Federation for Jewish Social Service, which became the Jewish agency in the Utica Community Chest. This Federation established the Bertha Krohngold Vacation Camp for children.

In 1933 the Jewish Community Council was officially organized under the leadership of Rabbi S. Joshua Kohn after a good deal of preliminary work the preceding year. The Council, composed of representatives of all Jewish organizations, became the spokesman for Utica Jewry, and took under its direction the United Jewish Appeal. In addition to those already mentioned, Utica Jewry maintained in 1943 the following organizations: chapters of Senior and Junior Hadassah, a Zionist district, Sisterhood and Men's Club of Temple Beth El, Y.W.H.A., Bikkur Cholim, Mothers Club, Jonathan Rebeccah Lodge I.O.O.F., Shoshana Chapter, Moriah Lodge, F. & A.M., Jonathan Lodge I.O.O.F., Jewish Workmen's Circle, Knights of Pythias, and junior organizations.

The Jews of Utica were, in 1943, mainly engaged in trading and commerce, with a goodly number in the professions as physicians, dentists and lawyers.

Members of the Jewish community who held public office included: H. Myron Lewis, first president of the Jewish Community Council, associate city judge (1923-36) and city judge (1937-41); Julius Tumposky, former justice of the peace and deputy attorney general of the state of New York; Jacob Tumposky, at one time corporation counsel of Utica; Michael Yust and Daniel B. Myers, former assistant corporation counsels. At Hamilton College, Michael Heilprin was associate professor of economics (1940-). Prominent in communal work were Myron S. Liberman, Barney Abelson, Julius Rothstein, Julius Tumposky, Jacob Tumposky, Dr. Herman E. Kowalsky, Benjamin C. Grossman, Barney Abelove, Rose Fink Krohn, Mrs. S. Joshua Kohn and Charles T. Sitrin (d. 1942), who was president of the Jewish Community Council and chairman of several United Jewish Appeal drives, as well as leader in a special drive for the Youth Aliyah. Also, he organized the Utica chapter of the Zionist Organization of America. S. JOSHUA KOHN.

UTKIN, IOSIF PAVLOVICH, Soviet Jewish poet, b. Russia, 1903. At the age of fifteen Utkin joined the famous Siberian guerilla detachment under the Georgian, "Grandpa" Kalandirashvili, to fight the White guards and the Interventionists, to defend the gains of the October Revolution in the civil war. He participated in twenty battles. At the age of eighteen he began to write, and in 1923 to publish.

His first poems were on the Civil War, and he gained renown with his poem "Povest o ryzhem Motele" (The Story of Red-Headed Motele; 1925), an original and humorous description of the habits of life of a Jewish small town. It describes in romantic style the liberation of the Jewish artisans from the various oppressions under which they suffered.

This poem was popular among the youth. It was followed by *Publitsisticheskaia lirika* (Journalist Lyrics; 1931); *Stikhi o voine* (Poems of the War; 1933); *Izbrannye stikhi* (Selected Poems; 1933); and *Sweet Childhood* (1933), all choosing revolutionary themes out of the past and the civil war. In 1943 Utkin was working on a new book of verse about the second World War (in which Russia became involved through German Nazi attack on June 22, 1941), taking as his heroes the fearless Red armymen. It is entitled *I Saw*. He was at that time preparing also to write his impressions of the front for the American press.

Many of Utkin's poems became songs, and were widely known throughout the USSR. Twenty-five editions of his works had been published up to 1943.

For a period Utkin was reproached for the too intimate and melancholy tone of his verse which Soviet critics found at variance with the new spirit of Russia. Later he proved that his intimate songs came from a courageous heart. From the beginning of the War he was at the front as a Red Army commander. He was awarded the Order of the Red Star for bravery.

In July, 1942, he was wounded in his fifth battle, and had to return to the rear for a rest; four of his fingers had been shot away. But he was still calm and confident, and said: "In a few days I'm going back to the front. I'll have a few more words with them (the Nazis)." And he kept his word.

UZIEL, BEN-ZION MEIR HAI, chief rabbi of Tel-Aviv, Palestine, and Jewish communal leader, b. Jerusalem, 1881. Ben-Zion Uziel attended the Tifereth Yerushalayim Yeshiva, studied under Mordecai Ezrachi, and was ordained in 1899. From 1909 to 1912 he taught in the Ezrah rabbinical academy, then served as chief rabbi of the Jewish community of Jaffa and Tel-Aviv from 1912 to 1920. During the three following years (1920-23) he was chief rabbi in Salonika, Greece. In 1923 he was elected chief rabbi of Tel-Aviv, and still occupied this position in 1943.

Uziel was a founder of the orphans' home in Jerusalem, and at Tel-Aviv founded the Yeshivas Ohel Moed and Pirhe Kehunnah. In 1926, together with Meier Dizengoff and Victor Hayim Arlosoroff, he was Palestinian delegate to the League of Nations, in Geneva, Switzerland. An active worker in the Mizrachi Organization, he played a prominent part in the social, religious and communal development of the Jewish settlement, serving also as president of the court of the World Mizrachi Federation. Uziel wrote *Mishpete Uziel* (responsa) and *Hashofet Vehamishpat* (in manuscript).

Ben-zion Uziel, portrait by Elias Grossman

UZIEL, ISAAC BEN ABRAHAM, physician, rabbi and author, b. Fez, Morocco; d. Amsterdam, Holland, 1622. He was a member of a Jewish refugee family which fled to Amsterdam in 1607. He served as rabbi and was famous as a preacher, for, when holding his forceful sermons, he was not afraid to appeal to the conscience of the Marranos who, offended by his severity, caused a split in the young community and the founding of a new congregation named Neveh Shalom. Succeeding Judah Vega as rabbi in 1610, he founded a Talmudic school and was mainly interested in the advancement of Hebrew instruction and in the neglected education of youth. Uziel was also a poet, grammarian and mathematician. His Hebrew grammar, *Maaneh Lashon,* was issued by his disciple Isaac Nehemiah (Amsterdam, 1627; 2nd ed., 1710). Manasseh ben Israel was one of his protégés. Many of Uziel's Spanish and Hebrew poems still remain in manuscript form.

Lit.: Koenen, *Geschiedenis der Joden in Nederland,* 144, 428; Kayserling, M., *Geschichte der Juden in Portugal* (1867) 285-94; De Barrios, *Vida de Uziel;* Graetz, H., *History of the Jews,* vol. 4 (1927) 672-89; vol. 5 (1927) 58.

UZZIAH, king of Judah from about 767 to 737 B.C.E. He is also called Azariah; it is probable that this was his real name, while Uzziah was his throne name. According to *II Kings* 15, he was only sixteen years old when he ascended the throne after the assassination of his father Amaziah. He was able to recover Elath from the Edomites, but otherwise almost nothing is said about him except that he became a leper and was compelled to resign the reins of government to his son Jotham. *II Chron.* 26 gives a much more elaborate account, according to which Uzziah successfully fought against the Philistines, the Arabians and the Ammonites, fortified Jerusalem, and maintained a powerful army. His leprosy is ascribed to the fact that he usurped the functions of the priests and attempted to offer incense upon the altar. His reign was marked by a great earthquake, the same as that mentioned in *Amos* 1:1, so memorable as to be still recalled 250 years later (*Zech.* 14:5).

Rabbinical sources declare that Uzziah slew the prophet Amos, and that the earthquake took place at the time when he entered the Temple and became leprous. Assyrian inscriptions referring to an Azariyahu of Jaudi, king of a powerful confederacy of states in Syria, were once referred to Uzziah; but it is generally agreed that the resemblance of the names is purely coincidental and that the Jaudi in question is not the same as Judah in Palestine.

V

VAAD ARBA ARATZOTH, *see* COUNCIL OF THE FOUR LANDS.

VAAD HALASHON HAIBRITH (Academy of the Hebrew Language), organized in 1890 in Jerusalem for the purpose of coining new terms necessary to the general studies which the Jewish schools were beginning to offer, and to meet the demand for an expanded Hebrew vocabulary among the general Jewish population in Palestine. The Vaad aimed also at a more grammatically correct Hebrew.

In 1904 the Federation of Hebrew Teachers of Palestine, at its annual convention held in Gedera, recognized the importance of the Vaad's work and appointed new members to the Academy to represent the country's Hebrew teachers. Following the British conquest of Palestine, the Vaad Halashon Haibrith became a centralized, national institution because its members were now chosen by the Jewish Agency, the Vaad Leumi, and other national groups in Palestine.

The first president of the Vaad Halashon was Eliezer Ben Jehudah, "father of modern Hebrew." After his death (1922) two presidents were chosen: Hayim N. Bialik, the poet, and David Yellin. In 1943 the presidium was composed of Harry Torczyner, professor of philology, and Joseph Klausner, professor of modern Hebrew literature (at the Hebrew University).

The Vaad had, up to 1943, published six volumes of the *Bulletins of the Vaad Halashon,* in which are found various terminologies for everyday needs, for example apparel, foods, furniture, fruits and vegetables, mathematics, physics, and the like.

From 1928 on the Vaad published a quarterly, *Leshonenu,* first edited by A. Tzifroni and from 1934 on by Harry Torczyner, in which appeared scholarly articles on philological problems as well as practical suggestions on how to expand the scope of spoken Hebrew. Particularly useful are the numerous lists of specialized vocabularies so necessary to a growing country.

The Vaad published also special dictionaries in Hebrew with English, French and German translations in these fields: mathematics, gymnastics, music, art, chemistry, radio, electricity, telephony and telegraphy, wood-working, the army, navy and aviation, theatre, carpentry, shoe-repairing and manufacture, the kitchen, building trades, and the like. The Vaad coined some

ten thousand new words, most of which are used in daily conversation as well as in writing. These words are formed either by fixing the meaning of obscure words or by building new forms from roots of words found in the Bible, Talmud, Midrash and medieval Hebrew works, and also by acting upon the suggestions of special commissions in their respective fields.

In 1943 the Vaad was made up of about thirty members chosen for life. Among them were the established authors, scholars and specialists in Hebrew letters, as well as in secular affairs. In Jerusalem the Vaad maintained a main office, with branches in Tel-Aviv and Haifa.

DANIEL PERSKY.

VAAD LEUMI, the National Council of the Jews of Palestine. Its members are selected by the Asefath Nibharim, an assembly of delegates elected by all Palestinian Jews belonging to the Jewish community Keneseth Israel. Every Palestinian Jew automatically belongs to the Keneseth Israel unless he formally expresses his adherence to the Agudath Israel recognized by the government as a minority community. About 97 per cent of Palestine's Jewry (including family members) belong to the Keneseth Israel.

The first elections to the Asefath Nibharim took place in the spring of 1920. David Yellin, Itzhak Ben Zevi and Jacob Thon were its executive officers. The modus of the elections is general, equal, direct and proportional. Every man or woman over twenty years of age registered by the Keneseth Israel is entitled to a vote. The last election before 1943 took place in 1936.

After long negotiations, the government of Palestine recognized the Vaad Leumi as the official representation of Palestine Jewry in its local affairs. It was given a limited right of taxation for schools, social welfare, health work, and religious purposes. These taxes are raised by the municipalities and by the local communities, and part of them is transmitted to the Vaad Leumi. In recognizing the Vaad Leumi the government reserved for itself the right to recognize and deal with other Jewish communities, provided that their members were unwilling to belong to the Vaad Leumi. It was agreed also that the recognition of the Vaad Leumi as the representation of the local Jewry was not to interfere with the rights of the Jewish Agency to represent world Jewry according to the Mandate for Palestine.

The official legalization of the Vaad Leumi took place after the enactment of the Palestine Community Act of January 1, 1928. Pinchas Rutenberg was elected its president in 1929, and served up to his resignation in 1940. After his death in 1941 no president was elected, and in 1943 the affairs of the Vaad Leumi were conducted by a committee under the chairmanship of Itzhak Ben Zevi, and consisting of twenty-three members.

In 1933 the Vaad Leumi took over from the Jewish Agency the supervision of the Jewish school system in Palestine. It is also in charge of sanitation and health work as well as of welfare activities. The rabbinate is also under its supervision, but it enjoys a broad autonomy. In 1943 it was headed by two chief rabbis, one of whom represented the Ashkenazim, and the other the Oriental communities.

VÁC, industrial town in Hungary. The Jewish community of Vác was founded in 1841. In 1868 a separate Orthodox community was constituted which, having invited from Palestine Rabbi David Silberstein (d. 1883), soon assumed importance under this leader.

David Silberstein, author of *Shebile David* (4 parts, 1863-89), was followed by his son Isaiah Silberstein, under whom the well-known Yeshiva and Talmud Torah of Vác were founded. Isaiah Silberstein, a student of Talmud and Cabala, published *Maase Lemelech,* commentaries on Maimonides' *Mishneh Torah.* He was also the founder and editor of *Tel Talpiyoth,* a periodical of Halachah and homiletics which, after his death (1930), was edited by the assistant rabbi, David Katzburg, author of *Pirḳe Kehunnah* and *Kether Kehunnah* (1940). Silberstein was president of the Agudath Israel organization in Hungary. His authority grew as he advanced in years.

Shortly before his death his Yeshiva was the recipient of a munificent endowment from Samu Hersch, who provided funds for the establishment of dormitories, a restaurant and classrooms for eighty students. In the same year the status quo mother community of Vác decided to constitute itself as an Orthodox community. The Nachlath Yeshayahu society, founded for the posthumous publishing of Isaiah Silberstein's works, as well as the Tifereth Bachurim society of Vác, attested to the vigorous spirit of Orthodoxy in that community.

Among the Jews of Vác were several manufacturers and important businessmen. In 1930 Vác had 1,934 Jews in a total population of 20,960.

VADÁSZ, LIPÓT, attorney and Hungarian statesman, b. Kisvárda, Hungary, 1861; d. Budapest, 1924. In 1884 he began to practise law in his native town, and became the most prominent lawyer in Szabolcs County. He played a leading role also in the public affairs of his town and county. In 1910 he was elected a deputy to the lower chamber of the Hungarian parliament. He became one of the trusted aides of the strong man of Hungary, Count Stephen Tisza, and was himself a man of no small political influence. In 1913 he was made under-secretary of state in the cabinet of László Lukács, and retained this office under the subsequent prime ministership of Tisza.

During the first World War Vadász was responsible for the redaction of several emergency laws; the "lex Vadász," narrowing parliamentary law as a measure of war-time expediency, was named after him. He did substantial preliminary work also on the Hungarian code of civil law.

When Count Tisza and his policy of the strong hand failed to enlist the support of the Hungarian public, even while the first World War was being fought, Vadász, too, retired from the political scene, and returned to his profession. He devoted himself also to Jewish communal affairs, and was president of the Hungarian-Jewish literary society (IMIT). He was one of the more prominent orators in the Hungarian parliament, and his addresses were published posthumously under the title of *Vadász Lipót Beszédei* (1925).

VÁGÓ, BÉLA, people's commissar, b. Kecskemét, Hungary, 1891. As a youth he took part in the labor movement, and for that reason was expelled from the University of Budapest. He then devoted himself to organizational work in the Social Democratic party of Hungary and in the trade unions. During the first World War he advocated revolutionary methods and opposed the official policy of the party. After the War he was made a commissar of internal affairs in Béla Kun's government of Soviets (1919), and subsequently took supreme command of the Hungarian Red Army.

When this army was defeated, Vágó, together with the rest of the communist government, fled to Austria. Subsequently he accompanied Béla Kun to Soviet Russia, where he played an inconspicuous part. Of his whereabouts in 1943 nothing was known.

VAJDA, ERNEST (ERNÖ), playwright and motion picture author, b. Hungary, 1886. He wrote several comedies and dramas performed on Budapest stages, among which *A szerelem vására* (1919; English trans., Louis Rittenberg, *The Moreland Case,* 1922), written under the pen name of Sidney Garrick, was an outstanding success. He wrote also the libretto for an opera, *Farsangi lakodalom* (Carnival Marriage), for which Ede Poldini composed the music and which was performed by the Budapest Opera. Later he came to the United States where he became known as a scenarist through two screen plays written for Adolph Menjou.

He was also the author of *Marquis Preferred; Love Parade* (1929); *The Guardsman* (1931); *Smilin' Through* (1932); *The Great Garrick* (1937); *They Dare Not Love* (1941) and other motion pictures and collaborated on *The Barretts of Wimpole Street* (1934); *A Woman Rebels* (1936); *Marie Antoinette* (1938) and *Dramatic School* (1938).

Among his notable stage plays produced on Broadway were: *The Harem,* by David Belasco; *Grounds for Divorce,* by Charles Frohman; *Fata Morgana,* by the Theatre Guild; *Little Angel,* by Brock Pemberton.

VALABRÈGUE (also Aulbrègue in Provençal), well-known Jewish family of Southern France, whose members came from a locality of the same name in the Provence. In the 14th cent. there lived in Tarascon a Jew named Israel Valabrègue who, after the expulsion of the Jews in 1306 from that city, had been permitted to stay there. He was author of many rabbinical works. There was also a Jewish physician in the 15th cent. in Southern France by the name of Asher ben Moses Valabrègue, who in 1468 translated from Latin into Hebrew the widely known medical work of Guy de Chauliaque, *Chirurgia parva Guidonis.*

VALABRÈGUE, ALBIN, dramatist, b. Carpentras, France, 1853; d. Paris, 1937. He was one of the popular playwrights of his time whose very successful comedies were staged chiefly at the Varieties Theatre. Valabrègue wrote many plays in collaboration with Hennequin and Ordonneau. He started his theatrical career with the comedy, *La veuve Chapuzot* (1879).

Others of his works were: *Durand et Durand* (1887); *Les vacances du mariage* (1888); *Un prix Montyon* (1891); *La sécurité des familles* (1892); *Le premier mari de France* (1893); *Mariage d'aujourd'hui* (1911); *Coralie & Cie* (1913); *Les Boulinard* (1921). For many years he was co-editor of the periodical *L'Illustration.* In 1903 he became a devotee of spiritism, the fruit of which was his *Fils de l'Homme* (1912).

VALABRÈGUE, ANTOINE, poet and journalist, b. Aix, France, 1844; d. Paris, 1900. At first a contributor to several literary periodicals and dailies, such as *L'artiste, Le parnasse contemporain* and *L'opinion nationale,* he then became an art critic, collaborating with the *Revue bleue, Revue des arts décoratifs* and *Vie moderne.*

Valabrègue's writings include: *Petits poèmes parisiens* (1880); *Un maître fantaisiste au xviii^e siècle: Claude Gillet* (1883); *Chansons de l'hiver* (1890); *Abraham Bosse* (1892); *L'art français en Allemagne* (1896); *Madame Falconnet* (1898).

Lit.: Gubernatis, A., *Dictionnaire international des écrivains du jour,* vol. 3 (1891) 1885-86; "Lettres d'Émile Zola à Antoine Valabrègue, *Grande revue,* vol. 2 (1903) 1-19, 214-62.

VALABRÈGUE, JULES, jurist, b. Carpentras, France, 1843; d. France, 1925. He was in the service of the State Council from 1880 to 1893, when he became a councillor of Paris. He was president of the Paris Court of Appeals from 1906 to 1913, and later became its honorary president. He was appointed an officer of the French Legion of Honor.

VALABRÈGUE, MARDOCHÉE GEORGES, French general, b. Carpentras, France, 1852; d. Paris, 1930. He studied at the polytechnical school and at the military academy in Paris. In 1881 he was appointed a teacher at the school of artillery and engineering of Versailles. In 1884 he became a regiment commander; he was head of the artillery school from 1902 on. He was also director of the cabinets of the ministers of war Generals André and Berteaux (1902-5). He collaborated closely with General André, who became minister of war after the Dreyfus Case and was bent on purging the army of clerical and reactionary elements. At that time Valabrègue was violently attacked by the rightist press.

Subsequently Valabrègue was commander of the military academy at Paris and head of the Third Corps of the French Army. During the first World War he led the reserve divisions of the Fourth Army group, and thereafter he belonged to the high command of the war. He was a grand officer of the Legion of Honor and the recipient of many foreign decorations.

VALENCIA, city on the east coast of Spain, where a Jewish community, members of which were engaged in the overseas trade, existed as early as the 11th and 12th centuries. When Jaime I of Aragon captured the city in 1238, he permitted the community to occupy its old quarters within the walls of the city, and brought new members to the community from Aragon. The Jews of Valencia had extensive land properties which were often cultivated by Saracen bondsmen. The community has scant importance in the history of Jewish literature and scholarship. Its last and most important rabbi was Isaac ben Sheshet. In 1391 the community of a thousand families was dragged into the general calamity which befell the Spanish Jews. Thereafter Jews were permitted to reside there for temporary business transactions only. A few Jewish families lived in the city in the 20th cent.

Lit.: See under SPAIN.

VALENTIN, GABRIEL GUSTAV, physiologist, b. Breslau, Germany, 1810; d. Bern, Switzerland, 1883. He practised as a physician in Breslau until 1836, when he was called to the chair of physiology at the University of Bern; this position he occupied for forty-five years, contributing greatly through his researches to every branch of physiology. In cooperation with Purkinje, Lehman, Berzelius, Bischoff and other scientists, who helped place physiology among the experimental sciences during the 19th cent., Valentin made discoveries concerning the ciliated epithelium of the eye, secretion, the circulation of the blood, animal electricity, the physiology of the senses, digestion, and the varicose fibres of the brain, and wrote many articles in Wagner's *Lexicon of Physiology.*

His numerous studies include: *Histiogenia comparata,* a treatise on the evolution of plants and animals, awarded the Grand Prix of the French Institut in 1835; *Repertorium für Anatomie und Physiologie* (1836-43); *Über den Verlauf und die letzten Enden der Nerven* (1863); *Über Mechanik des Blutumlaufs* (1836); *Die physicalische Untersuchung der Gewebe* (1867); and a series of articles published in the *Zeitschrift für Biologie* under the title of "Histiologische und physiologische Studien."

Lit.: *Proceedings of the American Academy,* vol. 19 (1884) 567-68; *Allgemeine Deutsche Biographie,* vol. 39, pp. 463-64.

VALERIUS, DAVID, physician and educator, who lived in the 17th cent. The places and dates of his birth and death are not known. He was brought up in Italy, and studied medicine at the University of Salamanca, Spain. Subsequently he traveled all over Europe, attending other universities in Spain, France and Italy. He also attended the academy of Gyulafehérvár, Transylvania. Having formed close intellectual and personal friendships with the teachers there, he yielded to their persuasion and accepted the Protestant faith. Subsequently the prince of Transylvania appointed him lecturer in philosophy at the Protestant college of Sárospatak.

Lit.: Mandl, Bernát, in *Magyar Zsidó Lexikon* (1929) 936.

VALETTI, ROSA (originally Rosa Vallentin), actress, b. Berlin, 1878; d. Vienna, 1937. She was the daughter of the German industrialist Felix Vallentin and the sister of the actor Hermann Vallentin. Her daughter (from her second marriage), Liesel Valetti, was a student of Max Reinhardt, and was playing at the Theater in der Josefsstadt in 1938.

Rosa Valetti was possessed of a passion for the theatre from her earliest youth, had difficulty in undergoing the strict discipline of the Prussian schools, and completed her education, after changing from one school to another, in a Swiss girls' school. In Switzerland she met her first husband, the Polish pianist Edmund Herz. After divorcing him she made her debut, unknown to the public at large and to the critics, in East Berlin at the Theater am Alexanderplatz where she played a youthful lover's part.

Later, when her comic talents were discovered, she began a swift ascent which made her one of the best character actresses on the Berlin and Vienna stages. Her second husband was the Austrian journalist Karl Singer. Despite a serious illness, she remained faithful to the theatre up to the last hour of her life. Although ravaged by a high fever, she appeared (November 2, 1937) on the stage of the Theater in der Josefsstadt in the premiere of a play ironically titled *Freut euch des Lebens.* After the ninth performance she had to leave the company; she died four weeks later.

The numerous roles which she embodied included: Mrs. Warren in George Bernard Shaw's *Mrs. Warren's Profession;* Peacham in Bert Brecht's *Dreigroschenoper;* the fishwife in Marcel Pagnol's *Der goldene Anker;* Fanny in the same playwright's drama of the same name; the flower woman in Bruno Frank's *Sturm im Wasserglass.* The last role she still played under the Nazis in the Berlin Jewish Cultural Union prior to leaving for Vienna. All her characterizations were clear cut; she hated phraseology and pathos as means to an end, but played her characters as a sensitive human being expressive alike in tragic and comic roles.

To round out her personality, Rosa Valetti the manager must be mentioned. She established such well known cabarets as Grössenwahn, Larifari and Die Rampe, and for a short while also the Comedia Valetti.

Lit.: C.-V.-Zeitung, Dec. 16, 1932.

VALLS, RAPHAEL, Spanish Marrano, who was burned at the stake by the Inquisition at Palma, on the island of Majorca, in the Balearic Islands, on May 6, 1691. His name is derived from the town of Valls, in the province of Tarragona, in northeastern Spain. Victims of the same penalty at the same time were Raphael Terongi (a name derived from Tarragona), a disciple of Valls, and Catalina Terongi, his sister, both of whom were adherents of Judaism through the influence of Valls, who was characterized by the Inquisitional tribunal which sentenced him as the "rabbi" of the Chuetas (descendants of the Balearic Island Jews who were forcibly converted to Christianity in the years 1391 and 1435). The death of Valls and of the Terongis was perpetuated in verse by the popular poets of the island of Majorca.

VALOBRA, SANSONE (SAMSON), scientist and inventor, d. Naples, Italy, 1883. A student of chemistry and physics, Valobra, in the early part of the 19th cent., devised the method of dipping small, thin pieces of wood into phosphorus for the purpose of striking fire. Together with a brother, Valobra was a member of the Italian revolutionary organization Risorgimento (Resurrection, Revival) which sought to achieve political unity and independence in his native Italy in the early 19th cent. Valobra was imprisoned for his political activities and for his mysterious and misunderstood labors in his small laboratory, but was saved from a possible death sentence through the intervention of Pope Leo XII and the Spanish Ambassador to Italy.

He then took refuge among his fellow Jews of Forli, then went to Lucca for a short period, and finally settled in Naples, where, ceasing all his former revolutionary and political work, he opened a modest factory for the manufacture of matches in a small villa situated under the Chiala bridge. He sought a patent for his invention, but was unsuccessful due to the fact that he was a Jew. This latter circumstance also led to the placing of many obstacles in his way by the Italian authorities.

However, in 1831 the Italian government officially recognized him as the inventor of matches and acknowledged the importance of this invention; thereafter the government assumed control of the entire process of manufacturing matches. In February, 1931, the community of Florence, Italy, celebrated the centennial of his recognition by the Italian government.

While the *Encyclopaedia Britannica* and other encyclopedias generally ascribe the invention of matches to other persons, such as Chancel (1805), of Paris, John Walker (1827), of Stockton on Tees, England (the so-called "Congreves" sulphur-tipped matches), S. Jones (1830), of London, and J. Preschel (1833), of Vienna, and not to Valobra, the fact seems to be that Valobra was not generally credited with the invention because, as a Jew, he was unable to secure a patent on it. ABRAHAM I. SHINEDLING.

VÁMBÉRY, ARMINIUS, traveler and orientalist, b. Dunaszerdahely, near Pressburg (Pozsony), Hungary, 1832; d. Budapest, 1913.

He was born of Orthodox Jewish parents; the name of the family was Wamberger, originally Bamberger. He lost his father at an early age; his mother remarried and, living in great poverty, destined her son, who was lame, for the trade of dressmaker. With the initial aid of some friends, but mainly through his own efforts at sustaining himself, the boy got through six grades of the Gymnasium during the difficult and unsettled time of the revolution of 1848, but when he was in the next to the last grade, money failed him and he went to Slavonia as a tutor.

His genius turned ill fortune to advantage; it was in Slavonia that he began to study Turkish, after he had acquired proficiency in half a dozen other languages, modern and ancient. His next subject of study was Arabic. At that time his imagination was stirred by a project which had been attempted before by some patriotic Magyar scholars, the exploration of the ancient homeland of the Magyars in Asia. In March, 1857, meagerly equipped with funds, he set out on a Danubian steamer and got as far as Constantinople. There he acquired the knowledge of several Turkish dialects and published a dictionary of the Turkish and German languages. He became a secretary of Fuad Pasha and, for all practical purposes, a Moslem.

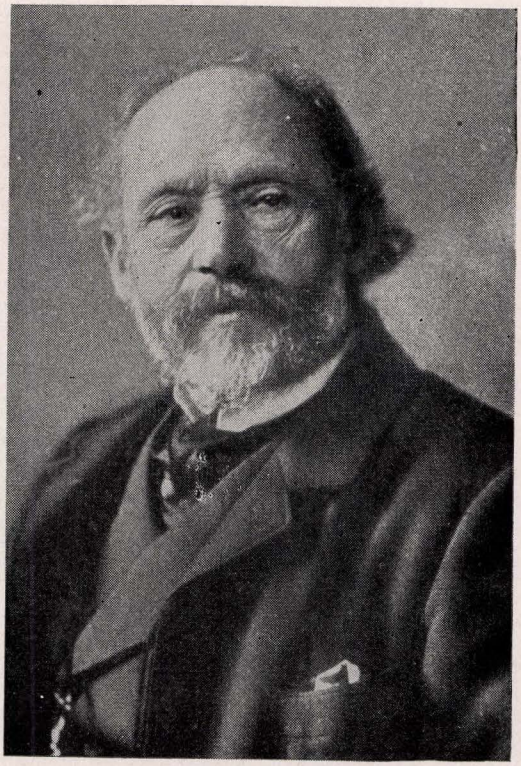
In 1861 the Hungarian Academy, through a grant of 1,000 gulden ($400), sponsored his journey to Cen-

tral Asia. Under the name of Reshid Effendi and in the guise of a dervish Vámbéry traveled with Moslem pilgrims across Turkestan, Persia, Khiva and Bokhara, under hardships rarely sustained by a European before, and braving the risk of being detected and put to death by the offended Moslems. In 1864 he returned to Budapest. In Persia he had established relations with the British Legation. The information, cultural, linguistic and political, which he had gathered about the countries of Central Asia gave him access to the scholarly, social and diplomatic world of Great Britain. He was feted in London for his fabulous exploits.

On his return to Budapest the university appointed him professor of Oriental languages. Vámbéry, who had become an adherent of the Protestant faith, taught until 1905. Among his pupils were Ignác Goldziher and Ignác Kunos. Throughout the decades of his scholarly career he remained an authority on the English and Russian spheres of interest in Central Asia, and Great Britain's adviser on her Indian policy. He stanchly opposed Russian expansion in Central Asia.

On several occasions he carried out diplomatic missions for Great Britain in the Near East. He became a personal friend of the Prince of Wales, later King Edward VII. Sultan Abdul Hamid consulted him on problems of foreign policy, and Theodor Herzl enlisted Vámbéry's aid in his negotiations with the sultan. After Herzl's death David Wolffsohn continued to consult Vámbéry on Zionist political aspirations.

The numerous books published by Vámbéry include: *Abuska* (a dictionary of Jagatai-Turkish; 1861); *Wanderings and Adventures in Persia* (1867); *Sketches of Central Asia* (1868); *History of Bokhara* (1873); *Der Islam im XIX. Jahrhundert* (1875); *Etymologisches Wörterbuch der turko-tatarischen Sprachen* (1878); *Primitive Civilization of the Turko-Tatar Peoples* (1879); *Origin of the Magyars* (1882); *Western Culture in Eastern Lands* (1906).



Lit.: Vámbéry, Arminius, *Vámbéry, His Life and Adventures Written by Himself* (1885); idem, *My Struggles* (1904).

VÁMBÉRY, RUSTEM, jurist, sociologist and political writer, b. Budapest, 1872. The son of Arminius Vámbéry and of Cornelia Arányi (who was a niece of the violinist Joseph Joachim), he was educated in the Protestant faith. After finishing his studies in law at the Universities of Budapest, Halle and Geneva, he was appointed an associate judge of the Hungarian tribunal. In the codification department of the ministry of justice he collaborated on drafting laws on criminal procedure, juvenile courts, the modification of the Hungarian penal code and the rehabilitation of prisoners. In 1906 he was named public prosecutor, and in 1913 a judge of the court of appeals.

From 1902 on Vámbéry lectured on criminal law at the University of Budapest; he became associate professor (1916) and professor of criminology (1918). The republican government of Count Michael Károlyi appointed him dean of the law school, but the counterrevolutionary government suspended him in 1920. The respective decision never became definitive, and Vámbéry's appeal against suspension was kept in abeyance. From 1921 on he devoted himself to the practice of law.

Vámbéry inherited from his father a strong feeling against injustice and exploitation of any kind. As a criminologist he was not satisfied with the legalistic side of his studies, but always drew attention to the underlying social and economic causes of crime. His influence as a theorist, educator and codifier was notable.

Vámbéry participated in the founding of the Sociological Society of Budapest, a group of Hungarian Fabians. In many essays and articles he attacked the sources of human servitude, the ignorance of the many

Arminius Vámbéry

and the entrenched privileges of the few, especially glaring in Hungary, one of the last bulwarks of European feudalism. He also assisted in the organizing of the Hungarian Radical Bourgeois Party. After the collapse of the Habsburg monarchy he became a leading member of the Hungarian National Council, which tried to secure democratic reforms, especially the expropriation of the feudal estates and peace with the national minorities on the basis of confederation.

In the era of white terror, which was inaugurated under Admiral Nicholas Horthy, Vámbéry defended, before counterrevolutionary tribunals, the victims of reactionary persecution. As a member and for some time vice-president of the Kossuth party, he tried to continue the liberal traditions of Hungary. At the same time, he assailed the worst abuses of the system. His attitude was so fearless and his irony so mordant that some observers called him the "Hungarian Voltaire."

From 1921 to 1924 Vámbéry acted as honorary adviser to the British Legation at Budapest. Due to his father's important role in British diplomacy, he had many international contacts, by which he profited to become a sort of ambassador of the oppressed people of Hungary. He was consultant of the British Labor Delegation on White Terror in Hungary, headed by Josiah C. (subsequently Lord) Wedgwood. In 1924 he led a delegation of Hungarian liberals and Socialists to the British labor government. He addressed committee meetings of the British House of Commons in 1924 and 1927, and in 1929 delivered a lecture before the Royal Society of International Affairs. His opinions concerning the problems of Central Europe, propounded before political societies and meetings, and in the columns of newspapers in Hungary, Austria, Czechoslovakia and England, were highly appraised among liberals and Socialists. In opposition to the irredentist policy of the Horthy system, Vámbéry tried

to establish understanding with neighboring states.

In spite of insults and threats of every kind from his enemies, Vámbéry remained at his post until the summer of 1938, when the Nazification of Hungary compelled him to leave his country. He came to the United States, where he continued to teach and write.

From 1939 on he lectured on criminology at the New School for Social Research, in New York city. He participated in the organizing of the American Federation of Democratic Hungarians at Cleveland in 1941. As chairman of the Free Hungary Movement, which was organized at New York city in 1942, he associated himself with a group advocating a democratic Hungary willing to cooperate with its neighbors and rejecting open or veiled collaboration with Horthy or the Habsburgs. OSCAR JÁSZI.

VAN BUREN, MARTIN, eighth president (1837-41) of the United States, b. Kinderhook, N. Y., 1782; d. Kinderhook, 1862. Early in his term of office Van Buren had appointed Leon Dyer (1807-83), later famous as an American soldier, special envoy to Prussia. However, his chief contact as president with American Jewry was in 1840, when the Jews of Damascus, Syria, were falsely accused of the ritual murder of the Capuchin monk Father Thomas, superior of the Franciscan monastery there, and of his servant (the Damascus Affair). On August 17, 1840, Secretary of State John Forsyth, in a letter to David Porter, United States Minister to Turkey, expressed the president's horror at the accusation made against and at the cruelties imposed upon the Jews of Damascus and Rhodes, and asked the Minister to appeal to the Turkish Sultan to prevent or mitigate them.

A few days later Van Buren, through Forsyth, instructed John Gliddon, American consul at Alexandria, to intervene in behalf of the persecuted Jews of the Ottoman dominions, and expressed his horror at the cruelties imposed upon the accused Jews and at the fact that such unnatural practices as the blood accusation could still, in that advanced age, be alleged against religious persons (the Jews). He issued similar instructions to the American chargé d'affaires at Constantinople.

Lit.: Harvey, Milton, "Martin Van Buren and the Damascus Affair," *Jewish Tribune,* April 22, 1927, pp. 3, 13; Slomovitz, Philip, "Recalling the Damascus Affair," *American Hebrew,* Jan. 2, 1931, pp. 203, 238; *Publications of the American Jewish Historical Society,* No. 8 (1900) 141-45; No. 10 (1902) 124.

VAN DEN BERGH, Dutch Jewish family of industrialists, some of whom became known also as public servants and philanthropists.

SIMON VAN DEN BERGH (b. Rotterdam, Holland, 1819; d. Rotterdam, 1906) founded (1870) a margarine manufactory at Oss, Holland, whose central office was removed (1891) to Rotterdam. The Van Den Bergh margarine firm became one of the largest in Europe. Two sons of Simon Van Den Bergh went to England, and there established a branch of the family firm, named Van Den Bergh Limited. Another branch of the firm was established in Germany when the German tariff hindered the export of margarine to Germany. Subsequently the firm of Van Den Bergh Limited was organized as a trust whose Dutch branch was named Margarine Unie.

HENRY VAN DEN BERGH (b. Oss, Holland, 1851; d. London 1937), a son of Simon Van Den Bergh, succeeded his father as chairman of Van Den Bergh Limited, and directed the British branch of the trust. He was not only a successful businessman, but also took an active interest in art and philanthropic work. He was especially devoted to the study of ancient Peruvian civilization, and published a book which dealt with the Incas and their industries, and presented valuable gifts to British and Dutch museums, especially collections of Peruvian and Persian potteries, Indian coins and Dutch tiles. He was president of the Netherlands Benevolent Society, and a corresponding member of the Archaeological Society of France. He directed also the British Widow's Assurance Company, and promoted various Dutch industrial enterprises.

DONALD STANLEY VAN DEN BERGH (b. London, 1888), the son of Henry Van Den Bergh, shared his father's commercial and philanthropic interests, but was active also in Jewish communal work and in British politics. He served with distinction in the first World War, and later became honorary colonel of the 53rd Anti-Aircraft Regiment and Public Relations Officer for Middlesex and Hertshire. He succeeded his father as president of the Netherlands Benevolent Society, and was president of both the Home for Aged Jews and the Fulham, Maccabean and Polack Branches of the British Legion. Furthermore, he was president of the East Fulham Conservative Association.

SAMUEL VAN DEN BERGH (b. Oss, Holland, 1864; d. Nice, France, 1941), a younger brother of Henry Van Den Bergh, became a director of Van Den Bergh Limited in 1881, and later he was the head of Margarine Unie until 1919. For half a century he was a conspicuous figure in Dutch political life, being from 1897 to 1905 a member of the city council of Rotterdam, from 1905 to 1907 a member of the Second Chamber of Holland, and then a senator. He championed Jewish interests, and was highly respected by both his coreligionists and by non-Jews of Holland, including most of his political adversaries. Queen Wilhelmina of Holland recognized his public work on several occasions. Although he was not a member of the Zionist Movement as a party, he was a liberal supporter of the reconstruction of Palestine, a member of the Netherlands council of the Palestine Foundation Fund, and the Netherlands representative of the Jewish Agency.

ALBERT VAN DEN BERGH (b. London, 1875), a son of Jacob Van Den Bergh and a nephew of the brothers Henry and Samuel Van Den Bergh, was chairman of Van Den Bergh and Jurgens Limited, and managing director of Van Den Bergh's Fabrieken, thus heading the Dutch and British branches of the family trust. He was vice-president of the Jewish National Trust, and director of the managing committee of the Royal Sea Bathing Hospital, Margate. HUGO BIEBER.

VAN DRUTEN, JOHN WILLIAM, author, b. London, 1901. His father was of Dutch Jewish origin, while his mother was English. He received the LL.B. degree from the University of London (1922), practised law and was appointed lecturer at law at Aberystwyth University, in Wales (1923-26). During the years of his lectureship he wrote his first famous play, *Young Woodley,* a drama about schoolmasters. Banned by the censor in England for two years, it was first produced in New York city, translated into a number of languages, and staged in nearly all of the capitals of Europe.

Although only partly of Jewish descent and not reared as a Jew, he took great interest in Jewish affairs. Van Druten wrote the preface to G. B. Stern's novel *The Matriarch,* and lectured before Jewish organizations in the United States (1926). His plays center around ordinary people, and Van Druten was called the "dramatist of the middle classes."

Elias Van Praag

Among his plays were: *The Return of the Soldier* (adapted from Rebecca West's novel; 1928); *Diversion* (1928); *After All* (1929); *London Wall* (1931); *There's Always Juliet* (1931); *Hollywood Holiday* (with Benn W. Levy; 1931); *Somebody Knows* (1932); *Behold, We Live* (1932); *The Distaff Side* (1933); *Flowers of the Forest* (1934); *Most of the Game* (1935); *Gertie Maude* (1937); *Leave Her to Heaven* (1939); *Old Acquaintance* (1939). He wrote the novels *Young Woodley* (after the play; 1929); *A Woman on Her Way* (1930); *And Then You Wish* (1936); and his autobiography, *The Way to the Present* (1938).

Lit.: American Hebrew, May 10, 1935, p. 532; *Twentieth Century Authors* (1942) 1444-45.

VAN PAASSEN, PIERRE, non-Jewish author, lecturer and foreign correspondent, b. Gorinchem, Holland, 1895. His family included a long line of Protestant clergymen on both sides. In 1914 he and his family migrated to Canada. After serving in the Canadian Army in the first World War, he entered journalism, being successively a reporter, editorial writer, columnist and foreign correspondent. In 1939 he settled in the United States. He is the author of *Days Of Our Years, The Time Is Now* and *That Day Alone,* all dealing with contemporary events.

Van Paassen's interest in the Jews dates from the time when he was with the Atlanta *Constitution,* in which his editorials on Zionism attracted national attention. Since that time he took an active interest in Jewish affairs. He frequently visited Jewish communities in Eastern Europe and Palestine, and wrote with passionate indignation against injustices to the Jewish people. He covered the Arab riots in Palestine in 1929, and risked his life in the cause of the Jewish settlers. In a memorable interview he confronted the Grand Mufti of Jerusalem, Haj Amin al-Husseini, charging him with guilt in instigating the riots, and he took up the case of Palestine Jewry directly with Acting High Commissioner H. C. Luke. His articles on the 1929 Arab riots brought to the rest of the world an understanding of true conditions in Palestine. His chapter on Palestine in *Days of Our Years,* entitled "After Seven Centuries," is regarded as one of the most significant and lucid accounts of the Jewish homeland.

Van Paassen was made an honorary citizen of Tel-Aviv. In 1934 a poll of Jewish editors in the United States and Canada voted him one of the greatest Christian friends of the Jewish people.

In 1942 he accepted the national chairmanship of the Committee for a Jewish Army of Stateless and Palestinian Jews, which proclaimed the right of these Jews "to fight under their own banner and join in the battle for the Four Freedoms everywhere in the world." With tireless energy and devotion he gathered around him an impressive group of American leaders and made this committee the outstanding non-sectarian body ever assembled for a Jewish cause. In January, 1943, he resigned from the chairmanship of the Committee. He was co-editor, with James Waterman Wise, of *Nazism: An Assault on Civilization* (1934).

Van Paassen was a student of Hebrew and keenly interested in every political and cultural aspect of Jewish life. Among his intimate friends were Theodor Herzl's son Hans and the Hebrew writer Reuben Brainin. From the 1920's on he attended every Zionist World Congress. JOSEPH BRAININ.

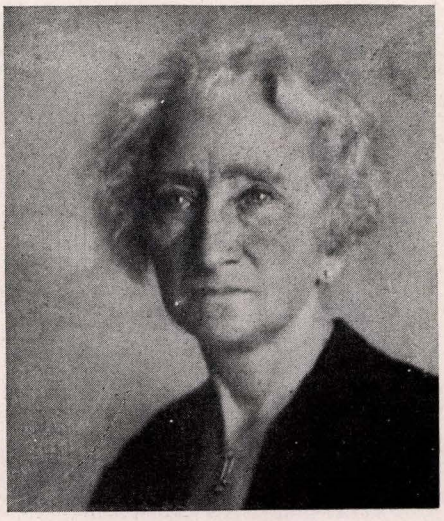
Lit.: Current Biography (1942) 77-80; *American Hebrew,* Nov. 20, 1931, p. 16; *Twentieth Century Authors* (1942) 1448-49.

VAN PRAAG, ELIAS, actor and editor, b. Amsterdam, Holland, 1884. He studied medicine at the University of Amsterdam, but decided on a theatrical career and became a pupil of the Theatrical School of Amsterdam, from which he graduated in 1907. Immediately afterward he became a member of the Nederlandsche Tooneel Vereeniging (Dutch Theatrical Guild), with which he stayed for five years. After playing with several other companies and acting as co-director of the Nieuw Nederlandsch Tooneel (New Netherlands Theater) he joined the "modern" group Het Masker (The Mask) for the season 1936 to 1937. Finally he joined the Social-Democratic Broadcasting Company, the Vara.

Van Praag was the editor of the most important stage publication in the Netherlands, *Ons Tooneel,* and also a teacher at the Theatrical School of Amsterdam. At one time he was president of the Dutch Artists' League, and later was secretary of that League. He contributed many articles on stage affairs to technical papers and the daily press; predominant among these contributions are his articles in the Amsterdam daily *De Telegraaf,* published under a pseudonym.

In the course of his artistic career Van Praag played in many foreign countries. Outstanding among his foreign appearances was his tour with the Nederlandsche Tooneel Vereeniging to Berlin in 1907, during which all the more important plays of Herman Heijermann were presented. Van Praag also played in several German and French films.

Until the German invasion of The Netherlands Van Praag lived in Amsterdam; his subsequent whereabouts are unknown. J. W. F. STOPPELMAN.



VAN PRAAG, SIEGFRIED EMANUEL, writer, b. Amsterdam, Holland, 1899. He received his education in the schools of Amsterdam where, after attending the usual schools, he studied for his diploma as a teacher of French, which he obtained in 1923. After a short interval, during which he worked in an Amsterdam banking concern, he became a teacher at the secondary school at Purmerend, a small town near Amsterdam, where he stayed for a year and a half.

After 1925 Van Praag devoted himself entirely to writing, and soon became one of the most promising and best-known authors of the younger generation. He published many novels, several of them biographical (*La Judith, Julie de Lespinasse, Madame de Pompa-*

dour). Some of the best-known of his other novels are: *De Weegschaal* (The Weighing Scales); *Sam Levita's Levendans* (Sam Levita's Dance of Life); *Cabaret der Plaatsvervangers* (Cabaret of Substitutes); *Marie Nunes; Een man van Aanzien* (Man of Means). The last-named was awarded the yearly medal of the Dutch Literary Guild in 1932. Another excellent novel is *De Dolle Maagd* (The Crazy Virgin).

Among his many studies the following are prominent: *De West-Joden en hun letterkunde sinds 1860* (The Western Jews and Their Literature since 1860; 1926); *Het Ghetto* (The Ghetto; 1930); *Wereldburgers* (Cosmopolitans; 1933); *Een Sprookje Op Aarde* (A Fairy Tale on Earth); *Wij en de Dieren* (We and the Animals; 1932).

In addition, Van Praag wrote many essays, and throughout the development of his literary career never failed to come up to the high expectations of his readers. He was living in Amsterdam when the Nazis invaded Holland; in 1943 nothing had yet been heard of him. J. W. F. STOPPELMAN.

Esther de Boer Van Rijk

VAN RIJK, ESTHER DE BOER, actress, b. Amsterdam, Holland, 1853; d. 1937. She married a musician, Henri de Boer, in 1881. At a very early age her great gifts for and love of the stage were observed. When she was fourteen years old she played her first part on the amateur stage, and was awarded a silver medal by a jury of three famous Dutch actors.

Her parents intended her to become a milliner, but chiefly through the interest shown in her gifts by Catharina Beersmans she appeared on the legitimate stage when she was twenty years old, playing the part of Laura in *Emma Berthold,* by Cremer. During the next seven years she played with several theatrical companies, but in 1880 she acted at the Imperial Theater and Drury Lane Theater in London—a great distinction for so young an actress of foreign nationality.

She was a co-founder of the Nederlandsche Tooneel Vereeniging (1893) and, with other members of this League, presented several of Ibsen's plays. She also brought before the footlights plays of the famous 17th cent. Netherlander, Bredero (*Spaansche Brabander*), and played an important part in *The Weavers,* by Hauptmann.

In 1895 Esther van Rijk played in Berlin—and three years later began the period of her life in which she was to experience her greatest triumphs. A new playwright had appeared by the name of Herman Heijermans. The première of his first play, *Ghetto,* took place on December 24, 1898, and in almost every season following Heijermans offered a new play in which invariably there was a part reserved for Esther van Rijk. In 1900 came the première of Heijermans' *Op Hoop van Zegen* (The Good Hope), in which the part of an old, subdued seaman's wife was played by the actress. In this presentation she used all her unique powers of expression and subtle shadings of sentiment. Not only did the play become a great success, but Esther van Rijk's name was inextricably associated with it. No other actress ever tried, with any semblance of success, to play the part of Kniertje. It became Esther van Rijk's very own and in the course of her long career she played it hundreds of times, always retaining the same fine emotional qualities.

In 1935, at the age of eighty-two, she played the same part in the only sound film ever made of a Heijermans' play, and this without losing any of the finesse of her impersonation. In 1908 several of Heijermans' most successful plays were staged in Berlin, with Esther van Rijk taking the leading feminine roles. On November 15, 1912, when she gave her four hundredth performance of Kniertje, she was presented with a portrait of herself in that part, painted by the well-known Amsterdam artist Eduard Frankfort. This canvas was shortly afterwards placed in the Rijksmuseum of Amsterdam. In 1923 it was transferred to the Municipal Theater and given a place of honor in the lobby.

In the course of her career Esther van Rijk played with several theatrical companies. Her appearance always ensured success, even though the plays presented were at times of only mediocre quality. She possessed a very strong constitution, enabling her—at an advanced age—to participate in sports rather too rigorous for the average elderly woman. At seventy she obtained her swimming diploma, and at seventy-one traveled with her own theatrical company to Paris, to play her part in *The Good Hope* with outstanding success.

Almost to her last day the actress appeared on the stage. Toward the end of her life she was repeatedly decorated. In 1923, at her golden jubilee, the city of Amsterdam presented her with a silver medal of distinction. On October 24, 1928, she was made a Knight in the Order of Orange Nassau, followed by a similar Belgian distinction (Knight in the Crown Order of Belgium) in 1929. To commemo-

Siegfried Emanuel Van Praag

rate the sixtieth anniversary of her career she enacted the leading part in the play *Levensavond* (Life's Evening), by Jaap van der Poll (1933). At that time she started to write her memoirs, which were published in 1934 under the title *Ik Kijk Terug* (I Look Back). This book is a well-written account of her adventurous and productive life. Finally, in 1936, with the zest and enterprise that had marked her entire life, she decided upon a trip to Palestine, and on her return organized anew a theatrical company of her own, with which she prepared to make another tour.

Death came to her on September 7, 1937, when she was eighty-four years old. It ended the life of a truly great artist who must be counted among the best actresses The Netherlands ever possessed. J. W. F. STOPPELMAN.

VANCE, ZEBULON BAIRD, philo-Semite, b. Reems Creek, near Asheville, N. C., 1830; d. Washington, D. C., 1894. He served as Congressman from 1856 to 1860, was in the Confederate army in 1861 and 1862, and was governor of North Carolina from 1862 to 1866 and from 1876 to 1878. From 1879 to his death he was a member of the United States Senate.

Vance wrote a lecture on the Jews, "The Scattered Nations," which he delivered hundreds of times in an effort to dispel prejudice against the Jew. In this he said: "The Jew is without doubt the most remarkable man of this world—past or present. . . . His history is the history of our civilization and progress in this world, and our faith and hope in that which is to come. . . . Though dead as a nation—as we speak of nations—yet they live. Their ideas fill the world and move the wheels of its progress."

In 1926 the Central Conference of American Rabbis, meeting at Asheville, placed a wreath on Vance's grave there.

VANCOUVER, the largest city in the province of British Columbia, and the third largest city in Canada, situated on Burrard Inlet on the Pacific coast of Canada. It was founded in 1885 as the western terminus of the Canadian Pacific Railway. The population of Greater Vancouver, including its surrounding suburbs, was 308,340 in 1931, of which the Jewish population was 2,458, forming 0.79% of the total population. The Jewish population is the seventh largest non-Anglo-Saxon group in Vancouver, being exceeded by the Chinese (5.2%), Scandinavian (3.4%), Japanese (3.3%), French (1.8%), German (1.7%) and Italian (1.3%).

Jews were closely connected with Vancouver from its very earliest history, and played a prominent part in its incorporation and development. David Oppenheimer and his brothers Isaac, Godfrey and Charles, who had originally settled in California, and had come to Vancouver Island in 1856, subsequently transferred their activities to the mainland and took a leading part in the development of the Cariboo and Yale districts. The Oppenheimers established the first wholesale grocery business in Vancouver in 1885 and built the first brick building in the city.

The Jewish population of Vancouver increased from 85 in 1891 to 205 in 1901, jumped to 982 in 1911, and increased steadily thereafter to 2,458 in 1931.

Jews engaged in merchandising formed 47.2% of all Jews gainfully occupied in Vancouver in 1931, as compared with 13.1% of Vancouver residents of all origins gainfully occupied, while Jews engaged in industry formed 18.0% of all Jews gainfully occupied in Vancouver, as compared with 11.4% of the gainfully occupied of all origins.

The oldest Jewish congregation in Vancouver is Congregation Beth El, which was founded as an Orthodox congregation in 1887 and wavered from time to time between the semi-Reform and Conservative forms of service. The first synagogue building erected in Vancouver was that of the Orthodox Congregation Sons of Israel in 1905, which gave place to Congregation Shaarey Zedek, whose synagogue was erected in 1918.

The Vancouver Jewish Administrative Council, which was founded in 1932, developed out of the Jewish Community Chest, which first began its activities in 1924. It administers the Jewish Community Centre, which is housed in a modern building, and the Jewish Family Welfare Bureau, and conducts two annual fund-raising campaigns, one for local Jewish institutions and one for external Jewish welfare work.

The Vancouver Talmud Torah was founded in 1917, and conducts supplementary week-day classes in Hebrew, Jewish history and religion after public school hours. There were also, in 1943, an active Zionist Council and Hadassah, Poale Zion, Mizrachi, Pioneer Women and Young Judea.

Vancouver also had a B'nai B'rith lodge, with its Women's Auxiliary and A.Z.A. chapter, a branch of the National Council of Jewish Women and National Council of Jewish Juniors, and the Vancouver Hebrew Free Loan Association. There were a branch of the Canadian Jewish Congress in Vancouver, with which were affiliated the Vancouver Jewish Refugee Committee which did excellent work in assisting Jewish refugees who arrived in Canada across the Pacific, and the British Columbia Jewish War Efforts Committee.

Jews took an active part in the civic life of Vancouver. David and Isaac Oppenheimer were elected aldermen of the Vancouver city council in 1886, and David Oppenheimer was elected the mayor of Vancouver in 1888, holding that office until 1891. A statue was erected in his memory by the city of Vancouver in Stanley Park. David Oppenheimer was also elected president of the Vancouver Board of Trade. Samuel Gintzburger, who came to Vancouver in 1887, and was engaged in the Indian trade, in the seal fisheries trade and in mining, was Swiss consul in Vancouver for many years. Samuel Schultz was appointed judge of the Vancouver County Court in 1914, and held that office until his death, the only Jew in Canada up to 1943 to be elevated to that rank.

VARGA, EVGENII (JENŐ), economist, b. Hungary, 1897. He started as a worker, but succeeded in graduating from the Gymnasium and University of Budapest, where he received the diploma of a secondary school teacher. He specialized in political economy and collaborated on the daily newspapers *Népszava* (People's Voice), on *Neue Zeit* and on the review *Szocializmus,* of which he was also editor for a short while. Under the Hungarian Soviets (1919) he was people's commissar of finance. After the fall of the Communist government he emigrated to Austria where he wrote a book summing up the experiences in economy of the Hungarian Soviet republic. It was published in Moscow under the title *Problemy ekonomicheskoi politiki pri proletarskoi diktature* (Problems of Economic Policy and the Dictatorship of the Proletariat; 1922).

In 1920 Varga went to the Soviet Union. There he became doctor of economic sciences, subsequently professor and director of the institute on world economy of the Academy of Sciences. He was editor of *Ezhegodniki Kominterna* (Comintern Annuals), and of various collective works, such as *Agrarnoe dvizhenie v kapitalisticheskich stranakh* (Agrarian Movement in Capitalistic Countries; 1925). He also contributed quarterly surveys of economy to the Comintern periodical *Internationale Presse-Korrespondenz,* published in the German language.

Zseni Várnai. From a sketch by Jenö Horváth

In 1943 he was a member of the Academy of Sciences of the Soviet Union and editor of *Mirovoe khoziaistvo i mirovaia politika* (World Economy and Politics), a journal published by the research institute on world economics and politics of the Academy.

In addition to many authoritative articles written for the periodical press, Varga published in book form *Mirovoe khoziaistvo* (World Economy; 1922); *Krizis mirovogo kapitalisticheskogo khoziaistva* (Crisis of World Capitalist Economy; 1923); *Pod'em ili upadok kapitalizma* (Rise or Fall of Capitalism; 1924).

VÁRNAI, ZSENI, poetess, b. Nagyvázsony, Hungary, 1881. She married the poet Andor Peterdi, and became known through a volume, *Katonafiamnak* (To My Son, the Soldier), published in 1914. Motherhood remained the master theme of the volumes *Gracchusok anyja* (Mother of the Gracchi; 1916) and *Anyasziv* (A Mother's Heart; 1917). Her thoughts, during those years, were greatly influenced by socialism, which opposed the war. In 1918 her poem, "Ne lőjj fiam, mert én is ott leszek!", a mother's appeal to her soldier son to disobey the order to fire upon civilians, became popular among the war-weary and discontented. She voiced her enthusiasm for the revolution in the volume *Vörös tavasz* (Red Spring; 1917).

In later years her tone became more reflective, and she concerned herself with the subtler problems of the mother-son relationship. Her volumes *Im, itt az irás* (This Is the Scripture; 1928) and *Kórus szopránban* (Soprano Choir; 1931) gave her high rank among Hungarian poets. In 1943 she was believed to be living at Budapest.

VARNHAGEN VON ENSE, RAHEL (after her conversion Antonie Friederike; better known under her maiden name of Rahel Levin), social leader, b. Berlin, 1771; d. Berlin, 1833. Although lacking any real creative talents, Rahel was considered as the "wittiest woman of her time." She had the courage to express certain radical ideas on women's rights and children's education that were still controversial as late as the 20th cent. Furthermore, she had the gift of appreciating the geniuses among her contemporaries.

At a time when everybody around her paid tribute to such a mediocre writer as Kotzebue, she was an enthusiastic admirer of Goethe. Her famous salons became "a republic of vanguard spirits gathering in the home of an unassuming bourgeois girl." In her first salon, which aroused the curiosity of all transient foreigners, there met (before the fall of old Prussia) Henriette Herz and the philosopher Schleiermacher; the old prince de Ligne and the young romantic poet, Friedrich von Schlegel, also belonged to it. Among her trusted friends was the unfortunate Prince Louis Ferdinand, who sought death in the battle of Saalfeld.

In 1819, after her marriage to the diplomat and writer Karl August Varnhagen von Ense, there flourished in her house in the Mauerstrasse, Berlin, her second salon, of essentially different character. Here politics were in the foreground; Eduard Gans, Karl Ludwig Börne and particularly Heinrich Heine admired in Rahel the forerunner of "Young Germany."

Rahel, who was well aware of her limitations, never wrote a book; only after her death did her enthusiastic pupil and spouse, Varnhagen von Ense, publish, "at the right time, at the comfortingly right time," as Heine wrote, the collection in three volumes of her letters, which he entitled *Buch des Andenkens*. Later more collections of her correspondence were published, among them her correspondence with David Veit.

Rahel Levin was a typical representative of the post-Mendelssohnian generation, which regarded Judaism as a misfortune. In her youth she felt that her Jewish birth was like a "poniard that had been thrust into her heart;" before marrying Varnhagen she became a convert to Christianity. But in the years after the War of Liberation (1813-15) her feeling for the Jewish people was aroused by the anti-Semitic riots. In her last illness she confessed that she, for whom being a Jewess had been her bitterest sorrow, would, at this stage of her life, not for any price wish not to be Jewish.

VARRO, MARCUS TERENTIUS, *see* ROMAN WRITERS ON JEWS.

VASHTI, queen of Ahasuerus who refused to come to the latter's banquet and who for her disobedience was divorced (*Esther* 1). Her name has been connected with the Elamite goddess Mashti.

According to rabbinical sources, Vashti was the granddaughter of Belshazzar, the last king of Babylon. She was arrogant and severe, forcing Jewish maidens to work on the Sabbath. When Ahasuerus invited her to appear naked at his banquet, she would have consented, had not God punished her with a disfiguring eruption of the skin; accordingly, she declined the invitation in insulting words.

VAZ DIAS, Dutch Jewish family of Marrano descent. The first Vaz Dias appears in the Amsterdam archives of 1760. One of the family married a female descendant of Joseph de la Penha of Rotterdam, who saved William of Orange, later King William III of England, from drowning and was therefore awarded

the concession of the territory of Labrador after William became king.

MOZES SALOMON VAZ DIAS (b. Amsterdam, Holland, 1881) took a leading part in the technical and cultural development of the Dutch press by founding (1904) the Pers Bureau Vaz Dias, a news agency which in 1934 was reorganized into a cooperative news-gathering organization, remaining under the direction of Vaz Dias until the Nazi invasion. The Persbureau Vaz Dias, covering all branches of domestic and foreign news, became an influential factor in the formation of public opinion in Holland. All Dutch newspapers, without any exception, subscribed to its services. It claimed to be the first news-gathering organization to use the radio-telephone for the transmission of its services to newspapers. The Nazi radio was still trying in vain, as late as 1942, to divert Dutch readers of newspapers from their allegiance to the former Persbureau by means of invectives broadcast against Vaz Dias. Vaz Dias owned and directed other press services; he was in particular co-owner and co-editor of the Nederlandsch Correspondentie Bureau, which dealt solely with semi-official news, such as communiqués from the royal court, the supreme court, and the government and its agencies. He was consul of Venezuela at Amsterdam and Knight of the Order of Orange-Nassau, and received several foreign decorations.

S. L. FRED VAZ DIAS (b. Amsterdam, 1910), the son of Mozes Salomon Vaz Dias, was, from 1934 to 1940, legal counsel to the board of directors of the Persbureau Vaz Dias. He was also (1938-40) publisher of *Malaria Monthly*, a publication devoted to combatting malaria and written in the languages of the countries where this disease is prevalent. After the German invasion of his native country he settled in New York city.

VÁZSONYI, JENŐ, railway engineer, b. Csabrendek, Hungary, 1864. He was an elder brother of Vilmos Vázsonyi. Having received the training of a mechanical engineer, he entered service in the Hungarian state railways. During the first World War he was in charge of transportation by rail and of coal supplies, and in recognition of effective service was made a councillor of the court. In 1918 he became president of the state railways, but was removed from this post by the communist government in 1919.

Vázsonyi published several books and reviews concerned with hygiene and accident prevention in machine shops. He was editor of various periodical publications for railway mechanics.

In his youth Vázsonyi participated with his brother in a movement of young Jewish intellectuals which resulted in the recognition of the Jewish faith as one of the religions of the state on a par with Christian denominations. In 1936 the Jewish community of Pest appointed him an honorary member of its assembly.

VÁZSONYI, VILMOS, Hungarian political leader and minister, b. Sümeg, Hungary, 1868; d. Baden, near Vienna, 1926. He came from cultured Jewish stock, the profession of teaching having been hereditary in the family. He attended school at Budapest, where his parents lived in very humble circumstances. While attending the law school of the University of Budapest, young Vázsonyi became the leader of the students in their spectacular demonstrations against the submerging of the Magyar nationality in the common Austro-Hungarian army. This activity won him a certain fame in politics which, as a rule, did not readily recognize Jewish merit. The young leader, however, was soon undeceived as to the real value of this melodramatic revolt against "Austrian oppression."

Vilmos Vázsonyi. Photograph by courtesy of the Woodstock Library, New York

He came to realize what Disraeli had discovered before him, that within each nation there are the two nations of those who possess and those who do not possess. Toward the end of the 19th cent., when Socialism had taken under its wings the industrial worker as well as the tiller of the soil, Vázsonyi discovered the petty bourgeois who had been forgotten by all types of Socialism. As a student, he founded the Club of Junior Democrats; after his admission to the bar he organized the Democratic Party of Budapest, of which he was lifelong president, and later in his life he founded a newspaper, *A Polgár* (The Citizen). These creations of his are the landmarks of his political program and of his life's work. In writing and with the unusual fire of his oratory, by ceaseless agitation, he championed and made victorious the cause of the petty bourgeois.

In 1894 he was elected to the municipal assembly of Budapest. Under the slogans of "free trade" and "liberalism" graft was rife in the nation and in the capital. The little man was unable to grasp why the city budget was passive and funds for the most necessary expenditures lacking when private enterprise was flourishing. Glorying in the social and economic rise of the big bourgeoisie, the petty bourgeois cast his political vote with it, but he failed to understand why from all this splendor he could not eke out a miserable living for himself. Vázsonyi, as a member of the assembly, assisted Mayor István Bárczy in defeating the corrupt majority. Transportation and other public utilities were converted from private ownership into city management, and the finances of the city were placed on a sound basis. The two men worked out reforms in the fields of education and taxation, and by and by the worker, the petty bourgeois and the have-not intellectual began to be confident that the community was watching over their interests.

In 1901 Vázsonyi was elected a deputy to the Hungarian parliament, where he continued his fight against graft on a nation-wide basis. In his capacity of attorney he obtained the acquittal of a fellow deputy who had accused the minister of finance of graft, and the dishonest minister was forced to resign. During the first World War Vázsonyi was made minister of justice and a privy councillor, the first Jew in Hungary to attain these dignities. Later, as minister of suffrage, he worked out a vast project to extend suffrage, and when this was not accepted he retired from the political scene. Following the armistice, he lived outside of

Hungary for some time, and returned in the most rabid days of the counterrevolution when, as a deputy to the national assembly, he continued the then dangerous fight for democracy. When the Hungarian government, turning more and more fascist, launched on an enterprise of counterfeiting the franc, Vázsonyi recklessly exposed the guilty. His heart ailment caused him to retire to Baden, near Vienna, where he died.

One of the clues to his unusual career was his brilliant oratory. Not since Lassalle and Jaurès had there been anyone to talk to the common man in his own language, yet with the dignity of a fine intellect.

As a youth Vázsonyi, together with his brother Jenő, Miksa Szabolcsi and the Palágyi brothers, successfully led the movement for the recognition of the Jewish faith by the state on a par with the Christian denominations. IGNOTUS.

JÁNOS VÁZSONYI, the only son of Vilmos Vázsonyi, an attorney by profession, was elected to the Hungarian parliament in 1931, and reelected in 1935. In the ranks of the democratic party he combatted the rising tide of Hungarian Nazism. Owing to mass disfranchisement of Jewish voters he was not returned to parliament in the elections of 1939.

VE-ADAR (a month in the Hebrew calendar), *see* CALENDAR.

VECCHIO, GIORGIO DEL (Delvecchio), legal authority, b. Bologna, Italy, 1878. He taught philosophy of law at various Italian universities, and in 1930 became dean of the University of Rome, with which he had been affiliated since 1920 and of which he had been rector from 1925 to 1927. Del Vecchio's legal point of view was conservative and pro-militarist; the arguments presented in his many writings made him a member of the directorate of the Fascist party (1931). Under his supervision, courses in so-called Fascist culture were started at the University of Rome and the student militia was organized. In 1939, however, the anti-Semitic orientation of the Fascist party resulted in the expulsion of Del Vecchio from his post at the university. He had several audiences with the pope on the anti-Semitic persecutions; in 1940 he joined the Vatican staff.

Among Del Vecchio's most important juridical studies were: *Il sentimento giuridico* (2nd ed., 1908); *Il concetto del diritto* (1906); *Le ragioni morali della nostra guerra* (1915), which went through seven editions and was distributed to Italian army officers during the first World War; *Sui principii generali del diritto* (1921); *Lectione di filosofia del diritto* (1934). Del Vecchio received an honorary doctorate from the University of Coimbra, in Portugal (1937). He was editor of *Archivio giuridico* and of *Rivista internazionale di filosofia del diritto.*

Lit.: Reichel, Hans, "Del Vecchio's Legal Philosophy," in Appendix 1 of Del Vecchio's *The Formal Bases of Law* (1914) 339-54; Landsberg, E., "Zur ewigen Wiederkehr des Naturrechts," *Archiv für Rechtsphilosophie* (1925).

VECHOL MAAMINIM ("and all believe"), a poem inserted in the third of the Eighteen Benedictions (Shemoneh Esreh) in the Musaf (additional) service of the Orthodox Jewish prayer-book for Rosh Hashanah and Yom Kippur. It consists of lines read alternately by the reader and the congregation; the latter's lines always begin with the words *vechol ma'aminim.* There are twenty-two such couplets, which follow the order of the alphabet, using words descriptive of God which begin with the letters from Aleph to Tav.

VECINHO, JOSEPH, court physician and cosmographer, who lived in Portugal in the latter part of the 15th cent. He was a pupil of Abraham Zacuto. In 1485, according to the testimony of Christopher Columbus, King John II of Portugal sent him on an expedition to Guinea to determine the altitudes of the sun throughout that territory. The accuracy of his measurements was later confirmed. An authority on cosmography, Vecinho was the leading member of a committee or junta of five, before which the project of Columbus was laid to decide whether it was to be adopted or rejected. Columbus blamed the "Jew Joseph" (Vecinho) for the adverse decision that was made against him.

Vecinho is best remembered as the translator of the *Almanach Perpetuum,* which Abraham Zacuto wrote in Hebrew in 1473. Zacuto's work was translated into Latin and Spanish by his pupil Vecinho, and it was subsequently printed at Leiria by a Jewish printer, Samuel d'Ortas, in 1496. Columbus carried this work with him on his voyage and found it of great service; this copy is preserved in the Columbina archives at Seville.

Lit.: Kayserling, M., *Christopher Columbus and the Participation of the Jews in the Spanish and Portuguese Discoveries* (2nd ed., 1928); Jacobs, Joseph, *Jewish Contributions to Civilization* (1919) 152; Roth, Cecil, *The Jewish Contribution to Civilisation* (1938) 67, 76-80.

VEHU RAHUM ("And He is Merciful," *Ps.* 78:38), a Biblical verse frequently used in the liturgy. In particular, a long penitential prayer (Selihah) for Mondays and Thursdays, which were observed as fast days from the days of antiquity, is called Vehu Rahum. A medieval legend states that the composers of this prayer were two brothers named Joseph and Benjamin and their cousin Samuel. According to the legend, the emperor Vespasian, after the destruction of the Temple at Jerusalem in the year 70, had these three, together with a number of other Jews, set adrift on the sea in three separate vessels; however, all three ships landed safely in three different places. The Jews thus rescued from the sea were favorably received by the prince of the land—probably Southern France—but they were oppressed and robbed of their possessions by his successor. This misfortune provided the occasion for the observing of fasts for which the prayer Vehu Rahum was written, and it was then communicated to the other Jewish communities and adopted by them.

Both the contents and the style of the Vehu Rahum point to an early origin. The language is preeminently Biblical, and contains many literal citations and numerous paraphrases of Biblical passages. The fact that the composition of the Vehu Rahum is ascribed to three authors is an indication that it is a combination of several prayers or petitions originally independent of one another. The Vehu Rahum prayer is composed therefore probably of separate Tehinnoth (supplications) for the fast days. The more modern prayer-books have frequently shortened the "long Vehu Rahum," as it is popularly known.

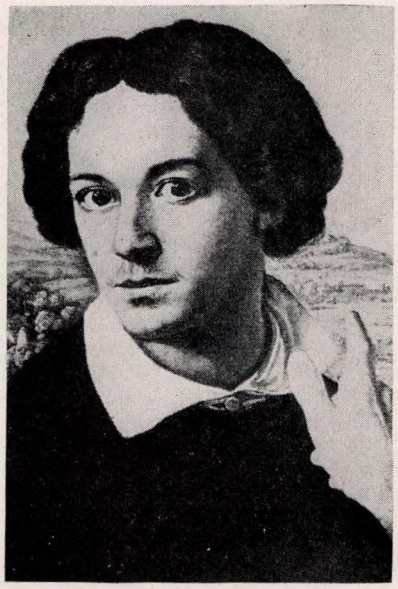
VEIGELSBERG, LEO, Hungarian journalist, b. Kiskőrös, Hungary, 1842; d. Budapest, 1907. After medical studies in Vienna, Veigelsberg became a teacher in Kecskemét, where he wrote political and critical essays for a Prague newspaper. Subsequently he went to Budapest and became one of the editors of Ignatz Einhorn's *Neuer Freier Lloyd* and of the *Neues Pester Journal.* From 1872 on he was assistant editor of *Pester Lloyd,* mouthpiece of the Austro-Hungarian Ministry of Foreign Affairs and leading press organ of

the ruling Hungarian liberal party. He became associate editor-in-chief with Zsigmond Singer after the retirement of Miksa Falk. His daily editorials, signed by two stars and written in a vigorous style, made him one of the most influential writers of his time.

Although he had to formulate the views of the paper, he always succeeded in keeping a fair measure of independent opinion. In 1888, commenting on Wilhelm II's bombastic proclamations, Veigelsberg protested that the nation of Goethe and Schiller could not be governed by the outmoded principles expressed by the young Kaiser. He was answered by an angry rejoinder inspired by Bismarck. Veigelsberg's outlook was always steeped in classical liberalism. He was the father of the literary critic Hugo Ignotus.



VEILING OF THE BRIDE. The custom of covering the face of the bride with a veil, so that she may not be seen, even by her husband until after the completion of the marriage, is of very ancient origin. It is mentioned in the Bible in the case of Rebekah (*Gen.* 24:65), and is expressly implied in the story of Jacob and Leah (*Gen.* 29:23-25). The Mishnah mentions, as a proof of a marriage, that the woman in question wore a veil in a procession (*Keth.* 2:1). This custom, current in the Orient, was retained by Jews even after they settled in Europe. Throughout the Middle Ages, as appears from descriptions and from drawings, the bride's face was so completely covered by a veil as to be invisible. In modern times, especially in Western countries, the custom has been modified to conform with the customs of non-Jews.

VEIT, BENJAMIN, educator, b. New York city, 1867. He received the B.S. degree from the College of the City of New York (1886), and the LL.B. degree from the New York University Law School (1893). At first he practised law, but later turned to teaching, and in 1912 became district superintendent in charge of junior high schools in New York city; he retired from this position in 1937. Veit was a founder and president of the Jewish Teachers Association (1925) and a chairman of the educational division of the American Jewish Joint Distribution Committee (1933-36). He was author of the textbooks *Safety First for Children* (1915); *Thinking—Speaking—Writing* (3 vols., 1921); and *Junior Business Training* (1934).

VEIT, MORITZ, author, German deputy, bookseller and publisher, b. Berlin, 1808; d. Berlin, 1864. He had barely passed the age of twenty when he issued two volumes of the *Berliner Musenalmanach,* a publication to which Goethe was a contributor. He published books by well-known scholars, among whom were Zacharias Frankel and Leopold Zunz. Furthermore, he wrote *Polenlieder* (1833) and *Gedichte* (1836), and contributed to Michael Jehiel Sachs' *Stimmen vom Euphrat und Jordan.* Veit's activity as a member of the Frankfort National Assembly (1848) and of the Prussian Diet (1858) offered him the opportunity of laboring for the emancipation of the Jews in Prussia. For more than two decades he was a deputy of the municipal assembly and alderman of Berlin, as well as one of the directors of the Berlin Jewish community; as such he improved school methods and the training of teachers.

Ludwig Geiger (1897); *Monatsschrift für Geschichte und Wissenschaft des Judentums* (1908) 513.

Philipp Veit

VEIT, PHILIPP, painter, b. Berlin, 1793; d. Mayence, Germany, 1877. He was the son of Dorothea Mendelssohn, daughter of Moses Mendelssohn, by a first marriage. Dorothea Mendelssohn's second husband was Friedrich Schlegel, one of the leading spirits of the romantic movement in Germany.

The stepfather had a great influence on the child, whose life's work developed under the auspices of romanticism. From early youth he took an active part in the cultural life of his home. A portrait of Schlegel, a model for an etching intended for publication in one of his books, figures among the first drawings of Veit, and can be dated as early as 1810. At that time he was still a student at the Academy of Dresden, under his first teacher, Professor Matthaei. He continued his studies in Vienna until 1813, when he joined the army against Napoleon. This was the period when, in Vienna, the romantic painters, the group of the Nazarenes, revolted against the classicistic Academy, and turned toward the "Christian purity" of the Middle Ages. They seceded from the Academy and, crossing the Alps, migrated to Italy. Veit, who was converted to Christianity in Vienna in 1810, joined the group in Rome after the Napoleonic war.

In the company of Overbeck, Cornelius and Schadow, he painted his first important work, *The Seven Fat Years,* a fresco in the Villa Bartholdy. In the following year the decoration of several rooms in the Villa Massimi was assigned to the group. Each room was dedicated to a great spirit of the past. Veit painted the representation of *Paradise* on the ceiling of a room devoted to Dante.

In 1830 he returned to Germany, settling down as president of the Staedel Institute in Frankfort. Here he exercised a great influence on the younger generation of painters as a teacher. He remained in Frankfort until 1843, when he resigned, retiring to Sachsenhofen. After 1853 he lived in Mayence as president of the picture gallery.

Artistically, Veit had started with the anticlassical tendencies of the romantic movement, but in Rome he was subjected to the influence of classic Italian art. Raphael and Michelangelo left decisive marks on his painting, in which greatness of outline and simplicity in modeling were accompanied by charm and beauty of color. A rather sentimental conception of the human figure, and a certain sweetness in pictorial vision are his personal notes in the

cold and antinaturalistic trend of Nazarene painting, which was rooted in a literary perception of the world. The revival of the fresco style of the Renaissance was without further consequence in the history of painting, but lent a certain halo of nobility to his work.

Veit's outstanding artistic achievement, the representation of *The Introduction of the Arts into Germany by Christianity,* is almost a symbol of his fate. Painted originally as a fresco, in 1836, it is now transposed on canvas. It is a triptychal composition of large proportions. Flanked by the allegories of Italy and Germany, the third allegorical figure, Christianity, is celebrated in the centerpiece. She turns toward Music, Poetry, and the three sister arts of Painting, Sculpture, and Architecture, after her priests have converted the pagans. Many churches in Germany possess altarpieces by Philipp Veit, such as the church of Bensheim, the Liebfrauenkirche in Frankfort, and the cathedral of Mayence. He painted a large mural for the Römer in Frankfort. His *Triumph of Religion* is in the Vatican gallery. All great German galleries own pictures by this outstanding representative of the Nazarene school. ELISABETH GUTMAN.

Jahrhundert* (1925); Nagler, Ferdinand, "Ein neuaufgefundenes Portrait Friedrich Schlegels von Philipp Veit," *Graphische Künste* (1928) 106-8; Dehio, Georg, *Geschichte der deutschen Kunst,* vol. 4, by Gustav Pauli (1934).

VELIKI BEČKEREK (NAGYBECSKEREK), town in Torontál County, Hungary, with a Jewish population of 2,000 in a total of 26,000. The Jewish community of Veliki Bečkerek was founded in 1760 by several well-to-do and cultured merchants who had received permission to settle there and who forthwith organized their communal life in a progressive spirit. In 1817 Adam Guttmann was "Judenrichter" of Veliki Bečkerek; in that capacity he signed the lease of the school building for which the community paid an annual rent of eight gulden.

The earlier minute books of the community were written in Hebrew; later that language was abandoned for German. Accounting books kept in Hebrew are also extant; a synagogal order drawn up in Hebrew by the first rabbi of the community, called Fein, who ministered until 1857, was lost in the troubled times of 1918. From 1880 to 1915 Mór Klein, translator of Maimonides' *Moreh Nebuchim,* was rabbi of Veliki Bečkerek. The community had several synagogues, charitable institutions and a school which had functioned for a hundred years when it was taken over by the state. It was revived in a Zionist spirit in 1920.

The community of Veliki Bečkerek, situated at the clashing point of two bitter opponents, the Magyars and the Serbs, suffered much from the conflict of the two nationalities in the revolution of 1848 to 1849, at the close of the first World War, when the town was occupied by the Serbs, and in 1941, when the town was nominally reincorporated into Hungary, actually remaining under German control. Jews, previously inhabitants of Serbia, were then expelled from the town.

VELIZH BLOOD ACCUSATION. Toward the end of April, 1823, the three-year-old child Theodore Yemelyanov, son of a Russian soldier, disappeared in Velizh (province of Vitebsk), and his mutilated body was found in a swamp some days later. Thereupon two Christian women, the prostitute Mary Terentyeva and the idiot Yeremyeyeva, spread the report that the child had been tortured by the Jews. At the official inquiry, Terentyeva implicated two Jews, Shemariah Berlin and Joseph Zetlin, who were exonerated in November, 1824, by the Vitebsk courts, which in turn condemned the woman to a penance because of her immoral conduct. Despite the verdict, anti-Jewish leaflets which sought to influence the authorities were distributed in the streets. In September, 1825, as Czar Alexander I was passing through Velizh, Terentyeva succeeded in presenting him with a petition in which she reiterated her accusations against the Jews. Consequently, at the czar's request, the investigation was reopened.

The governor general, Khovanski, a notorious anti-Semite, entrusted one of his subordinates, Strakhov, with the investigation. The latter interrogated Terentyeva and led her to concoct a new story in which she alleged that she had herself lured the boy to the homes of the two Jews. She charged that the child was first tortured in the home of Berlin and later at the synagogue, where Jews and Jewesses drained his body of its blood, and that the body was then thrown into the swamp. Although the various stories were entirely contradictory, Strakhov imprisoned the accused families and other members of the community, a total of forty-two persons. In his report about the investigation, Khovanski qualified the child's slaying as a ritual murder, and as a consequence the synagogues of Velizh were closed by order of Nicholas I in August, 1826.

The investigation was continued along the same lines during the regime of Nicholas I. The authorities tried in vain to extort confessions from the Jews, even by coercive and intimidating means. A Jewish renegade, Grudinski, declared that he was prepared to prove the existence of a ritual murder by means of a "secret" Jewish book, but verification of this showed, through the statement of the priest Pasderski, a baptized Jew, that the passage referred to dealt with the slaughter of cattle. In 1830 the inquiry reached the senate, where the penal committee was inclined toward sentencing the accused to exile in Siberia. But on the floor of the senate, although a majority seconded the sentence, three senators moved for acquittal and for putting the accused under police guard.

Finally, when the case reached the highest tribunal of the land in 1834, a leading member of the house, Mordvinov, who owned properties near Velizh and was therefore entrusted with local affairs, interested himself in the investigation. As president of the department of civil affairs, the deputy succeeded in demonstrating the utter inconsistency of the charges. The department thereupon moved to liberate all the Jews and compensate them for their suffering, and to sentence the Christian slanderers to Siberia. With the exception of granting compensation to the sufferers, the czar endorsed these motions (January, 1835), adding that his intuition had told him that the crime had not been committed by Jews, although there existed some fanatical and sectarian Jews who needed Christian blood for their religious rites. At the end of the same month the acquitted Jews were released from prison and the synagogues reopened. The czar, however, refused to consider the recommendation of the department that the ukase of Alexander I of 1817 prohibiting blood accusations be reenacted. JOSEF MEISL.

VENAISSIN, usually called Comté (County) Venaissin, a region in Southern France which, first a Roman province, came in the year 450 under the control of Burgundy, in the 12th cent. into the possession of the counts of Toulouse, and in 1274 under the control of Pope Gregory X; it remained a papal possession

until 1791. Jews dwelt especially in the four communities of Avignon, Carpentras, L'Isle and Cavaillon. Some Jewish families were to be found in other places, such as Malaucène and Valabrègue. All the Jewish communities had a similar organization. At their head there were three "bailes" or "baylons" (administrators, stewards), and fourteen assessors who assisted them. Under Pope John XXII a first banishment of the Jews from the country occurred in 1322. However, some of these Jews soon returned. The church councils of Avignon in 1326 and 1337 decided that all Jews had to wear a Jew badge (yellow patch) on their clothing.

Pope Benedict XIII (1394-1416) prohibited the study of the Talmud to the Jews of Venaissin, and confiscated their books (1415). However, he allowed them to erect a synagogue in each community. On the other hand, he imposed upon them restrictions pertaining to the exercise of the medical profession and to business. Pope Nicholas V (1447-55), at first well-disposed toward the Jews, whom he desired to convert to Christianity, later made them feel the full force of his power. In the beginning the relations of the Jews with the general population were friendly, but owing to their steady increase in number they aroused their rivals' envy, and their position became more precarious.

In the 18th cent. the Jews of Venaissin traded with the neighboring provinces of Dauphiné, Provence and Languedoc.

VENETIANER, LAJOS, rabbi and historian, b. Kecskemét, Hungary, 1867; d. Ujpest, Hungary, 1922. He studied at the rabbinical seminaries of Budapest and Breslau and at the school of philosophy of the University of Kolozsvár. He served as rabbi at Csurgó (from 1893 on), where he also taught at the local Gymnasium; subsequently he served at Lugos (1896), and in 1897 was invited to the rabbinate of Ujpest, a large industrial suburb of Budapest.

Venetianer lectured on the philosophy of Judaism at the Budapest rabbinical seminary, succeeding Ignaz Goldziher; he also delivered lectures on the legal status of the Jewish church in Hungary and on the methodics of Jewish religious instruction. In the lower courses of the seminary he taught various subjects of Jewish religion and history. From 1910 on he was a member of the board of governors of the school.

He was also vice-president of the rabbinical association of Hungary. He was a distinguished historian of the Jews in Hungary. His main work, *A magyar zsidóság története* (1922), stresses the economic and cultural factors of the history of the Jews in Hungary. The city of Ujpest named one of its streets after Venetianer; however, it was renamed during the anti-Jewish era in 1941.

VENEZUELA. The first Jews to settle in Venezuela were mostly of Italian origin. They had left Leghorn for Cayenne in 1653, and having been there persecuted and expelled after the war with Portugal, and gotten asylum in Curaçao, they emigrated again to Venezuela, where they settled at Tucaca from 1693 on. The Jewish community of Tucaca, called by the non-Jewish natives "Santa Irmindada," which was the popular name of the police, increased because of the arrival of coreligionists from Surinam, Gibraltar and Morocco. Their conditions of life were modest ones. In 1720 the Jewish community of Tucaca requested their coreligionists in Curaçao to purchase a Sefer Torah for its synagogue. In the 19th century most of the Jews of Venezuela settled at Caracas, the capital of the republic of Venezuela, being active in commerce, artisanship and agriculture. The majority of the Jewish community consisted of Sephardim, and remained for a long time Orthodox, but in 1865 some of its members embraced Reform, and became affiliated with the Liberal congregation El Porvenir, whose center was in Curaçao. According to the latest statistics, the Jews of Venezuela numbered 882. But they may have increased to about 1,500 because of immigration during the 1930's.

The Venezuelan general Antonio José De Sucre (1793-1830), who served in various wars of independence in South America and became the first president of Bolivia, probably was of Jewish descent. Jacob Baiz (b. Barcelona, Venezuela, 1843; d. New York city, 1899), a professing Jew, devoted to Jewish charitable institutions and communal work, projected and constructed a railroad in Venezuela, and became, as a merchant and army contractor, widely known in his native country and Central America. A Jew from New York city, Isaac N. Seligman (1855-1917), became of highest importance for the economic reconstruction of Venezuela when, under the presidency and with the consent of Theodore Roosevelt, he formed an international syndicate to pool the debts of the Venezuelan government and to place the country on a sound financial basis. Subsequently Venezuela was one of the rare countries of the world which were free of debt, both internal and foreign.

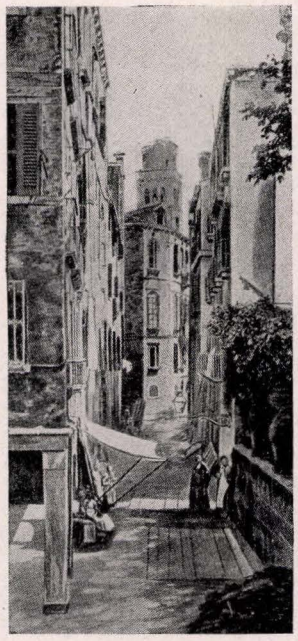
VENGEANCE, *see* HATE; RETRIBUTION.

VENGEROVA, ISABEL, *see* WENGEROFF.

VENICE (Italian, **Venezia**), city in Northern Italy built on islands in the Lagoon of Venice, and capital of the former Venetian republic, with a total population of 260,000, including 2,000 Jews (1938). According to legendary reports, Jews lived in the territory of what later became known as the Venetian republic even before the Christian Era, but they are not mentioned in any document before 945, when the senate of Venice issued a decree prohibiting all ship captains who were making voyages to the Orient to take Jews on board. By that time there seem to have been some Jewish traders, from Germany and the Levant, living in the city; according to the census taken in 1152, no less than 1,300 Jews resided in Venice; this figure, however, is believed to be grossly exaggerated.

In 1204, when there was founded the Latin Empire in which Venice played a considerable role, the Jewish community of Constantinople placed itself under the protection of Venice, and remained under it even after Constantinople was captured by the Palaeologus dynasty (1261). In that period many Jews emigrated from Constantinople to Venice, while others came from Germany. However, the Jews were not permitted to reside in the city proper, but had to live and do their business on the near-by island of Spilunga; it was called Giudecca (Zudecche, Zuecca) after them, for the first time in a document of 1252. Two ruins on the island which were visible for several centuries were said to have been the remains of synagogues.

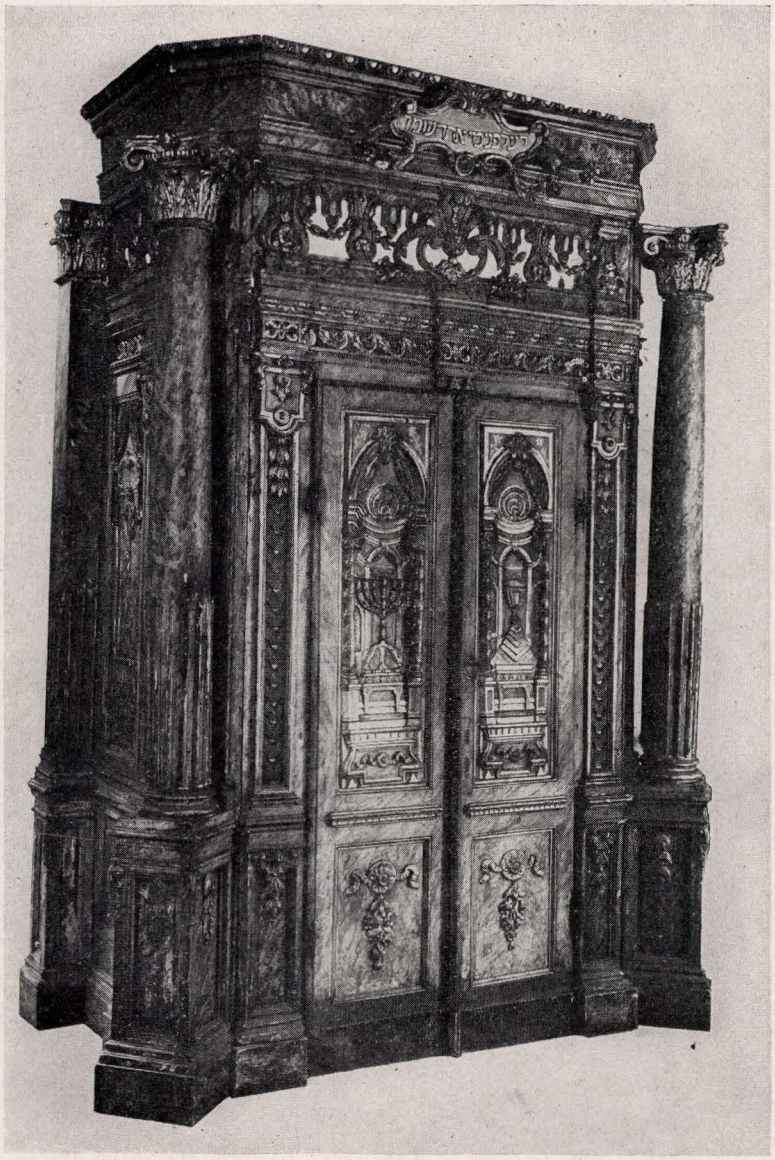


The Jews were officially tolerated only as wholesale traders or as owners of loan banks. By a decree of 1290

a duty of 5 per cent was levied on all merchandise imported or exported by them. Originally the bankers were allowed to reside only at Mestre, on the mainland opposite the city (on the "terra ferma"), but in 1366 they were invited to move to Venice proper. Their right of settlement was based on a mutual contract (*condotta*) which was renewed at regular intervals until 1395; in that year they had to leave the city since, due to pressure exerted by the population and owing to an unpleasant quarrel between two Jewish bankers and their non-Jewish business partner, the *condotta* was not renewed.

Therefore the bankers carried on their activities at Mestre again, being permitted to visit Venice only for brief periods and at certain intervals. At the end of the 14th cent. an era of persecution started which lasted throughout the following century, although at Venice the living conditions of the Jews were at all times better than those of the Jews in Germany and in a number of other Italian cities. The yellow badge (Jew badge) was first enforced against the Venetian Jews in 1394; in 1496 this distinctive mark was replaced by a yellow hat, and at the end of the 16th cent. by a red hat. In 1423 they were forbidden to acquire real estate. In 1475, however, when the religious feelings of the population were aroused by a Jew-baiting preacher, the doge of Venice ordered that the Jews be protected and he forbade the delivery of inflammatory speeches. Nevertheless, in 1480, three Jews charged with kidnapping a Christian child at Treviso were burned to death at Venice, and in 1506 a Hungarian Jew charged with a similar crime was stoned to death by the mob.

After the expulsion of the Jews from Spain (1492) and Portugal (1498) many Jews fled to the Venetian republic; among the refugees was Isaac Abravanel. In 1509, when the country was invaded by enemy troops and Mestre was sacked and burned, the Jews escaped to the city of Venice. They were permitted to dwell there and hold their services, and were protected by the government against the hostile population. The most prominent Jew in the city in that period was the wealthy Anselmo del Banco (Rabbi Asher Meshullam), a patron of Hebrew literature. He was the actual founder of the permanent Jewish community at Venice, for it was he who collaborated with the Christian authorities in the establishment of a segregated Jewish quarter or ghetto which was located in a marshy and unwholesome site far away from San Marco. This was the first ghetto established in Italy, and consisted of three parts, the Ghetto Nuovo, the Ghetto Vecchio (which, despite its name, actually was inhabited by Jews later than the "New" ghetto), and the Ghetto Nuovissimo, which was opened in 1633 for new arrivals and was in existence for 281 years. In 1534 it was organized; called Università degli Ebrei, and composed of three national sections, Levantines, Germans, and Occidentals (comprising Jews from the Iberian peninsula), it was administered by a council of seven members, chosen from the three groups.



Orders of expulsion were issued by the authorities of Venice twice, in 1527 and in 1771; they were rescinded, in the first case for a loan of 10,000 ducats. In 1550 the senate ordered all Marranos to leave the city, but at the end of the 16th cent. Venice had become a haven for Marranos, as the authorities wished to profit by their wealth and abilities rather than let them proceed to Turkey. The Portuguese community, in the course of time, exceeded the Italian and German communities in importance, and the authorities favored the foreign, especially the Levantine, Jews at the expense of the native Jews. The Inquisition was not allowed to become powerful in the Venetian republic, and although the Talmud was burned at Venice in 1553 and the senate forbade the printing of Hebrew books in 1566, Hebrew printing flourished for centuries in the city and in several places in the Venetian republic.

The ghetto in Venice

In 1552 there were 902 Jews among the 160,000 inhabitants. The ghetto dwellers were prosperous and in regular contact with the Christian citizens, but the Jewish quarter was frequently stricken by catastrophes. Smallpox (1596) and pestilence (1630) decimated the population; after the latter epidemic the city had a total population of 98,000, including 2,414 Jews. Through the influx of refugees the ghetto's population rose to nearly 5,000 in 1655, but the fatal year 1630 nevertheless marked the turning point in the history of the Jews of Venice, which took a definite turn for the worse. Many wealthy families left the ghetto, particularly for the prosperous free port of Livorno, and by the middle of the 18th cent. the number of Jews declined to little more than 1,500. Nevertheless, the taxation levied on the community remained unchanged. Sumptuary laws were introduced in 1696 and 1697 to enforce economy. Many Jewish merchants lost their ships between 1714 and 1718, in the last stage of the republic's war with Turkey. While there were 271 taxpaying Jewish families in 1603, there were only sixty a century later. In 1735 the ghetto authorities saw themselves forced to declare the community bankrupt. A conflagration damaged the Ghetto Vecchio in 1752; other conflagrations occurred in 1765 and 1786. In this difficult time the community was headed by Rabbi Jacob Saraval (1708-82), an eminent preacher, poet and philosopher. In order to relieve the financial situation of the Jews, he and his colleague, Rabbi Jacob Belilios, visited the communities of England and Holland to raise a loan (1737-38). All factories owned by Jews, including the silk-looms at Padua, were forcibly closed by the authorities in 1777, and medieval economic restrictions were enforced upon the community.

Liberation came in 1797 when French troops occupied the Venetian republic. The ghetto gates were torn off their hinges and publicly burned, with the population, Jews and non-Jews, dancing the Carmag-

An Ark of the Law of Venetian craftsmanship, discovered (1932) by a bookseller in Chillingham Castle, England, and believed (by the historian Cecil Roth) to be over 300 years old

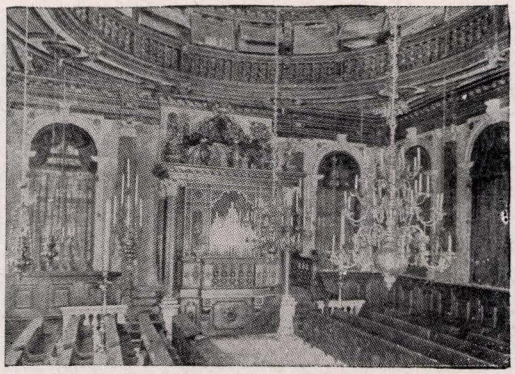
nole around the fire. After the abolition of the ghetto system the Jewish quarter was renamed Contrada dell'Unione, and three Jews were elected to the city council of Venice. In the same year, by the terms of the Treaty of Campoformio, Venice became Austrian, but even the reactionary Austrian government did not restore the medieval ghetto system. The Jews enjoyed full civil rights again from 1805 to 1814, when the country was part of Napoleon's empire. At the Great Sanhedrin in Paris (1806) the Jewry of Venice was represented by Aaron Lattes, Abraham Tedesco and Emanuel Cracovia.

Under the Italian rule the reactionary system was restored, which deprived the Jews of their civil rights. The revolutionary government of 1848 to 1849 was headed by Daniel Manin, a man of Jewish extraction who had the Jew Leone Pincherle as minister of agriculture and commerce and the Jew Isaac Pesaro Maurogonato as minister of commerce in his short-lived cabinet. The London *Times*, hardly favorable to any revolutionary movement, praised Manin's regime by saying that "there has been no popular movement conducted with so much dignity and maintained with such unswerving decision as that of Venice." Among the forty Venetians who, together with Manin, were exiled from the city after the fall of the revolutionary regime were a number of Jews. Full civil rights were granted the Jews again in 1866 when the city was incorporated into United Italy. From that date on the history of the Jews of Venice was identical with that of Italy's Jewry. In the Fascist era, the community was headed by Chief Rabbi Adolfo Ottolenghi.

Numerous ancient Jewish communities existed in the territories belonging to Venice. Notable among the Jewish communities on the "terra ferma" were those of Padua, Verona and Rovigo. (The history of the Jews of Padua and Verona is treated in separate articles.) The community of Rovigo, started in 1391 by the opening of Jewish-owned loan banks, was never large. For a long time the bank of Rovigo was in the hands of the Consigli family. Although officially permitted to deal only in old clothes, the Jews took a great part in the development of the woollen industry at Rovigo. Jewish communities existed also in many

parts of the far-flung empire of the Venetian republic, such as Negroponte, Crete, Spalato and Corfu.

The ghetto of Venice, which was never cut off from developments in the outside world, had a large share in both Jewish and general history. In 1524 the adventurer David Reubeni landed at Venice at the start of his unusual career; six years later he met the Messianic pretender Solomon Molcho there. In the same period emissaries from Henry VIII of England sought Biblical sanction from Venetian rabbis for the king's desire to divorce Catherine of Aragon. When Gracia Mendesia fled to Venice from Antwerp with her daughter, sister and niece (1549), she was denounced as a secret Jewess to the Venetian authorities by her sister, who loathed her guardianship; she was imprisoned and her property confiscated by the Venetians. However, she was freed and her possessions were restored to her through the efforts of her nephew, Don Joseph Nasi, a protégé of the sultan. In 1576 Solomon ben Nathan Ashkenazi was appointed envoy extraordinary of the Sublime Porte to Venice; it was due partly to his influence that, three years earlier, the decree for expulsion of the Jews from Venice was revoked.



The Sabbatian movement had many adherents as well as opponents in the city. In 1668 Nathan Benjamin Halevi of Gaza (Nathan Ghazzati), one of the most zealous followers of Sabbatai Zevi, landed in Venice, but was compelled by the rabbis to issue a statement condemning the movement. At the beginning of the 18th cent. the Cabalist Nehemiah Hayyun stayed in Venice. Another Cabalist, Moses Hayim Luzzatto, gave his manuscripts into the custody of the Venetian rabbinate (1730), but was excommunicated in 1735 when he took up Cabala again. In 1700 a group of Polish pietists, headed by Judah Hehasid (Judah the Pious, of Regensburg), passed through Venice on their way to Palestine. Venice was the seat of a Jewish society which, by the payment of ransom money, liberated Jews who had fallen into the hands of the Knights of St. John.

In the 16th and 17th centuries there lived in Venice many outstanding Jewish personages, such as the Hebrew scholars Elijah Levita, Leon da Modena (who caused his coreligionists much concern because of his uncontrollable weakness for gambling), Simone Luzzatto, the historian Rodrigo Mendes da Silva, the playwright Solomon Usque, the poetess Sarah Copia Sullam, and the philosopher David Nieto. The ghetto had many outstanding physicians, such as Master Solomon; Elijah Delmedigo, a native of Crete; and Master Joseph who, in 1502, was permitted to wear the black hairdress of an ordinary Christian practitioner. The most prominent Jewish doctors were Jacob Mantino (1490-1549) and the brothers Solomon and Israel Conigliani (17th cent.). Marrano physicians were Filotheo Eliau (Elijah) Montalto and Isaac Cardosa.

Although officially the Jews were permitted to engage only in the wholesale trade (the commerce of Venice with the Levant may have been brought about by a Jew) and in pawnbroking, they distinguished themselves, apart from the field of medicine, as engineers, manufacturers, gem-polishers, actors and musicians (there existed a musical academy in the ghetto).

Among the Jewish printers of the city were Cornelio Adelkind and Meir Parenzo, both of whom worked for Daniel Bomberg, a non-Jewish publisher of Hebrew books. Parenzo later joined Alvise (Aluise) Bragadini, another non-Jewish printer of Hebrew books at Venice. In 1545 Adelkind and Parenzo published *Psalms* in a Yiddish translation made for them by Elijah Levita.

The ghetto had a number of famous synagogues,

The Tempio Spagnuolo Israelitico in Venice

among them the Scuola Grande Tedesca, the city's oldest synagogue, founded in 1529, which was closed for regular worship in the 20th cent.; the Scuola Canton, founded by the Cantoni family in 1532 and restored in 1859; the Scuola Spagnuola, which, opened in 1584 and later enlarged and restored under the direction of the famous Venetian architect, Longhena, was the largest and most magnificent of all the synagogues of the city; and the Scuola Levantina (18th cent.).

VENTURA, MISON (MICHON), professor of law, and Turkish deputy, b. Istanbul, Turkey, 1883. He graduated from the University of Istanbul (Constantinople), and was appointed judge, serving in the penal and commercial tribunals of Salonika and at the same time teaching law at the school of law there. In 1909 Ventura went to Paris to study, and on his return to Istanbul in 1913 became professor of Roman law at the University of Istanbul. In 1920 he was made also a deputy from Istanbul.

Ventura translated the German civil law into Turkish, and was author of several comparative studies on law, including a two-volume discussion of Roman law and a book on the philosophy of law. Ventura's connection with the University of Istanbul was in effect until the 1940's. He was interested in Jewish affairs and in the participation of Jews in Turkish life.

VENTURA, MOSES BEHOR, chief rabbi of Alexandria, Egypt, b. Salihli, near Smyrna, Turkey, 1893. He attended the elementary school in his native town, and later the school of the Alliance Israélite Universelle in Cassaba. In 1907 he entered the rabbinical seminary in Cusguncub, where he studied under the guidance of Abraham Danon until 1913.

During the first World War Ventura lived at Baghdad, Iraq, continuing his studies in Hebrew and Arabic literature and folklore. After the armistice he left for Paris, and attended the Institut de Psychologie and the Sorbonne, taking courses in pedagogy and social and philosophical science. He received (1923) a degree in pedagogy, and three years later degrees in education, psychology and sociology. In 1935 he became Doctor ès Lettres upon presentation of a thesis on the philosophy of Saadia Gaon.

Following the resignation of Chief Rabbi Davide Prato, who left Alexandria to assume a rabbinical post in Rome, Ventura was invited in 1937 to become chief rabbi of the oldest Jewish community of the Diaspora. He spoke Hebrew, French, Arabic, Turkish, English, Spanish and German fluently, and was a brilliant orator. Most notable among Ventura's literary and scholarly works are his logical terminology of Maimonides, *Explained Readings; Le judaïsme par l'image* (Paris, 1933); *La philosophie de Saadia Gaon* (Paris, 1934).

VEPRIK, ALEXANDER, composer, b. Balta, Russia, 1899. He studied at the Leipzig Conservatory, then with Miaskowsky at the Moscow Conservatory. He settled in Moscow as teacher and composer. In his early works Veprik was strongly influenced by the Jewish idiom, producing in this vein several excellent works including a cycle of Jewish popular songs, *Kaddish,* for chamber-music group, and his orchestral *Dances and Songs of the Ghetto,* which was introduced by Arturo Toscanini and the New York Philharmonic.

Latterly Veprik eschewed Jewish subjects and created music more general in character: *Song of Mourning, Song of Joy,* and a Symphony (all three for orchestra), the last of which was featured successfully at the Moscow Music Festival in 1939.

VEREA, ADRIAN, playwright and poet, b. Botoshani, Roumania, 1876. He studied medicine in Bucharest and Paris, and established himself as a physician. A complete edition of his poems was published under the title *Jassy* (with the author's own designs; Bucharest, 1917). His plays were very successful.

These include: *Sa Nu'ti Faci Idoli* (Do Not Have Idols), produced at Bucharest in 1920; *Appolonius din Tyrane,* a tragi-comic poetical drama, frequently performed by the Teatrul National in Bucharest; *Delfinii din Vaikiki* (set in Hawaii; 1933); *Dupa moartea lui Manasse* (Bucharest, 1915). Verea was a contributor to many Jewish as well as non-Jewish magazines in Roumania.

VEREIN FÜR CULTUR UND WISSENSCHAFT DES JUDENTUMS, a society for the development of culture and literature among the Jews, founded at Berlin on November 9, 1819, by Eduard Gans, Moses Moser and Leopold Zunz. While the society itself was short-lived and it produced no perceptible results, it anticipated aims and ideas which were brought nearer to realization in later years.

The immediate occasion for the formation of the society was the spread of anti-Semitism in Germany after the Napoleonic Wars. The society sought to meet this by creating a modern form of Judaism and Jewish life, based on the Science of Judaism. Its members delivered lectures at the newly established Institut für die Wissenschaft des Judentums, and the society published a periodical, *Zeitschrift für die Wissenschaft des Judenthums,* with Zunz as editor.

The members hailed from Berlin and from outside of Berlin, but their total never reached a hundred. Among them were David Friedländer, Ludwig Marcus, Immanuel Wohlwill, Heinrich Heine, Joseph Perl and Lazarus Bendavid. The society was dissolved in 1824, at a time when all educational efforts at reform were forbidden by the authorities.

VEREIN ZUR ABWEHR DES ANTISEMITISMUS (Society for the Combatting of Anti-Semitism), the name of two organizations. The first was founded in Berlin in 1890, upon the suggestion of Heinrich Meyer-Cohn and under the leadership of the non-Jews Rudolf von Gneist, a prominent jurist, and Heinrich Rickert, a liberal Reichstag member for Danzig. Prominent among the other initiators of the society were the liberal member of parliament Theodor Barth, and the philologist Erich Schmidt. In 1890 the society, over the signatures of 535 leading Germans, including Theodor Mommsen, Gustav Freytag, Paul Heyse and Hermann Sudermann, appealed to the public to join in its fight "for the defense of the honor of the German citizens and German reputation being disgraced by the anti-Semitism of Stöcker."

The society, which had its seat in Berlin and a branch office at Frankfort, issued a weekly organ, *Mitteilungen aus dem Verein zur Abwehr des Antisemitismus,* later called *Abwehrblätter* (founded in 1891), and espoused and circulated several books defending the Jews against anti-Semitic canards, such as *Das Blut im Glauben und Aberglauben der Menschheit* (by Hermann L. Strack; 1891) and *Antisemitenspiegel* (1891). From 1909 to its dissolution by the Nazis in 1933 the society was headed by Georg Gothein, one-time Reichminister of the interior. The society was intensely active at the end of the 19th cent., but gradually lost all influence and in its last stages was little more than a paper organization.

A similar society for the combatting of anti-Semitism was founded in Vienna (1891) by Baron and Baroness von Suttner, Count Rudolf Hoyos, the industrialist Friedrich Leitenberg and the professor of medicine Hermann Nothnagel. It was joined by numerous outstanding non-Jews, including Count and Countess Metternich, Marie von Ebner-Eschenbach, the professor of medicine Theodor Billroth, the sculptor Viktor Tilgner and the composer Johann Strauss. It had an organ, *Das freie Blatt,* and a bureau for legal advice to the victims of anti-Semitism (*Rechtsschutzabteilung*). The Austrian society frequently cooperated with the German Verein. It ceased to function in the first World War, although it was never formally dissolved.

Lit.: Antisemitenspiegel (1891); *Mitteilungen aus dem Verein zur Abwehr des Antisemitismus* (later called *Abwehrblätter*): Nussenblatt, Tulo, *Der Weg eines Volkes zum Frieden* (1933); *Jüdische Rundschau,* July 11, 1933; Bein, Alex, *Theodor Herzl* (1940) 84, 89, 91, 92.

VERGA, IBN, *see* under IBN VERGA.

VERMONT, one of the New England states of the United States, with a population of 359,231 (1940 census), including a Jewish population of 2,000 (1937 figure, *American Jewish Year Book*). On the basis of estimated total population in 1937, this comprises 0.56 per cent of the total population of the state, and 0.04

per cent of the total Jewish population of the United States. In 1943 the Jews lived mainly in nine communities, the largest of which was Burlington, with a Jewish population of 1,000. Of the other cities in the state, the largest Jewish communities were in Rutland, Barre and Montpelier.

According to the 1936 Census of Religious Bodies issued by the Bureau of Census, there were ten Jewish congregations in this state, eight of which were in urban centers. Of the ten congregations, with a total membership of 1,727, seven had buildings solely devoted to religious purposes.

Jews first settled in Vermont following the Civil War, the first two known names being Stern and Scheff, who settled in Poultney in 1865. There were, however, a scattered few who were in the state before the Civil War, including an early settler in Poultney—Heineberg—as well as another who attained high rank in a Vermont regiment. The oldest Jewish cemetery in the state is in East Poultney, and the earliest tombstone dates back to the 1870's. Previous to the 1870's, Jewish peddlers from New York state and Montreal sold their wares throughout Vermont and returned to southern New York or Montreal for the holidays.

The first Jewish settler in Burlington was M. S. Wolk, who arrived in 1878. He was followed in 1880 by Morris Levin, who settled in Winooski, and Abram Marcus, who settled in Burlington. These early settlers lived on Champlain Street, which was then regarded as the outskirts of Burlington. Marcus was instrumental in bringing another early settler to Burlington—Nathan Lamport, of Franklin Falls, N. Y. Other early settlers were the Rosenberg brothers—David, Isaac, Harris and Zorach—and Isaac Perelman and H. London. This group induced A. Moscovitz, a Shohet, to settle in Burlington. Moscovitz was the first Jewish settler to bring his family with him. This group of eighteen young men met at the home of Isaac Perelman on Champlain Street, and organized the holy society known as Ohabi Zedeck. The first prayer-house was on Battery Street, and the next on the corner of Cherry and Church streets, a location now the center of the business district. As the community grew and prospered, it shifted to the north side of the town to Archibald Street, First Street (Riverside Avenue), Bright and Hyde Streets.

In 1883 a plot of land on Archibald Street was purchased for $800 on which the synagogue, Ohabi Zedeck, was built. It was chartered on February 3, 1887; the trustees of the synagogue were Isaac Perelman, Nathan Lamport, S. Simansky, Morris Levin, H. Friedlander, H. London, Joseph Frank, B. Frank and I. Blomberg. This group had formally organized in 1886 with H. Schubb as president, Isaac Perelman and Nathan Lamport as sextons, and Joseph Frank as treasurer. At that time an acre of land was purchased in South Burlington for a burial place.

A second congregation, formed in 1888, built a synagogue, H. Adam, on Hyde Street which was dedicated on July 10, 1889. A. Moscovitz was the rabbi, and the trustees included Morris Levin, Max Samuelson, A. Kaplan, I. Trotsky, I. Levin and H. Seagal. In 1938 the H. Adam synagogue and Ohabi Zedeck synagogue merged, largely through the efforts of Alex Clodny, a merchant, and Charles Samuelson, then a city alderman. A third synagogue, the Ahavath Gerim, organized on September 16, 1906, was also included in this merger.

Bethel Lodge of the Knights of Pythias was founded on March 8, 1900, by Israel Clodny. Moses Friedlander was the first chancellor commander. Lodge Deborah, an auxiliary of Bethel, was founded on March 18, 1906, with Mrs. Sarah Rosenberg as its first president. A club, the Young Patriots of Zion, was founded by H. S. Saiger in 1900, with a small library for boys between the ages of fifteen and sixteen. The first president was Charles Levin. This club was later reorganized as the Y.M.H.A. In 1902 a Talmud Torah was started in the Ohabi Zedeck synagogue. There were two teachers and four classes. Enough money was gathered to buy a building, opposite the Talmud Torah which was in use in 1943. This early building soon proved too small, and in 1910 the later Talmud Torah was erected, chiefly through the efforts of Rabbi R. Rosenberg, M. J. Levin, Joseph Frank, M. G. Rosenberg, I. Bregstein and the Reverend H. W. Sacks.

On November 26, 1905, the Jewish community of Burlington celebrated the 250th anniversary of the settlement of the Jews in the United States. Harry Rosenberg and Miss Rose Saiger (Mrs. Max Wolfe) were chosen as delegates from Vermont to a jubilee in New York city. Previous to their departure, a mass meeting was held in the Ohabi Zedeck synagogue, with the Honorable Hamilton S. Peck as guest speaker.

In 1906, out of a total enrollment of 4,450 school children in Burlington, there were 240 Jewish children in the grade schools and ten in the high school. In Montpelier and Barre there were twenty-five Jewish families, in St. Albans eight, in Newport fifteen, in West Rutland fifteen, in Bristol three, in Vergennes one, in Middlebury one, in Richford one, and in St. Johnsbury three.

The Jewish community in Burlington grew to such an extent that during the first World War sixty-eight Jewish men were enrolled in the ranks of the Army and Navy, and twenty-five Jewish students attended the University of Vermont. In January, 1943, the Jewish population of Burlington numbered 1,000, with 102 men and women in the armed services.

The activities of the Burlington Jewish community still centered around the Talmud Torah. This was the meeting place of the Jewish organizations which in 1943 included the Knights of Pythias, the B'nai B'rith, the Vermont Zionists, the Ladies Aid Society, the National Council of Jewish Women, the Jewish War Veterans and such youth organizations as Masada, A.Z.A. and the Junior Council. In 1943 Burlington Jewry supported and maintained a synagogue, a Hebrew school and a cemetery. The spiritual leader of the Jews of Burlington in 1943 was Rabbi David Herman (Orthodox).

Prominent in Burlington affairs were: Myron Samuelson, who was appointed judge of the Chittenden municipal court in 1938, a post which he held until 1942, when he was inducted into the Army; Abraham P. Feen, vice-president of the Burlington Trust Company; Major Jacob Frank, United States Army retired; Charles Samuelson, alderman and one time member of the charity commission; George L. Agel, one time police commissioner.

The second largest Jewish community of Vermont in 1943 was RUTLAND, where Rabbi Max Weine headed a Conservative group of about 200. Called The Rutland Jewish Center (formerly Adath Israel), a congregation was established in March, 1911. Its first rabbi was Maurice M. Mazure, who served from 1934 to 1936. Rabbi Weine began his service in 1936. The first synagogue was purchased in 1927, a building originally built in 1870 and known as the Baxter Memorial Library. Constructed of Vermont marble by the same architect who built the original Temple Emanuel on lower Fifth Avenue, New York city, the synagogue is a well-known Rutland landmark. Jews were first known in Poultney in the 1890's, at which time the marble industry flourished in West Rutland. A section of the National Council of Jewish Women was organized in Rutland in 1926, and a local Zionist group in 1936.

The town of Gilman was named after a Jewish resident, Isaac Gilman. HENRY W. LEVY.

VERNACULARS. In the course of their long history the Jews have adopted a number of languages for their daily speech, depending upon circumstances

of time and place, and the degree to which they mingled with the peoples about them. In the course of their dispersion throughout the world, they encountered and mastered the languages of various peoples; since Hebrew died out as a spoken language there has been no one vernacular which was used by all Jews. At various times, however, one or another language has been predominant in Jewish life and letters, and has been the vehicle of the major contemporary works of Jewish literature.

It is uncertain just what language was spoken by the Israelites in the time of the patriarchs and down to the time of their entrance into Canaan. It was very possibly a Semitic dialect related to either Arabic or Aramaic, since the connection of the patriarchs with Syria and with Arabia is distinctly emphasized in the Bible. Hebrew is known to have been the language of the Canaanites prior to the Israelite conquest, and may have been taken over by the Israelites only after they settled down in the land. The earliest Hebrew was not the language in which the Bible is written; it has survived only in a few ancient poems, particularly in the Song of Deborah (*Judges* 5), which is actually unintelligible in many places. It is probable that different dialects of Hebrew were spoken in various parts of the country during the period of the judges and the kings. The Ephraimites are known to have had a different pronunciation of the letter Shin (*Judges* 12:6), and the writings of the prophets contain a number of variant forms. The fact that the Hebrew of the Bible is comparatively uniform is probably due to the fact that in the course of the centuries the various books that comprise it were rewritten in the dialect prevalent in the kingdom of Judah (*yehudith, II Kings* 18:26). In the latter part of the period of the kings, Aramaic was current as a language of communication among peoples of different tongues, and was spoken by the court officials of Judah.

Even after the Jews had been transplanted to Babylonia in 586 B.C.E., they still retained the use of the Hebrew language, as is evidenced by the Exilic writings, especially of the prophets. (The inferior Hebrew of *Ezekiel* is probably due to the prosy nature of the prophet himself.) It was some centuries before they began to speak the Eastern Aramaic that became current there during the Persian period. Similarly, the Jews of the Second Commonwealth in Palestine continued to speak Hebrew; the tradition that they began to use Aramaic in the time of Ezra is unhistorical. The latter speech, at first used as the language of officials and then more and more in trade, gradually supplanted Hebrew; but it was not until about 250 B.C.E. that the latter language ceased to be a vernacular. In the meantime, Palestine had come under Greek rule and many of the neighboring cities became Greek colonies. This compelled many Jews to learn Greek, the more so as by the 1st cent. B.C.E. this language was the vernacular of the Roman empire from Italy eastward. It is probable that in the 1st cent. C.E. most of the Jews of Palestine knew both Aramaic and Greek, with the former as their mother tongue. This is apparent from a story recorded in *Acts* 21 and 22: Paul, after speaking to the people in Greek, which they apparently understood, tried to win them over by reverting to "the Hebrew tongue," that is, Aramaic, which they preferred.

During the period of the development of the Mishnah (1st cent. B.C.E. to 200 C.E.) the scholars attempted a revival of the Hebrew language in their legal discussions. This Mishnaic Hebrew which they evolved was used by them in the academies; yet it is doubtful if it was current among the people as a whole. The fact that the maid-servants of Judah Hanasi spoke Hebrew is treated as something very unusual (*Meg.* 18a; *R.H.* 26b, and other places).

Outside of Palestine and Babylonia the Jews quickly adopted the current vernaculars of the countries in which they lived. Jews settled in Persia as early as the 4th cent. B.C.E. and apparently learned Iranic tongues. Thus *Esther* indicates that Mordecai and the other Jews were able to converse with Persians without language difficulties. In a later period the use of the Iranian language must have been very common, for the Talmud indicates that the Jews there probably knew Persian as well as Hebrew. Further northwest, the Jews adopted the current Grusinian speech; but in Azerbaijan and parts of Iraq Aramaic was preferred.

The first Jews who settled in Egypt came in the time of the last native rulers before the Persian conquest. They were settled in the extreme southern part of the country, and they retained their Aramaic speech, as is evidenced by the papyri. On the other hand, the Jews who settled in Alexandria after the Greek conquest of Persia quickly adopted Greek as their vernacular. As early as 300 B.C.E. they felt the need of translating the Torah into Greek, as they could no longer understand the Hebrew, and it is noteworthy that the tradition of the Septuagint translation plainly indicates that they had to summon Jews from Palestine to accomplish this work of rendering Hebrew into Greek. The Jews of Cyrene and the islands of the Mediterranean also adopted Greek as their vernacular. The Jews of Rome apparently spoke both Greek and Latin. In the time of the later Roman Empire, the Jews seem to have followed the current vernaculars, Greek in the eastern part of the empire, Latin in Africa and Western Europe.

The Jews of the Byzantine empire retained their Greek vernacular until the time of the Turkish conquest (15th cent.). Even in modern times in Volo *Esther* was read first in Hebrew and then in an ancient Greek translation. In Salonika some of the Jews continued to speak an old Judeo-Greek dialect; hence they were known as the Rumaniotes. In the 20th cent. they amounted to 10,000 of the 80,000 Jews in the city. With the revival of the Greek kingdom in the 19th cent. many Jews began to learn modern Greek, especially in Athens and Corfu. In Constantinople only the tiny Karaite community still speaks Greek, but there are still Greek-speaking Jews in Rhodes.

The mountain Jews of the Caucasus (Dag Chufut, Yevrei Gorci) have adopted a variation of the Tat language, which they themselves call Farsi Tat. It is closely related to the Iranian-Median dialect of the Persians who settled in the districts of Baku, Daghestan and Yelisavetpol. The Bokharan Jews have a special Judeo-Persian of their own with a considerable literature. The Jews of other parts of Persia speak a modern Persian, but with certain dialectic differences of their own. The Jews of Isfahan have combined modern Persian with a number of words derived from Arabic, Hebrew, Turkish, Armenian and Kurdish. The Jews of Teheran speak both modern Persian and Turkish, as the latter is the language most used in the northwestern part of Iran. A special group of them are known as the Kashani, who have adopted the Kashan dialect, with which they have mingled many Arabic, Turkish and Hebrew words.

The triumphant march of Islam in the 7th cent. and after made Arabic the chief language in all the countries from Persia in the east to Spain in the west

where the armies of the Moslems penetrated. The Jews of these countries, accordingly, abandoned the Aramaic or the Greek which they had been speaking in favor of Arabic. The participation of the Jews in Arabian culture and the extensive literature which they wrote in that language is proof of the great hold which it had upon them. In the 10th cent. Saadia found it necessary to translate the Bible into Arabic. As the Jews migrated from Arab countries to Europe they gradually lost this speech, while in Spain Arabic was replaced by Spanish as the Christians drove out the Moslems. However, Arabic is still the vernacular of the Jews of Northern Africa and Mesopotamia, although the more educated among them speak also Spaniolish (Judeo-Spanish). The belt of Arabic-speaking Jews runs from Morocco along the southern coast of the Mediterranean as far as Cairo; it is an Arabic similar to that spoken by the surrounding population, but with many Hebrew terms. The Jews of Yemen have their own dialect, which is akin, not to the Southern Arabic dialects of the surrounding peoples, but to Northern Arabic forms. A similar language is spoken by groups of Jews in India and China, especially in Calcutta and Shanghai.

Jews settled in the Iberian peninsula at least as early as the Roman period. At first they spoke Latin, then the silver Latin of the later empire, and finally the first beginnings of Spanish; for despite the severe persecutions to which they were subjected in the 5th to the 7th centuries they participated in the culture of the peoples among whom they lived, and in fact possessed a good secular education. During the period of Arab rule over the greater part of Spain (8th to 12th centuries) they took an intensive part in the prevailing Arabian culture, but never lost their knowledge of the Romance languages. In the 13th cent. and after, when the Spaniards drove the Arabs and Moors to the south, the Jews remained in the same part of the country, dropped their Arabic, and spoke and wrote in Spanish; similarly, in Portugal, they used Portuguese as their vernacular.

So strong was the feeling for Spanish and Portuguese among the Jews of the Iberian peninsula that even after their expulsion from it (1492 and 1498) they continued to use Spanish in the countries whither they migrated. Thus in Holland they continued to speak Portuguese and wrote scholarly works in that language, sometimes in Latin characters, but generally in Hebrew letters. Spanish remained the language of the Sephardic communities in such cities as Hamburg and Copenhagen; in Brazil they could continue to speak Portuguese and in Central and South America, Spanish. A noteworthy derivative of this Portuguese of the Jews is the so-called Joe (that is, Jewish) Tongo language spoken along the coasts of Central America, and the language of the Samarakan Indians in the interior of Dutch Guiana (Surinam).

The exiles who settled in Italy soon abandoned their Spanish speech in favor of the closely related Italian tongue. On the other hand, those who migrated to other parts of the Mediterranean basin refused to adopt the language of the surrounding peoples. They retained their own language in Northern Africa, in the Balkans, in Greece and in Turkey for centuries.

This Judeo-Spanish, known also as Ladino and Spaniolish, is for the most part the Spanish of the 15th cent. with strong elements of Catalan, Portuguese, Provençal, Italian and even French. It is usually written in Hebrew Rashi script, but sometimes in a unique Hebrew cursive script that is a little reminiscent of the Arabic and considerably different from the Hebrew cursive script of the Ashkenazic Jews. The speech contains certain Hebrew words, usually those which have a religious significance, and in rare instances only are these given a Spanish form of declension. The presence of old Spanish words, not found in Castilian, as well as an older and softer mode of pronunciation, makes Judeo-Spanish sound somewhat different from modern Spanish.

The Jews of France seem to have adopted the various French dialects at an early period. A proof of this is seen in the commentaries of Rashi, which frequently give the meaning of a difficult Hebrew or Aramaic term *bela'az,* usually in a medieval French dialect.

The Jews of Germany similarly adopted the German dialects in the districts in which they lived. To this they added certain Hebrew expressions characteristic of Jewish life and ceremonial objects. In course of time, as most of the Jews lived in South Germany, the High German prevailing there became current for most Jews. As the German Jews from the 14th cent. on increasingly migrated toward Eastern Europe, they carried this form of German (Middle High German) with them. As in the case of the Spanish exiles to the Eastern Mediterranean, they did not adopt the vernaculars of the surrounding peoples, but retained their Judeo-German, which in course of time developed into Yiddish. This Yiddish in turn began to take on new forms and pronunciations, depending upon the countries in which they lived, such as Poland, Lithuania and Red Russia (Galicia). In the 17th cent. a reverse migration began from Eastern Europe to Germany, and the migrants brought back Yiddish as a separate and distinct Jewish language. Other forms of Judeo-German arose in such separate areas as Alsace, Holland, Switzerland, Denmark, Bohemia, Moravia and Hungary, each with a distinct vocabulary and mode of pronunciation. The largest element in Yiddish was always Germanic, amounting as a rule to about 85 per cent or more. About 10 per cent of the words were derived from Hebrew, while the remainder were generally Slavic. In Yiddish, Hebrew words were frequently given a German form of declension.

After the partition of Poland, Yiddish was carried by the Jews into parts of Russia from which they had hitherto been excluded. It continued to be spoken by the great majority of the Jews there into the 20th cent., and after the Bolshevist Revolution of 1917 it was proclaimed the official national language of the Jewish people. Elsewhere Yiddish has remained only in countries where the Jewish masses remain in compact groups and are separate from the rest of the population, as in Eastern Europe.

During the 19th cent., the period of emancipation, Jews rapidly began acquiring the languages of the countries in which they lived. In Germany this process was practically complete by the first decade of the 19th cent., and in France and Italy even earlier. In England and America, where the migration of Jews from Eastern Europe was larger, Yiddish was retained for longer periods. In the United States, German Jews continued to speak German and English both for a generation, while Yiddish was still the favorite speech of thousands of Jews in the 20th cent. This American Yiddish had acquired a number of English terms in common use, which often replaced Slavic or German words. In Latin America, especially in centers such as Buenos Aires and Mexico, Yiddish continued to survive in the 20th cent. with a Spanish admixture.

Scattered groups of Jews in other countries have adopted various other tongues. The Krimchaki of the Crimean peninsula speak a dialect of Turkish. The

Karaites of Lithuania prefer Yiddish, while those of Halicz in Galicia use Tatar and Yiddish and understand Ruthenian and Polish. On the other hand, the Karaites in Constantinople and in Jerusalem speak a Greek dialect, while the members of their largest community in Cairo speak an Arabic very little different from that current in the city. The Samaritans use as a vernacular a variety of Arabic such as is spoken in Palestine; they use a form of Aramaic in their liturgy. The Karaites use Hebrew letters to write down their vernaculars, but the Samaritans employ a cursive script that goes back to the old Hebrew writing found on coins.

While some of the Jews, especially in Calcutta, speak Arabic, other groups have different vernaculars. The Beni Israel in Bombay and in Poona speak Marathi, which they write in Sanskrit characters. The White and Black Jews of Cranganore speak the Dravidian dialect, Malajalam. Practically all Indian Jews, in addition, are familiar with English, as are the Yemenite Jews in Aden. There are also a few Yiddish- and German-speaking Jewish immigrants in India.

The Jews of China have long abandoned their earlier Persian or Hindu speech. Those of Kai-Fung-Fu speak a Chinese tongue. Elsewhere, as in Shanghai, Hongkong and other centers of trade, they have retained their previous languages, especially Hindu and Arabic. In Northern Africa Judeo-Spanish is still the favorite speech of the native Jews; but in Tripoli and Alexandria Italian Jews have brought their language with them. Others, as in Tripoli, speak an Arabic dialect, or, as in Jebel Ghurian, a mixture of Arabic and Hebrew. The Jews of some parts of Northern Africa were speaking Berber at the time of the Arab conquest, and the Jews of Mzab still speak a Berber dialect with many Arabic infiltrations.

Elsewhere in Africa various Arabic dialects usually prevail. However, the Falashas speak either Amharic or other local tongues, but retain a Jewish tongue of their own, known as Kuarena, from the province of Kuara; the language of their prayers is Geez.

Hebrew, which practically ceased to be a vernacular after 250 B.C.E., has always remained a literary language for the Jews. It was not until the 19th cent., however, that it was revived as a spoken tongue. This Modern Hebrew is now the principal vernacular of the Jewish settlers in Palestine, and is used as an additional tongue by Jews all over the world who use the language of the country as their vernacular.

VERNE, JULES, French writer, originator of scientification (fiction based on a scientific background), b. Nantes, France, 1828; d. Amiens, France, 1905. A widespread legend that Verne was Jewish derives from the following incident: One day a man entered Verne's home and declared that he knew that the latter was originally a Jew who had been converted to Catholicism and baptized at Rome. Verne made fun of him, made "corrections" to his story, and later repeated the incident frequently to his friends. Some of these took the story to be true, and the view spread that Verne was of Jewish origin. In 1925 his birth certificate was revealed, which clearly showed the falsity of the story, and in 1930 Edmondo Marucci proved that the whole tale arose out of confusion with the life of a Polish Jew who had taken the name of Julien de Verne.

Lit.: Marucci, Edmondo, *Giulio Verne* (1930), chap. 7.

VERONA, a city in northern Italy, with a total population of 150,000, including 367 Jews (1938). Jews appear to have resided in the city prior to the 10th cent. In that period Bishop Ratherius sought to sever the relations between Christians and Jews in the city. Most of the Verona Jews were Ashkenazim (Jews of German origin), and in the Verona synagogue the Ashkenazic ritual is still preserved. From 1422 on the Jews were forced to wear the Jew badge. In 1498 Jewish money lenders were driven out of the city, but they were permitted to return soon thereafter.

In 1526 the republic of Venice, which ruled Verona, prohibited the Jews to become money lenders. When, in 1597, the Jews were expelled from the duchy of Milan, many of the exiles, who were partly of German extraction, migrated to Verona. From 1604 on the Verona Jews had to live in a ghetto. In 1630 there broke out in the city an epidemic of which the Jews became victims only after some non-Jewish fanatics had thrown the clothing of diseased persons over the ghetto walls. In 1655 some Marranos were allowed to settle and trade in Verona.

Upon the entrance of the French Army (1797) the ghetto gates were removed and burned. With the return of the Austrians, however, the old restrictions against the Jews of Verona were reinstated. The Jews received a temporary emancipation in 1805 to 1814. Full civic rights were granted them in 1866, when the province of Venice joined the newly formed kingdom of Italy. From 1938 on the Jews of Verona were, like those of the rest of Italy, subjected to the provisions of the anti-Jewish and racial laws of the Fascist regime.

VERSAILLES PEACE CONFERENCE, general name for the conference held in Paris in 1919 to draw up the treaties between the various nations at the conclusion of the first World War. As in the case of the Congress of Vienna, the status of the Jews was one of the issues before the conference, and various Jewish groups, representing various shades of opinion, sent representatives there to treat with the delegates.

An American Jewish group, with which a British and French group cooperated, attempted for the first time in history to introduce a universal religious liberty clause into the peace treaties. This hope was sponsored in the United States by the Union of American Hebrew Congregations and the Central Conference of American Rabbis, who were represented overseas by a commission consisting of Henry Morgenthau, Sr., chairman, Oscar S. Straus, Julius Kahn and Rabbi Isaac Landman, who was secretary. The resolution was accepted in principle by the delegations of all the

nations concerned. It was acceptable to President Woodrow Wilson and was to have been included in the Covenant of the League of Nations. The Japanese delegation, however, demanded, in return for supporting the religious liberty clause, the insertion into the Covenant of a racial equality clause. The latter was unacceptable to so many nations that the proposal for a religious liberty clause never came to the plenary session of the peace delegates. Subsequently all the Jewish groups united in supporting the insertion in the treaties of minority clauses in behalf of the Jewish inhabitants of various countries in Eastern Europe and the guarantee of equality in others.

VERWEER, ELCHANAN, painter and engraver, b. The Hague, Holland, 1826; d. The Hague, 1910. He studied with his brother, Salomon Leonardus Verweer, and with Hermann Frederic Karel Ten Kate. Elchanan Verweer started as a xylographer, and in 1845 went to Brussels, where he illustrated Eugene Sue's *Le juif errant.* He later turned to genre painting.

Among Verweer's best known paintings were *The First Pipe* and *Winter* (Museum of Rotterdam) and *The Widow* and *Sufferers from Sea-Sickness* (Municipal Museum in The Hague). Verweer received a prize for his water color studies in London, and was made a Knight of the Lion of Nassau and an officer of the Order of Leopold.

Lit.: Champlin, *Cyclopedia of Painters and Paintings,* vol. 4, p. 363.

VERWEER, SALOMON LEONARDUS, painter, b. The Hague, Holland, 1813; d. The Hague, 1876. He was a brother of Elchanan Verweer. Salomon Verweer was a pupil of Bartholomeus Johannes van Hove, and traveled widely, especially in Normandy. He painted chiefly Dutch landscapes, marine, shore and city scenes. His pictures were exhibited in the museums of Amsterdam, Rotterdam, The Hague, Ghent and Hamburg.

He received prizes at Brussels (1842) and Philadelphia (1876), in addition to being recipient of several orders, including the Leopold Order (1851), the Iron Cross Order (1865) and the Lion Order (1874).

VESPASIAN (Titus Flavius Vespasianus; in Hebrew literature, Aspasianus), Roman general, later Roman emperor (69-79). In 67, after the overthrow of Cestius Gallus, Vespasian was entrusted by the emperor Nero with the task of suppressing the Jewish insurrection in Judea. Vespasian advanced in the spring of 67 with the Syrian legions from Antioch to Ptolemais, where his son Titus joined him with two legions from Alexandria; hence Vespasian was now at the head of more than 60,000 soldiers.

His first objective was the conquest of Galilee, which was defended by the Jewish general Flavius Josephus. There the citadel of Jotapata was taken after a short siege. After a brief rest, Vespasian led his troops against Tiberias and Tarichea. With the capture of Gamala by Vespasian and of Gischala by Titus, the whole of Galilee was in his hands, and the road to Jerusalem was open. Vespasian next conquered Perea, then proceeded from Caesarea to the cities of Antipatris, Lydda, Jamnia (Jabneh), Jericho and Gerasa.

After the death of the emperor Vitellius in 69, Vespasian became the Roman emperor. In his *Jewish War* (book 6, chap. 5, section 4) Josephus asserts that he had prophesied the choice of Vespasian as emperor. According to Talmudic sources, however, it was Johanan ben Zakkai who had foretold this event (*Midrash Lam.* 1:5; *Aboth de Rabbi Nathan* 2, recension B, par. 6; *Git.* 56b), and received from Vespasian by way of appreciation and reward permission to establish an academy in Jabneh.

On being elected emperor, Vespasian entrusted the conclusion of the Jewish war to his son Titus. In 71, after the victorious outcome of this campaign, Vespasian celebrated the victory together with his sons Titus and Domitian, minted coins commemorating the triumphant campaign, and erected a temple to the Goddess of Peace, in which, as in the imperial palace, the spoils of the Temple of the Jews, taken as booty, were kept. He imposed on the Jews the Fiscus Judaicus, and claimed the conquered Judea as his property. In 73 he decreed the closing of the Temple of Onias. Vespasian published memoirs on the Jewish war which were probably used by Josephus.

The Jewish war is called in Talmudic writings the "Vespasian war" (*Sotah* 9:14). In the Talmudic reports on the conquest of Jerusalem Vespasian is reputedly confused with Titus, and erroneously identified with Nebuchadrezzar and Hadrian.

VÉSZI, JÓZSEF, editor and journalist, b. Arad, Hungary, 1858; d. Budapest, 1939. He studied modern languages at the Universities of Budapest and Leipzig, and began early to contribute to newspapers in Budapest, both in the Hungarian and German languages. Under the editorship of Miksa Falk and Leo Veigelsberg, he became a columnist of the *Pester Lloyd,* and in 1894 was appointed editor-in-chief of the *Pesti Napló.* In 1896 he founded the *Budapesti Napló,* and succeeded in winning for that aggressively Liberal daily newspaper the collaboration of the élite among the young Hungarian writers. He had an unerring instinct for the discovery of talent. Vészi was one of the first to appreciate the lyrical genius of Endre Ady; he discovered Dezső Kosztolányi, Ferenc Molnár and Lajos Biró. The latter two later became his sons-in-law.

From 1899 to 1905 Vészi was a member of the lower chamber of the Hungarian parliament, where he sat in the ranks of the Liberals. He played a notable part in the controversy between the crown, supported by the Hungarian Liberals, and the chauvinistic Magyar Independents. He was a ministerial counsellor and head of the press bureau of the Fejérváry cabinet of 1905, imposed upon Hungary by the crown against the will of parliament. Together with Minister of the Interior Kristóffy, Vészi propounded the idea that the king should grant universal suffrage to the population of Hungary as a means of weakening the Magyar supernationalists. The Magyar Independents, dreading the results of universal suffrage, dropped their preposterous demands, whereupon a coalition cabinet was formed in which they constituted a majority.

As the ruling classes socially boycotted the former supporters of the Fejérváry cabinet, Vészi went into exile to Berlin (1906-10). There he founded, together with Baron Lajos Hatvany, the review *Jung-Ungarn,* a brilliant though short-lived attempt to present Hungarian cultural values to

József Vészi

a wider public. He translated into German the best Hungarian historical play, József Katona's *Bánk Bán,* and succeeded in persuading Max Reinhardt to produce it.

On his return to Hungary after the fall of the coalition régime, he founded the *Budapester Presse* (1911), continuing to lend his support to the idea of universal suffrage, then backed by Archduke Francis Ferdinand, heir to the throne. After his appointment as editor-in-chief of the semi-official *Pester Lloyd,* Vészi had to go along with subsequent governments. He was one of the keenest supporters of the alliance with Germany, and during the first World War pursued the policy of fight to the last. Following the period of revolutions and counterrevolutions, he resigned himself to serve, although not without reservations, the regime of Regent Nicholas Horthy. He was made a member of the upper house of parliament, and several times represented Hungary in the Assembly of the League of Nations.

When pressure was brought to bear by the League on the Bethlen government to abolish the numerus clausus restricting the freedom of education of the Jews of Hungary, Vészi, together with Vilmos Vázsonyi, ex-minister of justice, advised League circles not to interfere with Hungarian legislation. The two men perhaps trusted some vague promises of the government when they declared that Hungarian Jews wished to respect a Hungarian law, even if it robbed them of a vital right.

As a youth Vészi published some lyrical poetry, *A bánat dalaiból* (Songs of Sorrow; 1879) and *Traviata* (1881). For several years he was president of the association of Budapest newspapermen and secular president of the Hungarian-Jewish Literary Society (IMIT). He retired from the editorship of the *Pester Lloyd* in 1938.

Vészi was the last Jewish journalist—prior to the second World War—to exercise a vital influence upon Hungarian state affairs. Although he never adopted a clear-cut stand against the anti-Semitic counterrevolution, he was always active in Jewish affairs and was an honorary executive member of the Jewish community of Pest. ERNŐ LORSY.

VESZPRÉM, city in Hungary. Late in the 17th or early in the 18th cent. Jews probably lived outside of the fortress of Veszprém. A document of 1723 declares that any Jews settling in the city of Veszprém are subjects of the local bishop. In 1736 sixteen Jews lived there under episcopal jurisdiction. The bishop exercised a number of rights over the Jewish community; he bestowed privileges and business licenses on it for a considerable annual protection fee.

Services were held at various places; a Torah curtain bearing the date 1766 indicates that it was made for the second place of worship of the congregation. In 1799 Count Ferenc Zichy had a synagogue built which he rented to the Jews of Veszprém. A school was established on the rented ground in 1805; a Talmud Torah had been in existence from 1780 on. In 1839 the community acquired the title for the ground together with the synagogue and school buildings; the former was enlarged.

In 1799 the Hebrah Kaddisha of Veszprém numbered 117 members, including the Jews of the surrounding villages; in 1838 the community had over one hundred members. From that time on it grew steadily in numbers and economic importance. In 1865 an ornate synagogue was dedicated by Lipót Löw; in 1869 the community accepted the statutes established by the National Jewish Congress.

Among the rabbis of Veszprém were Reuben Rakonitz (1770-90), a pupil of Ezekiel Landau; Hananiel Pillitz (from 1791 on); Abraham Hochmut (from 1859 on); Arnold Kiss (1896-1901); and Armin Hoffer (1901-29). Chief Rabbi Lajos Kun (from 1929 on) was county president of the committee for Jewish education.

Among those born in the Veszprém Jewish community were József Bánóczi, the linguist Zsigmond Simonyi, the author István Szomaházy, whose name adorns one of the streets of Veszprém, and the violinist and conductor Leopold Auer.

In 1930 the city of Veszprém counted 850 Jews in a total population of 17,800.

VETURIA, PAULLA (proselyte), *see* PROSELYTES.

VEYEETHAYU, alphabetical Hebrew hymn which describes in exultant manner the universal worship and reverence of God in the future Messianic kingdom. For this reason it is inserted in the German (Ashkenazic) ritual in the Additional (Musaf) service for Rosh Hashanah and Yom Kippur before the passage beginning *vethimloch* ("And Thou wilt reign"). The contents of the hymn are light in mood, and the hymn itself is extremely popular. The attempt has been made to connect its origin with the Byzantinian iconoclasts (about 725 C.E.); however, the text gives no support to this theory.

Lit.: Krauss, *Studien zur byzantinischen Geschichte,* 41; Davidson, Israel, *Otzar Hashirah Vehapiyut,* vol. 2 (1929) 186; Idelsohn, A. Z., *Jewish Liturgy* (1932) 221.

VEZINHO, JOSEPH, *see* VECINHO, JOSEPH.

VICHY FRANCE, the name of that part of France which was exempted from German military occupation after the armistice of June 22, 1940. Marshal Henri-Philippe Pétain was authorized by the Chamber of Deputies and Senate on July 9, 1940, to provide a new constitution, and was given full administrative and legislative power. Vichy became the seat of Pétain's government and the provisional capital of unoccupied France.

The new regime inaugurated by Pétain caused immense injury to the Jews in France, both to those of French nationality and to the many thousands residing in France, especially the refugees from Germany, Austria, Czechoslovakia and Poland.

Pétain was no anti-Semite, but he hated the ideas of the French Revolution, liberalism and democracy, and, as soon as he came to power, was eager to repudiate the basic principles of liberty and equality of rights, and to organize pre-republican institutions.

Next to Pétain, Pierre Laval was the most influential man in Vichy France. When Pétain became chief of

state he made Laval prime minister and heir apparent. Laval was not an anti-Semite. During the first World War he had been an extreme Leftist and defeatist, and after he left the Socialist Party he was constantly reelected in an electoral district whose inhabitants were mostly Socialists and Communists. He was mayor of a suburb of Paris, likewise inhabited by Socialists and Communists. For many years Laval was closely associated with the Jewish banking house of Lazard Speyer, and until the very day of the armistice he entrusted his two Jewish secretaries with the management of his confidential affairs, both political and commercial.

The French people's general longing for peace at any price, which was exploited by the adversaries of the Third Republic, aided Pétain and Laval, who were supported by the vast majority of the members of the Socialist Party when they endeavored to put down resistance to Hitler. They all ignored the German mentality and Hitler's plans. The old party colors vanished, and two new parties emerged: the adherents of "collaboration with Germany" and the adversaries of any pact with Hitler. For a short time the majority of the French people was "collaborationist." After a few months' experience with "collaboration" both former Rightists and Socialists were disillusioned.

But there was no possibility of overthrowing Pétain and Laval by means of popular vote or pressure of public opinion; and the unarmed people could not face the German army of occupation. Pétain and Laval had to pay for the protection by the Germans. The payment was at the expense of both the French people, deprived of their food and raw materials, and of the Jews living in France.

Pétain was determined to give the Germans as little as possible, but he was forced to yield, sometimes after an attempt to resist. Laval avowedly was a man without principle. He believed in his own capacities as a negotiator and bargainer, and was convinced that he could obtain better conditions from the conqueror by imitating the Nazi regime. Even when he became aware that such an imitation did not prevent Hitler from robbing France, he remained ready to sacrifice the Jews in order to get any slight concession. The more German pressure upon the Vichy government increased, the more Laval became eager to present the Jews as the scapegoat responsible for the French people's plight.

The measures to curb anti-Semitism, drafted in 1939 by the republican government of France, were cancelled in August, 1940, and anti-Semitic agitators were given an amnesty. Immediately after the armistice the French radio began to agitate officially against the French and foreign Jews, and the territory of Vichy France became open to anti-Jewish propaganda made in Germany. There was complete freedom to libel and defame Judaism and Jews. For a short period this anti-Semitic agitation was successful, and there were riots in Lyon and Marseille. But soon the people of France became aware of the origin of the agitation, and the vast majority considered anti-Semitism an espousal of Hitler's cause.

On October 8, 1940, the law of October 24, 1870, drafted by Adolphe Crémieux, which had accorded to the Jews of Algeria full French civil rights, was repealed. On October 18th the Vichy government excluded the French Jews from all higher offices of state, from the civil service, from the armed forces and the police, and from all teaching positions. By the same decree Jews were prohibited from editing newspapers and periodicals, except strictly scientific ones, from directing theatres and cinemas, and were excluded from any directive or administrative position.

The government, however, provided some exceptions for Jews of outstanding merit. Thus, two generals of the army, Pierre Brisac and Darius Bloch, the chief mining engineers Armand Meyer and Pierre Lion, Professor Paul Lévy, inspector general of mines and teacher at the École Polytechnique and the École des Mines, and Jacques Rueff, vice-president of the Banque de France, were exempted from the law restricting the activity of Jews. The great philosopher Henri Bergson also was offered exemption, but he declined it a few days before his death.

Although Laval was stripped of all his offices on December 14, 1940, the situation of the Jews grew worse step by step. On January 2, 1941, Jews were excluded from all supervisory positions in the mining industry and technical services. On January 26, 1941, they were ousted from all municipal secretaryships. On June 24, 1941, a decree restricted the proportion of Jews in universities to 3 per cent, and in liberal professions to 2 per cent. The Rothschild family was expropriated on September 8, 1940. The philanthropist David Weill, the deputy Edouard Jonas, the manufacturer of automobiles Louis Rosengard, and the owners of the great Levitan furniture stores were expropriated. Other Jewish firms were "Aryanized." By May 15, 1941, a total of 2,560 Jewish proprietors had been deprived of their businesses by means of "Aryanization." The anti-Semite Xavier Vallat was appointed commissioner general for Jewish affairs to supervise the strict execution of the anti-Jewish laws. He prepared several decrees to curb the economic activity of the Jews.

In April, 1942, Germany, outraged by Léon Blum's moral success in the Riom trial, imposed on Pétain the reinstatement of Laval as prime minister. Immediately after reentering upon his official duties, Laval dismissed Vallat and appointed the brutal Darquier de Pellepoix as commissioner general for Jewish affairs. At the same time, the dissolution of all existing Jewish cultural and relief organizations and the establishment of a Central Union of Jews of France were effected; the Central Union was to conduct its activities under the direct control of the commissariat for Jewish affairs. Pellepoix, who had been sentenced because of violating the law forbidding anti-Jewish propaganda, issued in 1939, was certainly imposed on Laval by Hitler's henchmen, but Laval did not hesitate to accept this notorious Jew-baiter who had been on the German payroll before the War. Laval's principal intention was to obtain the release of a large number of French prisoners of war by providing Germany with a corresponding number of French skilled workers. This plan was a failure, and Laval again tried to utilize Jewish victims in order to appease Hitler, who threatened to substitute the French Nazi Doriot for Laval. Therefore Laval ordered, in August, 1942, the round up of Jewish refugees to be deported to German-occupied countries. About 30,000 Jewish refugees in Vichy France were hunted down, and some were deported. The French people demonstrated strenuously in favor of the Jews, and pope and the archbishops of France protested. The protests were unsuccessful, but for the first time since the armistice a cry of general indignation of the French people embarrassed the rulers of Vichy France.

In December, 1942, the Germans occupied the remainder of France, and virtually ended the sorry farce of the Vichy regime. In February, 1943, General Henri Honoré Giraud, whom the United Nations made head of French North Africa, abrogated all anti-Semitic measures.

In the meantime, there were reports of harsher measures against Jews in former Vichy France, some being sent to concentration camps, others to labor camps, and still others deported to Poland. In March, 1943, a group of 2,500 foreign Jews were deported to Poland from a camp in the vicinity of Lourdes; such deportations were continuing early in April, 1943, by which time a total of 10,000 foreign Jews had been deported from the former Unoccupied France and about 30,000 from the former Occupied France. Jenö Vida

VIDA, JENŐ, Hungarian deputy, and economist, b. Budapest, 1872. After graduating from the Commercial Academy of Budapest he entered upon a clerical career, and from humble circumstances rose to the position of director general of the Hungarian General Coal Mines Company, Limited, one of the leading concerns of Hungary. Vida was a member of the board of the national association of Hungarian manufacturers, of the Budapest chamber of commerce and industry, and of many other institutions. In 1928 he was appointed a member of the upper house of the Hungarian parliament, and in 1936 Regent Nicholas Horthy awarded him the Hungarian Order of Merit, first class (with the title of excellency), for outstanding contributions to the economic life of Hungary.

Vida, an honorary executive member of the Jewish community of Pest, was president and a generous patron of the Budapest Jewish orphanage for boys. He was one of the most influential members of the Jewish community of Hungary.

VIDAL, GEORGES FERNAND, *see* WIDAL, GEORGES FERNAND.

VIDDUI, *see* CONFESSION.

VIENNA, capital of Austria, and formerly the third largest Jewish community in Europe, with 176,034 Jews (1936) out of a total population of 1,861,856. Jews were reported to be living in Vienna (Vindobona) among the Roman colonists.

From the 12th Cent. on. Historically, however, the settlement of Jews in Vienna is mentioned for the first time at the beginning of the 10th cent. In 1194 a Jew named Shlom was appointed mint master, and in 1204 the existence of a synagogue in Vienna is mentioned. As was shown by researches, it is hardly probable that a ghetto existed at such an early date; on the contrary, the Jews were permitted to own houses in several parts of the city. The ghetto was established in the 13th or 14th cent. A Jewish community existed at Vienna in the 13th cent.; it had as its rabbi the celebrated Isaac Or Zarua.

Under the rule of the Bohemian king Ottokar (middle of the 13th cent.) the number of Jews in Vienna increased, and they came to be concentrated in certain districts of the city ("Unter den Juden," "in der Judengassen," "Judenstadt," "Schulhof," also the "Judentor," on the site of the present-day Wipplingerstrasse, with the "Judenturm"). The Jews lived in the "Judenstadt" for approximately 200 years.

The Vienna Jewish community did not suffer so severely in the period of the Crusades as did the other Jewish communities of Germany. The social conditions of the Vienna Jews were also, to a certain extent, better, since they were regulated by the statute of Duke Frederick II (the Quarrelsome). Rudolph of Habsburg, who originally had confirmed Frederick's statute concerning the Jews, declared, under pressure from the citizens of Vienna, that Jews could not be elected to any public offices; he thus adopted the position assumed by the church council of Vienna of 1267 in its decisions and decrees.

Many Jews, such as David Steuss and his sons, participated in large businesses; their debtors included the duke and the nobles, as well as part of the population possessed of less means, such as that in the Scheffstrasse. During the Black Death (1348-49) the Jews of Vienna, too, suffered considerably. In 1370 they were expelled from the city, but soon thereafter they were readmitted in order to render their aid in moments of financial embarrassment. The totally closed off Vienna ghetto of that time was situated in the region of the so-called "Judenplatz" of modern times; the cemetery was located in front of the Kärntner Gate. In 1406, on the occasion of a fire, the Jewish quarter was looted.

As the result of an alleged theft of a host in Enns, Duke Albrecht had all the Jews of Vienna burned at the stake on March 12, 1421. This decree was known as the Vienna Gezerah. Some of their homes were sold, some given away, and Jews were forbidden "for all time" to resettle in Vienna.

However, by the year 1512 there were already twelve Jewish families living in Vienna; these were required to live in two houses designated for such purpose. Their condition was regulated anew by the Jewish ordinance of 1528. The disfavor in which the Jews of Vienna were held by the general population led to the enactment by the Vienna church council of the regulation requiring the Jews to wear the Jew badge and to the order issued in 1554 requiring all Jews to leave Lower Austria within six months. This time limit was extended several times until the year 1575, when the expulsion was actually carried out. While the Jews returned to Vienna after this expulsion, too, their situation was just as insecure as it had been previously. In 1600 the greater part of the Vienna Jewish community, which had meanwhile increased to thirty-one families, was again expelled after they had refused to pay the sum of 20,000 gulden for permission to remain, but they were soon able to return.

A more peaceful and secure period in the history of the Jews of Vienna appeared to have been ushered in when the "Untere Werd" (a section of a small island in the Danube River) was made their residential district. This quarter of the city was surrounded by a wall, and was connected with the inner city by a drawbridge. Soon a beautiful synagogue was erected there. The narrowness of the territory occupied by the city was given as the excuse for the seclusion of the Jews. Ferdinand II promised the Jews imperial protection "for ever." They were subjected exclusively to the jurisdiction of the court of the lord high marshal, were permitted to appear in the city without the Jew badge, and they were protected against violence on the part of the populace by the threat of severe punishment. The Jews were, against the wishes of the burghers, granted permission to open shops again in the old Kienmarkt.

As regards their internal affairs, they enjoyed full autonomy, and they were free to develop their cultural life as they saw fit. However, as early as the year 1637,

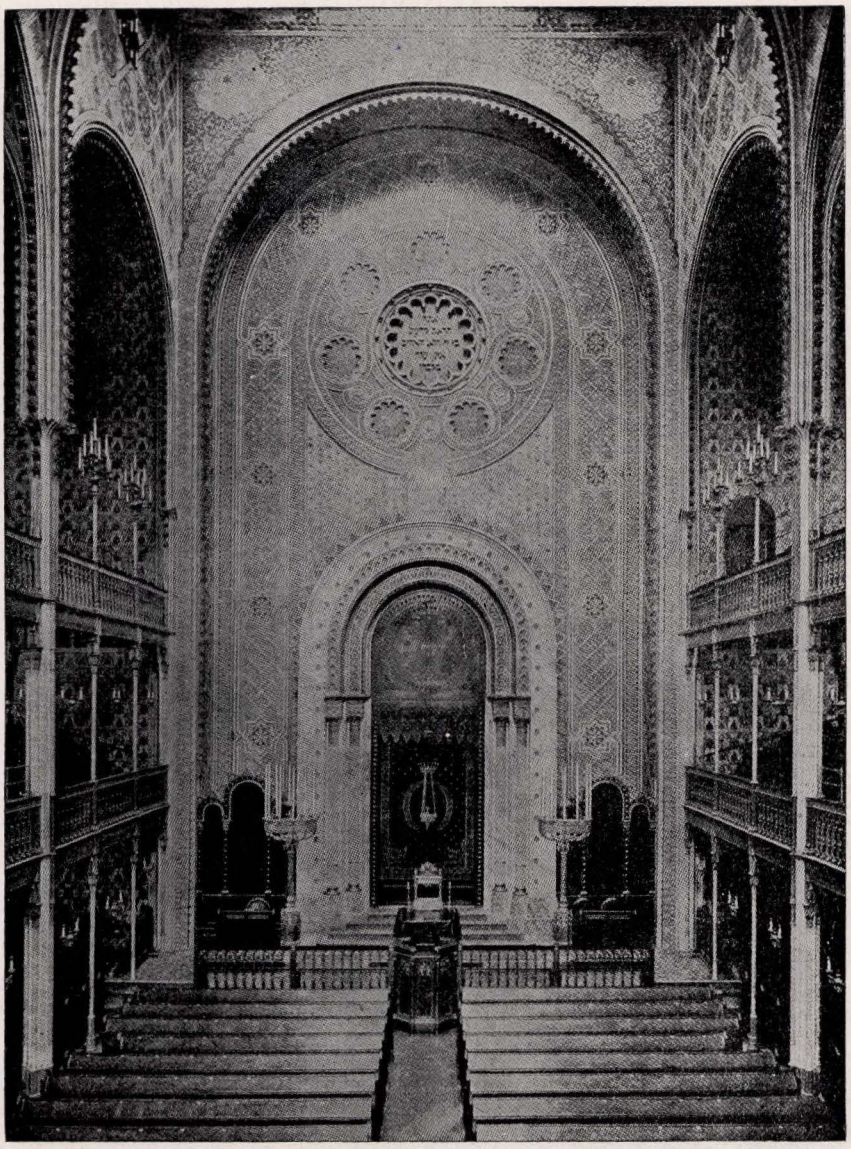
as the result of envy of the commercial status of the Jews, the burghers of Vienna again demanded the expulsion of the Jews; the latter were forced to pay a very large sum of money in order to avert the danger of this expulsion. However, from that time on they were subject to economic restrictions and to the jurisdiction of the city. Their former privileges were renewed in 1645 and 1646, and the election of their elders was regulated anew.

After the uprisings of the Cossacks under Chmielnicki and the Swedish war (about the middle of the 17th cent.) many Polish Jewish refugees found a haven in Vienna. In 1665, when the body of a woman was found in the Jewish quarter and the populace accused the Jews of having murdered her, Emperor Leopold I, who had up to that time been favorably inclined toward the Jews, wavered, and under the influence of the empress and of Bishop Kollonitsch, of Wiener-Neustadt, issued an order expelling the Jews from Vienna and from Lower Austria. The expulsion was carried out on the basis of the accusation that the Jews were in league with the Swedes; the time limit for such expulsion was set for August 1, 1670.

All efforts made by the Jews to have the imperial order cancelled were unsuccessful; they succeeded only in bringing it about that the city of Vienna, in return for a payment of 4,000 gulden, assumed the protection of the Jewish cemetery in the Rossau. The houses in which the Jews had lived were taken over by the city, their synagogue was transformed into a church to the accompaniment of great and solemn festivities (it was given the name of Leopoldskirche, which it still bears today, in honor of Emperor Leopold), and the Jewish quarter was called Leopoldstadt. Many of the expelled Jews went to Brandenburg.

The burghers of Vienna, who had pledged themselves to pay the taxes thitherto paid by the Jews (the so-called "toleration tax" amounted to 14,000 gulden annually), could in the subsequent period hardly pay their own taxes, with the result that as early as 1675 several Jews were permitted to return to Vienna. Samson Wertheimer and Samuel Oppenheimer came to Vienna as court Jews in 1684. In the following period, too, there were frequent riots against the Jews, and again and again the demand was made for their expulsion. Nevertheless, the number of Jews in Vienna steadily increased; in 1753 there were again more than 700 Jews in the city.

With the exception of some court Jews, the new Jewish settlers in Vienna resided together in certain appointed houses. However, it was only gradually that any increase in their numbers was permitted, since such subsequent rulers as Maria Theresa and Joseph II likewise were not inclined toward permitting the number of Jews in the city to be augmented. No change took place in this situation until the issuance of the Edict of Toleration of 1782, by the provisions of which "tolerated" Jews were permitted to live anywhere in Vienna together with their families. However, foreign Jews, as heretofore, continued to be allowed to stay in the city only temporarily, and the founding of a congregation or the building of synagogues remained prohibited. Leopold II actually introduced a "poll tax" (*Leibzoll*) to be paid by foreign Jews who came to Vienna.



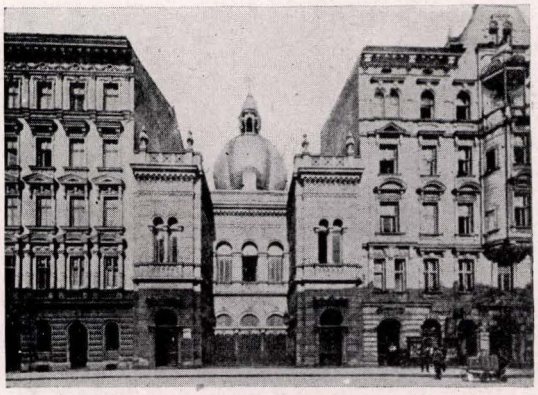
The social condition of the Vienna Jews was finally improved as a result of the general Enlightenment and, as in Berlin, there soon came into existence in Vienna also famous salons of gifted Jewesses (such as that of Fanny von Arnstein, née Itzig) who, especially at the time of the Congress of Vienna, gathered about themselves the cultured society of Vienna. In 1811 the erection of a "Betstube" (prayer-room) was permitted, and finally, in 1823, a synagogue could be erected, after a Jewish hospital had already been built in the 18th cent. in the vicinity of the old Jewish cemetery in the Rossau. The constitution of March, 1849, finally brought to the Jews the long hoped for equality of rights. Despite its repeal in 1851, such civic equality again was put into actual validity in Vienna in 1860. In the 1890's, in the post-first World War period, and in the period before the Nazi-dictated and enforced Anschluss (1938) such civic equality of the Jews of Vienna was seriously challenged and often actually endangered as a result of anti-Semitism and of Nazi propaganda against the Jews.

The Jews of Vienna had in their ranks a large number of outstanding religious and intellectual leaders. These included Rabbi Isaac ben Moses, called Or Zarua after his famous work; Meir ben Baruch Halevi, who introduced the title of Morenu for rabbis; Samuel Abraham Klausner, noted collector of Minhagim; Abraham Flesch, Veit Munk, Yomtob Lipmann Heller; the physician Leo Lucerna or, as he was called in Hebrew, Judah Löb Maor Katon; Sheftel Hurwitz, Gerson Ashkenazi, the above-mentioned court Jews Samson Wertheimer and Samuel Oppenheimer, the preacher Isaac Noah Mannheimer, who in 1823 was called with the eminent chief cantor Salomon Sulzer to the newly erected Vienna Temple; Adolf Jellinek, Moritz Güdemann, A. Schmiedl, Eisik Hirsch Weiss, Meir Friedmann, Zebi Perez Chajes, and the contemporary Jewish scholars, such as Rector Joseph Schwartz, of the Jewish Theological Seminary, and the historians Samuel Krauss, Bernhard Wachstein (d. 1935), and Armand Kaminka. All these and many others lived in Vienna, some as officiating rabbis, and as directors of institutions of learning, others as private scholars who encouraged and fostered Jewish scholarship and the history and culture of the Jews.

The extensive and highly organized banking system of Vienna, which, before the second World War, formed the financial center of Central and Eastern Europe, and the flourishing export trade which made Austrian products famous in the markets of the world, were mainly the work of Jewish bankers and merchants in Vienna. Before their emancipation the Jews of that city were a small privileged class of capitalists. As soon as the old disabilities were removed, their number rose rapidly through immigration from Bohemia, Hungary, Galicia and Russia. This large influx of Jews, many of whom were not assimilated to the standards of Western civilization, later on aroused feelings of dislike, successfully exploited by the anti-Semites.

Yet even this immigration was on the whole advantageous for Vienna's economic life. These Jews were extremely industrious, enterprising and frugal. They began as peddlers, later worked their way up to the position of small shopkeepers, and many rose to wealth and to a respected position. A long list of leading industrialists, great merchants and distinguished intellectuals came from that class of Eastern European Jews, whose services to the community were conspicuous. In this way the Jews of Vienna became for some time a rather wealthy class, although their share in the wealth of the country was never so large as their enemies believed. Moreover, this wealth was not concentrated in a few hands. The bulk of it was in small and middle-sized fortunes. Large capital was in most cases quickly split up, since Jewish families used to have many children. Moreover, among the descendants of successful businessmen the striving after a more intellectual way of life was exceedingly strong, and fortunes inherited by intellectuals were rarely preserved intact.

The legal and medical professions were especially attractive, and soon Jews and former Jews comprised the majority of lawyers and physicians in Vienna. The civil service and the army also admitted Jews, although they usually had to be baptized. Emperor Francis Joseph appreciated their services, and most of the high officials and aristocrats of his reign had little prejudice against them. In this period an astounding number of Jews and half-Jews rose to the highest positions as ministers, generals, high judges and professors. No names are more famous in the development



Interior of the Great Synagogue in Vienna

of Austrian law than those of Josef Unger, Julius Anton Glaser, Franz Klein, and Karl Samuel Grünhut. All four were professors of law at the University of Vienna, and later on became members of the Austrian House of Lords. Three of them were also ministers of justice. Another minister of Jewish descent was Emil Steinbach, who was a fervent advocate of social reform and a very successful minister of finance. He was the pioneer of social legislation, introduced a stable currency based on gold, and in 1891 tried to overcome the national strife which threatened the foundations of the Austrian Empire by means of a bill proposing universal suffrage. One of the most conspicuous foreign ministers of Austria, Count Lexa Aehrenthal, came from a family which had originally been Jewish.

The achievements of Austrians of Jewish extraction in medicine and in almost every branch of science are overwhelming. The University of Vienna was a hotbed of anti-Semitism, and well-paid and influential professorships were seldom given to Jewish scholars. Yet in the courts of the university, where the busts of its great scientists were placed, there were many memorials erected in honor of professors who would be called "non-Aryan" today. The number of Austrian scholars of Jewish blood was always so great that a large part went to German and other universities abroad. A list comprising only the best-known names would be far too long to be included in this article. The development of broadcasting was made possible only through the invention of the amplifying valve by Robert von Lieben, an Austrian Jewish physicist. Only a few years before the Anschluss a ministry which professed anti-Semitism nevertheless felt obliged to issue a postage stamp with Lieben's portrait, in order to remind the world that this invention was due to an Austrian. In front of the Vienna Polytechnic there was a monument devoted to the inventor of the benzine automobile, Siegfried Marcus, of Vienna.

Better known to the general public are the names of Viennese poets and writers. In every history of modern literature the highest rank is conceded to authors of Jewish origin. One need name only Hugo von Hofmannsthal, Arthur Schnitzler, Karl Kraus, Franz Werfel and Stefan Zweig. Gustav Mahler, the director of the Vienna Opera, and Karl Goldmark were recognized as great composers. The musical and theatrical life of Vienna can hardly be conceived without the role played by Jews as authors, actors, producers and critics. Adolf von Sonnenthal was considered

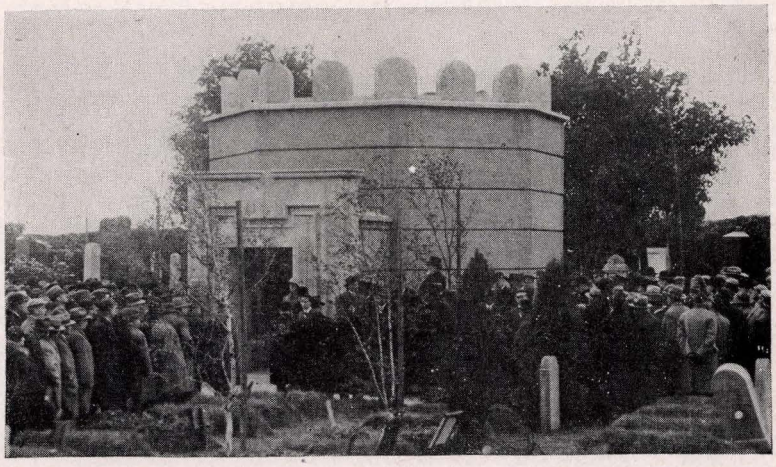
Exterior of the Leopoldstrasse synagogue in pre-Nazi Vienna

the greatest actor of his time. In 1943 Elisabeth Bergner was perhaps the Viennese actress best known in the United States. Max Reinhardt is universally known as a producer of extraordinary ingenuity. The lighter sort of Viennese theatrical art, especially the operetta, also owed much to Jewish composers and performers. No Viennese song ever enjoyed such popularity and became such a classical document of the old Viennese spirit as the "Fiakerlied" composed by Pick, a judge of Jewish descent and a great favorite of aristocratic society. A special chapter would have to be devoted to the role of Jews in Viennese journalism, the foremost of whom were Moritz Benedikt, publisher of the influential *Neue Freie Presse;* Jakob Lippowitz, publisher of the *Neues Wiener Journal;* Theodor Hertzka, founder and publisher of the *Wiener Allgemeine Zeitung;* and Moritz Szeps, publisher of the *Neues Wiener Tagblatt.*

The Jews of Vienna endowed their beloved Vienna with charitable and other institutions which contributed largely to her welfare and fame. No public collection was ever made in which the contributions of the Jews did not far surpass those of the rest of the population, although as a whole the Jews of Vienna were certainly less wealthy than were the non-Jews. Great hospitals were founded and munificently endowed by Viennese Jews, and countless skilled Jewish physicians devoted their services without payment to such institutions as the Polyclinic, where everybody could find help. The wonderful system of popular lectures and academies which made serious scientific studies accessible to everybody was mainly built up through the efforts of Jews, particularly Professor Ludo Hartmann, a half-Jew, and Professor Emil Reich. One of the most beautiful parks of Vienna was that given to the city by Franziska von Wertheimstein, a Jewess whose salon was the center of literary life. LEOPOLD MOSES.

Prior to the Annexation of 1938. Discussion regarding the status of the Jews went on continuously in the press and from the platform. The alarm created among the Jews by the combined assault of sections of the priesthood, political clericals and the government-appointed officials was such that Jewish leaders found it necessary to remind the government of the existence of the minority clause of the Treaty of St. Germain, incorporated in the constitution.

Despite the need for unity, there was frequent wrangling between the assimilationist Union of Austrian Jews and the Zionist groups. Superficially, it would appear that the cause of the quarrel lay in their different attitudes toward communal affairs, as expressed in the *Wahrheit,* the organ of the Unionists, and in the *Stimme* and the *Neue Welt* of the Zionists. (The only Jewish daily in German, the *Wiener Morgenzeitung,* founded in 1919 and edited by Robert Stricker, a former Zionist deputy to the Austrian parliament, ceased publication in 1927.) But underlying this difference was the fact that the Union, supported chiefly by the wealthy, long-established Jews, could not reconcile its Austrian patriotism with Jewish nationalism.



To end the undignified strife, peace was established in the Jewish Communal Council between the Zionist majority and the non-Zionist Union of Austrian Jews, after the election of November, 1936. According to an agreement then made, several leading members of the Union were to occupy important posts on the Committees of the Council, and one of the leaders of the Union was to become a vice-president of the Jewish community. The community was authorized to collect its assessments and empowered to call upon the government to enforce the collection. The considerable number of conversions of Jews to Catholicism was frequently ascribed to these necessarily heavy taxes. It was, however, pointed out that this trend toward the church in academic circles was due to unofficial but persistent elimination of Jews from academic and professional posts, coupled with the official emphasis on the "Christian German" character of the new Austria. Some pro-government organs, notably the semi-official clerical *Reichspost* and the *Linzer Volksblatt,* announced that the only satisfactory solution of the problem was the conversion of the Jews to Christianity. Nevertheless, the official figures in the published report of the Jewish community showed a considerable decrease in the number of conversions from 1932 on. There were 805 cases in 1932; 713 in 1933; 586 in 1934; and only 472 in 1935. On the other hand, the number of converts returning to Judaism had risen from 290 such cases in 1932 to 580 in 1934.

Indicative of the intensive Jewish religious life in Vienna was the fact that there were seven communal synagogues and twelve independent Orthodox synagogues (*Vereinssynagogen*), as well as thirty Orthodox prayer-houses (*Vereinsbethäuser*). In the communal synagogues the liturgy and order of the services introduced by Isaac Noah Mannheimer (1793-1865) and Salomon Sulzer (1804-90) were the standard, whereas in the private synagogues and in the prayer-houses there existed a large variety of ritual practices ranging from the Hasidic-Sephardic Klaus to the ultra-modern synagogue with organ and non-Jewish choir singers, and from the Spanish-Portuguese rites of the "Türkische Synagoge" to the Hungarian Orthodox pattern of the "Schiffschul."

The very efficiently functioning community, controlled by a Zionist majority during the last pre-Hitler decade, covered a wide range of activities. These included, in the cultural field, the supervision of the regular compulsory religious education in elementary and secondary schools, the training of teachers for re-

A glimpse of the Jewish quarter in Vienna prior to the Nazi occupation

Soldiers' memorial tomb, in the Jewish cemetery of Vienna, erected after the first World War

ligious education, the establishment and maintenance of Bible and Talmud Torah schools, a communal library, whose head was the renowned scholar Bernhard Wachstein (1868-1935), two Jewish parochial schools, a *Realgymnasium* (a secondary school, founded by the chief rabbi and Zionist leader, Zebi Perez Chajes, 1876-1927), and the Israelitisch-Theologische Lehranstalt (founded in 1893). In addition to the supervision of Shehitah and Kashruth, the Jewish community managed several institutions owned by the Kehillah, such as a home for the aged and infirm, a first-class hospital, cemeteries, a Mikveh, a free loan office, established in 1935, an employment exchange, a recreation home for children, two kindergartens, several day nurseries for children, a nurses' home, a statistical bureau, Hachsharah farms, a home for the blind, two orphanages for boys and two for girls, and a number of other establishments in the sphere of philanthropy and social welfare.

The severe distress prevailing among the Jewish population was revealed by the fact that about 60,000, or one-third of the Viennese Jewish population, was dependent on charity. Since the number of taxpayers decreased due to economic conditions and to withdrawals from the community, the tax rate had to be raised considerably to meet the ever increasing expenditures for social welfare, which rose from 2,589,378 schillings in 1932 to 2,972,611 in 1936.

Statistics. The census of 1934 recorded 191,481 Jews in Austria, or 2.8% of the total population of 6,759,062, a decline of 28,727, or 13%, since 1923, when there were 220,208 Jews in the country, of whom 201,513 lived in Vienna. In 1936 a total of 176,034, or over 90% of Austrian Jewry, was concentrated in Vienna, which had a total population of 1,861,856. The Vienna community constituted about 8% of the city's population, and was the fourth largest Jewish community in Europe. It declined steadily from 1923 on, and showed a decrease of 25,479, or 12.6%, in 1934. The primary cause for this decline was the drop in the Jewish birth rate, chiefly noted among the numerous upper and middle classes. While in 1923 the number of Jewish births amounted to 2,733, it declined to 1,362 in 1928, to 900 in 1933 and to 757 in 1936. There was also an increase in the Jewish death rate, with 2,571 deaths in Vienna in 1923 to 2,669 in 1928, to 2,689 in 1933, and to 2,751 in 1936.

Economic Status. The economic position of the Jews in Vienna was desperate enough even before the advent of the Nazis. The general economic plight of the country, the large occupational maladjustment among the Jews, the unofficial anti-Semitism in the administration and in the business world which had been in force since the beginning of the clerical brand of fascism of the Dollfuss-Schuschnigg period still further narrowed the range of employment for Jews, although no explicitly discriminatory laws had been passed against the Jews, who, at least on paper, enjoyed all the privileges of "equal citizens" (Constitution of May 1, 1934, October 16, Section A, paragraphs 1 and 3).

The proportion of Jews engaged in the liberal professions was perhaps higher in Vienna than in any other city. 1,345 of the 2,163 lawyers and 2,440 of the 3,268 physicians were Jews. There were also 446 Jewish dentists and 246 journalists. On the other hand, the number of Jewish officials in the public administration (federal and local), the school system, the railroads, and the administration of justice was far less than 2.8%, the ratio of Jews to the general population. The only Jews holding public office of importance were the three following: Dr. Desider Friedmann, state councillor, who was also president of the Jewish community; Professor Salomon Frankfurter, federal cultural councillor; Dr. Jakob Ehrlich, Vienna municipal councillor, who was killed in the Dachau concentration camp (1938).

A large number of the Jews were engaged in commerce. Among them the peddlers and small tradesmen, brokers, installment merchants and traveling salesmen constituted the majority. Only in a few industries such as clothing and food were the Jews strongly represented. About 5% of *all* the industrial establishments in Austria were in the hands of Jews, which were, of course, located in Vienna. The number of Jewish master craftsmen was limited. They were for the most part tailors, carpenters, plumbers, stone-masons and painters. In other trades, such as roofing, masonry, blacksmithing, gardening, and the like, the Jews were not represented at all. With a view to turning Jewish youth toward manual pursuits, 1,480 youngsters were apprenticed to various trades, while studying at industrial training schools, and 760 were trained in agriculture, whereas only 604 Jewish pupils went to commercial schools. In view of the economic pressure, the imperative necessity of this vocational reorientation was fully realized by all Jewish parties and organizations.

The professional and merchant classes naturally suffered from the steady economic decline. The world depression in 1929, and finally the collapse of the banking system, still further aggravated the economic position of the professional and merchant classes. There was no official discrimination against Jews in schools of higher learning, and there were a few internationally famous Jewish scientists and scholars in the Austrian universities. However, since there was scarcely any civil service career open to the Austrian Jew, there was a sharp drop in the number of Jewish law students dur-

ing the last decade, from 669 in the academic year 1935 to 1936 to 251 in 1936 to 1937.

Such was the economic situation of Viennese Jewry, thanks to the process of driving them out of economic life which was in progress for a number of years and led to their alarmingly increasing impoverishment. There was, however, no change in the legal status of the Jews. In fact, the decade prior to the Anschluss was comparatively peaceful, particularly until 1934 under the Social Democratic administration of Vienna which carried out grand schemes of social welfare work that aroused the admiration of the world. This fortuitous condition was due chiefly to Professor Julius Tandler and Alderman Hugo Breitner, both of whom were Jews. However, the growth of Austrian semi-fascism under Dollfuss and Schuschnigg brought with it increasingly violent anti-Semitic manifestations in spite of the government's declared intention of refraining from following Nazi German policies in respect to the Jewish population.

The Austro-German accord of 1936, which increased the influence of the Nazi Party in the Austrian government, caused profound anxiety in Jewish circles in Vienna. The pledge of non-interference in domestic Austrian affairs made the continuance of any agitation for Anschluss impossible, and forced the Nazis to concentrate their activities along anti-Semitic lines. But no one foresaw the catastrophe of 1938.

After the Annexation (1938 to 1943). With the hoisting of the swastika, there began an organized campaign of Jew-baiting in which no device calculated to terrorize, injure and humiliate was left unused. Thousands of Jews were imprisoned and many sent to concentration camps. Thousands of them were expropriated and plundered. Even large department stores were completely sacked by hordes of uniformed Nazis in motor lorries.

The treatment by the authorities of the Jewish community of Vienna and of Jewish institutions was particularly outrageous. The president and other members of the executive, as well as the heads of the B'nai B'rith, were imprisoned, and several of them were sent to the Dachau concentration camp. Their incarceration was believed to have been in retaliation for their having organized a subscription of 800,000 schillings to meet the expenses of the Schuschnigg plebiscite. The Nazi authorities demanded a further contribution of 800,000 schillings, and closed the central offices of the community and thus paralyzed a large number of religious and social welfare institutions. After a few weeks half of the amount was collected and the Gestapo allowed the offices of the community and of the Zionist federation to reopen. Shortly thereafter the library of the Jewish theological seminary was confiscated and removed, and all other Jewish organizations were closed.

For several weeks the principal synagogue in the Seitenstettengasse was occupied and desecrated by storm troopers. Passing Jews were dragged inside, compelled to don the silk hats of the sextons, as well as prayer-shawl and phylacteries, and, thus attired, to scrub floors, clean windows, scour lavatories and sing the Horst Wessel song. In other synagogues there were even worse acts of desecration, the interiors being defiled and scrolls of the Torah mutilated and burned. Many Jews were forced to scrub the Schuschnigg crosses that had been indelibly painted on the pavements amid the jeers of the assembled crowds.

Within three months many of the anti-Jewish laws in force in Germany had already been extended to the "Ostmark," and even more brutally applied than in Germany, where a period of years was required. The tragic plight of the Jews was indicated by the fact that within one year after the Anschluss 3,741 Jews had committed suicide, 11,000 had been imprisoned and 87,000 had emigrated. In addition, 12,000 apartments of Jews had been vacated, 7,856 enterprises "Aryanized," and 5,122 were bankrupt, and about 2,000 Jewish physicians were eliminated. Labor camps for Austrian Jews unable to emigrate were established by the Nazi commissar for Austria.

At the end of 1939 Nazi plans envisaged the wholesale expulsion of the city's Jews to Lublin. A first group of 4,000 persons was stripped of almost all their possessions and dispatched under the most cruel conditions. In the months that followed the 48,000 Jews still in Vienna in 1940 experienced extreme hardships. During the succeeding evacuations families were separated and all documents and identification papers of the deportees were destroyed.

The decimation of the Jews, who had served their country well and loyally with all their talents and industry for the past 200 years, reduced their number to 40,000 in 1941. Their economic extermination, however, proceeded even more rapidly than the statistical reduction. In a period of approximately eighteen months all Jewish-owned enterprises, totalling 25,898, were either liquidated or taken over by "Aryans." Those Jews who were permitted to remain in Vienna, this once gay and glamorous capital of the Habsburg monarchy, were sentenced to a miserable life of grinding poverty and bitter persecution.

VIENNA, CONGRESS OF (1814-1815). Called together to reorganize Europe after the Napoleonic wars, the Congress of Vienna took up also the question

of the status of the Jews. In the various German states, which thereafter were to form a confederation, legislation concerning Jews varied considerably, ranging from full civic rights in Westphalia and other districts formerly occupied by the French to the medieval conditions prevailing in Saxony, where even the "body tax" had not been abolished until 1813.

The question was brought up by the cities of Frankfort, Hamburg, Lübeck and Bremen. Taking advantage of the general reactionary trend of the era, the councils of these cities wished to annul the equal rights which the Frankfort Jews had acquired in 1811 from Prince-Primate Karl von Dalberg for a substantial consideration, and which had been granted also to the Jews of the three Hanseatic cities during the French occupation. All other attempts having failed, the Jews of these four cities appealed to the Congress of Vienna. While the delegates of the Frankfort Jews, Jakob Baruch (the father of Karl Ludwig Börne) and Gumprecht (later replaced by Uffenheimer), asked only for the recognition of the rights legally acquired by their constituents, the delegate of the Hanseatic Jewries, the non-Jewish jurist Buchholz, insisted upon the general emancipation of German Jewry. He unflinchingly championed this cause both orally and in a documentary publication (*Aktenstücke zur Verbesserung des bürgerlichen Zustandes der Israeliten betreffend,* 1815), intended for circulation among the statesmen in Vienna.

However, these endeavors found support only among the delegates of the two great German powers, the Austrian chancellor, Metternich, and the Prussian delegates, Karl August von Hardenberg and Wilhelm von Humboldt, the latter long known as a "defender of Jewry." On the other hand, nearly all the delegates of the smaller states (especially those of Bremen and Frankfort) formed a solid opposition. At first Austria and Prussia confined themselves to formal intercessions in behalf of the Jews of the free cities. As a result of the intervention, however, of the very influential Vienna bankers Arnstein, Eskeles and Herz, and of the Prague merchant Simon Lämel (all of whom then submitted an urgent appeal to the emperor in behalf of the West Austrian Jews), the Jewish question became the subject of official negotiations among the German states then preparing various constitutional drafts for their projected Germanic Confederation.

In the deliberations of the second German conference, during the last sessions of the Congress committees, this problem loomed very large, but they resulted, after a long battle, in an unsatisfactory compromise. The fundamental law of the German federation (*Bundesakte*) was to include the following Article Sixteen: "The Confederate Diet shall take into consideration as to how a civil reform of those professing the Jewish faith in Germany is to be effected in as uniform a manner as possible and how, in particular, they could be given, and secured in, the enjoyment of civil rights in return for their participation in all civil obligations. However, until that time, all the rights already granted to the Jews *by* [the earlier wording, *in,* was abandoned because of the opposition of the Hanseatic cities] the individual Confederate states shall remain intact."

The Federal Diet, however, likewise failed to solve the problem. Many decades of struggle were yet necessary before German Jewry was emancipated. Nevertheless, these heated discussions at the Congress of Vienna, the inclusion of such a pledge in the basic law of the Confederation as well as the subsequent repeated interventions of Austria, Prussia, Russia and England (as warrantors of the Federal Act) in behalf of the Jews of the free cities, established the problem of Jewish emancipation as an important European issue.

VIERTEL, BERTHOLD, lyric poet, stage director and film author, b. Vienna, 1884. In 1943 he was living in Hollywood, Cal. Viertel was stage manager in Vienna when Karl Krauss discovered his lyric talents. It was he who published his poems in *Die Fackel,* and who became a symbol for Berthold Viertel.

Viertel's mastery of the word together with his ability to understand other persons' poetry enabled him to put in action on the stage even the most sensitive works. He worked at the Schauspielhaus in Dresden from 1918 to 1922, and as stage director under Max Reinhardt at the Deutsches Theater in Berlin from 1923 to 1928. When he came to the United States for the first time in 1928 he predicted that the motion picture would not supplant the legitimate theatre. At that time his first motion picture, *The Adventures of a Banknote,* had already been a great success. During his stay in the United States he worked for Fox and Paramount and directed *The Spy, The Magnificent Lie, The Wiser Sex* and other films. In the meantime the English film industry started to flourish. Gaumont, of London, secured his services in 1935.

He directed *Little Friends, The Passing of the Third Floor Back* and *Rhodes, the Diamond Master.* As stage director in Berlin he performed Ibsen's *Peer Gynt* as well as Eugene O'Neill's *The Emperor Jones* and *Desire under the Elms,* thus bringing to Europe American plays. His poems are published in three volumes: *Die Bahn; Die Spur;* and *Fürchte Dich nicht* (New York, 1941).

Noteworthy, too, are his comedy, *Die schöne Seele* (1925), and that tribute to his teacher and symbol, his essay *Karl Krauss, ein Charakter in der Zeit* (1921).

VILNA (Polish **Wilno;** Lithuanian **Vilnius**), city of northeastern Poland, capital of the province of the same name. In 1941, at the time of the Nazi invasion of Soviet Russia, it had about 200,000 inhabitants, of whom about 80,000 were Jews; the latter included some 12,000 to 15,000 Jewish refugees from western and central Poland.

Vilna was at first the capital of the grand duchy of Lithuania, and became a Polish city when Lithuania and Poland became one kingdom by the Union of Lublin (1569). It passed to Russia with the partitions of 1772 and after. It was under German rule from 1915 to 1918. Between 1918 and 1920 Vilna was ruled successively by the Lithuanians, Russians, Lithuanians again, and Poles. In October, 1920, the Polish general, Zeligowski, on his own initiative, took Vilna by force, and created the so-called "Central Lithuania." In 1922 the Diet of the latter voted to join Poland; their proposal was accepted by the Polish Sejm, and ratified by the allied powers in 1923. In 1939, after the invasion of Poland by German and Soviet forces, Vilna was again handed over to Lithuania. It was annexed to the Soviet Union with the latter country in June, 1940, and

occupied by the Nazi invading forces just one year later.

The Jewish Population in Vilna. In the Middle Ages, according to the researches of the Jewish historian Dr. Ignace Schipper, the Jewish population of Vilna was very small. At the end of the medieval period (end of the 15th cent.) there lived in the whole of Lithuania about 6,000 Jews, some hundreds of whom resided in Vilna. In 1578 there were in Lithuania about 25,000 Jews, in 1611 about 50,000, and in 1644 the number of Jews in the country had risen to about 100,000. A small portion of these were concentrated in the city of Vilna. The first more or less trustworthy figure as to the Jewish population of Vilna is known from the census of 1764; according to this census, there then lived in Vilna 3,381 Jews.

The increase of the whole population in Vilna from the second half of the 19th cent. until 1941 was: 60,000 in 1860, 90,000 in 1880, 139,000 in 1897, 181,000 in 1910, 129,000 in 1919, 195,100 in 1931, 209,000 in 1939, and 235,000 in 1941.

But the development of the Jewish population did not increase along parallel lines with the non-Jewish population. While the increase of the non-Jewish population was uninterrupted during the 19th cent., the movement of the Jewish population was subject to sudden changes, especially during the two World Wars of 1914 and 1939. In the 20th cent. the percentage of the Jewish population in Vilna, as compared with the rest of the inhabitants, decreased steadily. Thus, for instance, in 1897 the Jews comprised 45.4% of the whole population, while in 1921 only 36.1%, in 1931 only 28.2%, and in 1939 about 30%. The population of Vilna had been overwhelmingly Polish for centuries. In 1942 60% were Poles, 30% Jews, 2½% Lithuanians, and the remainder various Russian groups.

Political History of the Jews. Jews settled in Vilna in the last quarter of the 15th cent.; according to some historians, even at the beginning of the 14th cent. A tradition has it that as early as 1487 a Jewish cemetery existed beyond the river Vilya. In 1527, as a privilege to the Christian population of Vilna, King Sigismund I of Poland forbade the Jews to reside and trade in the city. In spite of that prohibition, Jews came in great numbers to Vilna.

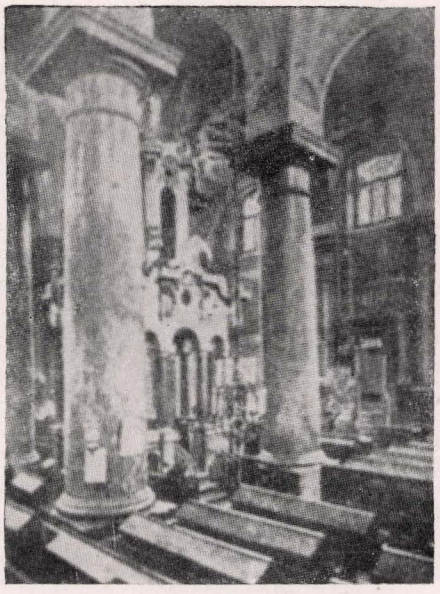
When, toward the middle of the 16th cent., certain magnates of the gentry built houses which were not under the jurisdiction of the city authorities, Jews were once more able to settle in Vilna. In the years that followed Jews are often found, for instance as tax and duty collectors. In 1573, when permission was granted to each noble to erect churches or synagogues on his properties, the Jews began to build the great synagogue, which became the center of the Jewish quarter. This synagogue, together with Jewish-owned shops and houses, was destroyed by a mob in 1592. Sigismund III allowed the Jews (1593) not only to live on properties owned by the gentry, but also to purchase houses from them and to make leases.

In the years that followed, clashes often occurred between Jews and Christians, due to the special anti-Jewish policy of the authorities of the municipality, who fought against the Jewish classes of handicraftsmen and merchants. After a long struggle the rights of the Jews in the economic field of activities were finally defined in 1633. They were permitted to deal in precious metals, manufactured goods, cattle and meat, to work at other trades, and to be engaged in handicrafts for which there was no Christian guild in Vilna. There is evidence that the restrictive regulations introduced by the municipality against the Jews were not observed strictly either by the Jews or by the municipal administration.

In the regulations of 1633, however, it was clearly stipulated in what street the Jews had to reside. In their residences they were not allowed to have windows on the street side. They were forbidden also to tailor clothes for Christians and to heat bathing establishments for non-Jews. They were released from their civil duties against their pledge to pay 300 zlotys yearly, 500 zlotys in war times, to the city.

King Vladislaus IV, on February 19, 1633, granted to the Jews of Vilna a special charter of privileges, embracing all fields of economic and religious as well as social and municipal activities. By this decree a special quarter was allotted to the Jews, and within a period of fifteen years (until 1648) all Christians were ordered to be removed from this quarter and Jews from other parts of the city had to move in to take their place. The burghers, who dominated the municipality, incited the Christian population against this order. The dispute between the Jews and the magistrate culminated in a pogrom which broke out in 1635 and caused damages of about 100,000 Polish zlotys. The king appointed a commission in order to compensate the Jews for the damages caused by granting them new privileges in trade and handicraft.

In order to avoid the recurrence of disturbances against the Jews, gates were erected at both ends of the streets where the Jews lived. In 1645 the rulers of the municipality fixed the number of Jewish property owners as 251. When, in 1655, the Cossacks who, under Chmielnicki, had shed so much Jewish blood in the Ukraine, were nearing Vilna together with Czar Alexis Michaelovitch's troops, nearly the entire Jewish community fled from the city; those left behind were massacred. When the town was set afire, the Jewish quarter too was destroyed. After the Russian troops entered the city, the Christian citizens of Vilna requested Czar Alexis to banish the Jews, inasmuch as they were harmful to Christian artisans and merchants. Thereupon, in 1658, the czar ordered the Jews expelled from the town, but upon the recapture of Vilna by the Poles (1661), under the command of General Michael Pac, the rights of the Jews were once more restored.



Conflicts continued, however, with the guilds, for example with the glaziers, who prohibited the Jews to work for Christians. During the Northern War (1700-21) Vilna suffered heavily from the Russian and Swedish occupations, likewise from fire and famine. The famine year of 1709 to 1710 alone took a toll in Vilna of 34,000 victims, of whom 4,000 were Jews. Notwithstanding King Augustus II's restoration (1720) of the rights of the Jews, they were forced (1742) by the municipal authorities to sign an agreement in which, for the protection against outrages that the municipality promised them, the Jews engaged themselves to pay 600 Polish zlotys annually, not to keep open shops, not to offer wares for sale outside of their houses, not to reside outside the ghetto, and other such stipulations. It was not until 1747 that a new ordinance, restoring their former rights, could be obtained from the king by the Jews.

When, in the third partition of Poland (1795), Vilna passed to Russia, the Russian governor-general, Repnin, issued a decree according to which the Jews were to continue to hold their rights. The restrictions against their right of residence inside the city were not done away with until 1861. In the following period of over fifty-five years the Jews in Vilna lived under the political conditions of the czarist regime, which forced many of the poor among them to leave their native country for overseas; this stream of emigration was intense especially in the stormy years of the mass pogroms in Russia in 1881 and during the reactionary reprisals against the revolution of 1905 to 1906. On May 29, 1902, Hirsz Lekkert, an artisan's apprentice, hurled a bomb at the governor of Vilna, Von Wohl, as a protest against the reactionary czarist regime in Russia which was persecuting Poles and Jews; Von Wohl was killed, and Lekkert was executed.

During the German occupation of Vilna, which lasted for two and a half years (1915-18), the Germans issued 353 orders, laws and regulations of different kinds re-

garding the public life of the city, not one of which was aimed at or contained measures against Jews.

In the restored Poland (1919 on) all czarist restrictions and juridical discriminations were abolished by the constitution of March 17, 1921, and by a special law of the Polish Parliament, voted in 1931, in which all laws and regulations of the former three occupying powers of Poland against any national minority were acknowledged as non-existent.

After the Nazi German occupation of the western part of Poland, shortly after the beginning of the second World War, a large number of Polish Jews fled to Vilna, overcrowding the city, and by increasing the masses of the unemployed created unsolvable problems both for the city and for the Jewish community. The tens of thousands of Jewish refugees in Vilna were assisted with food and clothing by the American Jewish Joint Distribution Committee, which opened an office in Vilna headed by Isaac Giterman.

The Joint established a number of asylums for refugees, providing thousands of them with board and lodging and with clothing, opened clubs for the intellectuals, and supported the Union of Polish Writers and Journalists which set up its organization in Vilna, and gave aid to all non-Jewish Polish refugees in Vilna who appealed to it for assistance. Several hundred refugees were employed in the offices, warehouses and shops of the Joint, which financed refugee artisans' cooperatives. It was successful in organizing increased medical aid to hospitals and sanitariums for refugees, and gave help to all refugees in securing necessary legal documents. Finally, after the annexation of Lithuania to Soviet Russia, the Joint distributed (1941) funds in American money to some 2,000 refugees who had visas for Japan, thus helping hundreds of families to make their way overseas to Japan. The OSE also cooperated with the Lithuanian Red Cross in providing aid for Jewish refugees in Vilna.

In November, 1939, under the Lithuanian administration, there were anti-Jewish riots in Vilna, but they were soon suppressed by the police. Minister of the Interior Kazys Skucas, in response to an appeal by Dr. Jacob Wigodski, head of the Jewish community of Vilna, gave the assurance that anti-Jewish acts would not be tolerated in the city. Premier Jonas Cernius, at the same time, informed Wigodski that all persons who had been living in Vilna before 1920 had automatically become Lithuanian citizens in October, 1939, and that all others who had come to the city subsequently were to be examined as individuals for citizenship and naturalization purposes. The Lithuanian government made unsuccessful attempts to secure from the Soviet government the release of a number of Vilna Jews who had been arrested and taken into the interior of Russia from Vilna by the Soviet government authorities before the city was turned over to Lithuania; the most eminent of these were Zalman Reisen, authority on Yiddish literature, and the attorney Czernichov and his son. In that same month (November, 1939) Polish Zionist leaders who had escaped from Poland to Vilna after the Nazi occupation resumed their activity in Vilna, especially in providing immigration certificates to Palestine, and were in close relations with the Palestine Bureau in Kaunas which was in charge of distributing these certificates to the committee composed of these Zionist refugee leaders from Poland.

Mention must be made of the fact that the HIAS (Hebrew Immigrant Aid Society) in Vilna as well as in Kaunas performed notably in behalf of the refugees, and also of citizens of Lithuania and of Vilna who had even the slightest possibility of emigrating. The Kaunas office of the HIAS, headed by Rozovsky, served as the center for all Jewish refugees in Vilna and Kaunas, and helped them to overcome all difficulties and formalities; furthermore, it rendered them financial assistance.

However, within the next six months after the administration of the district of Vilna had been turned over to the Lithuanian authorities by the Soviet government, the latter, on June 15, 1940, annexed Lithuania, together with Vilna, as a Soviet republic, federated with the U.S.S.R.

The German Army occupied Vilna one year later (June 24, 1941), after the Nazi attack on Soviet Russia. In that same month a ghetto was established in Svir, a town in the Vilna district, for the Jewish population, and all able-bodied Jews were ordered by the local Nazi occupation authorities to be mobilized for forced labor. Two other huge ghettos were set up by the Nazis, one of them in the borough of Zarzecze, in Vilna, and thither all the Jews of city and district were herded. In March, 1942, the Nazis ordered all Jews deported from Vilna, in addition to a number of other cities in Lithuania and Poland. A large concentration camp was set up to receive the Jews deported from Vilna.

In May, 1942, according to reports issued in the following month by the Jewish Telegraphic Agency, many thousands of the 80,000 Jews remaining in Vilna up to that time were massacred by the Nazis; only a few thousand Jews, estimated to be 14,000, and consisting of skilled artisans, physicians and engineers useful for the Nazi war effort, were permitted to remain in the city. By September, 1942, the same news agency reported, the city of Vilna was totally free of Jews (*judenrein*), the last group of about 14,000 skilled and useful Jews having been deported or murdered. Previously a fearful epidemic of spotted typhus had taken a huge toll in the entire Vilna district.

The Economic Situation of the Jews. The economic situation of the Jews in Vilna until the third and final partition of Poland in 1795 was similar to that of the rest of Polish Jewry. The economic life of the Jews in Vilna throughout the 19th cent. went on freely despite many obvious discriminations against them and insofar as the absolutistic regime of czarist Russia permitted it.

Near the end of the 19th cent., in 1899, the economic structure of the Jews in Vilna, according to the figures of the Jewish Colonization Association, was as follows: there were in Vilna 178 industrial enterprises belonging to Jews, i.e. 50% of the whole industry of the city, with 4,281 Jewish workers in them; this figure constituted 58.9% of all the workers in the Jewish factories. They produced goods to the value of 6,900,600 rubles ($3,500,000) annually. The role of the Jews in industry in the district of Vilna was so important that in the tobacco industry they formed 82%, in tanning 86.6%, those engaged in the conduct of sawmills 65%, flour mills 61.1%, and brick factories 43.7%.

In handicraft there were in Vilna 26,240 Jewish artisans, of whom only 7,836 were journeymen and apprentices. About 70% of these artisans were occupied in four branches: garments (40%), leather (15%), and textiles and wood (15%). The Jewish artisans were very poor; only about one-third of the master artisans could employ a journeyman or an apprentice. The percentage of unemployed among the Jewish artisans amounted to 50, and about 40% of the entire Jewish population of the city had recourse to aid from the Jewish welfare institutions. In trade the Jews of Vilna were in the overwhelming majority.

In the restored Poland of the period following the close of the first World War, the Jews of Vilna contributed much to the development of the economic situation of the city. They were engaged in all economic fields of activity, despite many and various difficulties and hindrances.

Culture. Vilna was known among Jews throughout the world as the "Jerusalem of Lithuania," being considered the main seat of Jewish culture in Europe.

Many famous rabbis and Jewish scholars lived there. The golden age of Jewish theological literature and culture culminated in the years 1620 to 1648. There were in Vilna in this short period of time more than forty famous rabbis, authors of theological works. But all these scholars were eclipsed by the fame of Elijah Vilna (often known as the Vilna Gaon; 1720-97), who became the pride of all pious Jews throughout the world. Abraham Danzig, popular Jewish law code author (b. 1748; d. Vilna, 1820), who wrote *Hayye Adam* and *Hochmath Adam,* served as rabbi in Vilna for many years. Other famous 18th cent. Vilna scholars were Judah Halevi Horovitz, author of *Ammude Beth Yehudah,* and Phinehas Elijah Horovitz, author of *Sefer Haberith.*

In the first half of the 19th cent. Vilna became the center of the Jewish enlightenment movement (Haskalah) in Eastern Europe. There were many famous writers and historians who, either born in Vilna or living there for a large part of their lives, exerted a tremendous influence on Jewish youth.

Among these were Mordecai Aaron Günzburg (1795-1846), who lived in Vilna for about the last twenty-five years of his life; Samuel Joseph Fünn (1818-90); and Kalman Schulman (1819-99), who lived in Vilna from 1849 on; such poets as Judah Loeb Gordon (1830-92); Eliakum Zunser (1845-1913); and Solomon Mandelkern (1846-1902); the novelists Eisik Meier Dick (1807-93); Michel Gordon (1823-90); the Hebrew poet and grammarian Abraham Dob Hacohen Lebensohn (b. Vilna, 1794; d. Vilna, 1878); his son, Micah Joseph Lebensohn (1828-52); Moses Leib Lilienblum (1843-1910); and Reuben Asher Braudes (1851-1902), editor of *Haboker Or.* One of the best educated Polish writers and critics of literature, Julian Klaczko (1828-1906), wrote many poems in Hebrew in his native city, Vilna, before his conversion to Christianity at the age of thirty-three. Zevi Hirsch Katzenellenbogen was a noted Maskil and Hebrew author. Abraham Isaac Landau, noted Maskil, wrote the *Sefer Hakundes.*

In 1847 a seminary for rabbis was opened there; in 1871 it was transformed into a Jewish teachers' seminary. Vilna was the seat of well-known Hebrew and Yiddish publishing and printing houses. The first printing house there was established in 1799 by Leib and Gershon Luria under a license issued in the name of a Catholic priest, Joseph Mirski. Soon afterward a new printing house was created by the Faynes, father and son. The most famous printing house for Jewish books was founded by the Romm family in Grodno, whence they moved to Vilna in 1835 and printed famous editions of the Mishnah, Talmud and Midrash and of many other books for use in centers of Jewish culture throughout the world. Borys Kletzkin (b. 1875; d. Vilna, 1937) was founder and owner of the famous publishing house Vilner Farlag B. A. Kletzkin. The creation at Vilna in 1928 of the Yiddish Scientific Institute (after the Nazi German invasion of Russia in 1941 its headquarters were transferred to New York city), and the library, founded earlier by Mathias Straschun (1794-1872) and containing scores of thousands of volumes, were symbolic of the significance of Vilna as a center of Jewish culture.

It is noteworthy that some of the numerous Yiddish writers born in Vilna became famous in the United States. Hirsch Gerschuni (1844-97) was co-founder of the first Yiddish daily, *Die Post,* at New York city in 1870. Abraham Cahan (b. Podbrzeze, near Vilna, 1860) was still (1943) editor of the Yiddish daily *Forward,* in New York city. Louis Miller was editor of *Die Vahrheit,* which merged with the *Tag* in 1917. Peter (Peretz) Wiernik (b. Vilna, 1865; d. Brooklyn, N. Y., 1936) was editor of the *Jewish Morning Journal.* Furthermore, musicians who became outstanding in New York came from Vilna, such as Leopold Godowski (b. 1870), who lived in New York from 1912 on, and Arno Nadel (b. 1878), who became famous in Berlin. "The greatest sculptor of Russia," Mark Antokolski (1842-1902), famous throughout the world, was born in Vilna, as was the renowned sculptor Leopold Bernstein-Zinayev (b. 1868). Outstanding among contemporary writers who were active in Vilna were: A. J. Goldschmid; Chaim Grade (b. Vilna, 1910), gifted Yiddish poet and short story writer; Abraham Veiter (1878-1919); Leib Jaffe, Russian and Hebrew poet, who in 1943 was director of the Jewish National Fund in Jerusalem; S. Niger; Zalman Reisen; Abraham Reisen. S. An-ski (Solomon Rappaport), who presented his *Dybbuk* first through the Vilna Truppe in 1919, lived in Vilna for a long time.

Famous scholars and scientists of Vilna were: Daniel Chwolson (b. Vilna, 1819; d. 1911), who, becoming converted to Christianity for the sake of his academic career, was in 1855 appointed professor of oriental languages at the University of St. Petersburg; Isaac Benjakob (1801-63), well-known Hebrew bibliographer, and his son, Jacob Benjakob, author and reviser, respectively, of the great *Otzar Hasefarim (Thesaurus librorum hebraeorum impressorum quam manuscriptorum)* published at Vilna in 1880, which contains upward of 20,000 titles of books in Hebrew; Vladimir Jochelson (1856-1937), noted ethnographer. Zelig Kalmanovich, Yiddish philologist and historian, was editor-in-chief of the *Yivo-Bletter* and one of the directors of the Yiddish Scientific Institute, in Vilna, up to the Nazi invasion of the Soviet Union in June, 1941. Max Weinreich was a zealous organizer of the Yiddish Scientific Institute, and the author of many philological works on the Yiddish language, as well as a critic of Yiddish literature; in 1943 he was manager of the Yiddish Scientific Institute in New York. Weinreich's father-in-law, Zemach Szabad, was a noted physician in Vilna, and a senator under the Polish republic. He was an eminent hygienist, and wrote many books on the subject of the welfare of the Jews in Poland, especially Vilna. Jacob Wigodski, president of the Jewish community of Vilna, and a member of the Polish Sejm, and political leader of the Jews of Vilna, wrote several volumes on the history of the Jews of Eastern Poland and of Vilna. Pinhas Kon, noted Jewish historian, was a member of the department of history of the Yiddish Scientific Institute.

Social Life. Vilna was the great center of the social life of the Jews. The Jewish population of Vilna was conscious of the value of organized society, and from the earlier days of some free atmosphere after the first revolution of 1905, and even before that, they organized the social life of the community in every field of activity. Vilna was the place of origin of the Jewish Socialist Movement in Europe; the first circles of Socialist propaganda and the nucleus of the unions of professional workers were formed in Vilna. The most influential political party of the Jewish workers in Russia and Poland was founded at Vilna in 1897; known as the Yiddisher Arbeiter Bund in Russland, Lite un Poilen, it held its first conference there in that same year. During the first Russian revolution in 1905 there grew up new Socialist parties based on the idea of Zionism, such as the Socialist Zionists, the Poale Zion, and the Socialist Sejmists (S.S.). Each party issued its own political periodical.

The middle class also organized its own parties, and there were Zionist groups of every kind, beginning with the Chovevei Zion (Lovers of Zion), founded in Vilna in 1884 (in 1889 the third all-Russian Chovevei Zion conference was held in Vilna), to the Revisionist Zionist party. There was also a large Yiddishist Party known under the name of Democrats (Folkists).

Vilna was especially known as the center of Yiddish culture. The Jews there had a central school committee, founded in 1919, which had eight public schools, two kindergartens, two evening schools, two Gymnasia, and one teachers' seminary. In the schools conducted by this committee there were over 3,200 children. In 1921 the Zionist Organization founded the Tarbuth Hebrew school organization, with Dr. Jacob Regensburg at its head. The Tarbuth had thirty-five public schools, four Gymnasia, three kindergartens, several evening schools,

and several libraries. More than 1,100 children were taught in these schools. There were also many Talmud Torahs for Orthodox Jewish children. In addition, the Orthodox had a large building built in 1884.

In February, 1919, as the result of the endeavors of S. An-ski, the Yiddishist movement founded in Vilna the Jewish Historical and Ethnographical Association, with Dr. Abraham Wirszubski as president and Chaim Lunski as secretary. This association possessed a museum, a library, and an archive. Famous was the library of Mathias Straschun, founded in 1885, with a total of over 20,000 volumes. In 1922 a society for the arts was founded; it had the following sections: musicians (president, Dr. Romm), literature (president, Zalman Reisen), paintings and plastics (president, Lejbowski), dramatic (presidents, Mesdames Jedwabnik and Turgel).

After the first World War, the Yevreiski Komitet Pomoshtshi (Yekopo) was organized in Vilna, and in 1919 it held its first conference. As the result of resolutions passed there, it organized various kinds of assistance for the rehabilitation of the lives of more than 20,000 homeless Jews. It also granted credits for the reconstruction of about 2,000 homes, and built public schools and other institutions. This organization carried on its activities until the last days before the outbreak of the second World War, concentrating on emigrational aid. Of great use was the association for safeguarding the health of the Jewish population in Vilna (OSE), founded in 1918 and organized in Vilna with Dr. Makower as president.

The most active social work on behalf of Vilna Jewry was performed in the Jewish community. During the czarist regime there were many such institutions as Tzedakah Gedolah, Hebrah Kaddisha and Hachnasath Orchim, which carried on welfare work for the Jews of Vilna. During the German occupation of 1917 to 1918 the Jews in Vilna organized the Jewish community on the basis of democratic elections in which the entire Jewish population took part. These elections were conducted on the basis of the so-called "five adjectives" (free, proportional, secret, with no difference because of sex, and universal).

The council of the Jewish community of Vilna was composed of eighty councillors, and was presided over by an executive board in which the most outstanding role was played by Jacob Wigodski, Rabbi Isaac Rubinstein, Jacob Szeskin, Gershon Gerszuni, Eliezer Kruk, B. Epstein, and F. Antowil. Of these eighty councillors, twenty-four were Zionists, twenty-four members of the Bund (Socialists), nine Orthodox, seven artisans, five Folkists, three Poale Zionists, three Socialist Vereinigte, two Shomre Shabbath, two Zeire Yisrael, and one a member of the merchants' organization. The Jewish community in Vilna was pointed out as an example of the realization of national cultural Jewish autonomy as a national minority in a state which included many national minorities.

As evidence of the role which the Jews played in the city of Vilna, it may be stated that in 1924 they had fifteen representatives in the city council, including Zemach Szabad, Eliezer Kruk, Saul Trocki, Eliah Rudnicki, and L. Spiro. In 1905 there was founded at St. Petersburg a union for the achievement of equal rights for the Jews of Russia, composed of twenty-two representatives, of whom Shemarya Levin and Borys Goldberg were from Vilna.

In the First Duma of 1906 Shemarya Levin was a deputy from Vilna. In the Polish Sejm and Senate the following Jews of Vilna served as deputies: Jacob Wigodski, Isaac Rubinstein, and Michael Stuczynski. In the last Senate before the outbreak of the second World War Isaac Rubinstein was elected senator.

VINAWER, *see* WINAWER.

VINER, JACOB, economist, b. Montreal, Canada, 1892. He received the M.D. degree (1915) and the Ph.D. degree (1922) from Harvard University, and the LL.D. degree from Lawrence College, Appleton, Wis. (1941). Viner was appointed assistant professor of economics at the University of Chicago (1919), and in 1943 was serving there as Morton Hull distinguished service professor. He also taught at the Institut Universitaire de Hautes Études Internationales, in Geneva, Switzerland (1930-31 and 1933-34). Viner was special assistant to the Secretary of the Treasury (1934), and served as consulting expert to the United States Treasury from 1936.

His writings include: *Dumping—A Problem in International Trade* (1923); *Canada's Balance of International Indebtedness* (1924); *Studies in the Theory of International Trade* (1937). He edited the *Journal of Political Economy.*

VIOLIN, MISCHA, violinist and conductor, b. Odessa, Russia, 1900. He was a successful child prodigy, making his debut at the age of nine, then appearing with the Berlin Philharmonic under Nikisch. Under the protection of Lady Norah Noel Gainsborough, Violin was a great success in London, performing at Buckingham Palace before the Queen Mother of England. During the first World War he played in English hospitals for the wounded, and served in the American cavalry. After the War he toured South America, then made his American debut in 1920.

For a period Violin was concertmaster of several important American orchestras. He also worked in Hollywood, conducting orchestras, and writing scores for films. In 1933 he was appointed assistant conductor at Radio City Music Hall. In 1938 he returned to concert work, making a successful nationwide tour.

VIRGIN (*bethulah*), a girl who has not had sexual intercourse with any man (*'asher lo yade'ah 'ish*). According to Jewish law, an engaged girl was regarded as a virgin between the time of betrothal (Erusin) and that of marriage (Nissuin). According to the Talmud,

however, a girl under three years of age can not lose her virginity because of sexual abuse (*Nid.* 5:4; *Nid.* 45a). The appellation "virgin" is generally applied to all girls, and this is a testimony to the high standard of Jewish morality in ancient times. The contrasting term is *be'ulah,* "married woman." A passage in the Tosefta (*Tos. Shebi.* 3:8) speaks of three kinds of virginity: that of a girl, that of untilled soil, and that of a tree which has not yet been pruned.

The rape of a virgin was atoned for by the payment of a fine to her father, the obligation to marry her (if she consents), and the fact that the husband is not allowed to divorce her (*Deut.* 22:29).

If a man marries a woman who is regarded as a virgin, he must assume that her virginity is intact. However, if this assumption was proved incorrect, the woman was put to death by stoning (*Deut.* 22:20-21). The Talmud, however, limits this penalty to cases where the woman had sexual intercourse with another man in the period between her betrothal and her marriage (*Sanh.* 7:4). On the other hand, if the husband's charge of unchastity against his wife had been proved false, he was punished by the payment of a fine to her father, and might never divorce her (*Deut.* 22:19).

The high priest could marry a virgin only (*Lev.* 21:14); other priests might marry a widow, but not a divorced woman. A priest was permitted to become ritually unclean through contact with the body of his dead sister (whether directly or by being under the same roof) only in case she was a virgin; if she had been married before she died, he was not permitted to become ritually unclean on her account (*Lev.* 21:3).

There were also differences in the celebration of the marriage of a virgin bride and one who had been previously married. A virgin was led to the house of her husband wearing a veil (*hinuma;* others interpret the word as a curtained litter), and in some localities roasted ears of grain were distributed on this occasion (*Keth.* 2:1; *Keth.* 17b). The wedding of a virgin usually took place on a Wednesday, in order that if the husband wished to bring a charge that his bride was not a virgin, he might bring it immediately before the court that met every Thursday. The marriage celebration lasted seven days. The marriage contract (Kethubah) provided a portion of at least 200 zuz for the virgin, as compared to the minimum of 100 zuz for the widow.

In many nations of antiquity there existed a *droit de seigneur,* by which the ruler had the right to the first act of sexual intercourse with the bride. Certain references in the Talmud indicate that this *jus primae noctis* was practised by heathen officials in the case of Jewish virgins. One report (*Keth.* 3b) states that the day of the marriage of virgins was changed from Wednesday to Tuesday, in order to avoid the danger that threatened every virgin, "when it was decreed that a virgin who was married must first sleep with the war captain" (cf. *Yer. Keth.* 25c).

There is a note in *Megillath Taanith* 6 that Mattathias, the progenitor of the Hasmoneans, began his war for independence in order to save his own daughter from such a desecration. The Midrash collections (such as the *Yalḳut,* vol. 1, section 109) tell stories that turn on the *jus primae noctis,* and the heroic deed glorified in *Judith* presupposes such a claim on the part of the ruler. The special part which women play in the festival of Hanukah is traced back to the fact that the successful fight for independence saved Jewish virgins from such violations (*Sab.* 23a, and Rashi to the passage). MARCUS COHN.

VIRGIN BIRTH, the Christian doctrine that when Mary became the mother of Jesus her virginity remained unimpaired either by the conception or by the birth itself. This doctrine appears in the accounts of the birth of Jesus by the Holy Ghost in *Matt.* 1:18-25; *Luke* 1:26-38, and seems to have been generally accepted by Christians by the beginning of the 2nd cent. A support for the doctrine was found in *Isa.* 7:14, which was translated as meaning: "Behold, a virgin will conceive and bear a son."

There is nothing in Jewish theology corresponding to this idea. The passage in *Isaiah* is interpreted as referring to contemporary events, not to a period over 700 years later, and the word *ha'almah* in question is rendered, not as "virgin," but as "young woman," "marriageable woman"; according to some Jewish commentators, the reference was to the wife of Isaiah himself. The Hebrew word for virgin is invariably *bethulah;* hence to translate *Isa.* 7:14 as "a *virgin* will conceive" is definitely incorrect. The idea of a divine parenthood of human heroes was unknown in Judaism, but was common in the contemporary pagan world. Thus Hercules, Aeneas, Sarpedon, Alexander the Great, and all the Roman emperors were proclaimed to be of divine origin.

VIRGIN ISLANDS, a group of islands in the Caribbean Sea, consisting of St. Thomas, St. John and St. Croix. St. Thomas was discovered by Christopher Columbus in 1493, but the Spaniards did not settle there, and the Dutch took possession of the islands in 1657. In 1671 the Danish West India Company became the owner of St. Thomas and St. John, and in the early 18th cent. it acquired also St. Croix. From 1815 on the islands were administered by the crown of Denmark, but although these crown colonies became a financial burden to Denmark, it resisted for many years the demand of the United States to purchase them. Finally, in 1917, Denmark sold her West Indian colonies to the United States.

The earliest Jew known by name to reside in the Danish West Indies was Gabriel Milan, a soldier of fortune, who was governor of St. Thomas from 1684 to 1687. But it is not probable that at this time other Jews were living there. C. G. A. Oldendorp, a Protestant missionary who traveled in America and visited the Virgin Islands prior to 1777, noted a large number of Jews in the islands, especially in St. Croix. A relatively great number of Jews settled in the Virgin Islands from 1781 on, coming from St. Eustatius, an island in the Dutch West Indies, which had been a flourishing free port until it was sacked by the British admiral George Rodney in 1781.

These immigrants from St. Eustatius, where a synagogue had been erected in 1738, were mostly skippers and merchants. They had supplied the American armies during the Revolutionary War and rendered other services to the American cause. According to the census of 1789, there were in St. Thomas only nine Jewish families, the first Jewish child born there being Leah Izidro. But the immigration from St. Eustatius increased during the following years. In 1796 a synagogue was erected in St. Thomas, named "Blessings and Peace." It was destroyed by fire in 1803, and in 1812 a new synagogue was built. Because of the increase of the Jewish community a larger synagogue was built in 1823, and again a larger one in 1833. The census of 1837 counted about 400 Jews, that of 1850 about 500. Then their number decreased, at first slowly, but when,

Interior of synagogue in St. Thomas, Virgin Islands, with the Hazan at his lectern

in 1885, the headquarters of the Royal Mail Steamship Company was removed to Barbados, many of the Jews emigrated to other places. They had been interested mainly in shipping and maritime trade, and as long as St. Thomas was the greatest transit center in the Caribbean Sea they flourished commercially.

There was no anti-Semitism in the Virgin Islands, and the Danish administration did not give the Jews any cause for complaint. King Frederick VII of Denmark demanded, however, that boys and girls of all religious denominations be confirmed. He imposed severe penalties on those who neglected his orders concerning confirmation, excluding them from citizenship, from holding offices or trade licenses, from marriage and inheritances, and from taking an oath in court. Most of the Jews of the Virgin Islands were Sephardic, but spoke English in their daily life. They were also mostly Orthodox. Some of them were reluctant to practise confirmation of girls. Rabbi Benjamin Cohen Carillon, who served the congregation in the middle of the 19th cent., was an ardent advocate of confirmation and of Reform, but he succeeded in preventing the Orthodox members of the congregation from seceding.

In 1845 the Danish government sent a commission to form a new code of laws for the Jewish community, which, however, did not affect religious matters but rather the administrative. Carillon's successor, N. M. Nathan, turned back to Orthodoxy. He was succeeded by David Cardozo, who served the congregation for four decades. In 1919 Moses D. Sasso took office as reader and Hazan.

The Jews of the Virgin Islands played an important part in the public life of the country. The Moron family, whose last male representative died in 1913, and the De Sola, Cardozo and Sasso families were in particular highly respected. Two outstanding American statesmen were descended from Jewish families of the Virgin Islands. The one, Alexander Hamilton, was half-Jewish, a son of Rachel Lavine, who was the wife of John Michael Lavine, a wealthy Danish Jewish merchant resident at St. Croix. The other was Judah P. Benjamin, a professing Jew, although not well informed about the Jewish religion. Major Wolff was chief of the militia and governor of St. Thomas. Arthur Lindo was a prominent member of the legislative body of the islands during the last period of the Danish regime. John Philipp Gomez and Rothschild Francis were among the most influential personages in the communal and commercial life of the Virgin Islands. Judge Reimund Baumann assisted as government secretary in the transfer of the islands to the United States.

When the United States took possession of the Virgin Islands their Jewish population had shrunk to about sixty. Prohibition contributed to the further decay of the economic life of the islands, whose main products were sugar, bay rum and rum. But St. Thomas, the "American Gibraltar," offered new possibilities to the Jews also when its fortification was begun.

VIRGIN OF LUDOMIR, *see* LUDOMIR, VIRGIN OF.

VIRGINIA, a South Atlantic state of the United States, with a population of 2,677,773, according to the census of 1940. In 1943 there were in the state an estimated 25,000 Jewish inhabitants. The first permanent English settlement in North America was made at Jamestown in Virginia, in 1607. Virginia was one of the thirteen original states of the Union. Scattered Jewish names appear in the annals of the pioneer settlement, but they are not necessarily the names of Jews.

One Elias Legardo, who landed in Virginia in 1621, was probably the first Jew to come to the Old Dominion. Joseph Mosse and Rebecca Isaacke, listed as inhabitants in 1624, may also have been Jews. John Levy received a patent for 200 acres of land in James City County in 1648. The names Silvedo and Manuel Rodrigues are mentioned in Lancaster County in 1652. In 1658 Moses Nehemiah was party to a lawsuit in Virginia. Amaso de Tores, described as a Spanish Jew, came to the colony before 1650. Albino Lupo, a Portuguese Jew, is also mentioned. An Isaac Jacob was in Northampton County in 1674, and in 1687 Robert Nathan, possibly a Jew, was a member of the militia.

It is certain, however, that Jews were relatively slow in coming to settle in Virginia in any appreciable numbers; this was by reason of the social structure of the colony, which was of a non-commercial and non-industrial nature. Huge, self-sustaining plantations formed the base of the colony's economy, and there were no cities of size and no merchant class until after the Revolution. There is a tradition that after the earthquake at Lisbon, Portugal, in 1755, a company of Jews took ship to go to Virginia. Adverse winds led them to Narragansett Bay, where they became leading citizens of Newport, R. I.

Jewish names continue to be recorded during the early 18th cent. A Colonel Levy was involved in the Carolina insurrection of 1711, and was put to death by Governor Alexander Spottiswood. In George Washington's Ohio campaign of 1754, Michael Franks and Jacob Myer figured prominently as members of the Virginia Regiment. In 1757 Michael Israel is listed as a landowner in Albemarle County; he is also recorded as serving in the militia. Solomon Israel, perhaps a brother, is mentioned as a landowner in the same county in 1764. A mountain pass in this region continued permanently to be called "Israel's Gap." In another connection Hezekiah Levy, possibly a Jew, was a member, prior to 1771, of the Fredericksburg Lodge No. 4, the Masonic lodge of which George Washington was likewise a member.

Jews from Virginia were patriots in the Revolutionary War. Captain Jacob Cohen raised a company of militia in Cumberland County. The name of Captain Isaac Israel, and a number of other Jewish names, appear in the lists of those who fought in the Virginia line. Michael Gratz, father of Rebecca Gratz, moved to Virginia during the war, there took an oath of allegiance, and when he returned to Philadelphia was listed as "late of Virginia." Isaac Levy, merchant and physician, is described in 1779 as a subject of Virginia and a provisioner for the Revolutionary forces.

Thus by the middle of the 18th cent. the community of Sephardic Jews in western Virginia had become fairly nu-

merous and was further augmented by an influx of Jews from Lancaster, Pa., who came to establish themselves as merchants. One of Norfolk's foremost citizens in 1786 was Moses Myers, official representative of the French Republic. In Petersburg, in 1796, lived Samuel Myers, a son-in-law of Moses M. Hays of Boston, and it seems to have been he who gave to the Virginia Historical Society at Richmond the interesting colonial document of the receipt book of Judah Hays and his son Moses Michael Hays. It has been asserted that Thomas Jefferson's personal acquaintance with patriotic Jews of Virginia and elsewhere may have influenced his zealous struggle to establish religious freedom in Virginia, the success of which proved a powerful influence on Jewish emancipation in Europe as well as in America.

It was estimated that the Jewish group made up one-sixth of the population of Richmond by 1790. The first organization of Jews in Virginia was Congregation Beth Shalome of Richmond, founded sometime before 1791. In that year twenty-nine heads of families were listed as members of the congregation. Other localities in the state were not permanently organized until much later, when the Jewish population had been considerably increased by fresh immigration from Europe. For the year 1826 it was estimated that the state of Virginia had a total of 400 Jewish residents. In 1846 Isaac Leeser put the Jewish population at 600. Figures published in 1880 gave 2,506 Jewish inhabitants for the state. And in 1897, after the mass migrations from Eastern Europe, the Jewish population was estimated to be 18,000. Organization of the communities was then accelerated. The results of a statistical study of Jewish communal organization in the United States made for the year 1900 and published in the *American Jewish Year Book* of 1901 to 1902 reported that thirteen cities and towns of Virginia had one or more Jewish institutions, twelve of these having seventeen regularly organized congregations. Five congregations were affiliated with the Union of American Hebrew Congregations; eight supported schools. There were in these localities a total of nine charitable societies. The total population was then estimated at 15,000.

The most numerous Jewish communities, in order, came to be Richmond, Norfolk, Portsmouth and Newport News, all of which are separately treated in this encyclopedia. A 1937 study, placing the total Jewish population of the state at about 25,000, further listed forty-five localities containing between eleven and 700 Jews and thirty-six localities in the state of fewer than ten Jews. The United States census of religious bodies, which in 1850 had reported three congregations for Virginia, in 1936 reported thirty-four congregations, with only one in a rural area, and with a total membership of 23,564. Twenty-one of the congregations reported 1,266 pupils in attendance at their religious and Hebrew schools. In 1943, in addition to the four leading Jewish communities, Jews were well organized in several other cities and towns of Virginia.

ALEXANDRIA included, in 1943, approximately 500 Jewish inhabitants in its population of 33,523 (census of 1940). Simon Waterman was the only Jew in Alexandria when, in 1853, Leopold Genzberger arrived from Germany to settle there. There followed Isaac Schwartz, Salomon and Wolf Meinberg, and Louis Baar, all from Germany. During the Civil War a number of newcomers came, also of German origin: the families Lindheimer, Brager, Auerbach, Stein, and Bernheimer; and Moses Heller, Morris Ruben, Leopold Bendheim, Henry Straus, Isaac Eichberg and Simson Dreifus. The first organization of the small community was the Hebrew Benevolent Society, formed in July, 1858. In the following year Congregation Beth El was organized, but did not build its house of worship until 1871. This same synagogue was housing the congregants in 1943. Congregation Beth El (Reform) joined the Union of American Hebrew Congregations in 1883. In 1939 Hugo B. Schiff came to the pulpit, and was still serving in 1943. There was also an Orthodox congregation, Agudas Achim, in 1943.

The outstanding Jewish citizen of Alexandria was Charles Bendheim, a native of the city (1866-1934). He served in the state legislature (1891, 1895-96, 1906), was a city councilman (1916, 1918), and was assistant district attorney (1915). Henry Straus was mayor of the city in 1894. Lewis Stein was also mayor (d. 1915). Leopold Genzberger, Isaac Eichberg, Leopold Ruben and Benedict Weil were city councilmen at various times in the community's history. Leroy S. Bendheim, son of Charles Bendheim, was for six years chairman of the school board, a position which he still held in 1943. Maurice D. Rosenberg was elected a member of the state legislature in 1936. Leopold Ruben, who was a master of the Alexandria Washington Mason Lodge 22, of which George Washington was the first master, donated a swimming pool to the city about 1910.

DANVILLE had about 250 Jews (1943) in its population of 32,749 (census of 1940). The community began to be fairly well populated in the early 1860's by immigrants from Germany. Among the first settlers were Albert Wildman, Lewis W. Fleishman, Abraham Isaacs, Joseph S. Gerst, Daniel S. Lisberger, M. Hessberg, Jacob Brafman, C. W. Sampson, M. J. Fox, Gabriel Frank and Isaac Rosenstock, the latter a native of Petersburg, Va. The contemporary Jewish press reports the founding of a congregation in 1877. In 1886 the Danville Hebrew Cemetery Association was established. In 1893 the Reform Congregation Beth Sholem was permanently organized, and six years later erected its synagogue, dedicated in 1900, and still in use in 1943. Student rabbis officiating for the high holy days ministered to the congregation until 1935, when Rabbi Julius K. Gutmann was elected to the pulpit; Gutmann was still the incumbent in 1943.

The Orthodox Agudas Achim Benefit Society, organized in 1893, was reorganized in 1908 as the Aetz Chayim Congregation. A synagogue was built in 1908 to 1910. A number of rabbis served the congregation. In 1943 Rabbi Max Kapustin, who had come to the pulpit in 1938, was spiritual head of Aetz Chayim.

The congregation established a cemetery (1918), a religious school (1908) and a ladies' auxiliary (1929). Julius Kaufman, a leading citizen, was a member of the city council (1889-1919) and a member of the General Hospital executive board (1880-1919). The Memorial Hospital of the city received the Julius Kaufman Memorial Endowment for Nurses and the Kate Herman Trust Fund.

FREDERICKSBURG numbered approximately eighty Jews (1943) in its total population of 10,066 (census of 1940). Ezekiel Levy settled at Fredericksburg about 1755, and was a member of the local Masonic lodge. Michael Gratz of Philadelphia had a counting house in the town during the Revolutionary War, and with him as associate was Joseph M. Myers, who opened a local bank in the town in 1792. A Hebrew Aid Society, later known as the Hebrew Relief Association, was founded about 1880. The Reform Congregation Beth Sholom was organized by Fredericksburg Jews in 1936, and in 1938 called to the pulpit Ulrick B. Steuer, who served until 1942. It built its Temple in 1940.

PETERSBURG included in its population of 30,631 (census of 1940) approximately 425 Jews in 1943. The first Jew to settle there was Abraham Cohen, who came from Germany about 1820. He was followed by a number of relatives. As early as 1857 the Reform Congregation Rodef Sholem was first organized, joining the Union of American Hebrew Congregations in 1875. Composed mainly of German Jews, it flourished for

a great number of years. Eventually its membership dwindled, until the congregation comprised only ten families. The congregation then became inactive, holding services on high holy days only.

The Conservative Congregation Brith Achim, organized in 1890 (originally Orthodox), built its synagogue in 1915. The congregation organized a religious school, Hebrew school and sisterhood. In 1937 Joseph Utschen became rabbi; he was still serving in 1943.

The United Jewish Community Fund was organized at Petersburg in 1938 and affiliated with the local community chest.

ROANOKE, third largest city of Virginia, had, in 1943, about 500 Jews in its total population of 69,287 (census of 1940). Roanoke Jews organized the Reform Temple Emanuel about 1889. Rabbis who served the congregation included Meyer Noot, J. Michnick, Morris Sessler, Max Rosenstein, R. J. Sarachek, T. F. Joseph, Alter Abelson, George Benedict, Nahum H. Friedless, Frederick I. Rypins and Maurice Goldblatt. Morris W. Graff, who occupied the pulpit in 1943, was elected in 1938. The Temple housing the congregants in 1943 was dedicated in 1937.

The Conservative Beth Israel congregation was founded in 1907, and dedicated its new synagogue in 1926. At various times it was served by Rabbis David Stirn, J. L. Han, V. Schepebowitz, George Reichter, Eugene Grienfield, Joseph Gerstein, Israel A. Levine and Irving Ganz. Murray Kantor, who came to occupy the pulpit in 1940, was rabbi in 1943.

Other Jewish organizations founded by the Roanoke community were a lodge of the B'nai B'rith; a district of the Zionist Organization of America; a Young Judaea; a chapter of Hadassah; a post of the Jewish War Veterans; and several local cultural clubs.

Outstanding Jewish citizens, resident in the community in 1943, were Morris L. Masinter, prominent Mason; Joseph Spigel, at one time president of the Roanoke Retail Merchants' Association; Arthur Taubman; Irving Saks, director of the Chamber of Commerce; Mrs. Joseph Forman, vice-president of the Virginia Federation of Music Clubs; Mrs. Harry L. Rosenbaum; Julius Fisher; and Morris W. Graff, member of the Virginia War Price and Rationing Board.

CHARLOTTESVILLE. The community of Charlottesville organized the Reform Congregation Beth Israel about 1883. The congregation joined the Union of American Hebrew Congregations in 1927.

STAUNTON founded the Reform Congregation House of Israel in 1885. It became an affiliate of the Union of American Hebrew Congregations in 1929.

HARRISONBURG organized the Hebrew Friendship Congregation in 1867. In 1943 Rabbi Joseph Kornfeld was serving as rabbi of both communities.

LYNCHBURG held services on the high holidays as early as 1853. In 1872 a synagogue was dedicated. Congregation Agudath Sholom was organized in 1898.

Virginia Jews made notable contributions to the life of the general community. In the War Between the States, Virginia gave more than one hundred Jewish soldiers to its cause. The cemetery of Congregation Beth Ahabah at Richmond set apart a separate soldiers' section, believed to be unique in the United States, enclosing thirty graves of Jews who fell in or around the city during the War Between the States. Marked off by an ornamental iron fence composed of stacked guns, crossed sabers, flags and military caps, it was maintained by the Hebrew Ladies' Memorial Association, organized in 1865. Jewish soldiers fought in the Spanish-American War and in the first and second World Wars. The first citizen of Richmond to give up his life in the first World War was Jacob Edel Cohen. Commodore Uriah P. Levy, although not a native Virginian, was a close friend and admirer of Thomas Jefferson, and it was he who purchased Jefferson's home, Monticello, and thus made it possible for the home to become a national shrine. Sir Moses Ezekiel, the noted sculptor, was born at Richmond, and was buried in the Arlington National Cemetery.

Several Jews served in the state general assembly: William Lovenstein, of Richmond (1869-75; in the senate, 1875-79); A. S. Reinach, of Petersburg (1876-86); Charles Bendheim, of Alexandria (1891, 1895-96, 1906); Isaac Banks, of Norfolk (1921); Benjamin Banks, of Norfolk (1911); Maurice Rosenberg, of Alexandria (1936-). Many Jews were elected to the city councils of their local communities. In addition to those mentioned in the separate city articles was William Loeb, who served in the Harrisonburg council (1871), as did Barney Ney (1885-89).

VISION OF ISAIAH, *see* ISAIAH, ASCENSION OF.

VISONTAI, SOMA, lawyer, and Hungarian deputy, b. Gyöngyös, Hungary, 1854; d. Budapest, 1925. After being admitted to the bar at Budapest he specialized as counsellor in criminal cases. He became nationally known through the case of Yasha Tomić. Tomić, a Serbian nationalist editor of Novi Sad (Ujvidék), had assassinated his political adversary in retaliation for the slandering of his wife, and Visontai obtained the minimum punishment for him, which was morally an acquittal. The enthusiastic Serbs of Novi Sad elected him their deputy to parliament in 1892. Later, criminal matters were tried by juries in Hungary, and Visontai was among the men who had fought for this betterment. In the following parliamentary term his native Gyöngyös returned him to the lower house.

Visontai rendered important diplomatic service to the Austro-Hungarian monarchy in connection with Bosnia, and was made an aulic councillor in 1908. He was a member of the national board of law examiners and of the disciplinary council of the Hungarian supreme court. Visontai was noted also as a publicist. He wrote a book on usury, *Az uzsoráról* (1885).

VISSER, LODEWIJK ERNST, judge and communal leader, b. Amersfoort, Holland, 1871; d. The Hague, Holland, 1942. A student of law at Utrecht University, he became doctor of law and state economy in 1894. Soon afterward he was given the post of general prosecutor of Amsterdam, and in 1897 became an official in the foreign department, in 1902 assistant professor at the University of Amsterdam and deputy judge. In 1903 he was appointed judge in Rotterdam; in 1911 he was promoted to the rank of vice-president of the court at Rotterdam; in 1915 he became its president. From 1914 to 1933 he was a member of the privy council, and in 1933 he became vice-president of this legislative body. He was vice-chairman of the Netherlands Royal Commission on Civil Legislation. He was discharged from office by the Nazis shortly after their invasion of Holland in May, 1940. Outstanding among his many publications is a work called *The Territorial Sea,* which appeared in 1894.

In the course of his activity Visser found count-

less opportunities to help the poor and needy, regardless of creed. After the first World War he was instrumental in transporting hundreds of undernourished Austrian children to The Netherlands, where they were housed and fed for a considerable time. He was an honorary member and an active worker of the Jewish Help Committee which (from 1933 on) had taken upon itself the care of Jewish refugees from Nazi Germany. He served for several years as president of the Palestine Foundation Fund in Holland, and of the Jewish community at The Hague.

VITA, TRANQUILLO, *see* CORCOS, HEZEKIAH MANOAH HAYIM BEN ISAAC.

VITAL STATISTICS, *see* HEALTH OF THE JEWS.

VITAL, HAYIM, Cabalist and author, b. Safed, Palestine, 1543; d. Damascus, Syria, 1620. He was the son of Joseph Vital, a Tefillin (phylacteries) scribe, who emigrated from Calabria, Italy, to Palestine; Vital was called also Hayim Calabrese. In his youth he studied under Moses Alshech. Later, after devoting himself to alchemy for two and a half years, he turned to Cabala.

Immediately after the arrival in Palestine (1570) of Isaac Luria, the outstanding Cabalist of the time, Vital became one of his students and subsequently his most prominent disciple. After Luria's death (1572) Vital assumed the leadership of the followers of Cabalist occultism and proclaimed himself the Messiah ben Joseph. Although Luria left nothing in manuscript, Vital had, during their intimacy, made memoranda of his teachings.

First in Egypt, where he was not too warmly welcomed, and then in Jerusalem, where his former teacher, Alshech, made him a rabbi (1584), Vital expounded Cabalist doctrines. In 1594 he settled in Damascus, to begin his comprehensive work on the mystic doctrines and the Messianic concept.

His manuscripts were said to have been pilfered and copied while he was ill, and to have been distributed under the title of *Etz Hayyim,* a volume which he later disclaimed. After his death his son Samuel published Vital's dreams and visions as *Shibhe Hayyim Vital.* As *Sefer Etz Hahayim,* Vital's expositions were published in various editions, the first of which appeared at Zólkiew in 1772. Other works of Hayim Vital were a commentary on the Bible, and homilies (*Etz Hadaath Hatob,* 2 vols.). Vital's works, including the interpretations which he attributed to Luria, are still studied by many Oriental Jews.

VITEBSKER, MENDEL, *see* MENAHEM MENDEL OF VITEBSK.

VITERBO, DARIO, sculptor and goldsmith, b. Florence, Italy, 1890. At the age of twenty-two he graduated from the Academy of Fine Arts in his native city. He gained a reputation at the Secessione exhibition in Rome in 1914 with his sculpture *Il sorriso interno.* Viterbo served during the first World War as a cavalry officer, and distinguished himself at the front. He exhibited in 1922 at the Primaverile Fiorentina, and thereafter his sculptures as well as fine artistic works as a goldsmith were permanent features in the best-known European galleries and exhibitions, including the Mostra d'Arte Decorativa in Monza, near Milan, at the Biennale in Venice, and at the International Exposition of Decorative Arts in Paris (1925), where he received a gold medal for his works wrought in gold and a silver medal for his sculptures. He came to the United States from Paris (1940), where he had been living during the fifteen years preceding the second World War.

VIVANTE, CESARE, jurist, b. Venice, Italy, 1855; d. Rome, 1939. He received the doctorate in jurisprudence from the University of Padua, and at the age of twenty-seven became professor of commercial law at the University of Parma, where he remained for seven years (1882-89). Vivante taught subsequently at the University of Bologna, and in 1898 was invited to assume the chair of commercial law at the University of Rome, which he held until his retirement from teaching in 1930. He was then, at an official solemn ceremony, named professor emeritus of the University of Rome. He presided over numerous Italian legislative commissions, and was chairman of the Italian Commission for the Reform of the Commercial Law Code; the legislative project of the new Italian Code of Commercial Law bears the name of Vivante.

Noteworthy among his first studies was *Il contratto di assicurazione* (3 vols., 1894), which received the prize of the Italian Royal Academy Dei Lincei. His *Trattato di diritto commerciale,* which was first published in Turin in 1893, went through five editions. The most remarkable and classic work of Vivante in the field of commercial law in Italy was his *Istituzioni di diritto commerciale,* which, since its publication in 1891, had more than sixty editions. Together with A. Sraffa, he founded (1903) the *Rivista del diritto commerciale,* the leading Italian publication in the field of commercial law. He was honorary professor of the University of Bologna, and member of the Italian Royal Academy Dei Lincei. His only son died during the first World War, serving as commander of an Italian submarine.

VIVANTI, ANNIE, poetess and novelist, b. London, 1868; d. Santa Margherita, Italy, 1942. She was a pupil of the great Italian poet, Giosue Carducci; he wrote the introduction to her first volume of poetry, *Lyrica,* which appeared at Milan in 1890. In 1902 she married the Irish patriot John Chartre, and traveled widely with him, making speeches and pleading the cause of the creation of a free Irish state.

Of her novels, the best-known are: *Vae Victis* (Milan, 1917); *Naja Tripudians* (Florence, 1920); *Mea Culpa* (1927); *Fosca, sorella di Cleopatra* (1931). Many of her novels are of an autobiographical nature in which, under disguised names, she describes various moments of her turbulent life. Her theatrical play, *L'invasore* (1917), did not meet with the same success as her widely read novels. She wrote also a tale for children, *Sua Altezza* (Florence, 1923).

VLADECK, B(ARUCH) CHARNEY, Labor Socialist, and Jewish worker and leader, b. Minsk, Russia, 1886; d. New York city, 1938. He was the brother of S. Niger. Originally his family name was Charney, but he took the name of Vladeck for use in revolutionary agitation in czarist Russia. As a youth he was active in the 1905 revolution, and after its failure he suffered imprisonment.

Coming to the United States in 1908, he almost immediately became one of the most popular Jewish Socialist agitators, charming working people and intellectuals alike with an eloquence which combined wit, humor and poetic beauty with intense passion. He was soon made manager of the Philadelphia office of the *Jewish Daily Forward,* and took that opportunity to study the English language and American history and literature at the University of Pennsylvania.

Vladeck settled in New York in 1915, and in 1917

was elected a Socialist member of the board of aldermen. In that body he amazed observers with his grasp of municipal government problems. During his second term he was leader of the Socialist delegation. He especially urged a system of municipal housing. At the end of his four years' service in the board of aldermen he became general manager of the *Forward,* a post which he held until his death.

Vladeck was constantly active in the work of the Socialist Party, serving for a time on its national executive committee. He was a popular figure in the Jewish labor movement, especially the Amalgamated Clothing Workers. He went abroad several times for the *Forward,* for the Jewish Labor Committee, and for the ORT. At one time he was sent to England for the American Federation of Labor to induce Sir Walter Citrine, head of the British Trade Union movement, to come to the United States. With Citrine he addressed the A.F. of L. convention at San Francisco, which launched a vigorous campaign against Fascism and Nazism. He took a leading part also in the battle against Communism.

In 1937, the first election held under proportional representation, Vladeck was nominated by the American Labor Party, and was chosen as the top man in Manhattan as a member of the New York City Council. He was recognized as the main spokesman in that body for Mayor Fiorello H. LaGuardia. The mayor had previously appointed him a member of the New York Housing Authority, which had been set up to carry out the provisions of the National Housing Act. He helped set up the local housing administration and presided over the first public housing established in the metropolis.

Vladeck long suffered from stomach and eye troubles, and after an unsuccessful operation on his eyes in the spring of 1938, he died in October. Mayor LaGuardia, Governor Herbert H. Lehman, and spokesmen of thousands of workers eulogized him on the occasion of his funeral, and his memory was honored by the naming of a great public housing development after him. ALGERNON LEE.

VOCATIONAL GUIDANCE, *see* SOCIAL SERVICE.

VOGEL, SIR JULIUS, New Zealand statesman, b. London, 1835; d. London, 1899. He studied at the University College School in London, emigrated to Australia in 1852, became a newspaper editor and sought election to parliament. He was defeated, and in 1861 left Australia for New Zealand. There he became editor of the *Otago Daily Times,* member of the Otago Provincial Council and subsequently of the House of Representatives (1863). From 1869 on he served in the New Zealand cabinet as colonial treasurer, postmaster general, commissioner of customs and telegraph commissioner successively. He was twice prime minister of New Zealand (1873-75 and 1876). From 1876 to 1881 he was agent general for New Zealand in London, where he resided permanently after his retirement from politics (1887). Vogel was knighted in 1875. He published a Utopian novel, *Anno Domini 2000* (1889).

Vogel played a leading role in the economic development of New Zealand. Under his administration large loans were made to the country by the Bank of England, the population rose from a quarter-million to a half-million, and the value of exports trebled. Vogel's many achievements included the establishment of a railway system, a telegraph line to Australia and a mail service between New Zealand and San Francisco, as well as the inauguration of the government life insurance system and of a public trust office.

B. Charney Vladeck

Lit.: *Jewish Chronicle* (London), March 18, 1899; Gisborne, *History of New Zealand* (2nd ed., 1896).

VOGEL, MARTIN, lawyer and assistant treasurer of the United States, b. New York city, 1878; d. New York city, 1938. He graduated from Columbia University, Columbia Law School and New York University, and was admitted to the bar in 1901. A specialist in banking and corporation law and attorney for numerous corporations and banks, he was nominated for the post of assistant treasurer of the United States in 1913 by President Woodrow Wilson. The youngest man ever named to that post, he served with offices at the subtreasury until his resignation in 1920. Vogel headed the Central Liberty Loan Committee during the first World War. He represented President Wilson in receiving foreign diplomats and missions.

After his resignation from office, Vogel lived in London until 1934. Due to his illness he had given up public life. He was a former director of the Harriman National Bank and Trust Company, and a director and member of the executive committee of the New York *Evening Post.* Vogel contributed the article on war financing to the *Encyclopaedia Britannica.*

VOGELSTEIN, HERMANN, rabbi and author, b. Pilsen, Bohemia, 1870; d. New York city, 1942. He was the brother of Ludwig Vogelstein. He studied at the Universities of Berlin and Breslau (Ph.D., 1894), at the Jüdisch-Theologisches Seminar, of Breslau, and at the Hochschule für die Wissenschaft des Judentums, of Berlin, and was ordained in 1897. Vogelstein headed the Liberal Synagogue at Königsberg, East Prussia, from 1897 to 1920, and then assumed the post of rabbi in Breslau, where he performed his duties until November, 1938, when his synagogue was set afire by the Nazis. Having arrived in the United States in 1939, he was active as a member of the New York Board of Jewish Ministers and the Association of Reform Rabbis in New York city; in 1940 the Hebrew Union College conferred upon him the honorary D.D. degree.

Vogelstein wrote vol. 1, *Der Getreidebau* (1894), of *Die Landwirtschaft in Palästina zur Zeit der Mischnah; Geschichte des israelitischen Vereins für Krankenpflege und Beerdigung in Königsberg in Preussen* (1904); *Militärisches*

aus der israelitischen Königszeit (1906); *Zur Vorgeschichte des Gesetzes über die Verhältnisse der Juden vom 23.7.1847* (1909); and contributed a chapter to *Abraham Geiger, Leben und Lebenswerk* (edit. Ludwig Geiger, 1910). With Paul Rieger he wrote *Geschichte der Juden in Rom* (2 vols., 1895-96). A revised one-volume edition, in the translation of Moses Hadas, appeared in the Jewish Community Series of the Jewish Publication Society of America (*Rome,* 1940). It surveys the history of the Jews in Rome from the time of the Maccabees up to the introduction of anti-Jewish laws by the Fascist regime.

HEINEMANN VOGELSTEIN (b. Lippe, Northern Germany, 1841; d. Stettin, Germany, 1911), the father of Hermann Vogelstein, served as rabbi in Pilsen (1868-80) and Stettin (1880-1911). In 1928 a street in Stettin was named for him, but its name was eradicated by the Nazis. Vogelstein was in his later years the acknowledged leader of the religious-liberal movement of German Jewry, deputy chairman of the Vereinigung für das liberale Judentum in Deutschland, and chairman of the Vereinigung der liberalen Rabbiner.

VOGELSTEIN, LUDWIG, metal magnate, philanthropist, and leader of Reform Judaism, b. Pilsen, Bohemia, 1871; d. New York city, 1934. He was a son of Heinemann Vogelstein, and a brother of Hermann Vogelstein. After he graduated from the Gymnasium at Stettin, Germany, he entered the metal firm of Aron Hirsch and Son at Halberstadt, Germany, where he remained until 1896. In 1897 he came as the firm's agent to New York, where he subsequently founded the firm of Ludwig Vogelstein and Company. In 1920 he became vice-president of the firm, when it amalgamated with the American Metal Company, Ltd., and from 1924 on he was chairman of its board. He wrote many technical articles for the *Daily Metal Reporter,* and owned a valuable collection of books on metals, metallurgy and mining.

Vogelstein was active in charitable, communal, social and religious work for more than thirty years. He served as chairman of the executive committee of the Union of American Hebrew Congregations from 1925 until his death; as vice-president of the Federation for the Support of Jewish Philanthropic Societies of New York; as president of Temple Beth-El, New York city, and, after its amalgamation with Temple Emanu-El, as trustee and chairman of the finance committee; as trustee of the Jewish Publication Society of America; and as vice-president of the World Union for Progressive Judaism.

Lit.: New York Times, Sept. 24, 1934; *American Hebrew,* Sept. 28, 1934, p. 371.

VOGÜÉ, CHARLES JEAN MELCHIOR, MARQUIS DE, archeologist, historian and French diplomat, b. Paris, 1829; d. Paris, 1916. He traveled extensively in Syria and Palestine (1852-54), and published numerous scholarly studies on the history, archeology and art of these countries, as a result of which he was made a member of the Académie des Inscriptions et Belles-Lettres (1868). From 1871 to 1879 he was in the diplomatic service of France. His most important work was *Le Temple de Jérusalem* (1864-65).

Vogüé's other archeological writings include: *Les églises de la Terre-Sainte* (1859); *Inscriptions hébraïques de Jérusalem* (1864); *Mélanges d'archéologie orientale* (1869); *Syrie centrale, Inscriptions sémitiques* (1869-77); *La citerne de Ramleh et le tracé des arcs brisés* (1912). Vogüé contributed a study on the Hauran to *The Recovery of Jerusalem* (1871).

Lit.: Lidzbarski, Mark, *Handbuch der nordsemitischen Epigraphik* (1898); Sidersky, David, *Quelques portraits de nos maîtres des études sémitiques* (1937).

Ludwig Vogelstein

VOLHYNIA, *see* POLAND; RUSSIA.

VOLK, LESTER DAVID, American Congressman, physician and lawyer, b. Brooklyn, N. Y., 1884. He graduated from the Long Island Medical College (M.D., 1906) and from the Graduate Brooklyn Law School, St. Lawrence University (LL.B., 1911). Specializing in otolaryngology, he was affiliated with numerous hospitals in New York city. In 1932 he worked at the Allgemeines Krankenhaus and Polyklinik in Vienna. During the first World War he served in the Medical Corps as a first lieutenant of the American Expeditionary Forces. As a member of the New York state assembly (1913) he was on the investigation commission to study vice and police conditions in New York city. In 1914 Volk served as coroner's physician for Kings County. He was a Republican member of the 66th and 67th Congresses (1921-23) for the 10th New York district, and instrumental in instigating the Whitney investigation which resulted in the abolition of the State Narcotic Bureau (1922).

Volk was chairman of the Bonus Parade in New York city (1920) in which 82,000 ex-service men marched. From 1913 to 1918 he edited *The Medical Economist.* He wrote *Abie's Travels Through the Knights of Pythias* (1938).

VOLOSZYNER, HAYIM BEN ISAAC, *see* HAYIM BEN ISAAC OF VOLOZHIN.

VOLPE, ARNOLD, conductor, b. Kovno, Lithuania, 1869; d. Miami, Fla., 1940. He studied violin with Lotto and Leopold Auer, coming to the United States in 1898 to begin his professional career. In 1902 he founded the Young Men's Symphony Orchestra, directing it until 1919. From 1904 to 1914 he also conducted the Volpe Symphony Orchestra, which gave concerts of unusual music in New York. He is most famous for the founding of summer concerts at the Lewisohn Stadium in New York in 1918, serving as its principal conductor for two seasons, and as a guest conductor in 1924, 1927 and 1936.

From 1919 to 1922 Volpe directed the Washington (D.C.) Opera Company, and in 1926 he founded the University of Miami Symphony Orchestra, which he directed until his death. He was also an educator, directing the Kansas City Conservatory from 1922 to 1925, and the Chicago Musical College from 1925 to 1926.

Arnold Volpe

VOLTAIRE, FRANÇOIS MARIE AROUET, non-Jewish writer, poet, playwright, historian, philosopher and encyclopedist, b. Paris, 1694; d. Paris, 1778. Through his genius he ranked above all his contemporaries. A biting satirist and a profound hater of clerical intolerance and of religious fanaticism, he fought, throughout the whole of his life, for freedom of conscience and for liberty in general. Through his incessant criticism directed against the abuses perpetrated by those in power, Voltaire contributed greatly to the dissemination of ideas and feelings against monarchical absolutism. As such, he is regarded, together with Jean Jacques Rousseau and with the Encyclopedists of the 18th cent., as one of the guiding spirits of the great French Revolution.

Voltaire had no sympathy for the Jewish people and for the Bible. But it was not always so. In his young years (cf. Brandes, Georg, *Voltaire,* 2 vols.; German trans., Berlin, 1912; English trans., New York, 1930) he once declared that the Five Books (Pentateuch) seemed to him a thousand times more interesting than Homer. But later on he changed completely, and turned against the Jews and the Bible. In his long and famous article on the Jews published in the *Dictionnaire Philosophique* he expresses strong feelings against them. In view of the great authority which he enjoyed in the European intellectual world of the 17th cent., this attack made a deep impression. Brandes, asking how it came about that a man of Voltaire's brilliant intelligence and proved liberalism could write about the Jews as he did, explained it by two reasons. First, Voltaire was known as greedy and avaricious, and he had had unfavorable experiences with Jewish businessmen. But the second, and more important reason, in the view of Brandes and of many other authors, had its basis in Voltaire's fight against the church. Since the root of the New Testament was the Old Testament, and since Voltaire did not dare to attack the New Testament directly, he endeavored to discredit the Bible (Old Testament) in order to destroy the very basis of theological teachings. In his writings he attempted to prove that the Bible is a product of very old times and that it "cannot be inspired by God" (Brandes, Georg, *Voltaire,* vol. 2, pp. 214-22). Nevertheless, in the same article in the *Dictionnaire Philosophique,* he reminded one of what he had said against every kind of fanaticism in his play *Hendriade,* and stated that he was against persecution of the Jews. He congratulated Holland for having granted civil rights to the Jews.

Voltaire's attitude as regards the Jewish question led to passionate polemics in Europe. In 1762 a Marrano of Bordeaux, Isaac de Pinto, wrote an "apology for the Jewish nation" as a reply to Voltaire's article in the *Dictionnaire Philosophique.* Voltaire answered on July 11, 1762, saying, among other things: "If somebody perpetrates an injustice, he has to give satisfaction. Attributing to a whole nation the faults of some of them, I had committed an injustice." In 1769 a priest, the abbé Antoine Guenée, published against Voltaire a book in the form of six letters written by Portuguese, Polish, German and Dutch Jews. The book met with great success, and went through four editions. Voltaire answered with a pamphlet entitled *Un Chrétien contre six Juifs* (A Christian Against Six Jews), wherein he expressed his point of view about the past of the Jewish people and about the Old Testament. The following excerpt from this pamphlet is of interest:

"Agree with me that you, Jews, were in your time as barbarous as we, French, were in all the centuries when we were not civilized. . . . For a long time we were Gog and Magog. . . . Up to the 16th cent. our ancestors were savage swine. All peoples were such. Today the Frenchmen are a little more civilized. . . . Let us forget the horrors of the past that all of us had known." SANIEL LABIN.

W., *The Jewish Community* (3 vols., 1942).

VOLTERRA, MARIO, physician and pathologist, b. Florence, Italy, 1901. He graduated in 1924 from the medical faculty of the University of Florence, and then pursued his studies at the Universities of Berlin and Halle. In 1928 he became assistant professor of clinical chemistry and microscopy and in 1933 of the medical clinic at the University of Florence. Volterra was the first to recognize the appearance of psittacosis (parrot disease) on the European continent, and helped to prevent its spread, offering his services to the Italian public health authorities in 1929. In 1935 he became professor at the University of Cagliari, lecturing on internal medicine and medical diagnosis, and later taught the same subjects at the University of Florence.

Dismissed from teaching as a result of the Italian anti-Semitic laws of October, 1938, he was for a short time guest lecturer of the Pathological Institute of the university. He came to the United States in the fall of 1939, and did research work at Mt. Sinai Hospital in New York city. He was (1943) a member of the Italian Representative Committee of the Advisory Board on European Affairs of the World Jewish Congress.

VOLTERRA, MESHULLAM BEN MENAHEM, 15th cent. jeweler and traveler. His father was a wealthy gem dealer of Florence, Italy, and it was in connection with the gem trade that Volterra set out, in 1481, on a trip to the Orient. He passed through Egypt, into Jerusalem and later through Jaffa, Damascus and Crete. The record of his voyage, including the description of the receptions by the Jewish communities and the author's illnesses and shipwreck, is in a manuscript in the Laurentian Library in Florence.

Serge Voronoff

VOLTERRA, VITO, physicist and mathematician, b. Ancona, Italy, 1860; d. Rome, 1940. He first studied natural science in Florence, later physics at the Scuola Superiore Normale in Pisa. In 1883 he won in a nation-wide competition the chair of rational mechanics at the University of Pisa, where he taught until 1892, when he accepted an invitation to teach at the University of Turin. In 1900 he became professor of mathematical physics at the University of Rome. He remained there until 1931, when he refused to take the oath of allegiance to the Fascist regime.

Volterra's studies and theories of permutable functions, of functionals and of integral and integro-differential equations placed the name of Volterra among the greatest and keenest mathematicians of modern times. The lecture course which he delivered at the University of Stockholm, presenting the new basis of the mathematical theories of elasticity, won fame. Great interest was aroused also by the lecture course which he held at the University of Rome in 1900 and in which he laid down the attempts to apply mathematics to biological and social sciences. A new line of science, "mathematical biology," derives from his theories and studies. He published more than a hundred scientific papers, of which the principal ones appeared in French, English and German translations.

In 1915, soon after Italy's entry into the first World War, Volterra, despite his advanced age, joined the Italian army as a volunteer. He was attached to the aviation corps as a lieutenant. He then designed a new type of dirigible, and introduced another innovation by arming it with cannon, although aeronautical experts held that the dirigible could not withstand the shock of cannon fire. He proved the practicability of his scheme by personal experiment when no other volunteer could be found to undertake the task. For this he was decorated with the Croix de Guerre.

He was the oldest Italian senator in length of service, having been appointed in 1905. He was awarded the honorary degree of doctor by the Universities of Oxford, Cambridge, Edinburgh, Princeton, Oslo and Stockholm. Until the beginning of the second World War he was an active member of the Academies of Paris, Edinburgh, Madrid, Gothenburg and Leningrad. He was also one of the two Jewish members of the Pontifical Academy of Science. He made numerous lecture tours of the United States.

For eighteen years Volterra was president of the International Committee for Weights and Measures in Paris, and by virtue of his office he was the possessor of one of the two keys to a safe in Paris where the cubic metres of platinum by which all other measures are judged are kept.

Volterra was the son-in-law of Edoardo Almagia, internationally famous engineer of the 19th cent. who constructed the ports of Benghazi, Port Said, Alexandria and Tripoli, as well as many of Italy's first railroads.

DAVID KLEINLERER.

VON KARMAN, THEODORE, *see* KARMAN, THEODORE VON.

VON NEUMANN, JOHN, mathematician, b. Budapest, 1903. He received the Ph.D. degree from the University of Budapest in 1925, and two years later became a lecturer at the University of Berlin. In 1930 Von Neumann was called to Princeton University as a visiting professor of mathematical physics. He was made professor in 1931, and held this post until 1933, when he joined the faculty of the Institute for Advanced Study. Von Neumann was the editor of *Annals of Mathematics.* In 1943 he was living in Princeton, N. J.

VON TILZER, HARRY, popular song composer, b. Detroit, 1872. He ran away from home when he was fifteen years old, earning his living on the stage and by writing songs. He continued his composing after coming to New York city, where he settled permanently. His first great success was *My Old New Hampshire Home.* In 1898 he became a member of the publishing house of Shapiro, Bernstein and Von Tilzer, reorganizing that firm in 1901 to become the Harry Von Tilzer Company.

Von Tilzer was in his heyday as a composer in a period of the sentimental song, of which he created several thousand. Some of these were phenomenally successful, including *A Bird in a Gilded Cage, In the Sweet Bye and Bye,* and *Down Where the Wurtzberger Flows.*

Lit.: Goldberg, Isaac, *Tin Pan Alley.*

VORARLBERG, *see* TYROL.

VORONOFF, SERGE, surgeon and physiologist, b. Russia, 1866. He was educated in Paris, where he graduated from the University of Paris, becoming a Doctor of Medicine of the Faculté de Paris. He was appointed surgeon-in-chief of the Russian Hospital in Paris, and during the first World War served as Surgeon-in-Chief of Military Hospital No. 197. He later became director of the biological laboratory at the École des Hautes Études and director of experimental surgery of the Station Physiologique of the Collège de France at Nice.

Voronoff's fame rests upon his application of the Brown-Séquard theory, whose basis is that gland secretions are the same in animals as in man. In 1917 he commenced gland-grafting experiments, which, when applied to human beings in the 1920's, captured the popular imagination. In Algeria he succeeded in producing extra heavy coats of wool on 3,000 government-owned sheep by grafting an extra gland into young animals. His first experiments in testicular grafting consisted of implanting glands on young goats that had previously been deprived of their own. In 1918, for the first time, senile animals were used for experimentation, chiefly rams ten or twelve years old.

The first human gland-grafting operation on a male, forty-five years of age, was performed only after a series of 120 experiments on animals. Later experiments were done on subjects as old as seventy-four years in the attempt, by the use of glands of apes and chimpanzees, to stimulate the flow of sex hormones. At first no experimental work was carried on in females.

Although the usual conservatism of the medical profession doubted Voronoff's claims that human longevity could be prolonged by gland-grafting to 140 years, Voronoff received signal honors in France and many other countries, and was awarded membership in the French Legion of Honor. Italy utilized his discoveries in horse-breeding.

Voronoff became interested in the remedying of thyroid deficiency by the grafting of thyroid glands of apes. As the guest of medical institutions the world over, he gave numerous demonstrations of his theories, visiting the United States with his wife in May, 1939, preliminary to a lecture tour through South America and Mexico.

In December, 1939, he returned to France, where he became medical director of a special section of the French Army at Cannes on bone and skin grafting. His laboratory and farm of 120 monkeys at Menton, where he was carrying on research on cancer, were seized in the French-Italian fighting of the second World War, the laboratory destroyed and the experimental animals taken to the cold mountains. In the autumn of 1940 Voronoff and his wife fled to Portugal and thence to the United States.

His publications include: *Treatise on Surgery; Treatise on Gynecology; Treatise on Bone Grafting; Treatise on Articulation Graft; Treatise on Ovarian Grafting; Treatise on Thyroid Grafting; Grafting of Interstitial Glands; Skin Grafting; Life; The Conquest of Life; Love and Thought in Animals and Men; Testicular Grafting from Ape to Man* (co-author); contributions to *Sidelights from the Surgery; From Cretin to Genius* (1941). MAX THOREK.

VOSNITZYN, ALEXANDER (proselyte), *see* PROSELYTES.

VOW (*neder;* plural, *nedarim*), an obligation which one voluntarily assumes by means of an oath and which concerns the person of the one taking it. The general concepts and legal designations of vows are laid down in the Bible especially in *Num.* 6:1-21 and 30:2-17, and they are treated in exhaustive manner in the Mishnah and in the Talmud in the tractate *Nedarim* as well as in the writings of the Posekim (post-Talmudic rabbis). The idea which forms the basis of these legal regulations proceeds from the belief that side by side with the generally valid religious doctrines there may be achieved a voluntary and personal obligation on the part of the individual, an obligation which—in case it is expressed in definite forms—becomes a vow undertaken by him personally and thus assumes a religious legal character. In the case of the vow, as in that of the oath, God is, as it were, called as witness to the promise which has been made, and if this is not kept, punishment by God is threatened.

Various passages of Jewish literature clearly express the idea that this special religious obligation is by no means an ideal. The man who takes a vow is compared to one who has erected for himself an altar of his own on the high place (*Yeb.* 109b). From the Nazirite, who assumes a definite abstinence (from the drinking of wine) for a limited period of time and must bring a special atonement offering because he has voluntarily renounced what is permitted to man for his enjoyment, the Talmud deduces the extent of the prohibition of the uttering of a vow, through which one imposes on himself a far-reaching and even permanent prohibition. The Amora Samuel characterizes the one taking a vow as an absolute sinner (*Ned.* 22a). Thus the Talmud states (*Ned.* 9b) that the high priest Simeon the Just never ate of the atonement offering of a Nazirite as a matter of general principle, in order thereby to give expression to his aversion to all vows. Only for the purpose of strengthening the moral principles (*Aboth* 3:17) in a time of stress was it felt that a vow was appropriate in the sense of the promise of a good deed in a better future; in this connection reference is made to the example furnished by the patriarch Jacob, who in a time of stress vowed to give for holy purposes a tenth part (Maaser) of his earnings. An instructive example is furnished also by the vow taken by the childless Hannah (*I Sam.* 1:11). On the other hand, Jephthah's vow is deprecated and rejected by the sages of the Talmud (*Taan.* 4a).

A vow can have reference only to objects, and not to the actions of persons. For this reason the prohibition expressed by the one taking the vow is called *'issur heftza* (a prohibition with reference to a thing [desired]) in the Talmud.

However, vows are subject to a considerable limitation since their contents are not permitted to violate the Jewish law. Thus, for example, one who swears to stop putting on the phylacteries must fulfill his religious obligation despite this vow. However, he who vows to renounce putting on a certain set or kind of phylacteries must not use such phylacteries for the fulfillment of his religious obligation during the period that his vow is in operation.

The mode of formulation of the vow is treated at great length in the Talmudic discussions. In addition to the clear text: "I vow..." there were definite formulas of vows (*yadoth,* i.e. raisings of the hand) as well as designations or circumlocutions (*kinnui*) whereby legally binding vows could be made, as well as an agreement acknowledged with the word "Amen" in reply to a vow uttered to a person by another person. Even though, in general, the attempt is made in the Talmud to deter one from the expression of vows, nevertheless the unmistakable and unambiguous demand is made that a word which has once been uttered must be unconditionally kept, on the basis of the rule: "That which is gone out of thy lips thou shalt observe and do" (*Deut.* 23:24).

For this reason, in order to prevent mere statements of purpose from partaking of the nature of vows, one must add, through the use of the words *beli neder* ("without a vow"), the express statement that the intention does not possess the character of a vow (*Shulhan Aruch, Yoreh Deah* 203:4). The Talmud lays down the further rule that a vow is legally valid only when the one who makes it has regard to the formula found in *Lev.* 27:2 and *Num.* 6:2, *ki yafli neder* ("When a man shall clearly utter a vow"), and thus assumes all the consequences of his vow consciously. It is required that the intention must be in absolute agreement with the spoken word (*piv velibbo shavim*). A vow uttered under excitement, or for the asseveration of an opinion, or in erroneous evaluation or estimate of the true state of affairs may be declared invalid by a person of authority (*Ned.* 3). To this category there belong especially vows uttered in terror or in fear of attacks by robbers.

While the possibility of the dissolving of vows (*hattarath nedarim*) as a result of regret or repentance (*haratah*) is not expressly provided for in the Torah (*Hag.* 1:8), it is nevertheless traced back to a tradition from Sinai. The dissolution of a vow takes place in the following manner: the vow-taker, after he has repented of having made the vow, appears before a person expert in the matter of vows (*mumheh*) or before three private persons, and asks for the dissolving of his vow, pointing to his repentance. This dissolution of the vow is then accomplished through the thrice-repeated formula "May it be permitted to you" (*muttar lach*). In modern times the latter form, dissolution through the agency of three persons, is the only kind usually practised (*Yoreh Deah* 128:1). The institution of the Kol Nidre had its origin in the painstaking conscientiousness of Jews with regard to every vow made, even perhaps those taken unconsciously.

Jewish law makes a thoroughgoing distinction between a vow made by a man and that by a woman. Whereas a vow taken by a man receives the force of law (*Num.* 30:3) provided that it is expressed clearly and unmistakably, a vow uttered by a woman is subject to confirmation by her father or husband (*Num.* 30:4-9). On the day on which either the father or the husband of the woman hears of the vow taken by his daughter or by his wife, he has the right to cancel the vow forthwith through a declaration of dissolution (by disallowing the vow, according to the phrase employed in the Bible). Only when the father or husband keeps silent with reference to the vow is it regarded as valid and as having been confirmed.

VOWELS, HEBREW. The Hebrew language was originally written almost entirely by consonants, with the vowels left to the understanding of the reader. The earliest inscriptions show almost no vowels; but in the period of the Second Temple it became customary to supply aids to the understanding of the vocalization (*matres lectionis*) in the forms of the letters Vav (indicating long *o* and *u*), Yod (for diphthongs) and occasionally Aleph and He. This form of writing was known as the "full" (*plena*), while that without these aids was known as "incomplete" (*defectiva*). Both forms are found frequently in the Bible.

As Hebrew ceased to be a spoken language, but still was used for study and prayer, further aids to reading became eventually necessary, especially since, by reason of the characteristic inflexions of the Hebrew language, changes of meaning were indicated by changes in the vowels. Systems of vowel marks were devised, consisting of signs placed above and below the letters as a supplement to the *matres lectionis.* This work began about the 6th or 7th cent. C.E., and for some hundreds of years there were at least two schools of vocalization: the eastern, or Babylonian school, which had a system of signs written above the line and was rediscovered by modern scholars in 1846; the western, or Palestinian, called also Tiberian, from the place where most of the scholars lived (Tiberias), which had a system of signs written mainly below the line. The latter was in turn divided into two schools, that of Moses ben David ben Naphtali and that of Aaron ben Moses ben Asher, both about 900; the latter's system was eventually universally adopted and is found in all Bible manuscripts and printed editions. In 1895 Neubauer discovered a third system, Palestinian in origin and written above the line. The exact history of the development of these various systems and the final decision upon that of Ben Asher has been much discussed by scholars, and many points are still in question. It appears, however, that by about the 9th or 10th cent. the Tiberian system was in general use.

Hebrew is unique among Semitic languages in the richness and variety of its vowels. Whereas such languages as Arabic and Assyrian reveal only the three basic vowels *a, i* and *u,* Hebrew has a number of intermediate sounds, approximately a dozen in number, which give the spoken language a rich color. There is evidence that even in ancient times there were differences in the pronunciation of the various vowels, and this has persisted to the present day.

The recognized Hebrew vowels, together with their signs and their various pronunciations, are as follows:

A. Long Vowels. 1. Kametz Gadol. It is written as a small t (ת) below the letter. The Sephardic pronunciation is that of *a* in "far"; the Ashkenazic pronunciation is that of *o* in "gone," but among some Ashkenazic Jews it is like *o* in "note," while in Poland, Hungary and southeastern Europe it is often pronounced as *u.*

2. Hirek Gadol. It is written as a single dot under the letter, followed by the consonant Yod. It is pronounced by all Jews as *ee* in "need."

3. Shurek. It is written as the letter Vav with a dot in the middle. It is generally pronounced as *oo* in "boot," but in Lithuania the sound is shortened, and in Poland and southeastern Europe it is often pronounced as *i* in "lit," or as *ee* in "need."

4. Tzere. It is written as two dots side by side under the letter. In some forms, particularly at the end of a word, Yod is added. It is generally pronounced like *a* in "fate"; in Poland it sometimes takes the sound of *i* in "like."

5. Holem. This is written either as Vav with a dot over it, or as a single dot over the right corner of the next letter. In the case of the letter Shin, the same dot serves as the sign of the vowel and the indication that differentiates it from Sin. The standard Ashkenazic and Sephardic pronunciation is that of *o* in "note," but there are many dialect variations. Thus in many parts of Germany and Poland Holem is pronounced very close to *ow* in "town"; in other parts of Poland and in southeastern Europe it is like *oy* in "boy"; while in Lithuania and some parts of Russia it is practically identical with the *a* of "fate."

B. Short Vowels. 6. Pathah. This is written as a dash (-) under the letter. It generally pronounced like *a* in "far."

7. Hirek Katan. This is written as a single dot under the letter. It is generally pronounced as *i* in "lit."

8. Kibbutz (also **Kubbutz**). This is written as three dots slanting from left to right under the letter. Its pronunciation is often like that of Shurek, but more usually equivalent to *oo* in "wood," and in Poland and southeastern Europe is often rendered as the German *ü* or as *i* in "lit."

9. Seghol. This is written as three dots in the form of an inverted triangle, under the letter. It is generally pronounced like *e* in "get."

10. Kametz Katan. This is identical in writing with the Kametz Gadol (No. 1). It is pronounced as *o* in "gone."

C. Half Vowels and Diphthongs. 11. Sheva. It is written as two dots, one above the other, beneath the letter. At the beginning of words, under a letter with the Dagesh Forte, after a silent Sheva in the syllable immediately preceding, and after long vowels it is pronounced like the unaccented *e* in "father"; in other cases there is no pronunciation at all, and it is merely added because the rules of Hebrew writing require that every consonant, except at the end of a word, be provided with a vowel.

12. Hatef Pathah. It is written as a combination of Pathah and Sheva, the latter being to the right. The pronunciation is the same as Pathah.

13. Hatef Kametz. It is written as a combination of Kametz and Sheva, the latter being to the right. The pronunciation is the same as Kametz Katan.

14. Hatef Seghol. It is written as a combination of Seghol and Sheva, the latter being to the right. The pronunciation is the same as Seghol.

Since vowels 11 to 14 regularly represent a shortening of the syllable due to slurring, they never take the accent.

15. A diphthong is formed by combining Pathah and Yod. It is pronounced as *i* in "like."

16. Another diphthong is formed by combining Kametz and Yod. It is pronounced as *oy* in "boy."

17. A similar diphthong is formed by combining Holem and Yod. It is pronounced with the *o* sound a little bit longer than is the *oy* in "boy."

George Wolf

18. A fourth diphthong, formed by combining Shurek (*oo*) and the Yod (*y*), occurs only in certain participial forms.

It may be further noted that with many Jews the pronunciation of unaccented vowels in a word is so slurred over that it is hardly more than that of unaccented *e* in "father."

In this encyclopedia English vowels are used to transliterate Hebrew vowels as follows:

a: Kametz Gadol, Pathah, Hatef Pathah.
e: Tzere, Seghol, Hatef Seghol, Sheva.
i: Hirek Gadol, Hirek Katan.
o: Holem, Kametz Katan, Hatef Kametz.
u: Shurek, Kibbutz. SIMON COHEN.

Lit.: See under ALPHABET; HEBREW LANGUAGE.

VRBOVÉ (in Hungarian, **Verbó;** in German, **Werbau**), a town in Czechoslovakia. Until 1918 it belonged to Hungary. A document of the year 1522 mentions a Jew by the name of Jacobus de Werbau. The first document referring to Jewish communal life at Vrbové, however, dates from the year 1731. The nucleus of the community was formed by refugees from the massacre of 1683 at Ungarisch-Brod, across the frontier in Moravia. They were probably joined by émigrés of the year 1670 from Vienna and by Jews from various Moravian communities. For some time the Jews of Vrbové continued to bury their dead at Ungarisch-Brod. Memorial prayers for the victims of the 1683 massacre were still being recited at the synagogue of Vrbové in the 20th cent.

In 1770 Vrbové had seventy Jewish families. The community rose to distinction through scholarly rabbis who conducted a famous Yeshiva which ranked next to that of Pressburg. These rabbis and teachers include Moses Zuckermandl (about 1774-90); Jacob Altenkunstadt, called Koppel Charif (1793-1836), author of *Hiddushe Yabetz;* Benjamin Zeeb Löw (1836-51), author of *Shaare Torah;* Jeremiah Löw; Koppel Reich, grandson of Koppel Charif (1872-90), subsequently chief rabbi of Budapest.

In the 20th cent. the community, under the spiritual leadership of Samuel Reich, son of Koppel Reich, excelled in charitable and educational work. Under Slovak rule (from 1939 on), the community was subjected to persecution and destruction.

VRIES, LOUIS DE, Dutch actor, b. 1871; d. 1940. He was born of deaf and dumb parents, and in his early youth was employed in Amsterdam diamond-cutting establishments, but received a royal grant which enabled him to attend the school of drama, where Louis Bouwmeester and other famous actors were his teachers. He made his debut at the age of thirty as the Duke of Alba in a version of Sardou's *Patrie.* He won fame as a performer of stock parts, and in 1914 formed his own company of actors, with which he toured the Netherlands East Indies, South Africa, Denmark, Paris and the Netherlands West Indies.

He appeared in nearly all the plays of Hermann Heijermans, and was especially noted for his role of Blind Sachel in *Ghetto.* His other noteworthy parts were in *Marguerite Gauthier* (Armand Duval), Clerc's *L'autoritaire,* Jan Walch's *Judas Iscarioth* (of which he gave the first open air performance), Pirandello's *Henry IV,* and Shakespeare's *Merchant of Venice* (Shylock).

De Vries received numerous decorations from his own and foreign governments, being created a knight of the Daneborg Order, a knight of the Order of Orange-Nassau, an officer of the Italian Crown Order, a "chevalier de l'instruction publique," and a chevalier of the French Legion of Honor, and receiving the officer's cross of the Belgian Order of Leopold. He was an honorary member of the Society of Dutch Playwrights.

Louis de Vries

VRIES, SIMON DANIEL DE, public official and judge, b. Paramaribo, Netherlands West Indies, 1881. He studied at Leyden University, Holland, and obtained the degree of Doctor of Law in 1905. In May, 1907, he entered the Surinam judicial service, was ambulant judge from 1905 to 1907, and from 1909 to 1912 attorney-general of the court of justice. He then was appointed judge of the Peace Court of Paramaribo, and in 1920 became a member of the High Court of Justice. From 1925 to 1929 he acted as president of that college, and was then pensioned.

De Vries was also a member of the Koloniale Staten (or colonial government), over which he presided from 1922 to 1926. He contributed many legal papers to a variety of journals; foremost among these is his article "Criminal Law and the Penal System of Surinam" (published in the *Encyclopaedie van Nederlandsch West-Indië,* p. 648). De Vries lived at The Hague at the time of the Nazi German invasion; in 1943 nothing was known of his whereabouts.

VRIESLAND, SIEGFRIED ADOLF VAN, executive and Zionist leader, b. Haarlem, Holland, 1886; d. Tel-Aviv, Palestine, 1939. From 1910 to 1919 he practised law at Rotterdam, and was secretary of the Zionist League of Holland. In 1919 he emigrated to Palestine, where he entered the Zionist Commission as director of its financial department; from 1923 to 1925 he served as treasurer of the Palestine Executive. In 1927 Vriesland was made consul for The Netherlands at Jerusalem. In 1929 he was appointed general manager of Palestine Potash, Ltd., which had obtained a concession for extracting minerals from the waters of the Dead Sea. In 1938 he became manager of the Marine Trust, Ltd., owners of the Port of Tel-Aviv. After his death the American Zion Commonwealth arranged to plant a park near the colony of Herzlia in his memory.

VULGATE, the first Latin translation of the Bible from the Hebrew text, made by the church father Jerome (about 340-420). Prior to that time the Latin-speaking part of the church had possessed a version made from the Greek Septuagint. Jerome became interested in producing a better Latin version. He first revised the New Testament and the *Psalms, Job* and a few other books. About 389 he traveled to the Near East and decided to study the Hebrew original. He studied with a Jewish teacher, Bar Aninas (Hanina), whom he visited at night. The next fifteen years were devoted to his rendition of the entire Hebrew Bible and to that of *Judith* and *Tobit* in the Apocrypha. He supplied each of the books with a preface, especially *Samuel* and *Kings,* with which he began his work.

Most of this translation was accepted by the church as the official version, as it was much nearer the Hebrew than that which had been made from the Septuagint. However, Jerome's translation of *Psalms* from the Hebrew never won as much favor as his revision of the old Latin translation (the "Gallican Psalter"), and so the latter became official. The old translation of most of the books of the Apocrypha was also retained. This combined Bible became known as the Vulgate, "the rendition in popular speech."

When the Vulgate was first promulgated, there was considerable opposition to the work as tending to supersede the Septuagint, and it was not for some centuries that it won acceptance. The text was in some cases changed to conform with the old Latin version; hence there are numerous variant readings in the manuscripts. Corruptions arose in many of the copies. In 1546 the Council of Trent pronounced in favor of establishing an authentic and uniform version of the Vulgate, and this was finally carried out in the Clementine Vulgate of 1592 which, since that time, has remained the standard edition of the Christian church. Many of the earliest translations of the Bible into European languages were secondary renditions made from the Vulgate.

Lit.: White, H. J., in Hastings, James, edit., *Dictionary of the Bible,* vol. 4 (1919) 873-90; Swete, H. B., *Introduction to the Old Testament in Greek* (1914) 98-104.

W

WACHSTEIN, BERNHARD, historian and bibliographer, b. Tluste, Galicia, 1868; d. Vienna, 1935. As director of the library of the Jewish community of Vienna from 1903 on, he published many important research works on the history of the Jews in Austria and valuable bibliographical works. His chief work was *Inschriften des alten Judenfriedhofes in Wien* (vol. 1, 1912; vol. 2, 1917).

In addition, he wrote: *Wiener hebräische Epitaphien* (1907); *Jüdische Privatbriefe aus dem Jahre 1619* (together with Alfred Landau; 1911); *Katalog der Salo Cohnschen Schenkung* (vol. 1, 1911; vol. 2, 1913); *Hebräische Grabsteine aus dem 13. bis 15. Jahrhundert in Wien und Umgebung* (1916); "Die Grabinschriften des alten Judenfriedhofes in Eisenstadt" (in *Eisenstädter Forschungen,* vol. 1, published by Sandor Wolf, 1922); "Urkunden und Akten zur Geschichte der Juden in Eisenstadt" (*ibid.,* vol. 2); *Zur Bibliographie der Gedächtnis- und Trauervorträge in der hebräischen Literatur* (1922); *Beiträge zur Geschichte der Juden in Mähren* (edit. H. Gold, 1929); bibliographies of the works of Moritz Güdemann (Vienna, 1931) and Heinrich Heine (1931).

In 1933, on the occasion of Wachstein's thirtieth anniversary as director of the library of the Jewish community of Vienna, Saul Chajes published a bibliography of all his works.

Lit.: Balaban, M., "Bernhard Wachstein, 1868-1935," *Yivo-Bleter,* vol. 13 (1938) 193-227; Chajes, Saul, *Bibliographie der Schriften Wachsteins* (1933).

WACHTEL, WILLIAM, painter, b. Lemberg, Galicia, 1875. He attended the Gymnasium at Lemberg, thereafter the Art Academies of Cracow, Munich and Paris. In 1913 he settled in Vienna, which he left early in 1938, shortly before the country's annexation by the Nazis, living for two years at Havana, Cuba. In 1940 he arrived in the United States, where he was still living in 1943. Wachtel was noted as a portrait painter; outstanding among his numerous Jewish subjects were *Homeless* (1916) and *Christ in Pogrom Street* (1920). During his stay in Palestine he painted numerous landscapes and typical Palestinian motifs.

Among Wachtel's works acquired by museums were *Self-Portrait, Kol Nidre,* and *Nocturne* (National Gallery, Lemberg), *Jaffa Landscape* (National Museum, Lemberg), *Jewish Soldier* (Jewish Museum, Vienna), *Judith, Mourning House,* and *Self-Portrait* (Bezalel Museum, Jerusalem).

ROMAN WACHTEL (b. Lemberg, Galicia, 1905), the son of William Wachtel, was a noted stage architect. He attended the Vienna Academy of Arts and Crafts, and was a pupil of Oskar Strnad, collaborating with him in the execution of a large number of stage sets for Max Reinhardt. Roman Wachtel, who from 1914 to 1938 lived in Vienna, emigrated to Belgium in 1939. After 1941 he was not heard of.

WACO, a city of Texas, with a population of 55,982 (census of 1940), including, in 1943, approximately 1,200 Jewish inhabitants. Soon after the close of the War between the States a number of Jews settled in Waco. The Hebrew Benevolent Association was organized in 1869 (chartered in 1878), and under its auspices the Jews of Waco held regular divine services. In the fall of 1874, by which time their number had grown considerably, the Jewish settlers organized a lodge of the B'nai B'rith, Eureka Lodge No. 198. The movement for the establishment of a congregation was started in the hall of the B'nai B'rith, and in 1879 the members of the lodge subscribed a sum of money for a synagogue for the new Congregation Rodef Sholom. Christian friends helped in the cause, and Solomon Lyons was instrumental in enlisting some financial support from friends in Eastern cities.

The building committee consisted of S. Marx, Sam Sanger, B. Haber, J. A. Solomon, Harry Lewine and Dan Wise. In September, 1881, the Temple on Washington Street was completed, and Rabbi Jacob Voorsanger of Houston conducted the dedication service.

The first minister of the congregation was a Reverend May. Others who followed included Rabbis Levy, Rosenberg, E. M. Meyers, Weiss, Martin Zielonka, B. Wohlberg, J. Friedlander and Isidor Warsaw. In 1919 Rabbi Wolfe Macht, the incumbent in 1943, was called to the pulpit of Rodef Sholom. The congregation, Reform, joined the Union of American Hebrew Congregations in 1907.

The Orthodox Congregation Agudath Jacob was organized in 1888, and was first served by S. Levy, who

was Shohet, Mohel and Hazan, and who, after fifty years, was still serving in 1943. Rabbi I. Siegel was spiritual head and teacher from 1923 to 1926. In 1926 Rabbi Charles Blumenthal was called to the pulpit of Agudath Jacob, and was the incumbent in 1943. The old synagogue, built in 1893, was replaced in 1904 by a new structure, which was remodeled in 1914.

Later, in 1923, the Hebrew Institute was erected, and still later a fully equipped playground was laid out adjoining the Institute (1941). Constituent societies of the congregation included a sisterhood and ladies' aid, a Gemiluth Chasodim society, a Hebrah Kaddisha, and a daily Hebrew school.

In addition to its congregations and auxiliaries, and to the lodge of the B'nai B'rith mentioned above, Waco Jewry instituted a district of the Zionist Organization of America and a chapter of Senior and Junior Hadassah. In 1928 the Jewish Federated Charities, affiliated with the city's Community Chest, was organized. It administered the United Jewish Appeal, instituted in 1933 and operating for nineteen adjacent communities, as well as Waco.

Among Waco's leading citizens in 1943 was Aaron M. Goldstein, of the department store of Goldstein-Migel Company. Active in the Jewish community and in numerous state and city organizations, Goldstein was city commissioner (1930), and was made mayor pro tem (1932). Later he was president of the Waco Chamber of Commerce (1935-38) and of the Texas Retail Dry Goods Association (1928-32), as well as of the Baylor-Waco Civic Music Association (1935-38). He was made a member of the Research Section of the State Wide Cotton Committee of Texas and chairman of the Laboratory Section. Also active in communal affairs was Lester L. Levy, chairman of the local Red Cross and of the Tuberculosis Association, and mayor pro tem of the city.

WAGENSEIL, JOHANN CHRISTOPH, Christian Hebraist, b. Nuremberg, Germany, 1633; d. Altdorf, Germany, 1705. He was professor of oriental languages, and published a collection of writings of Jewish authors which was to reveal the hostility of the Jews toward Christianity. These works are *Tela ignea satanae, sive arcani et horribiles Judaei adversus Christum, Deum et Christianam religionem libri* (Altdorf, 1681) and *Denunciatio Christiana de blasphemiis Judaeorum in Jesum Christum* (Altdorf, 1703). On the other hand, Wagenseil was opposed to forced baptism of Jews, and defended the Jews against the accusation of ritual murder. He wrote many books pertaining to the religious customs and ceremonies of the Jews, and translated the Mishnah of the Talmudic tractate *Sotah* into Latin, with copious notes.

Lit.: Wolf, *Bibliotheca Hebraea,* vol. 2, p. 1046; Graetz, H., *History of the Jews,* vol. 5 (1927) 185-87; Fürst, J., *Bibliotheca Judaica,* col. 489; Steinschneider, M., *Catalogue of the Hebrew Books in the Bodleian Library,* cols. 2711-13; Weinryb, Dob (Ber), "From a Correspondence between Jews and Christians" (Hebrew), *Moznaim,* vol. 7, No. 5 (Sept., 1938) 595-98.

WAGG, ABRAHAM, colonial resident of New York and loyalist during the American Revolution, b. London, 1719; d. Bristol, England, 1803. He was the eldest son of Meir Wagg and Zipporah Hart, sister of Moses Hart, prominent financier and a founder of the Great Synagogue in London. Abraham Wagg came to New York before the Revolutionary War and engaged in business as a wholesale grocer. On July 4, 1770, he married Rachel, daughter of Mordecai Gomez, a New York merchant.

At the outbreak of the Revolution Wagg espoused the British cause; he subsequently enrolled in the civic militia and took the oath of allegiance to the crown on January 23, 1777. During this period he served as a member of the New York fire patrol, a civic organization for preventing the spread of incendiarism. His business interests suffered heavily on account of the war, his loyalist sentiments resulted in alienating him from many of his business associates whose sympathies were with the patriots. Accordingly, he applied for permission from the British authorities to return to England, and with his family left New York in 1779 and located at Bristol, England, where he passed the remaining years of his life.

Wagg, although a mere tradesman, was the author of a lengthy document, addressed to the British peace commission, wherein he suggested that the mother country recognize the independence of the American colonies and that peace be negotiated with the Colonial Congress. This document, *The Sentiments of a Friend to Great Britain and America,* was presented anonymously to the British Peace Commission on August 22, 1778.

In the early part of 1782, when Wagg was a resident of Bristol, he wrote a second document, *Private Suggestions on a Plan to Dissolve the Connection of America with France.* This he despatched under his own name to the British prime minister. Although the political proposals of Abraham Wagg led to no direct results, they revealed the author as a loyalist who visioned a common bond of fellowship between the two English-speaking countries which neither wars nor "blunders of statecraft" could break.

The last years of his life were spent in penury. He and his family were forced to live on the bounty of Mrs. Judith Levy, who was his cousin and the daughter of Moses Hart. His youngest son, Matthias Wagg, became associated with the Rothschilds. Another son, Mordecai, the oldest of those who survived, returned to America, where he was born, and settled in Charleston, S. C.

WAGHALTER, family of musicians.

LAIBISCH WAGHALTER (b. Warsaw, Poland, 1790; d. Warsaw, 1868), violinist, was descended from a Sephardic family which had immigrated to Poland from Spain. A famous Klezmer (musician), he played the violin with unexcelled virtuosity and depth of feeling at Chasenes (weddings), Tenoim (betrothals) and Zemiros (occasions on which Sabbath songs were sung) since, as an Orthodox Jew, he did not wish to embark upon the worldly career of a concert artist. When Niccolo Paganini, on his triumphal tour through Russia, visited Warsaw and learned of the brilliant Jewish musician, he attended a Jewish wedding to hear him play and praised both his extraordinary skill and his technically difficult compositions.

One of Laibisch Waghalter's grandsons, Yitzchok Waghalter, was concertmaster at the Imperial Opera in Moscow and belonged to the circle of Peter Ilyich Tschaikowsky, the pianist Nicholas Rubinstein, the violinist Ferdinand Laub, and the violoncellist Bernhard Cossmann.

Among the great-grandsons of Laibisch Waghalter were three noted musicians:

HENRYK WAGHALTER (b. Warsaw, 1869), violoncellist and music teacher, was the first member of the family to receive a regular musical education. Originally destined to become a physician, he later studied at the Warsaw Conservatory of Music. He was a member of the orchestra of the Warsaw Opera House and for thirty years teacher of music at the city's Institute for the Blind and Deaf. A noted soloist, he wrote

practice works for the violoncello. He was last heard of in 1940, when he was still living in Poland.

IGNATZ WAGHALTER (b. Warsaw, 1881), conductor and composer, was a brother of Henryk Waghalter. Although one of the youngest of the family's twenty children, he was, from infancy, compelled to contribute to the family's support. While attending the Real-gymnasium, he was a member of several orchestras, and at the age of thirteen wrote dances and marches. In 1897, at the age of sixteen, he clandestinely crossed the Russian border into Prussia, and went to Berlin to study theory of music. After experiencing great hardship, he studied piano under Xawer Scharwenka at the Klindworth-Scharwenka Conservatory and composition under Friedrich Gernsheim at the Academy of Music. He was awarded the academy's Mendelssohn Prize for his Sonata for Violin and Piano in F Minor (Opus 5) in 1902.

Waghalter started his career as conductor at the newly founded Komische Oper in Berlin (1907), and in 1910 became first conductor at the Stadttheater of Essen, Rhineland. In 1912 he was called to Berlin and appointed general musical director of the Deutsches Opernhaus of Berlin-Charlottenburg, the largest opera house in all Germany. As a guest conductor he toured most European capitals, and in 1924 conducted the State Symphony Orchestra in New York city. In 1933 he was called to Riga as general musical director of the Nationala Opera, where he collaborated with Max Reinhardt. Ousted from his position in Berlin by the Nazis, he went to Prague, then to Vienna, and in 1937 emigrated to the United States, where he was still living in 1943.

As a spirited and vigorous conductor Waghalter was compared by critics to Arthur Nikisch. While at the Deutsches Opernhaus of Berlin-Charlottenburg he presented several operas by D'Albert and Puccini for the first time on the stage.

He wrote numerous vocal and orchestral compositions, including a string quartet in D major (Opus 3), and a violin concerto in A major (Opus 15), but he was known chiefly as a composer of operas. Among the latter the following were produced: *Der Teufelsweg* (Berlin, 1911); *Mandragola* (Berlin, 1914); *Jugend* (Berlin, 1917); *Sataniel* (Berlin, 1923); *Der späte Gast* (Dresden, 1926); *Der Weiberkrieg* (Hamburg, 1930); *Ahasveros und Esther* (Vienna, 1937). The most successful was *Mandragola,* the libretto of which was written after a comedy by Machiavelli, and which was performed also in New York city (1925). All his works are characterized by an abundance of melos. Waghalter showed great interest in Jewish music; he wrote songs to Yiddish texts, and made piano arrangements of Eastern European Jewish songs.

In his autobiography, *Aus dem Ghetto in die Freiheit* (Marienbad, 1936), he described his rise from boyhood in the Jewish quarter of Warsaw to a leading position in German musical life, in defiance of hardship and anti-Semitic opposition. The book also gives interesting pen-portraits of many contemporary musicians, such as Joseph Joachim, Arthur Nikisch, Richard Strauss, Feruccio Busoni, Ignace Paderewski and Eugen D'Albert.

WLADYSLAW WAGHALTER (b. Warsaw, 1885; d. Germany, 1940), violinist, was a brother of Henryk and Ignatz Waghalter and a pupil of Joseph Joachim. He was concertmaster at the Hofoper at Stuttgart, Germany (1907-12), and at the Deutsches Opernhaus of Berlin-Charlottenburg (1912-33). He died in a Nazi concentration camp. ALFRED WERNER.

Lit.: Spemanns Goldenes Buch der Musik (1916); Riemann, Hugo, *Musik-Lexikon.*

WAGNER, CHARLES ABRAHAM, journalist and poet, b. New York city, 1901. He studied at the Long Island Medical College (1918-19) and at Columbia University (A.B., 1924). He embarked upon his career by writing for the Literary Supplement of the New York *Morning World* (1925-26), then became dramatic critic of the New York *Morning Telegraph* (1926-29), book review editor of the Brooklyn *Times* (1930-32), and in 1932 he was made literary editor of the New York *Daily Mirror* and *Sunday Mirror.*

Wagner won the first prize of the *Poetry* magazine prize contest for his poem, *The Unknown Soldier* (Chicago, 1929), and was the winner of the Edwin Markham Poetry Award (1932) and of the *Stratford Magazine* first prize for poetry (1933). Wagner's volumes of poetry include *Poems of the Soil and Sea* (1923); *Nearer the Bone* (1929); and *Rhymes out of School* (1941). He edited *Prize Poems 1913-1929* (1930) and *Freemen of the Press* (biography; 1940).

WAGNER, RICHARD, world famous composer, b. Leipzig, Germany, 1813; d. Venice, Italy, 1883. The question of Wagner's antecedents has created great controversy over a period of many years. There are those musicologists who have seriously questioned that Wagner was the son of Karl Friedrich Wagner and Johanna Wagner (as propounded by all biographies and dictionaries), but insist that he was an illegitimate offspring of Johanna Wagner and the Jewish actor Ludwig Geyer.

To support such a belief, these musicologists marshalled some interesting testimony: (1) Wagner resembled Geyer in some of his physical features; (2) Wagner himself suspected that Geyer was his father, Geyer's photograph hanging in his home, but none of Karl Friedrich Wagner; (3) many of Wagner's personal traits were more Oriental, or Semitic, than Germanic; (4) when Karl Friedrich died, soon after Richard's birth, Johanna married Ludwig Geyer, who henceforth regarded Richard as his own son; (5) Richard, though a psychopathic anti-Semite, always regarded Geyer with tenderness and affection.

Despite such testimony there were numerous musicologists who failed to be convinced, insisting that such evidence is, after all, circumstantial, lacking the basis of scientific accuracy.

A powerful argument in favor of Wagner's Jewish origin was provided in 1941 by that great Wagnerian scholar, Ernest Newman. Having devoted himself anew to exhaustive research into Wagner's background, Newman—who had always considered Wagner's parentage a "matter of dubiety"—boldly asserted that Wagner was a Jew (see vol. 3, *The Life of Richard Wagner,* 1941). He based his new conclusion on two documents which had recently come to his attention. One of these proved that Johanna Wagner and the infant Richard traveled from Leipzig to Teplitz to visit Ludwig Geyer, while Karl Friedrich Wagner was still alive. The trip from Leipzig to Teplitz was particularly arduous since it required passing through Napoleon's armies. Such a long and treacherous journey required stronger motivation than merely the desire to see a friend. Newman explained this voyage as follows:

"Is it not difficult to resist the conclusion that, in some degree or other, her journey was, in fact, a flight from a home that had all at once become impossible for her, and that in taking only her recent baby with her she was taking from Karl Friedrich something for which he may have believed he had no call to feel any paternal enthusiasm? Taking all the facts into consideration, and looking at them from every possible angle, do they not seem to suggest that the putative father of the child had hinted that she had better take herself and it to its real father?"

The second document consists of a letter written by Richard Wagner to his "sister" Cecile, who was the daughter of Ludwig Geyer and Johanna Wagner after their marriage. In this letter, Wagner speaks of "our father Geyer" with tenderness and affection, praising

"his fine sacrifice for the whole family," a sacrifice which Wagner interprets as an atonement "for a guilt." It is apparent that the "guilt" here referred to by Wagner was the indiscretion resulting in Richard's birth.

These two documents inspired Newman to assert that "the gallant opponents of the theory of Geyer's paternity have been defending a lost cause."

This will hardly silence the controversy permanently; nor will it establish once and for all Wagner's parental identity. But that a musicologist of Newman's stature and reputation should, after more than three decades of study and research, be convinced of Wagner's Jewish birth is a powerful argument that can not easily be dismissed. DAVID EWEN.

Lit.: *Forschungen zur Judenfrage,* vol. 3 (1938) 105-20 (a Nazi publication); Vollmer, Clement, in *South Atlantic Quarterly,* vol. 36 (1937) 201-17; Roth, Cecil, *The Jewish Contribution to Civilisation* (1938) 141-42, 145-47, 154; Schuman, William H., "Richard Wagner alias 'K. Freigedank,' " *American Hebrew,* March 2, 1934, p. 304.

WAGNER, SIEGFRIED, sculptor, b. Hamburg, Germany, 1874. He was of Danish parentage, and was taken to Copenhagen, Denmark, at the age of four. He was adopted by Julius Heine (d. 1910), whose wife's maiden name was Wagner. From 1889 to 1896 he studied at the Academy of Fine Arts in Copenhagen, and in 1897 he became a pupil of I. F. Willumsen. He designed in porcelain and metal models for goblets, lamps, candelabra and mirror frames, and also many other works in metals, porcelain, wood and stone.

As the result of a trip to the Orient, Wagner acquired such a high opinion of himself that thereafter his work took on strong Jewish motives. His vivid imagination and his keen sense of humor enabled him to produce many strange works of art. Among his plastic works were *The Bag-Piper in front of the Copenhagen City Hall; The Waters of Life; The Pillar of Sodom;* and *The Stone-Mason.* He designed various tombstones, projection figures for monumental buildings, real life portrait busts, and silhouettes. He was active for many years in the field of applied arts, was a member of Den Frie Udstilling, and served as collaborator of the porcelain factory of Bing and Gröndahl, designing furniture, silverware, book-bindings and fabrics.

Wagner's wife, Olga (née Packness; b. Copenhagen, 1873), at first studied painting at the Academy in Copenhagen, and later took up sculpture. She was an ingenious artist who collaborated with her husband on many works of art. In 1941 Wagner and his wife were still living in Denmark.

WAHL, SAUL, legendary king of Poland (known also as Saul Judycz), b. Padua, Italy, 1545; d. Brest Litovsk, Poland (formerly Lithuania), 1617. On his mother's side he was a member of the family of the eminent Talmudist Judah Münz, and his father was Samuel Judah Katzenellenbogen. Saul Wahl is said to have been king of Poland for one day in 1586, after the death of Stephen Batory. Although he resigned after this short space of time, he is said to have given special privileges to the Jews while on the throne. In 1589 he received the title of royal servant and the right to wear a golden chain and to have a coat of arms bearing a self-crowning lion and an eagle. He was an important farmer of the customs and of the salt revenues.

The legend which is identified with the name of Saul Wahl has many variations. One story concerns a person named Abraham Prochownik (the name in Polish means "manufacturer of gunpowder"), who is also supposed to have been king of Poland for a night. The legend is linked also with Prince Radziwill, who in 1587, when the various parties in Poland were unable to agree on the election of any candidate as king of Poland, offered the kingship temporarily to Saul Wahl, knowing him to be the best and the wisest man in Poland, whereupon he became king for one night.

It is, however, not so much because of this legend as through his activities in the Jewish community of Brest Litovsk, of which he was president, that Saul Wahl became an outstanding figure in Polish Jewish history. In 1592 he voiced his own complaint and that of the Jewish community against the municipal court, because in giving its decisions on Jewish matters it acted in accordance with the Magdeburg civil law instead of following Polish civil law, which fact placed the Jews at a considerable disadvantage. Sigismund III thereupon decided that the town council and the board of aldermen should follow only the Polish civil law in giving judgment on Jewish matters. As a result, the Lithuanian Jews were freed from the heavy burden of the Magdeburg civil law, and the important decree was incorporated into their general privileges.

One year later Saul Wahl brought a complaint against the Staroste (Jewish lay district head) of Brest Litovsk on the ground that the latter, in violation of the Jewish community's autonomy, had assumed the right of jurisdiction over disputes between Jews, a right which was reserved solely for the Jewish community itself. The reason for this was that the Staroste hoped to add to his revenues by means of an arbitrary increase in the number of lawsuits involving Jews.

The decree of June 14, 1593, in response to this complaint, accordingly ordered that disputes between Jews be settled by the rabbinical court (Beth Din), and that an amount not in excess of fifty gulden be paid annually to the Staroste. This ordinance provided a more equitable basis for the autonomy of Jewish jurisdiction in Lithuania. This important activity in which Saul Wahl was engaged, in connection with various traditions, forms the nucleus of the legend of Saul Wahl as the king who served on the throne of Poland for a single day. Wahl gained a reputation among the Jews also because he built a Klaus in Brest Litovsk and founded several charitable institutions.

The name Wahl, according to certain scholars, is derived from the German word *Wahl* ("choice," "election"), and according to others from the Slavic word *Vlach* (meaning "of Southern European origin," German *Welsch*) or the Polish word *Wol* ("ox"). Many Jewish families traced their ancestry back to Saul Wahl, among them Gabriel Riesser. JOSEF MEISL.

WAHRMANN, a leading Jewish family of Pest (Budapest).

ISRAEL WAHRMANN, rabbi (b. Óbuda, Hungary, 1755; d. Pest, 1826), was a pupil of Meir Barby at Pressburg and of Zarah Eidlitz at Prague. After serving as assistant rabbi at Posen and as rabbi at Németkeresztur, he was appointed rabbi of the Jews of Pest in 1796. His congregation at that time consisted of a few hundred tolerated Jews who for several ensuing decades had to

struggle against the constant threat of expulsion. It was under these difficult circumstances that Wahrmann established (1814) a public school for Jewish children, which he patterned after the Jewish school at Amsterdam. A decade later he scored another triumph; due to his efforts, Jewish boys studying at the Gymnasium at Pest no longer had to attend classes in Christian religion, but received instruction in their own faith.

JUDAH WAHRMANN, rabbi (b. 1793; d. Pest, 1868), a son of Israel Wahrmann, studied at the Gymnasium of the Piarist fathers at Pest and at the University and Yeshiva of Prague. He was author of *System der Tropen,* a work on the rhetorical and hermeneutical investigation of the Bible and Talmud. In addition to many articles on exegesis and the philosophy of Judaism contributed to the *Bikkure Haittim* and other periodicals, Wahrmann wrote textbooks on Judaism.

MÓR WAHRMANN, economist and statesman (b. Pest, 1832; d. Budapest, 1892), was a prosperous merchant, like his father, who was a son of Israel Wahrmann. Wahrmann studied philosophy at the University of Budapest, and entered his father's business. As a result of the quelled revolution of 1848 to 1849, Austria then exercised absolute rule over Hungary. Wahrmann made a name for himself by advocating in the press and on the speaker's platform that Hungary emancipate herself from Austrian domination by establishing economic relations with other countries. He was vice-president of the National Jewish Congress from 1868 to 1869. In the latter year he was elected as the first Jewish deputy to the Hungarian parliament, where he rendered important service as president of the committee on finances.

He was a member of the Austro-Hungarian delegation deliberating on matters of common government. Wahrmann founded several industries, then a novel enterprise in an agrarian country. Following the death of Ignác Hirschler in 1881, he was elected president of the Jewish community of Pest. A street was named after him at Budapest.

WAILING WALL (in Hebrew, *kothel ma'arabi,* "western wall"), part of a wall surrounding the Temple Mount and now the last remnant of the Jewish sanctuary. It is about 160 feet long, and about sixty feet high. The space before the wall is about ninety feet by twelve (houses are built against part of the wall), and the area is paved with stone flags.

The Wailing Wall consists of twenty-four rows of stone above ground and nineteen rows under ground (discovery of the Palestine Exploration Fund, 1867). The wall rests on the rocky bottom of the Tyropean Valley which separated the Temple from the Upper City. The rows under ground, and the first five rows above ground, are of rough-hewn stone.

These rows and the next four rows, which are of smooth stone, rise about forty feet above the ground; they are undoubtedly from the period of the Second Temple. The stones are, for the most part, about five feet long and more than a foot high. Two stones at the southwest corner are about thirteen to seventeen feet long. (The size of the stones in the lower rows astonished travelers in the Middle Ages, including Isaac Chelo, Obadiah Bertinoro and Meshullam of Voltera, and they believed that the wall was part of Solomon's Temple.) The next four rows are most likely from the Hadrianic period. These stones are only about a foot and a half in length. The upper eleven rows are from the Arabic period.

The Amora Aha (probably in the first half of the 4th cent.) said, no doubt in reference to this wall, that the Divine Presence would never leave the western wall of the Temple (*Midrash Ex.* 2:29; *Yalkut I Kings* 195). The tradition that the western wall would never be destroyed is also found elsewhere in the Midrash (*Midrash Num.* 11:3; *Midrash Song of Songs* 2:9; *Yalkut Song of Songs* 986). Under the Arabs, until the capture of Jerusalem by the Crusaders (1099), the Jews had a synagogue, either in the Temple area or near a gate in the wall. Benjamin of Tudela (12th cent.) mentions the Wailing Wall as a place for prayer and that it was called the Gate of Mercy.

According to Isaac Chelo (14th cent.), the wall was discovered by Caliph Omar (Moses Hagiz says that it was found by Sultan Selim about 1560); and the former testifies that the Jews used to pray before the wall. From the 16th cent. on the Wailing Wall is often mentioned by travelers, both Karaite and Rabbinite, as a place for prayers, and special prayers were composed to be said there. Prayers are now recited daily at the Wailing Wall. Worshippers are especially numerous on the Ninth of Ab and on the day before Passover and Yom Kippur. In 1942 about 50,000 Palestinian Jews visited the wall on the Ninth of Ab, and about 15,000, including many soldiers, attended Passover services which were held there.

At different times wealthy Jews tried to buy the place, but nothing came of these attempts. However, under Turkish rule the area was recognized as a place of prayer, mourning and meditation for Jews on the basis of ancient custom. They were permitted to pave the area with slabs of stone. Large stones were formerly used as benches (these are now gone); the Jews would, at times, put up a tent over the entire area and place in it a table, benches, chairs, and an Ark of the Torah.

Under the Palestine Mandate the Wailing Wall came within the protection of the British administration of Palestine. During this administration there were several disputes between Jews and Arabs about the use of the area before the Wailing Wall, particularly in 1922, in September, 1925, and on the day before the Day of Atonement, in 1928. On the Day of Atonement itself (September 24, 1928), upon the insistence of the Wakf, the organization holding in trust property sacred to the Mohammedans, the British police interrupted the services to remove a portable screen that was being used to separate male and female worshippers, according to the Jewish Orthodox tradition. The reason given was that this was a change in the customs regulating the use of the area.

It was soon clear that the members of a faction of the Arabs opposed to the settlement of Jews in Palestine on the basis of the Balfour Declaration and the Mandate were stirring up disputes regarding the use of the Wailing Wall by the Jews and were using these disputes for anti-Jewish agitation among the Arabs. To show their ownership of the wall, they made a breach to allow passage to and from the adjoining Mosque of Omar; they stationed a muezzin on the roof of an adjoining building to call the faithful to prayer when it would disturb the services of the Jews at the wall.

In May, 1929, dervishes began ritual dances in a garden adjoining the wall to the noise of drums and cymbals. Furthermore, on the basis of an Arabian legend that Mohammed, while on a celestial journey, had stopped in Jerusalem, it was said that his horse, El Burak, had been tethered at the Wailing Wall (although the legend mentioned no particular place) and, for this reason, the Arabs called the wall the Burak and claimed the place as holy for Mohammedans.

As a result of the Mohammedan riots of August, 1929, the Council of the League of Nations (to which the Mandatory Power was responsible) decided that a special commission be appointed to determine the questions involved in the use of the Wailing Wall. The commission, consisting of a Swede, a Swiss and a Hollander, held its sessions in Palestine in 1930. The Mohammedans denied the jurisdiction of a non-Moslem commission over a Moslem sanctuary, but were represented. The Jews, on the other hand, agreed to abide by the decision of the commission. The chief of counsel for the Jews was Mordecai Eliash, and they submitted, in addition, a memorandum based on a draft by Cyrus Adler, president of the Jewish Theological Seminary and of the American Jewish Committee.

A View of the Wailing Wall in Jerusalem

In 1931 Sir John Chancellor, British High Commissioner for Palestine, issued a proclamation enforcing the findings of the commission. It provided, first, that the Wailing Wall, the paved area in front of it, and the Moghrabi quarter opposite, belonged to the organization holding in trust property sacred to the Mohammedans (the Wakf), but that the Mohammedans could not make any changes which would hinder the access of the Jews to the Wailing Wall or which would interfere with their services; second, that the Jews should have free access to the Wailing Wall at all times for the purpose of devotion. They might bring with them prayer-books or lamps and, on certain days, prayer-mats, but no benches, chairs, awnings, curtains or screens; nor could the Shofar (ram's horn) be sounded. On certain days, including the Sabbath and stated holidays, an Ark and a table on which to place the Torah might be brought to the wall.

The Moslems were forbidden in any way to disturb the Jewish services. And they were to keep the area in front of the wall clean. Political demonstrations or speeches at the wall were forbidden to both Jews and Moslems. The order (Palestine Western Wall Order in Council of 1931) pleased neither Jews nor Mohammedans. But the Jews had agreed to accept the findings of the commission, and their community did so.

WAINER, JACOBO, government official, b. Buenos Aires, Argentina, 1896. He received the Ph.D. degree from the University of Buenos Aires. In 1923 he was made chief accountant of the Argentine government, a post which required his intervention as technical expert in the finance departments of various divisions of the national administration. He was made syndic of the Central Bank of the Argentine Republic in 1938.

Wainer was the author of several books on finance and government administration, including a study on English financial administration, a book on the general principles of the scientific organization of administration, and one on administrative contracts.

WAKAR, IBN, JOSEPH BEN ABRAHAM, *see* IBN WAKAR, JOSEPH BEN ABRAHAM.

WAKSMAN, SELMAN A., microbiologist, b. Priluka, province of Kiev, Russia, 1888. He studied in Odessa, and came to the United States in 1910. In 1918 he received the Ph.D. degree from the University of California, and in the same year was made microbiologist at the New Jersey Agricultural Experiment Station. Waksman was appointed lecturer, then associate professor of soil microbiology at Rutgers University in 1919, and made full professor in 1930, a post he held in 1943. At the same time he served also (1931-) as marine bacteriologist at the Woods Hole Oceanographic Institution and (1939-42) as consultant to the United States Navy.

Specializing in the microbiology of the soil and the sea, the decomposition of organic residues and the formation of humus, and the antagonistic interrelations among microorganisms, Waksman was the author of several standard works on his fields of investigation. Among these were: *Principles of Soil Microbiology* (1st ed., 1927; 2nd ed., 1932); *Humus* (1st ed., 1936; 2nd ed., 1938); *The Soil and the Microbe* (1931); *Enzymes* (1926).

In addition, he produced more than 250 scientific papers on various phases of his subject. He was, in 1943, on the editorial board of *Soil Science*. Waksman served as president of the Society of American Bacteriologists in 1942, as president of the 3rd Commission of the International Society of Soil Science, as vice-president of the American Society of Agronomy, and held other offices in national and international scientific organizations. In 1930 he won the nitrate of soda nitrogen research award.

WALD, LILLIAN D., social worker, b. Cincinnati, 1867; d. Westport, Conn., 1940. She was the granddaughter of a Jewish immigrant from Germany. Her education, most of which was obtained in Rochester, N. Y., was that of a well-to-do, secluded young lady of the period. But the stirrings of the time, together with a sentimental concept of the beauty of nursing, prompted her to attend and graduate from (1891) the New York Training School for Nurses. Then she started to study medicine at the Women's Medical College. A visit to the East Side home of one of her pupils at a Sabbath School class in home nursing for immigrants deflected Miss Wald from her earlier determination, and sent her into a career of pioneering service that eventually made her the symbol of the accomplishments of privately endowed social work at its period of fullest burgeoning.

Shocked and moved by the absence of hygienic and nursing facilities in slum flats, Miss Wald, with another nurse, Mary Brewster, conceived the plan of offering such help. It was not meant to be an altogether charitable undertaking; payment within the means of the beneficiaries was expected. But the nursing service, offered in conjunction with exasperatingly needed assistance in sanitation, was taken into the hearts of the lives of the East Side inhabitants. There the foundation of their underprivileged existences was

touched, which would have been impossible had nursing been provided only in an impersonal hospital, where the patient was cured and then discharged to a continuation of a miserable environment.

In 1893 the support of friends, notably Jacob H. Schiff, enabled Miss Wald and Miss Brewster to move into their own apartment in the neighborhood. Two years later the house at 265 Henry Street was obtained, and it was with this address that Miss Wald's name became internationally associated.

The development of the nursing service into a fully functioning settlement house, known as the Henry Street Settlement, was inevitable. It held out the promise of understanding for the immigrant populations of the section, and social activities, education and advice for young and old alike grew within its hospitable walls. Private philanthropy was, in the early years of the 20 cent., a force that moved side by side with labor advances and political reform.

In this progress, too, Miss Wald soon had her hand, so that from the intimately loved protector of a neighborhood she became an internationally recognized representative of important undertakings. The visiting nurse service of the Settlement expanded steadily; in 1943 there were 265 nurses functioning from sixteen centers in New York city. The Settlement activities, which remained housed in Henry Street under a separate departmental head, included all the enterprises associated with modern settlement houses. During Miss Wald's residence there it had been the temporary home of social workers and of liberal political figures from almost every country in the world, who came to observe and to learn.

Miss Wald's interest in children, and her forward-looking belief that child care was a governmental responsibility, led President Theodore Roosevelt to the establishment of the Federal Children's Bureau in 1908. In the following year Miss Wald was a member of the White House Conference on Child Health and Protection. In 1919 she represented the Federal Children's Bureau in the International Conference at Cannes, France, and in the same year was American delegate to the Women's International Conference in Zurich. Miss Wald saw, too, the interrelation between fair labor practice and public welfare; it was her boast that she had once argued a banker into supplying the funds for a strike.

Her participation on the executive boards of and on official commissions relating to social service, cultural, women's and anti-militarist institutions of local, national and international scope touched on almost the entire roster of such undertakings. She was the first president of the National Organization for Public Health Nursing, the vice-president of the American Association for Labor Legislation, a member of the national advisory committee of the American League to Abolish Capital Punishment, a member of the executive committee of the Foreign Policy Association, honorary president of the National Federation of Settlements, a director of the Survey Associates, and in 1930 to 1931 a member of the executive committee of the coordinating committee on unemployment.

Miss Wald was the author of two volumes of reminiscences: *The House on Henry Street* (1915) and *Windows on Henry Street* (1934). Her awards included the gold medal (1912) of the National Institute of Social Science, the gold medal (1923) of the Rotary Club, the "Better Times" medal for distinguished social service (1926), and a citation from Mayor Fiorello H. LaGuardia for distinguished service to the city of New York (1937). She was given an honorary LL.D. degree by Mount Holyoke College in 1912 and by Smith College in 1930.

Her seventieth birthday, which already found her partly invalided in her Westport home, was celebrated by a national radio broadcast that included tributes from President Franklin D. Roosevelt, read by his mother, and from Governor Herbert H. Lehman. Shortly before her death a playground in New York's East Side was named for her, and a projected housing project in Brooklyn was subsequently designated to bear her name. A memorial tribute in Carnegie Hall again called forth tributes from Roosevelt, Lehman, Alfred E. Smith and leaders in social service and other progressive movements.

Lillian D. Wald

Her vision, her tolerance and her fortitude represented the best of man's possible humanity to man; she lived to see private charities retreating before the disputatious growth of government responsibility, but she had been no more instrumental in the maturing of the first than in the encouragement of the second. Miss Wald's many associations were never restricted to specifically Jewish groups, but her identification with Jewish life was avowed even beyond the multiple bonds with it which her work among immigrants evoked.

WALDEN, HENRY W., aviation pioneer, b. Walden, Mass., 1888. A dentist by profession, he was one of the first to evince an interest in air flight; he learned to fly in 1909 and was awarded pilot certificate no. 74 by the Fédération Aéronautique Internationale. He was building models of his own, and in the same year his Walden 3, an airplane of the pusher type, was hailed as the first successful American monoplane. In 1911 he flew a later model a distance of twenty-five miles over Long Island. From 1911 to 1914 he conducted the Walden School of Aviation at Mineola, Long Island. He continued to design and build both monoplanes and biplanes, and during the first World War was contractor-builder of airplane wings and controlling services for the De Havilland IX and other airplanes.

Walden was the inventor of various aeronautical and

other devices, including animated electric signs (1916), three-dimensional photography (1925-26), the development of propeller units in the wings and problems of landing multi-engine planes (1926-31), coffee-packing machinery (1934) and plastic and rubberized mending machinery (1939). He was a claimant to the principal devices universally adopted for modern high-wing-loading on multi-motored airplanes and sea clippers. During the second World War he was engaged in the development of more efficient dive bombers. He was a member of the Quiet Birdmen and of the Early Birds (governor, 1929-33) and honorary life member of the Minute Men of America.

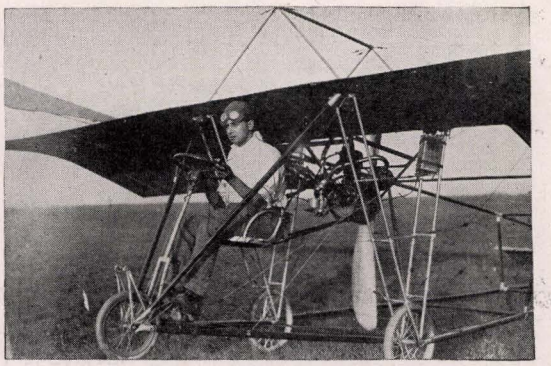
WALDES, HEINRICH, industrialist, b. Prague, Bohemia, 1884; d. Maspeth, L. I., 1941. He was known throughout the world by the snap fasteners called Koh-I-Noor which were manufactured in his factories in Prague, Dresden, Long Island and Switzerland.

As a liberal, democratic political leader he played an important role in the political life of Czechoslovakia. In 1938, after the Munich conference, he delivered a sensational broadcast address which was meant to give his subjected compatriots the courage and hope to survive the crisis. Spiritually he was then already a broken man. But Waldes, for whom flight to a foreign country would have been easy, was steadfast. He lived through the Nazi invasion of Prague and had to experience the hell of a concentration camp before he finally, early in 1941, came to the United States via Cuba. He enjoyed but a few weeks of freedom. He died on July 15th of that year.

Waldes employed thousands of workers in his factories. In Long Island alone there were more than 1,500. The social institutions of his establishments were admirable. The large fortune which he earned with his little snaps was, to a large degree, returned to the general public in one way or another. Numerous charities were established by him.

In his home town of Prague he had created a unique museum, the Button Museum, and in his home he had one of the most important collections of paintings by Bohemian masters. His gallery and the museum were to be given to the republic of Czechoslovakia after his death. This, however, did not come to pass.



In Prague's Jewish life, too, Waldes played a part. He was responsible for the translation into Czech of Hebrew prayer-books and the Old Testament.

Lit.: Aufbau, July 25, 1941.

WALDHEIM, AARON, communal worker, b. Cincinnati, 1864; d. St. Louis, 1938. In St. Louis, where he lived during the greater part of his life, he was engaged in the furniture and real estate business, and was the outstanding Jewish leader of the community. His chief interest in the city was the Jewish Hospital, of which he was president and to which he gave gifts totalling more than $300,000.

Waldheim was also a founder of the Federation of Jewish Charities of St. Louis, and for many years a member of its board. He was vice-chairman of the St. Louis Seminar of Jews and Christians. Among his national activities were his memberships on the executive boards of the Union of American Hebrew Congregations, the Joint Distribution Committee and the American Jewish Committee.

Lit.: American Hebrew, Nov. 2, 1928, p. 878.

Henry Walden at the controls of the first successful American monoplane (1910)

WALDMAN, EMERSON, writer, b. New York city, 1912. He studied in the public schools of New York city, Shaw, Miss., and Miami, Fla., and at the University of Wisconsin (1929-32). He became a newspaperman in 1932, and soon entered the field of radio in which, for a while (1936-39), he was with the National Broadcasting Company. In 1942 he was appointed chief of the farm and foreign language programs of the Radio Section of the Treasury Department's Defense Savings Staff.

Waldman was author of three novels: *The Land is Large* (1938), the hardships of a Russian Jewish farmer until he establishes himself on a Mississippi plantation; *Broad is the Way* (1939), a sequel to the first, describing the unpleasant career of an aggressive son; and *Beckoning Ridge* (1940), a farming community in Virginia as affected by the Civil War.

WALDMAN, MILTON, author, b. Cleveland, 1895. He received his A.B. degree from Yale University in 1917, and subsequently did post-graduate work at the Sorbonne. Waldman's first connection with the literary field was as a newspaper reporter in 1917. In 1922 he was associated with the editorial department of the New York *Globe.* Then he went to Europe, where he remained, carrying on most of his literary activities in England. He was, from 1924 to 1927, associate editor of the *London Mercury.* Except for his first book, *Americana* (1925), Waldman wrote largely semi-fictional studies of English historical personages and periods. *The Disinherited* (1929) is the story of a Jew in a conflict between two environments.

Among his best known books were: *Sir Walter Raleigh* (1927); *King, Queen, Jack* (1931); *England's Elizabeth* (1933); *Joan of Arc* (1935); *Biography of a Family* (1936); *Rod of Iron: The Absolute Rulers of England* (1941). During the first World War Waldman was a lieutenant in the infantry of the United States Army.

WALDMAN, MORRIS DAVID, communal welfare worker, b. Bártfa, Hungary, 1879. He was brought to the United States at the age of four, and completed his education at New York University (Ph.B., 1898) and its Graduate School, the Jewish Theological Seminary (1895-98) and Columbia University Graduate School of Semitics and Philosophy (1898-1901). After serving as rabbi of Temple Anshe Emeth of New Brunswick, N. J. (1900-3), Waldman entered the field of social and welfare work, for which his educational background in social and political sciences and his direct contact with the struggles of Eastern European Jewry gave him a world outlook

Morris D. Waldman

which constituted the basic orientation for his activities in Jewish social service and communal welfare.

Waldman's creative ability in social work was notable. Among his creations are: the District Service Plan, introduced in Boston, by which the needs and problems of all the members of a family were considered on a unitary basis; the "Double Barrelled Federation" which he initiated in Detroit, one of whose "barrels" became the forerunner of all the welfare funds established by Jewish federations in community chest cities to meet the needs of specifically Jewish enterprises, local and national; a "planned parenthood clinic" (Detroit), conducted under the auspices of a Jewish federation for a non-sectarian clientele; bureaus of Jewish education (Boston and Detroit) which for the first time established the principle of community responsibility for Jewish education and community control and direction of hitherto unrelated synagogue religious schools, Talmud Torahs and Heders.

Waldman for several years served in Jewish immigration work with the Industrial Removal Office and was director of the Galveston Movement. The latter, a forerunner of the refugee work of 1933 and after, was an important step in the endeavor to distribute Eastern European immigrants to midwestern and western portions of the United States. In 1908 he came to the directorship of the United Hebrew Charities of New York City, at that time the largest agency of its kind in the world. There he introduced many pioneering procedures, in the direction of what was then termed "scientific charity," which became the basis for later developments in the field of social work.

Milton Waldman

The establishment of the Federation for the Support of Jewish Philanthropic Societies of New York City in 1917 was accelerated by a survey that Waldman made of fourteen other cities where federations had been created. In 1919 he was made a trustee of the Federation's board; at the same time he was elected treasurer of the Jewish Agricultural Society. He was instrumental in organizing the Federation of Jewish Charities of Boston, of which he was elected an honorary trustee for life. He reorganized the federations of Brooklyn and Detroit. In the latter city, between the years 1924 and 1928, he virtually created a Jewish community, bringing into the newly organized Federation all the major Jewish philanthropic and educational activities.

Waldman saw the need of a general research function in Jewish social service and as a result, in 1915, took a leading part in the creation of the Bureau of Philanthropic Research, of which he became the honorary secretary. This organization later, through amalgamation, became the Bureau of Jewish Social Research, the predecessor of the Council of Jewish Federations and Welfare Funds. Waldman was responsible for the founding of the National Desertion Bureau and was its first chairman. He was instrumental in founding the Committee for the Care of the Jewish Tuberculous.

In 1912 Waldman was elected vice-president of the New York State Conference of Charities and Correction. In 1915 he was elected president of the New York City Conference of Charities. In 1927 he was made president of the National Conference of Jewish Charities. From 1916 to 1918 he was lecturer in social science at Columbia University, and he served on the faculty of the Graduate School of Jewish Social Work between 1928 and 1940. In 1929 he became a member of the Council for the Jewish Agency for Palestine, and a deputy member of the Administrative Committee; he was still serving in this capacity in 1943.

His foreign service dates back to 1917, when he served for a brief period as assistant director of the civilian department of the American Red Cross in Washington. He then went abroad to organize public health work in Central and Eastern Europe as European director of the medico-sanitary and of the orphans' departments of the American Jewish Joint Distribution Committee; for a time he was chairman of the European Council. Under his direction and by his initiative, transient nursing and roentgenology were introduced into Jewish hospitals in Poland and neighboring countries, as well as a comprehensive and widespread program of public health in Eastern and Southeastern Europe.

In 1928 Waldman was called to the position of secretary of the American Jewish Committee, at the time when Louis Marshall was president. In March, 1942, he was elevated to the position of executive vice-president of the organization. His achievements in connection with the Committee, which was vitally concerned with protecting the civil and religious rights of the Jews throughout the world, were directly based on his philosophy of Jewish life and his approach to the general problem of minorities. Waldman approached anti-Semitism from the standpoint that it was part and parcel of the whole problem of race

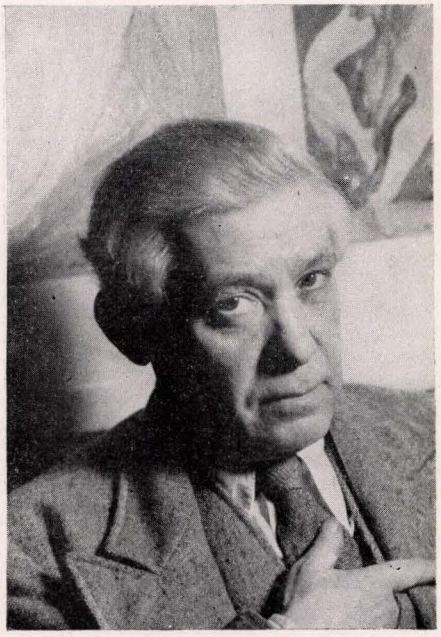
prejudice, and that it called for an implementation of the sciences of anthropology, ethnology and biology for its comprehension on a fundamental basis. He argued that only by establishing a conception of the state as according equal rights to all races and religions within its borders could the problem of the Jew be solved. Accordingly, from the political point of view, he believed in what might be called cultural pluralism; from the scientific point of view, he was concerned with the diagnosis of the psychological aspects of race prejudice.

After the Nazi persecutions of 1933, and after the outbreak of the second World War, Waldman labored to effect a rapprochement between the Zionists and the largely non-Zionist American Jewish Committee, in preparation for united representations at the peace conference expected at the close of the War.

JOHN SLAWSON.

WALDSTEIN, ABRAHAM SOLOMON, Hebrew writer and teacher, b. Kovno, Lithuania, 1874; d. Tel-Aviv, Palestine, 1932. After studying at the Slobodka Yeshiva, he came to the United States and completed his education at Harvard and Columbia Universities. In 1903 he was one of the founders of the Labor Zionist movement in the United States; he drew up its program and for a number of years was editor of its weekly, *Der Yiddisher Kemfer.* In 1907 he founded the Ivriah Hebrew-speaking society. In 1912 he went to Palestine, where he taught at the Herzliah Gymnasium at Tel-Aviv, became a member of the central committee of the Poale Zion, and later joined the Ahduth Haabodah. In 1925 he returned to the United States, studied at the University of Chicago and then taught Bible at the Yiddish Teachers Seminary in New York city. In 1929 he returned to Tel-Aviv, where he established a high school called Gymnasia Humanitarith.

Waldstein was one of the first Hebrew writers in the United States and published many articles in Hebrew, Yiddish and English. His best known work in the latter language is his *Development of Modern Hebrew Literature.* His Hebrew-English and English-Hebrew dictionaries have been reprinted many times. He translated works of science into Hebrew and organized a publishing house at Tel-Aviv, Haskalah, for scientific studies in Hebrew.



WALDSTEIN, CHARLES, *see* WALSTON, SIR CHARLES.

WALES, *see* ENGLAND.

WALEY, JACOB, lawyer, professor and Jewish communal worker, b. London, 1819; d. London, 1873. The family name had originally been Levy. Waley received the B.A. degree from University College, London, in 1839. Subsequently he read law, and when he was called to the bar (1842) he was the fourth Jew admitted to practice in England. Specializing in conveyancing, Waley became one of the leading practitioners of his time. Queen Victoria made him a member of the royal commission to study the transfer of real property (1867), and in 1870 he was made conveyancing counsel of the Court of Chancery. He was made professor of political economy at University College in 1853, resigning in 1865 when he was named professor emeritus.

In the Jewish life of his period Waley was a lay leader. He was one of the founders of the United Synagogue, the first president of the Anglo-Jewish Association, president of the Jews' Orphan Asylum, and active in the directorates and advisory councils of other Jewish communal groups.

Lit.: *London Times,* June 23, 1873; *Dictionary of National Biography; Jewish Chronicle* (London), June 27, 1873; July 4, 1873.

Abraham Walkowitz

WALKOWITZ, ABRAHAM, artist, b. Tuman, Siberia, 1880. He was brought as a child to the United States, where at the age of twenty-five he became naturalized. During visits covering five years in many European countries he studied both primitive and ancient art in various museums. Oils and water colors, pen and pencil were his mediums. His work was exhibited abroad as well as throughout the United States. He is represented in the Whitney Museum of American Art, New York, the Boston Museum of Fine Arts, the Duncan Philips Museum, Washington, the Los Angeles Museum, and the Newark Museum. He was a member of the Society of Printers, Sculptors and Gravers and of the Society of Independent Artists.

Walkowitz is at his most important in his drawings, whether black and white or touched with color. Here he reveals himself as varied in technique and ever independent in his achievement of structure through his use of line and mass. Although he was interested at times in abstractionism, his art is generally realistic, with that decided human note so well exemplified in his studies of New York's East Side types, and such pictures as *The Kiss, The Family* and *The Lovers.* His own simple, stoic and sympathetic nature led to its being said that "his work is his personality." His drawings thus show emotionalism as well as often spiritual force.

Walkowitz's magnum opus is the famous series of drawings of Isadora Duncan. Here he reveals the dancer in every mood, in every posture. The entire range of her rhythmic art is set forth, and with it the entire gamut of human emotions. It is an achievement unique and compelling, indissolubly associating two unusual personalities in different fields of art.

For detailed comment on Walkowitz see the introductory articles by Henry McBride, John Weicksel, Charles Vildrac and Willard Huntington Wright in the volume *One Hundred Drawings by A. Walkowitz.* GEORGE S. HELLMAN.

WALLACH, OTTO, chemist and Nobel Prize winner, b. Königsberg, Germany, 1847; d. Berlin, 1931. He was an assistant to Wichelhaus at the University

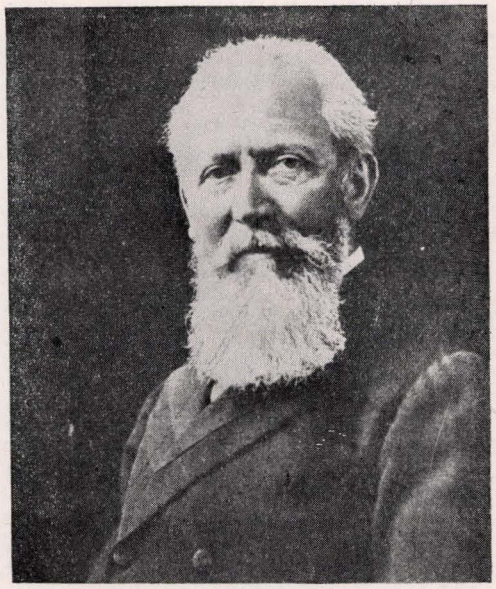
of Berlin (1869-70) and later to Kekulé at the University of Bonn, and for a time worked as an experimental chemist for the Aktiengesellschaft für Anilinfabrikation at Rummelsburg, near Berlin, specializing in aniline dyes. In 1876 he became assistant professor at the University of Bonn, and in 1889 associate professor at the University of Göttingen and head of the Chemical Institute, where he remained until his retirement in 1915.

Wallach did more than any other chemist to work out the structural formulas for the terpene groups, and his investigations opened up a new chapter in organic chemistry. He was awarded the Nobel Prize in 1910 for his pioneering work in the field of alicyclic compounds. Wallach wrote *Terpene und Kampfer* (1909; 2nd ed., 1914). LEON WATTERS.

Lit.: *Deutsche Chemische Gesellschaft. Berichte,* Year 64 (1931) 38-39; *Liebigs Annalen der Chemie,* vol. 485 (1931) 1; Armstrong, Henry E., *Nature,* vol. 127 (1931) 601-2; *Journal of Chemical Education,* vol. 7 (1930) 1225-26.

WALLERSTEIN, LOTHAR, stage director, b. Prague, Bohemia, 1882. He studied at the Universities of Prague and Munich and received the M.D. degree in 1906, but then turned to music and attended the academy of music of Geneva, Switzerland. In 1911 he was asked by Fritz Stiedry to come to Posen (Poznan) as stage director. During the first World War he served as an army surgeon in a hospital in Prague and at the Russian and Italian fronts.

After the armistice he resumed his career as stage director for the opera house in Breslau. He then moved to Duisburg, Rhineland (1922), Frankfort (1924) and Vienna (1927), where he was stage director at the opera house until 1938, when he was ousted from his position by the Nazis. While at Frankfort he also headed the opera class at the Hoch Conservatory, and in Vienna he was professor at the Academy for Music and Dramatic Art.



Wallerstein staged seventy-five operas in Vienna, and as a stage director of the Salzburg Festivals (1926-37) he collaborated with Arturo Toscanini, Bruno Walter, Richard Strauss and other noted musicians. He also staged performances at the Royal Opera in Rome, La Scala in Milan, and the Teatro Colon in Buenos Aires, and translated and adapted several opera libretti, including those of Verdi's *Othello, Macbeth* and *Falstaff* and of Ravel's *L'heure espagnole.*

After the Anschluss (1938) Wallerstein went to The Netherlands and founded an opera school at the Conservatory in The Hague, but after the invasion of the country by the Nazis (May, 1940) he left for the United States. In 1941 he was made stage director at the Metropolitan Opera in New York city. He still held this position in 1943.

WALLICH, NATHANIEL (originally Nathan Wolff), botanist, b. Copenhagen, Denmark, 1787; d. London, 1854. He became director of the Botanical Garden at Calcutta, India, in 1815, and traveled through Hindustan and Burma from 1825 to 1827. Wallich described many plants of India which had thitherto been unknown. In 1834 he led an expedition to Assam in order to study the tea plantations there. He returned to Europe in 1847. His works include *Plantae Asiaticae rariores* (3 vols., London, 1829-32) and *Tentamen florae Nepalensis* (Serampore, India, 1824-26).

He was the father of the marine biologist, George Charles Wallich (1815-99), one of the founders of deep-sea exploration.

Lit.: Roth, Cecil, *The Jewish Contribution to Civilisation* (1938) 86, 187.

Otto Wallach

WALSTON, SIR CHARLES (originally Waldstein), archeologist and author, b. New York city, 1856; d. London, 1927. He was a son of the merchant Henry Waldstein, an immigrant from Germany, and a brother of Louis Waldstein. Walston studied at Columbia University and at the University of Heidelberg, Germany (Ph.D., 1875), and in his later years received several honorary degrees from European and American universities. From 1880 to 1911 he taught archeology at the University of Cambridge, England. Retaining his professorship at Cambridge, he was director of the American Archaeological School at Athens from 1889 to 1896; in this capacity he supervised the excavations of the site of ancient Plataea, of the "Tomb of Aristotle" at Eretria, and of the Heraion at Argos. In 1913 he was knighted. Walston served as High Sheriff of Cambridgeshire and Huntingdonshire (1922-23), and as a member of the Standing Committee of Advice on Art to the Board of Education. He was a vice-president of the English-Speaking Union.

Walston's published works include: *The Balance of Emotion and Intellect* (1878); *Essays on the Art of Phidias* (1885); *The Work of John Ruskin* (1894); *The Study of Art in Universities* (1895); *The Expansion of Western Ideals and the World's Peace* (1899); *The Jewish Question and the Mission of the Jews* (1899); *The Argive Heraeum* (1902); *Art in the Nineteenth Century* (1903); *Herculaneum, Past, Present, and Future* (with L. Shoobridge; 1908); *What May We Read* (1912); *Greek Sculpture and Modern Art* (1914); *Aristodemocracy* (1916); *What Germany is Fighting For* (1917); *Patriotism, National and International* (1917); *The Next War* (1918); *The English-Speaking Brotherhood and the League of Nations* (1919); *Eugenics, Civics, Ethics* (1920); *Harmonism and Conscious Evolution* (1922); *Alcamenes and the Establishment of the Classical Type in Greek Art* (1926).

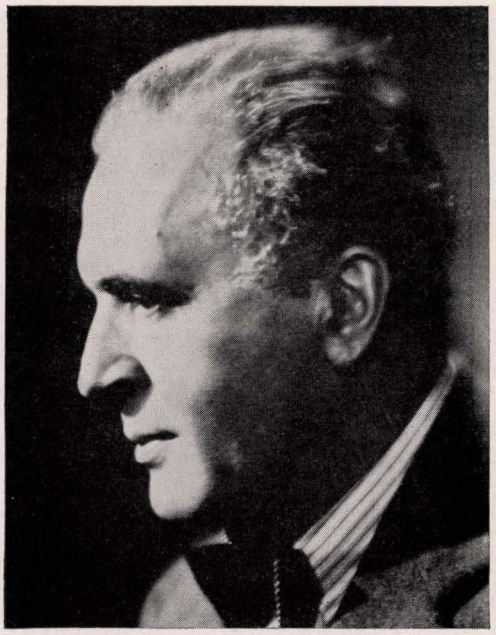
LOUIS WALDSTEIN (b. New York city, 1853; d. London, 1915), the brother of Sir Charles Walston, was a well-known physician and the author of *The Subconscious Self and Its Relation to Education and Health* (1897).

Lit.: *American Journal of Archeology,* vol. 31 (1921) 359-60.

WALT, ABRAHAM (A. Liessin), writer and editor, b. Minsk, Russia, 1872; d. New York city, 1938.

After an early education in the Yeshivas he became converted to a skeptical point of view, which eventually became allied with Jewish socialist movements. His beliefs called for economic and political Socialism with a specific Jewish orientation—a program which was later adopted by the Bund. Walt's writing and propaganda activities provoked the displeasure of czarist authorities; one of the results was that his correspondence to the *Forward* in New York appeared under the pseudonym of A. Liessin. Later, in 1897, he was forced to leave Russia and came to New York, where he joined the staff of the *Forward*.

His work not only as polemicist but as poet won him devotion and leadership. Many of his first poems were said to have been set to music and become favorites of political exiles in Siberia. Throughout his long career in the United States he continued to write only what expressed his important convictions, and did not truckle to any demands of popular journalism. In 1913 he became editor of the *Tzukunft,* a post which he held until his death. He was steadily active in numerous labor and literary circles. Shortly after his death his collected works appeared in a three-volume edition.



Lit.: Reisen, Z., *Lexikon fun der Yiddisher Literatur, Presse un Filologie,* vol. 2 (1929), cols. 259-66; *Forward,* Nov. 26, 1938; *Tzukunft,* Dec., 1938, Jan. and Nov., 1939.

WALTER, BRUNO, conductor, b. Berlin, 1876. He was one of the most brilliant musical interpreters of all time, as exceptional in concert as in opera. His mother was his first piano teacher. Later he was a student at the Stern Conservatory in Berlin, where he was an outstanding pupil. In 1893 he became an assistant conductor in Cologne. One year later he was in Hamburg, where he met Gustav Mahler, whose friendship proved a dominating influence in his life. Various other conductorial assignments followed, including one at the Berlin Royal Opera (1900-1).

It was at this time that Walter went to Vienna in response to repeated invitations from Mahler. At first he won recognition as director of Italian opera, but soon was assigned also the classic repertory. From the first he was Mahler's confidential assistant and friend, and one of his most ardent admirers. When Mahler withdrew, toward the end of 1907, Walter, although remaining at the Vienna Opera, devoted himself more and more to the concert stage, directing the Vienna Philharmonic and the Vienna Singakademie. In November, 1911, he directed the premiere of Mahler's *Das Lied von der Erde,* and in 1912 that of Mahler's *Ninth Symphony.* Twenty-five years after Mahler's death, in 1936, he organized the great Mahler cycle in Vienna. At the end of 1912 he went to Munich as general music director, in succession to Felix Mottl. He established a splendid repertory in Munich and a high standard of performance. But political and artistic conflicts caused him so much annoyance that he resigned the post in 1922.

Between 1923 and 1934 he visited the United States nine times as a guest of most of the great American orchestras, particularly the New York Symphony and the New York Philharmonic. Thereafter he was continuously occupied in the United States, becoming a permanent resident in 1939.

After his years in Munich Walter was frequently guest conductor of most of the leading European orchestras and, after 1924, a regular conductor at Covent Garden. He succeeded Artur Nikisch as principal conductor of the Leipzig Gewandhaus Orchestra in 1929, and from 1925 to 1930 was conductor at the

Bruno Walter

Berlin Municipal Opera, where he continued his splendid Munich activities. He won great success as an operatic conductor in Paris.

After 1935 he conducted frequently in Austria, particularly at the Vienna State Opera and at the Salzburg Festivals; in 1936 he became in all but name the actual director of the Vienna State Opera. In the summer of 1939 he conducted his last European performances, at the Lucerne Festivals.

He was the first of the great artists to be exiled from Germany when the Nazis rose to power. At that time he became an Austrian citizen, but with the annexation of Austria by Germany (1938) he was offered French citizenship by the French government. In 1939 he came to the United States and settled permanently in California. He gave performances with major American orchestras, and associated himself for the first time with the Metropolitan Opera House.

In 1901 Walter married the singer Elsa Korneck-Wirtschaft. He was a Commander of the Legion of Honor and Grand Officer of the Dutch Orange-Nassau Order. He also received many decorations from the Austrian government, including the title of professor, and an honorary doctorate from the University of Southern California.

Walter is not only a highly gifted musician but also an outstanding thinker and philosopher, a person of exceptionally wide culture. As an author he merits thoughtful consideration. He is the author of *The Moral Foundations of Music* and *Mahler,* the latter having been published in an English translation in New York (1941). He is the composer of many works for orchestra, chorus, and chamber-music organizations, but he has discouraged their performance. His versatility and keen interest in new works as a conductor must be emphasized, as well as his deeply poetic vein in the classical and romantic repertory.

WANDERING JEW. The Gospels (*Matt.* 16:28; *Mark* 9:1; *Luke* 9:27) record a saying of Jesus that

some of those who were standing in his presence would not taste death until they had beheld the coming of the Kingdom of Heaven. This saying of Jesus was interpreted by his early followers as meaning that the Second Coming of Jesus, and the reign of God which this would inaugurate, would take place in their own time. When this hope was not fulfilled, it was succeeded by the thought that someone of that generation was immortal. At first this idea was connected with John, the beloved disciple; but it is expressly denied in the New Testament (*John* 21:22-23). A still later development was the story of a curse which forced an individual of that age to remain alive to witness the coming triumph of Jesus.

The earliest known form of this latter legend is in the *Flores Historiarum* (published in 1235) of Roger de Wendover, a monk of Saint Albans in England, and is repeated in the *Historia Major* of his contemporary, Matthaeus Parisiensis. Both record that a bishop of Armenia had visited the cloister of Saint Albans and told of a certain Cartaphilus who had been a doorkeeper of Pontius Pilate. As Jesus had passed by on the way to crucifixion and had faltered on the way, Cartaphilus had struck him on the back, saying: "Go faster, Jesus, what are you waiting for?"; Jesus answered: "I am going, but you shall wait until I return." Accordingly, Cartaphilus became immortal; his appearance would change in the course of years from that of thirty, his age at the time of the crucifixion, until he was one hundred, after which he would fall into a fit, resume the appearance of the age of thirty and begin the cycle over again. He wandered through all countries, vainly seeking death, and finally became a Christian and adopted the name of Joseph.

Other stories, arising in Italy, ascribed the same words and fate to Malchus, the servant of the high priest, whose ear had been cut off by Peter (*John* 18:10). In other Italian legends the name of the wanderer is given as Johannes Buttadeus or as Buttadio ("the one who struck God"). In all these early legends, however, there is no indication that the accursed wanderer was a Jew.

The first mention of a wandering Jew is in a pamphlet issued in 1602 and entitled *Kurze Beschreibung und Erzählung von einem Juden mit Namen Ahasverus.* In this Bishop Paul von Eitzen of Schleswig related that in 1547 he met a Jew in Hamburg who told him that he was a former shoemaker in Jerusalem who had opposed Jesus and who had spoken angrily to him and been condemned by him to wander eternally, just as in the earlier stories of Cartaphilus. This story can hardly have been of Jewish origin, as it is based entirely on Christian motives and no Jew would have borne the name of Ahasuerus, who is regarded in Haggadic literature as the typical fool. It seems rather to have been a blending of the older story with the church conception of the Jewish people as being preserved as a living witness to Jesus.

The story became an exceedingly popular folk-tale. L. Neubaur records no less than forty-six German, three Flemish, ten French, four Danish and nineteen Swedish versions of the tale. On many occasions the Wandering Jew was reported as being seen in many cities, the earliest being in Spain (1575), Vienna (1599), Lübeck (1601 and 1603) and Prague (1602), and the latest by a Mormon in the United States (1868). It was not until the beginning of the 19th cent. that the Wandering Jew was conceived as bringing in his train the plague of cholera, an idea that was in accordance with the medical notions of the time. The stories about the Wandering Jew spread through various countries of Europe, and were perhaps encouraged by the appearance of wandering Jewish peddlers who, with their long beards and travel-worn appearance, might be hailed as the Wandering Jew and who, either from misunderstanding or a spirit of jesting, replied in such a way as to confirm the legend. A book called *The Turkish Spy* (1644) gives a new name, Sieur Paule Marrana, which suggests a connection with the Marranos.

The figure of the Wandering Jew has been a favorite in legend and art. The most notable pictures on the subject are those of Doré, and the best-known novel *Le juif errant* (*Wandering Jew;* 1844) of Eugene Sue. Two English dramas, *The Wandering Jew, or Love's Masquerade,* by Andrew Franklin (1797), and *The Wandering Jew* of E. Temple Thurston (1921), have dealt with the material. It is also the theme for English novels by George Croly (*Salathiel,* 1828; reissued as *Tarry Thou Till I Come,* 1901), Lew Wallace (*The Prince of India*), and Viereck and Eldridge (*My First Two Thousand Years*), as well as stories by Nathaniel Hawthorne ("A Virtuoso's Collection") and O. Henry ("The Door of Unrest"). There is also a reference to the legend in Mark Twain's *Innocents Abroad.*

WANDSWORTH, BARON, *see* STERN, VISCOUNT DAVID DE.

WAR. Judaism emerged at a period of history when warfare was generally recognized as a legitimate instrument of tribal and national policy. Hungry nomadic tribes broke into fertile lands and with armed might dispossessed the settlers, even as these in turn had previously dispossessed the older inhabitants. Such, too, is the story of Israel's conquest of Canaan. The desert tribes had entered into a covenant with their God and, as reward of their obedience, they expected Him to lead them in their wanderings and to aid them in securing possession of a habitable land. Their wars appeared to them as the wars of their God. Hence they conceived of Him as a "man of war," as "mighty in battle," and as "the Lord of Hosts, the God of the armies of Israel" (*Ex.* 15:2; *Ps.* 24:9; *I Sam.* 17:45). They carried the Ark in battle to assure themselves of victory. The battles were started with proper ceremonies, consulting the will of God, blowing of trumpets, and the like, priestly exhortations and sacrifices (*Judges* 1; *I Sam.* 4; *Deut.* 20:2-4; *Num.* 10:9, 35-36). The warriors were "sanctified," that is, set aside for battle, and remained under the taboo until the end of the fighting (*I Sam.* 21:5; *II Sam.* 11:11-13).

The narratives of the conquest in *Joshua* and *Judges* are animated with the belief that the wars were waged in accordance with the will of God and that He Himself fought on their side against their enemies. The Deuteronomic Code and philosophy of history give a religious interpretation to the expropriation of Canaan from the seven nations that had occupied it. God had allotted the land to Israel. Hence it became a religious duty to evict its settlers and to destroy them. Any leniency shown toward them constituted dereliction toward God's command (*I Sam.* 15; *Deut.* 12:1-3). An ideological motive, too, is introduced. The Canaanites were idolators. War on idolators, even if they perchance be Israelites, is rendered a duty

(*Deut.* 13:11-19). A priestly writer further charges the Canaanites with moral corruption and degeneracy which could not be tolerated by Israel (*Lev.* 18:24). The fighting was carried on with the usual ferocity and ruthlessness. Cities were burned and pillaged and their populations put to the sword. These acts of cruelty and destructiveness were rationalized as being God's command. Even Amos considered the conquest of Canaan a sign of God's care for Israel (*Amos* 2:9).

Hard experience soon taught Israel to distinguish between their conquering of the land and having their land conquered by others. As frequent victims of the marauding Midianites, Amalekites, Philistines, Arameans, and others, they came to recognize the cruelty and the horror of warfare. Amos, while taking war for granted and conceiving of it as an instrument of Divine retribution (9:10), condemns the inhumanity and cruelty displayed by some nations toward their victims (1:3, 9, 13; 2:1). That war serves as the weapon of God's wrath to punish the wicked nation is the conviction of Hosea (1:4; 14:1), and he looks to the coming day of the spiritual regeneration of society when all warfare will cease (2:20). Isaiah, witnessing the ruin and devastation wrought by the warring Assyrians upon his people, turns to God for deliverance (5:26-30; 6:11-13; 7:18-20; 8:7-9; 9:1-4). Like Hosea, he sees the alternative of war in Israel's reliance upon God; He brought on the scourge of Assyria to chastise sinful Israel, and, in due time, He will destroy Assyria itself for its guilt (10:24-26).

The pre-prophetic as well as the prophetic attitudes toward war were free from the extremes of militarism, on the one hand, and of pacifism, on the other. The main features of militarism, as the modern world has come to understand it, are absent from ancient Jewish thinking. No undue prominence was given to military training and to military glory; large standing armies were not maintained by Israel, as by Assyria or Babylonia, for the conquest of neighboring peoples. The few attempts in that direction evoked the protest of the religious leaders of Israel (*I Sam.* 8:11-20). The Chronicler disqualifies David from building the Temple at Jerusalem because he had shed blood (*I Chron.* 28:2-3), and the war God of ancient Israel acquired the attribute of *peace* (*Judges* 6:23-24; see *Ps.* 46 and 76).

Neither did Israel go to the other extreme of pacifism, in the sense of non-resistance to aggression as a permanent policy of the state. *Isa.* 31 can not be regarded as pacifistic, nor as denouncing war as repugnant to the religious sense as an act of murder. The prophet merely calls the warlike activities of his people useless, since the wicked nation would not escape punishment, and unnecessary, since God Himself would bring down their foes. Isaiah adopted the same attitude toward the Syro-Ephraimitic war (7:4-9). The people of Israel need not trouble themselves about defensive alliances with other nations nor look to its own defenses, for the Lord of Hosts is their shield and deliverer. The call "be watchful and keep quiet" grew out of the prophet's conviction that the only security which Israel can have is reliance upon God, who in His own good time will bring the nations that war upon Jerusalem to destruction (10:5-26; 31:4-9). Hence he declares: "In sitting still and rest shall ye be saved, in quietness and in confidence shall be your strength" (30:15).

Similarly Jeremiah counselled submission to Babylonia as compliance with God's will (*Jer.* 27). At the same time he was confident that the Divine cup of wrath would in turn be passed to Babylonia (25:12-29). Jeremiah was by no means blind to the actualities. He denounces the priests and prophets, who heal the hurt of the people lightly, calling: "Peace, peace," when there is no peace (6:13-14). Ezekiel, too, attacks the blind guides of the people, who indulge in wishful visions of peace, where none exists (*Ezek.* 13). The watchman, who sees the sword advancing without warning the people, shall be responsible for the calamity (33:6).

The urgency of resistance to force was recognized also by the historical writers of the Bible. Abraham is pictured as rushing with his armed men to the aid of his nephew Lot against Chedorlaomer and his confederates (*Gen.* 14). Moses strikes down an Egyptian taskmaster who smote an enslaved Israelite (*Ex.* 2:11-12). Subsequently he interceded on behalf of his people as Joshua led them in battle against the harassing Amalekites (*Ex.* 17:8-13). The Song of Deborah curses Meroz for not coming to the aid of their own in the struggle against the foe (*Judges* 5:23). The clemency of Saul to Agag king of Amalek and of Ahab to Benhadad king of Aram, inveterate foes of Israel, drew sharp protests (*I Sam.* 15:17-26; *I Kings* 20:35-43).

While the prophets did not preach pacifism, they held out the ideal of peace based on justice in both national and international relations as the goal of the future. Hosea, as noted above, envisions an era of unbroken peace to be ushered in by Israel's betrothal to God through the practice of justice, righteousness and faithfulness. The sword and the bow and war will be banished from the earth (2:2-22). Isaiah announces that the work of righteousness shall be peace, and the effect of righteousness quietness and confidence forever (32:17). The practice of justice will lead to the elimination of strife between the conflicting classes within the nation as well as to the removal of friction between nations (*Isa.* 11). A prophecy appearing in *Isa.* 2:1-4 and in *Micah* 4:1-4 looks to the union of all nations under God as their judge.

> And they shall beat their swords into plowshares,
> And their spears into pruning-hooks;
> Nation shall not lift up sword against nation,
> Neither shall they learn war any more.

But justice is not without some severity. In its defense of the victim, it puts restraints and penalties upon the assailant. While prohibiting murder, justice demands that the offender pay for his crime with his life. The Torah, which teaches the sanctity of human life, rules that "Whoso shedeth man's blood, by man shall his blood be shed; for in the image of God made He man" (*Gen.* 9:6). Willful murder is not only a crime, but also a heinous sin, the desecration of the Divine in man. Permitting the murderer to go free may encourage him or others to commit further crimes. The Holiness Code commands: "Thou shalt not stand idly by the blood of thy neighbour" (*Lev.* 19:16).

Like the defense of one's fellow man, so the protection of one's nation against violence constitutes a positive duty. Unlike the doctrine of *Matt.* 5:38-39, "resist not evil"—which forms the basis of Christian pacifism—Judaism teaches, in the words of *Deut.* 13:6, "thou shalt remove the evil from the midst of thee." When the life of a nation is threatened, it becomes the duty of its sons to take up arms in its defense. Thus Joel, in a time of peril, reversed the prophecy of Isaiah and Micah and called on the people to prepare for war, to "beat their plowshares into swords and their pruning-hooks into spears (*Joel* 4:9-10).

In the spirit of humanitarianism, the Torah seeks to mitigate some of the horrors of warfare. It exempts from military service persons who had built a new house and had not dedicated it, who had planted a vineyard and had not yet enjoyed its fruit, or who had betrothed a wife and had not married her. Likewise "the fearful and the faint-hearted" were excused from the army lest they infect the rest with their timidity. In attacking a hostile city (that is, not a Canaanite city, the conquest of which is a duty), an offer of peace must first be made to its inhabitants. Only if they reject the offer may they be treated with severity. Even then only the adult males may be slain, but the lives of the women and children must be spared. When laying

siege to a city, one may not destroy its fruit-bearing trees. Before a woman captive may be taken to wife, she must be allowed a month in which to "bewail her father and her mother." If subsequently the captor loses interest in her, he must let her go free and not sell her as a slave (*Deut.* 20; 21:10-14). The law clearly condemns such atrocities as are referred to in *Amos* 1:3, 13; *Hosea* 14:1; and *II Kings* 8:12. While the treatment of a conquered city seems harsh when measured by absolute standards of humanitarianism, it is mildness itself as compared with the cruelties perpetrated, as their monuments declare, by the Assyrians or with the horrors of modern, so-called "civilized," warfare (see S. R. Driver, *International Critical Commentary, Deuteronomy,* p. 239).

While the warmaking recorded in the Bible was of the usual political variety, the resistance to the Syrian Greeks (2nd cent. B.C.E.) and to the Romans (1st and 2nd centuries C.E.) may well be considered holy wars of religion. The forced Hellenization of the Jews by Antiochus Epiphanes called forth the opposition of the pious elements. The enemy attacked on the Sabbath when the Jews would not resist, and scored an easy victory. Recognizing that if they continued to desist from defending themselves against their enemies, they would soon be destroyed, the Jews resolved that henceforth "whosoever attacketh us on the Sabbath day, let us fight against him" (*I Macc.* 2:41). Among the most resolute defenders of the cause of religious liberty were the Hasidim of Maccabean times who are characterized by the historian as "mighty men of Israel who willingly offered themselves for the Law, every one of them" (*ibid.* 2:42-48). Seeing that all they cherished was at stake, these peace-loving saints took up arms against the foe. They fought bravely and resolutely under Judas Maccabeus during the first phase of the Maccabean struggle, but as soon as the struggle entered upon its second phase of purely political character, they withdrew. They also kept out of the civil war that raged between the factions of Aristobulus II and Hyrcanus II. The saintly Onias refused to offer prayer on behalf of one side in the civil strife against the other, and was consequently stoned to death (Josephus, *Antiquities,* book 14, chap. 2, section 1). In order to rid themselves of the internal strife, the Hasidim shortsightedly welcomed the "protection" of Pompey. Only when they found that allegiance to Rome demanded paying homage to the deified emperors did they resist their conquerors.

Judah of Galilee and his zealot followers regarded active opposition to wicked Rome as a religious duty. Acknowledging God alone as their Ruler and Lord, they readily sacrificed themselves rather than call any man lord. They fanned the flames that resulted in the catastrophic war against imperial Rome and in the consequent fall of the state and the Temple. In that disastrous conflict even the Essenes, who in normal times would not engage in any occupation connected with war, participated. Only the Judeo-Christians, who gravitated more and more toward Rome, kept out of the conflict. Johanan ben Zakkai and his followers, who left the city during the siege, represented a "passivist" rather than a "pacifist" view-point. Like Jeremiah during the Babylonian peril, so Johanan regarded submission to the world conqueror as a necessity for sinful Israel in accordance with the will of God. he "activists" had their way also in the Bar Kochba rebellion, and stubbornly fought the last distinctly Jewish war. It, too, was a struggle for religious as well as for political independence. Broken in power and scattered among the nations, the Jewish people abandoned all hope of regaining their independence by means of military might. The Messianic hope was transferred from earth to heaven. Not by human arms, but by God's will alone would redemption come to Zion.

The rabbis, for whom war was no longer a matter of practical politics but merely a subject of Biblical exegesis, generally apply a lofty religious standard to humanize the brutal institution. As in the case of personal attack, so in war they take the realistic view that "if one comes to slay you, hasten to slay him" (*Ber.* 58a). On facing the enemy, one should be ready, as was Jacob before meeting Esau, for prayer, for appeasing him with a gift, and—if these fail—for war (*Midrash Eccl.* 9:25; *Tanhuma, Vayishlah* 6; Rashi to *Gen.* 32:9). The Biblical exemptions from military service were taken to apply only to voluntary wars of offense—*milhamoth reshuth.* "In obligatory wars of defense—*milhamoth mitzvah*—all must go to battle, even the bridegroom from his chamber and the bride from her canopy" (*Sotah* 44b). Eliezer ben Jacob prohibits women from going to war with weapons (*Sab.* 60a; *Erub.* 45a). The Maccabean rules regarding fighting on the Sabbath were retained by the rabbis. The Mishnah forbids carrying a sword, bow, shield, club or spear on the Sabbath. A violation of this rule incurs a sin-offering. Eliezer took a more lenient view on the ground that they may be carried as ornaments, but he was overruled by the sages, who held that weapons are a disgrace (*Sab.* 6:4).

The rabbinic ideas of warfare are codified by Maimonides in *Hilchoth Melachim* 5:1-6 and 6 to 8. War is still recognized by him as an instrument of international relations. "A king fights first only obligatory wars, that is, wars against the seven nations, against Amalek, and in defense of Israel against attacking foes. After that he may engage in voluntary wars, that is, in wars on other nations in order to widen the border of Israel and to magnify his greatness and fame. For obligatory wars he does not require the permission of the Sanhedrin, but undertakes them himself at any time, and compels the people to fight. Offensive wars he may wage only with the consent of the Sanhedrin of seventy-one" (*Sanh.* 2a; 20b). Lands thus conquered become like Palestine in all matters. On entering battle, the warrior must rely on God's help and risk his life without fear or hesitation. If he does not fight wholeheartedly, it is accounted unto him as if he has shed the blood of all Israel, and he is accursed (*Jer.* 48:10). But if he fights bravely, determined to sanctify God's name, he will be spared from injury and evil and will be enabled to establish a firm house in Israel.

These rules are theoretically applicable only under conditions of Jewish political independence. Under the actual circumstances of Jewish dispersion, however, Judaism exercised no power whatever over the issues of war and peace. These were determined by governments under the rule of Christianity and Islam. With few exceptions, Jews have not engaged as mercenaries, and, as frequent victims of the warmaking of other peoples, have come to loathe the art of war. In modern times they have been enrolled in the citizen armies of the nations of which they form a part, and have striven to do their duty in defense of their countries, guided by the principle of *dina demalchutha dina*—the civil law of the land is binding upon the Jew (*B.K.* 113b). Even the ritual laws have been relaxed to meet the needs of military service. Thus soldiers are permitted to discharge their military duties on the Sabbath and holy days and to disregard the dietary laws (*Erub.* 17b; *Hul.* 17a). Jews of priestly descent (*Kohanim*) are not deprived of their priestly holiness if in line of duty they kill or are defiled by dead bodies.

With its realistic view of the world, Judaism has not run away from the grim facts of experience, of human wickedness, cruelty and hate, and recognizes the tragic

actuality of war with all its horrors. Hence it has not condemned taking up arms in defense of one's country and has not disowned the Jew who was conscripted or who volunteered as a soldier. Modern exponents of Judaism refuse to lump together all wars and to brand all of them as crimes. If wars of aggression are an offense against God and humanity, wars to ward off the aggressor or to prevent the enslavement or slaughter of the population appear as melancholy necessities. Resistance to assault may be the only means of a people's survival. Similarly patriotic wars of liberation or even of punishing aggression with the view to preventing its repetition belong to a different category from wars prompted by lust of conquest and of imperialistic expansion; hence Judaism may approve the former, but may condemn the latter.

Though some wars are just and even necessary, all wars are calamities. Judaism regards with abhorrence the slaughter and maiming of the flower of youth and the destruction of the accumulated treasures of human genius and toil. Even when fought in self-defense, war is trailed by endless evils. Though human history rings with the clash of arms, Judaism denies the inevitability of war and fervently looks to the fulfillment of the prophetic hope of the ultimate abolition of warfare, through the creation of conditions wherein the forces of reason, of goodwill and of justice will triumph over barbarism and wherein international cooperation and amity will replace suicidal competition and mortal combat.

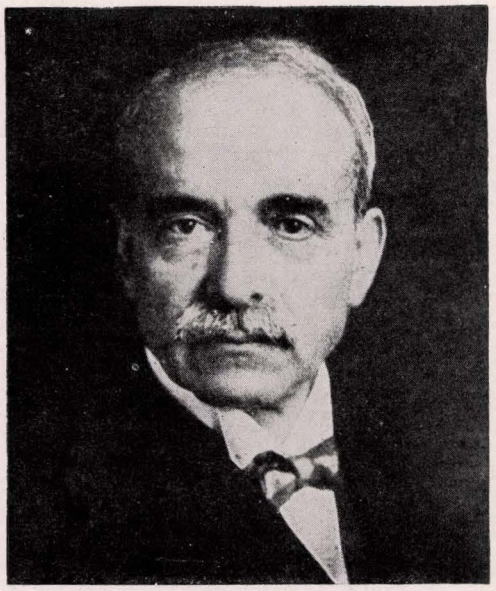
SAMUEL S. COHON.



Lit.: Cohon, Samuel S., *Judaism and War* (1943; tract issued by the Union of American Hebrew Congregations).

WARBURG, a distinguished Jewish family, settled in Germany, Scandinavia, England and the United States. Tracing their ancestry back more than 300 years, the Warburg progenitors stemmed from Bologna. They moved from the small town of Warburg, Westphalia, from which the family derived its name, to Altona. The first to bear the Warburg name was Levi Joseph, whose son Samuel died in Altona in 1667. Later on the family split into two separate branches, the head of one branch being Samuel Moses Warburg, who died in 1759, and whose son founded the Copenhagen branch. This group changed its name to Delbenco.

A grandson of Samuel Moses, Simon Elias (1760-1828), went to Göteborg and founded the first Jewish community in Sweden. His two sons, Samuel (1800-81) and Michael, were the first Jews in the Swedish government, Samuel being a member of the State Debt Administration. Samuel's son was Karl Johan Warburg (see page 459).

Of the Swedish branch, there are to be mentioned: Frederik Elias, son of Samuel (1832-99), who was the founder of the London electric street car system; Karl Johan; Karl Simon, journalist, and editor of the *Foensk Monatsskrift.*

One of the half-dozen German branches of the Warburg family was founded by Samuel Reuben Warburg (d. 1756). R. D. Warburg (1778-1847), a grandson of Samuel Reuben Warburg, established the Warburg financial and banking firm in Hamburg, Germany. Gumprich Warburg (d. 1801), the second son of Samuel Moses Warburg (d. 1759), was the father of Moses Marcus Warburg (d. 1830), who was the founder of the Hamburg firm of Moses Marcus Warburg and Company. Two additional branches of the Warburg family in Germany were founded by Elia (Elias) Samuel Warburg (d. 1804), who was the third eldest son of Samuel Moses Warburg.

Aby Warburg

Most of the branches or sub-branches of the Warburg family which either remained in Germany throughout the latter half of the 19th cent. and the early 20th cent. or emigrated to the United States during this period were descended from Samuel (Schmul) Elias Warburg (d. 1826), who was the son of Elia (Elias) Samuel Warburg (d. 1804). The latter was, in turn, the great-great-great-great-grandson of Levi Joseph Warburg, the first founder of the entire Warburg family, who flourished at the very beginning of the 17th cent. (about 1600 on). Samuel Elias Warburg's son was Aby Samuel Warburg (1798-1856). Aby Samuel Warburg's son was Moritz Warburg (b. Hamburg, 1838; d. Hamburg, 1910), who was the father of Aby M. Warburg, Max M. Warburg, Felix M. Warburg and Paul M. Warburg.

ABY MORITZ WARBURG, art historian and "Kulturhistoriker" (b. Hamburg, Germany, 1866; d. Hamburg, 1929), studied first art history under Carl Justi at the University of Bonn, where he came into close contact also with Carl Lamprecht. He continued his studies at the University of Strasbourg with Hubert Janitchek. Jacob Burckhardt and his idea of "Kulturgeschichte," examining all the activities of the human mind and trying to discover its moving powers, had a great influence on him. In consequence, he studied psychology at the University of Berlin and, taking interest in the beginnings of the self-expression of mankind, devoted himself under Hermann Usener to the customs and religions of primitive peoples. During an American trip he was concerned with research on the Pueblo Indians.

Warburg's main problem, however, was the Renaissance: the revival of Greek antiquity. His graduation thesis, dealing with the movement of detail in the work of Botticelli, and his paper, *Sandro Botticellis Geburt der Venus und Frühling* (1893), disclosed that the early Renaissance artist turned to classical examples in art or literature whenever he wanted to express motion or emotion. *Bildniskunst des Florentiner Bürgertums* (1902), *Die Grablegung Roger van der Weydens in den Uffizien* (1903) and *Francesco Sassettis letztwillige Verfügung* (1907) are some of his publications treating the man of the Renaissance in Florence. They disclose his relations to classical antiquity and Christian religion, showing his struggle between faith in fatalistic predestination and individual self-determination.

In the paper, *Italienische Kunst und internationale Astrologie im Palazzo Schifanoja in Ferrara* (1912), he solved the enigma of the famous fresco series in the Schifanoja palace. He proved the importance of astrology in the art of the early Renaissance, tracing back astrological signs to their origin in Greek antiquity, and following their changes throughout the centuries and throughout the countries far over the frontiers of Europe. *Heidnische antike Weissagungen in Wort und Bild zu Luthers Zeiten* (1920) and *Orientalische Astrologie* (1927) gave account of more extended studies about the creeds and superstitions of man in the period of humanism.

Warburg was honorary professor at the University of Hamburg. Another center of his scientific activities was the Warburg Bibliothek, which he founded in Hamburg, and which, after the Nazis' rise to power, was transferred to London as the Warburg Institute. Consisting of 60,000 volumes and 20,000 photographs, it is a most individual library, a true mirror of Warburg's scientific work. Containing material on the revival of antiquity, it bears the inscription "Mnemosyne." Outstanding scholars lectured there, and these lectures were edited under the title of *Vorträge der Bibliothek Warburg* (from 1922 on). Scientific papers, under the name of *Warburg Studies,* were other publications of the library.

From 1937 on the Institute edited the *Warburg Journal,* a periodical for contributions to the aims of the Institute which are in concordance with Warburg's research work. Warburg's numerous papers were edited by the Institute (1932). This edition of Warburg's multifarious investigations of minute detail represents an integration to his major problem, as expressed in the title of this publication: *Die Erneuerung der heidnischen Antike; kulturwissenschaftliche Beiträge zur Geschichte der europäischen Renaissance.*

ELISABETH GUTMAN.

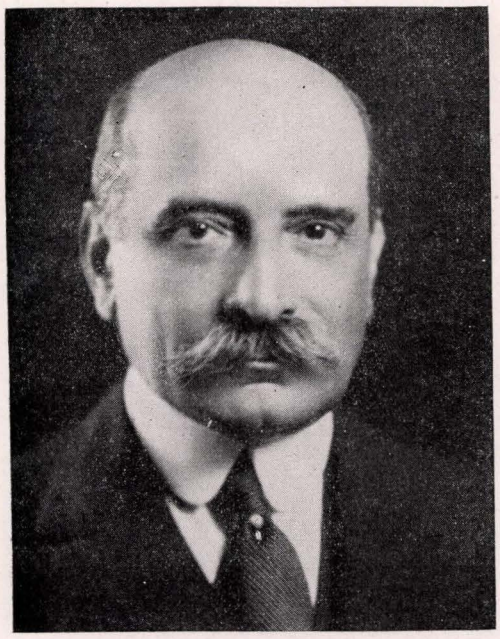
MAX M. WARBURG, banker, philanthropist and Jewish communal leader (b. Hamburg, Germany, 1867), was the brother of Paul M. Warburg and Felix M. Warburg. He graduated from Gymnasium in Hamburg, Germany, and attended the Universities of Munich, Germany, and Sorbonne, Paris. From 1888 to 1889 he served as a soldier in the Bavarian Army. Later he learned the banking business in Germany and other countries. In 1892 he became a partner of the paternal banking firm of M. M. Warburg and Company in Hamburg, and remained at its head up to 1938. For many years he was a member of the chamber of commerce in Hamburg, of the Central Union of German Bankers Association, and of the Hamburg house of representatives. His superior abilities in financial affairs were widely recognized, and in 1919 he was especially attached to the German Peace Delegation at Versailles as a special expert in financial matters; as such he later served the German government on many occasions until the Nazis came to power. He served as president, or on boards of directors, of many industrial enterprises. He was especially active in the Hapag (Hamburg-America-Paketfahrt-Actien-Gesellschaft). His outstanding achievements were recognized in the form of the Ph.D. degree which the University of Hamburg conferred upon him in 1921. He wrote many authoritative articles on financial topics, and was a forceful public speaker at financial conferences. Remarkable was his stern warning to the Allies in 1920 that if Germany were forced to observe all the conditions of the Versailles Treaty, the internal situation would become unbearable and would in turn have disastrous repercussions in other parts of the world.

Max M. Warburg

Warburg was one of the foremost leaders of the Jewish community. He served on the governing boards of many communal organizations, such as the Hilfsverein der Deutschen Juden, Reichsvertretung der Deutschen Juden, Talmud Torah Schule in Hamburg, and Jewish Orphan Asylum in Hamburg, and he was noted for his philanthropic activities in the Central-Verein Deutscher Staatsbürger Jüdischen Glaubens.



He perceived comparatively early the peril threatened by National Socialism, and he devoted a great deal of his time and strong influence to the strengthening of the Central-Verein. He was one of the largest contributors to its funds, and continued to be prominently active in its leadership even after the Nazis' accession to power. From 1933 to 1938 he rendered significant service to the Jewish organizations which were assisting German Jews to leave the country, and he personally assisted many refugees to settle in foreign countries. While he disliked titles and did not run for office, he nevertheless accepted such duties as were assigned to him, and executed them faithfully. A notable illustration of this was his acceptance of the leadership of the Hilfsverein der Deutschen Juden.

On the occasion of his seventieth birthday the few remaining German periodicals which were still permitted to discuss events of Jewish interest expressed appreciation of Warburg's achievements as German and Jew.

In January, 1939, Warburg immigrated to the United States, where he soon became interested in Jewish communal life. The American Jewish Committee and the Joint Distribution Committee elected him to active membership. He became prominent also as co-founder and leader in immigrant organizations such as Help and Reconstruction and the American Federation of Jews from Central Europe, and became a director of the Refugee Economic Corporation.

HARRY SCHNEIDERMAN.

Lit.: *Central Verein Zeitung,* June 3, 1937, pp. 1, 3; *New York Times,* Oct. 27, 1920, p. 11; Oct. 30, 1930, p. 10.

Paul M. Warburg

PAUL MORITZ WARBURG, banker and philanthropist (b. Hamburg, Germany, 1868; d. New York city, 1932), was the brother of Felix M. Warburg and Max M. Warburg. He received his early education in the Hamburg schools, and in 1886 graduated from the Real-Gymnasium. After serving as apprentice to an export firm for two years, he was sent to London and Paris to study finance. Upon his return to Hamburg in 1895, he was admitted to partnership in the famous firm established by his great-grandfather, Moritz M. Warburg. In 1893, while on a visit to New York, he met Nina Jenny Loeb, daughter of Solomon Loeb of Kuhn, Loeb and Company, whom he married two years later. In 1902 he moved to New York, becoming a member of Kuhn, Loeb and Company.

Warburg's long and distinguished record of public service won for him universal recognition as a financial expert. In 1911 he began working with Senator Nelson W. Aldrich, of Rhode Island, on a proposed federal reserve system, completely reorganizing American banking, which was established by law in 1913. A year later he was appointed by President Woodrow Wilson a member of the Federal Reserve Board, an office which he accepted at great personal sacrifice. He retired forthwith from Kuhn, Loeb and Company, and resigned all his directorships and trusteeships. He was vice-governor in 1917 and 1918. He declined reappointment by President Wilson, it is believed, because public feeling was opposed to the appointment of persons of German extraction to important government positions.

Upon resuming his private banking business in 1921, Warburg founded the International Acceptance Bank. However, his interest in the Federal Reserve System did not diminish, and for the following five years he was a member of the Advisory Council of the Board, serving as president from 1924 to 1926.

Warburg's civic and philanthropic affiliations were many. He was trustee and treasurer of the Institute of Musical Art, a director of the Juilliard School of Music, a trustee of the National Child Labor Committee, Tuskegee Institute, and Brookings Institution, vice-president of the Academy of Political Science, chairman of the Economic Policy Commission of the American Bankers Association, and a director of the Council on Foreign Relations.

Warburg was also a liberal supporter of Jewish philanthropic causes both in the United States and abroad, notably the Joint Distribution Committee, the Federation for the Support of Jewish Philanthropic Societies of New York City, and the American Society for Jewish Farm Settlement in Russia.

He was the author of a two-volume work, *The Federal Reserve System—Its Origin and Growth* (1930), in which he outlined his proposals for strengthening the independence of the system and expressed his opposition to the intrusion of politics into the affairs of the Board. Other works by Warburg were *Defects and Needs of our Banking System* and *A Plan for a Modified Central Bank*.

In 1917 New York University conferred upon him the honorary degree of Doctor of Commercial Science, and in 1931 Occidental College, Los Angeles, awarded him the honorary degree of Doctor of Laws.

EDWARD W. JELENKO.

JAMES PAUL WARBURG, banker and writer (b. Hamburg, Germany, 1896), was the son of Paul Moritz Warburg. Brought to the United States in 1902, he graduated from Harvard College in 1916. He served as a lieutenant (junior grade) in the United States Navy Flying Corps (1917-18), and invented the Navy Standard No. 1 floating compass for aeroplanes; he presented the patent to the government in 1918.

In view of his ancestry, it was but natural that James Warburg should enter the field of banking. He was president of many financial concerns, including the International Acceptance Bank and the International Manhattan Company, and chairman of the board of the Bank of Manhattan Company.

Regarded as an authority in economics in general and finance in particular, he wrote extensively in both these fields. Besides his works on economics and politics, he wrote also technical books on the manufacture of textiles, and collaborated with his wife in the writing of popular songs. Under the name of Paul James he wrote two books of poetry, *And Then What?* (1931); *Shoes and Ships and Sealing Wax* (1932).

James P. Warburg

Frieda S. and Felix M. Warburg

A member of President Franklin D. Roosevelt's original "brain trust," he was sent to the London Economic Conference of 1933 as financial adviser to the American delegation. His book, *The Money Muddle* (1934), perhaps the first now-it-can-be-told book of the New Deal, described his resignation from this post when the president did not accept his view of the need for a stabilized currency and an "improved gold standard." *It's Up to Us* (1934), *Hell Bent for Election* (1935) and *Still Hell Bent* (1936) condemned nearly every phase of the administration's activities and directed much of their fire against President Roosevelt himself. They charged that the "logical conclusion" of the New Deal was some form of dictatorship.

The Republican National Committee used *Hell Bent for Election* as a campaign document, distributing some 200,000 copies throughout the country. In October, 1936, however, Warburg returned to the fold, announcing that he would again vote for Roosevelt; the foreign policy, especially the reciprocal trade agreements, of the administration had transcended all other issues. And by 1940, in urging his reelection to a third term, he characterized Roosevelt as "one of the greatest Presidents this country has ever had."

Like his father before him, Warburg was a practical banker and, what is very rare among American bankers, also a student of banking with a thorough theoretical understanding of the subject. He was often called the "unofficial spokesman for Wall Street," for he spoke out boldly on subjects which many of his associates in banking preferred to soft-pedal. Typical of his outspokenness in public affairs was his campaign for passage of the Lend-Lease Bill. One of the first to recognize the full menace of Hitlerism, he directed his energies into arousing the American people. In the course of a radio attack upon Colonel Charles A. Lindbergh and upon his "appeal to defeatism," Warburg revealed that he had been urged not to speak because he was a Jew; but he avowed that it was his pressing duty to "speak out as an American."

Warburg wrote also *Peace in Our Time?* (1940) and *Our War and Our Peace* (1941). In 1941 he became special assistant to the coordinator of information, and in 1943 he was with the Office of War Information.

FELIX M. WARBURG, banker, philanthropist and Jewish communal leader (b. Hamburg, Germany, 1871; d. New York city, 1937), was the brother of Max M. Warburg and Paul M. Warburg. Felix M. Warburg was educated at a classical Gymnasium in Hamburg, and at the age of sixteen went to Frankfort, where his mother's parents lived. He worked for six years with his maternal grandfather, Nathan Marcus Oppenheim, a purveyor of precious stones. His grandfather encouraged him to pursue linguistic, musical and art studies. In 1895 he married Frieda Schiff, the only daughter of Jacob H. Schiff, and settled in New York city. Two years later he entered the firm of Kuhn, Loeb and Company, and was senior partner at the time of his death.

At the very beginning of his residence in New York Warburg became especially interested in two institutions, the Educational Alliance and the Henry Street Settlement and its visiting nurse service. Together with President Charles C. Burlingham of the board of education, Warburg was instrumental in having trained nurses assigned to the public schools. He also originated the attendance of trained social workers at courts to advise and assist delinquents.

In 1902 he was appointed by Mayor Seth Low a commissioner of the board of education. He served in that capacity until 1905, interesting himself particularly in deficient children. Subsequently, Warburg and Homer Folks were appointed the first New York state probation commissioners by Governor Charles E. Hughes. Warburg was also one of the founders and the chairman of the board of the American Arbitration Association, a consolidation of the national organizations for arbitration in the United States.

Always strongly interested in education and art, Warburg was a trustee of Teachers College at Columbia University, and through this became associated with the Horace Mann and Lincoln Schools. Because

of his interest in adult education he was, in 1931, elected president of the American Association for Adult Education, of whose Council of 100 he was a member. The American Museum of Natural History, of which he also became a trustee, strongly attracted him because of its great educational value. Warburg's love for fine arts and music was manifested by his active leadership in the building up, and his generous support of, musical organizations in New York, and it was through his efforts that the Institute of Musical Art and the Juilliard Foundation were merged.

Side by side with his interest in general education went Warburg's close attention to Jewish education. He was a generous supporter of the Hebrew Union College, in Cincinnati, and a devoted member of the Board of Directors of the Jewish Theological Seminary of America, in New York. His services to the latter institution were particularly noteworthy. He greatly helped in the promotion of its Teachers Institute, the expansion of its library, and the building up of its Museum of Jewish Ceremonial Objects.

For many years Warburg was president of the Young Men's Hebrew Association in New York city, the strongest of its kind in the country. When the Jewish Welfare Board was formed in 1917 to provide for the welfare of the men in military service, Warburg was one of the members of its advisory committee.

Outstanding among Warburg's social service interests was his work with the Joint Distribution Committee, of which he was chairman from its establishment in 1914 until 1932. His cooperation, however, continued the rest of his life. He was especially active in the Committee's efforts to establish Russian Jews on farms, and was a large contributor to the funds of the American Society for Jewish Farm Settlements in Russia, of which he was the honorary president. In 1934, shortly after the beginning of the refugee movement from Germany, Warburg founded the Refugee Economic Corporation for the purpose of promoting and assisting the economic rehabilitation of refugees along approved financial lines and of conducting a program of research into resettlement possibilities.

A firm believer in the advantages of consolidation of agencies working in similar fields, Warburg was an enthusiastic supporter of the establishment in New York city of a Jewish charitable federation similar to those which had been founded in other communities. He was a leader in bringing about the formation, in 1917, of the Federation for the Support of Jewish Philanthropic Societies of New York City, with which he was associated as president, chairman of the board of directors, and chairman of the executive committee. His Jewish social service activities impressed him with the need for special professional training for persons desiring to enter this field, and he was the leading founder, in 1925, of the Training School for Jewish Social Work, which later (in 1932) became the Graduate School for Jewish Social Work; so great was his share in the support of this school that it could not long survive him, and suspended operations in 1939.

For many years he had been a member of the American Jewish Committee, and from 1929 to the end of his life a member of its executive committee.

Although Warburg was an outspoken dissenter against the idea of Jewish diaspora nationalism, he nevertheless devoted a great deal of his time, energy, and means to the creation of agencies in the United States and in Palestine for the purpose of promoting the sound economic development of the Jewish settlement there. He was one of the founders, in 1926, of the Palestine Economic Corporation which devotes itself to the achievement of this object, chiefly through financial agencies established by it in Palestine.

The idea of a Hebrew University in Jerusalem appealed to Warburg's interest in both education and in Palestine. He made the first substantial gift to the University, in memory of his parents, and he led in mobilizing support for the University among American Jews, through the American Friends of the Hebrew University, of which he was an officer. Warburg was the first sponsor (1928) of the *Universal Jewish Encyclopedia* and his widow continued to aid (1941) in the completion of the manuscript.

Together with Louis Marshall, Warburg represented American non-Zionists during the negotiations with the World Zionist Organization which led to the formation of the enlarged Jewish Agency for Palestine in 1929. Warburg accepted the chairmanship of its administrative committee, but resigned in the following year, together with Chaim Weizmann and Lord Melchett, in protest against the Passfield "White Paper." The breach was healed a year later, however, after conferences between Jewish leaders and Prime Minister Ramsay MacDonald, which resulted in the removal of the more objectionable features of the policy enunciated in the "White Paper." In 1937 Warburg played a leading role in the fight against the adoption of the report of the British Royal Commission, headed by Lord Robert Peel, which recommended a tripartite division of Palestine.

HARRY SCHNEIDERMAN.

FRIEDA SCHIFF WARBURG, communal worker (b. New York city, 1876), was the daughter of Jacob H. Schiff and the wife of Felix M. Warburg, whom she married in 1895. In addition to participating with her husband in the numerous cultural and philanthropic undertakings with which he was associated, Mrs. Warburg was devoted to interests of her own, including the Young Women's Hebrew Association and the Hadassah. She was president of the former organization from 1928 to 1938, and was identified with various phases of Hadassah work, serving as honorary chairman of the building fund campaign of the Rothschild-Hadassah-University Hospital in Jerusalem. In addition to serving as chairman of the women's division of the 1930 campaign of the Federation for the Support of Jewish Philanthropic Societies of New York City, she was honorary chairman of the organization for some time, and also honorary chairman of the Joint Distribution Committee. To the Jewish Theological Seminary of America she was frequently a significant donor, and in 1937 made it a gift of $90,000 to commemorate the ninetieth birthday anniversary of her father. In 1924 Mrs. Warburg created a fund of $500,000 for the support of the Visiting Nurse Service of New York. Her other activities included membership on the executive committee of the Welfare Council of New York city.

LIBBY BENEDICT.

FREDERICK MARCUS WARBURG, banker (b. New York city, 1897), was the son of Felix M. Warburg, and the grandson of Jacob H. Schiff. He graduated from Harvard College in 1919, and thereafter engaged in the field of investment banking. He was successively associated with the American International Corporation (1919-21), M. M. Warburg and Company, Hamburg (1921-22), Kuhn, Loeb and Company (1922-27), and Lehman Brothers (1927-30). In 1931 he became a partner in Kuhn, Loeb and Company.

In 1943 Warburg was president of the 92nd Street Y.M.H.A. in New York city, and a member of the

Frieda Schiff (Mrs. Felix M.) Warburg (third from left) shown receiving a certificate signifying that a tree has been planted in her honor in the colony Kiryath Anavim, Palestine (1937)

Felix M. Warburg (center) on a visit to Palestine. Among those with him were Cyrus Adler (second from left), Max Warburg, Judah L. Magnes, the late Colonel Frederick H. Kisch, and Bernard Kahn

Entrance to the Felix M. Warburg Colony in Soviet Russia, established by the Jews of that country during the height of American relief to Jewish colonization there

American Jewish Committee, also a member of the Business Men's Council of the Federation for the Support of Jewish Philanthropic Societies of New York City, vice-chairman of the Boy Scout Foundation of Greater New York, trustee of the American Museum of Natural History, and a director of the Beekman Street Hospital, the Museum of Science and Industry, and the National Recreation Association.

During the first World War he was a second lieutenant in the infantry, and from 1923 to 1938 a first lieutenant in the reserve corps. Early in 1942 he was called to active duty with the United States Army as a major in the Adjutant-General's Division, and was made lieutenant colonel in August, 1942.

HARRY SCHNEIDERMAN.

PAUL FELIX WARBURG, banker and philanthropist (b. White Plains, N. Y., 1904), was a son of Felix M. Warburg. He was special partner in the firm of J. S. Bache and Company, and director of the County Trust Company at White Plains and of the Staten Island Rapid Transit Company. He gave freely of his wealth and his organizing ability to various philanthropic endeavors, such as the National Jewish Hospital at Denver, the American Committee on Religious Rights and Minorities, the Air Youth of America, the American Arbitration Association, the Boy Scouts of America, the Council for Democracy, the Federation Employment Service of New York (founder, president and member of the board of directors), the Federation for the Support of Jewish Philanthropic Societies of New York, the German Jewish Children's Aid, the Greater New York Fund, and the New York Association for the Blind. During the second World War he entered the United States Army and in 1943 was serving as captain with the forces in Northern Africa.

LIBBY BENEDICT.

EDWARD MORTIMER MORRIS WARBURG, social service leader (b. White Plains, N. Y., 1908), was the son of Felix M. Warburg, and a brother of Frederick Marcus Warburg. Edward M. M. Warburg graduated from Harvard in 1930 (B.S.). He taught fine arts at Bryn Mawr College from 1931 to 1933, and continued his art studies in extensive travels through Europe and Persia. Artistic institutions were among his chief interests. He was (1943) a trustee of the Museum of Modern Art, a member of the American Institute of Iranian Art, and a member of the Visiting Committee of the Board of Overseers of the Harvard University for the Fogg Art Museum and the Germanic Museum. He was also the possessor of a notable private art collection.

Coming from a family which had a tradition of public service and civic leadership, Warburg was identified with many important community activities, educational, cultural and philanthropic. Although he was active in a large number of non-sectarian causes, his chief interest was in the American Jewish Joint Distribution Committee, of which he was named chairman in February, 1941. As Joint Distribution Committee chairman, he not only actively participated in the councils and decisions of the organization, but also traveled extensively throughout the United States to speak at meetings and consult with community leaders about the work of the Joint Distribution Committee.

In the field of education Warburg was, in 1943, a member of the Visiting Committee on Testing and Teaching of the Middlesex School at Concord, Mass., a member of the Board of Governors of the Hebrew University in Jerusalem, and chairman of the Executive Committee of the American Friends of the Hebrew University. He held office in that year in numerous other philanthropic and welfare organizations.

Paul F. Warburg

In February, 1942, Warburg enlisted as a private in the United States Army, later being commissioned a second lieutenant.

FANNY R. ADLERSTEIN.

FRITZ M. WARBURG, banker (b. Hamburg, Germany, 1879), was the brother of Aby M., Max M., Felix M., and Paul M. Warburg. Originally he was destined for the career of jurist, but in 1906, after he had passed his first juridical examination and after his brother Paul had gone to the United States, he himself joined the Warburg banking firm first as a confidential clerk and then (1907) as a partner. He had charge principally of credit and of organizational and personnel problems. He also directed the merchandising department of the firm, and was president of the association of firms dealing in metal wares.

Warburg remained in Germany until 1938, and during the last years of his residence there he devoted his energies even more than previously to the affairs of the Jewish community. He was president of the Jewish hospital in Hamburg.

Edward M. M. Warburg

Otto H. Warburg

WARBURG, EMIL, physicist, b. Altona, Germany, 1846; d. Bayreuth, Germany, 1931. He received the Ph.D. degree from the University of Berlin (1867). Warburg served as assistant professor at the University of Strasbourg (1872-76), then taught at the University of Freiburg, and in 1895 was appointed associate professor at the University of Berlin. From 1905 to 1922 he headed the Physikalisch-Technische Reichsanstalt at Charlottenburg.

His researches included investigations in acoustics, the kinetic theory of gases, electrolysis, galvanic polarization, and electric currents in gases. His *Lehrbuch der Experimentalphysik für Studierende,* published first in 1893, had its twenty-fourth edition in 1933. He wrote also *Über die Wärmeeinheit* (1900). Warburg, baptized, was the father of Otto Heinrich Warburg.

LEON L. WATTERS.

Lit.: Grüneisen, E., in *Annalen der Physik,* 5th series (1931), vol. 11, No. 5; Franck, James, in *Die Naturwissenschaften,* Year 19 (1931) 993-97.

WARBURG, KARL JOHAN, historian of literature, librarian, and Swedish deputy, b. Gothenburg, Sweden, 1852; d. Stockholm, Sweden, 1918. Warburg, who occupied a central place in Sweden's cultural life, was appointed lecturer at the University of Upsala in 1876. In the following year he became a lifelong contributor to Sweden's leading liberal newspaper, *Göteborgs Handels- och Sjöfartstidning.* In 1891 he was appointed professor at the University of Gothenburg, and in 1906 he took over at the University of Stockholm the chair which the death of Oscar Levertin had left vacant. At one time he had to give up lecturing due to pressure of work as librarian of the Nobel Library of the Swedish Academy. He was also active in furthering the Stockholm municipal library. Warburg was a member of the Swedish Parliament (1905-8).

Besides minor writings, dealing with the history of Swedish literature, he published a number of biographies of Swedish and foreign authors. Major works, dealing with Swedish literature and art, are: *Det svenska lustspelet under frihetstiden* (1876); *Från vår konstvärld* (1884); *Svensk litteraturhistoria i sammendrag för skolar och självstudium* (1880); and, together with Henrik Schück, *Illustrerad svensk Litteraturhistoria* (2 vols., 1896-97; 2nd ed., 5 vols., 1912-16; 3rd ed., 7 vols., 1926-32). In 1899 he published *Velasquez och hans konst* (Velasquez and His Art). The

Otto Warburg

first edition of an anthology of Swedish poetry, *Ur svenska sången,* appeared in 1883; subsequent editions were published in 1905 and 1910. Shortly after his death a collection of his essays appeared in print.

Lit.: *Salmonsens Konversations Leksikon; Aschehougs Konversations Leksikon; Winkler Prins Algemeene Encyclopaedie;* Valentin, H., *Judarnas Historia i Sverige* (1924).

WARBURG, OTTO, botanist and Zionist leader, b. Hamburg, Germany, 1859; d. Berlin, 1938. After completing his studies in Hamburg, he devoted himself to the study of tropical plants, for which purpose he journeyed through southeastern and eastern Asia from 1885 to 1889. In 1891 he became instructor in botany at the University of Berlin, and at the same time taught in the university's Oriental Seminary, in which he received a professorship in 1897. His principal works in botany are: *Die Kautschukpflanzen und ihre Kultur* (1900); *Kulturpflanzen der Weltwirtschaft* (1907); *Die Pflanzenwelt* (3 vols., 1913-22).

In 1900 Warburg became active in settling a group of Roumanian Jews in Asia Minor, and from that time on began to aid the work of colonization in Palestine. He was a delegate to the Sixth Zionist Congress, and from 1904 to 1906 one of the editors of *Altneuland.* From 1911 to 1920 he was president of the World Zionist Organization. He was known chiefly for his promotion of practical work in Palestine, such as the fund for olive trees (1904), the Bezalel School (1905), the Palestine Land Development Company (1908), the Gesellschaft für Palästinaforschung (1910), the Palestine Banana Corporation (1927) and the Palestine Grapefruit-Orange Company (1929).

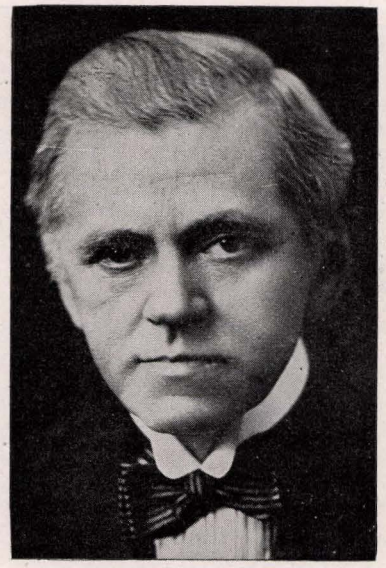
In 1911 Warburg founded the first Zionist agricultural experiment station at Athlit, and he was later director of the station at Tel-Aviv (later Rehovoth). He worked for the founding of the Hebrew University, and served for many years as director of its Institute of Natural History. In 1929, on the occasion of his seventieth birthday, Warburg Wood was created by the Hebrew University in his honor, and stocked with representative plants and trees of Palestine and the neighboring countries.

WARBURG, OTTO HEINRICH, biochemist and Nobel Prize winner, b. Freiburg in Breisgau, Germany, 1883. He was a son of Emil Warburg and, like his father, was baptized. Otto Heinrich Warburg

studied at the Universities of Berlin (Doctor of Chemistry, 1906) and Heidelberg (M.D., 1911), and served in the first World War in the Prussian Horse Guards. In 1918 he became a member of the Kaiser Wilhelm Institut für Biologie at Berlin-Dahlem, and in 1930 director of the Kaiser Wilhelm Institut für Zellphysiologie there. In the same year he received a gift from the Rockefeller Institute which aided him in his researches. In 1931 he was awarded the Nobel Prize in physiology and medicine.

According to the 1942 edition of the British *Who's Who,* Warburg was still in Germany in that year. He was widely regarded, at the peak of his career, as the foremost living biochemist.

Warburg's researches dealt chiefly with the chemical and physical examination of living cells. His writings include *Über den Stoffwechsel der Tumoren* (1926; English trans., 1931) and *Katalytische Wirkungen der lebendigen Substanz* (1928).



Lit.: *Chemiker Zeitung,* vol. 55 (1931) 955; *Journal of Chemical Education,* vol. 9 (1932) 173-75; Poggendorf, J. C., *Biographisch-literarisches Handwörterbuch zur Geschichte der exacten Wissenschaften,* vol. 6 (1939) 2806-7.

WARFIELD, DAVID, actor, b. San Francisco, 1866. His first appearances were in San Francisco in 1889, and although he was still only vaguely aware of what he hoped to achieve on the stage, he came to New York city in 1890. Here he made slow progress in various variety houses, and finally became part of the Weber and Fields Music Hall in 1898, remaining until 1900. Warfield's forte was the portrayal of Jewish characters; his earliest depictions were of a humorous nature, but with sympathy underlying the burlesque.

David Belasco gave Warfield the opportunity to turn his Jewish characterizations to serious use with the production of *The Auctioneer* (1900). Warfield played the leading role in this drama for three years, and became identified with the dramatic and sentimental Jewish hero. Later he grew even more famous, throughout the whole country, as the hero of *The Music Master,* in which he appeared from 1903 to 1907 and in a revival in 1917 to 1918. Among his other plays were *A Grand Army Man* (1907) and *The Flying Dutchman.* His old ambition to play Shylock was fulfilled when Belasco produced *The Merchant of Venice* for him in 1922. Both Warfield's interpretation and Belasco's production were unorthodox and roused controversy; Warfield was criticized for softening the character. The incident precipitated Warfield's retirement from the stage.

In 1942, to commemorate his seventy-fifth birthday (which occurred in November, 1941), Warfield was given a gold medal by the New York Academy for "distinguished service to the theatre."

WARNER, a family of brothers, motion picture producers and distributors. The original association included the four brothers Harry Morris Warner (b. Poland, 1881), Albert Warner (b. Poland, 1883), Samuel L. Warner (b. Baltimore, 1887; d. Los Angeles, 1927), and Jack Leonard Warner (b. London, Ontario, Canada, 1892). Their father, Benjamin Warner, emigrated to the United States from Poland about 1887, and settled first in Baltimore. The boys were educated in the public schools of that city and later of Youngstown, Ohio, where the elder Warner started a small shoe-repairing shop in 1892. Part of a large family, the boys had to begin making their own livelihoods at an early age, and rapidly gained experience of various jobs. It was during the bicycle-craze period of the early 1900's that Harry opened up a bicycle shop in Youngstown, into which he drew Albert also.

David Warfield

By that time, however, Harry had already noted the possibilities of motion pictures, and in 1903, together with his brothers, he took over a ramshackle little store in New Castle, Pa., and turned it into the ninety-nine-seat Cascade, first theatre of the Warner brothers. Among the features presented were the screen-illustrated songs rendered by Jack Warner. Soon they expanded into the Duquesne Amusement and Supply Company of Pittsburgh, one of the earliest of film exchanges. They prospered moderately until, in 1910, a combine of distributors squeezed them out of business. They tried a new film sales company, and in 1913 went into producing, under the name Warner Features.

Unfavorable conditions forced the four brothers out of their own business and apart. Under the energetic initiative and direction of Harry M. Warner, who believed that families should unite and work together and develop through a policy of united effort, the brothers again joined forces in 1918, to produce James W. Gerard's book *My Four Years in Germany* as a feature-length picture. As an exposé of the German military machine, this film became a propaganda weapon to make Americans war-minded.

The Warner brothers were hailed as pioneers. Emphasizing pictures of more than the usual two-reel length, and producing films from successful novels and plays, the brothers made rapid progress under the firm name of Warner Brothers Pictures. That year they brought over the famed French director Ernst Lubitsch. In 1924 they produced *Beau Brummel,* with John Barrymore, the first of that actor's romantic full-length characterizations in the motion pictures.

Samuel L. Warner was the first to sense the possibilities of sound as applied to motion pictures. After Harry witnessed a demonstration of the new device, Warner Brothers acquired the Vitaphone and produced the *Jazz Singer,* the first full-length sound picture, in 1927. The première of this historic film in New York city, however, coincided with the death of Samuel L. Warner in Los Angeles.

Prior to their entry into sound, Warner Brothers had, in 1925, acquired Vitagraph Inc., which operated thirty-four exchanges in the United States and Canada; and two other concerns with foreign exchanges. The brothers also bought the name and various assets of First National Pictures. In that same year (1925) they bought thirteen theatres, and in 1928 they took over the majority stock of Stanley Company of America, owning 182 theatres and controlling stock in other companies which owned more than fifty theatres in the Middle Atlantic states and the District of Columbia. In 1943 Warner Brothers Pictures, Inc., together with its numerous subsidiaries, were operating more than thirty first-run theatres and more than 500 secondary theatre houses in the United States. They had more than

Jack L. Warner

Harry M. Warner

thirty-five exchanges in the United States and Canada, and were represented by branches in leading cities of Latin America, Europe, Australia, Africa and Asia. In Palestine they had an office in Tel-Aviv.

Warner Brothers were the first to make the realistic, carefully documented gangster film which came to be representative of one of the most perfectly polished products of the American screen. In this series the famous *Little Caesar* (1930), with Edward G. Robinson, was followed by *Public Enemy* (1931), with James Cagney. Much later (1941) they produced the masterly *Maltese Falcon* in the same genre. Another type of production in which they led was the large spectacle musical comedy, notably *42nd Street* (1933).

Outstanding literary productions of their studios, however, were generally considered to be the series of biographical pictures projected as significant social documents. The most famous of these included *Disraeli,* with George Arliss (1929), and the series with Paul Muni: *The Story of Louis Pasteur* (1935); *The Life of Émile Zola* (1937); and *Juarez* (1939). The Warner brothers, and particularly Harry M. Warner, president of the firm, expressly stated their belief in motion pictures as a potent educational and liberalizing instrument among the people.

In the period of the second World War, Warner Brothers again came to the fore with their production of *Confessions of a Nazi Spy* (1941) as a revelation of the activities of the Gestapo in the United States. Also, the brothers sponsored the production of a series of patriotic short subjects made in color. The three-reel picture *Haym Salomon,* personally favored by Harry M. Warner, received the award of the Motion Picture Academy of Arts and Sciences in 1939. Patriotic productions of 1942 and 1943 included *Yankee Doodle Dandy, Casablanca* and *Air Force.*

Perhaps the most momentous among Warner Brothers productions in this category was *Mission to Moscow* (1943). Based on former Ambassador Joseph E. Davies' revealing diplomatic diary bearing that title, the film was hailed as a potential instrument of unifying force in United Nations aspirations. It was released coincidentally on the eve of Davies' special mission to Russian Prime Minister Joseph Stalin (May, 1943) as personal envoy of President Franklin D. Roosevelt at a suspenseful stage in the second World War.

During the same month Harry Warner warned publicly against the "sabotage" tactics of those who would arbitrarily exclude "war films either to satisfy a small appeaser element or for personal reasons without regard to the general public interest."

During the first World War Albert Warner was a major in the R. O. T. C. Jack L. Warner, vice-president in charge of production, who had served as chairman of the NRA Board of the State of California (1933), was appointed a lieutenant colonel in the United States Air Corps (1942) and assigned as a public relations officer at Los Angeles.

The Warner brothers, brought up by an observing father, retained their contacts with Jewish life. To the Jewish community of Youngstown, Ohio, they gave a synagogue as a memorial to their father. Harry M. Warner was made a trustee of the Montefiore Hospital of New York city and of the Hebrew Orphan Asylum of that city, to which the brothers donated a gymnasium, as a memorial to Samuel L. Warner and another brother, Milton. In memory of a son, Lewis J. Warner, Harry M. Warner erected an auditorium at the Worcester (Mass.) Academy. The Warner memorial murals, by the artist Hugo Ballin, depicting the history of the Jews in three lunettes and in an octagonal panel circumscribing the entire interior, were presented to the Wilshire Boulevard Temple (Congregation B'nai B'rith), in Los Angeles, by Albert, Harry M. and Jack L. Warner in memory of their brothers, Milton and Samuel L. Warner, and of their parents, Benjamin and Pearleah Warner. SHERRY ABEL.

WARSAW, capital of the Polish Republic until 1939, and occupied in September, 1939, by Nazi Germany. Its population at the outbreak of the second World War in 1939 was estimated at 1,289,000, of whom about 370,000, or about 29 per cent, were Jews.

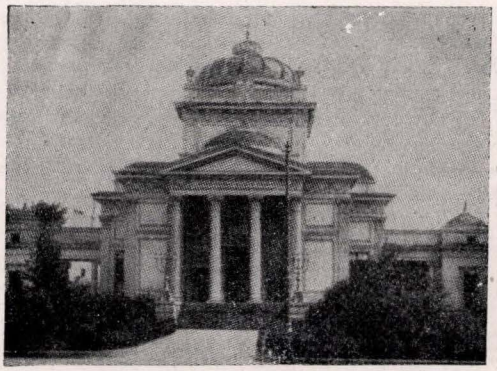
The first mention of Jews in Warsaw is found in the 14th cent. The oldest known record of a Jew in Warsaw concerns a financier called Lazarus. Another notice mentioned the existence in 1430 of a Judengasse (Jewish Street). It is estimated that in 1422 Warsaw had 120 Jewish inhabitants. In 1453 the Jews were all driven out of the city and their houses, synagogues and cemeteries were either sold or given to the Christians. From then on the city had the privilege "De Non Tolerandis Judaeis," which was ratified by the Polish king, Sigismund I, and confirmed by the later kings. Toward the end of the 16th cent., when Warsaw became the official capital of the Polish kingdom, the senators and delegates to parliament brought Jews in their retinues along with them. These Jews were not allowed to remain in Warsaw after the closing of parliament, but they were permitted to trade and live in Warsaw for the duration of the sessions of parliament, also two weeks prior to their opening and two weeks after their closing. However, many Jews benefited by that permission and took up permanent residence in the city. In the 18th cent. several hundred

Jewish Academic House in Warsaw

Jewish families settled in Warsaw by paying a special tax to the crown's land marshal, Lubomirski, who was the commander-in-chief of the city.

Two Polish magnates, Potocki and Sulkowski, founded two small Jewish towns, called Nowy-Potok and Nowa-Jerozolima (New Jerusalem), at the outskirts of the city of Warsaw, which developed into important commercial centers. The Christians resented it and asked for the removal of the Jews. Lubomirski ordered the two Polish magnates to withdraw their Jewish protégés from the outskirts of Warsaw. When this command was ignored, Jewish buildings were razed, their businesses destroyed, and in 1775 the Jews were driven far away from the boundaries of the city. In 1788, when the so-called Four Year Parliament convened, the Jews received official permission to settle in Warsaw. The Polish merchants and guild draftsmen protested and brought the matter to the city council. When they did not receive satisfaction disturbances occurred in 1790 in which many Jews were severely beaten and their stores robbed. As a result, the parliament set up a commission to investigate the riots, and at the same time the Jews were formally allowed to return to Warsaw. When, in 1794, during the Kosciuszko insurrection, the city was besieged by the Russians, Berek Joselewicz formed a Jewish regiment to resist the Russians; this Jewish regiment was, however, soon annihilated. When the Russians occupied Warsaw they permitted the Jews to remain in the city.

At the end of the 18th cent. there was a great influx into Warsaw of German Jews who soon became quite influential. The constitution of the Duchy of Warsaw set up by Napoleon granted citizenship and civic and political rights to the Jews. However, due to the activities of influential members of the Polish nobility as well as of the Hasidic Jewish elements, the duke of Warsaw, in 1808, suspended Jewish citizenship rights for a period of ten years, allegedly to give them time to show themselves worthy of this privilege. Soon after the Jews were driven off several streets, and since they were not taken into military service, they were assessed a high military tax. After the downfall of the Duchy of Warsaw further restrictions were enacted and Jews were eliminated from more streets in the city.



The decree of 1861 gave the Jews the electoral franchise in the local community council. In 1862 Jews were allowed the freedom to reside, do business as well as acquire property in Warsaw. Many Jews participated in the uprising of 1863 against the Russians, some of whom paid with their lives while others were banished to Siberia. The Jews also suffered greatly from reprisals after this unsuccessful uprising.

A great influx of Russian Jews to Warsaw occurred at the end of the 19th and at the beginning of the 20th cent., due mostly to the pogroms in Russia. While in 1864 there were 72,000 Jews in the city, in 1882 there were 130,000 and by 1910 the number of Jews in Warsaw was already 306,000, or about 40 per cent of the total population. The movement of "organic work" which followed the 1863 insurrection brought many Poles into commercial and industrial occupations. The rising middle-class in Poland came into direct competition with the Jews, and as a result anti-Semitism spread in the cities and the anti-Jewish agitation became very strong in Warsaw. During the 1911 elections to the Russian Duma, when the Jews of Warsaw supported the Labor candidate, Jagielo, against the candidate of the anti-Semitic National Democratic Party headed by Roman Dmowski, an anti-Jewish boycott movement of great proportions developed in the city.

During the first World War, the Polish Jews suffered a great deal. Thousands of Jewish refugees came to Warsaw and increased the difficulties of the Jewish population there. After the defeat of the Central Powers and the establishment of the Polish Republic, Jews were recognized and were given equal rights. During the independent existence of the Polish Republic, Warsaw became the capital of a country of about 35,000,000 inhabitants. A great influx of Jews into the capital manifested itself, and all the national Jewish organizations transferred their headquarters to the city of Warsaw. Jewish cultural and social life was very intense, and several Jewish dailies were published in Warsaw. Jewish schools and many cultural and social institutions functioned in the capital city, and Jewish deputies were elected to the parliament from the city of Warsaw. However, the loss of the great Russian market and the economic discriminations against the Jews had greatly affected the economic position of the Jewish population of the city.

When the Nazis attacked the Polish Republic on September 1, 1939, and launched the second World War, the Polish Army crumbled in a few days. But the city of Warsaw resisted against tremendous odds the onslaught of the German armies, and for three weeks, in spite of constant bombardment, refused to surrender. It finally had to yield because of hunger and lack of water. The Jews played a very active role in the defense of Warsaw, and many Jewish-owned homes and businesses were destroyed by German bombs.

After the occupation of Warsaw the martyrdom of the Jewish population under Nazi rule began. The Jews were told to wear special badges, and thousands were put into forced labor battalions or sent into forced labor camps. The Jews were soon expropriated of their factories and business establishments. Jewish children were eliminated from the general schools, and no Jewish schools were permitted to function. The preparation of the Warsaw ghetto went on for the better part of 1940. A wall eight feet high was built around the Jewish district, and the Jews were ordered to move into the ghetto before November 15, 1940. In October, 1940, about 100,000 Jews lived outside of the Jewish district, while about 80,000 Poles had their residence within the section reserved for the Jews. Within a few weeks 180,000 persons were compelled to move: Jews into the ghetto, Poles out of the ghetto.

Administration building of the Warsaw Jewish Community prior to the Nazi invasion

Jews in Warsaw were compelled by the Nazis to wear yellow triangles on their backs and walk in the gutters. From a photograph smuggled out of Poland

The ghetto as it was finally set up covered an area of about 1,000 acres, or about 100 square city blocks. Not only were all persons of the Jewish faith forced into the ghetto but also converts and Christians of Jewish descent. The Nazis also drove into the ghetto non-Jewish wives who refused to divorce their Jewish husbands. In the center of the ghetto there was a Catholic church, and all the people in the church, including the priest, wore Jewish badges. The German, Bohemian and Moravian Jews living in Warsaw were also compelled to move into the ghetto.

The Jewish Community Council was ordered to organize a special Jewish militia. The militia was charged with keeping order within the ghetto, watching at the gates of the ghetto walls and checking the permits of persons entering and leaving. There were twenty-two entrances from the other sections of the city into the ghetto. On one side of the walls there were German and Polish policemen, and on the other side was the Jewish militia. Only Jews who could prove absolute necessity for leaving the ghetto received permits to do so. The penalty of death was applied to those who left the ghetto without such permits.

The German administration imposed several tasks upon the Jewish Community Council. The Jewish Community Council in Warsaw became, under the Nazis, a center of Jewish economic, social and cultural life. It was set up by the Nazis as a convenient instrument to carry out every wish of the Nazi authorities. The ghetto system which the Nazis called "an autonomous Jewish regime" was, in fact, rather a concentration camp into which Jews were dumped by the hundreds of thousands.

Immediately after the occupation of Warsaw, the Germans ordered the Jewish Community Council to take a census of the Jewish population, and of the social composition of the Jews of Warsaw. The census taken in November, 1939, showed that there were 370,000 Jews in Warsaw. By the middle of 1942, owing to the expulsion of Jews from Germany, Bohemia and Moravia, also from the annexed areas and small towns of the Government General, the number of Jews in the Warsaw ghetto reached about 500,000. The social structure of the Jews, according to the official census taken in November, 1939, by the Warsaw Jewish Community Council, was as follows:

Of the 370,000 Jews of Warsaw, 173,000 were economically active; of these 87,000, or 47%, were in handicrafts; 41,500, or 24%, in commerce; 8,900, or 5%, in industry; and 41,000, or 24%, in other professions. The great majority of the economically active Jews were workers and employees. In industry, 99.5% worked for a salary, in handicrafts 73% and in commerce 41%.

The situation in the ghetto grew from bad to worse. A substantial section of the population was completely unemployed and had to appeal to charity. The Jewish food rations were only half of the Polish rations, and only twenty-five per cent of the food the Germans were receiving. The health situation was deplorable, and the death rate was constantly increasing.

But even this did not satisfy the Nazis, who were bent upon the destruction of the Jews in Europe. On July 22, 1942, an order was issued aiming toward the liquidation of the Warsaw ghetto and toward the deportation of the Jews to the East. The head of the Jewish Community Council, Adam Czerniakow, refusing to cooperate with the Germans in the deportation of Jews from the Warsaw ghetto to an unknown destination, committed suicide. According to reliable reports the deportation was progressing rapidly.

By the end of 1942 the majority of the Jews of Warsaw seemed to have been already deported to the East, and it is likely that most of them perished.

SIMON SEGAL.

In April, 1943, it was reported that only about 40,000 Jews still remained in the Warsaw ghetto, with hunger and typhus prevalent. Later on in that month additional mass executions of Jews by the Nazis were reported to have occurred; 35,000 Jews were slaughtered by the Nazis during that period. A large number of able-bodied Jews attempted to defend themselves from Nazi attacks within the ghetto walls. Reports received by the Jewish Anti-Fascist Committee from underground groups in Poland stated that on April 18th, and continuing for some five weeks thereafter, the Jews of the Warsaw ghetto rose in armed revolt against Nazi extermination troops coming to take them to the slaughter centers. Bands of Jewish rebels, supplied with arms by Polish guerrillas, stormed the Paviak prison, released large numbers of political prisoners, and were finally driven back by Nazi troops employing artillery, tanks and bombers. Heavy fighting broke out between the desperate Jews and the Nazi troops in the ruined Nalevki district, on Muranov Square, and on Lang Street, adjacent to the ghetto gates, with Polish guerrillas aiding the Jews against the Nazis.

Earlier uprisings of the Warsaw ghetto Jews were reported to have been made on several occasions beginning with December, 1942, but on a smaller scale. In the first such revolt many Jews being rounded up for deportation attempted to attack Nazi guards with spades and axes. In January, 1943, the Jews staged a large demonstration in the ghetto streets, demanding that they be given food, of which they had been deprived as penalty for their December revolt. On March 17th Jews firing rifles from behind ghetto street barricades killed fifty Nazi soldiers attempting to enter the ghetto; as a result, the Nazi governor of Warsaw gave orders for the complete destruction of the ghetto.

Late in April, 1943, the Jews of the Warsaw ghetto were reported to have sent out a message to the Jews of Palestine and America asking urgently for food and arms with which to continue their resistance to the Nazis. According to an underground report, Hillel Zeitlin and Ignace Shiper were killed in the course of the intense ghetto fighting which lasted for five weeks.

W., *The Jewish Community* (3 vols., 1942); United States Office of War Information, *Tale of a City* (1943).

WARSHAW, JACOB, educator, b. London, 1878. He studied at Harvard University (A.B., 1900), the University of North Carolina (M.A., 1902), the University of Paris and the University of Missouri (Ph.D., 1912). He was instructor of modern languages at the University of North Carolina (1900-1), teacher and superintendent of schools in Puerto Rico (1903-7), and associate editor of the *Porto Rican Review* (1908). In 1909 he joined the Romance language department of the University of Missouri, becoming successively assistant professor (1912), associate professor (1917), professor of Spanish (1924) and head of the department of Spanish (1925), in which capacity he was still serving in 1943.

Warshaw wrote or edited a number of textbooks for students of Spanish, including: *Spanish-American Composition*

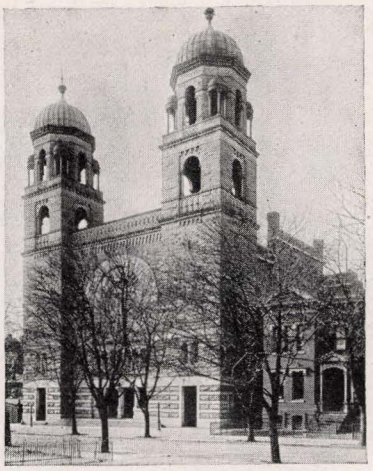
Book (1917); *Elements of Spanish* (1923); *Careta verde* and *El Señor Gobernador* (1928); a translation of Pereda's *La Leva* (1933). From 1938 to 1940 he was associate editor of *Hispania*. Warshaw was made a knight of the Order of Isabella the Catholic in 1933.

WARSHAWSKY, ABEL GEORGE, artist, b. Sharon, Pa., 1883. He received his earlier education in art at the Cleveland School of Art, afterward going to Paris, where he became familiar with French traditions of drawing and painting at the National Academy of Design. At a later date the French government did him the honor of purchasing his canvas entitled *The Mountains of Providence,* while in 1931 another of his pictures was acquired by the city of Paris and placed in the Petit Palais. But the highest compliment paid him by France was not for artistic achievement. It was for his services as physical instructor in the French Army for a period of a year and a half during the first World War that he was made (1933) a chevalier of the Legion of Honor.

In various American museums, notably those of Cleveland and Minneapolis, as also in many private collections, Warshawsky's paintings make evident the thoroughness of his artistic training and his original talent. His work, which was exhibited at the Pennsylvania Academy, at the Corcoran Galleries, at the Carnegie Institution, at the National Academy of Design in New York city, as well as in salons of Paris, is never eccentric or flamboyant. Critics have found in his canvases the influence of Monet and of Pissaro. Warshawsky's paintings have that clarity of color characteristic of many of the Impressionists.

In such canvases as *Bridge at Avignon* and *Bay of Carmel* he shows his great skill in the treatment of water. Among his notable scenes of Paris one recalls *Autumn Morning—Luxembourg Gardens* and *Avenue Observatoire,* while his *Joanne* and *Jack Raper—Newspaperman* give evidence of Warshawsky's excellence in the field of portraiture. *House of Balzac,* where Warshawsky's friend, the painter Gilbert White, lived, and *Bustle—New York* are other important canvases.

One of Warshawsky's memorable exhibitions in New York was held in 1938 at the Reinhart Galleries, under the direction of James O'Toole.



GEORGE S. HELLMAN.

WARSZAWIAK, HERMANN, missionary adventurer, b. Warsaw, Poland, 1865. After leaving Poland in 1888 to escape military service and Hamburg to escape a charge of theft a year later, he came to Breslau, where he was baptized by a Scotch Presbyterian mission. He went to Edinburgh to study for the ministry, but was hounded because of his German police record, and so came to New York city in March, 1890. Here be became the protégé of influential Presbyterians, and was engaged as missionary to the Jews by the New York City Mission and Tract Society. A powerful orator, he attracted large crowds by his preaching, and he was able to collect large sums of money for his mission, which he squandered.

Eventually his sponsors were convinced that he was a fraud and dismissed him in 1895; the result was a heated controversy in Presbyterian circles. Warszawiak continued to conduct missionary activities of his own, and in 1904 was appointed New York representative of the Dowie Church, but was dismissed ten months later for "lying and financial crookedness." In October, 1905, he abandoned his missionary efforts as unprofitable and entered the grocery business.

Lit.: A complete record of Warszawiak's missionary history is to be found in *A History of Christian Attempts to Convert the Jews of the U. S. and Canada,* by David Max Eichhorn (manuscript, Hebrew Union College Library).

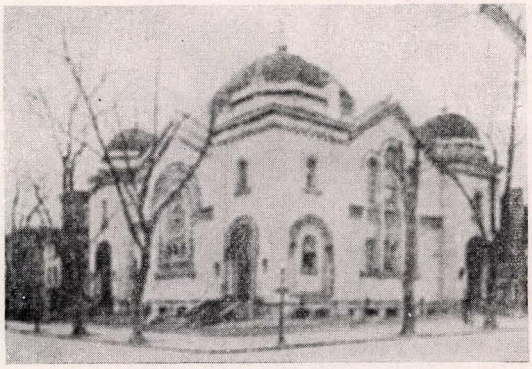
Temple of the Washington Hebrew Congregation



WASHINGTON, a city in the District of Columbia, and the capital of the United States, situated on the east bank of the Potomac River. In 1943 it had a Jewish population of 18,350, out of a total population of 663,091 (census of 1940). In 1930 the Jewish population of Washington was estimated at about 16,000.

The exact date of the arrival and settlement of the first Jews in the nation's capital is unknown, but it is certain that at least two dozen of them were residents there and in Georgetown in 1847. One of the first Jewish residents in Washington in that year was Moritz (Morris) Fischer. The entire group consisted of young men and women from Southern Germany. In 1849 they were followed by six Jewish families from Hungary. All of them, having neither synagogue nor organization of any kind of their own, went to Baltimore, forty miles away, for the celebration of the high holy days.

The first Jewish organization effected in the city was the Washington Hebrew Congregation, with twenty-one members, who met on April 25, 1852, in the home of W. Jacobi on Pennsylvania Avenue, between 19th and 20th streets. In the absence of rabbi or reader, the services were conducted by the members in rotation. Three years later the roster of the congregational members contained fifty-five names.

The first records of the congregation mention the following for the year 1852: president, Solomon Primbram; vice-president, Jacob Saqui; treasurer, Jonas Gluck; secretary, Albert Horwitz.

The emergence of this congregation brought the pioneer Jews of the city face to face with a comparatively easy struggle for economic and religious equality. Up to 1855 the local laws granted property privileges only to Christians. During the presidency of Franklin Pierce (1853-57) a charter was secured from Congress on December 3, 1855, which stated that "all the rights, privileges and immunities hitherto granted by law to the Christian churches in the city of Washington, be, and the same hereby, are extended to the Washington Hebrew Congregation of said city. . . ." Captain Jonas P. Levy, who had won his spurs before coming to the city, was largely instrumental in obtaining the charter. During his seven years' residence he was the unofficial representative of the Jews of the country. Even before the charter had been secured, Sam Herman had been engaged as the first rabbi of the congregation; he served from 1854 to 1855.

Adas Israel Synagogue, Washington, D. C.

Two incidents of the next few years stood out in the life of the early Washington Jewish community. Agitation on the subject of slavery drew sharp party lines. A deadlock lasting for several weeks prevented the election of the Speaker of the House of Representatives. In the thought that prayer is of avail in Israel, the little congregation was invited to send its rabbi to open the session with prayer. Through the intercession of Adolphus S. Salomons, Rabbi Morris J. Raphall, of New York city, who afterward gained a certain renown by his defense of slavery, was invited to come. He appeared in Tallith (prayer-shawl) and gown, and it was said that his prayer on February 1, 1860, made possible the election of the Speaker. The second incident about the same time is associated with the presentation of a Sefer Torah and a celebration held in Finkman's Hall. It is reported that Judah P. Benjamin, United States Senator from Louisiana, had the honor of holding the Scroll of the Law.

The first permanent home of the Washington Hebrew Congregation was acquired through the purchase, in September, 1863, of the South Methodist Church, formerly a government hospital, on Eighth Street between H and I streets. Rabbi Isaac Leeser, of Philadelphia, delivered the dedication sermon, and he was followed on the next Sabbath by Rabbi Isaac Mayer Wise. In 1865 special memorial services for Abraham Lincoln were conducted in the synagogue by Leeser. A brick structure soon replaced the frame building. Washington Hebrew Congregation joined the Union of American Hebrew Congregations (Reform) in 1875, only two years after the Union had been founded by Isaac Mayer Wise. In September, 1897, the cornerstone of the Temple which was in use in 1943 was laid, in the presence of President William McKinley and members of his cabinet; it was completed in 1898.

The readers and rabbis of Washington Hebrew Congregation from 1855 on, following Sam Herman, were A. Mela, A. Seldner, S. M. Lansburgh, S. M. Wiel, I. S. Jacobson, Herman Baar, Isaac Stemple, Michael Goldberg, and Louis Stern (1872-1920). Abram Simon became rabbi of the congregation in 1904, and served until his death in 1938. William F. Rosenblum was his associate for several years just before Simon's death. In 1943 the rabbi of the congregation was Norman Gerstenfeld, who began his service in 1938. In 1943 Rabbi Morton Fierman was director of religious education, and many activities of the congregation were centered in the Jewish Community Center, a city-wide project. There were charitable organizations connected with the congregation in the early years of its existence, but these were later absorbed by the Jewish Social Service Agency of Washington, also a city-wide project. In 1943 the congregation maintained a cemetery, which was the first Jewish cemetery in the nation's capital.

The installation of an organ by the Washington Hebrew Congregation and the commitment of the congregation to Reform Judaism some six years before it joined the Union of American Hebrew Congregations led thirty-five members, in 1869, to organize an independent congregation known at first as the Adas Israel Hebrew Congregation. Isaac Stemple left the mother synagogue, and acted as the first reader of the new congregation. Its first officers were: John Boyer, president; Jacob Peyser, vice-president; Morris Cohen, secretary; Raphael Sanger, treasurer; trustees, Sorach Hartong, Isaac Levy, and Morris Cohen. In 1943 the religious tendency of the congregation was Conservative.

From 1869 to 1876 the congregation worshipped in the homes of the various members, or in several small public meeting places, particularly in a loft above a carriage factory located on Pennsylvania Avenue, between 4½ and 6th streets, N.W. A cemetery ground was purchased during this early period. On June 9, 1876, the first synagogue of the congregation, at the corner of Sixth and G streets, N.W., was dedicated, in the presence of President Ulysses S. Grant and the members of his cabinet. In that same year Jacob Voorsanger was elected its first Hazan; his duties included those of cantor, teacher and reader. The first school of Adas Israel Hebrew Congregation was also organized in 1876. In 1877 Voorsanger was succeeded by Adolph Bornstein (1877-79). In 1891 the congregation purchased the building adjoining the synagogue, and remodeled it as a part of the synagogue.

In October, 1899, the Hebrah Kaddisha of the congregation was organized. The cornerstone of the synagogue building at Sixth and I streets, N.W., in use in 1943 was laid in 1906, and the completed building was dedicated in January, 1908. The sisterhood of the congregation was organized in 1898. Cyrus Adler was a member of the congregation in 1907 and 1908, at the time when he was on the staff of the Smithsonian Institution. In 1943 the congregation, known as Adas Israel Synagogue, maintained three Hebrew schools and one Sunday school, and a ladies auxiliary society.

The first rabbi of the congregation was Julius T. Loeb, who served from 1901 to 1908. His successors included Benjamin Grossman (1914-21), Adler Shefferman (cantor, 1914-25), Louis Schwefel (1925-29), Nathan Colisch (1921-30), and the incumbent in 1943, Solomon H. Metz, who came to the congregation in 1931. Louis Novick began his service as cantor of the congregation in 1923. In 1943 the congregation published the monthly *Adas Israel Chronicle*. In March, 1939, the congregation celebrated the seventieth anniversary of its founding.

Congregations in existence in Washington in 1930, in addition to the two mentioned above, included the following Orthodox congregations, which were united in the Agudath Kehilloth: Oheb Shalom (1902), at Fifth and I streets, under the leadership of Rabbi Julius T. Loeb; Mt. Pleasant Congregation (1921), at 14th and Euclid streets (rabbis, M. Goldman and George Silverstone); the Talmud Torah on E Street, S.W. (rabbi, M. A. Horwitz); the Volner Ansche Sfard congregation, on 4½ Street, S.W.; Har Zion Congregation, on Georgia Avenue; the Northwest Georgetown Congregation, on M Street; the Northwest Talmud Torah, B'nai Israel, on Georgia Avenue and Decatur Street; the Northeast Congregation, at Eighth and I streets, N.E.; the Southeast Congregation, on Ninth Street, N.E.; the Hebrew Home for the Aged Synagogue, on Spring Road.

In 1939 the Conservative Agudath Achim Congregation was founded; its rabbi, Herman J. Waldman, was called to the pulpit in 1941 and was still serving in 1943. Its synagogue was built in March, 1940. The congregation in 1943 maintained a Hebrew and Sunday school, and a Torah Vaavodah study circle.

The Jewish Community Center of Washington, D. C.

In 1943 the Orthodox congregations of Washington included also: Congregation Talmud Torah, on B Street, N.E.; Congregation Tefereth Israel, on Euclid Street, N.W. (rabbi, Henry Silverstone); B'nai Israel, on Farragut Street, N.W.; Esras Israel, on Florida Avenue, N.E.; Beth El, on Jefferson Street, N.W. (rabbi, Aaron Volkmann); a second Congregation Tefereth Israel, at Lenrer Place, N.W.; South East Hebrew Congregation, on Nicholas Avenue; Har Zion Synagogue, on Warden St., N.W. (rabbi, Moses Hayim Levinson); North East Congregation, on Fifth Street, N.E.; Ohav Sholom Congregation, at Fifth and High streets, N.W.; Beth Sholom, at Eighth and Shepherd streets (rabbi, Moses Hayim Levinson), and another Bnai Israel Congregation, at 14th and Emerson streets, N.W. (rabbi, Henry Segal). Other Orthodox rabbis serving the Jewish community in Washington in 1943 included Z. Green, Joshua Klavan, M. Blair, J. Dubrow, and Chaim Williamowsky.

The city of Washington, not being an industrial center, never knew the problems of poverty in their acute form. In 1929 the Federation of Jewish Welfare Organizations was formed, comprising the following five institutions (1943): the United Hebrew Relief Society, founded in 1882; the Jewish Foster Home, organized in 1911; the Hebrew Home for the Aged, dedicated on November 25, 1925, with an attractive building located on three and one-half acres of ground; the Jewish Community Center, occupying an imposing structure at 16th and Q streets, and representing the expansion in spirit and activities of the Y.M.H.A. and Y.W.H.A. associations. President Calvin Coolidge delivered the address at its dedication exercises on February 22, 1926; The Juanita K. Nye House, the gift of D. J. Kaufman in memory of his daughter; in 1943 it was maintained and operated by the local section of the National Council of Jewish Women. In addition, the Washington Jewish community, in 1943, had the following organizations and groups: Hebrew Free Loan Society, representatives of the Atlanta Orphan Home, of the Jewish Consumptive Relief Society, and of the National Jewish Hospital at Denver, Kesher Shel Barzel, B'nai B'rith (Argo Lodge, in which were merged the Grace Aguilar and Elijah lodges), sections of the National Council of Jewish Women and of the Council of Jewish Juniors, the Y.M.H.A. and Y.W.H.A., Independent Order Brith Abraham, Workmen's Circle, chapters of Senior and Junior Hadassah, branches of the Zionist Organization, Avukah, Poale Zion and Mizrachi organizations, Rebecca Lodge and Deborah Liberty Lodge.

As a result of the national defense program, the Jewish population of Washington was increasing daily in the latter part of 1942 and in the early months of 1943, with the result that its permanent Jewish population of 18,350 was believed to have been augmented at that time by some 2,000 temporary Jewish residents.

In 1943 the B'nai B'rith (organized in 1843) had its national offices in Washington, to which they were transferred from Cincinnati. It published in Washington *The National Jewish Monthly* (Henry Monsky, editor; Edward E. Grusd, managing editor). In Washington in 1943 were also the national offices of the Aleph Zadik Aleph (B'nai B'rith Youth Organization, organized in 1924), which published *The Shofer*, the *A.Z.A. Guide* and the *A.Z.A. Leader*, and of the B'nai B'rith Americanism Commission (founded in 1921), which issued the *B'nai B'rith Americanism Manual*.

Other periodicals published at Washington in 1943 were the *National Jewish Ledger* (weekly; founded in 1930; K. Cornell, editor) and *The New Palestine* (bi-weekly; founded in 1921; Carl Alpert, editor).

A number of eminent Jews resided or lived in Washington for greater or lesser periods of time, in addition to several Senators and many Congressmen. Louis D. Brandeis (1856-1941) served as associate justice of the United States Supreme Court from 1916 to his retirement in 1939. Benjamin N. Cardozo (1870-1938) served as associate justice of the United States Supreme Court from 1932 until his death. Nathan Cayton (b. Washington, D. C., 1899), the youngest judge ever to serve in the District of Columbia, was in 1927 appointed by President Calvin Coolidge judge of the municipal court in the District of Columbia; in 1931 he was reappointed by President Herbert Hoover, and in 1935 he was again reappointed to this position by President Franklin D. Roosevelt. Benjamin Victor Cohen (b. 1894) came to Washington in 1933, by request of President Franklin D. Roosevelt, to become associate general counsel of the Federal Emergency Administration of Public Works; in 1934 he was appointed general counsel of the National Power Policy Committee, and after 1935 was also special assistant to the United States Attorney General. Mordecai Joseph Brill Ezekiel (b. 1899) came to Washington in 1919, working first with the United States Bureau of the Census (until 1922), as agricultural economist in the Department of Agriculture (1922-28), senior agricultural economist (1928-30), assistant chief economist on the Federal Farm Board (1930-33), and

economic adviser to the Secretary of Agriculture (1933-).

Felix Frankfurter (b. 1882) became associate justice of the United States Supreme Court in 1939, and was still serving in 1943. Ernest Gruening (b. 1887) resided in Washington from 1934, when he became the first director of the Federal Division of Territories and Island Possessions, until 1939, when he was appointed governor of Alaska. Joseph Earle Jacobs (b. 1893) settled in Washington in 1930, becoming first foreign service inspector, and in 1937 chief of the Philippine affairs office of the Department of State. Herbert H. Lehman (b. 1878), former governor of New York State, resigned this office on December 3, 1942, to assume the post of Director of Foreign Relief and Rehabilitation in Washington, by appointment of President Franklin D. Roosevelt. Isador Lubin (b. 1896) lived in Washington several times, returning to the capital in 1933 as United States commissioner of labor statistics, and was still serving in this and other capacities in 1943, especially as a member of the White House staff as special statistician to President Franklin D. Roosevelt.

Eugene Meyer, Jr. (b. 1875) entered the service of the United States government at Washington in 1917, serving first as a member of the War Savings Committee and as adviser on non-ferrous metals and assistant to the Secretary of War on aircraft production. In 1918 he was appointed by President Woodrow Wilson director (later manager) of the War Finance Corporation; later, under President Calvin Coolidge, he reorganized the Federal Farm Loan Board (1927); from 1930 to 1933 he was governor of the Federal Reserve Board, organizing in 1932 the Reconstruction Finance Corporation, and in 1933 he bought the Washington *Post,* which he still published in 1943, acting also as a member of the National Defense Mediation Board from 1941 on, by appointment of President Franklin D. Roosevelt. Henry Morgenthau, Jr. (b. 1891) went to Washington in 1933, as chairman of the Federal Farm Board, and in that same year was appointed by President Franklin D. Roosevelt the first governor of the Farm Credit Administration; in January, 1934, after two months as under secretary of the Treasury, Morgenthau was appointed Secretary of the Treasury, and still held this position in 1943. Julius L. Peyser (b. Washington, 1875), noted lawyer of the national capital, was appointed professor of equity practice and judge of the equity moot court at the National University Law School in 1917, and still held these positions in 1943.

Leo S. Rowe (b. 1871), after serving in Washington in various capacities, was in 1917 appointed assistant secretary of the Treasury, and two years later became chief of the Latin American Division in the United States Department of State. In 1920 he became director general of the Pan American Union, a position which he still occupied in 1943. Israel Schapiro (b. 1882) was appointed chief of the Semitics Division of the Library of Congress, when the latter was created in 1913 by act of Congress, and was still serving there in 1943. Frederic William Wile (1873-1941), after the end of the first World War, became head of the Washington bureau of the Philadelphia *Public Ledger,* and later founded the Frederic William Wile News Service.

Simon Wolf (1836-1923) lived in Washington from 1862, when he opened a law office in the city, until his death. Wolf served as chairman of the Board of Delegates of Civil and Religious Rights from 1878 to 1906, when the American Jewish Committee was formed. On many occasions he acted on behalf of American Jewry, and often the government itself consulted him on matters concerning Jewish interests. Wolf served as Recorder of Deeds for the District of Columbia from 1869 to 1878, by appointment of President Ulysses S. Grant. President Rutherford B. Hayes (1877-81) appointed him a municipal judge in the District of Columbia, and in 1881 President James A. Garfield appointed him consul general to Egypt; Wolf served in this position for one year, and then resumed the practice of law in Washington. He was for many years president of the Washington Hebrew Congregation. ABRAHAM I. SHINEDLING.

WASHINGTON, a Pacific state, situated in the extreme northwest of the United States, with a population of 1,736,191 (census of 1940), including an estimated 18,000 to 20,000 Jewish inhabitants, in 1943. Originally part of the Oregon Territory, the Territory of Washington was established in 1853; in 1889 Washington was admitted to the Union as a state. The pioneer Jew of the region was Sigmund Schwabacher who, arriving some time in the 1850's, established a grocery business in 1862 at Walla Walla, then a main post on the trail that led from the East to the North Pacific coast. In 1869 he opened the wholesale grocery firm of Schwabacher Brothers and Company, at Seattle. Oldest wholesale house in the state, it was still in existence in 1943. The firm erected the first brick building of Seattle.

Jews came into the territory from the communities of Victoria, British Columbia, and Portland, Ore. Before 1868 they were settled in Port Townsend. Here a Jew and a veteran of the Civil War, Colonel Henry Landes, was mayor in the early days of the community. Other Jews held public office in the pioneer communities.

Most notable was Brigadier General Edward S. Solomon, hero of the Civil War, who was appointed governor of the Territory of Washington in 1870 by President Ulysses S. Grant. Solomon served for four years, gaining great prominence and popularity by his promotion of the industrial and social interests of the region. The family of Isaac Harris settled in Olympia in the 1860's, and his son became mayor of the city. Jews of Olympia purchased a burial ground in 1872. Bailey Gatzert (d. 1893), brother-in-law of Sigmund Schwabacher, was one of the Pacific Coast's best-known men of affairs, president of the Schwabacher wholesale grocery firm, and director of the Gatzert Schwabacher Land Company. He became mayor of Seattle in 1882.

At SEATTLE, where Jews of the community had been holding unorganized religious services for about a decade, the first congregation of the state of Washington, Congregation Ohabath Sholom, was formed in 1887. The first synagogue was built in 1891, but shortly thereafter it was sold. Congregation Ohabath Sholom disappeared, and eventually its membership was reconstituted in the Reform Temple de Hirsch (1899). Prior to that (1892) the Orthodox congregation Chevra Bikur Cholum was organized. Seattle (separately treated in detail in this encyclopedia), whose Jewish inhabitants numbered approximately three-quarters of the total Jewish population of the state, had, in 1943, a highly organized community of strong Reform, Conservative and Orthodox elements supporting their own congregations and educational groups, and together maintaining important institutions for Jewish charitable and philanthropic causes. Seattle's Orthodox Sephardic group was third largest in the country.

SPOKANE, the second largest city of Washington, with a population of 122,001 (census of 1940), included, in 1943, approximately 1,000 Jews, constituting the second largest Jewish community of the state. Spokane's Jewish pioneers included Eugene Michael, L. Rubens, Samuel Hanauer, Jacob Kellner and J. W. Toklas, who were of German origin and were engaged principally as merchants. In 1890 Jews of Spokane organized Congregation Emanu-El, together with a religious school, and built a synagogue in 1892. In course of time this congregation became the Reform Temple Emanu-El, and joined the Union of American Hebrew Congregations in 1935. The first rabbi to serve Temple Emanu-El was Emanuel Schreiber (1891-93). Rabbis A. Farber, Jacob Bloch and David Levine were among his successors. Rabbi Adolph H. Fink, called to the pulpit in 1930, was spiritual head of Temple Emanu-El in 1943. The congregants were then worshipping in the Temple erected in 1928. The Ladies' Benevolent Society, founded in 1890, became the Temple Sisterhood. A Men's Club was founded in 1939.

In 1943 the Spokane Orthodox community maintained Congregation Keneseth Israel, organized in 1901; the auxiliary Daughters of Israel was also an early society. Rabbi Aaron Werner was spiritual head of Congregation Keneseth Israel in 1943.

Spokane Jewry formed a lodge of the B'nai B'rith as early as 1892, and later a woman's auxiliary of the lodge. The Jewish Welfare Association of Spokane was organized in 1915, becoming the administrative agency for the Jewish Welfare Fund, organized in 1936. Spokane also formed an Émigré Committee, and a unit of the American Jewish Congress.

At Spokane, where 90 per cent of the Jewish community was of Eastern European origin, and the rest of German extraction, Jews were mainly engaged in business, in 1943. About 10 per cent were employed as workers in the local industries. Approximately 1 per cent of the Jewish population were occupied in the various professions. A leader of communal life in Spokane in 1943 was Joseph I. Rubens, executive in the Community Chest.

TACOMA included, in 1943, an estimated 700 Jewish inhabitants in its general population of 109,408 (census of 1940). Communal organization began about the same time as in Seattle and Spokane, when, in 1890, the Judith Montefiore Society was organized. Congregation Beth Israel was formed in 1892. A synagogue was erected the following year, and in 1903 Rabbi Montague N. A. Cohen was called to minister to the congregation. He remained for one year, and returned a score of years later to serve again. Among Cohen's successors, after his first occupancy of the pulpit, were Rabbis Raphael Goldenstein and S. Margolis. Rabbi Bernard D. Rosenberg, who was serving the congregation in 1943, came in 1941. In 1922 Reform Temple Beth Israel, which had joined the Union of American Hebrew Congregations in 1912, built a new synagogue, and this Temple still housed the worshippers in 1943.

The Conservative Talmud Torah Synagogue was originally organized as an Orthodox congregation in 1907, and built a synagogue in 1909. In 1936, under the leadership of Rabbi Baruch I. Treiger, the first ordained minister to occupy its pulpit, the congregation was reorganized into a Conservative synagogue. Rabbi Julius DeKoven succeeded to the pulpit in 1942. A new synagogue which had been erected in 1928 still housed the congregation in 1943.

Tacoma Jewry organized a lodge of the B'nai B'rith and an Aleph Zadik Aleph, as well as a section of the Council of Jewish Women. A Workmen's Circle was also founded. The community established a Federated Jewish Fund in the middle 1930's and later the Émigré Committee. Close to a military reservation and army camps, Tacoma became in the second World War a center of Jewish Welfare Board-United Service Organizations activity.

Most of Tacoma's Jewish citizens engaged in the clothing and jewelry business. A few became manufacturers, and some were in retail lumber, scrap metal, and furniture.

From an estimated 145 Jews in the Territory of Washington in 1880, the Jewish population increased rapidly. In 1897 it was reported as totalling 2,800. In 1905 there were approximately 3,500 Jews. By 1917 it had risen to over 9,000, and by 1927 to approximately 15,000. A study of the Jewish population made for 1927 named, in addition to the leading centers of Seattle, Spokane, and Tacoma, fourteen other places with Jewish settlements of from fifteen to more than 150 persons; and thirty-four places having ten or fewer Jews.

In addition to the three leading Jewish communities of Washington, a number of smaller communities were organized for religious purposes. The United States government census of religious bodies of 1936 listed Washington Jewry as maintaining a total of sixteen congregations, all in urban areas. Eight of these congregations reported schools with a total enrollment of 721 youths.

The Hebrew Reform Congregation was organized at ABERDEEN in 1904, and held twice-yearly services. BELLINGHAM formed Beth Israel Congregation, with a daily Hebrew school, a ladies' benevolent society and a society of the Sisters of Israel. EVERETT organized Beth Israel Congregation and Montefiore Congregation, with its ladies' auxiliary. The adjacent communities of ABERDEEN-HOQUIAM laid the cornerstone of Temple Beth Israel in Hoquiam in 1930. The neighboring communities of CENTRALIA-CHEHALIS organized Congregation Adath Israel in Chehalis. In 1943, among the smaller communities, the congregations at BELLINGHAM, OLYMPIA and WALLA WALLA were being served by rabbis. Olympia, with about 100 Jews in 1943, built an Orthodox synagogue. The Grays-Harbor Olympia district of the B'nai B'rith also encompassed Centralia, Chehalis and Aberdeen.

In addition to the welfare funds and associations of the leading communities, the communities of Bellingham, Bremerton, Everett and Port Angelus were included in the Federated Jewish Fund of Seattle. The Centralia-Chehalis Jewish Welfare Fund was organized in 1937. The Aberdeen Jewish Community Fund, including Hoquiam, was formed in 1936.

The Jews of the state benefited generously by the will of Julius Galland of Spokane (d. 1926), who left his estate of approximately $500,000 to philanthropic purposes, four-fifths of it to be distributed among Jewish causes. Under this trust various local enterprises, both Jewish and non-Jewish, were benefited; a Jewish fellowship and scholarship fund was set up at Washington State College in Pullman. In Seattle, the will of Mrs. Bonham (Caroline Kline) Galland (d. 1907) left practically her whole estate of $1,000,000 to be reserved for the care of the aged Jewish of the Pacific northwest in the Caroline Kline Galland Home for the Aged and Feeble Poor, administered under the directorship of executives of Congregation Temple de Hirsch and the Ladies' Hebrew Benevolent Society of the Temple, in Seattle.

The Anglo-Jewish periodical the *Transcript* (formerly the *Jewish Transcript*) was being published in 1943 as a community-owned paper at Seattle, under the trusteeship of local communal leaders, including executives of the Federated Jewish Fund and the B'nai B'rith lodge.

In addition to those already mentioned, numerous Jews of Washington distinguished themselves in the public service of the state and its localities. In the state legislature were David Levin, of Tacoma (1897-1907); J. C. Moegler, of Cathlamet (1899-1906; speaker, 1905; state senate, 1906-7); Harry Rosenhaupt, of Spokane (senate, 1910-12); Max Newman, of Spokane (1912-14); David Cowen, of Spokane (1934-40; state senate, 1942); Sidney W. Wurzburg, of Marcus (1931-32); A. Louis Cohen, of Seattle (1934-42). On the bench were Isaac J. Lichtenberg (superior court, King County, 1889-93); Morris B. Sachs (superior court, Jefferson, Clallam and San Juan counties, 1891); Samuel Edelstein, of Spokane (superior court, 1941); Simon Wampold, of Seattle (municipal court, 1941); Samuel R. Stern, of Seattle and Spokane (superior court, 1925-37). Joseph S. Jacoby was United States marshal for western Washington in 1911. Fred B. Cohen, of Bremerton, was Kitsap County district attorney (1941). Henry Pecord was on the State Reformatory Parole Board under several governors. Mayors of various localities, in addition to those already mentioned, were: William E. Weinberg, of Colfax (1911 and 1917); Simon Dreifus, also of Colfax (several terms); Samuel Kreidel, of Ellenburg (1919); Roy Rosenthal, of Montesano (1925-27); Gus Rosenbaum, of Kalama (1936-38). Sidney W. Wurzburg was city manager of Marcus in 1921 and a member of the city council (1935-36). Samuel R. Stern, one-time president of the Washington State Bar Association, was a member, together with Jacob Furth and W. L. Gerstle, of the commission formed by merchants of the Northwest to

study trade conditions in and relations with China. Well-known throughout the state in commerce and finance were the Jewish communal leaders Alfred Shemanski, president of the board of regents of the University of Washington, and Nathan Eckstein, nominated Seattle's most useful citizen in 1928. Rabbi Adolph H. Fink of Spokane was president of the Washington State Conference of Social Work (1936-38) and vice-president of the Pacific Northwest Association for Adult Education (1938-39). WASHINGTON, GEORGE, first president of the United States (1789-97), b. Bridges Creek, Westmorland County, Va., 1732; d. Mt. Vernon, Va., 1799. Although individual Jews are mentioned in the records of the 17th cent., no organized Jewish community in Virginia is known until the latter part of the 18th cent., when, in 1790, the Hebrew Congregation of Richmond joined the congregations of New York, Philadelphia and Charleston, S. C., in an address to George Washington. It is therefore not likely that George Washington came into contact or had any relationship with Jews in the early part of his career. Yet it is believed that Washington did come into contact with Jews much before the American Revolution, and there is a tradition, which may well be a fact, that Washington attended the wedding of the parents of Major Mordecai Manuel Noah, the picturesque figure of the early 19th cent. whose aspiration to establish a Jewish state in America is famous, and that he witnessed the Kethubah, or marriage contract, with his signature. Records are extant showing that two Jews accompanied Washington during the French and Indian War.

With the advent of the American Revolution it was only natural that Washington should have come into contact with many Jews who joined the cause of the Revolution. The total population of the colonies was small at the time—not exceeding three million. The Jewish population was likewise small, and with the exception of a small number of Jews scattered in many of the thirteen colonies, there were only four or at the most five organized Jewish communities in the colonies. Yet, far out of proportion to their number, the Jews of the colonies—who were mostly of Spanish-Portuguese origin—joined the cause of liberty with the famous general.

Thus at a very early period of the Revolution Jews served with Washington on his staff and as aide-de-camps. Manuel Noah, father of Major Mordecai Manuel Noah, who sacrificed almost everything he possessed during the Revolution for its sake, was sent North from the staff of Francis Marion to serve as an aide-de-camp to Washington.

David Salisbury Franks, originally from England and Canada and later of Philadelphia, during the Revolution displayed his active sympathy for the cause of the colonists. He enlisted in the Continental Army in 1775. He became a major, and in 1778 was placed on the staff of General Benedict Arnold as an aide-de-camp. When the latter was involved in treason and Major Franks was arrested on suspicion and charged with having been concerned in the act, he was proved altogether innocent and was acquitted honorably. Franks then became attached to the staff of Washington and was entrusted with important secret dispatches to envoys abroad in 1781. He was promoted to lieutenant colonel and in 1784 he was appointed vice-consul at Marseille, France, and in 1785 accompanied the American agent to Morocco, where he effected a treaty between the emperor there and the United States.

Another member of the Frank family with whom Washington had a definite and close relationship was Colonel Isaac Franks. He joined the army shortly after the battle of Lexington, and became Washington's confidential aide-de-camp. In 1793 Washington, then president of the United States, occupied the house of Colonel Franks in Germantown.

George Washington

Another patriot on Washington's staff was Major Benjamin Nones, of Philadelphia. Nones first served as a private under General Casimir Pulaski. Later he became "Major of a Hebrew legion of four hundred men attached to Baron de Kalb's command."

In 1781, when Washington visited Newport, R. I., he was entertained in the home of Moses Isaacks, an outstanding patriot of the Revolution. The town meeting to plan the reception to welcome Washington to the city was held at the synagogue.

It is told that during Washington's visit in Newport in 1790 Jacob Isaacs, a Jewish resident of the city, took the opportunity to present the president with a bottle of fresh water converted from salt water by a process which Isaacs had discovered. Washington is also recorded to have visited Michael Hart at Easton, Pa. Moses Philip Russell, an army surgeon's mate, received a letter of commendation from Washington.

The relationship between Washington and the famous Revolutionary patriot Haym Salomon has long occupied the historians of American Jewish history. Unfortunately the exact details are not extant, and many of the facts have given way to fiction in the course of time. However, there are many records of contributions by Salomon to Washington's army.

Of outstanding significance in the relationship of Washington and the Jews of the United States and in the annals of American Jewish history is the correspondence between the first president of the United States and the Hebrew congregations that were in existence around 1790. That Washington was a champion and advocate of religious liberty and freedom has long been an established fact. That he was a strong supporter of the separation of church and state and was to a great extent responsible for its realization in the American government and constitution is well known. Churchman though he was, Washington could not conceive of national liberty which gave physical freedom without spiritual freedom.

It was natural, therefore, for Washington to state: "The cause of American liberty is the cause of every virtuous American citizen, whatever be his religion or descent."

In the treaty with Tripoli Washington insisted upon the inclusion of the provision that "the government of the United States of America is in no sense founded on the Christian religion. The United States is not a Christian nation any more than it is a Jewish or a Mohammedan nation."

This concept of religious liberty and the complete separation of church and state with the provision that all may worship God according to the dictates of their own conscience found the highest expression in Washington's address to the Hebrew Congregation of Newport, wherein he states:

"It is now no more that toleration is spoken of as if it were by the indulgence of one class of people that another enjoyed the exercise of their inherent natural rights, for, happily, the Government of the United States which gives to bigotry no sanction, to persecution no assistance, requires only that they who live under its protection should demean themselves as good citizens in giving it on all occasions their effectual support."

These remarks, made in reply to an address presented to Washington by Moses Seixas on behalf of the Hebrew Congregation of Newport, bring to mind that at least on two occasions Seixas had the honor to be in the company of Washington as an official member of the reception committee. In 1781, when Washington visited Newport (alluded to above), he was welcomed and received by King David's Lodge of the Masonic order, which was constituted primarily of Jewish membership and at which time Moses Michael Hays was master and Moses Seixas senior warden.

On the occasion of Washington's visit to the city in 1790, when Moses Seixas was master of the Lodge and warden of the synagogue, Seixas was one of the members of the official committee which waited on Washington and received him in the city. It is said that on that occasion Washington visited the historic synagogue in Newport.

It is significant that in 1782, at the dedication of the Mikveh Israel Synagogue in Philadelphia, a special prayer was offered by Rabbi Gershom Mendez Seixas for "His excellency George Washington, Captain General and Commander-in-Chief of the Federal Army of these States." At Washington's first inauguration as president of the United States Seixas was among the officiating ministers in their vestments.

The complete letters addressed by George Washington to the Hebrew congregations in the states (in gracious reply to messages received from them in 1790) are recorded below (and partly in facsimile in vol. 1, page 238):

To the Hebrew Congregations of the City of Savannah, Ga.:

"Gentlemen:

"I thank you with great sincerity for your congratulations on my appointment to the office which I have the honor to hold by the unanimous choice of my fellow-citizens, and especially the expressions you are pleased to use in testifying the confidence that is reposed in me by your congregations.

"As the delay which has naturally intervened between my election and your address has afforded me an opportunity for appreciating the merits of the Federal Government and for communicating your sentiments of its administration, I have rather to express my satisfaction rather than regret at a circumstance which demonstrates (upon experiment) your attachment to the former as well as approbation of the latter.

"I rejoice that a spirit of liberality and philanthropy is much more prevalent than it formerly was among the enlightened nations of the earth, and that your brethren will benefit thereby in proportion as it shall become still more extensive; happily the people of the United States have, in many instances, exhibited examples of worthy imitation, the salutary influence of which will doubtless extend much farther if, gratefully enjoying those blessings of peace which (under the favor of heaven) have been attained by fortitude in war, they shall conduct themselves with reverence to the Deity, and charity toward their fellow-creatures.

"May the same wonder-working Deity who long since delivered the Hebrews from their Egyptian oppressors, planted them in a promised land, whose providential agency has lately been conspicuous in establishing these United States as an independent nation, still continue to water them with the dews of heaven and make the inhabitants of every denomination participate in the temporal and spiritual blessings of that people whose God is Jehovah."

(Signed) G. Washington.

To the Hebrew Congregations in the Cities of Philadelphia, New York, Charleston, and Richmond:

"Gentlemen:

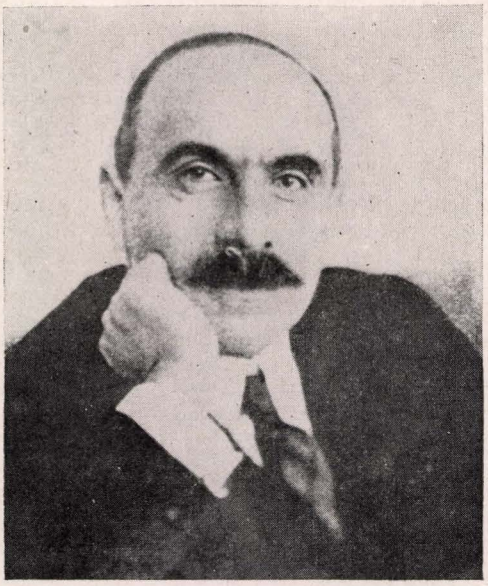
"The liberality of sentiment toward each other, which marks every political and religious denomination of men in this country, stands unparalleled in the history of nations.

"The affection of such a people is a treasure beyond the reach of calculation, and the repeated proofs which my fellow-citizens have given of their attachment to me and approbation of my doings, form the purest source of my temporal felicity. The affectionate expressions of your address again excite my gratitude and receive my warmest acknowledgments.

"The power and goodness of the Almighty, so strongly manifested in the events of our late glorious revolution, and His kind interposition in our behalf, have been no less visible in the establishment of our present equal government. In war He directed the sword, and in peace He has ruled in our councils. My agency in both has been guided by the best intentions and a sense of duty I owe to my country.

"And as my exertions have hitherto been amply rewarded by the approbation of my fellow-citizens, I shall endeavor to deserve a continuance of it by my future conduct.

"May the same temporal and eternal blessings which you implore for me rest upon your congregations."



(Signed) G. Washington.

WASSERMANN, AUGUST VON, immunologist, b. Bamberg, Germany, 1866; d. Berlin, 1925. He studied medicine in Erlangen, Vienna, Munich, and in Strasbourg, where he received his doctorate (1888), and began to practise as a physician. Interested in research, he became (1890) an assistant in the Robert Koch Institute for Infectious Diseases, Berlin; here he passed through various ranks, and eventually was appointed (1906) director of the department of experimental therapy and serum research. Later (1913) he became director of the newly-established Kaiser Wilhelm Institute for Experimental Therapy in Berlin-Dahlem.

In an epochal period of bacteriological and serological investigation, Wassermann made his mark by his work on haemolysins, cytotoxins and precipitins (Leipzig, 1902), which was soon translated into English by Charles Bolduan (New York, 1904). At first the pupil of Paul Ehrlich and other leading immunologists of the age, Wassermann became their co-worker and friend by his contributions to the nature of infection,

August von Wassermann

mixed and secondary infection, hereditary transference of infectious diseases (1903); antitoxic sera, immunity and Bacillus pyocyaneus (1904); and the significance of bacteria in the care of health (1905). These were preliminaries for the work that was to make the name of Wassermann a household word.

Carrying forward Paul Ehrlich's work in cytolysis (Ehrlich's side-chain theory) and the Bordet-Gengou discovery of the fixation of the complement (Bordet-Gengou phenomenon), Wassermann, with Albert Neisser and Carl Bruck, published "Eine serodiagnostische Reaktion bei Syphilis" (in *Deutsche medizinische Wochenschrift,* 1906, pp. 745-46), followed by Wassermann's "Zur diagnostischen Bedeutung der spezifischen Komplementfixationen" (in *Berliner klinische Wochenschrift,* 1907, pp. 12-14) and his "Über die Entwicklung und den gegenwärtigen Stand der Serodiagnostik gegenüber Syphilis" (*ibid.,* 1907, pp. 1599-1602, 1634-36). These publications were among the most important of the time, and will endure among the classics of 20th cent. medicine.

As late as 1908 a leading syphilologist wrote: "Imagine what would become of syphilis on the discovery of a diagnostic chemico-physiologic test and of a therapeutic serum! The promise that some such sera may soon be obtained is almost too good to believe" (Keyes, Edward L., *Syphilis, a Treatise for Practitioners,* 1908, p. 34). Yet Wassermann's serum was already here, and Ehrlich's salvarsan was only two years away. The Wassermann reaction, with the tests built on its principles, permitting the practitioner to diagnose syphilis before the appearance of any physical signs, or in the absence of clinical symptoms, has done much for the preservation of the human race.

The Medical Research Council (London) thus summed up the value of the Wassermann: "There is no process of biochemical diagnosis that gives more trustworthy information or is liable to a smaller margin of error than the Wassermann test when it is performed with completeness and with proper skill and care." The name of Wassermann is thrice eponymic, since every medical student must learn the meaning of *provocative Wassermann* (reactivation of a negative Wassermann by the preliminary administration of salvarsan); *Wassermann-fast* (persistence of a positive Wassermann despite antisyphilitic treatment); and *Wassermann reaction* (the antigen, uniting with the unknown antibody in the patient's blood, fixes the complement if syphilis is present, preventing the action on the hemolytic amboceptor, while free complement causes hemolysis; hence: syphilis, no hemolysis; hemolysis, no syphilis).

The name (but not the test) of Wassermann has been eliminated from the medical literature of Germany; in democratic countries he is recognized as a leading medical benefactor of mankind. VICTOR ROBINSON.

WASSERMANN, JAKOB, novelist, b. Fürth, Germany, 1873; d. Alt-Aussee, Austria, 1933. His father was a manufacturer who dreamed great dreams but had few practical accomplishments. The family was always in modest circumstances. Wassermann's mother, whom he adored, died when he was only nine and took the one light out of the darkness of his life. His stepmother was a cold and merciless woman who punished him severely for any slight misdeeds and increased his emotional fear of life. His father sent him to Vienna at the age of seventeen to work in his uncle's factory; had he been successful in this, he might have risen to a remunerative executive position, but he hated the factory and everything attached to the commercial life. His year of enforced military service was one of double agony for him: half because he was a Jew caught in a Protestant machine, the other half because he hated the military and its symbol of force.

There was no time in his childhood or youth during which Wassermann was adjusted or happy. He had moments of vision and ecstasy during which he conjured up stories and enjoyed visions of the deepest pity and tenderness. "Amazement and despair were my predominant emotions; amazement at what I had seen and perceived and felt, despair because it was incommunicable." He lived in two worlds: first, the harsh world of outer reality with its hatreds and cruelties and lack of understanding; second, the world that he envisaged, half in his dreams, half in his imagination, in which people came through the excesses of worldliness to find spiritual peace in renunciation.

Wassermann belongs to that breed of writer who never finds happiness, even in his long-sought success. His greatest difficulty in life, aside from the fact that there was no way to escape his Jewishness, was his failure at personal relationships: he managed to sustain few loyal friends; his love life was a series of hectic and violent affairs which nearly always ended in unhappiness or tragedy. This unstable emotional nature was caused by the psychic wounds and scars of childhood: for Wassermann was a highly sensitized Jew, living in Germany in a period when the Jews were despised and given daily evidence that they were unwanted.

In his autobiography, *My Life as German and Jew* (1933 and 1934), he portrays his youth for its full burden of insult, ignominy and brutal punishment visited upon his family and himself. If he could have despised the Germans either as a race or a culture he might have gone his own way, suffering no psychic disturbances because of the inflictions of anti-Semitism.

However, Wassermann loved German culture and wanted desperately to become part of it. He also wanted to make a contribution to it, and to be recognized for the value, truth and beauty of that contribution. He suffered under the usual hardship of a young man without family or backing or experience who tries to become a creative novelist and make a place for himself in the publishing world; in addition to this burden, he labored under the even heavier load of

knowing that no matter how skillful or creative he might become as a writer, the German people would always resent him and want none of his work. Perhaps this double burden acted as a double incentive: for Wassermann became one of the two or three most important German novelists of his day, and has been compared favorably by critics to Dostoevsky and Balzac.

He overcame both of the major obstacles in his path to success, but he never overcame the injuries to his psyche which he suffered during his early years. Nearly all of his work shows this, for his writings are never the work of a normal creative talent. He is always a man possessed, much as Dostoevsky was a man possessed; and his books are consequently possessed. Through his prose runs a feverish excitement which would be unacceptable if artificial, but is a great asset in Wassermann's case because it is indigenous to the feverish excitement which dominated his life.

In one sense, Wassermann's writing was an escape from reality: it was an escape for him personally from a world in which he was not wanted, from a world of torture because he was a Jew; it was also an escape because through outstanding success in the field of literature he hoped to overcome the chasm which had been set up between the German and the Jew. In his minor ambition he was successful: he became an internationally famous literary personage; in his major objective, that of bridging the gap between himself and the German people and culture, he failed completely. He died at the age of sixty, an exile in Austria, having watched the rise of the Nazi movement, and a resurgence of anti-Semitism which was even crueler than the anti-Semitism which had scarred and gnarled his youth. No German, aside from Heine, had prophesied in truer or profounder terms the ultimate rise of Nazism than Jakob Wassermann.

In spite of the fact that he ended his life in exile, he had a stretch of almost thirty years in Germany during which he was a best-seller, and one of the best-loved of the German novelists. In *The Maurizius Case* (1929) he created a character by the name of Etzel Andergast whom great segments of the German people came to love as a devoted friend. The last sentence of this long novel reads: "So ends 'The Maurizius Case'—but not the story of Etzel Andergast."

Wassermann was immediately deluged with thousands of letters, telegrams and telephone calls demanding to know what was going to happen further to Etzel Andergast. The clamor became so great that Wassermann was obliged to lecture in the Philharmonic Hall in Berlin to a huge, zealous crowd, and tell them more of their beloved Etzel. Standing on the stage of the Philharmonic Hall before an adoring crowd of the cream of Berlin's intellectual aristocracy, Wassermann must have felt that he had conquered all the fears, the phobias and the problems of his youth. It made all the more bitter for him the rise of Nazism, his exile and the burning of his books in Germany.

His best-known and best-loved novel in America is *World's Illusion* (1926), which has been called one of the finest novels of the 20th cent. Joseph Wood Krutch declares *The Goose Man* (1922) and *Gold* (1924) to be his next two finest novels. But *Gold* was largely rejected in the United States. When Wassermann asked his American publisher why *Gold* had not sold, the publisher replied: "Because the American people do not understand it." Wassermann could not understand why the Americans did not understand.

Since there appeared to be no way for Wassermann to bridge the external gap between his Jewishness and the rigid Germanic culture, he came to the unconscious conclusion that a man could find peace only by renouncing the world. There was no material force at hand that he could use to solve his problem; therefore he came to rely upon spiritual force as the only catalytic agent, the only effective means for a man to find peace. In this sense he was a follower of Tolstoy; there is really little that is Germanic in his writing; it is largely Jewish with heavy overtones from his two Russian masters, Dostoevsky and Tolstoy. In the best analysis to appear in English on Wassermann, Krutch says:

"Wassermann's best novels take their inspiration from Dostoyevsky, and are on the theme of salvation through suffering. The moral was fundamentally incomprehensible, but Wassermann, like Dostoyevsky his master, had the power of communicating so vividly a sense of the fever of passion and of ambition, that one does not need to agree with him in order to share the excitement. A realist only in the absurd sense that he does not deal with a prettified world, his novels are feverish phantasmagoria far more than they are pictures of actual life. Everything was magnified and intensified. His characters were titans of energy led through grandiose adventures by superhumanly intense passions. And then, having burned themselves out, these heroes renounced the world for the mystical ecstasy of abnegation. It was the will to power that Wassermann hated more than anything else, and that plays the villain in all his novels. Like Tolstoy, Wassermann saw salvation as an individual matter. His heroes are not reformers, but saints, and he found no hope for the world except through those who were willing to renounce it."

The outstanding characteristic of Wassermann's writing is the tremendous surge and excitement which his prose communicates to the reader, so intense as to be almost epileptic in nature. Reading Wassermann's prose becomes a deeply emotional experience for the reader: the words get into the bloodstream and churn the mind until it is impossible either to stop reading or to summon sleep. Some American readers found Wassermann's lushness of imagery and his feverish excitement repulsive; to others it was a profoundly moving experience.

Wassermann's many works, both in the original German and in their English translation, include: *Melusine* (1896), a short story; *Die Juden von Zirndorf* (1897; revised ed., 1906; English trans., *Dark Pilgrimage,* 1933; published also under the title of *The Jews of Zirndorf,* 1933); *Vorspiel: Die Geschichte der jungen Renate Fuchs* (1900); *Der nie geküsste Mund* (1902); *Der Moloch* (1902), a novel dealing with the Jews of Galicia; *Die Kunst der Erzählung* (1904); *Alexander in Babylon* (1905); *Die Schwestern* (1906), three short stories; *Caspar Hauser oder die Trägheit des Herzens* (1908; English trans., *Caspar Hauser,* 1928); *Der Literat oder Mythos und Persönlichkeit* (1910); *Die Masken Erwin Reiners* (1910), a novel; *Der goldene Spiegel* (1911), a collection of short stories; *Faustina* (1912), a short story; *Der Mann von 40. Jahren* (1913), a novel; *Das Gansemännchen* (1915; English trans., *The Goose Man,* 1922 and 1934); *Christian Wahnschaffe* (2 vols., 1919; English trans., Ludwig Lewisohn, *The World's Illusion,* 1926); *Wendekreis* (3 vols.; vol. 1, *Der unbekannte Gast;* vol. 2, *Oberlins drei Stufen;* English trans., *Oberlin's Three Stages,* 1926; vol. 3, *Ulrike Woytich*); *Mein Weg als Deutscher und Jude,* Wassermann's autobiography (1921; English trans., *My Life as German and Jew,* 1933; revised and amplified ed., 1934); *Der Geist des Pilgers,* a book of philosophic contemplation; *Faber, oder Die verlorenen Jahre* (1924; English trans., Harry Hansen, *Faber, or The Lost Years,* 1925); *Gold* (English trans., Louise Collier Willcox, 1924); *Laudin und die Seinen* (1925), a novel; *Wedlock* (English trans., Ludwig Lewisohn, 1926); *Der Fall Maurizius* (1927; English trans., *The Maurizius Case,* 1929); *The Triumph of Youth* (English trans., 1927); *Worlds' Ends,* five stories (English trans., 1927); *Der Aufruhr um den Junker Ernst* (1928); *Lebensdienst* (1928), a collection of short essays; *Columbus* (1929; English trans., *Columbus: Don Quixote of the Seas,* 1930); *Doctor Kerkhoven* (English trans., 1932; published also as *Etzel Andergast,* 1932); *Bula Matari: Stanley, Conqueror of a Continent* (English trans., 1933; published in England as *H. M. Stanley, Ex-*

plorer, 1932); *Josef Kerkhovens dritte Existenz* (1934, the sequel to *Etzel Andergast;* English trans., *Kerkhoven's Third Existence,* 1934; published also as *Joseph Kerkhoven's Third Existence,* 1934); *Letters to Frau Julie Wassermann* (1935). Many of his works were translated into various other foreign languages, including Hebrew, Yiddish, Dutch and the Scandinavian tongues. IRVING STONE.

(*See illustration in vol. 1, p. 558.*)

Lit.: Little has been written in the United States about the life of Jakob Wassermann. The best article is an obituary by Joseph Wood Krutch in *The Nation,* Jan. 17, 1934. WASSERMANN, OSKAR, banker and religious and communal leader, b. Bamberg, Germany, 1869; d. Garmisch, Bavaria, Germany, 1934. At an early age he entered the banking house of the Wassermann family in Bamberg, a firm which had been founded in 1785, and then became the director of the Berlin branch of the firm of A. E. Wassermann, a position which he held until 1912, when he became a member of the board of directors of the Deutsche Bank. After the Deutsche Bank had been merged with the Disconto-Gesellschaft, he was retained as director of the amalgamated institution. He was also a member of the General Council of the Reichsbank in Germany until May, 1933, when, with the advent of the Nazi regime in Germany, he was ousted from these two posts. In addition, he was a member of the board of trustees of various industrial and commercial companies. Wassermann occupied an important place in many Jewish organizations as well.

He was vice-president of the administrative council of the Akademie für die Wissenschaft des Judentums, a member of the curatorium of the Hochschule für die Wissenschaft des Judentums in Berlin, president of the Palestine Foundation Fund (Keren Hayesod) for Germany, and in 1929 was elected a member of the board of directors of the world Keren Hayesod. He became an active member of the Central Committee for Jewish Aid and Reconstruction in Germany in May, 1933, and was one of the founders of the Jewish Agency for Palestine. Wassermann was the leader of German non-Zionists cooperating in Jewish reconstruction work in Palestine; as such he was a signatory to the charter of the enlarged Jewish Agency at Zurich on August 14, 1929, and was, until his death, a member of the administrative committee of the Jewish Agency for Palestine. He played an important part in the creation of this enlarged Jewish Agency, for during 1927 and 1928 he acted as one of the four members of the Joint Palestine Survey Commission.

WASSERVOGEL, ISIDOR, judge, b. Budapest, 1871. He was brought to the United States in 1881. Wasservogel received the LL.B. degree from the New York Law School (1896). From 1910 to 1916 he served as assistant and acting district attorney of the county of New York, and in this capacity was the first to obtain a conviction on finger print evidence alone (1912). He was elected a justice of the Supreme Court of the State of New York in 1920 for a term of fourteen years, and was reelected in 1934.

Oskar Wassermann

WASSERZUG, CHAYIM (LOMZER), cantor, b. 1822; d. 1882. He served in Konin, Poland, and in Novodwor, near Warsaw. After thirteen years in the latter place he accepted a position in Lomza, Poland, where he stayed for five years. He then became cantor in the large synagogue in Vilna, where thousands, both Jews and non-Jews, flocked to hear his golden voice.

An Italian opera company in St. Petersburg offered him a remunerative contract, but Wasserzug preferred the altar to the stage. In 1868 Wasserzug, while visiting relatives in London, was invited to officiate in the North Synagogue, and was immediately offered that position, which was then vacant. Wasserzug found there deserved appreciation of his talents.

In 1878 he published his work for the synagogue, *Sefer Shire Mikdash.* This fine volume of old as well as modern compositions received the praise of critics and musicians. The congregation in Vilna repeatedly sought to win him back, and at least once succeeded in having him return for a short visit, on which occasion he received a princely welcome in which the entire city participated.

WATER. As one can withstand hunger longer than thirst, it is the prime duty of hospitality to give water to the thirsty stranger (*Gen.* 24:17; *Judges* 4:19). Even an enemy's thirst was to be slaked (*Prov.* 25:21), and one who refused water to the thirsty was regarded as of unredeemably bad character. This is one of the reasons given for denying to male Ammonites and Moabites the right to marry Israelite women, even if they should be proselytes (*Deut.* 23:5; *Neh.* 13:2). The lack of water was one of the chief reasons why the Israelites in the wilderness murmured against Moses (*Ex.* 17:1-7; *Num.* 20:1-13).

Since water was so scarce, travelers were expected to pay for the amount they drank (*Num.* 20:19); however, a truly hospitable host would offer water to wash the feet of weary travelers (*Gen.* 18:4; 19:2; 24:32; 43:24). Water played an important part, as the "waters of bitterness," in the procedure to be taken in the case of a woman who denies a charge of adultery brought by a suspicious husband (*Num.* 5:11-31).

Immersion in water was one of the chief means of

purification for those who had become ritually unclean, such as the leper, the menstruating woman, or those who had come into contact with an unclean object (*Lev.* 14 and 15). The ashes of the red heifer were mixed with water and sprinkled upon ritually unclean persons and objects to purify them (*Num.* 19:17). As water had the power to cleanse from sin, proselytes underwent baptism, and the dead were thoroughly washed before being placed in a coffin (*M.K.* 28b). Forgiveness of sins by God is likened to sprinkling with pure water (*Ezek.* 36:25); this simile is found in the Biblical legislation (*Deut.* 21:6-7) and in the prophets (*Zech.* 13:1; *Jer.* 2:22; *Isa.* 1:16).

Washing with water helped bring about a higher degree of purity; this explains why the priests who performed duties within the inner shrine of the Temple had first to wash their hands and feet. It seems that water had the power of reducing the holiness of an object (*Lev.* 6:21; *Num.* 19:7, 8, 10, 21). Libations of water accompanied sacrifices made by Samuel (*I Sam.* 7:6), David (*II Sam.* 23:16) and Elijah (*I Kings* 18:34). According to the Talmud, the libations upon the altar during Sukkoth were of Mosaic origin (*Suk.* 34a).

The Torah and its divine wisdom are compared to water, and God is called "a fountain of living waters" (*Jer.* 2:13). The prophet summons the people to listen to the word of God in the appeal: "Ho, every one that thirsteth, come ye for water" (*Isa.* 55:1). Rabbinic literature finds thirteen points of resemblance between the Torah and water (*Midrash Song of Songs* 1:13). To learn from a teacher was called "to drink from his waters" (*Hag.* 3a). Water is a metaphor for tears (*Ps.* 119:136), great misfortunes (*Ps.* 69:2; 124:4-5), great fear (*Josh.* 7:5) and instability (*Gen.* 49:4). The continuous flow of water is symbolic of many descendants (*Num.* 24:7).

Water played an important part in the creation of the world. On the first day of creation, "the spirit of God hovered over the face of the waters." On the second day the upper and nether waters were separated, and on the third day the waters of the earth were given their proper place (*Gen.* 1:1-10). One of the rabbis adduced these passages for the view which he, in common with certain Greek philosophers, held, that water was the primordial element (*Yer. Hag.* 2:1). This view was disputed by other scholars (*Hag.* 12a; *Midrash Gen.* 1:12).

The following Biblical miracles are connected with water: the Flood; the first plague, in which the waters of Egypt were turned into blood; the bringing forth of water from the rock by Moses; the water that was consumed by fire (*I Kings* 18:38); the curing of Naaman of his leprosy by bathing in the Jordan (*II Kings* 5:10, 14); the dividing of the waters by Moses, Joshua (*Josh.* 3:8-17), Elijah (*II Kings* 2:8) and Elisha (verse 14). HIRSCHEL REVEL.

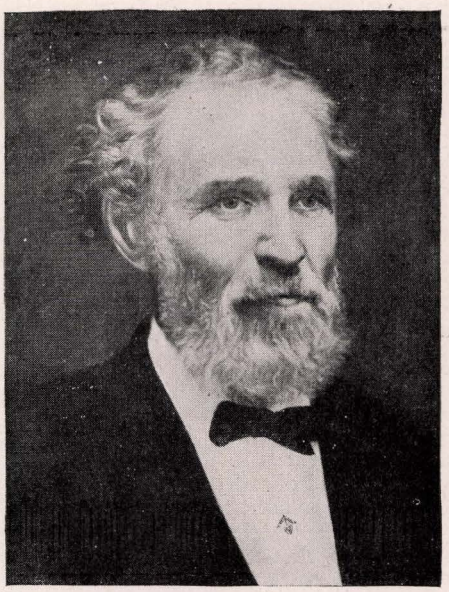
Lit.: Patai, Raphael, *Hamayim* (1936).

WATER OF LIFE. Babylonian, Indian and old Persian mythologies tell of a spring of immortality as well as of a food of life. According to *Isa.* 35:6; *Ezek.* 47:1; *Joel* 3:18; and *Zech.* 14:8, the water of life is said to have flowed out of Jerusalem; a similar conception seems to be at the bottom of *Ps.* 110:7. According to the legend, the well of Miriam accompanied Israel in the desert. After her death it sank into the Lake of Tiberias (*Taan.* 9a; *Midrash Eccl.* 5:9 et seq.; *Midrash Lev.* 22). According to *Yer. Kil.* ix, 32d, it may be found in front of the synagogue of Serungid. In the New Testament, John (*Rev.* 22:1) sees the water of life, clear as crystal, proceeding out of the throne of God and of the Lamb in the midst of the holy city. The water of life plays an important role in the story of Alexander, especially in his expedition in search of the spring of life guarded by Chidher, who is identified with Elijah. Water is generally considered the means of fertilization, and is poured upon the earth or sprinkled upon men with "fortune's wands," i.e. twigs of evergreen. Often the acts of sprinkling and of striking with the rod are separated. The ceremony of the drawing of water and the striking with willow twigs (Hoshanoth) in the ritual of the Sukkoth festival are connected with the idea of the water of life.

Lit.: The Biblical dictionaries and commentaries on the passages cited.

WATERBURY, a city of Connecticut, with a population of 99,314 (census of 1940), including (1943) an estimated 4,000 Jews. The first Jewish settlers came to Waterbury in the 1840's. They were German emigrants, and brought with them the cultural and religious background of early 19th cent. Germany. Numbering only about twenty persons, they yet became and remained a potent force in the community for some six decades. East European emigration penetrated into Waterbury in the late 1880's, and by 1910 there were approximately 300 Jewish families in the city.

In 1943 the Waterbury Jews supported several synagogues. The Reform Temple Israel was founded in 1870, and joined the Union of American Hebrew Congregations in 1910. Rabbi Maurice L. Zigmond occupied the pulpit from 1936 to 1942, and was then succeeded by Rabbi David Polish. The Orthodox congregations Beth Israel (founded in 1893) and Shearith Israel (founded 1906) called to their service Rabbi Mordecai (Max) Gifter in 1941. His predecessor was Rabbi Moses Sheinkopf (1927-41). A synagogue was built by Congregation Beth Israel in 1909.



The Conservative Beth El Synagogue, founded in 1923, erected a house of worship in 1929. Rabbi Harry Schwartz was in the pulpit from 1925 to 1932, and was followed by Rabbi William P. Greenfeld, the incumbent in 1943. Both a congregational Hebrew school and a religious school were established by Beth El Synagogue. A central Talmud Torah for the entire community was also instituted.

Organizations for charity and mutual benefit founded by the early Waterbury community included the Waterbury Hebrew Benefit Association, the Jewish Benevolent Society, and the Hebrew Free Loan Association. Later the Jewish Federated Appeal was organized.

National organizations represented by branches at Waterbury were, in 1943, the B'nai B'rith (the lodge was chartered in 1873 and reorganized in 1939), the Zionist Organization of America, the Hadassah, the American Jewish Congress, National Workers Alliance, Workmen's Circle and Jewish War Veterans.

Among those who rendered outstanding service to the community was William Traurig, banker (d. 1938), who held high executive posts in local and national Jewish organizations and in addition served the general Waterbury community. He was commissioner of the board of public welfare for the city in 1923. Adolph Sanditz (d. 1939), banker, was likewise a leader in Jewish organization. He founded Congregation Beth El and the central Talmud Torah. In 1943 lay leaders of the community included Charles Rosengarten, outstanding Zionist and communal worker; Harry Liebeskind, leader in welfare work; Perry Graicerstein, chairman of the Federated Appeal and member of the Board of Education; Charles Walzer; Isidor Stoll; I. N. Albert; Herman Weisman, Harry Fisher and Martin Greenblatt.

In the second World War, in 1943, there were more than 200 young men of the Jewish community in the

Abraham Watters

armed services of their country, among whom Lieutenant Colonel Max Traurig held the highest rank.

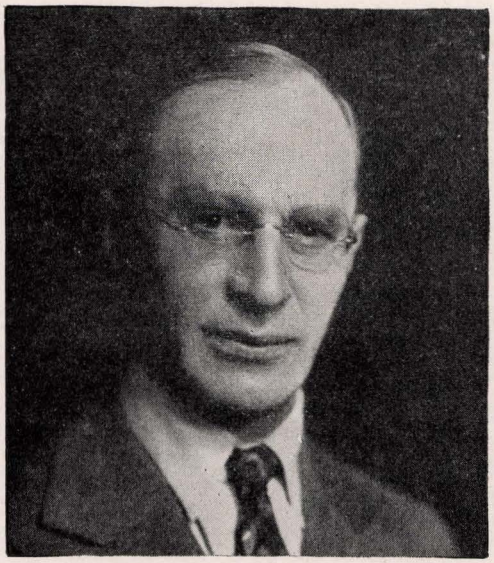
WATERMAN, HENRY SAMUEL, American consul, b. Fort Townsend, Wash., 1882. He studied at the University of California (B.S., 1902), and started his diplomatic career as a clerk at the United States consulate at Moscow (1916). After serving as a vice-consul in Norway and Guatemala, he was United States consul at Corinto, Nicaragua (1920), San José, Costa Rica (1921-26), Shanghai (1926-28), Saigon, French Indo-China (1928-33), Sheffield, England (1933-35), Bombay, India (1935-39), and Bordeaux, France (1939-41). In 1941 he was appointed consul at Monterrey, Mexico, and still held this position in 1943. He was a commander of the Royal Order of Cambodia.

WATERMAN, SIGISMOND, physician, b. Bavaria, 1819; d. New York city, 1899. From 1857 to 1887 he served as police surgeon of New York city. He was founder and medical director of the Yonkers Home for Aged People, established under the auspices of the Independent Order of B'nai B'rith, in which he was prominent, and was one of the founders of the Maimonides Library. A specialist in the use of the spectroscope, he wrote many articles on it for leading medical journals, and delivered frequent lectures before important medical groups. In 1868 Waterman helped introduce this instrument into medical practice. He was the first Jew appointed instructor at Yale University (1844-47), from which he was likewise the first Jew to receive a degree (M.D., 1848). He was also professor of genitourinary diseases at the Eclectic Medical College of the City of New York during the last few years of his life.

His brother, LEOPOLD WATERMAN, who died at the early age of thirty-two, was an important figure in New Haven. He was president of the New Haven Synagogue, in which he delivered sermons when there was no rabbi, and was deputed by the city authorities to welcome Louis Kossuth to New Haven.

Lit.: *Yale Obituary Record, 1890-1900;* Kisch, Guido, "Two American Pioneers of New Haven," *Historia Judaica,* vol. 4 (1942) 16-37.

Gertrude Wile Watters



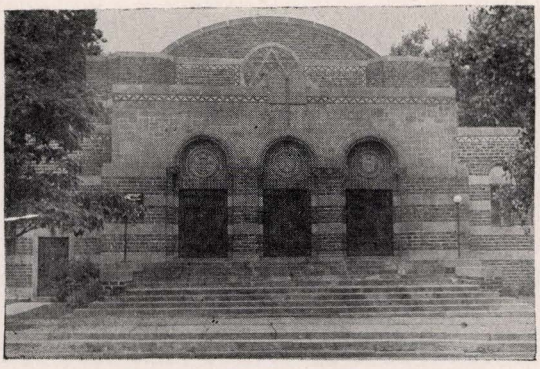
WATTERS, ABRAHAM, Western pioneer, b. Germany; d. Salt Lake City, Utah, 1893. He came to the United States in 1834, crossing overland from Charleston, S. C., to the Mississippi, and organizing the Jewish groups in the settlements through which he passed for religious worship. By slow stages he arrived at St. Louis in 1846 and at Independence, Mo., in 1847, at the time the Mormons were beginning their historic trek across the plains. In San Francisco in 1849 Watters, with ten others, met in a tent and organized Temple Emanu-El, of which he was vice-president. The original minutes of this and subsequent meetings are preserved in the hall of that congregation. He subsequently organized and was president of Congregation Shaari Zedek, and he fought the anti-Semitic agitation in the California legislature in 1851.

Watters was arrested and imprisoned by the Mexican government in Sonora in 1852 on the false charge of having knowledge of an attempt to seize that territory for the United States. He traveled extensively in Mexico, Central and South America in the early 1860's, sending correspondence to the *Jewish Chronicle* of London on the scattered Jewish populations which he encountered. He returned to England, remaining there until 1888, when he came back to the United States and settled in Salt Lake City.

WATTERS, GERTRUDE WILE (Mrs. Leon L. Watters), communal leader, b. Buffalo, N. Y., 1887. For many years Mrs. Watters, who formerly resided in Buffalo but in 1936 moved to New York city, was identified with communal, religious, philanthropic and social movements. The scope of her diversified interests and services may be indicated by the boards and societies to which she gave of her time and efforts.

Her Buffalo affiliations included membership on the First Board of the Buffalo Symphony Society, a directorship on the Women's Board of the Millard Fillmore Hospital, the presidency of the Jewish Fresh Air Camp, the past presidency of and a life membership on the board of directors of the sisterhood of Temple Beth Zion, and membership on the board of governors of the Buffalo Jewish Federation for Social Service. In addition, she was interested in Buffalo in work for the foreign-born in home economics, and was a sponsor of the Foreign Policy Association.

Long identified with the work of the National Federation of Temple Sisterhoods, Mrs. Watters in 1934 became president of that organization, serving until



Leon L. Watters

1941. She served also as a member of the Executive Board of the Union of American Hebrew Congregations, a member of the Board of Managers of the Department of Synagogue and School Extension, and as the first woman member of the Board of Governors of the Hebrew Union College.

In 1935 she added her name and efforts to the work of the National Committee on Youth Aliyah, and after her removal to New York city she was a member of the Women's Board of the Federation for the Support of the Jewish Philanthropic Societies of New York City, as well as a member of the board of the National Conference of Christians and Jews, also a director in the Jewish Braille Institute of America and the New York section of the National Council of Jewish Women. She was affiliated in New York with Temple Emanu-El, was a director of the Women's Auxiliary Board, and remained deeply interested in local, state and national religious movements.

With the coming of the emergency precipitated by the outbreak of the second World War in Europe in 1939, she added to her other activities a full program of service to war-time projects, including the British War Relief and the United Jewish Appeal.

After the death of her first husband, Henry Nathan, of Buffalo, in 1931, she married Leon L. Watters, of New York, in 1936.

Temple of Congregation Am Echod, of Waukegan

Lit.: American Hebrew, Jan. 8, 1937, p. 747; Jan. 15, 1937, p. 777.

WATTERS, LEON LAIZER, scientist, industrialist and communal leader, b. Salt Lake City, Utah, 1877. He was the first Jew and the youngest student to receive the B.S. degree from the University of Utah (1897). After receiving the M.A. (1898) and Ph.D. (1901) degrees from Columbia University, he became an instructor in chemistry there (1898-1900), and later (1900) was head of the department of inorganic chemistry and toxicology at the University of Cincinnati. Under Mayor Seth Low's New York city administration (1902-3) he investigated the adulteration of foods and drugs, and embodied the results of his investigation in a report rendered to the American Association for the Advancement of Science which was widely published and hastened the adoption of the Federal Pure Food and Drug Act.

With J. A. Mathews, he produced the carbide of gold, one of the most violent detonating agents known. He devised the method for sterilizing surgical suture and ligature material now widely employed, and improvements in sterilizing and disinfecting apparatus and hospital equipment. During the first World War he was chairman of the committee of the Council for National Defense on surgical and hospital equipment, and was a member of the advisory committee of the War Production Board in the second World War.

In the first World War Watters was chairman of the New York branch of the Jewish Welfare Board, and for many years held executive posts in other communal organizations.

Watters endowed the Augusta Watters Library at the Jewish Community Center at Salt Lake City, and the Martha Watters Memorial Library at St. Mary's Academy. The B'nai Israel Synagogue there is dedicated to the memory of his parents, Ichel and Augusta Watters, pioneers of that community. He established the Watters Laboratory for Atomic Research at the California Institute of Technology. He was one of the founders and twice president of the Utah Society in New York. Watters was a contributor to the *Universal Jewish Encyclopedia.*

Lit.: The Physical Review, vol. 62 (1942) 216.

WAUKEGAN, a city of Illinois, which numbered (1943) an estimated 1,000 Jews (including North Chicago) in its total population of 34,241 (census of 1940). The first permanent Jewish settler in Waukegan was Abraham Simon, who came from Lithuania in 1889. A few years later relatives from Warsaw, Poland, followed him: Wolf Rosenblum and his son Harry Rosenblum. Samuel Schwartz came from Roumania in 1891. In 1897 the handful of Jews in the town founded Congregation Am Echod, and in 1901 adapted a structure for use as a synagogue. Rabbi Adolph Berger was the first to serve as spiritual head of the congregation. Other rabbis were Rudolph Farber (1925-27) and Isaac Siegal (1928-29). In 1930 Rabbi Solomon Jacobson was called to the pulpit of Temple Am Echod, then Conservative, and was still serving in 1943. In 1928 a new Temple was erected and became the center of the Jewish communal activities of the city, housing the congregation's daily Hebrew and weekly religious schools; the Temple sisterhood, choir and alumni association; the Hebrew Ladies' Aid; a lodge of the B'nai B'rith (founded in 1920), together with its women's auxiliary (1937) and its junior auxiliary; the Aleph Zadik Aleph; a chapter of Hadassah (1938); and a Zionist district (1939).

In 1943, there still existed in Waukegan the small Orthodox congregation Agudas Achim, formed as an offshoot

in 1922 of the original group which organized Congregation Am Echod. Agudas Achim met for services only on holidays and had no rabbi or auxiliary activities of any kind. SOLOMON JACOBSON.

WAWELBERG, HIPOLIT, philanthropist and banker, b. Warsaw, Poland, 1843; d. 1917. His father, Hersz (Herman) Wawelberg, former textile merchant, established in Warsaw in 1846 a money changer's counter which, during twenty-five years of development, became a firm of importance. Hipolit Wawelberg, when twenty years of age, enrolled in 1863 in the ranks of the Polish insurgents who fought against czarist oppression. After the collapse of the Polish insurrection he fled to Germany, where he entered the Commercial College of Berlin. In 1869 his father entrusted him with the management of a branch office in St. Petersburg (the central office still remained in Warsaw). There he began his social and philanthropic activities for which he later became famous throughout the country. As Polish patriots he and his brother-in-law, Stanislaus Rotwand, created many institutions to help the working people of the Polish colony in St. Petersburg, and founded a mutual assistance savings bank for his employees, the first bank of its kind in Russia.

As a banker accredited at the imperial court of the czar in St. Petersburg, he exercised a salutary influence in the interests of the Polish colony. During this time he also assisted students by granting interest-free loans and establishing cheap boarding facilities.

Wawelberg was a believer in the theory of donating funds and services to public causes during one's lifetime, and of watching the results of one's endeavors and laying plans for the future. He founded in St. Petersburg a Polish weekly magazine, *Kraj* (Country), and a daily newspaper, *Kurjer Polski,* in Warsaw. He financed the publication of the works of the outstanding Polish novelists of that time, such as Eliza Orzeszkowa, Boleslaus Prus and Henry Sienkiewicz, the Nobel Prize winner, as well as numerous scientific and technical textbooks.

He endowed scholarships, took care of artists without regard to race or religion, and helped to construct in Warsaw a monument to Adam Mickiewicz, the greatest Polish poet, contributing the largest share of the expenses. With his brother-in-law, Stanislaus Rotwand, he founded a college of technology in Warsaw, a summer camp for children in the spa Ciechocinek, and endowed the Jewish Hospital in Warsaw. He also founded a "museum for artisans' works," and built large low-rent apartment houses for workers.

He also devoted his energy to alleviating the plight of the Jews in Russia and Poland. In St. Petersburg, in cooperation with Baron Horace de Günzburg, he fought for the recognition of the equality of rights for the Jews in Russia. He was a member of the Jewish Colonization Association, organized schools for Jewish youth similar to those established by the organization of Baron Maurice de Hirsch, and endowed the University of Lwów with funds, thus permitting the publication of the works of such Jewish historians as Meyer S. Balaban, Moses Schorr, Ignace Schipper and others. ALEXANDER HAFFTKA.

WAXMAN, MEYER, rabbi, educator and historian of literature, b. Slutzk, Russia, 1887. After having studied at the Yeshivas of Mir and Slutzk, he came to the United States in 1905, and completed his education at New York University (B.A., 1911), Columbia University (M.A., 1912; Ph.D., 1916) and the Jewish Theological Seminary of America (rabbi, 1913). He served as rabbi at Sioux City, Iowa (1913-14), and Albany, N. Y. (1915-17). He next founded the Mizrachi Teachers Institute (later affiliated with Yeshiva College), and served as its principal from 1917 to 1921. From 1920 to 1924 he was secretary of the Mizrachi Organization. In 1925 he became professor of Bible, Jewish history and philosophy at the Hebrew Theological College (Chicago), where he still served in 1943.

Hipolit Wawelberg

Waxman's principal work is *A History of Jewish Literature* (vol. 1, New York, 1930; 2nd ed., 1938; vol. 2, New York, 1933; vol. 3, New York, 1936; vol. 4, New York, 1941). It is a large-scale description of Jewish literature from the close of the Bible canon to 1935, and the most detailed—if not always sufficiently discerning—presentation of the subject ever to have been written. Cecil Roth described it as "without doubt one of the greatest single-handed enterprises in the history of Anglo-Jewish letters."

Waxman's other writings include: a translation of Moses Hess' *Rome and Jerusalem* (1918); *The Philosophy of Don Hasdai Crescas* (1920); *Mishle Yisrael,* a dictionary of quotations (Hebrew; 1933); *Dor Dor Umehannechav,* a history of the philosophy of education (part 1, New York, 1927). Waxman was a member of the administrative committee of the Palestine Foundation Fund and the Jewish National Fund (1921-24), and vice-president of the Histadruth Ibrith (1933-34).

Meyer Waxman

Max Weber

WAXMAN, SAMUEL MONTEFIORE, professor of Romance languages, b. Boston, 1885. He studied at the École des Hautes Études and the Ecóle des Chartes, Sorbonne (1908-9), and at Harvard University (Ph.D., 1912), taught at the Faculté des Lettres of the Sorbonne (1908-9), and became assistant (1913) and associate professor (1920) at Boston University.

His published works include: *Chapters on Magic in Spanish Literature* (1916); *A Trip to South America* (1916); *Antoine and the Theatre Libre* (1928); *A Bibliography of the Belles-Lettres of Santo Domingo* (1931); *A Bibliography of the Belles-Lettres of Venezuela* (1935). Waxman edited *Nomads and Listeners of Joseph Edgar Chamberlain* (1937).

WEBBER, ABRAHAM CHARLES, lawyer and government official, b. Boston, 1876. He received the law degree from the Boston University Law School in 1898, and was admitted to the bar the same year. From 1909 to 1919 Webber was assistant district attorney for the Suffolk district. During this period and subsequently, by special gubernatorial appointment, Webber carried out important investigations for the state. These included studies of the narcotic drug situation and the prosecution of profiteering in the fish industry, during the first World War, that provided a precedent for legal processes against profiteering.

From 1932 to 1936 Webber was commissioner of the Massachusetts department of public utilities, and from 1937 to 1939 he was chairman of the state department of public utilities. He was a lecturer in legal medicine at the Boston University Medical School (1934-). His book, *Webber on Principles of Public Utility Regulation* (1941), was considered the authoritative presentation of the subject.

Lit.: *Public Utilities Fortnightly,* June 19, 1941, pp. 808-9; *Bar Bulletin,* June, 1942.

WEBER, JOSEPH M. (JOE), comedian and producer, b. New York city, 1867; d. Los Angeles, 1942. Born and reared on the Lower East Side of New York city, he began his theatrical career at the age of eight when, together with Lew Field, a neighborhood boy, he formed a singing and dancing team which appeared in the variety halls of the old Bowery. They toured the country for many years, and in 1896 opened a theatre of their own, the Imperial Music Hall on Broadway, where they produced many successful shows.

The teamwork of Weber and Field, the "Dutch comedians," came to an end in 1904 when Field went his own way, but several years later the partnership was revived. Weber produced and appeared in many popular plays, including: *Only Girl* (1914); *Little Blue Devil* (1918); *Honeydew* (1920); *Friendly Enemies* (1925). In 1932 tribute was paid to Weber and Field on their golden jubilee in New York.

Lit.: *Literary Digest,* April 25, 1925; *New York Times,* May 11, 1942; Gilbert, Douglas, *American Vaudeville* (1940) 77-79, 352-55; *American Hebrew,* March 13, 1925, p. 553; Sept. 16, 1932, p. 323.

WEBER, MAX, artist, b. Bialystok, Russia, 1881. He was brought by his parents to the United States at the age of ten. He received instruction in drawing at the Pratt Institute in Brooklyn, from which he graduated in 1900. Within a dozen years he had progressed sufficiently to become recognized not only as a talented painter, but also as an inspiring lecturer on art appreciation. From 1920 to 1921 and again from 1925 to 1927 Weber taught painting from life at the Art Students League in New York city. While Weber achieved so definite a style of his own that his canvases can be readily recognized, many influences are observable, due to Weber's eclecticism as a lover of art. Probably few painters have ranged so widely in their admirations.

His study at the Julian Academy in Paris, where at the same time (1901) there were such young men as Bernard Wistoff, Mahonri Young and Bernard Karfiol, later to become distinguished artists, brought Weber into closer knowledge of Ingres and of Daumier, of Courbet and Corot. At the Louvre the old masters Giotto, Masaccio, Giorgione, Rembrandt and others aroused his enthusiasm, and, later, such moderns as Van Gogh, Renoir, Picasso and especially Cézanne, who influenced Weber most particularly from a plastic point of view. Add to all these his study of archaic Greek sculpture, Egyptian, Chinese, African Negro and Etruscan art, and one arrives at the realization of the many strains that have flowed in the non-imitative yet reminiscent paintings of Weber.

His *Essays in Art* make evident beliefs and ideals to which he consistently held. There we find a painter not interested in any special school, in any particular technique, but in that self-expression in which a spiritual quality is often manifest. Weber is a fine draughtsman, a fine colorist, and thus there is a subtle element in his paintings. A fearless experimenter, he remained decidedly European, with, in the opinion of some critics, a quality of Hebraic thoughtfulness, and even of Jewish "morbidezza," adding profundity to works whose imaginative quality is not to be confounded with fantasy.

One of the most distinguished of painters in America, Weber was definitely un-American, devoid of that matter-of-factness characteristic of so many of his contemporaries. Weber regarded art consciousness as the human consciousness of the God in man, and looks upon art as a greater socializing force than Socialism can ever be. The artist's expression "never turns art into a science or a process," but results from an inner urge. Thus, for all his studies and knowledge, it is the inspirational and emotional element that has had the most significance for Weber.

Among the works which he himself considered his best are: *Chinese Restaurant,* in the Whitney Museum of American Art; *Talmudists,* in the Jewish Theological Seminary of America; *Winter Twilight,* in the Santa Barbara Museum; *Refugees,* in the Wichita, Kan., Museum of Art; *Straggly Pines,* in the Metropolitan Museum of Art; and *Fourth Dimension, Chassidic Dance, Toilers, Invocation, Bread and*

Peppers, Whither Now? and *La Toilette,* in various private collections. These titles indicate the range of subjects of an artist represented in still more art museums than those already named, one of them being the Art Institute of Chicago, which awarded to Weber the Potter Palmer gold medal and $1,000 in 1928. How Weber was regarded by his fellow painters is shown by the fact that he acted as the national chairman of the American Artists' Congress. His writings include *Cubist Poems* (1914); *Essays in Art* (1916); and *Primitives* (1927). GEORGE S. HELLMAN.

Lit.: *Menorah Journal* (1933), No. 1, p. 7; *American Hebrew,* Sept. 19, 1930, p. 474; March 6, 1936, p. 453.

WEBER, MAX, non-Jewish sociologist and political economist, b. Erfurt, Germany, 1864; d. Munich, Germany, 1920. As a professor of social and political sciences at the Universities of Heidelberg, Vienna and Munich, Weber exerted a great influence on modern sociology and the theory of political and economic sciences. His activity became particularly important for knowledge of Judaism when he founded the so-called "sociology of religion."

Proceeding from a criticism of the economic interpretation of history initiated by Karl Marx and of Werner Sombart's studies on the foundation of capitalism attributed by the latter to the "spirit of Judaism," Weber at first opposed to Sombart the theory that the ethics of Calvinism, especially that of Puritanism, was in a higher degree responsible for the development of capitalism. Then he advanced to a general theory of the relations between religious belief and social formations, studying the role of religion in the union of human groups and the external life of men.

The third volume of Weber's *Gesammelte Aufsätze zur Religionssoziologie* (1921) deals with ancient Judaism. His analysis of the sociology of the ancient Israelitish religion unites broad views and an acute precision which penetrates the historical facts under new aspects. Although Weber originally based his studies on Julius Wellhausen and Eduard Meyer, he finally differed from them in his appreciation of the religious development of Judaism during the Babylonian Exile and of "Judaism" as distinguished from the ancient "Israelitism." Thus he freed himself from a great many of the prejudices which influenced Wellhausen, Meyer and other non-Jewish scholars.

He intended also to deal with the Judaism of the Talmudic period, but could only outline a fragment in his great work, *Wirtschaft und Gesellschaft* (1926-28), which was published after his death.

During the first World War Weber, who was fundamentally opposed to Pan-Germanism, was one of the earliest to advocate publicly the establishment of a democratic regime in Germany. After the War he was one of the founders of the German Democratic Party. His general theory of science was attacked by Erich von Kahler and defended by Arthur Salz.

Lit.: Guttmann, Julius, "Webers Soziologie des antiken Judentums," *Monatsschrift für Geschichte und Wissenschaft des Judentums* (1925); Weber, Marianne, *Max Weber* (1926); *Encyclopaedia of the Social Sciences,* vol. 15 (1935) 386-89.

WECHSELMANN, IGNAC RITTER VON, architect and philanthropist, b. Nikolai, Upper Silesia, 1828; d. Budapest, 1903. After completing his studies in Berlin he came to Vienna and became assistant of the famous architect Ludwig Förster. In 1856 he settled in Budapest, where he designed many important edifices, including the Great Synagogue, the buildings in the Royal Park of Buda, the old University Building, and the University Library. In 1886 he was knighted for these services by Emperor Francis Joseph I of Austria. Wechselmann founded an institution for the blind, and left it five million crowns.

WECHSLER, ISRAEL SPANIER, physician, b. Lespedi, Roumania, 1886. He came to the United States in 1900, and received the M.D. degree from the New York University School of Medicine (1907). Wechsler started his academic career as instructor at Columbia University (1917), and in 1931 was made associate professor of neurology there, a position which he still held in 1943. In 1918 he was awarded the Lucien Howe Prize in medicine, for the state of New York. Wechsler pointed out the importance of food deficiencies as among the causes of polyneuritis, and was author of *Text-Book of Clinical Neurology* (1927) and *The Neuroses* (1929).

Wechsler represented the American Jewish Physicians' Committee at The Hebrew University, Jerusalem; and in 1930 was appointed a member of the newly formed executive committee of the Zionist Organization of America. He was president of the American Neurological Association (1934-36).

WEDDING AND WEDDING CUSTOMS. 1. Introduction. The contracting of a marriage is regarded as such an important occasion in the lives of the wedded pair and of their entire families that the Jewish people have accompanied its ceremonies with a wealth of imagination and beliefs, customs and sportive festivities. Every detail of the wedding, from the time that the date of the wedding is decided up to the final moment when the bride and groom withdraw within the bridal chamber, has been elaborated and embellished by the creative imagination of the Jewish people. Naturally, however, such marriage customs vary widely according to tradition and the customs of the country.

2. Setting a Date for the Wedding. In Western Europe a Jewish wedding is set for Tuesday wherever possible, since this day is regarded as particularly fortunate; the story of creation twice makes use of the expression: "And God saw that it was good" for this day (*Gen.* 1:10, 12). According to Maimonides, the best day for a wedding is Sunday; a proper marriage celebration lasts seven days, and it will thus have its conclusion and climax on the Sabbath. In the Caucasus, Jewish weddings usually take place on Wednesday. There are certain seasons during which weddings are not to take place, including the Sefirah period between Passover and Shabuoth, with the exception of Lag Beomer, the Ninth of Ab, and the Seventeenth of Tammuz. In the Talmudic period, and probably as early as the time of the Persian Empire, virgins were married on Wednesday, since the court before which accusations as to lack of virginity were to be brought held its sessions on Thursday. Widows, on the other hand, were married on Thursday. In later times, as in Eastern Europe today, Friday afternoon came into preference. Two weddings on the same day were avoided, especially if they were those of brothers and sisters. In more modern times, and especially in the early period of Jewish settlement in the United States, the choice of a day for the wedding was determined by the time when the community could assemble. During the week the men usually went out peddling, starting on Monday morning and not returning until Friday noon. For this reason Sunday was the best day for a marriage, and was often always the day chosen when the Jews first came to the United States. This same reason may explain the preference for Friday afternoons in other localities.

3. The Wedding Week. The Jews of Eastern Europe and the Sephardic Jews frequently celebrate a

State Library, Hamburg

THE WEDDING

From an Illuminated Manuscript of the 15th Century

wedding for seven days, in accordance with the Biblical account of the wedding of Samson (*Judges* 14:17). During this week before the wedding day, called "Chassene Spielen" in Eastern Europe, the relatives of the betrothed couple send them presents of sweets, called "Mastwoche," and the couple themselves may not leave the house without an escort. On Friday evening a great reception, called "Spinholz" (a corruption of the Latin *sponsalia*) or, in Poland, "Vorspiel," is held in honor of the parents of the couple. On the day before the wedding the leading members of the community, headed by the rabbi, solemnly bring the gifts of the bridegroom (*hathan,* commonly pronounced *chosen*) to the bride (*ḳallah*). These presents, in accordance with a custom practised among non-Jews as well, consist of a girdle, a veil (after the example of Rebekah in *Gen.* 24:65), a mantle and a wreath. Later on there were added a "Siflones Tefille," a prayer-book with an inscription taken from the marriage service: *'Ahabah ve'ahavah shalom vere'uth,* and with an appropriate title-vignette; among the Greek and Turkish Jews another ring, called "Nissuin," is also given. The ancient Greeks and Romans called the latter *symbolum,* which is the origin of the Yiddish expression "Siflones." The bridegroom received a ring and a pair of shoes, and later on a Tallith, or prayer-shawl, and a shroud (Sargenes). Such girdles and rings, the latter sometimes artistically decorated with the model of a synagogue and the inscription *betaba gada* or *mazal tob* ("good luck!"), became family heirlooms. It is most likely that these rings were never intended to be worn (cf. Abrahams, I., *Jewish Life in the Middle Ages,* 1932, pp. 181-82). Another widespread custom, following an ancient Oriental custom, is to honor the bridal pair as king and queen during the wedding week; cf. the expressions used in the *Song of Songs.* In Eisenstadt and many other places it was customary that, on the Sabbath just before the wedding, the association of "Bahurim," or young men who were studying the Talmud, would send a delegation to the bridegroom to secure his promise to give them the "Schatzgeld," the ransom money of the youth.

4. The Wedding Procession ("Meienführen"). On the day of the wedding itself the bride and groom fast until after the nuptials; this was a mourning ceremony in memory of the destruction of the Temple, which was not to be forgotten even on the day of the greatest joy in life. In order that the fast of the bridal pair may not be unduly prolonged, the marriage ceremony proper, the "setting up of the Huppah," usually takes place at noon. The wedding begins with the "veiling" of the bride in her parents' home. A four-cornered transparent cloth is placed over the head of the bride, in the absence of the bridegroom, by four young people; nowadays this is usually done by the rabbi. This "veiling" is symbolic of her obligation of chastity. An address, based on *Gen.* 24:60, is delivered, and hop blossoms, the symbol of fertility, are strewn over her head. Next follows the wedding procession, in which the bride and groom, separately conducted, accompanied by music and tapers and with others dancing around them, are led beneath the Huppah by the "escorters." A great part is played in nearly all localities by such rites as the following: Wheat kernels, fish, milk and honey are employed as symbols of fecundity; the bride walks three times around the bridegroom under the canopy, a form of appropriation by walking around which is used also on other occasions; there are symbols of the transitory nature of fortune, the fragments of glass, and the shrouds; there is the recognition of the bride as wife and the transfer of authority to her, by the touching of the door-post and the handing over of objects; the marriage takes place in the open air, a custom based on *Gen.* 15:5. However, in modern times the Huppah, together with its attendant ceremonies, has been transferred from the open air to the synagogue or the home. The myrtle wreath, still used today, is a survival of that crowning of the bride which was customary in Biblical times.

The details of the wedding procession show a wide range of variation, according to the customs of the various countries. In Germany, for which country we have the report of a wedding procession which took place in Mayence at the end of the 14th cent., the "Schulklopfer," on the day of the wedding, went around early in the morning and invited the community to take part in the wedding procession. Musicians and torch-bearers led the procession which escorted the bride and groom to the synagogue. Among the Spanish Jews the wedding procession was preceded by comedians, fiddlers, horsemen and armed men. In Egypt the bride would don a helmet and a sword for the wedding procession, while the groom, on the other hand, wore feminine articles of apparel; this was done in order to deceive the demons. Still other customs were observed in the Caucasus and in Georgia. The wedding procession proceeded from the homes of the bride and the groom as far as the synagogue; it then took place in the open air, as it still does in many cases in Eastern Europe.

5. The Wedding Ceremony. As soon as the bride arrives at the synagogue, she is led under the canopy by the two mothers or by her women friends, and the bridegroom by the two fathers or by his friends. The four poles of the Huppah are held by four unmarried young people. The wedding ceremony then begins, usually after the recitation of that part of the liturgy which is called for at that time of the day; only the male wedding guests can participate in the conducting of these services. The wedding service begins with the chanting of the "Mi Addir," after which the rabbi or reader recites the first part of the blessings prescribed for the wedding (Sheba Berachoth). The rabbi did not take part in the marriage ceremony until the 14th cent. Next the bridegroom places the ring, which must be a plain gold band unadorned with jewels, on the index finger of the bride and the marriage document (Kethubah) is read aloud. While placing the ring on the bride's finger the bridegroom pronounces the proper formula of betrothal: *hare 'at mekuddesheth li betabba'ath zo ḳedath Mosheh veyisra'el* ("Behold, thou art consecrated unto me by this ring according to the law of Moses and Israel"). This is very similar to the formula used in Christian weddings, "With this ring I thee wed, and with all my worldly goods do thee endow." However, in the Jewish wedding, the ring is not symbolic of a sacrament, but represents an article of value, even though the amount be small, which is handed over by the bridegroom to the bride. The wedding ceremony is closed with the recital of the second part of the wedding blessings. At the end of the recitation of both the first and the second part of these benedictions the bride and groom drink from one cup, as the symbol of their marital union. In the Orient, during the Gaonic period, the seven wedding benedictions were recited both in the home of the bridegroom and, still previously, in the house of a relative of the bride. At many marriage ceremonies, especially among Orthodox and Conservative Jews, the prayer for the dead, "El Male Rahamim," is inserted at the beginning of

the ceremony in case one or both of the parents of either bride or groom is deceased. The text of the Kethubah varied according to the age and the locality; it is artistically adorned among the Sephardim, especially in Italy.

There are a number of well-known and frequently observed popular customs in connection with the wedding itself. Such are the breaking to pieces of a glass by dashing it against a specified spot on the wall of the synagogue (Bodenschatz, *Kirchliche Verfassung der Juden,* vol. 4, p. 126), or by stamping on it with the right foot; there are other acts which symbolically express the wish for the fruitfulness of the wedding. In Poland, Posen and other places the bridegroom himself breaks the glass while the guests exclaim: "Mazal Tob!" The symbolical expressions of the wish for fecundity include the bestrewing of the bridal pair with wheat, a custom practised along the Rhine and in Hesse, allowing hens to fly over the canopy, a custom which used to be observed in Posen, and various forms of fish symbolism, such as the fish dance of the bride, which was common among the Sephardic Jews of the Balkan countries.

6. The Wedding Meal. The wedding celebration is concluded with the wedding meal, to which the guests are invited by the Marshalik, or jester. It begins with the cutting up of an unusually large wedding-loaf (Barches), of which every guest receives a piece, and which he eats after pronouncing the usual benediction over bread. The first course given to the bridal pair is a soup made of the flesh of a chicken, which is intended to be a symbol of fecundity, and is called "Goldene Jauch." The meal is accompanied by the playing of the musicians (Klezmorim) and the jests of the Marshalik. In order, however, to stress the value of the words of the Torah even in the midst of the most joyous celebration, it is the custom, still frequently observed in Eastern Europe, for the bridegroom to deliver a Derashah, an address which is based on verses from the Bible and which interprets these according to the Midrash. (In some localities this Derashah, or Talmudic discourse, is delivered immediately preceding the actual wedding.) During the wedding meal the Marshalik not only entertains the guests, but also has the task of announcing the list of the wedding gifts received by the couple; these gifts, since they are announced at the same occasion as that of the discourse of the bridegroom, are called "Derashah gifts." The Marshalik displays the gifts and announces the names of the senders, making good use of this opportunity to display the full force of his wit. The wedding meal ends with the usual grace after meals (Birkath Hamazon), into which the seven wedding benedictions are interpolated; it is followed by dances, of which the most striking feature is the "Mitzvah dance," the dance of the foremost member of the wedding party with the bride. In many localities wedding songs are sung and dramas are recited during and after the wedding meal.

GEORG HERLITZ and MAX GRUNWALD.

7. Modern Changes. Just as the wedding ceremonies of the Jews in the Middle Ages and up to the 20th cent. reflected the customs of the peoples around them, though retaining a solid Jewish core, so in modern times there has been a tendency to modify Jewish wedding customs, especially in Western Europe and the United States, in conformity with prevailing customs among non-Jews and the changed conditions of the times. Thus even among the Orthodox many of the old customs are no longer observed. The Marshalik no longer functions and the bridegroom's Derashah has fallen into disuse. Weddings take place on any day of the week except, of course, the Sabbath and the festivals and the traditional times when no Jewish weddings take place. It is often the custom for the male members of the wedding party to be supplied with white skullcaps to match the white dress of the bride. Weddings are almost never held out of doors, and the veiling of the bride is no longer rigidly observed.

Reform Jews generally omit a number of the features of the traditional wedding ceremony, such as the practice of fasting, the Huppah, the reading of the Kethubah, the second cup of wine, the seven benedictions and the breaking of the glass. The prohibition of certain seasons of the year for weddings is disregarded, though no weddings are performed on Sabbaths, holidays or generally, out of respect for the tragic nature of the day, on the Ninth of Ab. The wedding ring is permitted to be of other metals than gold and to be ornamental in form or set with precious stones. The service is for the most part in English, though the traditional Aramaic wedding formula (*hare 'at mekuddesheth li*) is always retained. The wedding procession is adapted to prevailing wedding customs and the ceremony is frequently accompanied by such music as *Oh Promise Me, I Love You Truly* and the wedding marches of Wagner and Mendelssohn. Many ceremonies are held at the home or other convenient places instead of in the synagogue. Between this comparatively simple ceremony and the elaborate Orthodox ones there are numerous intermediate variations, depending upon the background and wishes of the wedding pair and their families.

WEDDING-RING, *see* MARRIAGE; RING; WEDDING AND WEDDING CUSTOMS.

WEEK (in Hebrew, *shabu'a*). The idea of the week, as a subdivision of the month, seems to have arisen in Babylonia, where each lunar month was divided into four parts, corresponding to the four phases of the moon. The first week of each month began with the new moon, so that, as the lunar month was one or two days more than four periods of seven days, these additional days were not reckoned at all. Every seventh day (*sabbatum*) was regarded as an unlucky day. This method of reckoning time spread westward through Syria and Palestine, and was adopted by the Israelites, probably after they settled in Palestine. With the development of the importance of the Sabbath as a day of consecration and the emphasis laid upon the significant number seven, the week became more and more divorced from its lunar connection, so that by the time of the Second Temple it was merely a period of seven days and no longer depended on the new moon. From Judaism the week passed over to Christianity, and through the influence of the latter was generally adopted throughout the Roman empire; Islam also made use of the week for its Sabbath days.

Jews never had any special names for the days of the week, usually denoting them by ordinal numerals: 1st, 2nd, 3rd and so on. Friday, however, was sometimes known as Ereb Shabbath ("day before the Sabbath") and Sunday as Motzae Shabbath or Mohorath Hashabbath ("day after the Sabbath"), while the Sabbath of course had its own designation. The Babylo-

nians devoted each day of the week to a separate god or goddess, and our present names of the days of the week are derived from these as follows:

Day	Babylonian God	Corresponding Teutonic or Roman God	Day
1.	Shamash, the sun	The sun	Sunday
2.	Sin, the moon	The moon	Monday
3.	Nergal, Mars	Tyr	Tuesday
4.	Nabu, Mercury	Woden	Wednesday
5.	Marduk, Jupiter	Thor	Thursday
6.	Ishtar, Venus	Freya	Friday
7.	Ninib, Saturn	Saturn	Saturday

It will be noticed that the positions of the deities in the 3rd to 5th days have shifted, as Nergal is really equivalent to Thor, Nabu to Tyr, and Marduk to Woden.

Among the Jews, Monday was regarded as the most unlucky day, as the phrase "and God saw that it was good" does not occur in the account of the second day of creation. On the other hand, Tuesday is especially lucky, because in the story of the third day the phrase occurs twice. Wednesday night was the favorite time for weddings in the Talmudic period; in the same period, however, it was shifted to Tuesday night, and in modern times Friday afternoon was often a favorite occasion. In Jewish folk lore, it was considered dangerous to be abroad on Wednesday and Saturday nights, as the demons were thought to be particularly active then. The Jewish calendar is arranged in such a manner that certain holidays can never fall on certain days of the week: Hoshana Rabbah on Saturday; Rosh Hashanah and Yom Kippur on Sunday, Wednesday or Friday; Passover on Monday, Wednesday or Friday.

WEEKS, FEAST OF, *see* Shabuoth.

WEIBERSCHUL (Hebrew, *beth hakeneseth shel hanashim,* "women's synagogue"), term used among German-speaking Jews in the Middle Ages and subsequently for the special place or location in the synagogue (Schul) which was assigned to the women for their use; the portion of the synagogue set aside for the use of the men at prayer was called "Männerschul" ("men's synagogue").

It would appear from the Talmud that originally there were provided for men and women only separate rows of seats situated near each other in the same room or part of the synagogue. The ruins of the Galilean synagogues which were uncovered by modern archeologists display the special place set aside for the women in the galleries. It was not until the Middle Ages, however, that the custom developed of building separate rooms or places for women.

These were situated close to the Männerschul or were elevated a trifle, and were connected with the latter by means of balustrades or windows. Galleries later developed from these elevated sections. In the late Middle Ages, furthermore, it became the rule to shut the Weiberschul off from the main part of the synagogue by means of thick bars or by means of glass-panes provided with curtains, so that the men should not be able to see the women.

In the 19th cent., as a result of the protests of the Jewish women against their separation in the synagogue, the bars were first set up at ever widening intervals and were finally done away with altogether, to a great extent in Conservative congregations as well. In modern synagogues, however, the separation of the men and women and even the women's gallery have for the most part persisted. In the Berlin Reform Congregation the women's gallery was eliminated altogether, and the women were assigned seats in a separate section which was next to that of the men; this arrangement lasted until 1928, and was adopted by several congregations.

In the United States the Reform Movement, following the pattern of American churches, did away entirely with this separation of men and women, beginning at Albany in 1850. In Europe, however, this took place only in the Reform Temples of London and Paris. In most of the Conservative synagogues of the United States women are permitted to sit with the men.

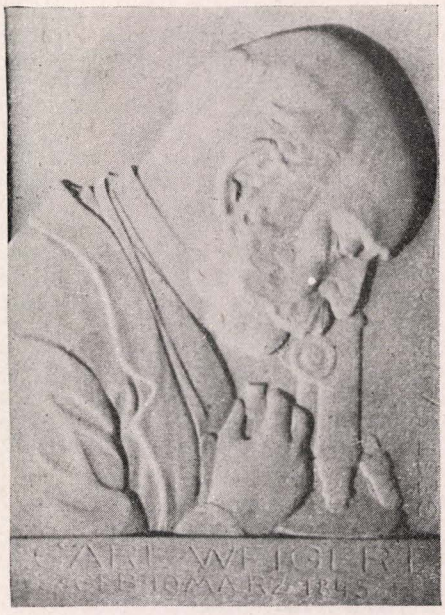
WEIDMAN, JEROME, writer, b. New York city, 1913. He studied at City College, Washington Square College and the New York University Law School. In 1937 his first novel, *I Can Get It For You Wholesale,* was published, after some of his shorter work had appeared in various periodicals. Immediately Weidman became a popular and controversial subject, both for his style and the corruptness of his characters.

The scene of the novel is set in New York's multiple-sided garment district; its leading character, Harry Bogen, is a Jew, out for his own advancement at the cost—in blood and cash—of everyone else. While this novel was more Jewish than the work of other writers of his type, the miserliness of comprehension shown by Weidman was a general rather than an individual characteristic. His leading character, who happened to be a Jew, was loathsome, but mainly because it was not the habit of writers to look for the cultural and genealogical construction of people, or even to see and hear anything but the characteristics that could be used in making the one-sided picture.



In *What's In It For Me?* (1938) the vicious and essentially superficial attack was continued, to the degree that late in 1938 the publishers of the book, Simon and Schuster, stopped issuing it because the portrayal of Jews in it was having an effect on readers that Julius Streicher and Joseph Goebbels would have applauded.

A collection of short stories, *The Horse That Could Whistle "Dixie"* (1939), showed the rudiments of Weidman's abilities—his knack for catching vernacular speech and—within limits—its overtones. *Letter of Credit* (1940) was a record of a trip around the world. *I'll Never Go There Any More* (1941) is another novel in a setting of rottenness, but without benefit of Jewish background. From 1939 to 1942 Weidman was a member of the editorial staff of Simon and Schuster, book publishers. In 1942 he joined the staff of the Coordinator of Information in Washington as chief of the book division. In 1943 he published his first "non-hard-boiled" novel, *The Lights Around the Shore.*

From the point of view of American literature Weidman typified the glib, slick and hard-boiled writers who became popular during the 1930's. From the Jewish point of view he represented the tragedy and the danger inherent in the talented young person who expresses his natural objectivity about the vices of his milieu, but remains ignorant of the culture that lies behind the milieu, so that the vices are not seen in their correct inconsequentiality beside the grandeur of which they are the thinnest spume.

Carl Weigert

WEIGERT, CARL, pathologist, b. Münsterberg, Silesia, Germany, 1849; d. Frankfort, Germany, 1904. He was related to Paul Ehrlich. In 1868 he received the M.D. degree from the University of Berlin, and during the Franco-Prussian War (1870-71) he served as regimental surgeon. From 1871 to 1874 he was assistant in the medical clinic of Breslau, and through his publications on smallpox attracted the attention of Julius Cohnheim, who appointed him his first assistant and instructor in pathology at the University of Breslau (1874). In 1879 Weigert became assistant professor of pathology at the University of Leipzig, but when, after Cohnheim's death (1884), he was the logical successor to a full professorship, this promotion was denied him as he would not embrace Christianity. Thereupon he left Leipzig, and was made director of the Senckenberg Institute for Pathological Anatomy at Frankfort (1884); he held this position until his death. Despite his international reputation as an outstanding pathologist and teacher, he received no honors in his native country except an honorary membership in the Institute for Experimental Therapy, directed by Ehrlich, and the title Geheimer Medicinalrat (1899).

Weigert was a pioneer in many fields of medicine. He was the first to stain bacteria, and devised new methods of staining tissues. He was the author of the Siva theory, dealing with the pathology of the tissue. Of great importance were his contributions on miliary tuberculosis and Bright's disease.

He was the author of ninety-seven publications, including studies of smallpox, cell proliferation on external stimulus, nephritis, coagulation-necrosis, tuberculosis of veins and its relation to miliary tuberculosis, differential staining of the nervous system and of human neuroglia. Part of his writings was published after his death by his disciple, Robert Rieder, under the title of *Gesammelte Abhandlungen.*

Lit.: Rieder, Robert, "Carl Weigert," *Gesammelte Abhandlungen* (vol. 1, 1906); Kagan, Solomon R., *Leaders of Medicine* (1941) 87-95; Lebowich, R., in *Opinion,* May, 1941.

WEIGHTS AND MEASURES (in the Bible and Talmud). The weights and measures used by the Hebrews and Jews were partly natural ones, such as the cubit (cf. "the cubit of a man," *Deut.* 3:11), and partly artificial; in both cases they show many points of contact with those of the neighboring peoples. Despite the fact that the Jews were not a great commercial people, they possessed a great number of weights and measures, including the following chief types:

1. Hollow measures. (a) dry measures: the homer, which was used for grain; the ephah, the tenth of the homer; the seah, the third of the ephah; the omer, the tenth of the ephah, hence called also simply *'issaron,* or "tenth"; the kab, the sixth of a seah. (b) fluid measures: the bath, the equivalent of the ephah; the hin, the sixth of the bath, and the log, a twelfth of the hin. In this set of measures the sexagesimal system prevails. A kab was about 130 to 135 cubic inches; an ephah, about 2,400 cubic inches.

2. Measures of length: the cubit (*'ammah*), or length of the underarm up to the elbow; the handbreadth (*tefah*), a sixth of the cubit. Greater lengths were measured by a reed staff, a cord, or a rope. In case of distances between places, they spoke of a day's journey, a far journey, and a stone's throw. The amount of ground that could be plowed by a pair of oxen in a single day was called *tzemed;* cf. the derivation of the English word "acre." Another way was to designate the extent of land by the amount of seed required to sow it; thus *beth kor,* as much as requires a kor (equal to 1 homer) of seed. The rabbis used also the following: *mil,* the Roman mile (*mille passuum*), and the Sabbath day's journey of 2,000 cubits; distances were measured also by the pace, the stadium and the Persian parasang. A span (*zeret*) was reckoned as from 2½ to 3 handbreadths, or about 11 inches. A cubit was from 18 to 22 inches. A parasang was not quite ¾ miles, and a day's journey was 10 parasangs.

3. Weights. Weights were made of stone, not metal, since the latter rusts; they were used by merchants in a scale that was provided with two pans. The unit of weight was the shekel. If sixty shekels amounted to a mina (Hebrew *maneh*), and 3,600 to a talent (*kikkar*), they were called "holy"; if only fifty of them were reckoned as a mina, it was called "profane." They made use also of half-shekels (*beka*) and quarter-shekels (*reba*); the shekel was equivalent also to twenty gerahs. In rabbinical times they used the Roman pound (*libra,* Hebrew *litra*) of twelve ounces. The smaller coins were the as (*'isar*) and the mite (*perutah*).

Dishonesty in measures, weights and quantities was strictly forbidden by both the Biblical and the rabbinical legislation; cf. *Lev.* 19:35-36; *Deut.* 25:13-16, and the rabbinical commentaries to these passages. Standard measures were kept in the Temple at Jerusalem, as is known to have been the case also in Athens and Rome, and all other measures had to conform to these. There are references to inspectors of measures. Several measures have been preserved *in natura,* and almost every excavation brings new discoveries.

SAMUEL KRAUSS.

Lit.: The Biblical dictionaries and archeologies; Dalman, *Arbeit und Sitte in Palästina* (1928-35); Krauss, S., *Talmudische Archäologie,* vol. 2 (1911) 382-404; *Jewish Encyclopedia,* vol. 12, pp. 483-90; Feldman, William, *Rabbinical Mathematics and Astronomy* (1931); Feldman, D., edit., *Kitzur Shulhan Aruch* (2nd ed., 1924) 169-208; Sheftel, Jacob, *Erech Millin* (1904); Zuckermann, B., *Talmudische Münzen und Gewichte* (1862); idem, *Das jüdische Masssystem* (1867); Klein, Meir, *Berure Hamiddoth Vehasheurim* (1925).

WEIL, A. LEO, lawyer and communal worker, b. Keysville, Va., 1858; d. Pittsburgh, 1938. He studied law at the University of Virginia, and was admitted to the bars of Virginia and Ohio in 1879.

In the following year, having been admitted also to the Pennsylvania bar, he established himself in practice in Bradford. Here he remained until 1888, when he

moved to Pittsburgh. Weil's career as a lawyer in Pittsburgh was interspersed not only with major cases in corporation law but with service as a civic reformer. In 1905 he was made president of the Voters' League, a post which he held until 1923. Under his direction, disclosures of graft in the city administration of Pittsburgh brought about confessions of guilt by fifty-four of the accused and convictions of ten more. Weil was responsible also for revisions in the city charter, for a reorganization of the school system and for the protection of public interests in the city's thoroughfares. He was frequently called by other cities to act as consultant in matters of civic reform, and was vice-president of the National Municipal League.

Actively allied all his life with Jewish affairs, Weil was vice-president of the World Union for Progressive Judaism and of the Union of American Hebrew Congregations. He was one of the incorporators of the American Jewish Committee, and for many years served on its executive board, and was also a trustee of the Jewish Publication Society of America.

Lit.: *National Cyclopedia of American Biography,* vol. 10 (1924) 155-56; *American Jewish Year Book,* vol. 41 (1939-40) 75-78; *Central Conference of American Rabbis Year Book,* vol. 31 (1921) 233-50.

WEIL, ARTHUR, neuropathologist, b. Braunschweig, Germany, 1887. He studied at the Universities of Munich, Halle and Berlin, and received the M.D. degree in 1914. During the first World War he was a captain in the medical corps of the German Army, and from 1919 to 1921 he served as an instructor of physiology at the University of Halle. He came to the United States in 1922. Weil was appointed assistant professor (1928) and subsequently associate professor (1930) of neuropathology at the Northwestern University Medical School, Chicago (1930); he still held this position in 1943.

His writings include *Internal Secretion* (originally published in German, three editions being issued between 1920 and 1923; it was later translated into English, Russian and Spanish) and *Textbook of Neuropathology* (1933).

Lit.: Kagan, Solomon R., *Jewish Contributions to Medicine in America* (1939) 629-30.

WEIL, BRUNO, jurist, author and orator, b. Saarlouis, Saar (then Germany), 1883. He studied social science and law in Strasbourg and Munich, and was a leading figure in the German Jewish student movement (K.C.). Prior to the first World War he established himself as an attorney in Strasbourg, and, as a liberal, he became a political leader, a defender of the civic party in the famous Zabern Affair (1913). His publication of *Elsass Lothringen und der Krieg* (first printed in the *Frankfurter Zeitung,* 1914) led to a court martial and his transfer to the Russian front.

After the War Weil transferred his activities to Berlin, where in 1926 he became vice-president of the Central-Verein, of whose executive body he had been a member for many years. In 1932 he was the only Jewish representative to appear on the candidates' list (for the Reichstag) of the Democratic Party in Germany. After the Nazis' ascent to power Weil placed his extensive international connections at the disposal of the Jewish organizations and delivered many speeches—as previously within Germany—against National Socialism and anti-Semitism in foreign countries. In 1935 Reinhold Heydrich decreed that Weil might no longer speak publicly. Weil left Germany in the same year, and went to North and South America, where he made studies regarding possible emigration of Jewish refugees and obtained Argentine citizenship. When the second World War broke out (1939), he was in Paris. He escaped from a concentration camp in France, going first to the United States and then to Argentina. He founded the Committee for Aiding Internees in Concentration Camps and the Committee for International Law Problems in Argentina.

Of his numerous publications, those dealing with *L'Affaire Dreyfus* won international renown. His discovery of the so-called *Schwartzkoppen Dokumente* (1930) gave the final proof of Dreyfus' innocence.

His legal, political, historical and Jewish writings include: *Juden in der deutschen Burschenschaft* (1905; against student anti-Semitism); *Jüdische Internationale?* (1924; on the international connections of Judaism); *Der Borkum-Prozess* (1925; lawsuit against the well-known anti-Semitic pastor Münchmeyer); *Der politische Prozess* (1928; means against anti-Semitism); *Der Weg der deutschen Juden* (1934; a critical description of the Jewish situation in Hitler Germany, which was at once impounded by the Gestapo); *Dreyfus* (1930); *Glück und Ende des General Boulanger* (1932); *Panama* (1933); *Baracke 37-Stillgestanden!* (1942; a description of life behind barbed wire in France in 1940). Most of his books were translated into French and Spanish.

In 1942 the publishing house of Dodd, Mead and Company, in New York, was forced to recall from publication and book stores Henry Torres' book *La machine internationale,* when Weil proved that the statements made about him in that book were false.

JOHN F. OPPENHEIMER.

WEIL, FRANK L., lawyer and communal leader, b. New York city, 1894. He completed his education at the Columbia University Law School in 1917. He was for many years active in the Young Men's Hebrew Association at 92nd Street, serving as its president from 1932 to 1940. In 1935 he was appointed employer representative on the New York Unemployment Insurance State Advisory Council by Governor Herbert H. Lehman. In 1940 Weil became president of the Jewish Welfare Board as successor to Judge Irving Lehman. He came to office at a time when the Board was called upon to expand its program rapidly because of the passage of the selective service law which put thousands of Jewish boys into uniform. His sincerity and earnestness, his devotion to high standards and his constant striving for unity in communal effort enabled him to meet this task successfully. The work of the Board was reinforced by negotiation with thirty-five national Jewish organizations which affirmed their support of the unified program. Weil participated in the formation of the United Service Organizations, of which he became a vice-president. He also contributed his efforts to the work of the Boy Scouts of America, the Jewish Center movement, which he headed as president of the Jewish Welfare Board, and other communal endeavors.

WEIL, GOTTHOLD, orientalist and librarian, b. Berlin, 1882. In 1906 he joined the staff of the Prussian State Library at Berlin, and in 1918 was made director of its oriental division. In 1912 he became instructor at the University of Berlin, and was made honorary professor there in 1920, giving lectures on post-Biblical Jewish history and literature. In 1931 he was appointed professor of Semitology at the University of Frankfort, but was dismissed by the Nazis in 1933. In 1935 he went to Palestine, where he became chief librarian of the Hebrew University, a position he still held in 1943.

His published writings include: *Abu'l Barkāt Ibn Al-Anbāri; Die grammatischen Streitfragen der Basrer und Kufer*

(Leyden, 1913); *Grammatik der osmanisch-türkischen Sprache* (Berlin, 1917); *Die Königlöse,* a free rendering of an Arabic fortune-telling book (Berlin, 1929); *Tatarische Texte,* based on original phonograph recordings in the Prussian State Library (Berlin, 1930). Weil was a member of the curatorium of the Hochschule in Berlin and (until 1935) of the academic council of the Hebrew University. He was also prominent in various Jewish scholarly organizations in Germany.

Lit.: Sefer Haishim (1937) 195.

WEIL, GUSTAV, oriental scholar and linguist, b. Sulzburg, Baden, Germany, 1808; d. Freiburg im Breisgau, Germany, 1889. He participated in a military expedition to Algiers in 1830 as a correspondent for the *Augsburger Allgemeine Zeitung,* spent five years teaching French at a medical school in Cairo, and at the same time acquired a thorough knowledge of the Persian and Turkish languages. In 1835, under great difficulties, he became an unsalaried lecturer at the University of Heidelberg, and gained his sustenance as assistant librarian. Weil advanced to the rank of librarian in 1838, and became assistant professor in 1848 and full professor in 1861.

Weil's major achievements were the first research on Jewish rudiments in the Koran and in Arabian traditional literature and the translation of the *Arabian Nights* into German. His chief writings were: *Die poetische Literatur der Araber* (Stuttgart, 1837); *1001 Nacht* (Stuttgart, 1837-41; 8th ed., 1909); *Mohammed, der Prophet* (Stuttgart, 1843); *Historisch-kritische Einleitung in den Koran* (Bielefeld and Leipzig, 1844 and 1878); *Biblische Legenden der Muselmänner* (Frankfort, 1845); *Geschichte der Kalifen* (Mannheim and Stuttgart, 1846-51); *Geschichte der islamischen Völker* (Stuttgart, 1866).

Lit.: Allgemeine Deutsche Biographie, vol. 41, pp. 486-88.

WEIL, JOSEPH, engineer and educator, b. Baltimore, 1897. He graduated from Johns Hopkins University (B.S. in engineering) and from the University of Pittsburgh (M.S., 1926). Weil first worked for the Westinghouse Electric and Manufacturing Co., then started teaching at the College of Engineering of the University of Florida (1921), and in 1930 was made full professor and head of the department, receiving the title of dean in 1937. In 1936 he became chief engineer of the Radio Station WRUF. Weil was made a member (1936) and in 1937 secretary of the Florida State Board of Engineer Examiners. From 1918 to 1919 he served as research assistant to the Naval Consulting Board. He was a vice-president of the War Service Committee of District No. 5, B'nai B'rith.

WEIL, LIONEL, civic and communal worker, b. Goldsboro, N. C., 1877. He was the descendant of a family which had settled in Goldsboro in 1858, eventually opening a department store there.

Weil was graduated from the University of North Carolina in 1897, and entered the family business. From 1904 to 1922 he was an alderman of the city, and also served as secretary of the city charter commission and of other civic reorganization bodies. He was a member of the council of the National Municipal League from 1917 to 1921. Weil also held important posts in state enterprises, including the vice-presidency of the North Carolina Tobacco Advisory Commission (1934-36) and membership on the State Board of Agriculture (1936-42).

During his membership on the Board of Agriculture he helped to promote and secure free service for soil testing for the farmers of North Carolina. His personal knowledge of agricultural and forestry problems resulted in his invention of a device for transplanting long-leaf pines and other evergreens, and also of a method for stabilizing plant hormones in fertilizer. This latter discovery resulted in a substantial increase in the production per acre of cotton and other products. Weil wrote several studies on agriculture and civics.

In Jewish affairs, he was active both locally and nationally, serving as state chairman of the American Jewish Relief campaigns of 1919 and 1922, and later as honorary vice-president of the United Jewish Appeal. He was North Carolina representative on the American Jewish Committee, and district president of the B'nai B'rith for the southeastern states (1914).

WEIL, RICHARD, physician, pioneer in cancer research, b. New York city, 1876; d. Macon, Ga., 1917. He received the M.D. degree from Columbia University (1900), did postgraduate work in Vienna and Strasbourg, and started as an instructor and in 1915 became professor of experimental medicine at Cornell University. He was one of the founders and vice-president of the American Association for Cancer Research, a founder and editor-in-chief of the *Journal of Cancer Research,* president of the Society for Serology and Hematology, and assistant editor of the *Journal of Immunology* and of the *American Review of Tuberculosis.* Weil was noted for his contributions to the serology of cancer and immunology. At the outbreak of the first World War he was commissioned a captain in the Medical Corps of the United States Army, and soon attained the rank of major. At the time of his death he was chief of the medical staff of the base hospital at Camp Wheeler, Ga.

Lit.: Kagan, Solomon R., *Jewish Contributions to Medicine in America* (1939) 78-79.

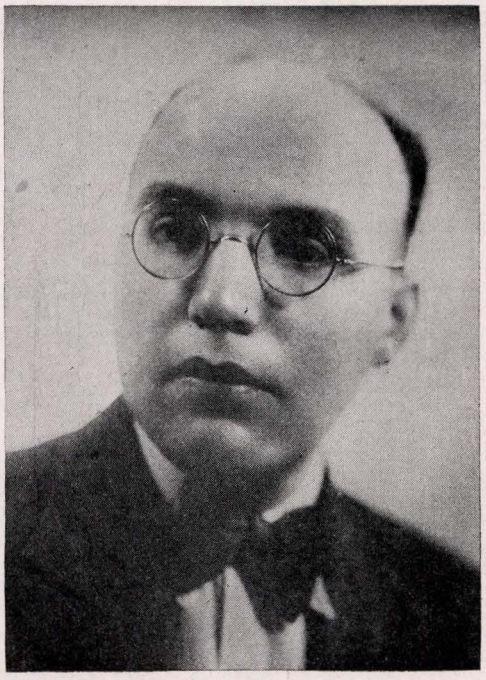
WEILL, FELIX, teacher and lecturer, b. Versailles, France, 1871. He graduated from the Sorbonne, and was a fellow of the faculty of letters there from 1894 to 1896. From 1896 to 1899 he was principal of the French Lycée in Mexico City, coming to the United States in the following year. Weill joined the faculty of the College of the City of New York in 1901 as instructor in Romance languages. In 1934 he was made head of the department, retaining this post until his retirement in 1939.

Weill was author of several textbooks, including *Historical French Reader* (1910); *French Newspaper Reader* (1912); and *Key to French Pronunciation* (1925). In recognition of his work as an educator and of his activities in French organizations, especially the Alliance Française, Weill was made a chevalier of the Legion of Honor in 1925, and was promoted to the rank of officer in 1938.

WEILL, JULIEN, chief rabbi of Paris, b. Versailles, France, 1873. He studied at the Séminaire Israélite of Paris during the years from 1891 to 1897. For many years he was rabbi of Versailles, succeeding his father, Emanuel, in that office. In 1936 he was appointed chief rabbi of Paris. In that capacity Weill came into conflict with the German occupying forces in 1941, when he refused to act upon an order to organize a council of the Jews living in the then occupied part of France. He objected to the request as not in accordance with the laws of France. Nothing was known about his fate following this refusal.

A son-in-law of Zadoc Kahn, chief rabbi of France during the Dreyfus Case, Weill published a biography of his father-in-law. He was author also of *La foi d'Israël* (1926); *Le judaïsme* (1927); and *Les antiquités juives.*

WEILL, KURT, composer, b. Dessau, Germany, 1900. He was a descendant of one of the oldest Jewish families in Europe, which had inhabited the south of Germany since the 14th cent.



His father, Albert Weill, was a cantor and composer of synagogue music, and his uncle, Aron Ackermann, achieved

note as a rabbi. Weill studied at the Berlin Hochschule and, after holding a few posts as conductor, completed his studies with Busoni. Settling in Berlin, he devoted himself to composition, writing *Fantasy, Passacaglia, and Hymn* for orchestra which attracted some attention.

It was in opera, however, that he achieved world fame. With an unorthodox idiom, somewhat radical in tendency, he wrote *Der Protagonist* (1926), which electrified German music audiences. In the *Dreigroschen Oper,* based on Gay's *The Beggar's Opera* (1928), he revealed for the first time his extraordinary flair for writing light, tuneful, seductive melodies. The *Dreigroschen Oper* was given more than 2,000 presentations in Germany, and was later filmed. *Mahagonny,* introduced in 1931, revealed Weill's good instinct for jazz writing.

His best scores were for *Johnny Johnson, Knickerbocker Holiday, Lady in the Dark,* and Max Reinhardt's Biblical spectacle, *Eternal Road.* He composed also *The Flight of Lindbergh,* for orchestra, *The Songs of the Free* (to verses by Archibald MacLeish), and *Three Walt Whitman Songs.* He produced music for several important radio productions, including *Magna Carta* and *This Is War,* and for the religious pageant, *We Will Never Die.*

Lit.: *Current Biography,* Dec., 1941; Ewen, David, *Composers of Today; American Hebrew,* Jan. 3, 1936, p. 231.

Kurt Weill

WEILLER, ANDRÉ, French general, b. 1865. In 1883, while a student of the École Normale Supérieure and the École Polytechnique, he enlisted in the French Army for a five-year term, entering the military school for officers in 1885 and becoming sub- (2nd) lieutenant in 1887. Weiller was promoted to a captaincy in 1898; in 1906 he was appointed special instructor in gymnastics at the French military school in Joinville, and served for three years in this post.

In 1909 Weiller became an attaché of the cabinet of the French minister of war, later being appointed director of the section of physical training and preparation for military service at the ministry of war. In June, 1914, having attained the rank of major, he was

General André Weiller

made president of the committee on examination in physical education at the Saint Cyr Military School, but after the outbreak of the first World War in August, 1914, he rejoined his regiment. Weiller served uninterruptedly at the front line throughout the entire War, suffering nine wounds, two of them serious, and rising to the rank of colonel. Before the end of the War he was appointed brigadier general.

He was cited eight times for unusual bravery under fire. Having become a chevalier of the French Legion of Honor in 1908, he was elected Officer in 1915, Commander in 1920, and Grand Officer in 1927, and was awarded the Croix de Guerre. Several years before reaching the retirement age he voluntarily had himself transferred to the reserves, being appointed technical adviser to the Federation for Physical Education headed by Baroness Edouard de Rothschild.

Weiller energetically combatted anti-Semitism in France and in the French colonies, and on several occasions engaged in public debates on the platform of Le Club du Faubourg, in Paris, a public debating club founded by the Jewish journalist Leo Poldès.

WEILLER, LAZARE, industrialist, and French senator, b. Schlettstadt, Alsace, France, 1852; d. Switzerland, 1928. He was descended from a wealthy and distinguished family, and was educated at the Lycée Saint-Louis, Paris, and at Oxford University, England. He established an iron rolling mill at Le Havre, France, of which he remained president until his death. Weiller invented a bronze wire "silencer" (bronze silencieux) and the taximeter, was one of the first men in France to study seriously the problems of modern aviation, and collaborated with the pioneers in this field, the brothers Wilbur and Orville Wright, whom he financed so that they might be able to carry out their flights. He was also the first in Europe to use the copper alloys which made possible long-distance telephoning.

In 1901 the government of Waldeck-Rousseau sent Weiller on an important diplomatic mission to the United States. There he studied American methods in business organization and plant equipment, and published a book on his experiences under the title of *Les grandes idées d'un grand peuple* (1902), which went through more than sixty editions. In 1910 he

was elected deputy by Charentes, and in 1920 he was made senator for the department of Bas Rhin. He married a daughter of Louis Emile Javal.

Weiller was a champion of French-American collaboration, and took the initiative in inducing the government to resume diplomatic relations with the Vatican. During the course of the Dreyfus case he strongly advocated the rehabilitation of that Jewish officer.

Beside the book mentioned above, he wrote *Traité général de lignes et transmissions électriques; De Montgolfier à Wilbur Wright* (1909); and *La dépression allemande vue de Suisse.*

Paul Louis Weiller (b. Paris, 1895), son of Lazare Weiller, became a noted engineer and administrator in the employ of the Société des Moteurs Gnome et Rhône. During the first World War he served under Marshal Foch, and utilized photography in a reconnaissance flight. He was an enthusiastic and expert airplane pilot and devoted much of his time to the problems of aeronautics; he also assisted his father in 1908. At the age of twenty-four he won the title of commander of the Legion of Honor. He was reported to be living in Paris in 1939.

Lit.: Wininger, S., *Grosse Jüdische National-Biographie;* "A French Statesman Passes On," *American Hebrew,* Sept. 7, 1928, p. 484; "Un précurseur: Lazare Weiller et les frères Wright," *L'Alsace française,* vol. 10 (1930) 247-48; *Dictionnaire Nationale des Contemporains,* vol. 1 (1939) 601.

WEIMAN, RITA, novelist and playwright, b. Philadelphia. She studied in Paris and at the Art Students League, New York city, and became a contributor to the Philadelphia *Evening Bulletin* and the New York *Sunday Herald.* She wrote *Footlights* (a collection of theatrical stories; 1923); the novel *What Manner of Love* (1935); and *Headline News* (1939), and was the only woman collaborator on *The President's Mystery Story* (1935). Her play *The Acquittal* was produced in New York city (1920) and in England (1928).

Together with her husband, Maurice Marks, she wrote the play *The King's Breakfast.* Her other plays include *The Watch Dog; The Correspondent; Moon-Magic; The Witness Chair;* and *Beauty* (with Mildred Cram). She assisted in the production of the screen versions of several of her own stories.

WEINBERG, JACOB, composer and music teacher, b. Odessa, Russia, 1879. He was a pupil at the Moscow Conservatory, where his teachers included Taneiev and Ippolitov-Ivanov, and later privately of Leschetizky. From 1915 to 1921 he was professor of piano and composition at the Odessa Conservatory. After settling for a few years in Jerusalem, he came to the United States in 1926, and two years later became head of the theory department and professor of piano at the New York College of Music. After 1937 he was affiliated also with Hunter College, New York.

His sojourn in Jerusalem influenced his creative style strongly, and some of his best-known works were written to Hebraic or Palestinian idioms. The most frequently performed of his compositions are the incidental music to *Jacob's Dream* and *Uriel Acosta,* the Sabbath evening service, and the opera *The Palestinians* (*Halutzim*). The latter won first prize at the Sesquicentennial contest held in Philadelphia in 1926, and was introduced in New York in 1934. Weinberg wrote music in a secular style as well, including a concerto for piano and orchestra, and *The Gettysburg Address,* for orchestra and chorus.

He was author also of several valuable theoretical works on music, including *New Classification of Scales; New Classification of Chords; Encyclopedia of Piano Technique;* and *Rudiments of Musical Language.* Weinberg was, in 1943, a member of the scholarship committee of the New York Philharmonic Symphony Society and a member of the governing board of the Jewish Music Forum. He was a founder of the Festival of Jewish Arts.

Lit.: Ewen, David, *Composers of Today; American Hebrew,* Nov. 30, 1934, p. 62; July 26, 1935, p. 196.

WEINBERG, SIDNEY JAMES, banker and government official, b. New York city, 1891. He graduated from Browne's Business College in 1907. He was appointed to the business advisory and planning council of the United States Department of Commerce in 1933; in 1943 he was still a member of this group. He served also on the industrial advisory board of the National Recovery Administration in 1934, and was made assistant director of purchases in the Office of Production Management in 1941. Later he became chief of the bureau of industry advisory committees of the OPM, and in 1942 was made assistant to Donald M. Nelson, chairman of the War Production Board, holding this post in 1943.

Weinberg was a member of the executive committee of the American Jewish Committee (1938-). During the first World War he enlisted in the United States Navy and became special agent in the naval intelligence department, as well as assistant director of the War Trade Board.

Lit.: New York World-Telegram, Aug. 5, 1938, p. 13.

WEINBERGER, BERNHARD WOLF, orthodontist, b. Idaho Springs, Col., 1885. He graduated from the University of Pennsylvania Dental School in 1908, and did post-graduate work at the Angle School of Orthodontia, in New London, the following year. Establishing himself in practice in New York city, Weinberger subsequently (1923) became a lecturer in dental history at the New York University College of Dentistry; from 1929 to 1931 he was a professor at the College. He was also a special lecturer at the University of Pennsylvania and at the University of Maryland.

Weinberger's private interest in the literature of dentistry led him, in 1913, to undertake the expansion of the dental division at the library of the New York Academy of Medicine. Under his supervision the department grew from a small collection of 500 volumes to a comprehensive section containing more than 15,000 volumes. Weinberger was dental librarian at the Academy from 1922 to 1929, when he was made consultant librarian, a post which he held in 1943.

He also served from 1919 to 1923 as secretary-treasurer of the American Dental Library and Museum Association, and held various committee posts on national and international dental associations. His published works include several volumes of dental bibliography, as well as a two-volume study of orthodontics (1926). He was on the editorial board of the *Journal of Dental Research* (1922-34) and of the *Dental Survey* (1929-).

Lit.: Kagan, Solomon R., *Jewish Contributions to Medicine in America* (1939) 420-21.

WEINBERGER, HARRY, lawyer and play producer, b. New York city, 1886. He received his law degree from the New York University Law School in 1908, and established himself in practice in New York city that same year. From 1909 to 1914 he was special assistant New York attorney general.

Weinberger appeared as counsel before the United States Supreme Court as well as before lesser courts, in some of the most important trials of his time involving constitutionality and other federal matters. He represented Emma Goldman in 1918, in a case concerning the constitutionality of the Draft Act. In 1919 he defended Jacob Abrams unsuccessfully in an

attempt to reverse his conviction under the Espionage Law. Weinberger's closing speech on this occasion was published in *Classics of the Bar* (vol. 6). Although Weinberger did not win a majority decision of the Supreme Court, Justice Oliver Wendell Holmes wrote the dissenting opinion and Justice Louis D. Brandeis concurred in it. Weinberger was also attorney for Grover Cleveland Bergdoll in his trial as draft evader in 1920 and when Bergdoll returned to the United States in 1938. After the first World War Weinberger obtained the release of many political prisoners.

First affiliated with the theatre as counsel, he later served also as director of the Provincetown Players. Weinberger produced Sholom Asch's play *The God of Vengeance* (1923), with Rudolph Schildkraut in the leading role; Eugene O'Neill's *Emperor Jones,* with Paul Robeson (1925); and helped found several summer theatres. He wrote widely on various aspects of free speech, free press and economics. He was an advocate of the Henry George theory of economics, and an independent in politics.

Lit.: Shay, Felix, *Elbert Hubbard;* Goldman, Emma, *Living My Life;* Chafee, Zechariah, *Free Speech in the United States;* Mock, James R., and Larson, Cedric, *Words That Won the War.*

WEINBERGER, JAROMIR, composer, b. Prague, Bohemia, 1896. Of peasant origin, Weinberger spent his youth on his grandparents' farm. While there he had the opportunity to listen to hundreds of Czech folk songs and dances, which influenced his musical outlook.

In early youth he enrolled at the Conservatory of Prague, where he became a pupil of Novák in composition and of Stecker in organ playing. It is interesting to observe that in his youth his compositions were exclusively written in the style of the French impressionists. Later he destroyed these manuscripts, and returned to the heroes of his boyhood, Smetana and Dvořák. A tremendous and overpowering attraction for folklore now gripped him.

Weinberger wrote four operas. His "star-act" was the folk-opera *Schwanda,* performed in Prague for the first time in 1927, and since then performed in all the great opera theatres of the world. This opera is one of the many glorifications of the Czech folk song, and may perhaps be compared to *The Bartered Bride* both in the choice of a popular legendary subject and in the character of its music. Weinberger's other operas are: *The Beloved Voice* (Munich, 1931); *The Outcasts of Poker Flat* (Brünn, 1932); and *Wallenstein,* performed at the State Opera in Vienna with signal success in 1937. Nor does the dramatist Weinberger outdo the composer of symphonies. Even before the creation of *Schwanda,* a number of symphonic works had appeared which had found listeners not only in Czechoslovakia, but especially in England.

At the age of seventeen Weinberger wrote a most effective *Marionette Overture,* but even greater popularity was accorded his *Overture to a Ritterspiel* which, brilliantly orchestrated and humorous in character, treats an old Czech theme. Equally impressive is the *Six Songs and Dances for Orchestra,* performed at Darmstadt in 1930.

Weinberger's life, up to the time when he came to the United States to settle there permanently in 1939, was a musician's life of migration and travel. Of his many journeys throughout Europe most important were his sojourns in France and England.

In 1933 he visited the United States for the first time, and was even then greatly impressed by the dynamic spirit of the American scene, and the wish arose in him to spend his life there. After his arrival in the United States as a permanent settler Weinberger was industrious. Of his new productions the most frequently performed is *Under the Spreading Chestnut Tree,* a set of orchestral variations on a popular English tune, which has become a permanent fixture in the repertoires of American symphony orchestras. Other recent American compositions by Weinberger include *Prelude and Fugue on Dixie;* the *Abraham Lincoln Symphony;* and two tone poems, *Song of the High Seas* and *Legend of Sleepy Hollow.*

Weinberger has been ceaseless in his quest for themes, realizing that in the United States, as nowhere else, a man's best part is demanded. He has been imbued with the spirit of his new home. In his American compositions—taking as their point of departure the visual sensations, descriptions of men and of places, the philosophic and religious, the intellectual manifestations of the new world—there is a sharp divergence from *Schwanda.* This is a case where a former minstrel has been oriented by a new experience and life in a new country toward a philosophic and religious approach, a phenomenon not often found in modern musical history. PAUL NETTL.

Lit.: Ewen, David, *Composers of Today.*

WEINBERGER, MARTIN, art historian, b. Nuremberg, Germany, 1893. He studied at the University of Munich under Karl Wölfflin. His studies were interrupted by the first World War, in which he participated and in which he was seriously injured.

After the War he concluded his studies in Munich. His thesis for the Ph.D. degree, *Die Nürnberger Malerei an der Wende der Renaissance und die Anfänge der Dürerschule,* was published in 1921. He studied also philosophy under Windelband at the University of Heidelberg. In 1921 Weinberger lectured at the Volkshochschule in Nuremberg. In the following year he became affiliated with the Alte Pinakothek in Munich, and, in 1924 with the Nationalmuseum of that city.

His research work started from his local surroundings, but his interest was attracted mainly by the problem of the differences between Northern and Italian art. In 1926 he received an assignment to the Kunsthistorisches Institut in Florence to do research work in exploring the process of the building of the Florentine cathedral. He stayed in Florence until 1929. In 1926 he had finished his book on Wolf Huber, a study of the artistic personality as set into his surroundings, and his relationship toward the inspiring ideas of his period. Returning to Munich, he joined the staff of the Theatermuseum, where he remained until the Nazis' rise to power in 1933.

Then he left, first for Florence, and continued his studies there. In 1936 he went to the United States, where he lectured at New York University, and from 1938 to 1942 also at the University of Pennsylvania. Besides this, Weinberger continued publishing the results of his research in important art periodicals. ELISABETH GUTMAN.

WEINER, LAZAR, composer and conductor, b. Kiev, Russia, 1897. After studying at the Kiev Conservatory, he came to the United States in 1914, continuing his music studies in that country. In 1922 he founded the Freiheit Singing Society, which he directed successfully. In 1931 he became conductor of the Workmen's Circle Chorus, and somewhat later assumed the baton for the Mendelssohn Symphony Orchestra in Brooklyn, N. Y.

He composed some interesting works which were widely performed in Europe and the United States, including *Theme and Variations,* for orchestra, a cantata, *Legend of Toil,* and a Jewish ballet, *Lag Boimer.* Three of his piano pieces were performed at the Festival of American Music held in Rochester, N. Y., in 1935.

WEINER, RICHARD, author, b. Pisek, Bohemia, 1884. He was a contributor to the daily paper *Lidove Noviny.* Weiner was regarded as one of the Czech

Cubists and compared to Karel and Josef Čapek. His main work is *Man Is a Plaything of Fate.*

He published the volumes of poetry *Mnoho Nocí* (Many Nights) and *Zatiší s kulichem, herbářem a kostkami* (Still Life with a Screech-Owl, a Herbarium and Dice) and the narratives *Netečny Divák* (The Indifferent Onlooker), *Smrt Jakuba Ondřicha* (The Death of Jakub Ondrich), and *Dvojník* (The Double). *Litice* (The Furies) was regarded as one of the best war books in Czech literature.

WEININGER, OTTO, philosopher, b. Vienna, 1880; d. Vienna, 1903. He was the only son of a well-to-do artisan. Studying primarily pure philosophy, but also biology, psychology, physics and mathematics at the University of Vienna, he acquired an immense amount of knowledge, including mastery of several languages. Originally a follower of the positivist and rationalist philosophy of Avenarius, he turned to the idealism of Kant and Plato, and adopted the dualistic and mystic outlook of the Neo-Platonist Plotinus and of the church father Augustine. This spiritual change, together with personal experiences, led him to embrace Christianity on the day he received his Ph.D. degree (in 1902), and to write his voluminous main work, *Geschlecht und Charakter, eine prinzipielle Untersuchung* (1903).

The book is an attempt to show the intimate connection between sex and character. While the first part, being biological and psychological, is treated more scientifically, the second and more important part of it is logical and philosophical and, altogether, more speculative. According to Weininger's uncompromisingly dualistic philosophy, Man represents the positive, productive, moral principle while Woman is absolutely negative, unproductive and amoral. The misery of mankind is caused by the bisexuality of all human beings, by the fact that each being is a mixture of male or good elements and of female or evil elements (in Weininger's sign-language, M + W). Seeing a great humiliation and deterioration of Man in his relationship with Woman, Weininger advocated total sexual abstinence and consequently the end of human physical life as a panacea.

In a chapter, "Über das Judentum," he constructed an antithesis between Judaism, conceived as the feminine element of amorality and unholiness, and the idealism of Christianity, conceived as the male element. While admitting, in a footnote, his own Jewish origin, he hurled the bitterest accusations against Jewry and Judaism which, later on, were frequently used by anti-Semitic agitators. After the publication of his *Geschlecht und Charakter* Weininger lapsed into a state of deep melancholy, of which he could not rid himself even by a recreation trip to Italy. He regarded himself as a sort of criminal, and confessed to an intimate friend that there were three ways open to him: suicide, the gallows and a most glorious future. Realizing that, if he wished to continue his life, he would either have to dismiss his rigid philosophy or refrain from putting it into practice, he shot himself only a few months after the publication of his book.

Geschlecht und Charakter attained nearly thirty German editions and was translated into many languages (it appeared in English under the title of *Sex and Character,* 1906). While Weininger's followers declared that he had given the final and irrefutable answer to all sex problems, his adversaries discredited him as a degenerate, an epileptic, a hysteric or even a lunatic (especially the Munich alienist, Ferdinand Probst, in *Der Fall Otto Weininger,* 1904).

The truth seems to be that Weininger, gifted with an enormous and premature intellect, made the mistake of drawing final conclusions from his own limited and unpleasant experiences and of presenting unsupported generalizations as facts. While his work makes interesting reading and surprises one by its wealth of ideas, it is on the whole void of any scientific value. As to Weininger's anti-Semitism, the philosopher Theodor Lessing and the poet André Spire assert that the unhappy author, like most Jewish renegades, completely lacked knowledge of Jewish life and lore.

A few months after Weininger's death a collection of his unpublished essays and aphorisms appeared under the title of *Über die letzten Dinge* (1904), with a biographical introduction by Moritz Rappaport. His aphorisms in particular reveal a sick spirit and a Jew-hatred even more bitter than the hostility shown in the chapter "Über das Judentum."

ALFRED WERNER.

Lit.: Lucka, Emil, *Otto Weininger, sein Werk und seine Persönlichkeit* (1905); Spire, André, *Quelques Juifs* (1913); Baum, Oskar, "Otto Weininger," *Juden in der deutschen Literatur,* edit. Gustav Krojanker (1922); Swoboda, Hermann, *Otto Weiningers Tod* (1923); Lessing, Theodor, *Jüdischer Selbsthass* (1930); Sachs, Joseph, "Weininger," *The Jewish Genius* (1939) 237-43.

WEINREICH, MAX, philologist, social psychologist, and author, b. Goldingen, Courland, Latvia, 1894. The son of a merchant, he was educated in the Heder, in a Gymnasium, at the University of St. Petersburg (1913-17), and at the Universities of Berlin and Marburg (Ph.D., 1919); his thesis for his doctorate on the subject of the history of Yiddish philology was published in excerpts in the university's abstracts of dissertations and in *Shtaplen* (1923).

Weinreich was one of the foremost Yiddish philologists, co-founder and co-director of the Yiddish Scientific Institute (YIVO) and of its Research Training Division in Vilna (1925-39). He came to New York city in 1940, becoming the director there. He was the teacher and inspiration of an entire generation of Jewish scientists in Yiddish through his activities as author, editor, teacher and guiding spirit of the YIVO. He played an active role in the standardization and refinement of the Yiddish language, especially in its extension and adaptation to serve every cultural and scientific need through the creation of new words (neologisms) and the utilization of the YIVO as a sort of "Yiddish academy." From 1922 on, and continuing into 1943, Weinreich labored on a dictionary of standard Yiddish. The first historian of Yiddish philology (*Shtaplen,* 1923), he was the first to publish a critical edition of a Yiddish author (Ettinger, 1925).

Weinreich's published works include: *Shturemvint* (1927), sketches on the Jewish history of the 17th cent.; *Bilder fun der Yiddisher Literaturgeshichte* (1928), sketches on the high points of the Old-Yiddish literature; *Shvartze Pintelech* (1939), a history of writing and printing; *Der Veg tzu Unzer Yugent* (1935), a socio-psychological study of the problems of the Jewish youth of Poland, written as the result of his appointment as fellow of the Rockefeller Foundation at the International Seminar on the Impact of Culture on Personality (Yale University, 1932-33) and as recipient of a grant in aid at Vienna and Vilna (1934-35); *Le Yiddish comme objet du linguistique générale* (which he published in 1936 as a member of the International Congress of Linguistics at Copenhagen).

In addition, Weinreich contributed the article "Form vs. Function in Yiddish" to the *Gaster Jubilee Volume,* translated into Yiddish parts of the works of Homer, Sophocles, Goethe (unpublished), Ernst Toller and other writers, was from 1907 on a contributor to or editor of Yiddish, German and Russian newspapers and periodicals, and was co-editor of the Vilna *Tog* (1919), editor of the Bund (Jewish workers') daily *Unzer Shtimme* (1918), a contributor to the New York *Daily Forward* (1920 on), co-editor of *Yiddishe Filologie* (1924), of the Yivo's *Filologishe Shriften* (1925 on) and *Yivo Bleter* (1931 on), and editor of the

latter two from 1940 on. Weinreich founded a non-partisan Yiddish scout organization, Di Bin (1928-33).

NATHAN SÜSSKIND.

WEINRYB, BERNARD D., historian and librarian, b. Turobin, Poland, 1900. He graduated from the Jewish theological seminary of Breslau, Germany, in 1929, and received the Ph.D. degree from the University of Breslau two years later. From 1928 to 1933 he was research librarian of the library of the Jewish theological seminary and of the Jewish community of Breslau, and from 1933 to 1934 he was a member of the board of editors of the *Encyclopaedia Judaica.* Shortly thereafter he left Germany, and went to Jerusalem, Palestine, where he served (1936-38) as lecturer on economics and the history of economics at the School for Social Workers and as research associate of the Economic Research Institute (1938-39). In late 1939 Weinryb settled in the United States, where, after serving for one year (until 1940) as instructor in history at the Herzliah Hebrew Teachers Seminary, New York city, he was appointed director of the Jewish Teachers Seminary and People's University, still holding this position in 1943.

Weinryb's works (written in German, Hebrew and English) include: *Studien zur Wirtschaftsgeschichte der Juden in Russland und Polen im 18.-19. Jahrhundert* (Breslau, 1933); *Neueste Wirtschaftsgeschichte der Juden in Russland und Polen, I, 1772-1881* (Breslau, 1934); *Praktisches Lehrbuch für Neuhebräisch* (in collaboration with Teitelbaum; 4 vols., Breslau, 1933-34); *Der Kampf um die Berufsumschichtung. Ein Ausschnitt aus der Geschichte der Juden in Deutschland* (Berlin, 1936); *Mehkarim Betholedoth Hakalkalah Vehahebrah shel Yehude Polen* (Studies in the Economic and Social History of the Jews in Poland; Jerusalem, 1939; dealing with the 16th to 18th centuries, and written in Hebrew but with an English summary); *Hador Hasheni Barehovoth* (The Second Generation in Rehovoth and Its Occupational Status; Jerusalem, 1939; Hebrew, with an English summary); *Bereshith Hasotzialism Hayehudi* (In the Beginning of Jewish Socialism. A. S. Lieberman, His Time and Contemporaries; Jerusalem, 1940; Hebrew, with English summary); *Jewish Emancipation under Attack. Its Legal Recession Until the Present War* (New York, 1942).

He was a contributor to the *Universal Jewish Encyclopedia.*

WEINSTEIN, LOUIS J., dental technician and metallurgist, b. Russia, 1881; d. New York city, 1930. In 1901 he established a prosthetic dental laboratory to do work for the dental profession, and subsequently studied dentistry and metallurgy. He was probably the first to carry on authentic research in dental metallurgy. During the first World War he served in an advisory capacity on the War Industries Board, doing research in connection with the conservation of platinum. In 1916 he and several associates founded the New York Post-Graduate School of Dentistry, which was subsequently taken over by Columbia University. He remained director of the school as well as instructor in applied physics and metallurgy until he resigned (1919).

From 1922 to 1928, under the auspices of the United States Bureau of Standards, he did research on the physical properties of dental gold alloys and allied materials. In 1929 he was appointed professor of metallurgy at Northwestern University.

Lit.: Dentogram, May-June, 1930, p. 9; *New York Times,* May 15, 1930.

WEINSTOCK, HARRIS, industrial expert and author, b. London, 1854; d. San Francisco, 1922. He came to San Francisco in 1872 and with his half-brother, David Lubin, built up a successful business at Sacramento which became famous (Weinstock, Lubin and Company, incorporated 1888) for the progressive ethical ideal it represented. He was president and director of several other companies and banks. In 1881 he joined the National Guard of California, in which he became lieutenant colonel in 1895. In 1891 he was elected a member of the board of freeholders of Sacramento, and helped prepare the new charter for the city government. He was an active member of the State Board of Horticulture (1895-1907), and one of the organizers and first president of the Commonwealth Club of California.

In 1909 Weinstock published *Strikes and Lockouts,* a book embodying the results of a tour made as special commissioner of Governor Gillette of California to investigate labor conditions the world over. He was one of the closest friends and advisers of Governor Hiram Johnson, who in 1913 appointed him a member of the American federal commission, of which he became vice-president, sent to study European systems of rural credits. He was also a member of the Industrial Accident Commission of California. In 1913 President Woodrow Wilson appointed him a member of the Industrial Relations Committee. From 1915 to 1921 he served as state market director.

Weinstock was for many years president of the Sacramento Jewish congregation, frequently occupying the pulpit when there was no rabbinical incumbent. He took charge of two of the drives of the American Jewish Relief Committee, once for San Francisco and once for the entire state, and was prominent in many other organizations. In 1912 he published *Jesus the Jew.* In the same year he endowed a foundation at the University of California for an annual lecture on "The Morals of Trade." He was one of the few men in America who diagnosed and prescribed for the ills of agriculture.

Next to David Lubin, he was the chief prophet and advocate of cooperative marketing and intelligent agricultural organization in the West.

Lit.: Publications of the American Jewish Historical Society, No. 29 (1925) 194-98; Nourse, *The Legal Status of Agricultural Cooperation,* 94 et seq.; *Western Jewry* (1916) 240.

WEINTHAL, LEO, journalist and author, b. Graaff Reinet, South Africa, 1865; d. London, 1930. He went to the Transvaal in 1887, where he became state lithographer, attached to the Surveyor-General's Department, under the government of President Paul Kruger. For some years he was a pro-Krugerite.

Financed by the late Sir Joseph Robinson, a non-Jewish mining magnate, Weinthal founded the *Pretoria Press,* and later on the *Pretoria News.* From 1888 to 1897 he acted as Reuter's chief agent in the Transvaal, and represented both the London *Times* and the *Daily Telegraph* at Pretoria at several periods. He moved to London in 1900, and in 1902 established the weekly *African World.*

For his services to Africa in many directions he was duly honored by several foreign governments. He was the recipient of the O.B.E. in 1919, and in 1922 of the C.B.E. He was a member of the Council of the African Society in London.

Weinthal was the author of *The Story of the Cape-to-Cairo Railway and River Route, 1887-1922* (4 vols.). He edited *Memories, Mines and Millions,* a life of Sir Joseph Robinson (London, 1929). S. A. ROCHLIN.

Lit.: African World, June 7, 1930; *London Times,* June 5, 1930; Rochlin, S. A., in *South African Jewish Times,* Sept. 23, 1938, p. 35.

WEINTRAUB, SHLOMO (KASHTAN), cantor, b. Old Konstantine, the Ukraine, 1781; d. Brody, Galicia, 1829. As a child he sang with the Hazan of Mogilev; because of his curly chestnut hair he was

called Kashtan. As a youth he was a devoted Hasid. He held positions as cantor in Zamość, Tiktin, Brest Litovsk, Dubno and Lemberg. Most of his singing, however, was done on his journeys, for throughout the year he traveled from city to city, singing everywhere, to the delight of the worshippers, and returning to his home only for the high holy days. He traversed all of Russia from Riga to Odessa, and Galicia, Hungary and Prussia. His private life was that of an ascetic: eating but once a day, and studying the Talmud and its commentaries from early morning to late at night.

Weintraub possessed a powerful and pleasant tenor voice, reaching E above high C, also a fluent coloratura. So great and touching was the effect of his chanting that often the entire congregation burst into weeping; even his choir at times was overcome to the point of being unable to sing its responses.

His compositions overflow with touching melodies and with the best elements of East European Hazanuth. Many of these were published by his son, Hirsh Weintraub, under the title of *Schire Schlomo* (Leipzig, 1859).

Lit.: *Die Chazanim Velt,* April and May, 1937; Idelsohn, A. Z., *Jewish Music* (1929); Friedmann, A., *Lebensbilder berühmter Kantoren,* vol. 1 (1918); Zaludkowsky, E., *Kulturtrager fun der Yiddisher Liturgie* (1930).

WEISBACH, WERNER, art historian, b. Berlin, 1873. He taught at the University of Berlin from 1903 on, and was assistant professor there from 1921 to 1933, when the Nazis came to power. Renaissance and Baroque were the main fields of his studies.

His best-known works are: *Francesco Pesellino und die Romantik der Renaissance* (1902); *Der junge Dürer* (1906); *Impressionismus* (2 vols., 1910-12); *Der Barock als Kunst der Gegenreformation* (1921); *Die Kunst des Barock* (3rd ed., 1930, vol. 11 of the famous *Propyläen Kunstgeschichte*); *Französische Malerei des 17 ten Jahrhunderts* (Berlin, 1932); *Geschichtliche Voraussetzungen der Entstehung einer christlichen Kunst* (Basel, 1937).

Weisbach emigrated to England in 1936, and published in London *The Pictures of the Evangelists in the So-Called Gospels of Otto III and Their Relation to the Antique* (1939) and *Spanish Baroque Art* (1941), three lectures delivered at the University of London. Of personal interest are his *Kriegsziele und deutscher Idealismus* (1915) and *Und alles ist zerstoben* (1937), a kind of autobiography.

Lit.: For articles by Weisbach and reviews of his works, see *Art Index* (1932-42).

WEISS (DE CSEPEL), a Jewish family of noted industrialists, philanthropists and civic figures.

Berthold Weiss (de Csepel), economist and industrialist (b. Budapest, 1845; d. Budapest, 1915), founded, together with his brother Manfred, various important industries, including the first factory for canned goods in Hungary and the metal and ammunition works at Csepel which later developed into the largest of their kind in Austria-Hungary. He also helped to reorganize several armament works in Hungary, and founded a shipyard and wool industries. He was a member of the court of arbitration of the Budapest merchandise and stock exchange, honorary president of the Lloyd Association of Pest, and active in the city government of the Hungarian capital. He influenced Hungarian legislation regarding industrial activities. In 1903 he was made an aulic councillor.

Manfred Weiss (de Csepel), industrialist and philanthropist (b. Budapest, 1857; d. Budapest, 1922), graduated from the Commercial Academy at Budapest and after a period of apprenticeship at Hamburg joined the industrial enterprise of his brother. He enlarged the ammunition works at Csepel by equipping them with a copper foundry, metal and steel works. Deliveries of ammunition were made by these works to many European powers, including Great Britain, Italy and Turkey, as well as to Mexico and China.

During the first World War the Austro-Hungarian Army depended for a great part of its ammunition supply upon these works, which, employing a daily average of 30,000 workmen, produced three million rounds of ammunition and 20,000 shells daily in addition to other matériel. The canned goods factory turned out several million food cans daily. After the War Weiss reorganized the plant and engaged in the manufacturing of agricultural implements, houseware and other metal goods for civilian use.

Manfred Weiss was the first industrial baron in Hungary to create extensive welfare institutions for his workers. During the first World War he founded a hospital and sanitarium for service men. He gave ambulances equipped with X-ray machines to the Hungarian Red Cross, and maintained a large soup-kitchen for the benefit of the war-stricken population. A sanatorium founded by him near Budapest for tuberculous service men was subsequently enlarged and turned over to civilian use.

Weiss was appointed a member of the Hungarian upper house by Emperor Francis Joseph I. He was knighted with permission to use the title "de Csepel," and was made a Hungarian baron. He was a founder and vice-president of the national association of Hungarian manufacturers.

Weiss took an active part in all Jewish endeavors. In the name of his wife he founded and endowed the Alice Weiss Lying-in-Hospital.

Alfonz Weiss (de Csepel), the son of Manfred Weiss, headed the Manfred Weiss Works and its welfare institutions after his father's death. During the second World War the works were again turned over to the manufacture of armaments and ammunition, and were the object of disastrous bombing attacks by the Soviet Union air force in 1942. Alfonz Weiss was associate president of the Jewish agricultural and trade association and an honorary member of the assembly of the Jewish community of Pest. In 1940 his wife headed an organization which was created to protect Jewish families against the destructive effects of the anti-Jewish laws. Anna Bettelheim.

Lit.: *Magyar Zsidó Lexikon* (1929) 958-59; issues of *Egyenlőség* and *Magyar Zsidók Lapja* (1931-41).

WEISS, ANDRÉ, jurist, b. Mülhausen (Mulhouse), Alsace, 1858; d. The Hague, Holland, 1928. He studied at the University of Paris, and won a prize for his dissertation on Roman law (1878). In 1881 he became professor of international and civil law at the University of Dijon, France. He was a member of the Académie des Sciences Morales et Politiques, vice-president of the permanent Court for International Law, member of the International Court of Arbitration at The Hague, and juridical adviser to the French ministry of foreign affairs.

Weiss' published writings include: *Étude sur les conditions de l'extradition* (1880); *Le droit fétial et les fétiaux* (1883); *Le droit constitutionnel* (1884); *Traité élémentaire de droit international privé* (1885-86); *La proposition de loi sur la nationalité au Sénat* (1886); *Philippe Pot, Grand-Sénéchal de Bourgogne devant la Cour de Dijon* (1887); *Traité théorique et pratique de droit international privé* (6 vols., 1907-13); *Manuel de droit international privé* (1914, 1920 and 1925).

Lit.: *Neue Welt,* Sept. 14, 1928.

WEISS, EMIL, pathologist, b. Sisak, Yugoslavia, 1893. He studied medicine at the University of Vienna, then at the University of Graz, and received his degree from the Charles Ferdinand Bohemian University

in Prague in 1919, after having served in the medical corps of the Austro-Hungarian Army (1914-18). Until 1921 Weiss was assistant director of the Royal Bacteriological Institute at Zagreb, Yugoslavia. He came to the United States in 1921.

After a year as pathologist with the Illinois General Hospital in Chicago (1921-22), Weiss was appointed instructor in bacteriology and pathology at the Loyola University School of Medicine in 1922. He became full professor in 1931, serving until 1933. He was also examiner for the National Board of Medical Examiners (1928-32), and was one of the thirteen contestants in the evaluation of diagnostic tests for syphilis, conducted by the United States Public Health Service during 1934 and 1935.

Weiss was associated with the College of Medicine, University of Illinois, from 1933 to 1940; here he received the Ph.D. degree in 1937. From 1941 on he was a member of the faculty of the Northwestern University Medical School, and was still serving in that capacity in 1943. In addition to holding hospital positions in Chicago as pathologist, Weiss was also, from 1934 on, a special consultant of the United States Public Health Service.

Lit.: Kagan, Solomon R., *Jewish Contributions to Medicine in America* (1939) 729-30.

WEISS, ISAAC (EISIK) HIRSCH, Talmudist and historian, b. Gross Meseritsch, Moravia, 1815; d. Vienna, 1905. He was educated at various Yeshivas, especially those of Trebitsch, Moravia, and Eisenstadt, Burgenland. In 1858 he moved to Vienna, where he was subsequently appointed lecturer at the Beth Hamidrash founded by Adolf Jellinek. His writings deal particularly with Talmudic literature. He furnished a Viennese edition of the Talmud with notes, edited the *Sifra,* with the commentary of Rabbi Abraham ben David (1862), and the *Mechilta* (1865), providing both works with introductions and notes. His principal work, however, was his five-volume *Geschichte der jüdischen Tradition,* which appeared in Hebrew under the title of *Dor Dor Vedoreshav* (1871-91; 2nd ed., 1924), a history of the Oral Law from the conclusion of the Bible to the conclusion of the *Shulhan Aruch.*

Together with his colleague, Meir Friedmann, he edited the monthly *Beth Talmud,* which appeared from 1881 to 1886. Weiss was an excellent teacher who considerably influenced and inspired his pupils in the course of a teaching career which extended over more than forty years.

His work attracted wide attention, notably among the new generation in Eastern European Jewry, but its revolutionary ideas were severely criticized by the Orthodox, chiefly by Isaac Halevy, who directed his work *Doroth Harishonim* against Weiss and other enlighteners. Although, in some respects, Weiss exaggerated in his modernistic attitude, the book is nevertheless regarded as one of the most comprehensive and best-written presentations of this great subject.

Lit.: Weiss, Isaac Hirsch, *Zichronothai* (1895); Weiss, Max, preface to the second edition of *Dor Vor Vedoreshav* (1924); *Allgemeine Zeitung des Judentums* (1915); Wachstein, Bernhard, *Wiens hebräische Publizistik* (1930); Waxman, Meyer, *A History of Jewish Literature,* vol. 3 (1936) 601-11.

WEISS, JOSEPH HIRSCH, rabbi, b. Podola, Nyitra county, Hungary, 1800; d. Eger, Hungary, 1881. In 1840 he was appointed chief rabbi of Eger, and remained there until his death. Weiss was a staunch advocate of ultra-Orthodoxy and a strong opponent of the Reform Movement in Hungary. For having sided with Lajos Kossuth in 1848, he was sought by the Austrian police and had to hide in the monastery of Eger, where he was protected by the archbishop. Later he was charged with sedition by the authorities in Vienna, but was acquitted.

A large portion of Weiss' library, consisting chiefly of responsa, was presented by his grandson, Stephen S. Wise, to Columbia University, in New York city.

WEISS, MANFRED, *see* Weiss (De Csepel).

WEISS, SAMUEL, physician, b. Kaszony, Hungary, 1885. He received the M.D. degree from Long Island College Hospital (1907), and specialized in gastroenterology. In 1927 he was appointed professor and in 1936 staff executive of the gastroenterological department of the New York Polyclinic Medical School and Hospital. Weiss made many contributions to the field of gastrointestinal diseases, and was a delegate to several international medical congresses held abroad. He was a Chevalier of the French Legion of Honor.

Weiss' published works include *Diseases of the Liver, Gallbladder, Ducts and Pancreas* (1935); *Clinical Lectures on Gastroenterology* (1936); and *Compendium of Clinical and Laboratory Methods and Their Interpretation in Gastroenterology and Biliary Tract Disease* (1936). He was editor of *The Review of Gastroenterology.*

WEISS, SAMUEL ARTHUR, American Congressman, and lawyer, b. Krotowoc, Poland, 1902. He was brought to the United States at the age of seven months. After receiving the law degree from Duquesne University (1927), Weiss was admitted to the bar the same year, and entered private practice in Pittsburgh. In 1934 Weiss was elected to the Pennsylvania Legislature, and in 1936 he was reelected, serving until 1939. His election to the Seventy-Seventh United States Congress from the 31st Congressional District occurred in 1940; he was reelected in 1942 to the Seventy-Eighth Congress. Weiss was the first Jew to be chosen by his district for the state legislature or for Congress, representing a constituency of 328,682, of whom only 4,318 were Jews.

He won several public service awards in his community, and served on the board of directors of the Rosalia Foundling Hospital and on the athletic council of Duquesne University, both Catholic institutions. His participation in Jewish affairs included posts in the local and national B'nai B'rith organization. Late in 1941 he was the author of a letter to one of his constituents in which he replied to the charges made by the latter that Jews were warmongers by citing his own record in Congress (he had voted against the extension of the Selective Service Act) and by pointing out the essentially undemocratic viewpoint which the constituent represented.

WEISS, SOMA, physician and professor, b. Bestercze, Hungary, 1899; d. Boston, 1942. He studied at the Royal Hungarian University in Budapest from 1916 to 1920, during which period he served also as a research fellow and demonstrator at the university.

In 1921, having emigrated to the United States, Weiss received the A.B. degree from Columbia University, and two years later his medical degree from the Cornell Medical School. Weiss became an assistant at the Thorndike Memorial Laboratory in Boston in 1925; at the time of his death he was assistant director of the laboratory. He was made assistant in medicine at Harvard in 1926, instructor in 1927, assistant professor in 1929, associate professor in 1932, and Hersey professor of medicine in 1939.

He was also chief of the Peter Bent Brigham Hospital and director of the fourth Harvard medical service at the Boston City Hospital.

With various associates, Weiss made original studies in the etiology, concurrent factors and therapeutic chemistry of abnormal conditions, particularly in the fields of cardio-vascular disturbances and hypertension. Despite his youth, he was one of the most important research workers of his period.

Lit.: Kagan, Solomon R., *Jewish Contributions to Medicine in America* (1939) 133-36.

WEISS, WILLIAM, lawyer, b. Hungary, 1887. He came to the United States as a nine-year-old child, and became a citizen six years later by reason of his father's naturalization. After receiving his professional training at Brooklyn Law School (LL.B., 1908) and at New York Law School (LL.M., 1909) he was admitted to the New York bar and the American Bar Association. In 1916 he was a candidate for the state senate on the Republican and Progressive ticket. From 1916 to 1922 he served as chairman of the local school board in New York city. Weiss played a prominent role in Orthodox Jewish life in the United States as national president of the Union of Orthodox Jewish Congregations in America from 1933 to 1942, as member of the executive committee of the Mizrachi Organization, as trustee of Yeshiva College, as honorary secretary of the Yeshiva Ohel Torah, and as managing editor of the national monthly *Orthodox Union.*

He served also as general counsel of the Independent Order Brith Abraham, as member of the executive committee of the American Jewish Committee and of the administrative committee of the American Jewish Congress, as chairman of the board of governors of the Council of Fraternal and Benevolent Organizations of New York, as trustee of the Jewish Memorial Hospital, and as officer and member of several other communal and philanthropic institutions and societies.

WEISS-ROSMARIN, TRUDE, author and editor, b. Frankfort, Germany, 1908. She studied at the Universities of Berlin (1927-28), Leipzig (1929) and Würzburg, receiving from the latter the Ph.D. degree in Semitics, archeology and philosophy in 1931, and in the same year she emigrated to the United States. From 1933 to 1940 she was the director of The School of the Jewish Woman in New York city, and from 1935 on she was managing editor of *The Jewish Spectator,* a monthly for the Jewish family.

She was vice-president of the National Association of Biblical Instructors (1939-40). She wrote the scholarly works *Aribi und Arabien in den babylonisch-assyrischen Quellen* (1932), a collection of the Babylonian-Assyrian references to Arabia and the Arabs, and *Religion of Reason: the Religious Philosophy of Hermann Cohen* (1936), a critical analysis of Hermann Cohen's system of religious philosophy. In her pamphlet *The Hebrew Moses: An Answer to Sigmund Freud* (1939) she challenged Freud's hypothesis that Moses was an Egyptian and the religion of the Israelites considerably modeled by Egyptian influences.

In 1940 she started a series of inexpensive books of Jewish interest, *The Jewish People's Library,* issued by The Jewish Book Club, to which she contributed the volumes *Jewish Women Through the Ages* (1940); *The Oneg Shabbath Book* (1940); *What Every Jewish Woman Should Know* (1940); *New Light on the Bible* (1941); *Highlights of Jewish History* (1941).

Trude Weiss-Rosmarin (her maiden name was Trude Weiss) married AARON ROSMARIN (b. Uscilug, Russia, 1904), editor and educator, author of *Moses im Lichte der Agadah* (1932) and director (from 1942 on) of the Youth and Education Department of the Mizrachi Organization, New York city.

WEISSELBERGER, SALO VON, Austrian public official, and Roumanian senator, b. Bucovina, Austria, 1867; d. Vienna, 1931. Originally a judge of the supreme court of Bucovina, he was elected mayor of Czernowitz, capital of Bucovina, in 1913. When the Russians temporarily occupied this part of the monarchy in 1914, Weisselberger was taken prisoner, sent to Siberia, and later returned to Austria in an exchange of war prisoners. He was knighted for his courageous conduct during the Russian invasion.

A deputy of the Bucovina diet and a member of the Jewish Club of Deputies (1911-14), he represented the city of Czernowitz in the Roumanian parliament as a senator from 1922 to 1926 and again from 1927 to 1928. He was a member of Straucher's Jewish National People's Party.

WEISSENBERG, SAMUEL A., physician and anthropologist, b. Elisavetgrad (Kirovo), Ukraine, Russia, 1867; d. Elisavetgrad, 1928. He received the M.D. degree from the University of Heidelberg, Germany (1890), and established himself as a general practitioner at Elisavetgrad in 1895. Concentrating his research chiefly upon the anthropology of the Jews, he published (1895) the fundamental work *The Southern Russian Jews, an Anthropometric Study* (Russian) for which he was awarded a gold medal by the Moscow Society for Natural Science.

On his extensive travels he collected material for anthropological monographs on the Jews of Palestine (1909), Syria (1911), Mesopotamia (1911), Northern Africa (1912) and on the Yemenites. Weissenberg was interested also in Jewish folklore. Noteworthy is his contribution to general anthropology, *The Growth of Man according to Age, Sex and Race* (1911). Weissenberg published altogether more than 200 books and papers on anthropology and hygiene.

WEISSER, SAMUEL (originally **Pilderwasser**), cantor, b. Nova-Oshitza, Podolski County, Russia, 1888. After serving an apprenticeship with many cantors traveling through the Ukraine, Weisser felt a desire to compose, and at the age of sixteen he wrote synagogal music which became popular with many cantors. At the age of twenty-one he received his first position, in Winitza, Russia. Here he met the cantor and composer E. Gerowitsch, who urged him to enter the field of composition. In 1914 Weisser came to the United States, where he developed into the most prolific composer of music for the Orthodox synagogue. Weisser was twice awarded the first prize in world-wide contests for the best liturgical composition conducted by the *Chazanim Velt* of Warsaw (1937 and 1938). He was president (1939-40) of the Jewish Ministers Cantors Association of America, a member of the Society of Jewish Composers, president of the First Novo Ushitzer Benevolent Society, and served many congregations as cantor in New York city.

His published books, mostly recitatives for cantor, include: *Tefillath Yehoshua* (New York, 1915); *Shirah Hadashah* (in collaboration with S. Kawetzky; 1919); *Rinnath Yehoshua* (2 vols., 1927-29); *Minhath Yehoshua* (1930); *Baal Tefillah* (2 vols., 1936-40); *Shire Yehoshua* (1935). He wrote also many Yiddish songs. MAX WOHLBERG.

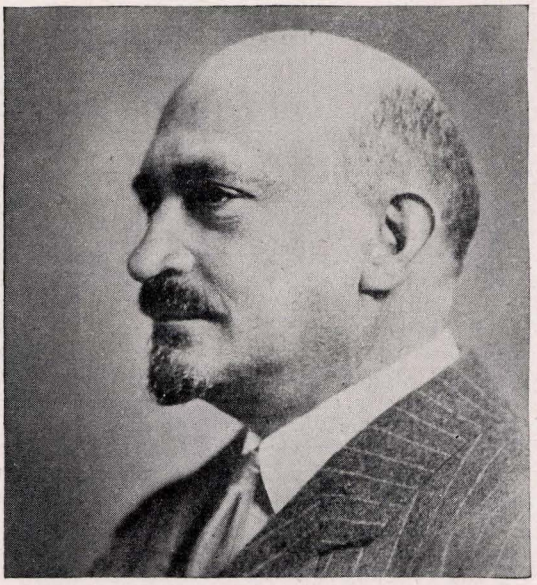
Lit.: *The History of Hazzanuth* (1924); *Hazanuth* (1937; published by the Jewish Ministers Cantors Association of America); *Die Shul un Chazanim Velt* (Warsaw), April, 1939; *Der Amerikaner,* March 22, 1940; *Der Tog,* March 15, 1938; Zaludkowsky, E., *Kulturtrager fun der Yiddisher Liturgie* (1930).

WEISZ, FÜLÖP, economist, b. Budapest, 1859. He studied at Dresden, Germany. From 1889 on he was director, and from 1921 on president, of the Hungarian Commercial Bank of Pest, the leading bank of Hungary. In that capacity he controlled several other banks and industrial and commercial companies. He was a councillor general of the Hungarian National Bank from its inception. He was also appointed a member of the Hungarian Upper House. Weisz was born of Jewish parents, but adopted the Christian faith.

WEISZ, MAX (MIKSA), rabbi and author, b. Budapest, 1872; d. Budapest, 1931. He was educated

at the Protestant Gymnasium and at the rabbinical seminary of Budapest. He taught, together with Wilhelm Bacher, in the Talmud Torah of the Jewish community of Pest. Subsequently he headed the department of this community for Jewish religious instruction in Budapest city and state schools. He was custodian of the libraries of Wilhelm Bacher and Samuel Kohn. He catalogued the books and manuscripts of David Kaufmann's library for the Hungarian academy.

Weisz taught at the rabbinical seminary of Budapest as successor to Wilhelm Bacher. Later he succeeded Lajos Venetianer at that institute, teaching practical ministry, the doctrines of Judaism and the Hebrew language. He was district rabbi of the Jewish community of Pest from 1909 on, and vice-president of the national rabbinical association of Hungary.



Weisz was co-editor of *Magyar Zsidó Szemle* and *Hatzofeh,* Hungarian and Hebrew periodicals of the science of Judaism. His articles and essays appeared in the scholarly reviews of several other countries. His published works include: *Katalog der hebräischen Handschriften und Bücher in der Bibliothek des Prof. Dr. D. Kaufmann s.A.* (1906); *Etika a talmudban* (Ethics in the Talmud; with S. Hevesi and L. Blau; 1920); *Zsidó etika* (Jewish Ethics; 1923); *Geniza Fragmente der Bibliothek D. Kaufmann s.A. im Besitze der ungarischen Akademie der Wissenschaften, I.* (1924); *Középkori zsidó etikusok* (Jewish Ethicists of the Middle Ages; 1929); *Bibliographie der Schriften M. Kayserlings* (1929); *Minhag Tob* (1930).

WEIZMANN, CHAIM, chemist of international distinction, leader of the modern Zionist Movement, b. Motele, near Pinsk, Poland, 1874. His father, Oizer, was a merchant of moderate means, the head of a family of eleven children.

Chaim Weizmann attended the Heder in Motele until he was eleven, and then entered the Gymnasium in Pinsk, while he continued his studies in Hebrew and Talmud. He developed a keen interest in the sciences, and when, at eighteen, he graduated from the Gymnasium, he took up the study of chemistry. He left Russia to continue his studies in foreign universities. He was a student in the University of Darmstadt for one year, and then at the technical high school in Charlottenburg-Berlin. His teachers in chemistry were Karl Lieberman and Bistrzycki. When the latter went to the University of Freiburg in Switzerland, Weizmann went with him and studied for two years at Freiburg, receiving the D.Sc. degree in 1900. He continued his research work at the University of Geneva until 1904, serving as lecturer in organic chemistry. At this time he married Vera Kazman (b. Rostov on Don), then a medical student in the Swiss universities.

Having visited England on several occasions and acquired many friends, he decided, after his marriage, to make his home there. He received an appointment in the University of Manchester as lecturer and reader in biological chemistry. He lived in Manchester until 1916, when he entered the service of the British Admiralty as Director of the Admiralty Chemical Laboratories in London, where he resided thereafter.

Weizmann was born in a Zionist environment. His father and his first teacher in Motele, Shloime Sokolofsky, inspired him with a deep interest in the ideals of the Hibbath Zion. His Talmud teacher in Pinsk, Rabbi David Friedman, who was a delegate to the Kattowitz conference of the Chovevei Zion in 1888, exercised a similar influence upon him. Weizmann was greatly influenced by the Haskalah movement, had a comprehensive knowledge of Hebrew literature, and, as a university student, was known as a keen debater on Zionism, the Russian revolutionary ideals, the Bund and other political subjects. Zionism in Russia was already formulated and organized when Theodor Herzl appeared in the arena of Jewish life. The Zionists had created a

Chaim Weizmann

comprehensive literature, developed their own leaders, and were supporting colonization and educational activities in Palestine. The new personality of Herzl was hailed, but they scrutinized his utterances and assumed a critical attitude toward them. His book, *Der Judenstaat* (1897), came as a surprise. Herzl was of the Western world; he lacked a Jewish background; he had not arrived at his conclusions from personal experiences; he knew nothing of the great masses of Jews in Eastern Europe living under oppression and discrimination; he was unaware of the ideas formulated by the founders of the Zionist Movement. But his audacity amazed them. He dared utter the words "a Jewish state," prepare for revolutionary action on an international stage, and undertake the organization of the Jews of all lands—a formidable task.

Many of the Chovevei Zionists were opposed to following the leadership of Herzl. Weizmann, however, was one of the students who traveled through Russia urging the Zionist groups to elect delegates to the Basel Congress. Another person who aided Herzl in calling the First Zionist Congress was Menachem Mendel Ussishkin, who persuaded the Chovevei Zionists, opposed to Herzl's leadership, to attend. Weizmann, himself, attended his first Zionist Congress in 1898. He was a member of the Russian delegation, but gathered around him a number of the younger men who spoke of Hebraic culture and democratic procedure. He formed the first Zionist Party, called the "Democratic Fraction." The program of this group was outlined by Weizmann at the Congress in London in 1900. They wanted to deepen the content of Zionism, and rejected the purely "diplomatic" phase which Zionism had assumed. They demanded cultural activities, a synthesis of Palestine work and political propaganda. They objected to the undemocratic procedure adopted by Herzl.

Later, in 1903, Weizmann sent to Herzl a letter in which the part he thought the "democratic fraction" should play in the movement was indicated. He drew attention to the estrangement that had developed between Zionist leadership in Russia and the Jewish youth. The young people were without guidance. They were being drawn into the Russian revolution. The government alleged that it had to adopt repres-

sive measures in order to check the revolutionary movement among Jews, but the revolutionary spirit grew as a reaction against governmental oppression. In Weizmann's view, the vicious circle could be broken only through an active propaganda of all phases of Zionism. But the leaders of Zionism in Russia were of the Orthodox or the middle class, and were not in a position to attract the young intellectuals. The "Democratic Fraction" was, therefore, an appropriate medium to draw these young men into the Zionist Movement.

That same year (1903) Herzl presented the English government's Uganda project to the Zionist Congress, and Weizmann became one of its severest critics. Speaking in a caucus of the Russian delegates, Weizmann deplored the fact that the Russian Zionists, owing to political conditions, were not able to produce a leader of their own, and had to rely upon the leadership that came from the West, meaning Austria and Germany. They had thought that it would suffice for them to develop the intellectual and spiritual content of Zionism, and to rely upon the Jews of the Western world for the forms and technique required for its realization in the political field. "We now have a movement for the discovery of projects," said Weizmann. "In fact, we are not 'political' but 'diplomatic' Zionists, and all our diplomacy is centered in the hands of one man." A resolution favoring the Uganda project was adopted by a vote of 295 against 175, but the opposition of the Russian delegation paralyzed the plans for its execution. There was talk of secession. Subsequently, the English government lost interest in the matter and then (1904) Herzl died.

Weizmann was the exponent of what was called "synthetic" Zionism, in which the practical and the political were ideologically reconciled. These views were derived from the utterances of Menachem Mendel Ussishkin in his pamphlet *Our Program*. At the Eighth Zionist Congress, in 1907, Weizmann expounded the basic ideas of synthetic Zionism. "I regard political Zionism," he said, "as the synthesis of all our activities. The practical work is a means to further the political objective."

In all the developments of Zionism after Herzl's death Weizmann played a limited part. He was a speaker at Zionist Congresses, a lecturer and propagandist, but he was more directly absorbed in the cultural aspects of the movement. As early as 1902 Weizmann and Berthold Feiwel published a pamphlet in which they urged the establishment of a university and suggested, as a first step in that direction, the organization of a high school in Palestine. Weizmann drew up a number of plans, consulted with university men, and made extensive propaganda for the ultimate creation of a Hebrew University. He delivered the chief address on the Hebrew University at the Vienna Congress in 1913. The first contributions were announced and a commission was appointed to prepare a prospectus. Weizmann was interested also in the creation of the Haifa Technicum, which his friend, Shemarya Levin, had initiated, and was present at a meeting of its Organizing Committee.

From 1904 to 1915 Weizmann was regarded as one of a number of young men of promise. He was primarily a scientist and educator. When the practicals took control of world Zionist affairs, after David Wolffsohn's retirement, there were other Russian Zionist leaders who were available to become members of the Zionist Executive. Nor was Weizmann touched by an interest in political affairs. In Zionist discussions he often criticized the political leadership. He had a strong conviction, when he went to live in England, that he might be able to serve Zionism in an Anglo-Saxon environment. But he avoided the field of Zionist "diplomacy."

Destiny moved him into the center of Zionist leadership. The first World War disrupted the Zionist center in Berlin. No Jewish agency in Berlin could communicate with branches in lands dominated by the Allies, and Weizmann, in England, became the active head of a political committee to clarify the Zionist position. This responsibility galvanized him into political activity. He became chairman of the Political Committee. He had met Arthur James Balfour and made a deep impression upon the distinguished English statesman and philosopher.

Through his friendship with C. P. Scott, editor of the *Manchester Guardian*, he met David Lloyd-George. The Committee which Weizmann formed included Dr. Moses Gaster, Joseph Cowen, Herbert Samuel, Harry Sacher, Leon Simon, Paul Goodman, Simon Marks and Israel Sieff. He secured the cooperation of Sir Mark Sykes, Herbert Sidebotham and H. L. Brailsford. The publication called *Palestine*, edited by Sidebotham, had a great influence in clarifying Zionism from the British imperial point of view. Lloyd-George, who had become prime minister in 1916, was sympathetic to the Zionist cause, having served the Zionist Organization in a legal capacity in the incorporation of the Jewish Colonial Trust. Balfour had become foreign secretary. The London Committee had the cooperation of the American Zionists, through the Provisional Zionist Committee, of which Louis D. Brandeis was chairman.

The conversations with government officials led to the composition of a number of tentative formulas, which were passed over to the United States and scrutinized by Brandeis and his friends, who, in turn, secured the definitive views of President Woodrow Wilson and his advisors. Many alterations in the wording of these formulas were made. The first statement on British policy as regards Palestine was published on July 22, 1916; the second, in July, 1917. The Zionist memorandum, submitted just prior to the discussion in the final stages of the negotiations, was signed by Weizmann and Lord Rothschild, then president of the English Zionist Federation. The Balfour Declaration, issued on November 2, 1917, addressed to Lord Rothschild, was the official reply to that memorandum.

Weizmann was the chairman of the first Zionist Commission officially recognized by the British government soon after the issuing of the Balfour Declaration. Weizmann went to Palestine in March, 1918, to establish relations with the British military force occupying the country. He laid the cornerstone of the Hebrew University on Mt. Scopus on July 21st of that year, in the presence of General Edmund Allenby and his staff.

While in Palestine, at this time, Weizmann visited the Arab Prince Feisal in his camp at Amman, and convinced him that the proposed Jewish National Home held no serious threat to the existing population, and that Jewish-Arab cooperation would be desirable. Feisal joined Weizmann in an official agreement which took for granted that Palestine would be separated from an Arab-Syrian state, and undertook to establish friendly relations between the New Palestine and Syria. It specifically provided for the carrying out of the Balfour Declaration, for large-scale Jewish immigration into Palestine, and for the protection of Arab rights.

On February 27, 1919, the Zionist Delegation was given a hearing by the Supreme Council of the Peace Conference in Paris. Weizmann, Nahum Sokolow, Ussishkin and Professor Sylvain Lévy were authorized to speak for the Zionist Organization and the Jewish community of Palestine. Before the delegation withdrew, Robert Lansing, the American Secretary of State,

Chaim Weizmann and Mrs. Weizmann on their arrival in the United States (1942).

Photograph by courtesy of the United Palestine Appeal

asked the exact meaning of the term "a Jewish national home." "Did that mean an autonomous government?", he inquired. Weizmann replied:

"The Zionist Organization did not want an autonomous Jewish government, but merely to establish in Palestine, under a mandatory power, an administration, not necessarily Jewish, which would render it possible to send into Palestine 70,000 to 80,000 Jews annually. The Zionist Organization asked permission, at the same time, to build Jewish schools where Hebrew would be taught, and, in that way, to build up gradually a nationality which would be as Jewish as the French nation is French and the British nation British. Later on, when the Jews formed the large majority, they would be ripe to establish such a government as would answer to the state of the development of the country and to their ideals."

But the League of Nations had yet to be organized; the Mandate system had yet to be worked out. The treaty with Turkey had to be drafted and accepted. At every turn Zionist interests were menaced by open and hidden enemies. At one time it was the French who had a clash with the English over Syria. At another time it was the Catholic church that entered objections. The Peace Conference approved the creation of a League of Nations on January 25, 1919. It was not until August, 1924, however, that the status of Palestine as a mandated territory was fully legalized.

Weizmann had to prepare for the financial obligations that would arise under the Mandate. The Zionist Organization derived its funds chiefly from the Jewish National Fund and the Jewish Colonial Trust. The Trust, however, was not equipped for any large-scale colonization operation, and the Fund was dedicated to the task of purchasing land. If the heavy responsibilities were to be met, new ways would have to be devised to acquire funds. It was decided to call an international conference of Zionists to consider the whole Zionist position and to take action on the proposals for the founding of the Palestine Foundation Fund (Keren Hayesod) projected by Isaac Naiditsch and Hillel Slatopolsky. Weizmann organized the London Zionist Conference, held in the summer of 1920. It was the first Zionist gathering since 1913. A large contingent of American delegates, headed by Louis D. Brandeis, participated in this Conference. It was in London that a disagreement arose between Weizmann and Brandeis which had important consequences.

Weizmann had received the loyal cooperation of Brandeis and other American Zionists during the time the Balfour Declaration was under discussion. There had ensued a continuous correspondence between them since 1916, but they met for the first time in the summer of 1919, when Brandeis was on his way to Palestine. Brandeis, on his return from Palestine, at a meeting of the Greater Actions Committee in London, laid before them a portfolio of thorough-going criticism of the Zionist administration. Brandeis believed that the Zionist Commission should be dissolved, that the Zionist center should be removed to Jerusalem, and that all available Zionist executive ability should be concentrated in constructive work in Palestine. Weizmann found it very difficult to accept these conclusions. It would be premature to remove the Zionist center to Jerusalem. There was still a great deal of work to be done in the Diaspora. Another point of difficulty arose when Weizmann expressed his approval of enlarging the proposed Jewish Agency by the inclusion of non-Zionists. Brandeis was opposed to the inclusion of persons or groups who were not shekel-payers.

Brandeis outlined the general features of his program at the Zionist Convention in Chicago upon his return from London. It was a leisurely program of investigation and development; but Weizmann was already confronting the pressure for the immediate beginning of immigration.

The rift between Weizmann and Brandeis really centered around the fundamental question of Zionist leadership, and democracy in Zionist administration. Weizmann had agreed to a proposal made by Brandeis for the election of a Commission of five or seven (its members not necessarily Zionists), with full power, to whom the task of building the National Home would be assigned for a period of a year, at the end of which a report would be rendered to the regular Zionist authorities. The overwhelming majority of the delegates to the Conference in London were opposed to the granting of plenary powers to any such Commission. A large majority of the American delegation were also opposed to the project unless Brandeis himself would assume the leadership in person, which he declined to do. Weizmann concluded that the opposition to the project was too strong to overcome, and therefore abandoned it. It was alleged by the friends of Brandeis that Weizmann gave up the idea without informing their leader. At any rate, the proposal was not sub-

mitted to the Conference, which elected Weizmann president of the Organization. These incidents provided a basis for the controversy which later was transferred to the United States.

The London Conference accepted the proposals for the organization of the Palestine Foundation Fund, to which the American delegation offered no opposition. When the time came, however, for the launching of the fund in the United States, the administration of the Zionist Organization of America, headed by Julian W. Mack, took the position that it was inadvisable to establish an international budget and an international fund. They conceived the Zionist movement as an organization composed of a federation of national groupings, and believed that each grouping should have autonomous rights. The American Zionists would gather a fund of their own and give financial support for certain features in the Palestine Foundation Fund budget, as decided from time to time, but it would direct its interest to the development of private initiative and the free investment of individual capital.

The position taken by the Zionist Organization of America administration placed Weizmann and the Zionist Executive in an embarrassing situation. A budget to meet certain fundamental tasks could not be accepted by the Zionist Executive unless it was known in advance from which sources the income would come. The Executive had no alternative but to seek the gathering of an international fund and undertake the necessary budgetary obligations. The opposition of the Zionist Organization of America administration led to a clash in the United States. The Brandeis administration was defeated at the convention in Cleveland in 1921, and Brandeis and his group withdrew from all Zionist responsibilities. This handicapped the American Zionists in the raising of funds for Palestine. Weizmann was compelled to come to the United States continuously for a period of ten years in order to aid in the campaign of the Palestine Foundation Fund. He became, in effect, an active leader in the American Zionist field. He was known in every large Jewish community, and made a deep impression upon leading non-Zionists and non-Jews in the course of his travels. He made many friends of Zionism in important political circles.

The enlargement of the Jewish Agency was provided for in the Mandate for Palestine. It was assumed to be obligatory. The organization of the Extended Jewish Agency, as it was called, proceeded simultaneously with the development of the campaigns for the Palestine Foundation Fund in the United States. Weizmann began his negotiations with the non-Zionists in 1923. He secured the support of Louis Marshall, then president of the American Jewish Committee, with whom he first discussed the problem in Paris at the Peace Conference. Other Americans interested were Felix M. Warburg, Lee K. Frankel, Horace Stern, Sol M. Stroock and Cyrus Adler. After many difficulties, the constitution of the Extended Jewish Agency was agreed to and in the summer of 1929, at Zurich, the Extended Jewish Agency was established. Weizmann was elected the first president of the Agency.

Weizmann devoted all his life, without interludes (except for his scientific pursuits, which were also made to serve Zionism), to the cause of his people. With rare patience and perseverance he followed the progress of the Mandate from its first official interpretation in the Churchill White Paper of 1922 down to the last step taken by England in the MacDonald White Paper of 1939. His patience broke when, under a labor government, the bloody Arab riots against Jews were followed by the Passfield White Paper in 1930, which proposed the further restriction of Jewish immigration. The Zionist Executive, under his leadership, accepted the policy set forth in the Churchill White Paper, but it was the threat to Jewish immigration in the Passfield White Paper that led to his resignation. Weizmann took advantage of every opportunity to prolong the life of the Mandate. He continued to hope that England would eventually see the value of the Jewish people as a loyal creative force in the Near East. But England was involved in the disastrous policy of appeasement, which was reflected not only in Palestine, but along every inch of its imperial lifeline. Weizmann was compelled to raise a protest against the MacDonald policy which crystallized the national home in numbers and space as of May, 1939. The English government was assailed by its critics in Parliament, including Winston Churchill, who later became prime minister. By that time, however, the League of Nations had disappeared. The Mandate had become obsolete.

While the protests against the MacDonald policy were still going on, England declared war against Nazi Germany (September, 1939). Weizmann immediately sent a letter to Prime Minister Neville Chamberlain, assuring him of the loyal support of the Jewish national home. The idea of a Jewish military force based on Palestine and including stateless and homeless Jews was projected. All efforts to secure the recognition of such a Jewish military formation were unsuccessful. And when it became evident that England was determined not to recognize the plea of the Jews for the formation of a distinctive Jewish military force, Weizmann was forced to come to the United States, first in 1941 and then in the spring of 1942, in order to establish a political position for the Zionist Movement in the United States. In the spring of 1942 an Extraordinary Zionist Conference was held in New York at the Hotel Biltmore, at which Weizmann outlined Zionist policy. This Conference formulated the Zionist political objective as "Palestine as the Jewish commonwealth," with immigration under Jewish control. Weizmann fell seriously ill during the summer of 1942 and was incapacitated for service for over three months. He made his reappearance on the political platform at the United Palestine Appeal Conference held in New York on Sunday, December 6, 1942.

Weizmann was the most effective and distinguished "ambassador" of Zionism the movement ever had. He was moderate and tactful and persuasive in conference. He employed the English method of understatement, but on occasion—as when the Passfield White Paper was issued, the MacDonald policy approved, and the Jewish Army denied—the fact that he had always understated the Jewish case rather than overstated it proved of great value in calling world attention to the injustices of which he complained. He believed in England, but declared that England had "let him down."

As a speaker at public meetings he was superb in the analysis of the Jewish position. He had the appearance of an exotic person, suggesting the mysticism of the Jews of the Orient. He never allowed himself to be pressed into the utterance of extreme views. His moderation enabled him to find a hearing among non-Zionists, and he always made a deep impression upon liberal non-Jews. He spoke fluently in Yiddish, used also German and French, and had a fine, simple style of speaking and writing in English, although his Russian training could not be disguised. In face of vigorous and continuous opposition, he maintained his

leadership in the Zionist Movement and his standing on the international political stage. He was opposed by the Brandeis group; he was opposed by Vladimir Jabotinsky, who was the leader of the Revisionist Party; he was opposed by the radical group headed by Isaac Grünbaum; he was often opposed by the Mizrachi, the Orthodox group. He carried through the plan for the Extended Jewish Agency in the face of tremendous opposition in almost every section of the Zionist Movement. He met with vigorous criticism and condemnation when he discussed the various solutions of what was called the Arab-Jewish problem. He was assailed for his views on parity, on the proposal for a bi-national state, on the question of the partition of Palestine. Notwithstanding all these difficulties, he was generally accounted the most resourceful and impressive of all Zionist leaders.

The development of the Zionist Movement under Weizmann's leadership is best indicated by the fact that in 1918 there were approximately 47,000 Jews in Palestine, 80,000 in 1922, 400,000 in 1935, and 550,000 in 1942. But when the Balfour Declaration and the Mandate were virtually emptied of their contents, he faced the imperative necessity of again undertaking a political campaign to bring about the recognition, in a new form, of that which had been in essence recognized in 1917. He let there be no doubt as to what was intended. The Zionists aimed to secure the establishment of Palestine as the Jewish commonwealth, and insisted that the control of immigration be placed in the hands of the Jewish people.

Weizmann as Chemist. Weizmann was appointed assistant professor at the University of Manchester in 1904, and remained there until his discovery of the acetone-butyl fermentation assumed such national importance that he was asked to continue the work at the request of David Lloyd-George, then minister of munitions, at the laboratories of the British Admiralty in London. When Weizmann was asked by Lloyd-George what he wanted as compensation for his chemical formula, which was used to great advantage, he said: "For myself nothing; but something for my people." He discontinued his chemical studies after the publication of the Balfour Declaration in 1917, and did not return to his profession until 1931. He then set up his research groups at the Featherstone Laboratories in London, and continued his work there until 1935. He founded the Daniel Sieff Research Institute at the colony Rehovoth in Palestine in April, 1934, and directed its work. There he assembled a group of research chemists from the continent of Europe, who made invaluable contributions to the British war effort in the Near East.

At the outbreak of the second World War he was an honorary chemical adviser to the British ministry of supply. In this capacity he established laboratories in London. His visit to the United States in the spring of 1942 was utilized by the American government to secure his advice on the solution of the rubber problem. Weizmann was consulted by the Baruch Commission and gave valuable counsel in the form of oral testimony and written memoranda.

His chemical research dealt with three problems:

First: Synthesis of polycyclic substances, such as anthraquinone derivatives, which form the basis of important dye stuffs. The synthetic methods developed by Weizmann in 1933 found wide application in the United States in the synthesis of cancer-producing substances.

Second: The production by fermentation of acetone and butyl alcohol and similar important substances in industry. This was Weizmann's chief contribution to the first World War. Following an old observation that maize, after long storage, exhibits at times the smell of acetone, Weizmann succeeded in isolating a bacterium (Clostridium acetobutylicum Weizmann) from maize and other sources. This bacterium converts sugar, starch and other carbohydrates into acetone and butyl alcohol. During the first World War there was an acute shortage of acetone, which is required in the production of cordite. Weizmann's bacterium produced acetone and butyl alcohol from new available products. The process of fermentation was carried out in England and in Canada also with chestnuts. This was a great service to the British war effort. After the War the formula was taken over by a corporation established in Terre Haute, Ind., called Commercial Solvents, and had great value in industrial fields where the formula was used.

In the second World War, again, both acetone and butyl alcohol assumed an important role, especially in connection with the production of synthetic rubber. The fermentative production of acetone and butyl alcohol by the Weizmann bacterium was the first instance in which micro-organisms were used as the basis of a chemical-synthetic industry, for both acetone and butyl alcohol may be converted into a variety of industrial products. This problem engaged the continuing attention of Weizmann from 1914 to 1942. From a general point of view, it is interesting that, with the Weizmann bacterium, sugar (carbohydrates) can be used as the basic material in synthetic industry, for it is the only valuable substance which nature reproduces every year and the supply of which is practically inexhaustible. In principle, at least, certain products of the petroleum industry can be replaced by the same products derived from fermentation. The use of petroleum consumes industrial capital, but the use of sugar by fermentation means living on current revenue.

Third: Protein foodstuffs. The world as a whole suffers a lack of animalic proteins (meat, fish, milk, eggs). It is relatively rich in vegetabilic proteins. But the latter are not so easily digested and, therefore, are generally regarded as waste products. Weizmann developed a method that seems to convert such waste proteins into material that can be assimilated by the human body; to convert them into meat substitutes by pre-digesting with yeast. Such vegetabilic meat is of great importance in all countries with large underfed populations, as in China or India, where for economic or religious reasons the population can not live on meat; and more generally, it is of great value in war time for most of the warring nations. WELLESZ, EGON, composer and musicologist, b. Vienna, 1885. He was a student of Arnold Schönberg in counterpoint, and of Guido Adler in musicology, receiving the Ph.D. degree from the University of Vienna in 1908. In 1913 he was appointed lecturer on musicology at the University of Vienna, rising to the post of full professor in 1930. After the German invasion of Austria (1938) he went to England, and was

appointed to the music faculty of Oxford University. An authority on Byzantine and Baroque music, Wellesz wrote extensively on these subjects, and in 1931 founded and directed the Vienna headquarters of the *Monumenta Musicae Byzantinae.*

Wellesz wrote a biography of Schönberg, which appeared in an English translation, and a comprehensive study of modern instrumentation. He composed extensively in every branch of music, and attested his indebtedness to Schönberg by writing in the twelve-tone system. He helped to establish the International Society for Contemporary Music, and up to 1938 was vice-president of the Austrian Society of Composers.

Lit.: Ewen, David, *Composers of Today.*

WELLHAUSEN, JULIUS, non-Jewish orientalist and Bible critic, b. Hameln, Germany, 1844; d. Göttingen, Germany, 1917. He served on the theological faculty of the Universities of Göttingen (1870-72) and Greifswald (1872-82), and on the Semitic faculty of the Universities of Halle (1882-85), Marburg (1885-92) and Göttingen (1892-1917). His chief contribution to Biblical scholarship was the final resolution of the problem of the historical order of the main documents of the Hexateuch, which has, in its main outlines, been followed by all subsequent Bible critics. Wellhausen showed that a definite evolution could be traced in these sources; that the earliest must have been the Jahvist (*J*) and Elohist (*E*) codes, the next the Deuteronomic (*D*) and the last the Priestly (*P*), which latter could not have been written until after the Babylonian Exile. He demonstrated these views in brilliant fashion in his *Prolegomena zur Geschichte Israels* (1883; 6th ed., 1927) and *Die Komposition des Hexateuchs* (1889).

Wellhausen's *Reste arabischen Heidentums* (Berlin, 1887) is valuable as a pioneer work which reveals the importance of the study of Arabic popular beliefs for the investigation of the primitive Semitic religions. His other writings dealing with the Bible include: *De gentibus et familiis judaeis quae I Chron. ii.4 enumerantur* (Göttingen, 1870); a discussion of the text of *Samuel* (1871); a commentary on the Minor Prophets (in *Skizzen und Vorarbeiten*); *Psalms* (in *Sacred Books of the Old Testament,* edit. Paul Haupt); commentaries on books of the New Testament. He wrote an elaborate work on the Pharisees and Sadducees (Greifswald, 1874).

Lit.: Wellhausen-Festschrift (1914).

WELTNER, JAKAB, labor leader, author and editor, b. Budapest, 1873; d. Budapest, 1936. He was a carpenter by trade, and combined travel and work outside of Hungary. He returned a convinced Social Democrat, and organized the workers within his own craft. As an organizer, writer and lecturer he rose to the position of secretary of the Social Democratic Party. From 1908 on he was editor of its daily newspaper, *Népszava* (Voice of the People). In 1917, during the first World War, he represented his party at the peace conference of Stockholm.

In the short-lived Bolshevik regime of Hungary in 1919 Weltner, as a publicist and political leader, although officially on the side of the government, strove to impose the moderation and political experience of the Social Democrats upon the government of the Soviets. In the era of White Terror after the collapse of this government Weltner emigrated to Vienna.

He returned to Hungary in 1924, and his probity and sound judgment made him again one of the most respected leaders of the Social Democratic Party. In the 1930's he visited the United States, where he lectured before labor groups in many parts of the country. Funeral honors for him were jointly arranged by the Hebrah Kaddisha of Pest and by the Hungarian Social Democratic Party. In addition to several works on social democracy, Weltner wrote a volume of memoirs, *Milljók egy miatt* (Millions for One), which gives an interesting historical background.

WELTSCH, FELIX, writer, b. Prague, Bohemia, 1884. He was a brother of Robert Weltsch. In Prague Felix Weltsch was one of the directors of the university library, and also the author of a number of treatises on philosophy and Zionism.

Among his published books were *Organische Demokratie* (1918); *Nationalismus und Judentum* (1920); *Gnade und Freiheit* (1920); *Land der Gegensätze,* a description of Palestine (1929); *Judenfrage und Zionismus* (1929); and *Dichter, Denker, Helfer: Max Brod* (1934). In collaboration with Max Brod, Weltsch wrote *Anschauung und Begriff* (1913) and *Zionismus als Weltanschauung* (1925).

After the Nazi occupation of Prague in 1939, Weltsch went to Palestine, and in 1943 was living in Jerusalem.

WELTSCH, ROBERT, editor, b. Prague, 1891. He was a brother of Felix Weltsch. An active member of the Zionist students' organization Bar Kochba in Prague, which played a considerable role in the fostering of cultural Zionism, Robert Weltsch belonged to the circle of Martin Buber. From 1919 to 1938 he was editor-in-chief of the Zionist organ *Jüdische Rundschau* in Berlin. From 1921 on he advocated a reorientation of Zionist politics, taking into consideration the claims of the Arabs in Palestine. His plan of a binational state in Palestine met with strong opposition, however. In collaboration with Hans Kohn, he published *Zionistische Politik* (1927), which contained a selection of his Zionist essays. In 1938 he emigrated to Palestine, where for a short time he edited the *Jüdische Weltrundschau.* He was one of the seven leading Jews who, in 1941, were deprived of their citizenship by the Nazi authorities in the Czech protectorate on charges of conducting "atrocity propaganda." In 1943 he was still living in Palestine.

Weltsch was a noted editorial writer; in April, 1933, when the boycott committee ordered shields showing a yellow spot on a black background to be attached to Jewish-owned shops in Germany, he wrote an editorial in which he boldly stated: "We accept the shield and shall make of it a badge of honor." It was reprinted in Ludwig Lewisohn's anthology *Rebirth* (1935).

WENGER, JOHN, artist and scenic designer, b. Elisavetgrad (Kirovo), Russia, 1887. He studied first in the art school in Odessa and later, having come to the United States in 1903, at the National Academy of Design in New York city. His paintings were exhibited in many museums and galleries throughout the United States, and beginning with 1914 he exhibited almost annually in New York.

As scenic designer, Wenger was affiliated with the Metropolitan Opera House, for which he did the settings for *Petrouchka,* with the Boston Opera Company, and for numerous musical comedy and revue productions, including the *George White Scandals* and the *Ziegfeld Follies.* He was a pioneer in the special type of stage setting that was inaugurated with the establishment of the elaborate motion picture theatres, and was for a long time associated, as art director, with Samuel L. Rothafel (Roxy) in his large New York city motion picture houses. Wenger's designs tended toward the diaphanous and elusive; the imagination reached spectral heights in the productions for which he provided the backgrounds.

Subsequently he became identified with motion pictures, especially with Paramount. The New York Museum and the Tel-Aviv Museum acquired examples of Wenger's work.

He was awarded a bronze medal at the Sesquicentennial Exhibition in Philadelphia in 1925.

Lit.: Lieberman, Elias, in *American Hebrew,* June 18, 1920, p. 129; Dec. 5, 1924, p. 120.

WENGEROFF, family of Russian Jews. The following members of the family gained prominence:

PAULINE WENGEROFF, author (b. Bobruisk, Lithuania, 1833; d. Minsk, White Russia, 1916). She was descended from an Orthodox family, but received a thorough European education. Her husband, director of the Commerce Bank at Minsk, played a considerable role in the life of Russian Jewry. Pauline Wengeroff became known, chiefly in Central Europe, through her autobiographical work, *Memoiren einer Grossmutter. Bilder aus der Kulturgeschichte der Juden Russlands im neunzehnten Jahrhundert,* which, with a preface by Gustav Karpeles, appeared in Berlin (vol. 1, 1908; vol. 2, 1910). It mirrored the cultural life of Russian Jewry from the 1830's up to 1892 (the year of her husband's death), the Haskalah period, the attempts at reform made by Rabbi Max Lilienthal, and the effects of spiritual transformation through Western education on the Jewish masses. Although she admitted the necessity of "Europeanization," she sided with those who remained loyal to the Jewish traditions, and deeply deplored the renunciation of Judaism by her own children. She was in close touch with the Chovevei Zion and the Zionist Movement.

SEMYON WENGEROFF, literary critic and historian of literature (b. Lubny, Russia, 1855; d. Petrograd, 1920), was the son of Pauline Wengeroff. He published his first book, a treatise on Turgenev, at the age of nineteen. In 1886 he began to write a critico-biographical dictionary of Russian writers and scientists from the start of Russian civilization up to his time, but only a small part of it was published. He wrote (in Russian) *Russian Books* (1896-98); *Russian Poetry* (1897); *Sources for a Dictionary of Russian Writers* (1910); and *Outline of Modern Russian Literature.* He edited the works of great Russian and foreign poets, such as Pushkin, Molière, Shakespeare and Schiller. Wengeroff lectured on Russian literature at the University of St. Petersburg (1897-99), and in 1909 received the honorary doctor's degree from the University of Kharkov. Wengeroff, who was baptized, favored complete assimilation of the Jews in an article on the Jewish problem published in the periodical *Nedyela* (1897).

ZINAIDA WENGEROFF (b. Russia, 1867; d. New York city, 1941), daughter of Pauline Wengeroff, was, like her brother, Semyon Wengeroff, a literary critic. She married the poet Nicolas Minsky in London (1925), and after his death came to the United States (1937). She wrote *Literary Characteristics* (2 vols.), and devoted her energies mainly to translations from English, German and French. These translations include Muther's *Geschichte der Malerei im 19ten Jahrhundert,* Lanson's *Histoire de la litérature française,* Riehl's *Friedrich Nietzsche* and novels by Jakob Wassermann. Through her articles on modern French poetry, published in the monthly *Messenger of Europe,* she contributed greatly to the development of the Russian symbolist school.

ISABEL WENGEROFF (b. Russia, 1877), better known as Isabel Vengerova, was a piano teacher. She was a sister of Semyon and Zinaida Wengeroff. From 1906 to 1920 she was professor at the St. Petersburg Conservatory, and in 1924 joined the teaching staff of the Curtis Institute of Music at Philadelphia. In 1943 she was living in New York city. FAINA WENGEROFF (b. Konotop, Russia, 1857), another sister. was one of the first Jewish women to study medicine. In 1880 she married Leonid Slonimsky. She had three famous sons.

Franz Werfel

WEPRIK, ALEXANDER, *see* VEPRIK, ALEXANDER.

WERBELOWSKY, DAVID, publisher, b. Eydtkuhnen, East Prussia, 1878; d. Brooklyn, N. Y., 1937. He started his career in New York in 1896 as a clerk in his father's publishing firm of Rosenbaum and Werbelowsky. In 1919 he became president of the Hebrew Publishing Company in Brooklyn, N. Y. He was the organizer and president of Beth Moses Hospital in Brooklyn, and a member of the executive committee of the Zionist Organization of America, Jewish National Fund, and Hebrew Home and Hospital of the Aged.

Among the books published by Werbelowsky's firm were: Isaac Leeser's translation of the Bible (1909); Alexander Harkavy's revision of the King James Bible and his Yiddish dictionary (1914); Heinrich Graetz' *History of the Jews* with an annex by Max Raisin (1919); a Yiddish translation of Vogt's *History of the World* (1919); more than 2,000 classics, including Frug, Gordon, Mendele and Peretz; hundreds of prayer-books and schoolbooks.

WEREWOLF, *see* ANIMALS, FABULOUS.

WERFEL, FRANZ, playwright and novelist, b. Prague, Bohemia, 1890. He studied at the Universities of Prague and Leipzig. During the first World War (1914-18) Werfel served in the Austrian Army on the Russian front, and was awarded the Imperial Austrian war medal.

Werfel's literary life falls into three periods. In the first of these he is primarily a lyric poet. His earliest published poems (*Gedichte*) date back to 1908, when he was only eighteen. The title of the collection of his first poems was descriptive: *Der Weltfreund* (1911). Naturally, they were autobiographies in disguise. He himself was the "Weltfreund," the world's friend, eager to clasp all mankind to his bosom. This was less the age of adolescent gropings than of full-fledged answers, his "messianic age." In one poem, one sentence, he tried to convey the meaning of all life. Although this was his "Sturm und Drang" period, he

was less bombastic than most of his young contemporaries of the pre-first World War Austrian school.

During the second period of his literary life Werfel turned to the stage. This was after the first World War. Poetry had fallen from its high estate; the Central European public wanted "Ablenkung," escape from realities, and the theatre came into its own. The advance guard of the dramatists, however, refused to yield to escapist trends; Franz Werfel was one of the advance guard. In 1922 he already saw the danger of Nazism, and represented it as a revolt of the primitive man against the civilized man in his drama *Schweiger.* Two years later he gave the world *Juarez and Maximilian,* in which he portrayed the clash of benevolent despotism and national self-expression. In *Das Reich Gottes in Böhmen* he treated dramatically the Hussite Wars, one of the first revolts of modern man against the oppressors of his soul. Later (1934) he wrote *The Eternal Road* (original German title, *Der Weg der Verheissung;* English trans., Ludwig Lewisohn, 1936 and 1937), which saw spectacular and successful production in the United States.

In the second period Werfel began to write also short stories and novels. In poetry he had been a gifted amateur, not in the class of Rainer Maria Rilke. In the field of drama he had been moderately successful. But it was only in his novels that he achieved world-wide fame. In the third period of his literary life he shifted the emphasis to prose epics, and found himself.

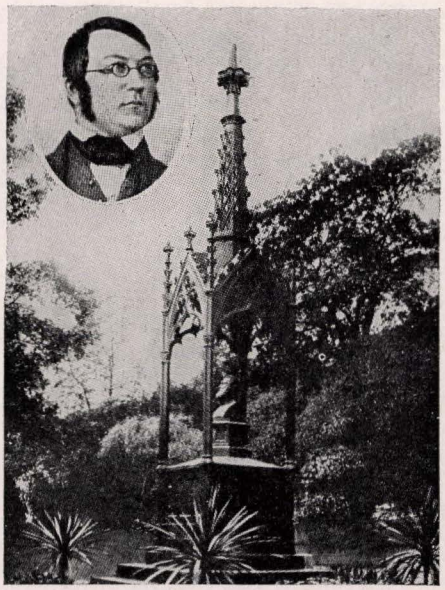
Werfel's novels defeat all attempts at classification because of their numerous facets. He is a master of description, characterization and suspense—all first-class novelists are. He would be no more than a first-class novelist if he did not have the quality of infusing his best writings with that spirit for which there is, unfortunately, no better word than the worn-out "inspiration." These writings often leave the everyday world and soar.

It is no explanation to say that Werfel is analytical, missionary and mystical. There are many authors who have traces of all these traits, yet their work is pedestrian. Some of Werfel's work also lacks that force which turns the commonplace into the miraculous. In some of his earlier novels he was analytical without being profound. He was too anxious to express what he had on his mind to be truly enjoyable as an artist. But he gradually lost the habit of performing self-searching operations of popular psychology in narrative.

His greatest novel, *The Forty Days of Musa Dagh* (English trans., 1934; German original, *Die vierzig Tage des Mùsa Dagh,* 1933), is probably the one that will survive him the longest. It may be one of the novels of our age that will remain on the shelves for generations. There he is at his best because there he can turn all his remarkable gifts to the service of a missionary cause. The book is not merely the story of what a few thousand Armenians did during the first World War, when they decided to perish bravely by the sword rather than by the ignominious lash. There Werfel can give full rein to his analytical gifts as part of the story itself. He analyzes his characters—as all great writers do—through their actions, not by way of his own asides. There he can also perform his missionary work by way of illustrating the horrible injustices which the majority can impose upon the defenseless minority. Musa Dagh is the story of the Jew, as much as of the Armenian.

Although the narrative is crystal clear, the mystical streak of Werfel is evident in this book. There is an eternal law, violated by evil-doers in the highest places, but it is a law of nature just the same and it can not be flouted in the sign of eternity.

As darkness descended upon the world, this mystical trait of Werfel seemed to become a more dominant trait. In July, 1940, he was one of the millions that tried to escape from the hordes of evil. One day he faced the grotto of Lourdes where the young girl Bernadette Soubirous had many years before seen a sign. Then and there he made a vow that he would sing the song of Bernadette if he reached America safely. He did reach the United States, did sing the song of Bernadette and, incidentally, also wrote a best-selling book about her, *The Song of Bernadette* (1942). He explained in newspaper articles that in this book he did not mean merely to describe the life of a saint but he meant to represent the spiritual conflict between the forces of darkness and the forces of light. Thus *The Song of Bernadette* could be interpreted as an artistic presentation of the second World War. This is the mystic Werfel who, at the age of fifty, sought to find the questions to the answers which he gave as a youth of eighteen.



In 1943 he confessed, though by origin a Jew who was never baptized: "I have been decisively molded (as is evident from the major part of my work) by the spiritual forces of Christianity and the Catholic Church."

Werfel was one of the few elect, one of the great authors of the two wars. In 1943 he was made an honorary member of the National Institute of Arts and Letters, a rare American honor for a foreigner.

Aside from those mentioned above, Werfel's works, both in the original German and in their English translation, include: *Wir Sind; Abituriententag* (English trans., *Class Reunion,* 1929; reprinted in *Twilight of a World,* 1937); *Einander* (1915); *Gerichtstag* (1918); *Beschwörungen* (1922); *Hymnarium; neue Gedichte* (1934); *Schlaf und Erwachen* (1935); *Die Troerinnen* (The Trojan Women; 1913); *Bocksgesang* (English trans., *Goat Song,* 1926); *Die Mittagsgöttin* (1919); *Der Tod des Kleinbürgers* (English trans., Clifton W. Fadiman and William A. Drake, *The Man Who Conquered Death,* 1927; reprinted in *The Twilight of a World,* 1937, reprinted also as *Death of a Poor Man,* 1930); *Paulus unter den Juden; Pure in Heart* (1931; issued in the same year and in 1933 also under the title of *Hidden Child*); *In einer Nacht* (1937); *Nicht der Mörder, der Ermordete ist schuldig* (published in English as part of *The Twilight of a World,* 1937); *Verdi, Der Roman der Oper* (1924; English trans., *Verdi,* 1925); *Die Geschwister von Neapel* (1931; English trans., *The Pascarella Family,* 1932, 1934 and 1935); *Höret die Stimme, der Roman eines biblischen Propheten* (1937; English trans., *Hearken unto the Voice,* 1938 and 1939); *The Twilight of a World* (1937), short stories; *Embezzled Heaven* (1940); and the essays *Realismus und Innerlichkeit; Können wir ohne Gottesglauben leben?;* and *Von der reinsten Glückseligkeit des Menschen* (1938). WERGELAND, HENRIK ARNOLD, non-Jewish poet, and champion of Jewish rights, b. Christiansand, Norway, 1808; d. Christiania (Oslo), Norway, 1845. He represented one of the strongest forces in the romantic trend in Norwegian literature, and was one

Henrik A. Wergeland (inset) and monument erected in his honor by Swedish and Danish Jews

of the leaders of the ultra-Norwegian movement. In 1814, when Norway was detached from Denmark, with which it had been united from 1319 on, and established its own constitution, Jews and Jesuits were legally barred from the country. Among those Norwegian representatives who drew up the constitution was the poet's father, the clergyman Nicolai Wergeland. His son, a theological student, who had become acquainted with Jews on a trip to France, was opposed to this medievalism in the constitution.

When the Norwegian government made its first state loan from the banking house of Salomon Heine in Hamburg (the uncle of Heinrich Heine), the necessary conference between the Norwegian representatives and the banker could not take place until the government issued a letter of safe-conduct for the Jew. Wergeland denounced this as an absurd injustice, and in 1841 issued a pamphlet in which he appealed, from an ethical and humanitarian standpoint, for the removal of discriminations against Jews. He pointed out that among the few countries which had not granted civil rights to the Jews were Spain and Norway: "Norway's constitution does not deserve to be called the most liberal; it is the most intolerant." He predicted that the admission of the Jews would be of material advantage to the country, and pointed to the advantages which Denmark and Sweden had derived from granting emancipation to Jews.

In September, 1842, owing to his efforts, a parliamentary committee took the question of admitting Jews to Norway under consideration. The preparation of the necessary material was entrusted to Wergeland who, meanwhile, had become a government archivist. The report of the committee, handed down to the Storting (Parliament), advocated the abolition of the last paragraph of Article 2 of the constitution which forbade Jews to enter Norway, even as passengers. But when the bill was put to a vote, the necessary two-thirds majority was not obtained.

Thereupon Wergeland drew up a new petition for the abolition of that paragraph. The first signature under this petition was that of the judge, later state councillor, Anton Wilhelm Sörensen, a close collaborator of Wergeland. The poet, however, died of tuberculosis in 1845 before the bill was reconsidered by the Storting. One of the last letters to reach him came from the Danish Jewish poet Meir Aaron Goldschmidt, who wrote: "When I think of you, I am proud to be a human being."

Wergeland placed also his poetry at the service of Jewish emancipation. His collections of poetry, *Jöden* (The Jew; 1842) and *Jödinden* (The Jewess; 1844), contain narrative poems that belong to the best of their kind in Norwegian literature. "Christmas Eve" (in *Jöden*) tells the story of a Jewish peddler who gives his own life in vain to save from freezing to death the little daughter of a farmer couple who had refused him admission to their home on Christmas Eve. His poems were translated into German (by the Oslo rabbi, Julius Samuel, 1936) and English.

Before his countrymen erected a monument to him, Swedish and Danish Jews dedicated to him a monument which was first unveiled in Stockholm, Sweden (1847), because Jews were not yet permitted to enter Norway. In 1849 a Jewish delegation went to Christiana with letters of safe-conduct and again unveiled the monument there. Its inscription reads: "Henrik Wergeland, the tireless champion of men's and citizen's rights," and indicates that "grateful Jews outside of Norway erected this in his memory." Annually, on May 17th, the Norwegian national holiday, it was decorated by the Jewish youth association of Norway. Jews were officially permitted to reside in Norway in 1851, six years after Wergeland's death.

ALFRED WERNER.

Lit.: Goldberg, Morris, "A Norwegian Advocate of Freedom," *American Hebrew,* July 19, 1929; Summit, Alphons, "Norway's Jewish History," *ibid.,* Sept. 8, 1939; *ibid.,* Jan. 31, 1936, p. 327; Sundby-Hansen, H., "A Country without anti-Semitism," *Jewish Exponent,* Aug. 22, 1924; Wergeland, Agnes Mathilde, *Leaders in Norway* (1916).

WERNE, ISAAC, rabbi, b. Slonim, Poland, 1876; d. Los Angeles, Cal., 1940. He was ordained by several Polish rabbis (1897), and received the Ph.D. degree from the University of Königsberg, Germany, (1902). He came to the United States in 1904, occupied pulpits in New York city, Massachusetts and Ohio, and served with Congregations Ohave Zedek, Chicago (1910-14), Beth Israel, Dallas, Texas (1920-21), Agudath Achim, Columbus, Ohio (1921-33), and Beth Israel, Los Angeles (1933-40). In 1934 he was elected president of the Los Angeles Orthodox rabbinate, and head of the Los Angeles Union of Jewish Orthodox Organizations. He was a member of the National Board of Jewish Education.

Werne's writings include: *Das Buch Hiob nach der Auffassung der rabbinischen Literatur in den ersten fünf nachchristlichen Jahrhunderten* (1902); *Siah Yitzhak* (1930); *Maimonides, His Philosophical and Theological Views on Jewish Thought and Creed* (Yiddish; 1936). He was a contributor to the *Otzar Yisrael* (1907-13) and to the *Encyclopedia of Jewish Knowledge* (1933).

WERNER, M. R., author, b. New York city, 1897. After studying at the Columbia University School of Journalism, he served with the United States Army Medical Corps in France (1917-19), and then was editor and special correspondent for the New York *Tribune* (1919-20). From 1935 to 1936 he was an official of the Works Progress Administration.

Werner's writings, which are mainly biographical or concerned with American social phenomena, include: *Barnum* (1923); *Brigham Young* (1925); *Tammany Hall* (1928); *Bryan* (1929); *Orderly!* (1930); *To Whom It May Concern* (1931); *Little Napoleons and Dummy Directors* (1933); *Privileged Characters* (1935); *Julius Rosenwald* (1939); *The Admirable Trumpeter* (General James Wilkinson; with T. R. Hay, 1941).

WERNER, MAX, pseudonym of a writer and lecturer on modern politics and military strategy whose identity, for political reasons, could not be revealed at the time of this writing (1943). He was born in Russia and first played a role in the Russian Social Democratic movement. Later he lived in Germany where, under his original name, he contributed articles to left-wing magazines. As an émigré, he wrote for the emigrants' press in the democratic countries.

In 1943 he was living in New York city. Werner contributed articles on military strategy to the *New Republic* and other liberal magazines.

Werner attracted much attention through his widely discussed books, *Military Strength of the Powers* (1939), *Battle for the World* (1940) and *The Great Offensive* (1942). He was hailed as the only analyst who correctly estimated the Russian military potential since, shortly after the Nazi invasion of Russia (summer, 1941), he predicted that Russia would not only survive but might even defeat the German Army. In his last-named book he discussed the outlook of an offensive by the United Nations and the strategy of global warfare. Werner frequently appeared as a speaker at political conferences and meetings.

WERTHEIM, EDGAR, chemist, b. La Salle, Ill., 1886. He studied at the University of Kansas (M.Sc., 1919) and at the University of Chicago (Ph.D., 1921). Wertheim was an assistant professor of chemistry at the University of Kansas (1918-20), and in 1928 was appointed associate professor of organic chemistry at the University of Arkansas.

His published writings include: *Essentials of Organic and Biological Chemistry* (1931); *Manual of Organic Chemistry* (1932); *Organic Chemistry Laboratory Guide* (1937; 2nd ed., 1940); *Textbook of Organic Chemistry* (1939); *Introductory Organic Chemistry* (1942). He was assistant editor of *Outlines of Organic Chemistry* (1937). Wertheim became a member of the Baptist church.

WERTHEIM, MAURICE, banker and communal worker, b. New York city, 1886. He studied at Harvard University. He was vice-president and secretary of the United Cigar Manufacturers Company (later the General Cigar Company) from 1907 to 1913, and a member of the New York State Industrial Board (1913-15). Wertheim entered the investment business with Hallgarten and Company (1915-19), and was a member of Hallgarten and Company (1919-26). He was the founder and senior partner of Wertheim and Company, investment bankers, organized in October, 1927, and a director of the Underwood Elliot Fisher Company, Hart Corporation of America, Cuban Atlantic Sugar Company, and Bond Stores, Inc.

During the first World War he went to Washington, D. C., as a one-dollar-a-year member of the War Savings Board, and toward the end of the War was sent on a government mission to Persia. In the second World War he served with the War Production Board and the Board of Economic Warfare.

Wertheim was known as a patron of art and education. He was one of the founders and a member of the board of directors of the Theatre Guild, New York city, a trustee of the New School for Social Research and of The Art Foundation, Inc., and a member of the board of directors of the Foreign Policy Association. He was also a member of the Harvard Fund Council and of the Committee to Visit Department of Sociology, Harvard University. He came to the support of the liberal weekly *The Nation,* and made it possible for it to continue publication as a leading organ of American liberalism.

Wertheim was actively interested in Jewish affairs. He was for a number of years a member of the executive committee and chairman of the finance committee of the American Jewish Committee. In November, 1941, he was elected president of the Committee, to fill the unexpired term of the late Sol M. Stroock. He was reelected in January, 1942, and was succeeded in 1943 by Joseph M. Proskauer. As president of the Committee he played a leading role in bringing about harmony and cooperation in American Jewish communal life. He was also (1943) a trustee of the Federation for the Support of Jewish Philanthropic Societies of New York city, which his father helped to found, and chairman of its finance committee, as well as treasurer of the American Friends of the Hebrew University.

WERTHEIM, WILHELM, scientist, b. Vienna, 1815; d. Tours, France, 1861. He received the M.D. degree from the University of Vienna (1839), and went to Paris in 1840. In 1848 he was made assistant professor at the University of Montpellier, and in 1855 examiner at the École Polytechnique of Paris. He was an unusually versatile naturalist, and published many treatises on physiology and physics, especially on the subject of elasticity in its relations to the chemical conditions and temperature of bodies, including the human tissues in the scope of his researches; he also studied the velocity of sound, polarization and many other problems. Wertheim was the personal physician of Heinrich Heine.

A member of the jury of the Paris World Exhibition of 1855, he was granted the French Legion of Honor. Seized in 1860 by a mood of melancholy, probably as a result of mental overstrain, he committed suicide in 1861 by jumping off the steeple of a cathedral.

WERTHEIMER, ADOLF, bank director and art patron, b. Nagyvárad (Grosswardein), Hungary, 1868. From his seventeenth year on he served in the Hungarian Commercial Bank of Pest, and eventually rose to the position of acting director. In that capacity he was also a member of the board of directors of several industrial enterprises controlled by the bank. He was also a member of the council of the Budapest commodities and stock exchange. His essays and articles on questions of economy appeared in the periodical and daily press.

Wertheimer had a notable collection of paintings and art metal work. He was a director of the national Hungarian art association and was placed in charge of the Belgo-Hungarian exhibit by the Hungarian government. On this occasion he received the medium cross of the Belgian Leopold Order.

Wertheimer was also active in Jewish communal endeavors. He was elected several times a leader of the Jewish community of Pest and was an honorary member of its assembly. In addition he was president of the Hungarian-Jewish Literary Society (IMIT) and of the Hungarian-Jewish Museum.

WERTHEIMER, EDUARD (DE MONOR), historian, b. Pest, Hungary, 1848; place and date of death unknown. He was professor of history at the University of Kolozsvár (from 1877 on), and subsequently at the Law Academy of Pozsony (Pressburg). Wertheimer wrote several books dealing with the political history of the House of Austria and its place in European history. He was knighted and made an aulic councillor by Emperor Francis Joseph I.

Joseph von Wertheimer

His published works include: *Zur Geschichte des Türkenkrieges Maximilian II* (1875); *Österreich und Ungarn im ersten Jahrzehnt des XIX. Jahrhunderts* (2 vols., 1884-90); *Zur Geschichte Wiens* (1889); *Az 1811-12. magyar or szággyűlés* (The Hungarian Diet of 1811-12; 1899); *The Duke of Reichstadt* (2 vols., 1902-13); *Gróf Andrássy Gyula élete és kora* (Count Gyula Andrássy and his Age; 3 vols., 1910-13).

WERTHEIMER, JOSEPH RITTER VON, pedagogue and writer, b. Vienna, 1800; d. Vienna, 1887. He was first engaged in his father's business, but later turned to the study of pedagogics, went to London (1824) to get acquainted with the English system of kindergartens, and from 1826 to 1828 traveled through Europe to examine the various educational systems. Together with the Catholic priest, Johann Lindner, he opened the first kindergarten in Vienna (1830); the venture was a great success, and in a short time a series of kindergartens, all under Wertheimer's supervision, was established in most of the larger cities of Austria. Later he founded an Aid Society for Juvenile Criminals, an orphanage and several Jewish schools. The Verein zur Förderung der Handwerke unter den Israeliten, which he founded in 1840, rendered service in the struggle for Jewish emancipation.

Wertheimer was trustee and subsequently chairman of the Jewish community and of the Israelitische Allianz in Vienna, was knighted and received the freedom of the city of Vienna. He brought all his influence to bear upon the acquisition of full civil rights by the Austrian Jews.

His first work on this subject was suppressed by the Austrian censorship, and was published anonymously in Leipzig (*Die Juden in Österreich vom Standpunkte der Geschichte, des Rechts und des Staatsvortheiles,* 2 vols., 1842). Wertheimer wrote several other treatises on Jewish topics, and edited the *Jahrbuch für Israeliten* (11 vols., 1854-64) and the *Wiener Geschäftsbericht,* for which he wrote political and historical articles.

Lit.: Wurzbach, *Biographisches Lexikon der österreichischen Monarchie;* Kohut, Adolph, *Berühmte israelitische Männer und Frauen* (1900-1); Wolf, G., *Joseph Wertheimer* (1868); Peixotto, Benjamin Franklin, "Joseph Ritter von Wertheimer," *Menorah Monthly,* vol. 2, May, 1887, pp. 237-46.

WERTHEIMER, MAX, psychologist and philosopher, b. Prague, Bohemia, 1880. He received the Ph.D. degree from the University of Würzburg (1904). Wertheimer evolved his theory, the Gestalttheorie, while serving as an instructor at the University of Frankfort (1912). He served as professor of psychology and philosophy at the Universities of Berlin (1921-29) and Frankfort (1929-33). In 1933 he was ousted by the Nazis from his position of professor and of editor of the *Psychologische Forschung* (of which twenty volumes appeared in Berlin between 1920 and 1933). In that year he came to the United States and was appointed professor at the New School for Social Research, New York city, where he was still teaching in 1943.

His published writings include: *Über Schlussprozesse im produktiven Denken* (Berlin, 1921); *Über Gestalttheorie* (Erlangen, 1925); *Abhandlungen zur Gestalttheorie* (Erlangen, 1925); "On the Meaning of Democracy" (in *Political and Economic Democracy,* New York, 1936); "On the Meaning of Freedom" (in *Freedom, Its Meaning,* New York, 1940). In 1934 he started editing the quarterly *Social Research.*

Lit.: Petermann, *Die Wertheimer-Koffka-Kohlersche Gestalttheorie* (1929); *Who's Who in Philosophy* (1942) 282-83.

WERTHEIMER, SAMSON, financier and court Jew, b. Worms, Germany, 1658; d. Vienna, 1724. He came to Vienna in 1684 and was introduced to the Viennese court by Samuel Oppenheimer in order to assist in its financial affairs. During the Spanish War of Succession both he and Oppenheimer aided Emperor Leopold I, and after Oppenheimer's death (1703), Wertheimer was in sole charge of supplying credit to the government. In 1703 he was made court factor, and received many privileges from Emperor Joseph I.

Wertheimer applied his great influence at court in favor of the Jews.

Due to his intervention the sale of Eisenmenger's anti-Jewish book, *Entdecktes Judentum,* was forbidden. He received permission for the building of a larger synagogue ("Samson's Schul"), and was allowed to offer the hospitality of his home to foreign Jews. He spent large sums of money for Jewish purposes, for Jews in Palestine and abroad, and helped in the rebuilding of numerous communities in Hungary. He gave financial support to the printing of Hebrew books. His knowledge of Talmudic lore was extensive. He filled the position of Ab Beth Din, and bore the title of a Hungarian Landesrabbiner (district rabbi).

Wertheimer was related to some of the most distinguished German Jewish families by marriage. His eldest son married the daughter of Samuel Oppenheimer, another son married a daughter of Behrend Lehmann, of Halberstadt, Germany, and his son-in-law Moses Kahn was director of the Talmud school of Frankfort. Samson's son, Wolf Wertheimer, took over his father's business and was also made court factor. He suffered great financial reverses, and for a long time was unable to grant the large sums of money to the Jewish institutions which his father had stipulated among his bequests.

Wolf Wertheimer's sons, however, restored the Wertheimer trust to its original amount of 150,000 gulden, and this fund continued to exist until the first World War. Some of it was used to help needy German Jews in Jerusalem.

Lit.: Wurzbach, *Biographisches Lexikon der österreichischen Monarchie;* Kaufmann, David, *Samson Wertheimer* (1888); idem, *Urkundliches aus dem Leben Samson Wertheimers* (1892).

WERTHEIMER, SOLOMON AARON, scholar, b. Bazin, Hungary, 1866; d. 1935. He was educated at Jerusalem. Later he lived at Cairo, Egypt, where he collected Hebrew manuscripts. He edited *Batte Midrashoth* (1893-97), Midrashim from manuscripts which

he provided with an introduction and notes; *Ginze Yerushalayim* (1896-1902), a collection of treatises from rare manuscripts; *Midrash Haseroth Viyetheroth* (1898), a collation of the Parma manuscript with three Egyptian manuscripts; *Koheleth Shelomoh* (1899), a collection of responsa, with introduction and notes and a Hebrew translation of the Arabic responsa.

Wertheimer was also the author of *Darche Shel Torah* (1891) and other Talmudic works, and edited *Hatham Sofer*. He was engaged on a work on Hebrew synonyms, *Biur Shemoth Hanirdafim*.

WESSEL, BESSIE BLOOM, sociologist, b. the Ukraine, 1889. She was brought to the United States in 1891, and completed her education at Brown University (Ph.B., 1911) and Columbia University (A.M., 1924; Ph.D., 1935). From 1911 to 1915 she was director of the Immigrant Educational Bureau of Providence, R. I. In 1918 she joined the faculty of Connecticut College as instructor in economics and sociology; in 1938 she was made professor of sociology and head of the department of social science. During 1925 to 1928, while on leave of absence, she was lecturer on social science and director of a study of ethnic factors in community life at the Graduate School of Brown University.

She was a member of the Committee of Public Welfare which acted in an advisory capacity to the city manager of New London, of the housing committee of the American Association of Social Workers, and of the executive committee of the Eastern Sociological Society. In 1934 she was president of the Connecticut State Conference of Social Work, and in 1938 a member of the advisory committee of the Red Cross Disaster Program. In addition to articles on topics dealing with ethnic factors, published in scholarly periodicals, she wrote *An Ethnic Survey of Woonsocket, R. I.* (1931). Similar studies of hers on New London and Norwich were awaiting publication in 1943.

WESSELY, NAPHTALI HERZ (HARTWIG), Hebrew philologist and poet, b. Hamburg, Germany, 1725; d. Hamburg, 1805. Although Wessely's family was among the most distinguished and influential in 18th cent. German Jewry (his father and grandfather were arms manufacturers and purveyors to Danish royalty), he received a thoroughly traditional education as well as training in languages and secular science. He spent many years in Amsterdam and Copenhagen as a representative of a leading bank; in this capacity he settled in Berlin, where he became acquainted with Moses Mendelssohn and achieved fame as one of the champions of the Enlightenment movement.

His first literary work was a Hebrew translation of the Apocryphal book *The Wisdom of Solomon,* which he began in 1755 and published twenty-five years later with an appended commentary entitled *Ruah Hen* (The Spirit of Grace; Berlin, 1780). While working on this he published a philological-ethical book on the Scriptural concept of Hochmah (Wisdom), *Lebanon* or *Gan Naul* (Locked Garden; Amsterdam, 1765-66).

In Berlin he published a commentary on the Talmudic ethical tractate *Aboth* entitled *Yen Lebanon* (Wine of Lebanon; 1775), and the pamphlet *Alim Literufah* (Loose Leaves; 1772), advocating Mendelssohn's German translation of the Pentateuch and the Biur to which he contributed the commentary on *Leviticus*. A commentary of his on *Genesis* was published many years later.

But Wessely's book *Dibre Shalom Veemeth* (Words of Peace and Truth; Berlin, 1782) had a sensational effect upon contemporary readers. It was a sort of manifesto published on the occasion of the issuance of the Edict of Toleration by Emperor Joseph II of Austria. In it he appealed to the Jewish communities

Naphtali Herz (Hartwig) Wessely

of Austria-Hungary to avail themselves of the opportunities granted them by the Edict to modernize their educational system and include the study of languages and secular sciences, in order to raise a generation fit for emancipation. This work aroused angry protest on the part of the leading Orthodox rabbis of the day, and he was constrained to publish three more pamphlets on the subject (1782-85), all of which established him as the spokesman of German Haskalah. The book was soon translated into French, Italian and German, and wielded a great influence upon the generation.

In 1788 he published his *Sefer Hamiddoth* (Book of Ethics), a theoretical analysis of ethical problems and spiritual faculties, which is permeated with the spirit of piety and religiosity. But his masterwork is the heroic poem *Shire Tifereth,* a Biblical epic about the Exodus, divided into eighteen cantos (the first fifteen appeared at Berlin in 1782 to 1802, and the last three were published posthumously at Prague in 1829). This book, on which he worked for more than twenty years, became the model for much of the poetic effort of the Haskalah. It was translated into German and French. The poem is clearly influenced by Klopstock's *Messiah,* and is less of a historical poem of the Biblical age than a monument of the ideas and aspirations of the 18th cent. German Haskalah. Wessely did not succeed in the attempt to bring the ancient period to life in his poem. He lacked the equipment as well as the poetic imagination for such a task. The poem is a glorification of enlightenment, of good manners and lofty thoughts which are anachronistic to the Mosaic age. Moses is depicted as a pious and philosophical Maskil, not unlike Mendelssohn; Jethro and his daughters appear as well-bred and high-spoken intellectuals whom Moses saves from the fanatical and benighted shepherds. Even Amalek is the knowledge-hating enemy whom Moses has to defeat before he can bring enlightenment and emancipation to his people.

Wessely's real contribution to Hebrew literature lies in his fluent, though ornate, Biblical style which served as a model for Hebrew writers for many years. He was a pathfinder in modern Hebrew poetry. He was the first to substitute the syllabic meter for the artificial and complicated Spanish meter.

Wessely wrote also numerous odes and elegies in commemoration of various events and personalities. In these, too, he gave expression to ethical and intellectual concepts of the Haskalah. He was also among the founders of and early contributors to *Hameassef,* organ of the German Enlightenment movement. AHRON OPHER.

Lit.: Slouschz, Nahum, *Renaissance de la littérature hébraïque,* chap. 2; Meisel, W. A., *Leben und Wirken des Naphtali Hirz Wessely* (1841); Lachower, F., *Toledoth*

Hasifruth Haibrith Hahadashah, vol. 1 (1928) 65-77; Klausner, Joseph, in *Kithebe Hauniversitah,* vol. 3; Waxman, Meyer, *A History of Jewish Literature,* vol. 3 (1936) 107-19.

WESSELY, WOLFGANG, theologian, orientalist and jurist, b. Trebitsch, Moravia, 1801; d. Vienna, 1870. He first received a traditional Jewish education, but later entered the University of Prague and graduated with the Ph.D. (1828) and LL.D. (1833) degrees. After serving as an examiner of betrothed couples (as required by Austrian law at that time) and as a teacher of religion in Jewish schools, he was made lecturer on Hebrew language and literature at the University of Prague. Together with other jurists, he investigated for the Austrian government the reforms in penal procedure in the Rhine province and Belgium, and as a consequence of the report of these experts the jury system was introduced into Austria. Besides lecturing on Hebrew topics at the philosophical faculty of the University of Prague, he was an instructor on criminal law, penal procedure, philosophy of law and civil law at its juridical faculty. The last-named faculty appointed him full professor in 1861; Wessely was the first Austrian Jew to hold such a position. He was instrumental in the establishment of a higher Talmud Torah school in Prague (1860).

Wessely wrote numerous books, including: *Wer ist nach den Grundsätzen des österreichischen Rechts zur Vornahme einer jüdischen Trauung berechtigt?* (1839); *Nethib Emunah,* a Biblical catechism (1840); *Tefilloth Yisrael,* a prayer-book with German translations in Hebrew characters (1841); *Über die Gemeinschaftlichkeit der Beweismittel im österreichischen Zivilprozesse* (1844); *Die Befugnisse des Notstands und der Notwehr nach österreichischem Rechte* (1862).

Lit.: Allgemeine Zeitung des Judentums (1870) 407-8; *Allgemeine Deutsche Biographie,* vol. 42 (1897) 147.

WEST INDIES. The West Indies played an important part as a stepping stone in the migration of the Jews to North America. Marranos, beginning with Luis de Torres, settled in Cuba, and possibly Haiti, shortly after the discovery of America, and it is probable that there were others in the West Indies while the islands were under Spanish rule, though no exact information is obtainable. Presumably some of these Marranos were later able to return to Judaism in the nearby countries in the following centuries. Jews are known to have been in Barbados in the 17th cent. when it came under British rule and in Martinique in the same century when it was under Dutch control.

Many of the Jews of Recife in Brazil settled in the West Indies, especially Curaçao, Jamaica and Barbados, after their expulsion in 1654. Mathias de Sousa, who may very possibly have been Jewish, was picked up by Father White at Barbados, and brought with him to Maryland in 1634. Others of the early settlers in New York and Newport are known to have come from the West Indies in the 17th cent., while such communities as Savannah and Charleston received immigrants from the West Indies in the 18th and early 19th cent. Jews from the West Indies settled in New Orleans and cities along the Gulf of Mexico in the early decades of the 19th cent.

Jamaica has the distinction of being the first English possession to emancipate the Jews (1740) and the success of this measure became an argument that led to their eventual emancipation throughout the British Empire. The settlement in the Virgin Islands was comparatively late in the 18th cent., and the modern Jewish settlements in Cuba, Haiti and the Dominican Republic are chiefly of the 20th cent.

Up to the 19th cent. the West Indies were the residence of many Jewish merchants, who dealt in the products of the region and had connections with America and Europe. After the first third of the century the importance of the West Indian Jewish communities declined, being overshadowed by the growth of the United States. In the 20th cent. attempts were made to colonize refugees from Europe there.

See also: BARBADOS; CUBA; CURAÇAO; DOMINICAN REPUBLIC; HAITI; JAMAICA; KINGSTON; MARTINIQUE; VIRGIN ISLANDS.

WEST ORANGE, a town of New Jersey in the New York city and Newark suburban area, which in 1943 included in its general population of 25,662 (census of 1940) an estimated 1,000 Jewish inhabitants. In 1943 the only Jewish organization in West Orange was the Jewish Community Center of Pleasantdale, a section of the town. The Center conducted a twice-weekly Hebrew school and a Sunday religious school, and was supported by a women's auxiliary. Its members held religious services on the holidays.

Jews of West Orange were affiliated with the religious and fraternal organizations in the more active neighboring communities of Orange and East Orange.

WEST VIRGINIA, a South Atlantic state of the United States, with a population of 1,901,974 (census of 1940), including an estimated 5,500 Jewish inhabitants in 1943. West Virginia, at first part of the state of Virginia, was admitted into the Union as a separate state in 1863. The mountainous character of this primarily agricultural region was not attractive to Jews moving west in the early part of the 19th cent., and it was not until the 1840's that Jewish communities began to take root in the territory which later became West Virginia.

The founding community of the state was WHEELING, where Minyan services were held probably prior to 1849. In that year the Cemetery Association was founded and purchased the Mount Wood cemetery. The first Jew to be buried there was Rabbi Meyer Mannheim. Members of the Association began to hold organized religious worship, presided over by Rabbi Mannheim, in a room of a private residence on Fourteenth (Quincy) and Main streets. Calling themselves Congregation Leshem Shomayim, they elected Rabbi Weil as their minister in 1856. He was succeeded by Rabbis Strauss (1859), Fult (1862) and Kuttenauer, who served from 1865 to 1872. It was during Kuttenauer's incumbency that the congregation, originally maintaining the traditional Orthodox ritual, began to institute reforms.

In 1892 it joined the Union of American Hebrew Congregations. The active Ladies' Hebrew Benevolent Society was organized in 1865 and was largely instrumental in helping to erect the imposing new Temple building on Eoff Street, dedicated in 1892. The congregation became known as the Eoff Street Temple. A long roster of rabbis, many of them distinguished in American Jewish life, served the Eoff Street Temple. These included B. A. Bonnheim (1887-97), Harry Levi (1897-1911), Abram Brill (1911-14), Morris S. Lazaron (1914-15), Abba Hillel Silver (1915-17), Louis D. Gross (1917-18), Louis A. Mishkind (1918-21), Hyman Iola (1921-25), Abraham L. Feinberg (1925-27), Charles E. Shulman (1927-31), Mordecai M. Thurman (1931-34) and Baruch Braunstein (1934-36). In 1936 Rabbi George B. Lieberman was called to the pulpit, which he still occupied in 1943. Lieberman was appointed lecturer in literature at West Liberty State

Teachers College. In 1940 he was honored with the Wheeling Community Award in the field of religion.

The Orthodox Synagogue of Israel, known also as the Edington Lane Synagogue, was organized in 1926, and built its house of worship in 1927. Rabbis who served the congregation included Bernard Cohen, Gershon Tolotchko, Louis Fischer, Lewis Goldberg (1935-37), Nathan Levinson (1937-39) and Bert Klein (1939-41). The synagogue organized a Hebrew school and a ladies' auxiliary.

The smaller Orthodox congregation Ohev Sholem established headquarters in a business section of the city. From 1921 to 1935 the Reverend Jacob Perilman served this congregation, which had, in 1943, no resident rabbi.

The charitable Ladies' Hebrew Benevolent Society of Temple Leshem Shomayim became the Eoff Street Temple Sisterhood, which was in turn affiliated with the United Hebrew Charities of Wheeling. Later the Federated Jewish Charities was formed. The Jewish Central Committee, organized in 1932, became the Jewish Community Council in 1939. Wheeling Jewry established also the Coordinating Committee for German Refugees. Other active organizations maintained by the community in 1943 included a lodge of the B'nai B'rith, a Senior and Junior Hadassah and a Zionist district. In 1943 Wheeling had, in its total population of 61,099 (census of 1940), approximately 1,000 Jews.

CHARLESTON. The estimated Jewish population of Kanawha County, including the city of Charleston, was, in 1943, over 1,500. The total population of the city was 67,914 (census of 1940). The Reform B'nai Israel Hebrew Educational Society was organized in 1874, and dedicated its first synagogue in 1876. It came to be known as Temple B'nai Israel, and later as the Virginia Street Temple. The Temple was served by Rabbi Israel Bettan (1912-22), who later became professor at the Hebrew Union College; and by Rabbi Maurice N. Eisendrath (1926-29), later of Toronto, Canada. In 1929 Rabbi Ariel B. Goldburg was elected to the pulpit, which he continued to occupy in 1943. Rabbi Goldburg was made chairman of the state advisory board of the State Department of Public Assistance. The Virginia Street Temple erected a structure adjacent to the Temple, known as the Bettan Center.

The Orthodox Jewish community of Charleston organized Congregation B'nai Jacob, of which Rabbi Samuel Cooper was called to be spiritual head in 1932, and which he was still serving in 1943. The congregation maintained a Hebrah Kaddisha and organized a ladies' auxiliary.

Charleston Jewry also organized a Young Men's Hebrew Association and a Young Women's Hebrew Association. A Federated Jewish Charity Fund, including the locality of Montgomery, was formed. Charleston Jewry supported, in addition, a lodge of the B'nai B'rith and a section of the National Council of Jewish Women, in which Reba Blustein Cohen was a leading figure. Max Frankenberger, prominent merchant, was made a director of the Charleston Educational Center. Leo Loeb was in the city council (1910) and its president pro tem, as well as secretary of the Charleston Bar Association.

HUNTINGTON, with approximately 600 Jewish inhabitants in 1943 in its general population of 78,836 (census of 1940), supported the Reform Congregation Ohev Sholom and the Orthodox Congregation B'nai Israel. The former was organized in 1889. Rabbis who served included Abraham Feinstein and Ralph H. Blumenthal, who left for service as a chaplain in the armed forces. In 1943 Rabbi Lawrence A. Block occupied the pulpit of Temple Ohev Sholom. B'nai Israel was formed in 1910. Rabbi S. Mendel served from 1914 to 1918. He was followed by Meyer Goldman (1923-26) and Hyman Sharfman (1928-32). In 1934 Jacob M. Danziger came to the pulpit, and was the incumbent in 1943.

Huntington Jewry organized the United Jewish Fund in 1938. Isidore B. Romer, merchant, held directive posts in numerous local organizations of the general Huntington community. Esther Cohen Weinberger was active in Jewish life and in the leading organizations of the city, including the Chamber of Commerce.

MORGANTOWN, a city of 16,655 inhabitants (census of 1940), had in 1943 a Jewish community comprising an estimated seventy-five families of 230 persons. Only four families were settled in the town about 1898. In 1939 there were about forty-five families of Jews; the further increase was brought about by general redistribution of the population from the urban areas to the smaller centers throughout the state, and by the erection of a defense factory in the town.

The Conservative Tree of Life Congregation, incorporated about 1922, had no resident rabbi before 1939; in that year, Alfred Jospe, previously of Berlin, was called to its pulpit. The congregation had not yet, by 1943, erected its own synagogue. Jospe was appointed also head of the Hillel Student Foundation at West Virginia University, first established in 1927 and re-established in 1935. The foundation's activities were housed in the congregation's quarters at Morgantown. The Morgantown community supported a lodge of the B'nai B'rith (organized in 1938) and a Zionist district (1940). Samson Finn, merchant, was an active communal worker.

FAIRMONT, with a population of 23,105 (census of 1940), numbered approximately 140 Jewish inhabitants in 1943. Congregation Beth Israel was organized in 1916. In 1943 Congregation Beth-El, supported by both Conservative and Reform groups, had as its minister Max Wiener, who had come to the pulpit in 1941. His predecessors were Avery J. Grossfield (1936-40), Bertram Klausner, Selig Miller and Harry Lasker. Prominent in the community was Simon Goodman, who for about twenty-five years was treasurer of the local tuberculosis organization. Lawrence M. Brile was a director in numerous community organizations. Emil Hirsch, a leading merchant, and his wife were active communal figures in the 1940's.

CLARKSBURG included an estimated fifty to sixty Jewish families (1943) in its total population of 30,579 (census of 1940). Congregation Tree of Life (founded in 1918) purchased a church and remodeled it into a synagogue in 1940. In 1942 the congregation called Rabbi Elliott J. Einhorn to its pulpit. Noted in communal affairs was Louis Hiller, merchant of Clarksburg.

The Williamson Jews built a synagogue. Bluefield had an organized community, of which Rabbi Julius Kravetz was at one time spiritual leader. The Beckley Jews built a Temple and organized a Temple sisterhood. Rabbi Harold L. Gelfman, who had occupied the pulpit, was serving as chaplain (1943) in the United States Army, and the pulpit of the congregation was then vacant. In addition, there were small Jewish congregations and organizations in Parkersburg, Welch, Logan, North Fork, Keystone and Kimball. State organizations included the West Virginia Federation of Temple Sisterhoods and the West Virginia Council of the B'nai B'rith, District No. 3.

In 1936 the United States census of religious bodies reported twenty-two congregations in the state, of which two were in rural districts. Membership in these congregations totaled 5,391. Fifteen of the congregations reported schools with an attendance of 537 chil-

dren. This was a considerable increase over the three congregations with a total of 168 members reported in a survey made for 1900.

Although small, the Jewish community of West Virginia made an appreciable contribution to civic and public life. In the early days of the community, during the Civil War, Joseph Shields of Charleston was collector of internal revenue. Daniel Mayer was commissioner of immigration and a member of the state legislature (1889). Also in the state legislature were Jacob Fisher, of Wheeling (1889-1901; in the state senate, 1901-11); R. A. Salomons, of Wheeling (in the state senate, 1911-13); Harry Weiss, of Charleston (1913-19); Benjamin L. Rosenbloom, of Wheeling (in the state senate, 1914-18); Abram J. Lubliner, of Bluefield (1931-33); Harold Slaven (1940-41). Benjamin L. Rosenbloom was a member of the United States Congress from 1920 to 1924; at Wheeling he was vice-mayor (1935-39). Morris Horkheimer, of Wheeling, was commissary general of the state under Governor Albert B. White (1901-5). Samuel Gideon, of Huntington, was president of the Cabell County Court for six years; Jacob Fisher was judge in the Braxton County Court (1911-27). Locally, Leon Schafer was mayor of Thurman (1906-9). At Thomas, Ruby Rubenstein was mayor in 1943. Simon M. Levinstein, prominent merchant of Buckhannon, was made director of that city's chamber of commerce in 1927, and continued to hold that office for many years.

At the University of West Virginia, in Morgantown, Dr. C. C. Fenton was professor in the school of medicine; Jacob Saposnekow was associate professor of sociology. Julius Cohen, of Morgantown, was associate professor of political science, and was made (1943) principal attorney of the War Manpower Commission at Washington, D. C.

WESTERN WALL, *see* WAILING WALL.

WESTHEIM, PAUL, art critic and editor, b. Eschwege, Germany, 1879. He studied in Darmstadt and Berlin. Through his articles in the *Frankfurter Zeitung* he became well-known. Being interested in living art and modern art problems, he launched the art periodicals *Das Kunstblatt* in 1917 and *Die Schaffenden* in 1918. He also edited art books in a series called *Orbis Pictus,* of which he wrote, in 1920, the first volume, *Indische Architektur.* The Nazis' rise to power put an end to Westheim's activities in Germany. He emigrated to France, from which country he proceeded, in 1942, to Mexico, settling in Mexico City, where he became active in the German anti-Fascist movement.

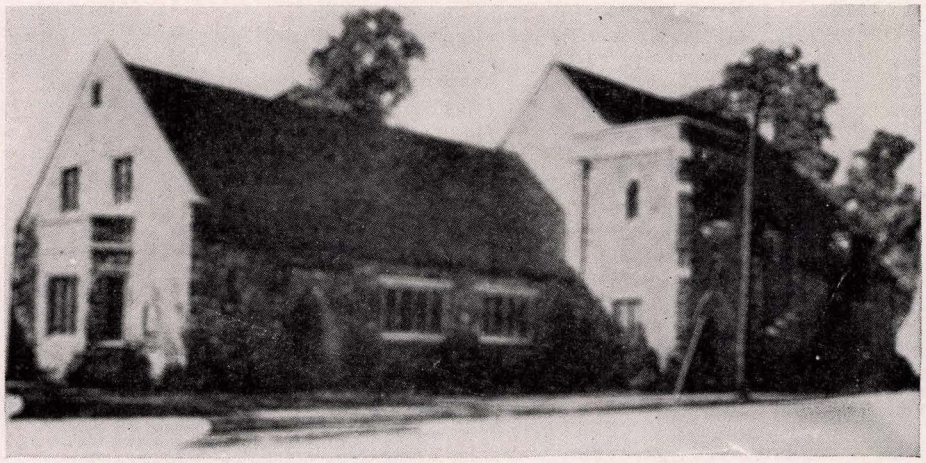
As an author Westheim covered a rather wide field, from Indian architecture through a book on classicism in France (1922) to *Welt und Leben der Künstler* (1931), a "sociological" art appreciation embracing the times from Brueghel to Picasso and Klee. The main field of his interest, however, was the world of young artists, and his chief merit the recognition of quality in the work of unknown beginners.

His monograph on Kokoschka was the first published on this outstanding Austrian painter of the modern age, which appeared in 1918, and his book on the sculptor Wilhelm Lehmbruck (1922) set a monument to this early deceased great artist.

WESTPHALIA (German, Westfalen), the name of a Prussian province in Western Germany. In 1807 it was made into a kingdom for Jerome Bonaparte, a brother of the emperor Napoleon I. Incorporated into the Kingdom of Westphalia were the former duchy of Brunswick, the electorate of Hessen, the Prussian Altmark and other territories which formerly were independent or belonged to Prussia.

For the Jews of these territories the short-lived French regime (1808-13) was of some importance insofar as this was the first territory of Germany to grant equal rights to the Jews. By the decree of January 1, 1808, the Jews of Westphalia were put on the same level with the other inhabitants, all special taxes and duties were abolished, and they were given the unlimited right of settlement and commerce. King Jerome, who was influenced by his financial advisor, Israel Jacobson, who lent him two million francs at the beginning of his reign, was a sincere friend of the Jews. A decree of March 29, 1808, brought to life a Jewish consistory at Cassel, the charter of which was adapted after that of the consistory of France. It consisted of a president, three rabbis, two secular Jewish scholars and a secretary, and had the task of supervising all the activities of the Jewish communities. Within three months all Jews were ordered to adopt surnames in addition to their first names, and they were forbidden to change them without royal permission.

At Cassel a seminary was founded in order to help young able Israelites to become good teachers and genuinely religious rabbis; Jewish schools were opened and the religious service was reformed despite the opposition of the Orthodox. As a result of the liberal attitude of the government, the number of Jews in Westphalia increased continuously; in 1810 the kingdom had 19,039 Jews, many of whom lived at the capital, Cassel, where there were good opportunities of earning a livelihood.



After the dissolution of the Kingdom of Westphalia (1813) a large part of it was incorporated into Prussia. In 1881 a union of the Westphalian Jewish congregations was founded. The province of Westphalia had 21,595 Jews in 1925. By the summer of 1933 this number had shrunk to 18,819, and it rapidly dwindled in the following years of the Nazi regime. In the fall of 1941 virtually all the remaining Jews were forced to leave Westphalia.

WETZLER, HERMANN HANS, conductor, b. Frankfort, Germany, 1870; d. New York city, 1943. He was the son of American parents, and an American citizen. He studied music at the Hoch Conservatory in Frankfort with Clara Schumann, Humperdinck and Knorr. In 1892 he came to the United States, and from 1897 to 1901 was organist at the Old Trinity Church. In 1903 he founded the famous Wetzler Orchestra, which achieved national fame early the following year when Richard Strauss conducted it in a series of concerts devoted to his own works. In 1905 Wetzler returned to Europe, conducting for the next two decades in leading German cities. From 1919 to 1923 he was a principal conductor of the Cologne Opera. In the summer of 1940 he returned again to the United States, this time to settle there permanently.

Wetzler composed many works for orchestra, including an overture *As You Like It, Symphonic Fantasy, Visions, Assisi,* and *Symphonic Dance in Basque Style* which have been performed frequently in Europe, the United States and South America. He composed an opera, *The Basque Venus.*

WEXLEY, JOHN, playwright, b. New York city, 1907. He was the nephew of Maurice Schwartz, the actor. After having himself appeared on the stage in

Jewish Community Center in White Plains, N. Y.

both Yiddish and English, acting with his uncle's company and later with the Neighborhood Playhouse and other English groups, he turned to playwriting. Three short plays, *Machine Gun, What's Your Desire?* and *Rules,* were produced by an experimental theatre. *The Last Mile,* produced in New York in 1930, was a well-received, stirring drama of a prison death-house. *Steel,* first produced in 1931, was revived by the Labor Stage in 1937, and *They Shall Not Die* was given under the auspices of the Theatre Guild in 1934.

Wexley joined the scenarist staff of a motion picture company in Hollywood in 1930, and subsequently was affiliated mainly with the motion picture industry.

Lit.: *American Hebrew,* April 4, 1930, p. 764.

WEYL, MAX, painter, b. Mühlem, Württemberg, Germany, 1837; d. Washington, D. C., 1914. He came to the United States in 1853, and lived with his parents first in New York city, later in Washington, D. C. Originally a jeweler, he was encouraged to take up art by the painter S. H. Kaufmann, president of the board of directors of the Corcoran Gallery, who appreciated his talent and taught him free of charge. In 1880 Weyl went for further studies to Munich, Venice, Paris and Vienna. He was awarded several prizes, including one at the Prize Fund Exhibition of the American Art Galleries (1883), the first prize at the Exhibition of the Society of Washington Artists (1891), a medal at the Atlanta Exhibition (1895), and the A. J. Parsons Prize for the best landscape painting (1904). Weyl was regarded as one of the foremost landscape painters.

His paintings *Lovers Lane* and *Approaching Night* were acquired by the Corcoran Gallery, Washington, D. C., while *Indian Summer Day* was presented to the permanent collection of the National Gallery of Art, Washington, D. C., by Simon Wolf and twenty other Washington citizens in celebration of Weyl's seventieth birthday (1907). Weyl was president of the Society of Washington Artists for many years.

WHITE PAPER, CHURCHILL; WHITE PAPER, PASSFIELD, *see* PALESTINE MANDATE.

WHITE PLAINS, a city of New York state, the seat of Westchester County and one of the principal suburbs of New York city, with a population of 40,327 (census of 1940). In 1943 the Jewish community, drawing its membership from several additional surrounding suburban communities, such as Scarsdale, Hartsdale, Elmsford, Harrison and Purchase, numbered about 6,000.

With the exception of Benjamin Isaacs, who was a member of the state legislature in 1788, there are no records of Jewish residents in White Plains much before the 20th cent., although the city figured prominently in American history from Colonial days on. Some time in the early 1900's a group of men including Hyman Gordon, Paul Pincus, R. B. Friedman, Jacob Wolff, Raphael Maisels, Sam Ellis, George Glass, Abe Abrams, Leopold Kahn and Isaac Morris began to meet at the home of Hyman Gordon for weekly Sabbath services. The congregation grew, and in 1911 Temple Israel was built and the Reverend M. N. Taxon was installed as its first rabbi. He was succeeded by Rabbis Nathan Blechman, Nathan Wolff, Philip Alstadt, Max Zucker, Morris Adler, Israel Chodos and Max Gelb. These religious leaders were all Conservative.

In 1917 an Orthodox congregation was formed which built the Hebrew Institute. S. Feldshon officiated as rabbi until Rabbi David Roth was called to the pulpit in 1941. It was in this year that the two congregations, Orthodox and Conservative, established the White Plains Hebrew School.

A Reform congregation was organized in 1922 by a small group headed by P. Irving Grinberg. The first rabbi was James Waterman Wise, and in 1926 the congregation built and dedicated the Jewish Community Center. Then Solomon A. Fineberg and Abram V. Goodman served as rabbis until 1930, when Lawrence W. Schwartz was elected rabbi; he still occupied the pulpit in 1943. The congregation established a notably progressive religious school, and an active men's club serving and drawing its membership from all three congregations in the city.

An attractive building, the Jewish Community Center came to be used by most of the Jewish communal organizations of the city, such as the Coordinating Committee for Refugees, the local section of the National Council of Jewish Women, Hadassah, Jewish War Veterans, Men's Club, Women's Guild, Zionist Organization, and various philanthropic and sewing groups, all of which were federated in a Jewish Community Council.

In White Plains and its environs there were maintained several Jewish country clubs, as well as the residences of many prominent Jews, including those of Jacob Aronson, Mark Eisner, Herbert H. Lehman, Adolph S. Ochs (d. 1935), James N. Rosenberg, Nathan Straus, Arthur Hays Sulzberger and Mrs. Felix Warburg.

LAWRENCE W. SCHWARTZ.

WHITE RUSSIA (Belorussia), the independent Belorussian Soviet Socialist Republic (BSSR), comprising the districts of Vitebsk, Gomel, Minsk, Mogilev, Polese and the districts of Western Belorussia, acquired in 1939, with a total population of 10,400,000, of whom about 1,040,000 were Jews (1939). Jews began to settle in White Russia as early as the 16th cent. The first settlers were tax and duty collectors of Minsk, among whom Michael Josefowicz became well-known. Jewish communities, however, were not established until the end of the 16th and the beginning of the 17th cent., when the Jews acquired the right to build permanent synagogues and to provide for Jewish cemeteries.

The records of the Council of the Four Lands, especially those of the Lithuanian Vaad, show the existence of numerous communities in White Russia (Klezk, Pinsk, Minsk, Novogrudok, Sluzk, Turov, Lyahivitchi, Bragin, Nezvich, Kopyl, Mogilev, Orsha and Polozk), chiefly in the province of Minsk, while there were fewer Jews in the other provinces. The Jews, scattered over the eastern provinces, are spoken of in the records of the Lithuanian Vaad as "inhabitants of Russia."

The city of Gomel suffered heavily during the uprising under Chmielnicki (1648), and in 1655, at the time of the military campaign of Alexei Mihailovich against Lithuania and White Russia, a terrible massacre of the Jewish defenders of the city of Vitebsk took place. In that period several Jews embraced Christianity, others escaped or were caught, while their property, in many cases, was destroyed or confiscated. Not until after the peace of Andrusovo (1667) was Jewish settlement started anew. New sufferings were caused by the uprising of the Haidamaks, brigand bands of Cossacks in the 18th cent. The bitterly afflicted community of Mstislavl, which had already suffered heavily from the plunderings of Russian soldiers in 1708 and which had been saved from utter destruction only by the intervention of Czar Peter the Great, was rescued by the courage of two Jewish tax collectors in 1744.

After the first partition of Poland (1772) all of White Russia was incorporated into Russia, and the Russian government started its attempts at reorganizing, reforming and reeducating Russian Jewry with the Jews of White Russia. From 1772 up to the formation of the Belorussian Soviet Socialist Republic (1919) the history of the Jews of White Russia, the territory of which was part of the Pale of Settlement, was essentially the same as that of the Jews of the entire Russian Empire. The only important event in the 19th cent. was the temporary expulsion of the Jews from White Russia in 1824 to 1825.

Interesting was the organization of Jewish community life in White Russia. In the 18th cent. the communities of the province of Mogilev and of the eastern parts of the province of Vitebsk were united in the White Russian Synagogue. The Hasidic movement, especially the Habad group led by Shneur Zalman of Liady, was powerful in White Russia.

According to the census of 1926, the Belorussian Soviet Socialist Republic (which did not include Western Belorussia, then belonging to Poland) had 407,059 Jews, of whom 16.7% were industrial workers, 13.1% farmers, 26.4% artisans, 17% employees, 10.2% tradesmen, 0.7% professional men, 8.9% engaged in other occupations, and 7% unemployed. By the time of the outbreak of the German-Russian War in June, 1941, the percentage of industrial workers among the Jews had increased considerably, and unemployment disappeared. In 1926 to 1927 there existed in White Russia 184 Jewish schools, attended by 24,083 pupils.

The emblem of the Soviet Republic bears the inscription "Workers of the World, Unite!" in Yiddish as well as in Belorussian, Russian and Polish. In many cities signs were printed in all three languages. The Institute of Literature and Languages of the Belorussian Academy of Sciences (formerly at Minsk; in 1943 in Central Asia) has a Jewish section which, up to the Nazi invasion of the country (1941), served as the center for all Jewish institutions in the Belorussian Republic, doing work in Yiddish literature, history and grammar, and publishing scientific books and dictionaries. It has the right to confer scientific degrees for outstanding work. There existed also chairs for Yiddish science at the state university. Several Yiddish periodicals were published in the republic. When Western Belorussia was reunited with Belorussia (1939), two Jewish dramatic theatres were opened, one in Brest, the other in Grodno, and 150 elementary and secondary Yiddish schools were established in Western Belorussia.

Following the Nazi invasion of the Soviet Union (June 22, 1941), hundreds of thousands of Jews were evacuated from Belorussia (White Russia) to Uzbekistan, the Tatar Republic, Kazakistan, Bashkiria, the Urals and Siberia. The Belorussian government was evacuated to Moscow. Of the civilian population that remained in White Russia, 700,000, both Belorussians and Jews, were killed by the Nazis. The city of Minsk was turned into a large prison. The Jews were herded into several ghettos. When the Nazis ordered Jewish doctors to castrate male Jews, the doctors refused, and thereupon were killed (among them the famous Professors Sitterman and Gurevich). BERNARD KOTEN.

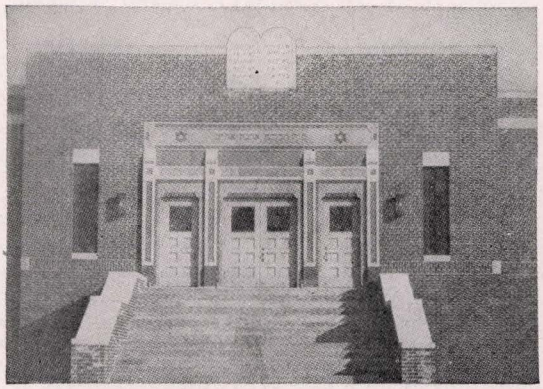
WICHITA, a city in the south central part of the state of Kansas, the geographical center of the United States, with a total population of 114,966 (census of 1940), including about 2,000 Jews (1943). The home of the Beechcraft airplane industry, the air capital of the United States, situated in the heart of the "Pearl of the Prairies," Wichita had by 1943 grown from a small trading post in the days of the "covered wagon" to the metropolis of Kansas in the second World War.

With the advent of the second World War the expansion of the aviation industry grew apace with the demands of the war fronts, the city's general population increased proportionately, and the number of Jewish inhabitants advanced correspondingly, so that in 1943 it was estimated at 2,000, most of them Orthodox.

The first Jewish institution or organization of any kind in Wichita was Temple Emanu-El (Reform). It was chartered in 1885 (according to some sources in 1889) and built its first unit of the Temple Buildings (community center) in 1932. The incumbent rabbi in 1943 was Perry E. Nussbaum, who began his service in March, 1941, when Harry R. Richmond, the congregation's rabbi, was called to active service as a chaplain with the rank of captain in the United States Army.

[Editor's Note: Rabbi Harry R. Richmond (b. Beresnitz, Russia, 1890), on leave for the duration, was among the very first to respond to the call for service in the American armed forces. He was ordained by the Hebrew Union College in



Temple Emanu-El in Wichita, Kansas

1917. Together with his wife and 4-year-old daughter, he was in Hawaii during the attack on Pearl Harbor (Dec. 7, 1941); the family was subsequently evacuated, but Captain Richmond remained on at his post, being still there in 1943. During the first World War (1917-18) Rabbi Richmond served as chaplain (1st lieutenant) with the American Expeditionary Forces in France, and after the armistice was mustered out with the rank of captain in the reserves. Prior to the first World War he had served as rabbi in Trinidad, Col.; prior to the second World War he held pulpits in Paterson, N. J., Rockaway Park, N. Y., and Paducah, Ky.]

Rabbis who served Congregation Emanu-El in the past were: Bernard Cantor (1916-18), the first regular rabbi of the congregation, who later (1920), together with Professor Israel Friedlaender, of the Jewish Theological Seminary of America, was murdered by bandits in the Ukraine while they were distributing relief funds to Jewish victims of the Petliura pogroms as representatives of the Joint Distribution Committee (his body was buried in the Temple Cemetery, where a memorial stone was erected); Pizer W. Jacobs; Harry R. Richmond (1930-41).

After two years of leadership, Rabbi Richmond dedicated the first unit of the Temple buildings on September 23, 1932, with Rabbi Joseph Blatt, of Oklahoma City, Okla., and Rabbi Harry H. Mayer, of Kansas City, Mo., participating. In 1935 Congregation Emanu-El celebrated its golden jubilee with special jubilee services and a dinner which were participated in by Rabbis Louis L. Mann and Felix A. Levy, of Chicago.

Associated with Congregation Emanu-El in 1943 were: the Temple Sisterhood (affiliated with the National Federation of Temple Sisterhoods); the Temple Men's Club (founded in 1942, and affiliated with the National Federation of Temple Brotherhoods); the Young Folks League; the Sunday school; the I. Goldsmith Memorial Library (founded in September, 1941), reputed to be the finest collection of Hebraica and Judaica in the state of Kansas, and housed in the Temple Library. A congregational Hebrew school was founded in September, 1941.

Synagogue of Congregation Ahavath Achim, Wichita

The founders of Congregation Emanu-El were also among the early settlers of Wichita. Some were immigrants from Germany; some came to Wichita from the Eastern part of the United States in the 1880's and thereafter, especially from Cincinnati and St. Louis.

Among them were Lee Hays, Henry Wallenstein, I. Goldsmith, Lewis Solomon, Morris Levy, Louis Lampl and Harry Rosenbloom. Identified with the growth and prosperity of Wichita were some of the leading members of Congregation Emanu-El: Henry Wallenstein (1855-1936), the founder of Congregation Emanu-El and its first president until his death, also the founder of the congregation's first religious school. Settling in the city in 1886, whither he came from his native city, Cincinnati, he became the merchant prince of Wichita, and the leading Mason of Kansas (he was secretary of the Wichita Masonic Consistory for seventeen years until his death), and Wichita's first citizen. He was chairman of the Kansas State United Jewish Campaign, and the first president of the Mid-Kansas Jewish Welfare Federation; I. Goldsmith, founder of a book establishment, who gave a noble example of sturdy American citizenship combined with loyalty to Judaism; Louis Lampl, who lived in the prairie lands of Kansas with his large family before he moved to Wichita; Bernard Levitt, a Russian Jewish aristocrat who came to the plains of Kansas to till the soil to prove the Jews' adaptability to farming as well as to merchandising; Harry Rosenbloom, whose frugality, integrity and fair dealing distinguished him as the honest merchant of Wichita.

The greater portion of the Jews of Wichita were, in 1943, grouped around the Orthodox synagogue, Congregation Ahavath Achim, which was organized in the year 1917, at which time it purchased its first synagogue. In 1943 the congregation, the nucleus of its Hebrew school as well as of its Ladies Auxiliary, was housed in a new modern structure, which was completed for the New Year of 1930. Its rabbi in 1943 was Louis Kaufman, who began his service in 1935. Other rabbis who served Congregation Ahavath Achim were: Morris Borris (1921-23), D. Gordon (1924-25), M. Lieberman (1925-27), Paul J. Bender (1932-34). S. Stadlin was teacher of the Hebrew school from 1927 to 1932, when the congregation had no regular rabbi.

Associated with the synagogue of Congregation Ahavath Achim in 1943 were the Ladies Auxiliary, named Ahavath Achim Sisterhood in 1926; a Hebrew school for week days and Sundays, organized in 1917; the Frank Mitchell Memorial Library, dedicated in 1923; a community center, established in 1930; and a cemetery, consecrated in 1940. Among its leading members and among the first settlers in

The widow's cruse is blessed by Elijah (I Kings 17)

Wichita were Eli Lahn, Abe Klein, and Hyman Wolkow, who came to the United States from Eastern Europe.

Other Jewish organizations in Wichita in 1943 were: a lodge of the B'nai B'rith and the women's auxiliary, a district of the Zionist Organization, the Histadruth, the Mid-Kansas Jewish Welfare Federation (organized in 1935), a chapter of the A.Z.A., and chapters of Hadassah and Junior Hadassah.

Present-day Jews integrated with the Jewish community and with that of the city of Wichita included (1943): Henry Lampl, mayor during the first World War, and a leading attorney of the city; the Levand brothers, Louis, Max and John, owners and publishers of the Wichita *Beacon;* Henry Levitt, organizer of the Mid-Kansas Jewish Welfare Federation; Harry Ginns, president of Temple Emanu-El. HARRY R. RICHMOND.

WIDAL, GEORGES FERNAND, physician, b. Dellys, Algeria, 1862; d. Paris, 1929. In 1904 he became director of the internal clinic of the hospital Cochin, and thereafter served as professor of pathology at the University of Paris. In 1919 he became a member of the Academy of Science in Paris. Widal was equally important as an experimental research worker and as a clinician. He created the serum diagnosis for typhoid fever (Widal reaction, 1896), the principle of which can be employed also in many other diseases. Widal proved, furthermore, that in cases of inflammatory discharge—such as pleurisy, peritonitis and pericranitis—the nature of the cells swimming in the liquid (leucocytes, lymphocytes) indicates the kind of the disease (cystodiagnosis).

His works include: *La cure de déchloruration dans le mal de Bright et dans quelques maladies hydropigènes* (1906); *Maladies des veines et des lymphatiques* (1911); *Spirochetose ictero-hémorrhagique* (1928); *Hémoglobinurie* (1929).

WIDOW (*'almanah*). Jewish law contains a large number of special claims and protective provisions in behalf of both the widow and the orphan, designed to guard these persons, who are deprived of their natural support, from poverty and want. Thus the Bible declares that the garment of a widow may not be taken in pledge for a debt (*Deut.* 24:17), an exception to the general rule. A widow can demand that her claims be heard before those of any other party (Maimonides, *Hilchoth Sanhedrin* 21:6).

Since a widow does not inherit property from her husband, she can claim a proper maintenance from the latter's heirs (*Keth.* 4:12; 12:3). Her Kethubah, or marriage portion, has the first claim on the estate, and there are exact provisions as to the means by which she may collect it from the heirs (*Keth.* 9). If a widow is the daughter of a priestly family, she regains the right to a share in the priestly dues if she is childless at the time her husband dies; a wife betrothed to a priest has all the rights that accrue to one of priestly rank up to the time that the death of her husband has been established (*Git.* 4:3). The high priest was not allowed to marry a widow, but all other priests were (*Lev.* 21:14).

If a father has married off his daughter by reason of his parental authority, she never returns to him, even though she is still a minor when her husband dies. The Kethubah provided for a widow in the marriage contract of a new marriage is half as much as that for a virgin (*Keth.* 1:2).

WIENER ISRAELITISCHE ALLIANZ, *see* ALLIANZ, ISRAELITISCHE, ZU WIEN.

WIENER, ALFRED, orientalist, b. Potsdam, Germany, 1885. He studied oriental languages, ancient history and philosophy, and attended the Universities

of Berlin and Heidelberg as well as the Hochschule für die Wissenschaft des Judentums in Berlin. He graduated from the University of Heidelberg, majoring in oriental languages (Arabic) and writing a thesis on the history of literature in Arabia.

Wiener spent the years 1907 through 1909 in Egypt and Palestine. Again in 1925 and 1926 he visited Palestine to bring his studies up to date. He participated in the first World War, and in 1919 became syndic of the Greater Berlin department of the Central-Verein Deutscher Staatsbürger Jüdischen Glaubens, and later syndic of the Verein as a whole. He left Germany in 1933 and established in Amsterdam, Holland (on a non-profit basis) the Jewish Central Information Office, whose task it was to collect all information and literature (in the original languages) pertaining to the status of the Jews in all parts of the world, especially material referring to the latest developments, and to make these data available to the supporters of this organization, which include all leading Jewish organizations the world over. A branch of this Central Information Office was established in London (1940) where the main organization was located after the Nazis' invasion of The Netherlands made further activities there impossible.

Wiener wrote a number of scientific papers. Many of them were published in *Der Islam* and *Die Welt des Islams,* well-known periodicals on Arabic subjects. He wrote also numerous papers and articles on Jewish matters, most of which were published in the *Allgemeine Zeitung des Judentums,* organ of the Central-Verein. In 1927 he published *Kritische Reise durch Palästina,* and in 1930 *Juden und Araber in Palästina.*

WIENER, FRANZ, *see* CROISSET, FRANCIS DE.

WIENER, HAROLD MARCUS, Biblical scholar, b. London, 1875; d. Jerusalem, Palestine, 1929. He was originally a barrister, but turned to the study of the Bible and attacked Julius Wellhausen's school of Bible critics, availing himself frequently of juridical methods. His last years he spent in Palestine, expecting to witness there a resurgence of Jewish religiousness. Although he was actively engaged in the fostering of good relations between Arabs and Jews, he was killed by an Arab during the riots of August, 1929.

Against modern Bible criticism Wiener held the view that the entire Pentateuch was written by Moses, but that the Hebrew text, usually called the Masoretic text, is not perfect; he tried to restore the genuine text by using translations and versions which he believed to be older than the traditional Hebrew text.

His published writings include: *Notes on the Hebrew Religion* (1907); *The Higher Critical Quandary* (1910); *Essays in Pentateuchal Criticism* (1910); *The Origin of the Pentateuch* (1912); *Pentateuchal Studies* (1913); *The Pentateuchal Text* (1914); *The Date of the Exodus* (1916); *The Religion of Moses* (1919); *The Main Problem of Deuteronomy* (1920); *The Prophets of Israel* (1923); *Early Hebrew History* (1924); *The Integrity of the Old Testament* (1924); *The Altars of the Old Testament* (1927); *Posthumous Essays* (edit. Herbert Loewe; London, 1932).

Lit.: Waxman, Meyer, *A History of Jewish Literature,* vol. 4 (1941) 650-53.

WIENER, JOSEPH, chief rabbi of Belgium, b. Alsace, 1872. He attended several universities and theological seminaries in France and Germany, studying theology, philosophy and Oriental languages, and specializing in the works of Maimonides. After serving as rabbi in Alsace (1896-1904) and Antwerp, Belgium (1904-31), Wiener was elected chief rabbi of Belgium by the representatives of all the Jewish communities of that country in 1931. He was twice honored by the Belgian government, the first time for his heroic attitude during the occupation of Belgium by the Germans in the first World War, the second time on his twenty-fifth anniversary in Antwerp (1929).

Wiener was an active supporter of the Zionist Movement. After the invasion of Belgium by the Nazis (1940) he fled to France, and was last seen at Nice, in Southern France.

WIENER, LEO, historian of Yiddish literature, translator, and philologist, b. Bialystok, Russian Poland, 1862; d. Belmont, Mass., 1939.

He studied at the Gymnasia of Minsk and Warsaw, and for a while (1880) he was a student of medicine at the University of Warsaw. From 1881 until 1882 he continued his studies in Berlin at the Polytechnic. Wiener came to the United States in 1882. After some hardship, including that of peddling fruit, he found a post in Odessa, Mo., teaching Greek, Latin, and mathematics. For eight years (1884-92) he was an instructor in Kansas City High School. He was an assistant professor of Germanic and Romance languages at the University of Missouri (1892-95).

In 1895 he came east to teach languages at the New England Conservatory of Music in Boston. He was appointed an instructor in Slavic languages and literatures at Harvard University in 1896; he became an assistant professor in 1901, and professor in 1911. In 1930 Wiener retired as professor emeritus.

In 1898 Wiener edited Morris Rosenfeld's *Songs from the Ghetto,* and introduced that poet to non-Jewish readers. The editor used a modified orthography of German for the transliteration of the original Yiddish and supplied a prose translation. An enlarged edition was published in 1900. Wiener's *The History of Yiddish Literature in the Nineteenth Century* (1899) was one of the earliest studies in English of Yiddish literature. At that time, according to his preface (p. xi), Yiddish literature was "less known to the world than that of the Gypsy, the Malay, or the North American Indian."

His other studies covered a wide range of subjects. His publications include: *Anthology of Russian Literature* (2 vols., 1902-3); *An Interpretation of the Russian People* (1915); *Commentary to the Germanic Laws and Mediaeval Documents* (1915); *Contributions Toward a History of Arabico-Gothic Culture* (4 vols., 1917); *Africa and the Discovery of America* (3 vols., 1919); *Mayan and Mexican Origins* (1926). He contributed 8,000 etymologies to *Webster's New International Dictionary.* His translations include the works of Leo Tolstoy (24 vols., 1904-5).

Lit.: Shatzky, Jacob, "Leo Wiener," *Yivo-Bleter,* vol. 15 (1940) 247-56 (containing biography and bibliography); *School and Society,* vol. 50 (1939) 827.

WIENER, LUDWIG, *see* CAPE COLONY.

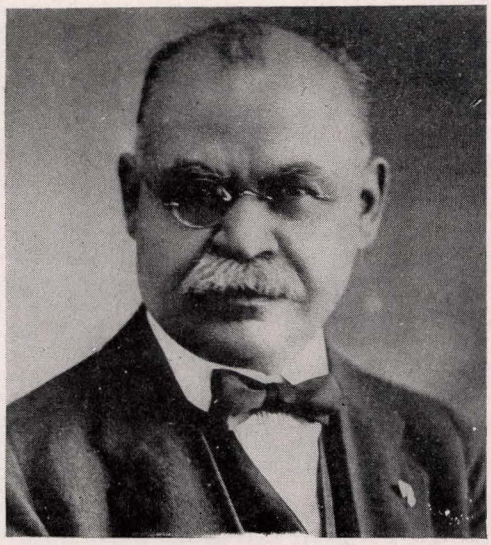
WIENER, MAX, rabbi, b. Oppeln, Germany, 1882. He studied at the Universities of Breslau and Berlin, at the Jüdisch-Theologisches Seminar, Breslau, and at the Lehranstalt für die Wissenschaft des Judentums, Berlin, received the Ph.D. degree in 1906, and was ordained in 1908. Wiener served as assistant rabbi at Düsseldorf (1909-12), and as rabbi at Stettin (1912-26) and Berlin (1926-39). During the first World War he was an army chaplain attached to the high command of the First German Army in France, and from 1934 to 1939 he served as professor at the Lehranstalt für die Wissenschaft des Judentums. After the Nazis' assumption of power he was also a member of the executive board of the Jüdischer Kulturbund. In 1939 he came to the United States, served as professor at the Hebrew Union College, Cincinnati (1939-41), and became rabbi in Fairmont, W. Va., in 1941.

Wiener was a contributor to and co-editor of the *Jüdisches Lexikon,* co-translator of the German Bible (edited by Harry

Torczyner), and a contributor to the *Encyclopaedia Judaica* and the *Universal Jewish Encyclopedia*. His writings include *J. G. Fichtes Lehre vom Wesen und Inhalt der Geschichte* (1906); *Die Lehre der Propheten von der Sittlichkeit* (1909); *Jüdische Frömmigkeit und religiöses Dogma* (1924); *Jüdische Religion im Zeitalter der Emanzipation* (1933).

Lit.: *Hebrew Union College Monthly*, Nov., 1941, p. 14.

WIENER, NORBERT, mathematician, b. Columbia, Mo., 1894. He was the son of Leo Wiener. He received the Ph.D. degree from Harvard University (1913), did post-graduate work at the Universities of Cambridge (England) and Göttingen (Germany) and at Columbia University, and started his career as a lecturer at Harvard University (1915-16). After a brief association with the University of Maine and the *Encyclopedia Americana*, and a period in which he did newspaper work for the Boston *Herald*, Wiener became instructor at the Massachusetts Institute of Technology (1919-24), and was made full professor in 1932; in 1943 he still held this position. He was visiting professor at Tsing Hua University, Peiping, China (1935-36).



Wiener was awarded the Bowdoin Prize by Harvard University (1914) and the Bocher Prize by the American Mathematical Society (1933). His writings include *The Fourier Integral and Certain of Its Applications* and *Harmonic Analysis in Complex Domain*.

WIENER-NEUSTADT, city of Lower Austria. It included one of the oldest Jewish communities of Austria. Jews settled there probably soon after the founding of the city (1192). The first rabbi of Wiener-Neustadt, mentioned in the responsa literature, was Hayim ben Moses (first half of the 13th cent.). The oldest Jewish tombstones that have been preserved (in 1862 they were set in the remainder of the old city wall) date back to 1285, 1286, 1353, 1359 and 1369.

The municipal law of the city (1277) impaired the privileges which the duke of Austria, Frederick II the Fighter, of Babenberg, had granted to all the Jews of Austria. The Vienna Gezerah (harsh decree) of 1421, however, could not affect the Jews because Wiener-Neustadt, at that time, belonged to Styria. It was one of the cities where the Jew-baiting Italian friar, Giovanni di Capistrano, made inflammatory speeches against the Jews. In 1487 the city was conquered by the Hungarian King Mathias Corvinus, and the position of the Jews became unbearable. After numerous financial and other restrictions had been imposed upon them they were finally, under the regime of Emperor Maximilian I of Hapsburg, expelled from Wiener-Neustadt and from the whole of Styria. The emperor ordered the houses, school and bath of the Jews to be sold; the synagogue was made a church (1496).

From 1496 to 1708 there was no Jewish settlement worthy of mention in Wiener-Neustadt. Emperor Joseph I permitted a large number of Jews who had fled from the Kuruczes of Hungary to seek refuge in the city (1708). But after a short time they were driven out by an infuriated mob. From 1708 to 1848 no Jew was allowed to stay at Wiener-Neustadt overnight. In this period a "Jew's pig" (*Judensau*) was attached to a building of the main square, testifying to the sentiment of the citizens of that period toward the Jews.

Beside Hayim ben Moses, several other outstanding rabbis were active at Wiener-Neustadt, including his pupil and successor, Hayim ben Isaac; Moses Taku, author of *Kethab Tamim;* and Shalom, the teacher of Jacob ben Moses Mölln (MaHaRIL), of Eisik Tyrnau and of Rabbi Doza of Vidin (Bulgaria), author of a commentary on Rashi. Shalom was succeeded by Aaron Blümlein, who became a martyr of the Vienna Gezerah; later came Israel Isserlein, author of *Terumath Hadeshen* and of *Pesakim*, Meisterlein, Jossman

Peter Wiernik

Kohen and Joseph Österreicher. The Yeshiva of Wiener-Neustadt was attended by hundreds of pupils from many countries, especially in the time of Isserlein.

From 1848 on Jews from Hungary migrated to Wiener-Neustadt, which before 1914 had about 1,200 Jews among 29,000 inhabitants; this number shrank after the first World War to 1,000. A cemetery was acquired in 1889, and a new synagogue was built in 1901. When the Nazis occupied Austria (March, 1938), the Jews of a small city like Wiener-Neustadt were even more severely affected by the change than the Jews of Vienna. Many of them fled to the capital, others emigrated, and by the end of the year the majority of the Jews had left Wiener-Neustadt.

There were no Jews left in the city in 1943.

LEOPOLD MOSES.

WIENIAWSKI, HENRI, violinist and composer, b. Lublin, Poland, 1835; d. Moscow, 1880. As a child of eight he was brought to Paris, where he studied at the Conservatory with Massart, winning first prize in

Henri Wieniawski

violin playing. After an extensive tour, during which he was acclaimed throughout Europe as an outstanding prodigy, he continued his music study in Paris. At the age of fifteen his studies came to an end, and he was pronounced by his teachers a mature artist. Tours of Europe established him as one of the great violinists of the day. Anton Rubinstein proclaimed him "without doubt, the greatest violinist of our time." In 1860 he was appointed solo violinist to the czar of Russia. In 1872 he toured America with Anton Rubinstein. What endeared him to his audiences throughout the world were his fabulous technique and his warm, passionate style. He had fire and temperament, and his playing was electric. In 1874 he succeeded Vieuxtemps as professor of violin at the Brussels Conservatory, holding this post for three years. He then returned to concert work. Unfortunately, he was no longer able to withstand the rigor and strain of travel and concert performances. He collapsed in Odessa, and soon afterward died in Moscow.

Wieniawski composed an entire library of music for the violin which is in the repertoire of every violinist. He had melodic invention, emotional sensitivity, and of course extraordinary capacity to exploit all the resources of the violin. Most famous of his works are his concertos for violin and orchestra (particularly the second, in D minor), the *Légende, Souvenir de Moscou,* and *Scherzo Tarantelle.*

JOSEF WIENIAWSKI (b. Lublin, 1837; d. Brussels, Belgium, 1912), the brother of Henri Wieniawski, was a famous pianist and composer in his own right. He studied with Liszt, then concertized extensively and with great success. In 1866 he settled in Moscow, where he founded his own piano school, and in 1875 was appointed director of the Warsaw Music Society. Toward the close of his life he taught piano at the Brussels Conservatory. He composed a piano concerto, a string quartet, and numerous smaller pieces for the piano. DAVID EWEN.

Lit.: Lahee, Henry C., *Famous Violinists of Today and Yesterday.*

WIERNIK, PETER (PERETZ), pioneer in Yiddish journalism in America, editor, historian, and literary critic, b. Vilna, Lithuania, 1865; d. Brooklyn, N. Y., 1936.

His father was a wandering preacher (Maggid). Peter Wiernik was reared in the typical Jewish manner, attending Heder and then being placed under the tutorship of Talmudic scholars. At the age of thirteen he became apprentice to a turner while continuing his Talmudic studies in the evenings. From Vilna he went to Riga, Latvia, where he remained for three and a half years as helper to a turner, still continuing his studies. Later he went to Kovno, Lithuania, and then joined his parents at Bialystok, Poland, where they had settled, and for the first time his father, who remained at home with his family, became his instructor in Talmud. It was then that Wiernik, at the age of seventeen, became interested in secular knowledge, self-taught and also guided by Leon Zolotkoff, who later, in the United States, became Wiernik's mentor in journalism.

In 1885 Wiernik emigrated to the United States, and settled at Chicago, where he worked hard for his daily bread, peddling and doing odd jobs at the docks and in lumber yards. In the meantime he continued his studies at night, learning English and other languages and reading books of all sorts, storing up knowledge for later years when he became known among journalists as a "walking encyclopedia." Through the assistance of his old friend Zolotkoff, who in the meantime had become editor of the Chicago *Jewish Courier,* Wiernik joined the staff of that paper as compositor and later also as a contributor.

When Zolotkoff left for New York city to edit the *Jewish Daily News* (*Dos Yiddishe Tageblatt*), Wiernik became correspondent for that paper while also writing for the Hebrew daily *Hayom,* published at St. Petersburg, Russia. In 1898 Wiernik went to New York and continued as compositor at the *Tageblatt,* also contributing to that paper articles on various subjects.

In 1901, when Jacob Saphirstein founded the *Jewish Morning Journal,* he invited Wiernik to become its chief editorial writer. Wiernik later became its editor-in-chief, a position which he held until his death. Wiernik also edited for a time *Der Amerikaner* (*Jewish American*), a weekly published by the *Jewish Morning Journal.* It was in the capacity of editorial writer and editor of the *Jewish Morning Journal* that Wiernik made his mark on Jewish journalism. He became the advocate both of Americanism and of Jewish Orthodoxy, believing that, while the Jews had found a permanent and secure home in the United States, they were still destined to continue their religious and cultural life as preached and practised by Orthodox Jews.

Wiernik actually saw the United States as a continuation in the development of Judaism, and believed that there was no need for Jews, while adjusting themselves to new conditions, to change the manner of practising their religion or to direct their cultural efforts and contributions into new channels. Wiernik himself wrote in three languages, Yiddish, Hebrew and English, regarding it as quite "natural" that a Jewish writer in America should be master of these three languages, one the language of the immigrant masses, one the language of the land and of the future generations of the Jews in America, and one the Hebrew language, the language which bound them to their past and connected them with their future in Palestine.

Wiernik's chief contribution in English was his *History of the Jews in America,* published in 1912 and later issued in a revised and enlarged edition in 1931. This appeared in Yiddish in 1914, and was later revised and published in the *Jewish Morning Journal.*

Wiernik conducted a weekly department of literary reviews and criticism in the *Jewish Morning Journal,* where he evidenced his understanding of Jewish literature in all languages all over the world. Besides his contributions to the *Jewish Morning Journal* and *Der Amerikaner,* he contributed to Hebrew and Anglo-Jewish publications and to the *Jewish Encyclopedia,* primarily in the field of biography and of studies of persons and of Jewish communities.

His communal activities centered about the Joint Distribution Committee, of whose executive he was a member, and the Chevruso, an intellectual organization for the discussion of cultural and scientific topics, of which he was founder and president.

DAVID L. MECKLER.

Lit.: Reisen, Z., *Lexikon fun der Yiddisher Literatur, Presse un Filologie,* vol. I (1928), cols. 990-93; Eisenstadt, B., *Hachme Yisrael Beamerikah; Minikes Yom Tov Bletter* (1901); *Jewish Immigration Bulletin* (1914); Magidoff, Jacob, "Der Shpigel fun der East Side," *The Day,* vol. 52, No. 8 (1923); *Jewish Morning Journal,* vol. 17, No. 3 (1925); *American Hebrew,* Feb. 21, 1936, p. 397.

WIESENFELD, HATTIE M., communal worker, b. Baltimore. She began her long record of service to Jewish organizational life in 1892, when she became secretary of the Hebrew Ladies Sewing Society, the oldest Jewish women's organization in Baltimore. When the National Council of Jewish Women was formed, Mrs. Wiesenfeld became a member of the first board of the Baltimore section, interesting herself primarily in raising the standard of programs and increasing their Jewish content. In addition to serving on boards of various philanthropic societies, she helped found the Baltimore branch of the World Friendship Among Children. During the first World War she

Hattie M. Wiesenfeld

was chairman of the Jewish Women's War Work for Baltimore, and was appointed a member of the Committee for Liberty Loans by the governor of Maryland.

When the National Federation of Temple Sisterhoods was organized, Mrs. Wiesenfeld was the delegate of her own sisterhood, and was elected a member of the original executive board. In 1919 she became the second president of that organization, serving until 1923, when she became a life member of the executive board. She was vitally interested in the promotion of the Sisterhood project for the building and equipment of a dormitory for the students of the Hebrew Union College in Cincinnati, a project which was realized during her presidency.

WIESNER, FRIEDRICH RITTER VON, diplomat, b. Mariabrunn, near Vienna, 1871. He was the son of Julius von Wiesner and a non-Jewess. After his graduation from the University of Vienna (1896) he served as a judge in Vienna and at Baden, near Vienna, then entered the Austrian foreign office as a secretary to the minister, and in 1913 he became one of the leading men of the office (Sektionsrat). After the assassination of Archduke Franz Ferdinand by a Serbian patriot (June 28, 1914) he was despatched to Sarajevo to investigate the case, but, contrary to the intentions of the Austrian government, which wanted to put the blame on the Serbian government in order to take action against Serbia, Wiesner, in his despatch of July 13th, proved that the Serbian government was not accessory to the crime. From 1914 to 1917 he represented the foreign office at the Austrian Supreme Command, then he headed the press department of the foreign office with the rank of minister plenipotentiary, and represented the Austrian-Hungarian monarchy at the peace conference of Brest-Litovsk (1917-18).

Wiesner retired from the diplomatic service in 1919, and throughout the following two decades he was a leader of the monarchist movement in the Austrian republic. Hated by the Nazis on account of his advocacy of Austria's independence, he was imprisoned by them after the Anschluss in 1938. Nothing further had been heard of him thereafter up to the middle of 1943.

WIESNER, JULIUS RITTER VON, plant physiologist, b. near Brünn, Moravia, 1838; d. Vienna, 1916. He was baptized as a child. At the age of twenty-two he became instructor of physiological botany (1860), and assistant professor (1864) in Austria.

For his contributions to the Paris World Exhibition (1867) he was awarded the Goldenes Verdienstkreuz der Krone by the Austrian emperor. Wiesner was president (Rector Magnificus) of the University of Vienna (1898-99), received the title of Hofrat and the Ritterkreuz des österreichischen Leopoldordens (1907), and was knighted and made a life member of the Austrian upper house upon his retirement from teaching (1909). In celebration of his thirty years' association with the university a Festschrift, *Wiesner und seine Schule,* was issued by his friends (1908).

In pursuit of his studies Wiesner made long journeys throughout Europe, to Egypt, East India, Java, Sumatra and the United States (Yellowstone Park). He investigated the relationship between light and the growth of plants, chlorophyll, the structure of cells and many other problems of botany. Wiesner published more than 200 books and scientific papers.

His writings include: *Einleitung in die technische Mikroskopie* (1867); *Die technisch verwendeten Gummiarten, Harze und Balsame* (1869); *Mikroskopische Untersuchungen* (1872); *Die Rohstoffe des Pflanzenreiches* (2 vols., 1873; 2nd ed., 1900-3); *Die Entstehung des Chlorophylls in der Pflanze* (1877); *Die heliotropischen Erscheinungen im Pflanzenreich* (2 parts, 1878-80); *Die Bewegungsvermögen der Pflanzen* (1881); *Elemente der wissenschaftlichen Botanik* (3 vols., 1881-89); *Die mikroskopische Untersuchung des Papiers* (1887); *Die Elementstruktur und das Wachstum der lebenden Substanz* (1891); *Pflanzenphysiologische Mitteilungen aus Buitenzorg* (6 parts, 1894-97); *Der Lichtgenuss der Pflanzen* (1907).

Unaware of the fact that Wiener was of Jewish origin, Houston Stewart Chamberlain dedicated to him his work, *The Foundations of the Nineteenth Century,* the Bible of racialism.

Lit.: *Wiesner und seine Schule* (1908); Wininger, S., *Grosse Jüdische National-Biographie,* vol. 6.

WIG (Sheitel). According to an old Jewish custom, married women, for the sake of modesty, covered the hair of their head in the presence of strange men because of the erotic effect of the hair. The Talmud cautions Jewish women against going out with their head uncovered, and even praises the covering of the hair in the house. In the late Talmudic period likewise it was the custom for Jewish women to have their hair covered. Only the heathen woman goes about with uncovered hair (*Midrash Num.* 9:16). It was forbidden to pray in the presence of an unmarried woman with uncovered hair (*Ber.* 24a). Already in Talmudic times the hair of other persons (wigs) was employed for the purpose of covering one's own hair. The *Zohar* calls the covered hair of the head of the wife "the chastity of the house."

In the Middle Ages and down to the latter part of the modern period many Jewish women were accustomed to shave off all the hair of their head after their marriage and to cover it with a coif or Kupka, or with a bandeau. It was not until comparatively modern times that the so-called Sheitel, a frisure made of human hair and intended to simulate the person's own hair, came to be widely adopted. The coif was a round head-covering, made of silk, and semi-stiff. The Kupka, especially prevalent among the Jews in Poland, was a head-covering made of silk braids and worn as a permanent adornment. On the forehead of the Kupka there was the so-called "Sterntüchel," an elastic hoop or ring sometimes embroidered with pearl embroidery and sometimes with diamonds. The Kupka ended in two ribbons or bandeaux with which the

Kupka could be fastened or bound at the back of the head. The Kupka was later replaced by the so-called hair-bandeau (headband), a frisure made of silk and quite similar to a natural coiffure or hair-dressing.

In modern times the hair bandeau was replaced by the Sheitel. This aroused great indignation and protest on the part of the Hasidim, because the artificial frisure could not be distinguished from one's own hair, and it therefore appeared as though the women were wearing their own hair uncovered. Inasmuch as this represented a simulation of a forbidden action, the wearing of the Sheitel or wig was declared in many Hasidic circles to be ritually unpermissible, even though not expressly forbidden by itself. Moses Sofer (Hatham Sofer), one of the most important Talmudic authorities of the 19th cent., opposed the wearing of the wig for the same reason.

The women of the younger Orthodox generation in Eastern Europe are so skillful in their employment of the wig that no one can tell that their head is covered with hair ornaments made from other women's hair. Most Jewish women who wear the Sheitel have their own hair underneath, which is often coiffured behind the back of their head together with the Sheitel. Another style of wearing the hair, one which has ceased to be customary since about the 1870's or 1880's, was the so-called "plait with two wings." This had the form of a permanent, fixed obtuse cone covered with silk and wrapped around in a tall silken band which formed a sash at the rear ending in two large "wings." The plait (called in German "Nestel") was especially prevalent in Poland. It is of interest and at the same time strange that in the Caucasus all the Jewish women wear their own hair in public, dressing it with curls at the temples, in the manner of the side-locks (Peoth) worn by the Jews of Eastern Europe. With the custom of wearing the wig there may be compared the cutting off of the hair and the obligatory head-covering practised by the nuns of the Roman Catholic church.

In the United States and in other Western countries the Sheitel has been totally discarded by Conservative and Reform Jewish women, but is still worn occasionally by the most pious and observant of the Orthodox women.

SAMUEL RAPPAPORT.

Lit.: *Keth.* 72a; *Midrash Num.* 89; Maimonides, *Hilchoth Ishuth* 24:12; *Zohar,* section on Naso; *Shulhan Aruch, Eben Haezer* 115:4; Tchorni, *Sefer Hamassaoth* (1884) 192; Abrahams, I., *Jewish Life in the Middle Ages* (1896) 281.

WIJSENBEEK, CAROLINE FRANKEN, psychoanalyst, b. Amsterdam, Holland, 1884. She studied at the University of Amsterdam (1905-7, 1908-12; M.A.) and at University College, London (1907-8), and from 1914 to 1918 served as a member of the National Relief Committee for the Care of War Children and Adults. In 1938 she was the only Jewish member of the National Relief Committee. She was a member of the Executive of the Netherlands Zionist Organization, president of the Netherlands Committee for the Youth Aliyah, president of the International Conferences for the Youth Aliyah, of the Netherlands Women's International Zionist group, of the Jewish Society for the Protection of Girls, and co-founder of the Netherlands Council of Jewish Women (also its president for a term) and of the Organization of Zionist University Students.

She contributed articles to various Dutch and Zionist periodicals, including *De Joodsche Wachter, Telegraaf,* and *Algemeen Handelsblad,* and wrote studies on English language and literature, on psychoanalysis as applied to literary subjects, and on theoretical and therapeutic psychoanalysis. In 1940 she settled in the United States.

WILDA (originally **Seligmann**), **WILHELM EDUARD,** historian of law, b. Altona, Germany, 1800; d. Kiel, Germany, 1856. He studied at the Universities of Göttingen and Heidelberg (LL.D., 1825), embraced Christianity in 1825, and established himself as a lawyer in Hamburg. In 1831 he became assistant professor at the University of Halle, in 1842 full professor at the University of Breslau, and in 1854 at the University of Kiel. His major work was *Das Strafrecht der Germanen* (Halle, 1842), an outstanding contribution to the history of German criminal law.

For *Das Gildenwesen im Mittelalter* he was awarded a prize by the Copenhagen Academy of Science (1829). Wilda was a co-founder of the *Zeitschrift für deutsches Recht und deutsche Rechtswissenschaft,* which began publication in 1839.

Lit.: Sinzheimer, Hugo, *Jüdische Klassiker der deutschen Rechtswissenschaft* (1938).

WILDENSTEIN, GEORGES, art historian and editor, b. Paris, 1892. He was a son of NATHAN WILDENSTEIN (1851-1934), famous art dealer and connoisseur, who founded the Wildenstein Galleries in 1875 in Paris, and later in London and in New York (1903). The renewed interest in the delicate art of the 18th cent. was largely due to his activities. For his merits in propagating French art he was distinguished by the rosette d'officier of the Legion of Honor.

His son Georges, following the family tradition, concentrated on the art of the 18th cent. in his research. In 1921 he wrote the catalogue raisonné to the Fragonard Exhibition, which was organized by the Louvre. This catalogue became the standard type of catalogue raisonné thereafter. The next year he published two volumes on *Le peintre Aved,* portraitist of the 18th cent., in which he set a model for biographies of artists, giving, first, an evaluation of the personality, followed by a chronology of the artist's life, with full documentation, and a catalogue of all his works with complete information about each item, concluded, finally, by a bibliography. *Un peintre de paysage au XVIIIième siècle, Louis Moreau* appeared in 1923. To this biography an introductory chapter on landscape painting was added, in which the author discussed the subject matter, relying strictly on literary sources of the period. A book on Lancret followed in 1924, and one on Chardin in 1933, besides several publications of art historical problems clarified by documents.

In his method Wildenstein was a true representative of French scholarship in the field of art. As an organizer he was a member of many artistic committees. He was counselor of the Institut d'Art et d'Archéologie of Paris. He held the coveted position of "sécrétaire générale" at the Société des Amis de la Bibliothèque d'Art et d'Archéologie de l'Université, and edited in this capacity the catalogue of this important library, which represents almost a bibliography of the literature of art history and archeology. He founded the Société des Amis des Beaux Arts to further art and art appreciation. He initiated the exhibitions of the *Gazette des Beaux Arts,* of which he was a collaborator and editor, following Theodore Reinach.

In 1941 Wildenstein settled in the United States, and from October, 1942, on the foremost French art periodical appeared in New York, in English. In France his books were twice awarded a prize of the Academy, and he held the title of a Commandeur de la Légion d'Honneur. Other editions of Wildenstein were: a Jewish prayer-book, and several educational books in the religious field, illustrated by living artists; *Les Beaux Arts* (books on French art); *Bulletin of the Musée du Trocadero; Chronique des Beaux Arts et de la Curiosité; Revue Documents.*

ELISABETH GUTMAN.

WILDERNESS (Hebrew, *midbar* or *'arabah*). The Hebrew designations for wilderness are not altogether in keeping with the usual idea of a wilderness as a sandy and stony region devoid of all vegetation. In general, the term wilderness means regions or districts which are not cultivated.

The Hebrew word *midbar* is used chiefly as a designation for tracts which form a transition from the cultivated regions to the wilderness proper, and which, covered with luxuriant grass after the rainy season (*Gen.* 37:22; *I Sam.* 17:28), are suitable for the pasturing of small animals. Inside of Palestine there extends between the mountains of Judah, the Dead Sea, the valley of the Jordan, and the Arabah the region known as the wilderness of Judah (*Judges* 1:16). There were six cities in this wilderness at the time of Joshua (*Josh.* 15:61-62), of which En-gedi is mentioned rather frequently. To this wilderness David fled from before Saul (*I Sam.* 23 et seq.), and this was the scene of the episodes of Nabal and Abigail and the persecutions of David by Saul. In the New Testament, too, the wilderness of Judah played a role as the stopping-place of John the Baptist (*Matt.* 3:1), as the site of the temptation of Jesus (*Matt.* 4:1), and as the scene of a miracle (*Matt.* 14:13-21). Among the other names which are taken from localities situated in the vicinity, portions of the wilderness of Judah are of frequent occurrence, such as Beth-aven (*Josh.* 18:12), Ziph (*I Sam.* 23:14), the wilderness of Maon (*I Sam.* 23:25), the wilderness of En-gedi (*I Sam.* 24:2), the wilderness of Gibeon (*II Sam.* 2:24), the wilderness of Tekoa (*II Chron.* 20:20) and the wilderness of Jeruel (*II Chron.* 20:16). To the southeast of the wilderness of Judah there extended the wilderness of Edom (*II Kings* 3:8).

Outside of Palestine, to the east and to the south, there are extensive stretches of land which also answer to the usual conception of the term wilderness. To the east there lies the Syrian-Arabian wilderness of which only the portion situated to the southeast of Canaan, the wilderness of Kedemoth, is mentioned in the Bible. It was from here that Moses sent messengers to Sihon, the king of Heshbon (*Deut.* 2:26). Of far greater importance for Israel was the wilderness located in the southern part of Palestine, called simply "wilderness" (*midbar*). This is the Sinai peninsula, extending between the two northern arms of the Red Sea. Its northern portion, a highland, is now called Et-tih (=wilderness of confusion); in the Bible it is called *har Paran* ("mountain [highland] of Paran") or *midbar Paran* ("wilderness of Paran"). The southern half of the peninsula, by way of contrast, is fertile and altogether suitable for cattle-raising. In the Bible the individual portions of the peninsula bear separate names, such as the wilderness of Etham (*Ex.* 13:20; *Num.* 33:6), situated on both sides of the Gulf of Suez; to its east, the wilderness of Shur (*Ex.* 15:22); to the south, the wilderness of Sin (*Ex.* 16:1); and still further to the south, the wilderness of Sinai (*Ex.* 19:2).

See also ARABAH.

The Wilderness Wanderings of the Hebrews. According to *Ex.* 12, the Egyptian Pharaoh, under compulsion as a result of the Ten Plagues, sent the children of Israel out into the wilderness on the 15th day of the first month. They began their journey at Rameses, going as far as the Red Sea, and crossing it. The halting-places of the Israelites on this portion of their journeys were Succoth, Etham, and Pi-hahiroth (*Num.* 33:3-7; *Ex.* 13:20). By day they were led by a pillar of cloud, and by night by a pillar of fire (*Ex.* 13:21-22 and other passages). After the passage of the Red Sea the actual wilderness began.

The Israelites first entered the wilderness of Shur, remaining there for three days, and during this time they were unable to find water. In Marah they found a bitter well whose waters were rendered sweet through a miracle. In Elim they found twelve springs of water and seventy palm-trees (*Ex.* 15:22-27). According to *Num.* 33:10-11, they again touched on the Red Sea. On the 15th day of the second month they reached the wilderness of Sin, where there occurred the incidents of the manna and the quail (*Ex.* 16:1-36). From the wilderness of Sin they arrived at the following places in the third month after the Exodus (*Ex.* 19:1): Dophkah, Alush, Rephidim (where the second miracle of the well occurred), Massah and Meribah (the victory over the Amalekites, Jethro's visit, the rearrangement of the judicial system); they then arrived at the wilderness of Sinai (*Ex.* 17 to 18; *Num.* 33:12-15). Here there followed the giving of the Law (*Ex.* 19 et seq.), and the Golden Calf (*Ex.* 32).

On the first day of the first month of the second year after the Exodus the Tabernacle was erected (*Ex.* 40:17), and on the first day of the second month of that same year the first census of the people was taken (*Num.* 1:1-3). On the 20th day of that same month the journeying was resumed (*Num.* 10:11-12). *Num.* 2 contains the order of the encamping and of the journeying. From Mount Sinai the Israelites traveled three days' journeys further toward Taberah, where the people were punished with fire because of their murmuring (*Num.* 11:1-3). This place is undoubtedly identical with Kibroth-hattaavah ("the graves of lust"), where the people were fed for the second time with quail and where, after their grumblings of discontent, a large number of persons, especially the rabble, were smitten with plague (*Num.* 11:4-35). Then followed the appointment of Moses' seventy assistants, the elders (*Num.* 11:24-25).

From Kibroth-hattaavah the Israelites next journeyed to Hazeroth, where Miriam was afflicted with leprosy (*Num.* 11:35; 12:1-15), and then into the wilderness of Paran (*Num.* 12:16). From this place the twelve spies were sent out to the land of Canaan; these returned after forty days, and there followed the death of all the spies with the exception of Joshua and Caleb, the command to return to the wilderness, which was disobeyed, and the battle between the Israelites and the Amalekites and Canaanites at Hormah (*Num.* 13 to 14). Their wanderings then led them to the wilderness of Zin (*Num.* 20:1) and to Kadesh. There Miriam died, according to tradition in the fortieth year of the wilderness wanderings; a further scarcity of water led to the third miracle of the spring, in the course of which Moses and Aaron, not having carried out God's command exactly, were excluded from the Holy Land.

At the beginning of the fortieth year there commenced the attempts of the Israelites to reach the Holy Land. The king of Edom refused them permission to pass through his territory (*Num.* 20:14-21). For this reason the Hebrews were compelled to take a roundabout course, and arrived at Mount Hor. Here Aaron died on the first day of the fifth month after the Exodus (*Num.* 33:38-39). As they journeyed along, the Israelites were attacked by a Canaanite king, ruler of Arad, who lived in the southern part of Canaan. However, the Israelites defeated this king of Arad at Hormah (*Num.* 21:1-3). As a result of the long and wearisome detour from the land of Edom the people became restless and recalcitrant, and were therefore punished by a plague of fiery serpents (*Num.* 21:4-9). The Israelites next arrived at the territory of Moab,

went around it, and reached the border of the territory of Sihon, king of the Amorites, and that of King Og of Bashan. These two lands were conquered, and the Israelites then entered the Canaanite settled country east of the Jordan. Here the wilderness wanderings came to an end.

As regards the geographical matters involved in the wilderness wanderings, the more recent investigators, such as Stade, Beer, Baentsch and Guthe, regard it as impossible to describe the wilderness wanderings definitely from a geographical standpoint, and explain the list of stopping-places found in *Num.* 33 as the work of a learned Jew who lived in Jerusalem about the year 400 B.C.E. Actually it is impossible to fix all the halting-places geographically. Thus Sinai is sought for mostly in the Jebel Musa (Mountain of Moses) on the southern part of the Sinai peninsula. This is also the traditional view. Lepsius and Ebers (*Durch Gosen zum Sinai*) look for Sinai in the Jebel Serbal, which is located further to the south near the oasis Firan in the Wadi es-Sebaiye. Of the remaining forty stopping-places mentioned in *Num.* 33, as far as the wilderness is concerned, only Ezion-geber, on the Elanitic Gulf, may be identified. Kadesh is undoubtedly to be looked for in Ain Qades in the Wadi Qadis west of the Arabah (cf. Baentsch to *Ex.* 17). There is also the possibility that two different places called Kadesh are referred to: the one the usual Kadesh, which for many years was the stopping-place of the Israelites; and the other Kadesh-barnea, which is always mentioned in connection with the twelve spies (*Num.* 32:8; *Deut.* 1:19-33; *Josh.* 14:6-7) and is situated on the southern border of Palestine in the wilderness of Paran. The Jebel Nebi Harun (Mountain of the Prophet Aaron), near Petra (Baentsch to *Num.* 33:37), is designated as Mount Hor, but no accord prevails on this subject among investigators. There are only vague hypotheses and suppositions prevailing as to the other stopping-places in the wilderness.

Outside of the Pentateuch, the wilderness wanderings are mentioned in *Josh.* 24:7-8; in *Judges* 11:16-18; and somewhat in greater detail in *Ps.* 78. Among the prophets there is clearly discernible a change in the conception of the wilderness wanderings, the later the prophets are. Amos (2:10; 5:25), Hosea (9:10; 11:1), and Jeremiah (2:2-3; cf. *Song of Songs* 2:17) speak of the happy youth, the bridal period of the people in the wilderness, since during this period it willingly followed God and did not fall away from God until it had entered the Holy Land. Ezekiel was the first of the prophets to share the gloomy view of the Pentateuch, and talks mainly about the faithlessness and disobedience of Israel, and of its punishment.

WILE, FREDERIC WILLIAM, journalist, b. La Porte, Ind., 1873; d. Washington, D. C., 1941. His father was the reader of the synagogue in La Porte, as well as a business man. After studying at Notre Dame, Wile entered journalism in 1898, as a reporter in Chicago. In 1900 he was sent to London by the Chicago *Record* and the Chicago *Daily News,* beginning a career that was to keep him in foreign countries for a great part of his life.

From 1906 to 1914 Wile was the Berlin correspondent for the London *Daily Mail,* and for part of this

Ira S. Wile

period served also as correspondent for the New York *Times* and the Chicago *Tribune.* Returning to the United States shortly after the outbreak of the first World War, Wile brought with him the first full text of the German memorandum regarding the outbreak of hostilities. Then Wile went back to London, where he was a columnist with the *Daily Mail* until the United States entered the War, when he joined the general headquarters of the American Expeditionary Force as a specialist on German affairs, with the rank of lieutenant colonel.

Subsequently Wile headed the Washington bureau of the Philadelphia *Public Ledger,* and later still founded the Frederic William Wile News Service. Beginning with 1929 he joined the staff of the Columbia Broadcasting Company, and in the following year, broadcasting the events of the London Naval Conference from London, he was the first radio reporter to span the ocean with his reports. Earlier he had inaugurated broadcasting directly from the Capitol by speaking on the presidency at the inauguration of Calvin Coolidge (1925).

Throughout his career Wile avowed his Jewish origin, and faced some of the first manifestations of 20th cent. German anti-Semitism as the result of it. His early experiences at Notre Dame, a Catholic university (which gave him the honorary LL.D. degree in 1924), and his later observations in political life made him a believer in the potentialities and the efficacy of inter-racial and inter-faith alliances.

Among his books were: *Our German Cousins* (1909); *Men Around the Kaiser* (1913); *Explaining the Britishers* (1913); *News Is Where You Find It,* an autobiographical record (1939). He was also editor of *A Century of Industrial Progress* (1928).

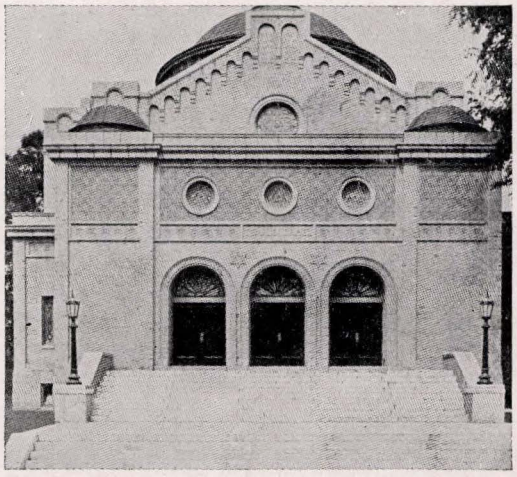
WILE, IRA SOLOMON, physician, b. Rochester, N. Y., 1877. He received the A.B. (1898) and M.Sc. (1908) degrees from the University of Rochester, and the M.D. degree (1902) from the University of Pennsylvania. Wile was commissioner of education, New York city; associate in pediatrics, Mount Sinai Hospital; and lecturer at Columbia University, New York University, the College of the City of New York, Hunter College, Brooklyn College, and the New School for Social Research.

Aside from many contributions to professional journals, he wrote for *The Survey, Mental Hygiene* and *Parents'*

Magazine, and was editor of *Medical Review of Reviews* (1912-16), *Medical Pickwick* (1921-22), and of the department of surgical sociology of the *American Journal of Surgery* (1910-21); he was associate editor of *American Medicine, American Journal of Orthopsychiatry,* and of *The Nervous Child.* He also edited the volumes *Sex Life of the Unmarried Adult* (1934); *Personality Development and Social Control in Terms of Constitution and Culture* (1939); and *The Challenge of Adolescence* (1939).

Starting with *Blood Examination in Surgical Diagnosis* (1908), Wile was the author of *Sex Education* (1912); *Challenge of Childhood* (1925); *Handedness, Right and Left* (1934); and *The Man Takes a Wife* (1937); he was co-author, with Mary Day Winn, of *Marriage in the Modern Manner* (1929).

Wile's father, Solomon Wile, was active in founding Jewish organizations in Rochester, and the son was physician to the Convalescent Home for Jewish Children and served on the board of directors; later he was secretary of the Society for the Welfare of the Jewish Deaf. He was connected with numerous medical and social organizations as member, officer and president. Primarily a child psychiatrist, Wile was an effective worker in the progressive medical and sociological movements of his time, often in their pioneer periods of unpopularity. VICTOR ROBINSON.



WILENSKY, MICHAEL, scholar, b. Usvyaty, Russia, 1877. After studying at the Universities of Bern (Ph.D., 1912) and Kazan, he served with Tarbuth at Odessa (1918-20) and with the Verein zur Gründung einer Akademie für die Wissenschaft des Judentums at Berlin (1924-34). In 1935 he came to the United States and became cataloguer of Hebrew manuscripts at the Hebrew Union College.

In addition to numerous articles in learned periodicals and the *Encyclopaedia Judaica,* Wilensky edited *Safah Berurah* (1st part, Berlin, 1924) and the *Sefer Harikmah* of Jonah ibn Janah, with elaborate notes and critical apparatus (Berlin, 1929-31). His edition of Abraham ibn Ezra's *Sefer Moznaim* was printed, but not published.

WILENSKY, OSCAR R., lawyer and state senator, b. Passaic, N. J., 1904. He received the LL.B. degree from Cornell University (1926), practised law and represented Passaic County at the New Jersey State Assembly on the Republican ticket in 1936, 1938 and 1939, and was the majority leader in 1938. In 1940 he was elected state senator, his term ending in 1943. He was the first Jew to hold the office of state senator in New Jersey. From 1938 on he was counsel to the North Jersey District Water Supply Commission.

Wilensky sponsored and enacted the Housing Legislation, the Princeton Survey, the Municipal Finance Legislation, and the liberalization and broadening of the Unemployment Compensation Law. In 1940 he was elected alternate delegate to the Republican National Convention. Active in various Jewish organizations, he was the Passaic representative for the Joint Distribution Committee.

WILENTZ, DAVID THEODORE, lawyer and public official, b. Russia, 1895. He studied law at New York Law School, and was admitted to the bar of the state of New Jersey in 1919. He was appointed a supreme court commissioner and a special master of the court of chancery. From 1922 to 1926 he was city attorney of Perth Amboy. He was elected attorney general of New Jersey in 1934 and, reelected, was still serving in that capacity in 1943. As attorney general, Wilentz became known nationally for securing the conviction of Bruno Richard Hauptmann in the Lindbergh kidnapping case (1936). His energy and resourcefulness as a public official were widely noted.

Temple Israel in Wilkes-Barre

Wilentz was president of the Perth Amboy Bar Association and of the Middlesex County Bar Association. He was also chairman of the New Jersey Democratic State Committee (1937-38).

WILEY, LOUIS, journalist and publishing executive, b. Hornell, N. Y., 1869; d. New York city, 1935. He studied at the University of Rochester, where he engaged in his journalistic career, becoming the editor and publisher (1887-93) and business manager of *The Tidings,* Rochester, N. Y. In 1904 he was appointed business manager of the New York *Times,* and he held this position until his death. Widely traveling through Europe, he interviewed several European rulers and was received in special audience by Pope Pius XI. He was the founder and ex-president of the Society of the Genessee which, at its annual session of 1935, celebrated the fiftieth anniversary of Wiley's entrance into journalism; on this occasion Wiley's achievements were praised in a letter sent to the Society by Sir Robert L. Borden, former prime minister of Canada.

Wiley received honorary degrees from the University of Kentucky, Wabash College, Hobart College and Alfred University, and decorations from Belgium, France (Commander of the Legion of Honor), Greece, Italy, Poland, Roumania and Serbia.

In 1929 Wiley was appointed one of the non-Zionist members of the council of the new Jewish Agency. Wiley bequeathed large sums to educational and philanthropic institutions, Jewish and non-Jewish.

Lit.: American Hebrew, March 22, 1935, p. 393.

WILKES-BARRE, a city of Pennsylvania on the north branch of the Susquehanna River, with a population of 86,236 (census of 1940) and, together with neighboring communities (Kingston, Plymouth, Nanticoke, Pittston, and others), having a Jewish population in 1943 of over 6,000. The first Jew known to have settled in Wilkes-Barre was Martin Long, who came from Bavaria, Germany, in 1838. He was followed in the next year by his brother, Marx Long.

By 1840 there were a sufficient number of Jews in the community to hold religious services during the high holy days, and in 1845 Congregation B'nai B'rith was organized. The first synagogue in Wilkes-Barre was dedicated by that congregation in 1849. Participating in the dedication exercises were the famed Rabbis Isaac Leeser of Philadelphia and Samuel Isaacs of New York. The Wilkes-Barre *Advocate,* describing

the dedication exercises, referred to the Jews as "generally peaceable, law-abiding, industrious and respected citizens." And of the synagogue it wrote: "Considering the smallness of their number, the building is a high compliment to the enterprise and liberality of the Jews in this place."

By this time the congregation had already secured "a neat burial place in the outskirts of the town." The congregation was incorporated in 1857. The application for a charter was signed by M. Rosenbaum, Joseph Coons, A. B. Weil, Marx Long, J. Constine, and Henry Ansbacher. Moses Strasser seems to have been the first minister of Congregation B'nai B'rith, and was followed by Isaac Strouse (1851-53). Herman Rubin came next, remaining in the pulpit for thirty years, until 1882. During Rubin's ministry, in 1881, the new Temple in Washington Street, on the spot where the first synagogue stood, was dedicated. In this structure, later improved and extended, the congregation was still worshipping in 1943.

Succeeding spiritual heads of the congregation included David Stern (1882-85), Victor Rundbacken (1885-91), Israel Joseph (1891-95) and Marcus Salzman (1896-1929; rabbi emeritus, 1929-). In 1929 Samuel Wolk was called to the pulpit, which he continued to occupy in 1943. The sisterhood of the congregation was organized in 1888, and the brotherhood in 1923. In course of time Congregation B'nai B'rith became Reform and joined the Union of American Hebrew Congregations in 1892.

In 1870 certain individuals of the Orthodox faith "determined to establish a place of worship," and accordingly a charter was obtained for this second congregation of the city. It called itself B'nai Jacob. It was not until 1883, however, that a plot could be bought by its modest membership for the erection of a synagogue, and in September, 1886, the first Orthodox synagogue of the community was dedicated. In the following year, 1887, the second Orthodox congregation, Holche Yosher, dedicated its building. The largest of the Orthodox congregations came into being some years later: the Oheb Zedek Anshe Ungaren. Its first synagogue was dedicated in 1902. In 1943 it was occupying an imposing and commodious structure in a central portion of the city. Later the additional Orthodox congregations Anshe Emeth and Anshe Sefard were formed. The small communities adjacent to Wilkes-Barre also formed Orthodox congregations. In 1943 the Wilkes-Barre Orthodox community was being served by Isadore M. Davidson as the chief rabbi and by Bencel Goldman. Under the leadership of David Ginsburgh, the Orthodox rabbi preceding Davidson, the Talmud Torah, a community Hebrew school, was organized. In 1942 it marked twenty years of service in its new quarters. The Vaad Hakashruth was founded in the early 1900's.

Temple Israel was formed as a Conservative congregation in 1922. Its impressive synagogue edifice was dedicated in 1925. The congregation purchased a cemetery in the neighboring community of Forty Fort. The religious school, organized shortly after the congregation came into being, was housed in a new building in 1929. The Temple Israel Library was founded as a gift of the family of B. T. Cohen in 1925. Louis M. Levitsky served as the organizer and first rabbi of Temple Israel (1922-40), and was then succeeded by Israel J. Kazis, who was rabbi in 1943.

Early charitable organizations of the community were the Hebrew Free Loan and Sheltering Aid Association, formed in 1901 (in 1932 it became two distinct organizations); the Hebrew Ladies' Aid Society (1893); the Society for the Care of the Jewish Orphans and Friendless Children of Luzerne County (1906), which eventually ceased to exist; and the Queen Esther Benevolent Society. The Young Men's and Young Women's Hebrew Association was organized in 1911, and moved into its new building in 1918, becoming an active center of the Jewish community. It, together with the Jewish Welfare Agency, the family society of the Valley, became a constituent member of the community's Welfare Federation. In 1935 Wilkes-Barre Jewry formed the Wyoming Valley Jewish Committee for raising and allocating funds. In addition to administering the funds of the United Jewish Appeal and supervising its campaign, the Committee gradually assumed an increasing functional program.

National organizations represented in Wilkes-Barre in 1943 included, among others, the National Council of Jewish Women, Hadassah, the Zionist Organization of America and its various affiliates, the B'nai B'rith lodge (organized in 1870), and various other civic protective organizations.

From the earliest days, the Jews of Wilkes-Barre were an active, integral part of the community as a whole. They were enlisted in the Civil, Spanish-American, and first and second World Wars. They were enrolled in the earliest artillery unit, formed in the city in the 1830's, and of which Joseph Coons became a captain. City, state and national recognition came to them in the political, civic and cultural fields. Seligmann J. Strauss served as judge in the Court of Common Pleas of Luzerne County (1912-22), the only Jew so honored in the county. Louis Frank was for sixteen years (1917-33) a member of the school board. Herman J. Goldberg was deputy attorney general of Pennsylvania (1931), a member of the Public Service Commission (1933-37), and a member of the Water and Power Resources Board of Pennsylvania (appointed in 1934). Abram Salsburg was elected district attorney of the county in 1904, serving until 1910, and Arthur Silverblatt, Ben W. Goldberg and Max Rosen were appointed, for limited terms, assistant district attorneys. Charles Casper was chief hearing examiner for the Public Service Commission (1937-39), and Jesse Hyman was hearing examiner for the Liquor Control Board (1939-).

Louis Weitzenkorn, author of *Five Star Final,* resided in the community until his death in 1943; Samuel Hoffenstein, poet, and Herman Mankiewicz, of the motion picture industry, were former members of the community. Colonel Abraham Ginsburgh, a high ranking military officer in Washington under Secretary Patterson, and Major Samuel Bloch, Jr., head of the Induction Center of the area, attained high prominence in the military field after the first World War. The Jewish community represented in 1943 a prominent part of the industrial and humanitarian life of Wilkes-Barre.

SAMUEL WOLK.

WILLIAM OF NORWICH, alleged victim of the first accusation of ritual murder to be raised against the Jews. The actual facts, as determined from the investigations of modern inquirers, seem to have been as follows: On Easter Eve, 1144, a skinner's apprentice named William was found dead in a wood near Norwich, with certain wounds upon his head. Despite the fact that there were still signs of life in the body, it was hastily buried; it is thought that what really happened was that William was seized by a cataleptic fit. The period was one of growing hatred of the Jews (in 1130 the London Jews had been accused of killing a sick man) and rumors soon spread that Jews had enticed the boy from the family and had crucified him in mockery of the death of Jesus.

The clergy claimed the child as a martyr, and the populace was stirred up against the Jews. The latter, however, were protected by the sheriff, who allowed them to take refuge in the castle and refused to arrest any for trial in the bishop's court. As a result the ex-

citement subsided, but the legend of the supposed martyr was later further embroidered and William was honored as saint down to the time of the Reformation.

WILLKIE, WENDELL LEWIS, non-Jewish lawyer, b. Elwood, Ind., 1892. He was nominated for the presidency of the United States, by the Republican Party in 1940, in opposition to Franklin D. Roosevelt. Although defeated, his comments thereafter about public affairs obtained wide currency, not only as the statements of a possible candidate for office, but as the opinions of a statesman. As such he was always eloquent for the rights of minorities, stating, for example, that "whenever we take away the liberties of those we hate, we are opening the way to loss of liberty for those we love," and, with respect to the United States in particular, "the height of our civilization, it seems to me, has been reached not by our assembly lines, our inventions or any of our great factitious development, but by the ability of peoples of varying beliefs and different racial extractions to live side by side here . . . with mutual understanding, respect, and helpfulness" ("The Case for the Minorities," *Saturday Evening Post,* June 27, 1942).

Upon accepting The American Hebrew Medal for 1942, because of his promotion of better understanding between Christians and Jews in America, Willkie said (December 17, 1942) that he had no sympathy with the use of the word "tolerance" in discussing treatment of one group by another in America.

"It is not tolerance that one is entitled to in America," he said. "It is the right of every citizen in America to be treated by other citizens as an equal. No man has the right in America to treat any other man 'tolerantly,' for 'tolerance' is the assumption of superiority. Our liberties are the equal rights of every citizen."

WILLS. The Bible more than once refers to the last words of an individual to his family, in which he expresses his will as to their future conduct, asks for their obedience to his injunctions, and bestows upon them his benediction. Thus Abraham is declared to be certain to tell his children "to keep the way of the Lord, to do righteousness and justice" (*Gen.* 18:19), an injunction that was expected to be repeated by future generations. Similarly, Moses before his death reminds the Israelites of their duties to charge their own children to observe the Law of God (*Deut.* 32:46). A number of places in the narratives dealing with the period of the kings speak of such a charge to one's household (*II Sam.* 17:23; *I Kings* 2:1; *II Kings* 20:1). The binding force of such decrees is seen in the case of the Rechabites, who for generations observed the rules drawn up by their founder (*Jer.* 35:6). In the Middle Ages the custom of ethical wills was very common among Jews.

Wills disposing of property were less frequent among Jews, since inheritance was to a large extent regulated by the Talmudic law which provided a double share for the first-born and equal shares for all the other sons. However, during the Roman period the influence of Roman law seems to have made it common among the richer Jews to make bequests, conditional on their death, in the form of a will (*tzava'ah; diathiḳi*); such wills generally were concerned with donations made to others than members of the immediate family. Herod's will, dividing his kingdom among his sons, was an exception to the general rule, and had to be ratified by the Roman emperor rather than by the Jewish courts.

An institution similar to that of the will was the "will of the sick man" (*tzava'ath shechib mera*). This was a conditional donation made by a man who feels that the end is approaching. Such gifts become valid if the donor dies, but are generally revocable if he survives. However, the Talmud surrounds this institution with a number of safeguards designed to prevent it from interfering with the rights of inheritance provided for in Jewish law.

In modern times, Jews have followed the customs of the peoples around them as to the making of wills, and no longer follow the restrictions of Jewish law.

WILLS, ETHICAL. The ethical testament is a distinctly Jewish contribution to didactic literature. Although Christian and Mohammedan worthies in the Middle Ages left many similar documents, there is no doubt that this kind of writing is of Jewish origin. The ethical will never had such importance elsewhere, or such wide extension, as it had among the Jewish people from the earliest times.

A will is generally understood to be a written document left by a person deceased, disposing of property; but the term from the religious and ethical point of view may be used to include instructions delivered orally. With the Jewish people such instructions had indubitable moral and spiritual validity. Classical examples of these are numerous in the early history of Israel. The charge given to the Hebrew people by Moses, which forms chap. 32 of *Deuteronomy,* is the most solemn and arresting recorded in the Bible. To this may be added the admonitions imparted by Jacob to his sons, the earnest advice given to his brethren by Joseph, the warnings addressed to Solomon by his father David, as well as the wise counsels found in the book of *Proverbs.*

In the Apocrypha (*I Macc.* 2; *II Macc.* 7:20-29) are found the exhortations of the mother to her children who became martyrs, and the address of Mattathias to his sons who were to fight valiantly against the Syrian oppressor and, with Judas Maccabeus at their head, to achieve final victory. Other exhortations are found in the book of *Tobit,* the book of *Jubilees,* and especially in the *Testament of the Twelve Patriarchs.* This *Testament,* which was written in the period just preceding the Christian Era, and which has been erroneously attributed to Christian authorship, is of high ethical value. In the Talmud and in the later rabbinic literature there are many instances illustrative of the practice of rabbis and other communal leaders, as they realized the nearness of death, of giving instructions to their disciples and followers. They acted in accord, as Israel Abrahams points out, with this Midrashic account of the last days of Jacob: "When the patriarch felt his end approaching he besought the Lord: 'Ruler of the world,' he cried, 'take not my soul until I have exhorted my children.' And this wish was granted."

Ethical wills were considered *de rigueur* by the rabbis and other communal leaders during the Middle Ages. They give a true picture, though in miniature, of the life and ideals of their time—moral and spiritual aspirations, domestic and social relations, and even approved methods of doing business; but all with the view of enhancing the operations of the moral law. They faithfully reflect the manners and customs prevailing in Jewish communities at the time—even to the style and

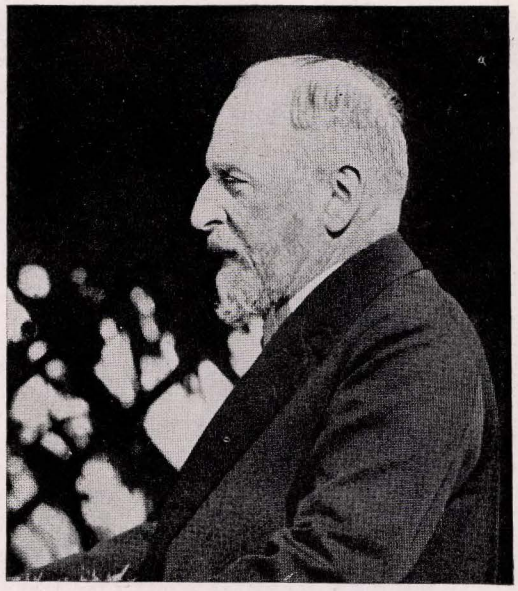
cost of apparel, especially in the case of women. Great stress is laid on personal conduct. An example of such a will is one left by a Jewish worthy who wrote:

"My daughters must respect their husbands exceedingly and they must be always amiable to them; husbands must honor their wives more than themselves. My daughters are not to laugh and speak with strangers, nor to dance. They should be always at home and not go gadding about. They must not stand at the door (to watch what their neighbors are doing). Most strongly I beg, most strictly I command that the daughters of my house be not, God forbid, without work to do, for idleness leads to sin; but they must spin, or cook, or sew, and be patient and modest in all their ways" (Abrahams, Israel, in *Jewish Quarterly Review,* vol. 3, p. 461).

Another will, written about the same time, exhorts the testator's children "to accustom themselves to wear nice, clean clothes, so that God and men may love and honor you."

These wills, as a rule, give explicit commands for the giving of alms, the necessity of dealing honorably with all men regardless of creed, the pursuit of justice, and the exemplification of the higher social amenities.

The preparation of a testament by the learned was a serious undertaking. They did not wait until they felt the end approaching, but began years before, adding something to it or revising it from time to time, until at the close it became a finished ethical and religious dissertation. Often episodes in family history are introduced and personal experiences are related, always to point a moral. Many of them are of considerable length. The ethical will of the physician Joseph ibn Kaspi, of Languedoc, in the 13th cent., is a moral treatise with twenty-one subdivisions. It is in the form of an exhortation to his son Samuel, stating that he had revised it three times. Among other things he laments the fact that his daughters married too early, depriving him of their affectionate companionship, and rebukes his son for neglecting his studies, especially the study of Hebrew. He pleads with him to devote himself to mastery of the Torah. And if Samuel intends to write he should not only deeply meditate before framing his thoughts in words, but also practise neat handwriting.



Noteworthy among these testators are Abraham, Jacob and Sheftel Hurwitz, grandfather, son and grandson who, in their several farewells, give a composite picture of Jewish life in Bohemia during a period of more than a hundred years, in the 16th and 17th centuries. The will of Israel Baal Shem (Besht) in the 18th cent., whom Israel Zangwill depicts in *Children of the Ghetto,* urgently pleads that every Jew devote himself to the service of God and men, "for all things are meant to serve God." The testament, in the form of a letter, of Elijah of Vilna, celebrated as the Vilna Gaon, exhorts his disciples to devote themselves heart and soul to the study of the Law. They must especially guard the sanctity of the Sabbath, which he calls "the holy of holies."

These testaments reveal intimate details of Jewish life perhaps more clearly than any formal record of the past centuries. They are never without human interest. What characterizes them all is absolute faith in God and devotion to the Law.

The latest testament on record, written in the spirit of the older ethical wills, is that of Rebekah Luria, in *Zecher Olam,* dated Jerusalem, 1891.

Richard Willstätter

WILLSTÄTTER, RICHARD, chemist, and Nobel Prize winner, b. Karlsruhe, Germany, 1872; d. Locarno, Switzerland, 1942. In 1896 he became an instructor at the University of Munich, and in 1902 assistant professor and head of the department of organic chemistry at the chemical laboratory of the university. From 1905 to 1912 he served as associate professor at the Technical College in Zurich, then became director of the chemical institute of the Kaiser Wilhelm Society at Berlin-Dahlem, and in 1915 professor at the University of Munich, succeeding his teacher, Adolf von Baeyer; he resigned in 1925 on account of the anti-Semitic attitude of the philosophical faculty, although the authorities did their utmost to make him stay. In 1914 Willstätter was made a member of the Prussian Academy of Science, and in 1915 won the Nobel Prize.

He was a recipient of the order Pour le Mérite and honorary doctor of the Universities of Oxford and Manchester. He was given the Faraday Medal by the Chemical Society at the Royal Institution in London (1927) and, on the occasion of his visit to the United States (1933), the Willard Gibbs Medal by the American Chemical Society.

The outstanding researches of Willstätter, covering a period of nearly half a century, touched upon the fundamental secrets of life and growth and gave impetus to further investigation of others, the far-reaching results of which are not yet fully realized. His early work concerned itself mainly with the structure and synthesis of vegetable alkaloids, including atropine, cocaine and tropine. The work which brought him the Nobel Prize in 1915 was his tedious but brilliant determination of the composition of chlorophyll and its analogy to hematin, the coloring matter of blood. His discovery that the complicated molecule of chlorophyll, the coloring matter of all growing vegetable cells, contains the metal magnesium was an outstanding achievement. Chlorophyll, the vital substance which, through sunlight, causes the growth of vegetable life, was shown to appear not always green, but as red in the color of the rose and blue in the cornflower, and so on through the whole category of growing things. Of almost equal importance was his study of enzymes, the mysterious catalysts of nature, which cause growth by building up complex molecules from simple substances without themselves being changed. Willstätter declared that

"life is definitely a chemical process to which the passkey is the study of enzymes."

He wrote *Untersuchungen über Chlorophyll* (together with Arthur Stoll; 1913); *Untersuchungen über die Assimilation der Kohlensäure* (together with Arthur Stoll; 1918); and *Untersuchungen über Enzyme* (1928). He was a co-editor of *Liebigs Annalen*. At the congress of the World Union for Progressive Judaism in London in 1930 Willstätter delivered a lecture on religious liberalism and science.

WILMINGTON, the largest city of Delaware, with a population of 112,504 (census of 1940), including, according to an estimate of the Jewish Federation of Delaware for the year 1940, 5,000 Jewish inhabitants out of the state total of 5,200. Early records of Jews in and around Wilmington refer to David Bush, prominent citizen and Mason, and his sons, who fought in the American Revolution. The name of David Bush appears affixed to a petition to Thomas Penn, one of the proprietors of Pennsylvania, in 1737, for the "erecting of a Market House in Willing Town" (Wilmington). Writings of a much later date speak of Solomon Solis as being the first Jew born in Wilmington, in 1819. But not until the influx of Jews from Eastern Europe in the 1880's did any permanent and substantial community emerge.

Jewish communal life of Delaware naturally began in Wilmington and remained concentrated there. The first organization was the Moses Montefiore Beneficial Society, formed in 1888 as a mutual benefit society, burial group, and congregation, and embracing in its membership the then total adult Jewish population of about twenty families. Its headquarters were at 211 Market Street. The more Orthodox of the Society's members withdrew to organize a separate congregation which was incorporated as the Orthodox Adas Kodesch Congregation in September, 1889.

Original trustees of the congregation were Bernard Wolfson, Abraham Smith, Solomon Friedman, Morris Miller and Solomon Grossman. Shortly, another semi-organized group, by name Ahavath Achim, merged with Adas Kodesch. The congregation moved into a private residence at Third and Shipley streets, and there worshipped for a number of years. In 1897 the congregation purchased the German Evangelical Lutheran church on French Street and, remodeling it, dedicated it as the first Jewish synagogue in Delaware in 1898. A Sunday school was then established, and in that year the new name of Adas Kodesch K'nesseth Israel Baron de Hirsch was adopted. In 1904 a permanent daily Hebrew school was established. In 1907 the old synagogue building was razed to give way to a new one, for which contributions were made by non-Jews of Wilmington. Several years later the Center of the building was opened, and still later the synagogue building was modernized and extended. Rabbi Hyman Rezits (d. 1930) was appointed cantor and reader of the congregation in 1887, and served for many years. Rabbi Samuel Berliant served from 1929 to 1932. In 1934 Solomon Schulson was called to the pulpit, which he still occupied in 1943.

Other Orthodox congregations supported by Wilmington Jewry in 1943 were Congregation Chesed Shel Emeth, organized in 1901, and Congregation Machazika Adath, organized in 1929. Rabbi Philip First, elected in 1927, was spiritual head of Congregation Chesed Shel Emeth in 1943.

The Reform Temple Beth Emeth was organized in 1906. In 1913 Temple Beth Emeth became a member of the Union of American Hebrew Congregations. Rabbis who served included Lee J. Levinger (1922-24), Louis Mischkind (1925-28), and Henry Tavel, who came to the pulpit in 1929, and in 1943 was on leave of absence in the armed forces of the country.

The Y.M.H.A. building in Wilmington

The Conservative Congregation Beth Shalom was organized in 1922, and in that year built its synagogue. Moses J. S. Abels was its first minister, serving for two years. Rabbi Abraham E. Millgram also served the congregation. In 1930 Jacob Kraft was called to the pulpit, which he continued to occupy in 1943.

In 1940 it was estimated that in Wilmington, approximately 250 out of the total of 650 children of school age were receiving some Hebrew education.

In 1898 Wilmington Jewry formed both its first lodge of the B'nai B'rith and its first charitable society, the Hebrew Charity Association, which later became the Jewish Welfare Society. The Ladies Bikkur Cholem Moshev Zekkenim, Achnosas Orchim society (established 1902) continued in 1943 to give aid to the aged and transient. The Y.M.H.A. was established originally in 1902, and reconstituted in 1934, becoming the cultural agency of the community. An active good-will program was initiated by the Y.M.H.A. about 1938, when forums were instituted for both Jews and non-Jews of Wilmington. The Jewish community of Wilmington had already achieved prominence for interfaith good-will when, in 1920, its drive for Jewish relief was substantially supported by non-Jews of the city. Other organizations supported by the community in 1943 were a Senior and Junior Hadassah, a Zionist district, a Jewish Women's Pioneer branch, the National Jewish Workers Alliance and its women's auxiliary, the Hebrew Free Loan Association, the ICOR. The Federation of Jewish Women's Clubs was established as the council of all women's organizations of the community. In 1935 the Jewish Federation of Delaware was formed, with its executive office in Wilmington.

At Wilmington, noted for the dominant du Pont industries, Jews were mainly engaged as small merchants, with only a few in large enterprise. Among Jews who held public office at Wilmington were Moses Weil, a Civil War veteran, who was city magistrate, as was Barnet Gluckman (1910-31). Aaron Finger was deputy judge of the municipal court from 1915 to 1919, and chief deputy attorney general of Delaware (1920-23). Dr. Albert Robin was city bacteriologist. Jacob Ostro served on the city board of education. Joseph B. Green was city councilman (1925-31, 1935-37, 1939-) and state senator, the first Jew to hold either

office. David Snellenberg was a member of the State Council of Defense. Leo Blumberg was appointed associate professor of mechanical engineering at the University of Delaware in 1926. Isaac B. Finkelstein, prominent merchant, was president of the Taxpayers Research League of Delaware and of the Wilmington Civic Association, and president of the Chamber of Commerce (1922-24).

WILNO, *see* VILNA.

WILSON, WOODROW, twenty-eighth president of the United States, b. Staunton, Va., 1856; d. Washington, D.C., 1924. The period of his presidency, 1913 to 1921, was marked by the application of idealism in both domestic and international affairs, by the participation of the United States in the first World War, and by the summoning of Jews to high positions, in which they rendered important services in connection with these significant events.

An ardent advocate of democracy and a champion of the underprivileged everywhere, Wilson on numerous occasions espoused Jewish causes. While he was still governor of New Jersey, he addressed a meeting at Carnegie Hall in New York city, urging the abrogation of the commercial treaty with Russia because of the refusal of that country to honor passports issued by the United States to its Jewish citizens (the treaty was abrogated under President William Howard Taft in 1913). He praised the achievements of the immigrants and of foreign language newspapers, and subsequently twice vetoed bills restricting immigration (1915 and 1917).

Among other things, he said: "You have brought with you your best traditions; you have brought your lofty ideals . . . you are working out your future together with the great future of the American people. You are writing in foreign tongues, interpreting America to the newcomer, interpreting the best qualities of the immigrant of yesterday to the immigrant of today. You are serving a great and important cause."

In June, 1915, the imminent deportation from the United States of 200 Russian immigrants was suspended, upon the appeal of the Hebrew Sheltering and Immigrant Aid Society, on the ground that it was inhuman to compel them to take the arduous trip back by way of Archangel.

Wilson's first closer association with individual Jews began in 1912, when Henry Morgenthau, Sr., who had been impressed by the former's record of practical idealism, invited him to speak at the dinner celebrating the fourth anniversary of the Free Synagogue in New York city. (The address was reprinted in the *Jewish Tribune* of March 4, 1924.) Morgenthau took an active part in Wilson's campaign for the Democratic nomination, and was chairman of the Democratic Finance Committee in the campaign that followed. In April, 1913, Wilson asked Morgenthau to become Ambassador to Turkey. Morgenthau first hesitated to accept the post, but eventually was won over by Wilson's plea that the position was one in which Morgenthau could best further the welfare of the Jews of Palestine and at the same time best serve the United States. Morgenthau remained at this post until 1916, and then campaigned actively for Wilson's reelection.

In 1914 Wilson, in an address at the dedication of Washington University, stated that "scholarship has never . . . been associated with any religion except the religion of Jesus Christ." When, however, Herman Bernstein protested on the ground that this ignored Jewish scholarship, Wilson at once replied, declaring: "You may be sure there was nothing of that kind in my mind, or certainly nothing in my thoughts that would discriminate in the important matter you speak of, against Judaism." He explained the sentence on the basis that it was struck off in the haste of extemporaneous speaking. In 1916 Wilson appointed Louis D. Brandeis associate justice of the Supreme Court, the first time that a Jew had received such an honor; this appointment, bitterly contested by some at the time, was later recognized as one of the most important acts of the Wilson administration.

Woodrow Wilson

With the entrance of the United States into the first World War in 1917, several Jews were summoned to high service by the administration. Morgenthau was sent on diplomatic missions to Europe and reported the sentiments of the Allied Nations to the president. Bernard Baruch served on the National Council of Defense (1917) and as chairman of the War Industries Board in 1918 to 1919, and rendered notable services in facilitating the flow of materials and checking inflation. Eugene Meyer, Jr., was adviser to the government on non-ferrous metals, assistant to the Secretary of War on aircraft production, a member of the War Savings Committee, and director (1918) and subsequently chairman of the War Finance Corporation.

Wilson took a warm interest in the plight of the Jews abroad and in measures for the improvement of their condition. In 1917 he received a delegation from the Roumanian Jews of America and expressed his sympathy for the Jews of their native country. In 1918, at the urging of a delegation of Zionist leaders headed by Stephen S. Wise, he indorsed the plans for the establishment of a national Jewish home in Palestine. During the peace conferences at the close of the War he consistently championed the cause of the Jewish minorities and aided in having protective clauses written into the treaties. He reached back into the Hebrew Bible to select the word "covenant" to describe the agreement constituting his favorite dream of the League of Nations.

In 1919 he summoned Morgenthau to head a commission to inquire into reports of mistreatment of the Jews in Poland, stating, with great emphasis, that he had concluded to put a Jew on the commission so as to secure for the Jews of Poland a sympathetic hearing. In the following year he offered Morgenthau the post of Ambassador to Mexico, which the latter declined, but later accepted a commission to act as mediator between the Turks and Armenians.

After the expiration of his term of office Wilson retired largely from public life. In 1922, however, his name headed a list of 119 distinguished non-Jews who uttered a solemn protest against anti-Jewish activities then prevalent in the United States.

Other Jews who served under the Wilson administration included: Abram I. Elkus, Ambassador to Turkey (appointed 1916); Lewis Einstein, minister to Costa Rica (1913-21); Ira Nelson Morris, minister to Sweden (1914-23); Paul M. Warburg, appointed a member of the Federal Reserve Board in 1914 and again in 1917; Frank W. Taussig, appointed a member of the United States Tariff Commission in 1917; Leo S. Rowe, who served as assistant secretary of the treasury (1917-19) and in the Department of State (1919-20), as well as representing the United States in various Pan-American conferences; Martin Vogel, assistant treasurer of the United States (1913-20); Milton Strassburger, appointed one of the three municipal judges of Washington, D.C., in 1914. SIMON COHEN.

WINAWER, MAXIM MOISSEVITCH, lawyer and communal worker, b. Warsaw, Poland, 1862; d. Menthon-St.-Bernard, France, 1926. After graduating from the University of Warsaw (1886), he established himself as a lawyer in St. Petersburg. At the same time he began to write for various legal publications, and edited (until 1905) the periodical of the Law Society. His book on the outlines of advocacy appeared in 1902.

Jewish affairs preoccupied Winawer from the beginning of his career. He collaborated in the reorganization of the Society for Spreading Enlightenment Among the Jews, and was a member of the commission which prepared a history of the Jews. Discrimination against the Jews in Czarist Russia prompted him to organize a series of legal actions as defense; he became president (1905) of the Union for the Equality of the Jewish People.

Winawer was one of the creators of the Constitutional Democrat (Cadet) Party, the democratic party in Russia, and served as a member of its central committee. Elected to the first Duma in 1906, he was one of the most prominent members of that assembly. After the dissolution of the Duma by the czar, Winawer was one of the signers of the Viborg Manifesto of protest, for which he was imprisoned for three months and deprived of his political rights. He described these events in various works in Russian, under the titles *The Conflicts in the First Duma* (1907) and *The History of the Viborg Manifesto* (1913). His memoirs were published in 1917.

During the Kerensky government in Russia (1917), Winawer was a justice in the civil department of the supreme court of cassation and was a member of the Constitutional Assembly. After the October revolution he went to the south of Russia and served as minister of foreign affairs for the Wrangel government. In 1919 he went to Paris, where he founded a weekly periodical, published in Russian and French, to combat anti-Semitism. He was also one of the founders of the Russian University at the Sorbonne, lecturing there on Russian civil law.

Maxim M. Winawer

In 1923 he founded a periodical entitled *The Link.* His book, bearing the Russian title *Our Government,* was issued after his death, and sums up his struggle for democracy and human rights.

Winawer was one of the most eminent lawyers in modern Russian history, a juridical scholar of superior standing, a fervent Jew and a Russian patriot.

WINCHELL, WALTER, newspaper columnist, b. New York city, 1897. He went on the stage at the age of thirteen and spent many years in vaudeville. During the first World War he served with the United States Naval Reserve, returning to service as a lieutenant commander during the second World War. In 1920 Winchell became a writer for the *Vaudeville News.* From 1924 to 1929 he did dramatic criticism and wrote columns for the *Evening Graphic,* and in 1929 he joined the staff of the New York *Mirror,* where he developed his famous column.

The importance of Winchell was underestimated for years by persons who persisted in thinking of him only as a Broadway "gossip columnist," even when he had reached the stature of a fighting journalist, addressing a great audience by radio and through newspapers. Certainly his was a powerful voice for his own people and for the democratic way of life. It seems strange that anyone could fail to recognize the true measure of Winchell, yet no man has had more detractors throughout his fabulous career, which began as a vaudeville performer and subsequently made him one of the highest-salaried men in the history of the newspaper business.

Envy and jealousy, the reward of every man who dares lift his head above the dull dead level of mediocrity, animated much of the criticism of Winchell as he commenced to make himself known beyond a small circle on Broadway. Then his completely fearless attacks on wrongs against humanity earned him enemies of a more deadly character. When he began battling the subversive elements in the United States

Walter Winchell

with insistence and persistence, the outcries of his foes were heard even in the Halls of Congress.

He was maligned and threatened. He was assailed in a hundred ways. But one by one he saw the Bundsmen, Klansmen and other representatives of the forces seeking to undermine Americanism by the incitement of hatreds, thrown into jail, often through his exposures. Scores of Winchell's journalistic achievements made history for his profession—his sensational "scoops," his spectacular forecasts, and his exciting personal adventures in pursuit of headline material, but all this was incidental to his growth and development into an editorial force for the right.

His idiosyncrasies, of which he had many; his ego, of which he was humorously well-aware; his cautiousness with money, and all his other quite human attributes were disclosed and exploited by his numerous biographers, but most of them either missed or overlooked his significance as an American whose words were read and heard by millions. Moreover, these words were understood by the millions because Winchell, through confessed limitations of vocabulary, wrote and spoke in the simplest terms. His influence was therefore all the greater. People like writers whom they understand.

What made Winchell a great newspaperman in his own and original field was a natural "nose for news," a certain naïveté about putting into print facts from which other newspapermen shrank, and an incredible industry prompted by a consuming hunger to get ahead. What made him a great American was his instinct for recognizing wrong, his innate patriotism, which was a veritable flame in his soul, and his courage in shouting his convictions from the housetops.

During the end of December, 1942, and the beginning of 1943 Winchell was on a tour of patriotic duty outside of continental United States. In 1943 he was put on the inactive list. Throughout his career he received encomiums from Navy officials for his services.

WINDOW PURIM, *see* PURIM.

WINDSOR, a city in Essex County in the Province of Ontario, Canada, situated on the southeast shore of the Detroit River, opposite the city of Detroit in the state of Michigan. It grew rapidly after the beginning of the 20th cent., and in 1943 was an important automobile manufacturing center. It was first known as South Side in 1745, and subsequently as The Ferry, Richmond and South Detroit, and was incorporated as the city of Windsor in 1892. In 1935 the cities of East Windsor, Sandwich, Walkerville and Ford City were united into the city of Windsor.

The population of Greater Windsor was 115,425 in 1931; the Jewish population of 2,517 formed 2.2 per cent of the total population. The Jewish population was the third largest non-Anglo-Saxon ethnic group in Windsor in 1931, being exceeded by those of French origin with 17.7 per cent of the total population, and those of German origin with 2.9 per cent.

According to the government census, there were sixteen Jews living in the area now known as Greater Windsor in 1891. The number jumped to 141 in 1901, increased to 309 in 1911, to 1,118 in 1921, and to 2,517 in 1931. Jews are known to have lived in what is now Windsor as early as 1810, Moses David having died in Sandwich in 1814.

There were two synagogues in Windsor in 1943, Shaar Hashomayim and Shaarey Zedek, and a Talmud Torah. There were also a branch of the Canadian Jewish Congress, a United Jewish Welfare Fund, Jewish Immigrant Aid Society, B'nai B'rith lodge, A.Z.A. chapter, Zionist society, and Senior and Junior Hadassah.

David Arnold Croll was elected mayor of Windsor in 1929, and again in 1931 and 1933. In 1934 he was elected a member of the Ontario Provincial Legislature and was appointed Minister of Labour and Minister of Public Welfare, the first Jew to hold cabinet rank in Canadian political life. He resigned from his cabinet office in 1937 because of a difference of opinion with the premier of the province, and was reelected as a member of the Ontario Legislature in the 1937 election. Upon the outbreak of the second World War in 1939, while still a member of the Legislative Assembly and mayor of Windsor, Croll enlisted as a private in the Essex Scottish Regiment, went overseas with his regiment, and rose to the rank of captain.

Lit.: Rosenberg, Louis, *Canada's Jews* (1939).

WINE. In Biblical times the use of wine was obligatory both in public religious functions (such as oblations prescribed for the sanctuary) and for domestic ceremonial occasions. The references to wine as a means of promoting joy, as a sign of the bountiful gifts of Providence, and as a token of personal gratitude to the Creator are numerous throughout the Bible from *Genesis* to *Chronicles.* However, admonitions against the intemperate use of wine are not lacking.

How highly wine is regarded in the Bible may be seen from the fact that in a figurative sense Israel is called a vine (*Ps.* 80:9-11; 128:3). More explicitly the virtue of wine is extolled in such passages as *Ps.* 104:15; *Prov.* 31:6 and *Eccl.* 10:19. The writer in *Judges* (9:13) goes so far as to say of wine that "it cheereth God and man." Later the rabbis used wine as a metaphor, not only to represent Israel but also the Torah, the Messiah and holy men. In the Talmud (*Ber.* 34b) it is stated that in the world to come the righteous will drink wine from the grapes grown during the days of creation. The greatest blessing in the conception of the Hebrew people, the blessing of peace, is represented in the mental picture of a man resting under his vine and

fig tree (*I Kings* 5:5). Abundance of wine is, in the Bible, an indication of prosperity (*Gen.* 49:11), and to offer bread and wine to a guest is a sign of friendship and hospitality.

Accordingly, the production of wine and viticulture in general were greatly encouraged in Biblical times. The various stages in the process of wine making may be traced from such passages as *Gen.* 40:11; *Num.* 22:24; *Deut.* 18:4; *Josh.* 9:4; *Ezek.* 17:5-10; and *I Chron.* 27:27. Vineyards were carefully tended and observation posts manned by watchmen charged with the duty of seeing that the growing vines were not damaged. In the Sabbatical year the vineyards, as in the case of all fruit-bearing and arable land, were not to be cultivated, and no seeds or other plants were ever permitted between the vines. The owner of a vineyard, about to gather the first harvest of grapes, was exempt from military service. The grape harvest in Biblical times began about September and it was made occasion for great festivity (*Jer.* 25:30; 48:33). Wayfarers were permitted to take as much as they desired to slake their thirst, and the poor, as in the case of all harvests, could gather all that remained on the ground.

There were three kinds of wine, called *yayin, tirosh* and *shechar.* Yayin was ordinary, matured wine, and was usually drunk diluted with water. Tirosh was new wine, and Shechar was old, strong wine used undiluted. There were also a red wine (*Ps.* 75:9; *Prov.* 23:31) and white wines, the wines of Helbon and Lebanon. Wine was kept in vessels of goat- and sheepskin, and stored in wine rooms and cellars.

The rabbis held that, taken in moderation, wine is not only a healthful stimulant but is possessed of great curative properties, the best of all medicines. It was the custom in Talmudic times, in accord with an interpretation of *Prov.* 31:6, to give ten cups of wine to mourners with the "meal of consolation." Later this quantity of wine was reduced. Drunkenness was strictly banned. The best cure for the inebriate state, it was held, was walking or sleeping.

The use of wine has been continued at religious functions in the synagogue and in the Jewish home on all festive occasions to this very day. During the prohibition period in the United States (1920-1933) the federal government permitted the manufacture and sale of wine for sacramental purposes. Conservative as well as Reform rabbis in the country maintained that as far as the Jewish ritual was concerned there was no need of this special privilege, since grape juice could be used instead of wine. Louis Ginzberg, in his monograph on the subject (1922), justified this position through an exhaustive research in Talmudic law and later rabbinic decisions. Strictly Orthodox rabbis generally insisted on the use of wine. CHARLES A. RUBENSTEIN.

WINEMAN, HENRY, merchant and communal leader, b. Cincinnati, 1878. He received the A.B. degree from the University of Michigan in 1901, entered the family business, the People's Outfitting Company, of Detroit, one of the largest mail order houses in the United States, and became president of the firm in 1923. Wineman was the first president of the Jewish Welfare Federation of Detroit, and was for several years chairman of the local Allied Jewish Campaigns.

In 1943 Wineman was a member of the American executive of the Jewish Agency for Palestine, and a director (from 1912 on) of the Retail Merchants Board of the Detroit Board of Commerce, Detroit Better Business Bureau (from 1926 on), and of the Detroit Retail Furniture Dealers Association (from 1915 on). He served on the national boards of the United Palestine Appeal and Joint Distribution Committee. He was a director of the United Jewish Charities, and a member of the Board of Governors of the Hebrew Union College.

He was also co-chairman of the Detroit Round Table of the National Conference of Christians and Jews, and a director of the Community Fund and of the 1942 Detroit War Chest.

WINKELMAN, NATHANIEL, physician, b. Philadelphia, 1891. After his graduation from the University of Pennsylvania School of Medicine (M.D., 1914), he was resident physician at the Allegheny General Hospital (1914-15) and the City Hospital of Pittsburgh (1915-18); during the first World War he was a neuropsychiatrist in the United States Army. In 1928 he was appointed professor of neurology at Temple University School of Medicine; in 1936 he received a similar appointment at the University of Pennsylvania School of Medicine and was still serving in that capacity in 1943.

Winkelman was director of Fairmount Farms in Philadelphia. In addition to numerous papers on neurological subjects, he wrote *Syphilis of the Nervous System* (1937). He was president of the Philadelphia Neurological Association (1927-28), president of the American Association of Neuropathologists (1930-31) and associate editor of the *American Journal of Syphilis and Neurology* (1933-35).

WINKLER, MAX, economist, b. Vama, Roumania, 1893. He came to the United States in 1910, and received the Ph.D. degree from New York University (1918). He was manager of the foreign department of the *Magazine of Wall Street,* was connected with several financial agencies, and prepared financial studies for the Foreign Policy Association and the Jewish press. In 1927 he was made associate professor of economics at the College of the City of New York. Winkler was an economic adviser to the United States sub-committee on banking and currency (1932-33). He was a commander of the Order of the Crown of Roumania.

Winkler's writings include *United States Capital in Latin America* (1929); *America—the World's Banker* (1930); *Foreign Bonds—An Autopsy* (1936). He was contributor to the *Universal Jewish Encyclopedia* and the Jewish press.

WINNIPEG, capital city of the Province of Manitoba, Canada, situated at the junction of the Red and Assiniboine Rivers, on the site of the fur trading post of old Fort Garry, and incorporated as a city in 1870. The population of Winnipeg in 1941 was 221,960, of whom the Jewish population of 17,027 formed 7.67%. The Jewish population was the fifth largest ethnic group in the city in 1941, being exceeded by the population of English (27.94%), Scottish (18.24%), Irish (11.48%), and Ukrainian origin (10.17%).

According to the government census statistics, there were twenty-one Jews in Winnipeg in 1881; this number increased to 645 in 1891, to 1,156 in 1901, to 9,023 in 1911, to 14,837 in 1921, and to 17,660 in 1931, and fell to 17,027 in 1941.

The first Jews known to have settled in Winnipeg were Reuben Goldstein and Hyman Miller in 1879, followed by Adolph Bieber, Philip Brown, George Frankfurter, David and Samuel Ripstein and Louis Wertheim in 1880. The first arrival of Jews in Winnipeg in large numbers was in 1882, when, as a result of the May Laws and the Russian pogroms, some 270 Jewish men, women and children arrived after a long and arduous journey from Russia. Among these immigrants were the Finkelstein and Weidman families. The second large group of Jews to arrive in Winnipeg came from Roumania, in the period from 1898 to 1903, as the result of Roumanian persecution of Jews at that time, followed by the largest group of all who came to Canada following the Russian pogroms of 1905.

The early history of the Winnipeg synagogues is somewhat confused. Congregations multiplied, divided and amalgamated. By 1885 there were two rival congregations, Bnai Israel and Congregation Bethel, which worshipped in rented premises. The first synagogue

building erected in Winnipeg was that of Shaarey Zedek Congregation, at the northeast corner of Henry and King streets in 1890, which was the first house of worship of any denomination to be dedicated in Manitoba with Masonic ceremonies. The Rosh Pinah Synagogue was erected in 1893 at the corner of Henry and Martha streets, and was still in use in 1943. Shaarey Shomayim Congregation was founded and its synagogue built on Dagmar Street in 1907. In 1913 Shaarey Shomayim Congregation amalgamated with Shaarey Zedek Synagogue. Shaarey Zedek Congregation sold its old building at the corner of Henry and King streets, and the amalgamated congregations worshipped thereafter in the synagogue building on Dagmar Street.

Shaarey Zedek Congregation was the only Conservative congregation in Winnipeg in 1943, and there were seven Orthodox congregations, but no Reform congregation. The oldest rabbi in Winnipeg in 1943 was Israel Kahanovitch, who held his position uninterruptedly from 1907 on. Rabbi Solomon Frank occupied the pulpit at Shaarey Zedek Synagogue from 1926 on, following Rabbi Herbert J. Samuel, who held that post from 1914 to 1926. Other rabbis in Winnipeg in 1943 were J. Horowitz (1921), H. Herson (1931), S. Tversky, and M. Schwartzman (1940).

The first Talmud Torah in Winnipeg was established in 1891, and after occupying several rented buildings, moved into a school building erected for the purpose in 1912 on Charles and Flora Avenue at a cost of $65,000. A branch Talmud Torah was erected on Andrews Street in 1921. The Peretz School and Institute, a Yiddish School with a large enrollment of pupils, was established in 1912, while the Jewish Folk School was established in 1930. All three schools are week-day supplementary schools, equipped with kindergarten departments, and also conduct day school departments in which all the public school subjects, besides Hebrew, Yiddish, and the Jewish subjects, are taught.

The Western Canada Jewish Children's Home and Aid Society, formerly known as the Jewish Orphanage, was formed in 1917 by the consolidation of two rival institutions, and in 1943 occupied a modern building erected in 1920. Its first superintendent was I. Greenberg (1917-20); subsequent superintendents were A. Osovsky (1920-38) and H. E. Wilder (1934-43). Its president in 1943 was A. Bricker.

The Jewish Old Folk's Home was established in a building on Manitoba Avenue in 1919, and moved into its new building on Magnus Avenue in 1940. Its first president was A. Slobinsky, and its president in 1943 was J. Shuckett. A. Osovsky was its superintendent in 1943. Both the Jewish Children's Home and the Jewish Old Folk's Home are beneficiaries of the non-sectarian Winnipeg Community Chest, and serve the Jewish population of Western Canada.

The Mount Carmel Clinic, a free out-patient's clinic and dispensary, was established in 1925 and erected its present building on Selkirk Avenue in 1929. It is operated with the cooperation of the Jewish medical men of the city, and is a beneficiary of the Jewish Welfare Fund.

The Young Men's Hebrew Association (Y.M.H.A.), which was organized in 1919 and reorganized in 1924, had its predecessor in the Hebrew Amateur Athletic Association, founded as early as 1910, which was subsequently known as the Young People's Hebrew Association. The Y.M.H.A. occupied rented premises until 1936, when it moved into its own building presented by the estate of the late Max Steinkopf, K.C. Sam Sheps was executive director of the Y.M.H.A. in 1943, having held that position from 1936 on.

Headquarters of the Western Division of the Canadian Jewish Congress were located in Winnipeg ever since the Canadian Jewish Congress was founded in 1919. The first president of the Western Division of the Canadian Jewish Congress was M. J. Finkelstein, K.C.; subsequent presidents were Rabbi Solomon Frank and Ben Sheps. The president in 1943 was A. H. Aronovitch, and Louis Rosenberg was executive director.

The Jewish Welfare Fund of Winnipeg was founded in 1938 to coordinate the raising and distribution of funds for internal and external Jewish welfare institutions. The annual amount raised increased from $51,000 in 1938 to $100,000 in 1942. Presidents of the Winnipeg Jewish Welfare Fund were N. J. Weidman (1938), William Keller (1939-41) and Max Cohen (1941-43). The executive directors of the Welfare Fund were Emanuel Berlatsky (1938-39), Benjamin Crystal (1939-41) and Henry Stubbins (1941-43).

There were numerous Zionist organizations in Winnipeg in 1943, including the Manitoba Zionist Council, the Sharon Men's Zionist Club, the Weizmann Men's Zionist Club, the Brandeis Lodge of Habonim, numerous Senior and Junior chapters of Hadassah, Young Judaea Clubs, several Poale Zion branches, Pioneer Women's Clubs, and Habonim Clubs. Besides the B'nai B'rith lodge founded in 1911, a local chapter of the A.Z.A., and sections of the National Council of Jewish Women (1925) and the National Council of Jewish Juniors, there were in 1943 numerous Jewish fraternal organizations, mutual loan societies, sick benefit societies and "Landsmanschaften."

There were three Jewish newspapers published in Winnipeg in 1943: the *Israelite Press,* a Yiddish semi-weekly, founded in 1910 as the *Canader Yid;* the *Jewish Post,* an Anglo-Jewish weekly founded in 1925; and the *Western Jewish News,* an Anglo-Jewish weekly founded in 1927.

Jews played quite a prominent part in the political life of Winnipeg. Abraham A. Heaps was a member of the Dominion Parliament for North Winnipeg from 1926 to 1940. Jews elected to represent Winnipeg in the Manitoba Legislature Assembly were S. Hart Green, K.C. (1910-14), Captain William V. Tobias, M.C. (1927-32), Marcus Hyman, K.C. (1932-39), and Morris A. Gray (1941-). Jewish aldermen elected to the Winnipeg City Council were Moses Finkelstein (1905-7), A. Skaletar (1912-17), John Blumberg (1920-), Abraham A. Heaps (1917-26), Morris A. Gray (1930-42), Ernest A. Brotman (1942-).

Jews elected as members of the Winnipeg Public School Board were Moses Abrahamson (1914-15), Max Steinkopf, K.C. (1916-17), Mrs. Rose Alcin (1920-21), Marcus Hyman, K.C. (1924-29), Morris A. Gray (1927-30), Mrs. A. Hart Green (1931-32), Meyer Averbach (1933-36 and 1938-), William C. Ross (1937-40), Joseph Zuken (1941-), and Dr. Mindel C. Sheps (1942-). Mrs. Mollie (Weinberg) Soudack, physicist, was an executive member of St. John's Technical High School Home and School Association.

LOUIS ROSENBERG.

Lit.: Rosenberg, Louis, *Canada's Jews* (1939); Wilder, H. E., *Outline of the History of the Jews in Canada* (1932); the Centennial Jubilee edition of the *Jewish Daily Eagle.*

WINTER, JAKOB, historian of Jewish literature and rabbi, b. Sandorf, Hungary, 1857; d. Berlin, 1941. He came to Berlin in 1875, and attended the Jüdische Lehrerbildungsanstalt and the Gymnasium; he studied further at the University of Breslau, and from 1883 to 1886 at the rabbinical seminary there. In 1886 he was appointed rabbi in Dresden, where he also became professor.

In collaboration with August Wünsche, Winter wrote *Die jüdische Literatur seit Abschluss des Kanons* (Trèves, 1892), translated the *Mechilta* into German, and edited the second volume of Moritz Lazarus' *Ethik des Judentums,* which was published after Lazarus' death. He was a contributor to *Tannaitische Midraschim,* which he edited jointly with Gerhard Kittel and Abraham Marmorstein (1922-36). In 1938 he published a translation of the *Sifra.*

WINTER, LEV (LEO), Czech deputy and minister of state, b. Hroby, near Tabor, Czechoslovakia, 1876; d. Prague, 1935. He studied law at the University of Prague, and from 1895 on was active in the Czech Social Democratic Labor Party. From 1907 to 1918 he was a member of the Austrian Reichsrat,

where he was on the social insurance committee and later chairman of the social political board. During the first World War Winter was a member of the Czechoslovak national council.

When Czechoslovakia became an independent state after the War, Winter was a member of the national assembly and then became the first minister of social welfare in the new republic. He retained this position until 1920, when he resigned and was again elected deputy. He was made chairman of a committee which was to work out a social insurance law; this law was presented to the assembly in 1923 and passed. Winter served a second term as minister of social welfare in 1925 to 1926. He wrote a series of scientific essays and, with Alfred Meissner, a handbook of industrial law, *Handbuch des Gewerberechtes.*

WINTERFELD, MAX, *see* GILBERT, JEAN.

WINTERNITZ, MILTON CHARLES, physician, b. Baltimore, 1885. He received the M.D. degree from Johns Hopkins University (1907), where he taught prior to his appointment as professor of pathology at the School of Medicine, Yale University (1917); from 1920 to 1935 he served as dean of the Yale Medical School. In 1931 he became associate director of the Yale Institute of Human Relations.

Winternitz wrote *The Pathology of Influenza* (1919) and *The Biology of Arteriosclerosis* (1937), and compiled *Collected Studies on the Pathology of War Gas Poisoning* (1919) and *Pathology of Vascular Disease.*

Lit.: Kagan, Solomon R., *Jewish Contributions to Medicine in America* (1939) 305.

WINTERNITZ, MORITZ, Sanskritist, b. Horn, Lower Austria, 1863; d. Prague, Bohemia, 1937. He was at first teacher of German at Oxford, England (1891), then became librarian at the Indian Institute at Oxford (1895) and instructor at the German University of Prague (1899). In 1911 he was appointed full professor. In 1922 to 1923 Winternitz lectured at the University of Santiniketan, India. He was regarded as an outstanding authority on Sanskrit. Winternitz's main work was *Geschichte der indischen Literatur* (3 vols., 1909-22), which appeared also in an English translation.

His other works include: *The Apastambiya Grihyasutra* (1887); *Das altindische Hochzeitsritual* (1892); *The Mantrapatha* (1897); *Catalogue of Sanskrit Manuscripts in the Bodleian Library* (1905); *General Index to the Names and Subject-Matter of the Sacred Books of the East* (1920); *Some Problems of Indian Literature* (1925); *A History of Indian Literature* (2 vols., 1927-33); *Mahatma Gandhi* (1930); *Mahayana-Buddhismus* (1930); *Rabindranath Tagore* (1936).

WINTERNITZ, WILHELM, physician, b. Josefstadt, Bohemia, 1835; d. Vienna, 1917. He received the M.D. degree from the University of Prague (1857), and was first a navy surgeon (1858-61). In 1865 he became instructor in hydrotherapy at the University of Vienna, where he was active from 1899 on as full professor, until his retirement from teaching in 1910. He was a co-founder (1865) of the General Polyclinic in Vienna, and the owner and director of the hydrotherapic sanatorium at Kaltenleutgeben, near Vienna. Winternitz was one of the leading authorities on hydrotherapy, which he developed through many clinical and physiological researches.

He is author of *Die Hydrotherapie auf physiologischer und klinischer Grundlage* (Vienna, 1877-80; 2nd ed., 1890-92), which was his main work and was translated into several languages. He wrote also *Wasserkur und natürliche Immunität* (1877) and *Cholera, Lungenphthise und Fieber: Klinische Studien* (1887-90), and edited the *Blätter für klinische Hydrotherapie,* which he founded in 1890.

Lit.: Biographisches Lexikon der hervorragenden Ärzte, vol. 5 (1934).

WINTERSTEIN, HANS, physiologist, b. Prague, Bohemia, 1879. In 1906 he became lecturer and in 1910 professor at the University of Rostock, Germany. He was appointed professor at the University of Breslau in 1927, and was director of the Physiological Institute of the University of Breslau until 1933, when he became professor and director of the Institute of General Physiology at the University of Constantinople.

Winterstein's published works include *Handbuch der vergleichenden Physiologie; Die Narkose* (1919); *Kausalität und Vitalismus* (1919); *Schlaf und Traum* (1932); and articles in several scientific journals. He was co-editor of the *Zeitschrift für Wissenschaftliche Biologie* and *Ergebnisse der Biologie.* Winterstein renounced Judaism.

WINTERSTEIN, SIMON, BARON VON, railroad magnate and deputy, b. Prague, Bohemia, 1819; d. Voslau, near Vienna, 1883. A self-made man, he became a shipping agent for the Kaiser Ferdinand Nordbahn (Northern Railroad) and later its president. He was also a director of the Südbahn (Southern Railroad). As a member of the Viennese Industrie- und Handelskammer (Chamber of Industry and Commerce) he was elected to the Austrian parliament (1861 and 1867).

Knighted in 1867, he was made a life member of the Austrian upper house in 1869; in 1878 he was created a baronet. Winterstein for several years headed the Jewish community of Vienna.

WISCHNITZER, MARK, historian and social worker, b. Rovno, Poland, 1882. After graduating from high school in Brody, he engaged in Talmudic studies.

He studied at the Universities of Vienna and Berlin, and received the Ph.D. degree from the latter institution, his thesis being a dissertation on early 19th cent. Russian history. He was editor of the department of history of the *Yevreiskaya Entziklopedia,* published in Russian from 1908 to 1913. He lectured at the Courses for Oriental Studies in St. Petersburg (1909-12), was one of the initiators and co-editor of the *Istoria Yevreiskavo Naroda* (Russian, Moscow, 1914-16), and contributed several chapters dealing with the political and economic history of the Jews in Poland and Lithuania.

Wischnitzer took an active part in the Jewish Historical and Ethnographical Society in St. Petersburg, and frequently contributed to its quarterly, *Yevreiskaya Starina.* Simultaneously he was engaged in research in the history of liberal movements in Russia, and wrote for a number of Russian magazines. Following journalistic and research activities in London (1919-21), Wischnitzer published *Memoirs of Ber of Bolechow* (Oxford University Press, 1922) from a Hebrew manuscript of Jews' College (Hebrew and Yiddish editions appeared in the same year).

He was managing editor of the Rimon Publishing Company of Berlin and London (1922-24), which issued illustrated magazines of art and letters, *Rimon* and *Milgroim,* in addition to books in Hebrew, Yiddish and English. In 1925 he became editor of the department of history of the *Encyclopaedia Judaica* in Berlin. He was guest lecturer at the Institutum Judaicum of the University of Berlin and the Hochschule für die Wissenschaft des Judentums. He specialized in research in the history and structure of Jewish craft guilds in Poland and Lithuania in the 16th to 18th centuries, and published a study on this subject in the *Vierteljahrschrift für Sozial- und Wirtschaftsgeschichte* (Stuttgart, 1927).

In 1921 Wischnitzer assumed the post of secretary general of the Hilfsverein der Deutschen Juden, in

which capacity he conducted social and cultural-relief programs in Eastern Europe and directed mass emigration of Jews from Germany to Western Europe and overseas (1933-37). In 1927 he visited the agricultural colonies in Southern Russia and the Crimea, and published articles on their achievements in the journal *Osteuropa.* In 1936 Wischnitzer was sent by the Hilfsverein and other leading Jewish organizations to investigate immigration and settlement problems in South Africa, both Rhodesias and Kenya.

For many years he was co-editor of the *Korrespondenzblatt über Auswanderungs- und Siedlungswesen,* published by the Hilfsverein. In 1931 he took a leading part in the organization of the Haffkine Foundation for the Benefit of Yeshivas, of which he became executive secretary. In 1938 he joined the European office of the Joint Distribution Committee at Paris. In 1940 he left France for the Dominican Republic, where he did social work and research in Jewish history in Santo Domingo.

In May, 1941, Wischnitzer settled in the United States. He joined the staff of the Council of Jewish Federations and Welfare Funds, was contributing editor of the *Universal Jewish Encyclopedia,* and in 1943 was engaged in a special study for the Research Institute on Peace and Post-War Problems of the American Jewish Committee. He took part in the work of the Yiddish Scientific Institute. He was associated with communal affairs, including activities in the B'nai B'rith lodges.

In addition to numerous articles on history, sociology and migration for general and Jewish encyclopedias and magazines, he was the author of *Die Universität Göttingen und die Entwicklung der liberalen Ideen in Russland im ersten Viertel des 19. Jahrhunderts* (1907); "Poslanie Frankistov 1800" (in *Proceedings of the Imperial Academy of Science,* St. Petersburg, 1914); *Iddishe Tzechen in Poilen un in Lite* (1922); *Die Juden in der Welt* (1935); "Jewish Emigration from Germany 1933-1938" (in *Jewish Social Studies,* 1940); "The Historical Background of the Settlement of Jewish Refugees in Santo Domingo" (*ibid.,* 1942).

Lit.: *Yevreiskaya Entziklopedia,* vol. 5; Druck, D., "Fun Russishen Liberalism bis Iddishe Kolonisatzie Plener," *Morning Journal,* June 19, 1942; Garbaty, Moritz, "17 Jahre Hilfsverein," *Jüdisches Gemeindeblatt* (Berlin), April 24, 1938; Reisen, Z., *Lexikon fun der Yiddisher Literatur, Presse un Filologie,* vol. 1 (1926), cols. 697-99.

WISCHNITZER-BERNSTEIN, RACHEL, former curator, author and lecturer, b. Minsk, Russia.

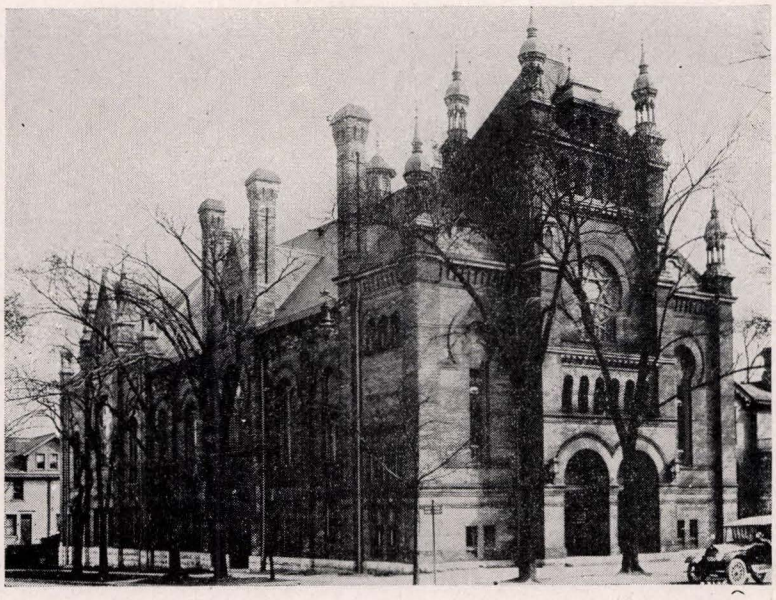
She was the wife of Mark Wischnitzer. She studied at the Universities of Heidelberg, Munich and Berlin, and at the Art Academy in Brussels, and graduated from the School of Architecture in Paris in 1907. She contributed articles on art criticism to the *Russkaya Mysl* (Russian), on art and architecture to the Russian Jewish encyclopedia, and a study, "Art of the Jews in Lithuania and Poland," to the *History of the Jewish People* (Russian; 1914). After a stay in England, where she did research in Hebrew illuminated manuscripts in the British Museum and the Bodleian Library, she edited the first art magazine in Hebrew, *Rimon,* and the first in Yiddish, *Milgroim* (1922-24). She was editor of the department of architecture and illuminated manuscripts of the *Encyclopaedia Judaica* (Berlin, 1925-33), to which she contributed numerous articles.

As curator of the Jewish Museum in Berlin (1934-38) she arranged exhibitions, among them the Don Isaac Abravanel and the Akiba Eger Memorial Exhibitions, in which the attempt was made to convey personal spiritual values in terms of documents of the art and culture of the period. She compiled the catalogues of these exhibitions in 1937. In that year she was commissioned by the Berlin Jewish community to make field trips to provincial communities, among others to Ellrich, to investigate the state of the 18th cent. synagogue. Her report appeared in the last issue of the *Monatsschrift für Geschichte und Wissenschaft des Judentums* (1939). She lectured on art in Amsterdam, London, Berlin (Jüdisches Lehrhaus, Jüdischer Kulturbund, as guest lecturer at the Hochschule für die Wissenschaft des Judentums), Hamburg, Breslau and Mayence, and took part in the organization of the Arbeitsgemeinschaft für Sammlungen Jüdischer Kunst und Altertümer, founded in 1931 in Mayence.

She published a volume, *Gestalten und Symbole der jüdischen Kunst* (1935); a study, "L'origine de la lampe de Hanouka" (in the anniversary volume of the *Revue des études juives,* 1930); "Les manuscrits à miniatures de Maimonide" (in *Gazette des Beaux-Arts,* 1935); "Von der Holbeinbibel zur Amsterdamer Haggadah" (in *Monatsschrift für Geschichte und Wissenschaft des Judentums,* 1931).

In 1938 Rachel Wischnitzer-Bernstein went to Paris, where she was engaged in the study of the wall paintings of the ancient synagogue at Dura-Europos. She came to the United States in January, 1940, and in 1943 was living in New York city. She published in the United States "The Conception of the Resurrection in the Ezekiel Panel of the Synagogue at Dura" (in *Journal of Biblical Literature,* 1941) and "The Samuel Cycle in the Wall Decoration of the Synagogue at Dura" (in *Proceedings of the American Academy for Jewish Research,* 1941); in 1943 she was a research fellow of the Academy.

She published "The Messianic Fox" (in *Review of Religion,* 1941), and read papers on messianological aspects of ancient Jewish art at annual meetings of the American Oriental Society (1940 and 1941). She lectured at the Adult School of Jewish Studies at the Y.M.H.A. (1940-42). She was contributing editor in the department of art history of the *Universal Jewish Encyclopedia.*



Lit.: *Der Morgen* (1935) 465; Gundersheimer, Hermann, "Ein neuer Weg jüdischer Kunstforschung," *Die Zeitschrift,* Jan., 1936; *L'univers israélite,* April 28, 1939; Osborn, Max, in *Jewish Congress Weekly,* Oct. 9, 1942; Reisen, Z., *Lexikon fun der Yiddisher Literatur, Presse un Filologie,* vol. 1 (1926), cols. 689-99.

WISCONSIN, a state in the Great Lakes region, in the central northern part of the United States, admitted to the Union in 1848. Its population in 1937 was 3,137,587, of whom 39,917 were Jews.

The first reference to Jews is negative, and dates from the time when the territory was a French possession, ruled from Quebec. It appears in a decree of "his Most Christian Majesty," Louis XV, given in 1724 to the Company of the Indies, the first article of which enjoins the directors and officers of the Company.

"to remove from said country all the Jews who may have taken up their abode there—the departure of whom, the declared enemies of the Christian name, we command within three months, including the day when these presents are published, under pain of forfeiture of their bodies and estates."

Conditions changed after the English won control of the land in 1759, and soon thereafter Jewish names appear among the pioneers. In 1770 one of the fourteen British licensees to exploit the fur trade in Wisconsin, then known as the Michigan territory, was an Ezekiel Solomon, of Jewish stock. In 1792 Ogilvy, Gillespie and Company of Montreal sent Jacob Franks as their agent to Green Bay. Two years later the Menominee Indians made Franks a land grant for 999 years, and in 1797 he went into business there under his own name, becoming one of the most influential residents of the settlement. That year he established a trading post at Fond du Lac, and in 1804 he sent an agent to do a "summer business" in raw deer skins in Milwaukee, long before the time of Solomon Juneau and the founding of the city. In 1805 he erected a

Temple Emanu-El B'nai Jeshurun in Milwaukee, Wisconsin

grist- and saw-mill three miles east of De Pere, the first of its kind in that section of the country.

When, after the War of 1812, Franks, who was a loyal Britisher, returned to Canada, he left his property and the care of his Indian family to his nephew, John Lawe, who had come to Green Bay from Canada in 1797, at the age of sixteen. Lawe carried on his uncle's business, and in time became a very successful merchant. He was an organizer and one of the largest stockholders of the Fox River Hydraulic Company, formed in 1836 to build a dam across the Fox River. Since Jewish religious affiliation was non-existent, he helped to establish the Christ Church parish, of which he became a warden, made possible the formation of the first Protestant Episcopal Mission in Green Bay in 1825, and founded the first temperance society west of the Great Lakes in 1831. He became an associate justice in the first court held in Brown County, and in 1836 he was elected to the first legislature of the Wisconsin Territory.

That there were other Jews in the territory is gleaned from a stray sentence in a history of Brown County (published in 1876), in which is mentioned the fact that about 1820, near Kaukauna, "a Jew peddler was the victim of a murder by three Indians, who committed the deed to obtain the goods that he carried in a pack on his back, going on foot from place to place." We hear of two Jewish families in Milwaukee in 1836, Emanuel Shoyer and Henry Newhouse, and in 1842 Henry Friend opened a clothing store there. Shortly thereafter Jewish settlers are found in Marinette, Watertown and Wausau.

Between 1840 and 1843 Bernard Schlesinger Weil went to Wisconsin and engaged in farming in the vicinity of Cedar Lake. He acquired several thousand acres of land, and became one of the most influential men in the state. He was the first Jew elected to the state legislature, serving in the assembly in 1852, and intermittently in the senate between 1853 and 1880. He was one of the first stockholders of the Prairie du Chien railroad, became identified with other early industrial developments, and in 1855 was breveted brigadier general of the state militia. The town of SCHLESINGERVILLE was named in his honor, the name being abbreviated subsequently to SLINGER. Weil was a conscious and loyal Jew. Despite his isolation, he celebrated the Jewish holy days, brought a Hebrew teacher for his four children by ox-team from Chicago, sent his two sons to Milwaukee to become Bar Mitzvah, presented a Sefer Torah to Congregation B'ne Jeshurun there, and had the state legislature open one of its sessions in the early 1850's with prayer by the Milwaukee rabbi. He died in Chicago in 1893, at the age of ninety-one, and was buried in Milwaukee.

(There is another community in Wisconsin bearing a Jewish name, the village of ROTHSCHILD, but that is purely accidental and has no historical connection with any Jewish pioneer. Many years ago a lumberjack built a shack near some rapids on the Wisconsin River, and he was dubbed "Baron Rothschild" because of his reputed wealth. Later, people began to call the falls in the river "Rothschild Falls." In the latter part of the 1890's, the people who were buying up the riparian rights on the river, necessary to develop the water power, called their company "The Rothschild Water Power Company." When the Marathon Paper Mills Company was organized there in 1909, the name Rothschild had become so well known that the station on the Milwaukee Road was called informally Rothschild, and that was the name officially given to the place when the village was incorporated in 1913. The old lumberjack died many years ago, and the house he built was later destroyed by fire. Many people dug around the ruins of the old place, but nothing of value was ever discovered there.)

Among other Wisconsin Jewish pioneers were Samuel Snow (Dutch Doc) and John Meyer Levy, who came to La Crosse in 1843 and 1845, respectively. The latter was the outstanding founder of that city, and served twice as its mayor. Lyon Silverman located at Mequon about 1845, became a prominent business man of Ozaukee (Washington) County, and was a Democratic state senator in the early 1850's. In 1845 there were three Jewish families settled in New Glarus, and in 1848 Samuel Klauber was living in Lake Mills. Klauber moved later to Madison, where he was a pioneer settler, and where his brothers, Sigmund, Isaac and Charles, joined him. Charles Klauber was among the first volunteers to join the Union Army when the Civil War broke out, serving with the First Wisconsin Regiment.

Isaac Harmon was an early settler in Racine, where he served as clerk of the city council from 1849 to 1852, and again from 1854 to 1855. S. Moddewitch opened a clothing store in Fond du Lac in 1849. Families by the name of Austrian and Leopold were among

the earliest white settlers of La Pointe and Fond du Lac (1853). When Bayfield was platted, Marks and Julius Leopold were the preemptors, and Mrs. Julius Austrian was its first white woman resident.

The social upheavals in Europe in the late 1840's led to a larger Jewish emigration, and the Jewish settlement in Wisconsin grew accordingly. An entry in the *Occident and American Jewish Advocate* of September, 1849, tells us:

"We learn from a reliable source that a number of highly respectable families have just arrived in New York from Bohemia, to form a colony in Wisconsin. There have been for several years past many families from the same country in the neighborhood of Milwaukie; but the present party, we hear, mean to establish a congregation at once and they came provided, as it is said, with teachers and other necessary officers to carry their intentions into effect." An unsigned letter, dated October 9th, in the November, 1851, issue of the same paper, gives a picture of Jewish pioneering in Berlin, Marquette County: "You will undoubtedly be pleased to hear that in the backwoods country, there were, on the Day of Atonement, a few of our people assembled to praise the Lord on High. We are, to the number of thirteen, at the house of Mr. Kusel, who lives about 20 miles north of this place, on the land belonging to the late Menominee purchase. So you will see that the land is not even sold yet to actual settlers; and still in that wilderness were a few of God's chosen ones assembled to praise His name. We had everything to make the day pass off according to ancient usage. There was a Shophar belonging to Mr. Kusel, as also a Sepher, and we had also in our small congregation a Cohen and a Levi; and everything went off to the satisfaction of all present."

While some of these pioneers remained loyal to Judaism, and soon became the founders of Jewish congregations in Milwaukee (1847), MADISON (1856), LA CROSSE (1857) and elsewhere, there were others, scattered throughout the state, who lived in religious isolation, remote from any organized Jewish life, and still others who preferred to become wholly absorbed into their new environment.

Such an instance was WATERTOWN, a highly cultured settlement, the birthplace of the first kindergarten in America, where Carl Schurz and other German forty-eighters came, among them a number of Jewish families who felt apparently that the golden age of human brotherhood had arrived and that it was no longer necessary, at least on American soil, to maintain a separate Jewish existence.

In 1880 Wisconsin had 2,559 Jews amidst a general population of 230,257, and Milwaukee was regarded as a larger and more important Jewish community than Detroit. It was composed largely of German and Bohemian immigrants or children of immigrants, with a considerable admixture of Hungarian and a few Polish Jews. It had a Reform as well as an Orthodox Temple, and a weekly magazine, *Der Zeitgeist,* which appeared between 1880 and 1883 under the editorship of Rabbis Adolf Moses of Louisville, Emil G. Hirsch of Chicago, and Isaac S. Moses of Milwaukee. A number of Jewish textbooks and rituals, in German and English, were also published there at the time. Of course, the usual benevolent and cultural societies were not wanting, and Jews mixed freely with non-Jews in many of the general civic and social organizations.

Then came the mass immigration from Russia, which swelled the Jewish population of Wisconsin to about 10,000 by 1897. The victims of czarist oppression presented a challenge to the earlier immigrants which helped to arouse their Jewish consciousness and vitalize their community life. In spite of fears and prejudices, the Jews of Wisconsin, assisted in a measure by their non-Jewish neighbors, opened their hearts and purses for the relief of the newcomers, and soon felt themselves enriched and strengthened by this accretion to their number. Bernard Gross, a contemporary, basing his account on the records of A. W. Rich, then treasurer of the Wisconsin auxiliary of the Alliance Israélite Universelle, gave a graphic description of how, with the assistance of Mayor Stowell, a mass meeting was held at Milwaukee in October, 1881, to provide care for a group of 350 Jewish refugees who came from Russia to Milwaukee, how the Milwaukee Citizens' Aid Committee provided the new immigrants with food, shelter and employment, either in the city or throughout the state, and how, together with the aid of Baron Maurice de Hirsch and a New York Committee, similar work was done on behalf of groups of Jewish immigrants arriving in Milwaukee up to the year 1891.

The aggravation of the Jewish lot in Russia, Roumania and Galicia during the first decade of the 20th cent. helped to sustain the large-scale exodus of Jews from Eastern Europe, and thousands upon thousands of these refugees came to New York. To cope with the situation, the Industrial Removal Office was established there, and Milwaukee was among the first cities to cooperate with it. Thus, from 1901 to 1903 nearly 800 skilled and unskilled workers were moved to Wisconsin, and shortly thereafter their families followed.

In November, 1904, A. W. Rich launched the Arpin Settlement project, purchasing 720 acres of farm land in an abandoned lumber territory at Arpin, about 150 miles northwest of Milwaukee, and settling there a small group of immigrant families, in the hope of developing a Jewish agricultural colony. A few of the immigrants remained there for a number of years, and some of them continued as farmers in the state, but the high hopes of the founders did not materialize.

In the decades which followed the Jewish settlement in Wisconsin continued to grow in size, distribution and influence. The second mass immigration of German Jews, which followed the defeat of Germany in the first World War and the rise of the National Socialist Party to power in the Reich, brought many Jewish refugees to the state, 1,400 of them between 1933 and 1942. Thus the estimated Jewish population in Wisconsin rose in 1912 to 19,385, in 1917 to 28,581, and in 1937 to 39,917. In the first World War Jews from 122 Wisconsin towns and villages served in the American military forces. Although some of the original congregations, such as those in Madison and La Crosse, to which reference was made before, had gone out of existence, the total number of Jewish congregations in the state rose by 1940 to about fifty.

Secular Jewish organizations were found (1943) in at least twenty-two Wisconsin towns. A group of twenty-two isolated Jewish families, living in rural places within a radius of about fifty miles from Berlin and Waupaca, established a model Jewish Country Club, designed to serve their social, cultural and philanthropic needs. The Jewish National Fund, B'nai B'rith, National Refugee Service, and some other agencies had regional councils as well as local branches and representatives. However, in most communities there was a woeful lack of any serious religious program and official representation in civic affairs alongside the Catholic and Protestant groups. To meet this need, a movement was begun in 1938, under the leadership of Rabbi Joseph L. Baron, Hyman Parks and Joseph Rothschild, and Mmes. Harold Baum and Hugo Teweles, to organize Liberal Jewish congregations and congregational nuclei in the smaller towns, to group these together for rabbinical services, and to foster a Jewish religious program. As a result, the Wisconsin Conference of Liberal Synagogs was launched in 1940, consisting of congregations in Milwaukee, Madison, Kenosha, Waukesha, Oshkosh, Wausau and other places.

Jews were frequently honored in their respective communities, entrusted with civic responsibility and appointed to high office. Victor L. Berger represented the Fifth District in the United States Congress in 1911 to 1913 and 1919 to 1927; and before him, in 1872, Elias Rindskopf was elected to the same office but, as it happened occasionally in those days, it was discovered after the election that the successful candidate had never become naturalized as a citizen. Solomon Levitan served as state treasurer in 1922 to 1932 and 1936 to 1938, and Baruch S. Weil of Ripon was in the state legislature for twenty-five years (1870-95). Other Jews who served in the legislature, in addition to those mentioned before, were Jacob E. Friend, Bernard Gettleman, Bernard Glass, Joseph Hirsch, Joseph A. Padway, Ben Rubin, Oscar Morris and Harry Slater. John M. Levy was mayor of La Crosse, Edward Poznanski of Chippewa Falls, H. A. Weil of Ripon, David Hammel of Appleton, and Herman Wertheimer of Watertown, while Henry Traxler was city manager of Janesville for nearly three decades.

Judge James M. Pereles of the Milwaukee County Court became (1899) president of the school board and of the library board, a regent of the University of Wisconsin and a member of the Auditorium Board from its inception to his death, while his brother, Thomas F. Pereles, served as commissioner of the public debt under two administrations (1893 and 1896), as a member of the school board, and as president of the Milwaukee Bar Association. Albert C. Wolfe of La Crosse served in 1917 as United States district attorney for Western Wisconsin; Judge Charles L. Aarons of the Circuit Court of Wisconsin (1925-) served as president of the school board, and was selected by Marquette University as one of Milwaukee's most distinguished citizens. Mrs. Joseph Jastrow of Madison was for many years president of the woman's suffrage movement in Wisconsin. Henry Berkowitz was on the board of aldermen in La Crosse (1881), Arthur Shutkin on the city council of Milwaukee (1922-28), and Maurice Barnett district attorney of Kenosha (1925).

Jewish scholars served on the faculty of the University of Wisconsin, among them Joseph Jastrow (psychology), Horace M. Kallen (philosophy), Louis Wolfenson (Semitics), L. Levy (French), Ludwig Lewisohn (literature), Harry Glicksman (English), Selig Perlman (labor), Nathan Feinsinger (law), Hyman C. Berkowitz (Spanish), Morris Marden (mathematics), and Arthur Lowenhart (pharmacology).

The university opened its doors to eastern youths, compelled to seek their educational opportunities away from home, so that its Jewish student body grew in number from a mere score or two at the beginning of the 20th cent. to nearly a thousand in the 1930's. It had (1943) a well-established Hillel Foundation, directed successively by Rabbis Solomon Landman, Max Kadushin, and Theodore Gordon. Its Semitics department, launched in the 1890's by a statewide committee, led by L. Hirshheimer of La Crosse and Charles L. Aarons of Milwaukee, continued in existence for about forty years.

Marquette University, a Jesuit institution in Milwaukee, was also liberal in its policy toward Jewish students, of whom there were (1943) more than a hundred on the campus, and it had a number of Jewish instructors in its medical and dental schools. About 100 Jewish students attended regularly the Milwaukee State Teachers College, which had Jews also on its faculty. There were very few Jewish students and no Jewish teachers in the other colleges of the state in 1943.

A number of Wisconsin Jews, in addition to those mentioned in the article on Milwaukee, rose to prominence in various fields: Edna Ferber of Appleton, Ben Hecht of Racine, Amram Scheinfeld and Herbert Weinstock of Milwaukee in literature; Ralph D. Blumenfeld (whose father, David, edited the *Watertowner Weltbürger*) of Watertown, later of London, and Edith Rich Isaacs of Milwaukee, later of New York, as publishers and critics; William Haber as an economist; Sheldon Glueck, of Milwaukee, as criminologist at Harvard University; Julius Segall as an artist; Fannie Bloomfield-Zeisler as a concert pianist; Charles K. Harris as a popular song composer; David Saposs, of Milwaukee, as economist; Louis Werba as a theatrical producer; Harry Houdini (originally Weiss) and his brother, Theodore Hardeen, of Appleton as magicians; Carl Laemmle of Oshkosh as a moving picture producer; and Goldmann of Watertown, founder of the Golden Eagle at Denver, and Gimbel Brothers, as department store merchants. Colonel Joseph R. Sherr, born at Hurley, and educated at Waupaca, Milwaukee and Madison, an executive at the G. H. Signal office, serving under the Southwestern Pacific Area command, was with General Douglas MacArthur in the historic dash through the enemy lines from Bataan to Australia.

There were Jewish settlements (1943) at Antigo, Appleton, Ashland, Beloit, Berlin, Chippewa Falls, Eau Claire, Fond du Lac, Green Bay, Hurley, Janesville, Kenosha, La Crosse, Madison, Manitowoc, Marinette, Milwaukee, Oshkosh, Racine, Rice Lake, Sheboygan, Stevens Point, Superior, Watertown, Waukesha and Wausau. Most of these had Orthodox synagogues, B'nai B'rith lodges, and provision for kosher meat.

There were (1943) ordained Orthodox rabbis at Appleton, Fond du Lac, Green Bay, Madison, Milwaukee, Racine and Stevens Point, and Reform rabbis at Kenosha, Madison, Milwaukee and Oshkosh. In most of the other communities in that year Judaism was extremely passive, and Jewish education, in any modern sense of the word, was non-existent.

The following details may be added about some of the more important communities in Wisconsin, outside of Milwaukee:

Appleton, with about sixty Jewish families and drawing on neighboring towns, had (1943) about 250 worshippers on the holy days. The Reform congregation, founded in 1878 with Lange and Samuel Meyer Weiss (father of Houdini) as acting rabbis, grew out of a cemetery association established in 1872. A Temple was built in 1887, under the leadership of Rabbi Solomon. He was succeeded by Emanuel Gerechter of Milwaukee, who moved to Appleton and served as professor of Hebrew and German at Lawrence College and rabbi of Temple Zion for twenty-five years. In later years the congregation dwindled in numbers, and the Temple was sold, but the few remaining members, under the leadership of Mr. and Mrs. Louis Marshall, conducted a Sunday school and monthly Sabbath eve services in private homes, while for the high holy days they were served by a student of the Hebrew Union College. An Orthodox congregation, founded in 1903, grew in membership, and in 1943 was headed by Rabbi Alex Yisroel Klein. It erected the Moses Montefiore Synagog in 1914, and dedicated a new house of worship and social center in 1923. Both congregations maintained cemeteries. There was another small Orthodox group, B'nai Israel Synagog, a Hadassah chapter with 110 members, a B'nai B'rith lodge (organized in 1874) with ninety-two members, and the United Jewish Charities with fifty-seven members who contributed about $5,000 annually for national as well as local needs. All these organizations included Jewish affiliates from Neenah, Manasseh and other neighboring towns.

Fond du Lac had as its earliest Jewish settlers S. Moddewitch, who opened a clothing store there in 1849, and Raphael Katz, who opened another clothing store in 1867. It had in 1943 an Orthodox congregation, Kehilat Jacob, chartered in 1914, and under the charge of Rabbi K. Fisher. It had also a Sisterhood, a B'nai B'rith lodge, and a Hadassah society.

Green Bay, the home of Jacob Frank and John Lawe, had in 1943 a Jewish community of about 120 families, devoted to an active program of traditional Judaism.

under the leadership of Rabbi David Shapiro, who conducted a daily school as well as a Sunday school. The families there, who maintained a B'nai B'rith lodge, Zionist, Hadassah, Ladies' Aid, A.Z.A., and similar organizations, contributed about $10,000 a year to local and national Jewish philanthropy.

KENOSHA, with over 200 Jewish families (600 persons), had (1943) an Orthodox group, maintaining a synagogue and Hebrew school, but it was particularly proud of its beautiful Jewish Center, which housed a Reform Temple, Beth Hillel. As a community it is comparatively new, only ten of its families being of 19th cent. German immigrant stock, while all the others are of 20th cent. Russian immigrant stock. Beth Hillel Religious School was in existence from 1910 on, but the congregation did not organize until 1923, with Aaron Cohen as its first rabbi. He was succeeded by Milton Ellis (1924-25), Julius Rappaport (1925-37), under whose leadership the Center was erected, and the incumbent in 1943, Martin Weitz.

MADISON, with 250 Jewish families, was until the 1930's, as Rabbi Aaron Cohen described it, "in a state of self-satisfied inactivity and inaptitude." The old congregation, founded in 1856, had gone out of existence long before, and no active new congregation came to take its place. In the early 1930's Rabbi A. Kashdan endeavored to mold a Conservative group, but without success. In 1940 a strictly Reform congregation, Beth El, was founded by Joseph Rothschild and Rabbi Joseph L. Baron of Milwaukee, and that congregation thereafter blossomed forth, under the rabbinical leadership of Manfred Swarsensky, formerly of Berlin, Germany, into a very active and representative synagogue, with nearly a hundred members.

OSHKOSH, with about forty Jewish families in 1943, had an Orthodox congregation, B'nai Israel, from 1902 on, with Rabbi Louis Edelsohn ministering to its needs for twenty-eight years. Rabbis Richard Hertz and Martin Weitz converted it into a Liberal Temple, with a special Orthodox ritual service for its older members. In 1942 Iwan J. Gruen, formerly of Danzig, Germany, and Wausau, Wis., was elected as its rabbi. Its president, Isadore Block, was (1943) the head of the Wisconsin Conference of Liberal Synagogs.

RACINE, the second largest city in the state, with a Jewish population (1943) of 240 families, had Jewish residents from 1850 on, when Isaac Harmon came from Germany. A Robens family arrived from Sweden in 1862, and the first Jewish family of Russian stock was Epstein, who came in 1876. Congregation B'nai Jeshurun, the first Jewish institution in the community, was organized in 1899, and after going through various metamorphoses, it survived in 1943 as the strictly Orthodox B'nai Yehudah Anshe Sholom Synagog. A Conservative Temple was founded by Rabbi Aaron Cohen, who officiated there from 1925 to 1937. He was succeeded by Myer Kripke (1937-39) and by the incumbent in 1943, Irving Miller (1939-). There were a B'nai B'rith lodge (organized in 1911), a Zionist district (1912), a section of the National Council of Jewish Women (1917), and a Hadassah (1926).

SHEBOYGAN, with 165 Jewish families (600 individuals), was in 1943 a strictly Orthodox community, with three synagogues, Adas Israel, Ohel Moshe, and Ahavat Shalom. The traditions of the community date back thirty-five years, when Rabbi Aronin came to officiate. He served there for twenty years, and was succeeded by Rabbis Rein, Fishman, Zakuto, Rube, Nodel, and the incumbent in 1943, S. H. Barenholtz.

Lit.: American Hebrew, Nov. 24, 1905, pp. 860-64; *Publications of the American Jewish Historical Society,* No. 3 (1895) 35, 39; No. 12 (1904) 172; No. 13 (1905) 52-54, 58; No. 16 (1907) 27; *Wisconsin Jewish Chronicle,* April 27, 1928, pp. 1, 8.

WISDOM. The Hebrew words for "wisdom" (*hochmah*) and "wise" (*hacham*) convey several different meanings. In the primary sense they refer to the skill required in the manipulation of tools, whether as artisan or artist (Bezalel, *Ex.* 31:3; see also *I Chron.* 22:15; *II Chron.* 2:6; cf. *Isa.* 40:20). Musicians are called wise (*Jer.* 9:16-17); the midwife is a "wise woman" (*Sab.* 18:3). Derivatively, and in a figurative sense, wisdom and wise pertain to the skills needed for success in practical living in society. On the lowest level are the unsocial practices, such as connivance (*Ex.* 1:10), shrewdness (*I Kings* 2:9) and subtlety (*II Sam.* 13:3). Sheer prudence includes such practical virtues as sobriety (*Prov.* 20:1; 23:29-35; 31:4), the saving of money (6:6-8), and keeping from evil out of fear (14:16). On a higher level is the type of wisdom which establishes desirable social relations; wisdom restrains the emotions (*Prov.* 29:11); a wise man's words are gracious (*Eccl.* 10:12; cf. *Prov.* 16:32; 17:28). The wise speaks wise words (*Job* 15:2), and takes heed of counsel (*Prov.* 12:15; cf. *Eccl.* 4:13). Jeremiah counsels the wise man not to glory in his wisdom (*Jer.* 9:22). The leadership of men requires wisdom; Joseph is spoken of as wise (*Gen.* 41:33, 39); so, too, Joshua (*Deut.* 34:9), and Solomon, who is called the wisest of men (*I Kings* 5:11; see also 3:12; 5:21; *II Chron.* 2:11; Koheleth, identified by tradition as Solomon, is called wise, *Eccl.* 1:13, 16; 12:9). Because of this fame, several works, both Scriptural and non-canonical, have been ascribed to Solomon (*Prov.* 1:1; 10:1; *Eccl.* 1:1; *Song of Songs* 1:1; and the apocryphal Book of Wisdom, generally known as the *Wisdom of Solomon*). The wise knows how to speak with royalty (*Prov.* 16:14; see also on military conquest by wisdom *Prov.* 21:22; 24:5-6; *Eccl.* 9:15, 18).

In the most complete sense, however, "wisdom" connotes not merely proficiency and success in the worldly scene, but even more, goodness, beneficence, social usefulness and spirituality. The evil man, for all his shrewdness and practical gains, is not considered genuinely wise; he who is "wise to do evil" is really a foolish man (*Jer.* 4:22; cf. *Ezek.* 28:3-10 on the rich man who considers himself wise because of his wealth). *True wisdom is the possession and exercise of the techniques necessary and sufficient for the living of the good life.* It implies the profoundest native intellectual qualities, as insight, judgment and critical analysis, as well as acquired learning and aptitudes (*Prov.* 19:20), and in addition, and most vitally, it involves the implementation of man's noblest moral potentialities (*Deut.* 32:6, 28-29; *Job* 17:10; 29:15-16; chap. 31; *Prov.* 10:12; *Hosea* 13:13; 14:10; *Ps.* 107:43, a wise man understands God's mercies). The wise man will draw others to wisdom (*Prov.* 11:30). It is when wisdom becomes an ethical demand rather than merely a factual description of how men act that it becomes a concern for religious thinking. "The fear of the Lord is the beginning of wisdom" (*Ps.* 111:10; *Prov.* 9:10; *Sirach* 1:14; see also *Prov.* 15:33; *Job* 28:28) means not only that the first step in acquiring wisdom is the fearing of God, but also that fear of God is the end purpose and most nearly complete type of wisdom.

Wisdom, like all else, is considered by Judaism of divine origin (*Jer.* 9:11; *Job* 32:8). Wisdom is neither with the great nor with the old, but from God (*Ps.* 105:22). Isaiah makes the divine source of wisdom most clear; "And the spirit of the Lord shall rest upon

him, the spirit of wisdom and understanding" (*Isa.* 11:2). *Targum Onkelos* and *Metzudath David* to the passage understand the spirit of the Lord to be the prophetic spirit. The *Biur* points out that the "spirit of God" in *Ex.* 31:3 is the protasis of which the apodosis is "wisdom, understanding" and the like. "What is the spirit of God? Wisdom and understanding!" (*Targum Jonathan* renders the phrase *ruah kudsha,* the Holy Spirit, which rendering, as we shall see, had distinct theological implications. The "wisdom of an angel of God" was a well known adage in ancient times (*II Sam.* 14:20). Wisdom is divine in both senses; it derives from God Whose gift it is, and at the same time its essence lies in the knowledge of His ways (*Hosea* 14:10) and in obedience to His Torah (*Deut.* 4:6). It is unwise to sin (*Hosea* 13:13) or to disobey God (*Deut.* 32:6). The Jew prays for wisdom; the fourth benediction of the weekly Shemoneh Esreh is a prayer for wisdom (cf. *Ber.* 33a). In classical times, the wise man took his place with the priest and prophet in social leadership (*Jer.* 18:18); after the destruction of the Temple, the wise took the place of the prophets (*B.B.* 12a). Ben Sira describes his prayer and struggle for wisdom in the appendix to his book (*Sirach* 51:13 et seq.), and the *Wisdom of Solomon* also contains a famous prayer for wisdom (chap. 9). In the Jewish view, then, all wisdom comes from God (*Sirach* 1:10), and He will not bestow it on a malicious soul (*Wisdom of Solomon* 1:4). True wisdom is high morality, and wise living is right living.

Wisdom, both as the practical power to discern the beneficent from the harmful, and the ethical norm for distinguishing the good from the bad, made its very special place in Israel's culture; many panegyrics of wisdom fill the pages of the Bible and the non-Biblical literature. Under the manipulation of the poetic imagination wisdom became more than merely a simple description of an individual's mode of thought and conduct; it developed an individuality of its own. It makes speeches, exhorting men to follow her if they would find God and happiness. The adjective became a substantive; a human quality became a distinct personality (*Prov.* 1 to 9; *Sirach* 24). The personification of human characters is of course not confined to Jewish literature; Plato's "ideas" and the Scholastics' "universals" are psychological parallels. Because of its rigid monotheism, Judaism made it impossible for wisdom ever to attain a thoroughly independent personality; it rejected Ea, the Babylonian god of wisdom, even as it was later to reject the Logos or Memra of Philo which he identified with wisdom, and which in turn became variously the second or third person in the Trinitarian conception. When, by poetic license, wisdom became more than a quality of character and developed into an individuality, it still remained a creature, never the creator. Poetic imagery has a way of turning into philosophic realism at the hands of prosaic theologians; but the genius of Judaism kept the most prosaic of its adherents from crystallizing wisdom into a competitor of God. In Judaism wisdom was hypostatized, but never apotheosized.

While wisdom never became a god, it became nevertheless the next most significant idea; it came to be identified with the Torah. The logic of the move was simple, compelling and manifold. Wisdom and Torah both were the divine way of life; it followed ineluctably that they were the same. Wisdom, even as the Torah itself, was the organ by which God revealed Himself to man. Man, on the other hand, achieved communion with Him by means of the Torah, and equally by means of true wisdom. In Ben Sira, the identification is complete; wisdom quotes *Deut.* 33:4, and applies the verse to herself (*Sirach* 24:23). The Gemara knows as an old tradition that *Prov.* 3:18 speaks of the Torah, even though the Scriptural text has reference to wisdom (*Ber.* 32b); the prayer-book also understands the verse in the same way (Singer, S., and Abrahams, I., *The Authorised Daily Prayer Book,* 1922, p. 69, "It is a tree of life to them that grasp it"; *Union Prayer Book,* newly revised, 1940, p. 149; for another instance of unconscious identification of wisdom with Torah see *Aboth* 6:10).

The Babylonian god of wisdom dwelt in the Great Deep; it is therefore not surprising that wisdom is associated with the Tehom Rabbah (the Babylonian Tiamat) in Jewish literature (*Prov.* 3:19-20; cf. *Ps.* 36:7; *Sirach* 24:5; *Gen.* 1:2). It is clear that an intellectual struggle broke out over ancient myth; thus it is of utmost significance that the radical author of *Job* deliberately rejected the Babylonian myth: **"The deep sayeth: It (wisdom) is not in me"** (28:14). Ben Sira also finds it necessary to polemicize on the Oneness of God (*Sirach* 24:24) and to emphasize that it is He Who fills all things with wisdom (verse 25), the counsels of which are, significantly, more profound than the great deep (verse 29). However, the tradition of the anciency of wisdom persisted in popular theology; and if not coeternal with God it was at any rate "the first of His works of old" (*Prov.* 8:22), "created from the beginning before the world" (*Sirach* 24:9). We can not say definitely how far the authors of *Prov.* 8 and *Sirach* 24 intended to be understood literally; however, the old traditions received a powerful fortifying help in them.

Thus with the later identification of wisdom and Torah, we find that the rabbis held that the Torah, alias wisdom, was the first of created objects, that it will never cease (*Sirach* 24:9; the ninth of Maimonides' thirteen articles of faith), that it was "by Him as a nursling" (*Prov.* 8:30); God used the Torah or wisdom as plan and model in the creation of the world; "the Lord by wisdom founded the earth" (*Prov.* 3:19); "the Lord made me (wisdom) as the beginning of His way" (*Prov.* 8:22; *Pirke de Rabbi Eliezer* 3; *Midrash Gen.* 1:1). As long as such phrases are taken as poetical conceit, and their application to the Torah as a mere imaginative figure, an obiter dictum preaching the importance of the Torah, all this is harmless enough. But when taken literally, as it was in the course of the ages, it became the source of serious theological and philosophic difficulties. *Targum Yerushalmi* renders *Gen.* 1:1, "With wisdom God created the world," since wisdom is the primary of God's creatures (*Prov.* 8:22). Rationalists opposed such views, of course; Abraham ibn Ezra points out that the primacy of wisdom is logical rather than temporal; God made a well-ordered world, that is, with wisdom, not that He looked at some thin ectoplasm called wisdom and used what he found in it as a blueprint for His world (so, too, the *Biur* on *Gen.* 1:1 and *Prov.* 8:22).

The hypostatization of wisdom led also to much philosophic complexity when, in the medieval ages, Jewish thinkers undertook the analysis of God's attributes. The whole matter of attributes was suffused with difficulty, since to speak of God as having power, for instance, implies an ontological being, power, other than God. Jewish theologians either denied positive attributes or at any rate attempted to keep them at a minimum. They found the greatest stumbling block in intellect or wisdom, because of the tradition of distinctive personality which attached to it. Wisdom they found as something outside of God, and even though it was itself created it was yet dangerously close to the Stoic concept of fate, especially since wisdom, or the Torah, served God as model in the creation of the world (*Midrash Gen.* 1:1), and He had consulted it in the process (*Pirke de Rabbi Eliezer* 3). Saadia enumerates three divine attributes, life, power and wisdom (*Emunoth Vedeoth* II, 4); Crescas is careful to point out that wisdom

was the purpose of creation (*Or Adonai,* II, vi, 4). For Maimonides, wisdom was God's very essence. (Consult, on the metaphysical aspects, Wolfson, H. A., *Philosophy of Spinoza,* vol. 1, chap. 12, section 1, pp. 400-21.)

In Jewish tradition, a scholar was called *talmid hacham,* "a disciple of the wise." A wise man learns from everyone (*Aboth* 4:1). Of ten portions of wisdom in the world, Palestine was allotted nine (*Kid.* 49b); its very air makes one wise. Wisdom is universal, whether in ancient times as the wisdom of the East (*I Kings* 5:10-11; *Jer.* 49:7) or in later days (*Ber.* 58b, which gives the form of a blessing to be said on seeing a non-Jew who has wisdom: Blessed be He Who gave of His wisdom to flesh and blood). A parent is blessed whose children are wise (*Eccl.* 4:13; *Prov.* 10:1; 15:20). The wise man seeks out wise companions (*Prov.* 13:20; 23:19-21).

WISDOM OF GOD, *see* GOD.

WISDOM LITERATURE, a type of Jewish literature which was current during the period of the Second Temple. It includes a number of Biblical books, such as *Proverbs, Job* and *Ecclesiastes,* as well as such non-canonical writings as *Sirach, Wisdom of Solomon* and *4 Maccabees.* It is the direct ancestor of the sermons and proverbial sayings of the rabbis as recorded in the Talmud and Midrash, and particularly in *Aboth* and *Aboth de Rabbi Nathan.* While it is religious literature, its emphasis is upon conduct rather than upon belief, and its goal is happiness rather than righteousness. It comprises a body of preachments designed to protect the individual from the pitfalls of life and to direct him upon proper courses. It deals with such themes as friendship, industry, education, temperance, frugality, prudence in speech and conduct, self-control and the cultivation of the wise. There is but little reference to ceremonial law, and none to deep religious emotions.

In many places in the literature wisdom is praised and even personified. Thus, in *Prov.* 8, wisdom is described as existing as "God's nurseling" before creation, and in the next chapter as a woman who has built a house with seven pillars to which she invites all to come as guests. In *Wisdom of Solomon* 7:25 wisdom is an emanation of God, and the passage in which this idea occurs is devoted to describing wisdom with all the virtues. It is true that this wisdom is inherently religious; it begins with the "fear of God," that is, with religion, and it consists of departing from that which is contrary to the teachings of God, or evil. Nevertheless, this motivation of human conduct is somewhat different from the unquestioning obedience required of the law, or the intimate relationship with God that is found in the teachings of the prophets.

The best example of Wisdom Literature is *Proverbs,* which expresses itself in terse, rhythmical sayings, prefaced by longer discourses. Both *Sirach* and *Wisdom of Solomon* follow the general style of *Proverbs,* but incline to more detailed descriptions and present a more sophisticated point of view. Many of the didactic psalms, such as *Ps.* 37, 49, and 73, have much the same ideas and expressions as the Wisdom Literature. *Job* and *Ecclesiastes* are more sceptical of the practical morality of the earlier Wisdom Literature; *Job* comes to the conclusion that real wisdom is the mystery of God, while *Ecclesiastes* challenges many of the conclusions of contemporary thought. *4 Maccabees* is an essay on the power of virtue to overcome pain and suffering. The *Letter of Aristeas* has a section devoted to the answers of the seventy sages to Ptolemy which is for the most part made up of principles of right living, in the style of the books mentioned above, and may be regarded as a part of this literature.

The question of how much the Wisdom Literature was influenced by non-Jewish thought, especially that of the Greeks, is hard to determine. While it is true that certain ideas are common to both—particularly the idea of emanation and the praise of the moderate way of life—they are found in other literatures which are not known to have any direct contact with either Jewish or Greek thought. The fact is that Wisdom Literature was the direct evolution of Biblical thought from that of the earlier Biblical literature. The prophets had stressed the idea of ethical conduct and the responsibility of the individual; the Torah had attempted to translate some of these ideals into the terms of legislation. The Wisdom Literature took the next step of trying to work out the proper way of life for the individual to follow. It was the first attempt at mass education, and hence its ideals were not always as high as that of the individual prophets whose burning zeal enabled them to endure persecution, unpopularity and suffering. It was carried away by its subject, and tended to run into fanciful speculation as to the nature of wisdom. But its main purpose, that of providing a standard for the average man, was well attained; its writings contain numerous well-turned and attractive sayings that are among the gems of Biblical and later Jewish literature.

SIMON COHEN.

Lit.: Hastings, James, edit., *Dictionary of the Bible,* vol. 4, pp. 924-28; *Jewish Encyclopedia,* vol. 12, pp. 537-38; the Biblical commentaries and the histories of religion.

WISDOM OF SOLOMON, one of the most popular of the Apocryphal books; it held a place of high esteem among the early Christian writers. Solomon is mentioned as the speaker, and the exhortation is directed to the rulers of the earth. It is a deeply religious work, stressing the idea of the God of righteousness, and expressing this belief in simple and impressive language. It is a warning against the sins that were besetting the Jews, according to the writer, at the time he lived—against ungodliness, idolatry, and sinfulness. At the same time, these warnings apply equally to non-Jews, for whatever punishment results from their wickedness will be visited upon them also.

The work falls into three parts. The first, 1 to 6:8, is an exposition of the fate that will befall the wicked, although at first they may prosper and thrive. They will not escape the judgments of God, and He will deal with them after death. Not so the righteous. Though they may suffer in this world, they will be rewarded after this life, and will have complete happiness and immortality in the life to come. This section has been called "the book of eschatology." It contains ideas which are at variance with the Hebrew Bible, and which indicate the lateness of the work.

The second section, 6:9 to 11:1, is a laudatory discourse on wisdom. Solomon tells those to whom his words are addressed that he sought wisdom above all else and, having received it, lived with it and treated it as if it were his bride. It was through wisdom that he reached such heights, and through which he will receive immortality. It was through wisdom that many of the older heroes were favored, and the people were finally rescued from captivity. The book gets its name from this section. Wisdom is the highest good—and

therefore every man should seek it. The work is reminiscent of both *Proverbs* and *Sirach*.

The third section extends from 11:2 to the end of the work. Here an altogether new subject is introduced. Holmes, in the Charles edition, calls it a "Midrash in glorification of the Jews." This part deals with the Egyptian period of the history of Israel. In this section, too, the evils of idolatry are shown, and the belief of the Hebrews and the Egyptians are contrasted. Again the writer dwells upon his idea of righteousness, and illustrates it by God's punishment of the unrighteous Egyptians and his defense of Israel. Interestingly enough, the idolatry of the Egyptians is strongly condemned, while the worship of the heavenly bodies by the Babylonians is treated with leniency, and is excused much more than that of the Egyptian idolators.

There is a difference of opinion regarding the date of the Wisdom of Solomon. It varies from that of Grimm, who places it at 145 B.C.E., its earliest date, to that of Holmes, who places it at between 50 and 30 B.C.E. for the first part, and 30 B.C.E. to 10 C.E. for the second part. The most probable date is that of Thackery, 130-100 B.C.E.

The unity of the book was disputed, and in the 18th cent. Houbigant definitely decided that the work was composite. This theory has been followed by nearly all the scholars, although there has been a difference of opinion as to just where the first part stopped or the third part began. Two scholars, Gfrorer and Grimm, regarded the work as a unity. Lincke divided the work into two parts, assigning chaps. 1 to 12:8 to a writer living in Samaria. Weber divided the work into four parts, and Kohler also regarded the work as of composite character, dividing it into three parts.

There is also a difference of opinion as to the authorship of the book. It is the belief of most scholars that the author was an Alexandrian Jew who had been influenced by the Platonic philosophy and who, like Philo, was anxious to harmonize Greek philosophy with Jewish doctrine. Kohler believes that "it is evident that these three parts, or at least the two parts (i-ix, x-xix), cannot have emanated from the same author, for neither the style nor the views can be ascribed to one and the same person." He also advances the theory that the "original Wisdom of Solomon and the Passover-Haggadah fragment in it were probably joined together and treated as one book." In view of the fact that there are a number of quotations from the Wisdom of Solomon in the writings of Paul, Kohler places the date of the work, or at least of a part of it, in the 1st cent. B.C.E.

The Wisdom of Solomon recalls a number of Biblical books, among them *Proverbs, Job* and *Ecclesiastes,* against whose philosophy of despair the author of the Wisdom of Solomon may have written his book. Scholars have also pointed out that there are influences of the Wisdom of Solomon not only upon the Epistles of Paul, but also upon *John, James, Hebrews* and *Revelation,* according to Holmes.

There have been a number of versions of the work. The oldest is Greek, although there is a considerable amount of speculation about the original's having been in Hebrew. The Latin version is the one used to a great extent by the Church Fathers. There is a Syriac version, but it is not reliable. There are also Coptic, Armenian, Arabic and Hebrew versions. The first of the latter was made by Nahmanides. There are, of course, translations in the modern languages.

There are some interesting deviations in this work from traditional Judaism, as recorded in the Bible. In the first part of the book, for example, God is conceived of as performing His work in the world not directly by Himself, but by an intermediary which He sends forth, namely, wisdom. This, of course, is a different wisdom from that of *Proverbs*. In this book the author makes wisdom omnipotent and omniscient; "she ordereth all things well." As a matter of fact, wisdom brings her reports to God, and thus He knows who the wicked are, and punishes them. Wisdom comes dangerously near being God Himself, for "all things that are either secret or manifest I learned, for she who is the artificer of all things taught me, even wisdom" (7:21-22). Here we have the indication of the later "logos" of Philo and of *John*. The whole attitude is out of line with the Hebrew Bible.

Another outstanding teaching of the book of Wisdom of Solomon is that of the Greek conception of the immortality of the soul. This, of course, is not the Biblical belief at all. Nor is the belief by the author in the future bliss of the righteous a Biblical doctrine. The Bible does not deal with the life after death of the righteous; whatever intimations are there certainly are not as definite as the teachings of Wisdom. "But the souls of the righteous are in the hand of God, and no torment shall touch them; they that trust on Him shall understand truth, and the faithful shall abide with Him in love; because grace and mercy are to His chosen, and He will graciously visit His holy ones" (3:1, 9).

There are definite traces of Platonic and Stoic influence. Some believe also that the writer was influenced by the teachings of Heraclitus, and was acquainted with the works of Xenophon. G. GEORGE FOX.

WISE, AARON, rabbi, b. Eger, Hungary, 1844; d. New York city, 1896. He was the son of Joseph Hirsch Weiss, chief rabbi of Eger, and the father of Otto Irving Wise, a lawyer of San Francisco, and of Rabbi Stephen S. Wise of New York. After having completed his education at the Eisenstadt Talmudical academy and the Universities of Leipzig and Halle, he was for several years director of schools in Eger. In 1873 he came to the United States, where he became rabbi of Beth Israel Congregation in Brooklyn. In 1875 he received a call to Temple Rodeph Sholom in New York city, where he served exactly twenty-one years until his death. Wise was one of the founders of the Jewish Theological Seminary of America and the first vice-president of its advisory board.

He founded the Rodeph Sholom Sisterhood of Personal Service, which later established the Aaron Wise Industrial School in his memory. He was an editor for some years of the *Jewish Herald* and the *Boston Hebrew Observer,* wrote a religious school textbook and a prayer-book, and assisted in the revision of Buxtorf's Hebrew lexicon.

Lit.: *American Hebrew,* April 3, 1896, pp. 632-33.

WISE, ISAAC MAYER, rabbi, pioneer of the Reform Jewish movement in America, b. Steingrub, Bohemia, 1819; d. Cincinnati, Ohio, 1900. He received his early education from his father and grandfather, and continued his studies in Prague. He was rabbi at Radnitz, Bohemia, for two years, and emigrated to the United States in 1846. He served as rabbi in Albany, N. Y., for four years and then held the pulpit of Bene Jeshurun, Cincinnati, until his death.

He was the father of Leo Wise, editor of the *American Israelite*; of Julius Wise who, under the pseudonym of Knickerdown, was a prolific contributor to the *American Israelite* and *Chicago Israelite;* and of Rabbi Jonah B. Wise; and father-in-law of Adolph S. Ochs.

Isaac M. Wise was the most outstanding American rabbi and Jew of his day. He combined many graces and types of ability. He was a forceful pulpiteer and popular public lecturer, the editor of two weekly pa-

A memorial plaque of Isaac M. Wise, by Boris Schatz

pers, the *American Israelite* in English and *Die Deborah* in German, and a prolific writer of essays and of books on Jewish history and theology. He wrote not less than ten of the latter, besides eight novels in English, three in German and two plays of which there is record. His prayer-book, *Minhag America,* and his hymn book both enjoyed wide use for many years.

Wise was president of the Hebrew Union College, which he organized (1875). He figured largely in the life of American Jews because of his ready and powerful advocacy of many important causes of a religious, public and political character. He found the Jews in America unorganized and divided into many camps, but succeeded in creating a Jewish life organized around the synagogue. His great contributions in this direction are attested by the Union of American Hebrew Congregations (1873) and the Central Conference of American Rabbis (1889). These two organizations together with the Hebrew Union College were so expressive of Jewish needs in America that they became the prototypes of similar organizations among Orthodox and Conservative Jews.

Wise's contribution to Judaism was his orientation of American Jewish life around the synagogue. He was himself a product of the liberal movement that swept the world following the French Revolution. With many others, he attempted to realize the implications of liberal thought in a Jewish way of life. While he is frequently remembered because of his bold "reforms" which were not altogether confined to the synagogue ritual, he gained distinction in the history of Judaism because he conceived the problems facing the Jews of America realistically and because he carried the implications of liberal thought to their logical conclusions. For this very reason he was, from the beginning to the end of his American career, the center of unceasing controversy.

The most outstanding concept of his world outlook was his attitude toward the United States of America. With many Jewish leaders of his day, he shared the conviction that the Almighty had appointed America to realize the dreams of Jewish prophet and sage, as set forth on the great seal of the United States: "The new order of the ages." Here was to be established a regime of freedom, equality and brotherhood. The downfall of aristocratic privilege under Thomas Jefferson, the triumph of equalitarianism under President Andrew Jackson, and the great war of emancipation under Abraham Lincoln, confirmed him in his American dream. Based on this premise, his many controversies, reforms and organizations become meaningful and unified.

He applied the doctrine of equalitarianism to the rising feminist movement, not only in political life, but in the life of the synagogue, admitting women to his religious school, to his synagogue choir, to full membership in the synagogue, and advocated their admission to the governing boards of the synagogues. He was an early advocate of family pews and even admitted women students to the Hebrew Union College.

He similarly favored equality in Jewish education. In this he did not depart from ancient Jewish tradition which had its roots in many forms of equalitarianism long practiced in Jewish life. His literary labors, including his popular magazines, were largely devoted to educational ends. "The lack of schools and textbooks" is a recurrent criticism in his writings to the cure of which he devoted himself assiduously.

The problem of devising a way of Jewish religious life that would meet the requirements of the liberal outlook and which would match the liberalism which the Jew demanded of the world at large intrigued him. He thundered at the unesthetic practices of the *hazanim* (cantors), the diversity of *minhagim* (rituals) adhered to with superstitious zeal, the obscurantism that placed symbol above deed. He strove for the *mitzvoth* of the moral life. Ethical monotheism expressed for him the genius of the Reform Movement.

The battle of liberalism extended beyond the synagogue for Isaac M. Wise. He realized that not only did the Jew, by his religious practices, have to contribute to making the world safe for Judaism, but that the experiment of democracy was not to yield to the reactionary forces of autocracy and authoritarianism. Democracy, in his day, was under attack upon a wide sector in the United States. The reading of the Bible in the public schools was a recurrent problem; it was frequently stopped and as frequently resumed. Laws declaring certain Christian religious days as public holidays were frequently proposed. Many state governors habitually based their Thanksgiving proclamations on the assumption that the United States was a Christian nation. Many proposals were made to insert a religious qualification in the national constitution. During the Civil War there was an attempt to keep Catholic and Jewish chaplains out of the Union Army, of which the well-known U. S. Grant Order No. 11 was a faint echo. Every reactionary movement was an anvil for his ably wielded hammer.

Two instances of public action are worthy of mention. One was the successful campaign waged, by Wise and others, for the rejection of the proposed Swiss treaty which limited the rights of American Jews living in Switzerland, and the other was the public agitation, begun as early as 1879, for the abrogation of the treaty with Russia which condoned similar unequal treatment of American Jews in Russia. This agitation was brought to a successful issue in the abrogation of the Russian treaty eleven years after Wise's death.

Wise's opposition to the rising Zionist movement was of a piece with his world outlook. At the meeting of the Central Conference of American Rabbis in Montreal in 1897 he expressly stated that he sympathized with the oppressed Jews of Eastern Europe who longed for a place where their families could be redeemed morally and physically. What he objected to was not the restoration of Zion to the Jews who wanted to live there, but the restoration of the Jews to Zion. True to his liberal philosophy, he also realized that nationalism had run its course and that the world was

© Union of American Hebrew Congregations
Isaac M. Wise

ready for internationalism. He dreamed of a symphony of nationalities, shorn of their sovereign assumptions and amenable to international rule.

Wise's "Judaism" was based upon a hopeful synthesis of the best in Jewish tradition and the best in Western culture. The yardstick whereby he measured the value of any particular "reform" was not its temporary appeal, but its lasting value for the preservation of Judaism. He abandoned the Orthodox security of revelation and sought the security that arises from the courage to recognize truth wherever found. He did not strive for finality in any form, realizing that the capacity for growth is the best guarantee of the truth. The gravamen of his reforms was, in his own words, "the planless character" of Jewish life of his day. He pleaded for "the standpoint of historic Judaism, that is, Judaism of all ages and not that of one period, place or class of people." Preserving Judaism meant for Wise, not that he had found a perfect Judaism which was henceforth to become a new orthodoxy; nor did it mean the restoration of Judaism to its Palestinian national glory, nor again to its medieval splendor, Judaism under the *Shulhan Aruch*. For him it meant carrying forward Judaism's enduring values to a new and better social order. His labors were based upon the conviction that the important measure of any movement lies not in its temporary success but in the direction in which it points.

His definition of American Judaism was "a religion without mysteries or miracles, rational and self-evident, eminently human, universal, liberal and progressive, in perfect harmony with modern science, criticism and philosophy, and in full sympathy with universal liberty, equality, justice and charity. There are today no better American citizens than the Jews, and no religion better befitting a free people than Judaism." GEORGE ZEPIN.

WISE, JAMES WATERMAN, writer, b. Portland, Ore., 1901. He was the son of Rabbi Stephen S. Wise and Louise Waterman Wise, and the brother of Judge Justine Wise Polier. His education was received at the Horace Mann School in New York city, the Loomis Institute at Windsor, Conn., and Columbia College, from which he received the A.B. degree in 1922. He pursued graduate studies at Cambridge, England.

In 1926, after studying for several years for the rabbinate at the Jewish Institute of Religion, in New York, and serving for two years as rabbi of the Reform Jewish congregation of White Plains, N. Y., Wise withdrew from the Institute on the ground that "Judaism, as a religion, has ceased to play a vital part in Jewish life."

Wise stated that, while Jews still had distinctive contributions to make to the world, they no longer wished to express themselves through traditional Jewish theology, and that he therefore felt compelled to renounce the rabbinate. Wise's views were published widely at the time, and they aroused a great deal of controversy in the Anglo-Jewish press of the United States. He later modified his views.

Wise served as secretary of the Jewish section of the Interfaith Committee to Aid the Democracies (1941-42), and in 1942 became the Washington representative of the American Jewish Congress. From 1938 on he was research director of the Council Against Intolerance in America. In 1931 he founded *Opinion,* at first a weekly, then a monthly, Jewish journal of life and letters. His eloquent voice was heard on public platforms throughout the United States in defense of Jewish rights and in championship of liberal and democratic ideals.

His articles appeared in the *Century Magazine, Bookman, Unity, The New Palestine, Churchman, The Nation,* and the New York *Post.* His books include: *Liberalizing Liberal Judaism* (1924); *The Future of Israel* (1926); *Jews Are Like That* (1928). Issued under the pseudonym of Analyticus, the latter work aroused a storm of protest and created a great sensation at the time, and was violently condemned by many writers in the Anglo-Jewish press and by rabbis in the pulpit. It discusses Jewishness and Jewish leadership, and contains essays on such outstanding American Jewish leaders as Stephen S. Wise, Louis Marshall, Louis D. Brandeis, Louis Lipsky, Nathan Straus, Sr., Henry Morgenthau, Sr., and Ludwig Lewisohn. Wise also wrote *Swastika: The Nazi Terror* (1933); *Nazism: An Assault on Civilization* (1934), and was co-author, with Rabbi Lee J. Levinger, of *Mr. Smith, Meet Mr. Cohen,* a work which preaches tolerance, and editor (1941) of *Our Bill of Rights: What It Means to Me* and *Thomas Jefferson: Then and Now* (1943). EDWARD E. KLEIN.

WISE, JONAH BONDI, rabbi, b. Cincinnati, 1881. He was the son of Isaac Mayer Wise. Graduated from the University of Cincinnati and the Hebrew Union College in 1903, Wise spent a year studying abroad, and in 1904 assumed the pulpit of Mizpah Temple, in Chattanooga, Tenn. Here he remained until 1906, when he became rabbi of Beth Israel Temple, in Portland, Ore.

During his nineteen years in Portland Wise was active not only in Jewish religious and community work, but also in the social and cultural activities of the community as a

whole. He was one of the founders of the Oregon Social Hygiene Society, and held directive posts with the Portland Symphony Orchestra and the Oregon State Board of Higher Curricula and the Library Board of Portland. He was grand president of District Grand Lodge No. 4, I.O.B.B.

Called to Central Synagogue in New York city in 1925, Wise entered the communal life of the metropolis only a few years before the demands for concerted action on behalf of the Jewish populations of other countries reached a condition of emergency not hitherto known. In this emergency, Wise's association was mostly with the Joint Distribution Committee, to whose executive committee he was elected in 1931. He had already participated in its fund-raising campaigns. From 1931 through 1938 Wise was national chairman of the Joint Distribution Committee campaigns. Almost single-handed he maintained a steady flow of funds to Polish Jewry, Palestine, and other Joint Distribution Committee beneficiaries. With the establishment of the United Jewish Appeal for refugees, overseas needs and Palestine, in 1939, Wise became a national chairman, and held this post in 1943.

Wise went to Europe three times on special missions in connection with welfare work. He arrived in Germany in April, 1933, only two months after the advent of Hitler, to confer with the leaders of German Jewry and to arrange for the transmission of necessary aid. He was in Europe again in 1935 for various conferences, in England, France, Belgium, Holland and Germany, and in 1938, when he represented the Joint Distribution Committee at the Intergovernmental Refugee Conference held in Evian, France, at the call of President Franklin D. Roosevelt. Through his efforts for the Committee and for its various affiliated organizations, Wise became the most important single personality responsible for the raising of the relief funds that came from America.

Wise was editor of *The Scribe* and of *The American Israelite,* and was a contributor to other Jewish periodicals. His chief activity, however, was in the pulpit. While his prestige was used for the relief of Jewish suffering abroad, his congregational program was even more significant. He instituted the first and, up to 1943, the only national weekly radio broadcast of Jewish preaching. The "Message of Israel" was founded by him in 1934 as a weekly broadcast and the "Church of the Air" monthly sermon. These broadcasts were open to members of Reform, Orthodox and Conservative groups and, in 1943, were the only weekly Jewish religious broadcasts of national scope in America or any other country.

Wise was known for his interest in Jewish bibliography, inheriting a library from his grandfather, Jonas Bondi, and from his father. He not only enlarged this library but maintained a close connection with Jewish bibliographical material.

He was a trustee of the Hebrew Union College and a director of the Union of American Hebrew Congregations. He was a director of the Jewish Social Service Association and of the Educational Alliance in New York city, in addition to holding directorships in a large number of other national and local religious and social institutions. In 1935 the Hebrew Union College awarded him the honorary degree of Doctor of Hebrew Law.

WISE, LEO, editor and publisher, b. Albany, N. Y., 1849; d. Cincinnati, 1933. He was the eldest son of Isaac Mayer Wise. He studied law at first, and was graduated from the University of Michigan (LL.B., 1869), but never practised it. In 1871 to 1872 he was

Jonah B. Wise

a prospector in the South African diamond fields, where he helped discover some of the mines there. In 1875 he returned to the United States and was associated with *Deborah* and *The American Israelite,* both founded by his father. He was publisher of the former until 1890 and managing editor and publisher of the latter from 1900 to 1928. He was at the same time publisher of the *American Jews' Annual,* a yearly publication devoted to literature and belletristics, from 1884 to 1892.

Wise went to Washington several times to protest against Russian exclusion of American Jews who desired to visit that country, and in 1882 was one of those who actively aided the settlement of a group of about 150 immigrant Jews on Kansas farm lands.

WISE, LOUISE WATERMAN, artist and social worker, b. New York city. She was the daughter of Julius Waterman and Justine Mayer, and the niece of Dr. Sigmund Waterman and Leopold Waterman, distinguished early settlers. She was the wife of Rabbi

Leo Wise

Stephen S. Wise, and the mother of James Waterman Wise and of Judge Justine Wise Polier. Mrs. Wise's education was received in the public schools, the Comstock School, and the Art Student's League.

Her portraits of Judge Julian W. Mack and Rabbi Stephen S. Wise were placed in the permanent collection of the Tel-Aviv Museum in Palestine, and Columbia University included her portrait of Professor Richard J. H. Gottheil in its permanent collection. Her paintings include also: *Orphanage; Flight from Belgium; Crucifixion; Sacrifice of Abraham;* and portraits of Claude G. Montefiore, Dr. Charles Parkhurst, Dr. James Whiton, and Professor Albert Einstein. Her work was exhibited at the Pennsylvania Academy of Fine Arts, the National Association of Women Painters and Sculptors, the Corcoran Gallery, and galleries in New York city.

Mrs. Wise translated into English from the French Aimé Pallière's well-known study of his conversion to Judaism, *Le sanctuaire inconnu,* under the title of *The Unknown Sanctuary* (New York, 1928), and made available to the American public through her translations from the French Edmond Fleg's *Land of Promise* (1933) and *Why I Am a Jew* (New York, 1929).

In 1902 she founded the Free Nurses Association of Portland, Ore., and thereafter served as its honorary president. She was the founder and in 1943 served as president of the Free Synagogue Child Adoption Committee. Her work as founder and president of the Women's Division of the American Jewish Congress won her a permanent place of honor in American Jewish life. Thousands of refugees owed their adjustment to America and their new lease on life to Mrs. Wise's efforts as founder and president of the Congress House for Refugees, in New York city.

(*See illustration in vol. 1, p. 251*)

EDWARD E. KLEIN.

WISE, STEPHEN SAMUEL, rabbi, b. Budapest, 1874. He was the descendant of a distinguished family of European rabbis. His grandfather was the renowned Joseph Hirsch Weiss of Erlau, Hungary; his father, Aaron Wise, migrated to the United States and served as rabbi of Temple Rodeph Sholom, New York city, from 1875 until his death in 1896.

Wise was brought to the United States at the age of one. He completed his studies at Columbia University, in New York (A.B., 1892; Ph.D., 1901). His rabbinical training was secured privately, chiefly under the instruction of his father, Max L. Margolis, Gustav Gottheil, Alexander Kohut, Henry Gersoni, Adolf Neubauer of Oxford, and Chief Rabbi Adolf Jellinek, of Vienna.

His first pastorate was the Madison Avenue Synagogue of New York, where he served from 1893 to 1900, serving first as junior assistant to Henry S. Jacobs, rabbi of the synagogue. Then he became rabbi of Temple Beth Israel, Portland, Ore., where he ministered until 1906. Active in social welfare, Wise was a founder and first vice-president of the Oregon State Conference of Charities and Corrections, and a member of the state's Child Labor Commission.

In 1906 he was invited to discuss a call to the pulpit of Temple Emanuel, New York city, considered the most influential congregation in America. A dispute over the freedom of the pulpit arose between him and Louis Marshall, president of the congregation. Wise insisted upon absolute freedom of utterance; Marshall maintained that in controversial matters the pulpit must remain under the control of the board of trustees. Wise thereupon resigned from his post in Portland, and returned to New York to found in 1907 the Free Synagogue, of which he was still rabbi in 1943.

Stephen S. Wise. From a photograph by Halsman

The Synagogue was established on the cardinal principles, as announced by its founder, of complete freedom of expression for the rabbi and free unassigned pews. The latter represented a contribution to the democratization of the American synagogue. For previously the general practice had been the sale of fixed pews, which favored the wealthy. Subsequently many congregations adopted the unassigned pew system which opened all seats to all worshippers regardless of financial contribution.

The degree of freedom in the pulpit had reflected the strength of the rabbi and the liberalism of the congregation. By making a public issue of pulpit freedom, Wise helped to strengthen the liberal forces in American Judaism.

Under his dynamic leadership the Free Synagogue developed into one of the most influential congregations in American Jewry. Sunday services were instituted at Carnegie Hall, which frequently was filled with vast congregations, eager to hear Wise on the burning issues of American and Jewish life. Considered one of the most eloquent preachers in America, he was in great demand as a lecturer by general as well as Jewish audiences throughout the country. His popular appeal was heightened by involvement in important public controversies, such as his attack on the injustices in the steel industry, his championing of a shorter work week for women employees in the canning industry, and his denunciation of the evils in the exploited needle trades.

With John Haynes Holmes, he led the City Affairs Committee of New York in an attack on the administration of Mayor James J. Walker which ultimately brought about its downfall. His courage and eloquence kept him in the forefront of progressive movements in American life.

He was at the heart of the Zionist Movement and active in its leadership from his participation in the Second Zionist Congress, in which he served as Eng-

lish secretary. He was a founder of the Zionist Organization of America in 1898, and later (1917 and 1936-38) served as its president; also as chairman of the United Palestine Appeal. He represented Zionist interests at the Versailles Peace Conference. With Justice Louis D. Brandeis and Judge Julian W. Mack, he withdrew from active leadership over differences with Chaim Weizmann, but after a lapse returned to the front ranks. He influenced many important Jews and Christians toward sympathetic understanding of Zionism, of whom President Woodrow Wilson was the most notable. He was chairman of the American Emergency Committee for Zionist Affairs in the early 1940's.

Wise's attachment to the Jewish masses and his faith in the principles of democracy moved him to assume leadership in the establishment of the American Jewish Congress. At various times he served as president of this organization, which was intended to apply the principles of democratic representative institutions to the needs, problems and rights of the Jewish people. He served as a representative of this organization at the Versailles Peace Conference, and subsequently was an organizer of the World Jewish Congress, and chairman of its executive committee. He led these bodies in a militant program of self-defense against Hitlerism.

In 1922 Wise founded the Jewish Institute of Religion, a school for the training of men for the Jewish ministry and for leadership in Jewish education and social service. The establishment of this new institution was evoked, according to its founder, by two significant needs of American Jewry: first, a liberal rabbinical seminary devoted not to sectarian purposes but to the catholic interests of Jewish life. The Institute met this need by welcoming as teachers and students men and women of diverse viewpoints, Orthodox, Conservative, Reform, Reconstructionist, Zionist, non-Zionist, and the like, and its graduates serve a similar diversity of congregations and institutions. Its second purpose was to provide liberal rabbinic leadership for the New York area, containing over two million Jews, the largest and most influential Jewish community in America and in all Jewish history. Scores of its graduates occupied (1943) positions of leadership in this metropolitan area.

Among the many honors conferred on Wise were the Chevalier of the Légion d'Honneur (France), 1919; Officier, 1937; the first award in 1926 by Zeta Beta Tau of the Richard Gottheil medal "for the most distinguished service in the cause of Judaism during the year 1925"; and honorary degrees by Temple University, Syracuse University, University of Oregon, Bates College, Roanoke College, and Rollins College.

In 1931 Wise joined the editorial board of the magazine *Opinion,* a monthly journal of Jewish life and letters, of which he became the editor in 1935. He is the author of *The Improvement of the Moral Qualities* (1902); *How to Face Life* (1917); *Child Versus Parent* (1922); *The Free Synagogue Pulpit* (monthly sermon publications, 10 vols.); *The Beth Israel Pulpit* (monthly sermon publications, 2 vols.); and *The Great Betrayal* (jointly with Jacob de Haas; 1930). He edited the symposium *Never Again! Ten Years of Hitler* (1943).

In 1943 Wise celebrated the fiftieth anniversary of his ministry, and received from the Free Synagogue a leave of absence for the duration of the second World War to devote himself to his wider Jewish and American interests.

WISLICKI, WACLAW, member of the Polish parliament (Sejm), b. Warsaw, Poland, 1882; d. Warsaw, 1935. During his high school years in Warsaw he took part in the revolutionary movement of the students then organized in revolutionary circles. In 1907 he graduated from the University of Brussels. During his studies in Belgium he was closely associated with the Russian and Polish revolutionary circles composed of émigrés who had escaped from czarist Russia. Immediately after his return to Warsaw he was jailed, but soon afterward went into exile for two years, after which time he returned to take part in the social life of Poland. His career as an outstanding social and political Jewish representative was initiated when, during the German occupation of Warsaw, he assumed the responsible honorary post of commissar of the citizen guard of Warsaw and commissar of the militia. In this capacity he showed himself to be an advocate of the needs of the poor of Warsaw.

In 1922 Wislicki was elected a member of the Sejm as representative of the Central Union of Merchants and Industrialists. He held this office for fourteen years, having been reelected in 1928, 1930 and 1935. As Jewish representative in the Polish Sejm he was one of its most active members, defending in true democratic spirit the free development of Polish economic life and the equality of rights of the Polish citizens of Jewish faith. Besides these activities, he was a member of several governmental and parliamentary commissions, a member of the Interparliamentary Union, and a delegate of the Polish parliament to various international congresses.

Above all, Wislicki was a stalwart and fearless advocate of the Jewish cause in public life. He made it his task to defend the rights of the business class in all the various public and social agencies in which he exercised a great influence.

He was president of the Central Union of Merchants in Poland, senior of the office of aldermen of the Merchants' Assembly, vice-president of the Chamber of Commerce of Warsaw, member of the council of the Polish-Palestinian Chamber of Commerce, president of the Credit Bank of Merchants and Manufacturers, chairman of the International Association of Transport and Navigation, member of the council of the Central Union of Jewish Cooperatives, and member of many governmental commissions on Polish national economy.

With fiery energy and dauntless courage he manifested his affection and attachment to the Jewish community. When anti-Jewish disturbances took place in Roumania in 1934, he returned to the king of Roumania the Cross of the High Order of the Roumanian Kingdom which he had received.

Shortly before his death, as chairman of the Anti-Hitler Committee, Wislicki waged a tremendous fight and boycott against the Nazis. The Polish government exerted pressure on him to discontinue these activities for political reasons, and threatened him with dire consequences, but Wislicki ignored all these warnings and continued with greater force his propaganda against the Nazi regime.

ALEXANDER HAFFTKA.

WISSOTZKY, KALONYMUS ZEEB WOLF, tradesman and philanthropist, b. Zhagory, province of Kovno, Russia, 1824; d. Moscow, 1904. He received the usual Jewish education. After his marriage he attended the Yeshivas in Volozhin. Later he settled in Yanishki,

and began to trade in wheat. The Russian government at this time was patronizing Jewish agricultural settlements, and Wissotzky, together with other Jewish families, founded the settlement of Dubno, near Dvinsk. This undertaking yielded no beneficial results, and Wissotzky returned to his wheat business in Yanishki. But he wanted to complete his education, and in 1854 attended the famous courses in Jewish religion and philosophy given by Israel Salanter (Lipkin) in Kovno. In 1858 he settled definitively in Moscow and engaged in the tea trade. The firm of V. Wissotzky and Company developed into one of the most important tea-trading companies in Russia.

The increase in his business did not, however, prevent Wissotzky from undertaking a large philanthropic Jewish national activity. An enthusiastic Zionist and one of the first pioneers of the movement in Russia, he spent much time and money for the organization of the Chovevei Zion. His journey to Palestine gave him the occasion to publish (1889 and 1894) his letters and travel diary in the periodical *Haasif*. He also founded, at his expense and on the advice of his son-in-law, Joseph Zetlin, the periodical *Hashiloah*. He made generous gifts to Palestine organizations, particularly the sum of 200,000 rubles for the establishment and support of the Beth Hasefer in Jaffa. This institution was founded by the Hilfsverein der Deutschen Juden in Berlin, and a conflict arose between the Hilfsverein and the executors of Wissotzky's will as regards the use of the German language in teaching at the school. But all Jewish professional education in Russia attracted his attention. A Talmud Torah with technical classes was established in Bialystok in 1904 through a gift of 70,000 rubles by Wissotzky. In his will he ordered that his heirs should spend 50,000 rubles every year until the sum of 1,000,000 rubles had been expended for Jewish charity.

The executors of his will had to decide how to distribute this money. One of his most substantial philanthropic activities was help for the Jewish cantonists, sons of Jewish soldiers who were educated in special schools and prepared for military service from the age of twelve years. Wissotzky organized Sabbath schools and readings for those children, and also special meals for Jewish soldiers during Passover. In this way he endeavored to keep them from conversion to the Greek Orthodox Church, an activity which was not without danger under the government of the czars.

Lit.: *Ahiasaf* (1904-5); *Hatzofeh,* 410 and 415 (1904); *Derech Tzedakah* (a symposium in honor of Wissotzky's jubilee); *Haasif,* 1894 and 1898-99; *Igroth Yelag* (letters of Judah Loeb Gordon to Wissotzky on Zionism; 1894-95).

David Wissotzky (b. Moscow, 1855; d. Paris, 1929) was the only son of Kalonymus Zeeb Wolf Wissotzky. He received a German education. After the death of his father in 1904, David became head of the tea firm of V. Wissotzky and Company. Under his leadership the company attained its highest development, furnishing one-third (about 40,000,000 lbs. a year) of the entire tea consumption in Russia. Wissotzky was the first to import Ceylon tea to Russia, from large plantations which he owned in India. Pursuing the traditions of his father, he was engaged in large-scale philanthropic work.

Samuel L. Kutscheroff.

WIT AND HUMOR, JEWISH. 1. General. The wit and humor of the Jews are age-old and were present at all times, so that the gift of glossing over in humorous manner and of ironizing about the various forms and expressions of being or of recognizing their comical side may be forthwith asserted to be an essential characteristic of the Jews. Jewish wit and humor have fructified the literatures of all peoples. In their enduring manifestations they avoid the mere humor of words and situations and often, while illuminating philosophical observations ingeniously, they reach deep into the soul. They are always benevolent, never rough or hateful. Edmund Edel sees the specific sign of Jewish wit in irony of oneself and elegy, a result of the tragic fortunes of the Jews, destinies which, on the other hand, have sharpened Jewish wit as the strongest weapon of the weaker, while Alexander Moszkowski praises the thoughtful keenness of Jewish humor and proves that all the philosophical problems of humanity have experienced in Jewish wit some lightning-like illumination. Moszkowski arrives at this conclusion: "Jewish wit is the foundation and pinnacle of all wit in general."

That wit and humor have been component parts of the Jewish spirit at all times has been proved repeatedly. In the Bible, in the Talmud, and in the Midrash the humor of words plays an important role.

When Jacob utilizes Esau's pressing hunger in order to get possession of the latter's birthright (*Gen.* 25:29-34); when he disguises himself in order to gain through his wiles, in addition, the blessing of Isaac which was intended for Esau (*Gen.* 27); when he then employs trickery to cheat Laban of his riches (*Gen.* 30:31-43); when Rachel in a gross scene steals and hides her father's household gods (*Gen.* 31:19, 30-35); when Samson plays tricks like those of Eulenspiegel (*Judges* 13 to 16); when the prophet Elijah taunts the priests of Baal with incomparable humor (*I Kings* 18:27); when one feels oneself transported to the dressing-table of an elegant lady by Isaiah's scourging of the gorgeous display of the women of Judah (*Isa.* 3:18-26); when one believes that one is reading a chapter from Dante's *Divine Comedy* in the description of the appearance of Nebuchadrezzar in the lower world (*Isa.* 14:9-21); when the prophet makes merry over the artistic carpenter who has carved a god for himself out of a block of wood, the rest of which he uses for preparing his food (*Isa.* 44:13-17); when Hosea waxes ironical over the idolators "who sacrifice men and kiss calves" (*Hosea* 13:2); when *Esther* is full of surprising sudden changes of the situation (for instance, the minister Haman as herald before Mordecai the Jew)—the hearers or readers laugh over these popular tales, in which many humorous elements are present even as they appear in other literatures. The humorous passages in the Bible have been collected by B. Werner and above all by J. Chotzner, among others.

Wit and humor are very strongly represented in the discussions of the Talmud and in the Midrash. Libowitz has collected the pertinent material. In view of the casuistical peculiarity of the Talmudical discussions it was always easy for the very acute distinction and comparison of related and similar elements to be jokingly exaggerated. The wish to enliven an all too long sober debate by means of a humorous turn, to bring a difficult abstract subject nearer to general understanding by means of a joking allusion, or to polish off the opponent by turning the laugh against him led frequently to a humorous turn of the dialogue. Many digressions of Talmudic dialectics and phantasy which, if taken earnestly, would be considered as silly and thus dismissed without further ado, are seen in another light if one thinks of them as being consciously humorous or as a purposeful means of leading daring assertions or discussions ad absurdum. Finally, the constant exercise in playing with conceptual subjects, in drawing paradoxical possibilities into consideration,

in parrying the opponent's thrusts rapidly, surely, and by means of surprising objections, must have trained their continual readiness for attack and defense gradually so that it developed into that critical quickness at repartee which is so closely related to wit and has remained a specific peculiarity of the Jewish spirit.

How well the Talmud itself understands how to appreciate the value of a fitting answer is shown by the oft-quoted proverb: "Better a grain of pepper than a basket full of pumpkins" (*Meg.* 7a; *Hag.* 10a; *Yoma* 85b). For the purpose of illustrating the Talmudic and Midrashic wit, which for the most part is very pertinent, often biting and also wounding, a number of striking humorous sayings are given here, further examples of which could be heaped up without difficulty, together with short explanations wherever necessary. No account has been taken of the numberless and often quite ingenious plays on words, which are not always to be taken in jest, but were often intended scientifically in the sense of those days:

FROM THE TALMUD.

"Instead of breaking bones at Abaye's, come rather to Raba, in order to eat fat meat" (*B.B.* 22a); at Raba's you will learn more than at Abaye's.

"Only small change rattles in the pocket" (*B.M.* 85b); only he who has but little knowledge tries to shine through it.

"The table is there, also the meat and the water; we lack only the mouth in order to be able to eat" (*Kid.* 46a).

"If any one says to you: 'Your friend is dead,' believe it; if he says to you: 'He has become rich,' believe it not" (*Git.* 30b); dying is easier than getting rich.

"Audacity is effective even with God" (*Sanh.* 105a).

"When the thief lacks opportunity he is condemned to honesty" (*Sanh.* 22a).

"The best doctor belongs in hell" (*Kid.* 82a).

"While we still loved each other, we had room on the width of a sword; now that love is flown, a bed sixty ells wide is insufficient for us" (*Sanh.* 7a).

"The robber knows his own handiwork" (*B.M.* 84a), said jokingly by Rabbi Johanan to Resh Lakish when the latter defeated him in a legal dispute concerning the making of weapons.

"Art thou perhaps from Pumbeditha, where they draw an elephant through the eye of a needle?" (*B.M.* 38b), against the overly acute interpreters of the Law.

"At Purim one is obliged to drink so much that one can no longer tell the difference between 'Cursed be Haman!' and 'Blessed be Mordecai!' " (*Meg.* 7b).

"Against foolishness there is no remedy" (*Git.* 68b).

"Ten measures of talk came into the world; the women took nine of them" (*Kid.* 49b).

FROM THE MIDRASH.

"If thou wilt hang thyself, do it on a high tree" (*Pesikta* 112).

"The pig spreads out its paws, as though to say: 'See! I am clean' " (*Midrash Gen.* 65).

"The milk of black goats is the same as that of white goats" (*Midrash Gen.* 83).

"If one can not beat the ass, one beats the saddle" (*Tanhuma, Pekude*).

In the brilliant days of medieval Jewish literature humorous poetry was well represented: Solomon ibn Gabirol, Abraham ibn Ezra, Judah Halevi, Judah Alharizi, and Immanuel ben Solomon of Rome wrote humorous poems.

In the Diaspora, Jewish humor was everywhere blended with the literature of the environment, and where a union such as that in Germany took place it created permanent values. Heine's humoristic travel-pictures and Börne's satirical criticisms became recognized treasures of German literature, while the specially Jewish humorous novels of a contemporary and cousin of Heine's, Hermann Schiff (*Schief Levinche* and *Die Wilde Rebbizin*) or the witty mockeries of the reactionary period of 1848 in the droll public notices of Isaac Moses Hersch were forgotten.

In the creation of Berlin wit and of the Berlin local farce of the 19th cent., which Voigt and Koch pronounce the "truest German humor," Jewish authors collaborated in a fundamental way. Ludwig and David Kalisch (1820-72), who founded also the humorous sheet *Kladderadatsch,* and Louis Hermann were the most fruitful authors of comic plays at that time, and their works were performed for many years. Even in a hasty glance over the entire humorous literature of the more modern period one encounters Jewish authors again and again, and their humor was and still is understood and sympathized with by every one; it found and still finds everywhere the most active re-echo. The successors of those Jewish authors towards the end of the 19th cent. were Julius Stettenheim (1831-1916), Siegmund Haber (1835-95), and R. Löwenstein (1819-91). In the 20th cent. Jewish authors of farces, like Oskar Blumenthal, Gustav Kadelburg (*Weisses Rössl*), and Justinus (*Kyritz-Pyritz*) attained to an extraordinarily high number of performances. In the editorship of the most important comic papers of the 20th cent. Jewish editors and artists occupied a leading position. Alexander Moszkowski was for almost a half a century the manager of the Berlin *Lustige Blätter,* Karl Ettlinger (Karlchen) editor-in-chief of the Munich *Jugend,* and Alfred Kerr (Kempner) was one of the wittiest critics.

Like the Berlin humor, that of Vienna was strongly influenced by the Jewish spirit. Saphir (1795-1858) is the prototype of the mere would-be-players with words; but the feuilletons collected by Daniel Spitzer contain brilliant flashes of thought and are classics of their kind. Nearly all the important Austrian poets of Jewish origin, for instance, Felix Salten and Arthur Schnitzler, have a specific Jewish humor. The Vienna satirist, Karl Kraus, is well worth mentioning in this connection.

On the stage Jewish humor has constantly been triumphant. To mention only a few of the most noted names, the excessively comic Bendix, a very popular comedian in Berlin, and the once celebrated Metropol-Theater artists, Emil Thomas and Henry Bender, who never fell prey to the banalities and triteness of the flat, so-called "Herrnfeld humor," were Jews. Daniel Isaac Barber in London, the best known humorist of the English stage, was the son of Eastern European refugees.

In very remarkable manner, too, it is the Jewish actors who at the same time were active both as great humorists and as tragedians. Rudolph Schildkraut and Max Pallenberg unite in themselves these two sides of their being, and the world-wide success of the modern Jewish film celebrity, Charles Chaplin, who was also a child of the London ghetto, rests on the inimitable mixture of enlivening and deeply moving traits.

An especial development was experienced by the history of humor among the Eastern European Jews, among whom the Jewish essence has been preserved with less mixture and in a more unadulterated form than in the Western European lands. The extraordinary sociological confinement and oppression of these groups of the population, a confinement and oppression, however, which stoutly resisted a spiritual assimilation, did not prevent, but on the contrary definitely furthered, the bringing forth by them of a great number of historically certified buffoons and Till Eulenspiegel-like personalities whose knavish tricks, deeply humorous expressions, and witty anecdotes were passed on from one generation to another. The most important of these humorists, Motke Chabad of Vilna, whose name has become proverbial among Eastern European Jews, Hersch Ostropoler, Mordche Rackower of Plock, Ephraim Greidinger of Pinczov, lived in the 18th cent. Their merry farces and sayings and those of their successors have often been collected. The town of Chelm, concerning which innumerable jokes are told, was regarded as a kind of Jewish Schilda. A parallel between the oft-printed little pieces of the "Chelmer Narronim" and those of the Schildbürgers shows, again,

that the Jews have the advantage of a deeper content and are richer in ideas, both of which features are lacking in the Schildbürgers. A type of those tragi-comical Eastern Jewish jokers who are endowed with genial traits was sketched by Karl Emil Franzos in his novel, *Der Pojaz*. The humor of the Eastern European poets Sholem Alechem, Perez, Mendele Mocher Sforim, and also the Englishman Israel Zangwill, is elegiac.

A typology of Jewish wit has to demarcate the ever-repeated figures and realms. First, therefore, we see the most prominent characteristic of Jewish humor: self-irony. The Jews of Western lands mock above all, in innumerable jokes, all the little linguistical peculiarities, the cunning mercantile tricks, the narrow-mindedness and caricature-like traits of the Eastern European Jew and of the immigrant who has not yet been assimilated into the general culture. Satirical blows meet the rich *Protz* as well as the cheeky *Schnorrer*, who earns his livelihood in a most ignoble way. The relations within the family and the sphere of marriage and the Shadhan are the subjects of an almost tender humor. It shows how closely the connection of the members of the family is felt. The jokes which refer to sexual life are in general free from the cynicism of the street. Jokes about non-Jewish officers and about travelers, as well as railway and customs anecdotes are especially prized. The humor of the stock-exchange and that taken from the life of the merchant, especially in the textile branches, naturally fills a large space. Jokes about rabbis, presidents of congregations, religious officials and their activities, are numerous. A full measure of ridicule is poured out upon the "renegade" and the "baptized" Jew whose strivings for complete assimilation are unsuccessful. False piety as well as the too strict guarding of one's own advantage are hit from all directions; herein a certain rationalism and individualism often comes to view. The inclination of the Jew toward eating choice things and his preference for a number of favorite dishes form the target for many a joke. Interesting from the point of view of the knowledge of the folk are words which are put into the mouths of the Eastern European Jews, words which embody the feeling of union with God, a feeling which has been traditional for centuries and which is still present in the Jewish soul, as, for example, that Jewish pious ejaculation: "Great God, help me! Thou hast pity on total strangers, so why not on me?" . . .

Many of these jokes are very ancient, resting on tradition, and appear in ever new variations; the tenacity of life of Jewish wit is almost boundless. The Jewish spirit glosses over the times with ever new humor. Its peculiar contrast, the psychologically deepened comprehension of a situation, the lightning-like appreciation of relationships, the embracing of entirely different spheres which is mixed with readiness of wit and subtlety and which often dies away in a striking point, is, apart from its inimitability, difficult to stamp from a stylistic point of view. Thus many kinds of witty turns in Yiddish too are simply untranslatable.

JACOB PINCHAS KOHN and LUDWIG DAVIDSOHN.

2. Parody and Satire. Parody and satire are two distinct branches of Jewish humor, although they are very often found combined in the same work. In parody the style, form and diction of sacred or serious writings are imitated. The writings most frequently parodied in Jewish literature are the Bible, the Talmud, the liturgy and various legal formulas. The use of Biblical phraseology to express various ideas is already found in the Talmud (*Yer. Pes.* 3:7) and the rabbis objected only when the Bible was parodied disrespectfully or to express improper ideas (*Sanh.* 101a).

Satire is usually directed against individuals, groups or institutions. As a rule scoffing or sneering was condemned (*Ps.* 1:1; *Meg.* 28a; *A.Z.* 18b). Bar Kappara, a great Tannaitic scholar and wit, once excommunicated himself for thirty days in remorse over a remark of his which could have been interpreted as an affront to Judah Hanasi (*M.K.* 16a). However, the rabbis themselves employed biting satire and irony in their disputes with idolators and unbelievers.

Jewish parodies and satires have been composed in many languages: Hebrew, Yiddish, German, English and Ladino. Those composed in the Middle Ages were usually in Hebrew rhymed prose or poetry. One of the earliest parodists and satirists was Judah Alharizi in the 13th cent. Thus, in the tenth chapter of his *Tahkemoni*, in which he derides the custom of Kappores, he presents the figure of the rooster who had flown for protection to the top of the synagogue, from which he utters a plea for his own life, couched in the language of the exhortations of the prophets. Judah ibn Sabbatai, one of the most gifted parodists and satirists, satirizes both misogyny and marriage, especially hasty marriage, in his *Minhath Yehudah*. This satire against women was answered by one Isaac in his *Ezrath Nashim* and by Jedaiah Bedaresi in his *Oheb Nashim*. In a parody which is a dispute between brothers as to whether wealth or wisdom is more important, Ibn Sabbatai couches the decision in the legal terminology of an opinion rendered by the court.

Immanuel of Rome, through most of whose works runs a line of parody and satire, was the first to employ exegetic parody. In one of his *Mahberoth* (no. 22) he resolves sixty contradictions which were put to him. These questions and answers are, in the main, distortions of Biblical and Talmudic texts. His *Eben Bohan* is a satire on the entire social panorama of his day.

In the 14th cent. appeared the *Massecheth Purim* of Kalonymus ben Kalonymus, describing the customs of Purim; this is the first parody of the style and diction of the Talmud. The *Megillath Setharim* of Gersonides also details the celebration of Purim, parodying both the Talmud and the style and structure of the Halachic Midrashim. It opens with the drunkard's chain of tradition, parodying that in *Aboth* 1:1. The few 15th cent. parodies were composed chiefly for the celebration of Purim, which was usually marked by an election of a chief jester, the "Purim king." These parodies contain the edicts of such Purim kings and other versions of the *Massecheth Purim*.

About this time a number of satires were written against the Christian creed, parodying the liturgical poem *Yigdal* (Marx, A., in *Kohut Memorial Volume*, 1929, pp. 275-76). In the 16th cent. Leon de Modena wrote a parody in praise of gambling, "Turn From Evil," which was a parody on the "Verses Against Gambling" ascribed to Abraham ibn Ezra (Gollancz, H., *Translations from Hebrew and Aramaic*, 1908, pp. 161-219). Israel Nadjara gives a marriage contract between God and Israel which parodies the Kethubah.

The 17th cent. was the first in which parodies of liturgical pieces were used as epitaphs. Joshua Calimani wrote a parody in honor of Hanukah. Johanan Rapa composed an elaborate satire on Christianity and its customs in the form of a parody of the Passover Haggadah, which was printed in 1908. The most popular parody of this period was another *Massecheth Purim* (Sulzbach, 1814; Lemberg, 1854; Cracow, 1878; and subsequent editions), which underwent five recensions before it was first printed, and represents the ef-

forts of a number of authors. It parodied not only the Talmud but also the commentaries of Rashi, the Tosafists and Samuel Edels. These various recensions represent layers added by many generations of Yeshiva students; they display remarkable scholarly acumen in deducing many surprising laws for Purim from the Bible, all the while maintaining the serious tone of Talmudic discussions.

In the 18th cent. there was the first burlesquing of the ethical wills which were so popular in the Middle Ages. David Polido published his "Commemoration of Purim" (1703), which is the testament of Haman, read to his family in the prison where he awaited execution. In parodies of the Blessing of Jacob (*Gen.* 49) and of the Ten Commandments, Haman bids his children not to practise charity, to dun their debtors, and to threaten their demanding creditors with violence. Isacco Luzzatto satirizes his townspeople in the form of a Talmudic parody, *Massecheth Derech Eretz.* Zachariah Pugliese, author of *Hilchoth Malveh* parodying the code of Maimonides, offers it, with a dry undercurrent of satire, as a guide for pawnbrokers and moneylenders. Judah Benzeeb's *Melitzah Lepurim* is a praise of wine-drinking on Purim, parodying and travestying many famous Selihoth and Piyutim by such noted poets as Kalir and Meshullam ben Kalonymus. The "New Zohar for Purim" by Tobias Feder, in praise of wine, was the first parody of the language and style of the *Zohar,* and was at the same time a satire against the latter work. H. Sommerhausen, in his "Haggadah for the Night of Drunkards," skilfully parodies the language of the Haggadah, as does Abraham Mohr in his *Kol Bo Lepurim,* the preface of which is composed of a number of amusing parodies of the language and contents of the responsa.

In the period from the last decades of the 18th cent. to the 20th cent., various social, religious and industrial upheavals have shifted the emphasis from parodies to satire. These satires may be classified into five main groups: 1. against Hasidism; 2. against Reform Judaism; 3. for Socialism; 4. on the life of East European Jewry; 5. on the life of American Jewry.

The first blast against Hasidism was delivered by Joseph Perl in his *Megalleh Temirin* (Revealer of Secrets), depicting in brilliant and vivid satire the blind and naive faith of ignorant Hasidim in their Zaddiks, and the hypocrisy and businesslike methods of these Zaddiks. Isaac Erter, M.D. Brandstaetter, D. Apotheker and many others also wrote satires against Hasidism, and many Yiddish plays satirize the excesses of the Hasidic movement.

S. D. Luzzatto was one of the first to write a satire against Reform Judaism. M. Steinschneider's *Ein Lustspiel in Zwei Aufzügen* is a record of imaginary conversations between the porter of the Frankfort Conference (1845) and various Jewish scholars of the past who were denied admittance. Moses Mendelsohn of Hamburg and Judah Loeb Nathan also wrote satires against Reform Judaism. J. P. Solomon's *The Chronicle of the Rabbis* (1897) is a biting satire on the leading American Reform rabbis of that period, parodying the Bible and sections of the liturgy. Another anti-Reform satire in English is *A New Version of the Haggadah,* by N. Mosessohn.

The 19th cent. Socialists often used parody and satire against capitalism and religion. Outstanding in this group was B. Feigenbaum who wrote in both Hebrew and Yiddish, parodying the Psalms, the Passover Haggadah and the liturgy. Somewhat blasphemous are the *Mahzor im Tefillah Zakkah,* published by the Anarchistic Group in Leeds, and the *Tefillah Zakkah,* published by the Pioneers of Freedom in New York city.

There are a goodly number of parodies depicting and satirizing the social, economic and spiritual conditions of the Jews in Eastern Europe. Eisik Meir Dick parodied the Talmud in his *Massecheth Aniyuth;* Isaac Kaminer, a prolific satirist, parodied the liturgy; Joseph Brill presented a history of Hebrew journalism parodying the Mishnah and Midrash. Two parodies describing the commercial life of Jewish merchants, storekeepers and businessmen, in which their difficulties in gaining a livelihood are feelingly portrayed, were written by Abraham Rakowsky (*Massecheth Shetaroth*) and Abraham Melamed (*Massecheth Soharim*). Both are excellent imitations of the style and diction of the Talmud and the Tosefta.

To the Europeans of the 19th cent. who received funds from their relatives and friends who had emigrated to America, America seemed a land where gold could almost be picked up on the streets. When immigrants came to America and found that life was hard for them and the religious atmosphere was very lax, they often gave vent to their disillusionment and disappointment in satire and parody. Examples of this literature are: "The New American Haggadah" of A. M. Sharkansky; the *Massecheth America* of G. Rosenzweig, a prolific and clever parodist; the writings of A. Hurwich, A. Kotlar and C. Gurland. Hebrew and Yiddish parodies and satires cover thoroughly every phase of Jewish life in America. An interesting parody is *Eser Makkoth fun Tammany,* parodying part of the Passover Haggadah, which was issued by the Fusionists in the pre-election campaign of 1904 to convince and remind the Jewish voters of the moral and social corruption emanating from Tammany Hall. G. Kiss issued a Talmudic parody, *Massecheth Prohibition,* in which he skilfully satirized the evils of the non-observance of the Prohibition Law. E. Deinard wrote a number of trenchant satires against Hasidism and the glorification of Jesus by Jews.

Satires against individuals have been written by D. Apotheker, Judah Loeb Gordon, Nehemiah S. Libowitz, Abraham Rakowsky and Isaac Jacob Weissberg. In the 19th and 20th centuries a number of periodicals devoted to satire, parody and humor came into being. Among these are: *Hayerech,* edited by Israel Goldberg in Europe; the *Souvenir* of the Pi Tomid Association, edited by Alexander Harkavy in the United States; *Hametatea, Mistama,* and *Sambation,* published in Palestine. Humorous dictionaries containing elements of satire have been published by C. A. Hyman, Hirsh Kodza and Joshua Meisach.

Other subjects of satire and parody include anti-Semitism, Communism, Socialism, superstition, politicians, physicians, marriage brokers, mosquitoes and Zionism and the ineptitude of its leaders. Most of the aforementioned parodies and satires are listed in the works of Israel Davidson.

Lit.: The literature on Jewish wit and humor is very copious, and the following selection is made chiefly of works written in English: Edel, Edmund, *Der Witz der Juden* (1909); Adler, Hermann, "Jewish Wit and Humor," *The Nineteenth Century,* March, 1893; Davidson, Israel, *Parody in Jewish Literature* (1907); idem, in *Pinkos,* July, 1927, pp. 58-62; Bernstein, J., *Jüdische Sprichwörter und Redensarten* (1908); Richman, J., *Laughs from Jewish Lore* (1926); Mendelsohn, S. F., *The Jew Laughs* (1935); idem, *Let Laughter Ring* (1941); Druyanov, A., *Sefer Habedikah Vehahiddud* (3 vols., 1935-38), with extensive bibliography in vol. 3, pp. 470-94; Chotzner, J., *Hebrew Humour and Other Essays;* idem, *Hebrew Satire* (1911); Kohut, A., in *American Hebrew,* vol. 26, No. 13; vol. 27, Nos. 1 to 5; Neches, S. M., *As Twas Told Me* (1926); Lipson, M., *Midor Dor* (2 vols., 1929-37); Newman, Louis I., *The Hasidic Anthology* (1934); Ernst, S., *Meotzar Habedihah* (1933); Loewe, H., *Alter jüdischer Volkshumor* (1931); Libowitz, N. S., *Hashomea Yitzhak* (1907); idem, *Sefer Shaashuim* (1927); Waxman, M., *A History of Jewish Literature,* vol. 2 (1933) 603-12; vol. 3 (1936) 183-94; Gross, H., in *Monatsschrift für Geschichte und Wissenschaft des Judentums,* vol. 52 (1908) 1-20, 129-44, 257-84.

WITCH OF ENDOR, *see* EN-DOR.

WITCHCRAFT. The practice of witchcraft is forbidden in the Bible under the penalty of death (*Ex.* 22:17; *Deut.* 18:10). The word used in this connection is derived from the stem *kashaf,* which probably originally meant "to shred (herbs)," that is, to make magic brews; hence the witchcraft mentioned was probably

that of preparing charms to help or harm various individuals. Accordingly, the term "witch" is not properly applied to the woman of En-dor to whom Saul resorted (*I Sam.* 28), as she was a necromancer. Despite the prohibition of witchcraft, there were evidently some in ancient Israel who practised it, as it is mentioned among the wicked acts of Manasseh (*II Chron.* 33:6) and denounced by the prophets (*Micah* 5:11). The term witchcraft is used metaphorically to describe the wiles of Jezebel (*II Kings* 9:22) and the subtle state policy of Assyria (*Nahum* 3:4).

The Talmud follows the law of the Bible, but points out the difference between the wizard who actually performs a definite action by sorcery and the one who uses sleight-of-hand; only the former is to be punished (*Sanh.* 7:11). Despite the prohibition, there is evidence of numerous magical formulas among the Jews of the Talmudic period, and even the Talmud itself speaks of herbs as having powers which are akin to the uses of magic, and of witches being executed by Simeon ben Shetah. In the Middle Ages various documents give love spells or other incantations which are very close to witchcraft, although such practices were far less common among Jews than among their neighbors. The legends contain many stories of witches who could transform themselves into animals, especially wolves. Thus there was a provision that warnings against witchcraft should be pronounced in the synagogue, and it was said that the sign of a dead witch was that her mouth remained open after death. Waxen images are reported to have been made by witches to secure the love or the hurt of an individual. These aberrations tended to disappear with the weakening of superstitious beliefs among the Jews.

WITKOWSKI, FELIX, *see* HARDEN, MAXIMILIAN.

WITKOWSKI, GEORG, historian of literature, b. Berlin, 1863; d. Leipzig, Germany, 1939. He was a student of Michael Bernays, and, probably influenced by him, became converted to Protestantism. In 1889 he became lecturer, in 1896 assistant professor and in 1920 full professor at the University of Leipzig. In 1933 he was removed by the Nazi regime, and forbidden to consult the public libraries of Leipzig. He was forced also to resign as editor of the *Zeitschrift für Bücherfreunde,* which he directed (1909-33).

Among the German historians of literature and those of other countries Witkowski was respected as a learned expert of the literature of the 17th cent. as well as of Lessing, Schiller and Goethe. He contributed a great number of editions and monographs to the knowledge of these subjects, especially a biography of *Cornelia Goethe* (1924), sister of the poet, and *Geschichte des literarischen Lebens in Leipzig* (1909), a history of the cultural life of the center of the German bookselling trade. He also gave valuable hints to the scientific editors of the works of modern poets by his *Textkritik und Editionstechnik neuerer Schriftwerke* (1924), and was interested in the history of German literature of the 19th cent.

Moderate in his views and cautious as regards controversial and hypothetical statements insofar as their authors claimed scientific appreciation, Witkowski was a friend of many young modern poets in Germany during the three first decades of the 20th cent., and encouraged them as a literary adviser and critic.

WITNESSES (*'edim*). The position of witnesses is an important one in Jewish law, particularly in criminal cases, where circumstantial evidence is ruled out and the whole case rests on direct testimony. Accordingly, the evidence of witnesses is regulated by exact rules and by a number of directions as to who may testify and how they may testify. In capital cases it was necessary to have evidence from at least two witnesses (*Deut.* 17:6).

Because of the importance of witnesses, high qualifications were demanded of them (*Sanh.* 24b et seq.). The following classes were absolutely excluded: deaf-mutes (cf. *Git.* 71a), insane persons, minors, women, slaves and blind persons. Further, a witness must be unprejudiced, must not be related to the parties in the case or to the defendant, must be of good reputation, and must be familiar with the prescriptions of the Jewish law. If a witness was known to be a gambler, or if he had ever given false testimony (*B.K.* 72b), he was not permitted to act as witness. In rabbinical law no one who had violated a rabbinical decree was considered competent to act as a witness (Maimonides, *Hilchoth Eduth* 10:3). It is noteworthy that shepherds, who had the reputation of letting their herds graze on other persons' property, and tax collectors, who were notorious for extortion, were debarred as witnesses.

As a rule, no oath was administered to witnesses, on the principle that if they could not be believed without taking an oath their testimony was of no account. The only oath taken by a witness was a sort of negative one; if one was summoned as witness by a party in a case and asserted that he had no testimony to offer, he was required to make oath to that effect (*Lev.* 5:1). This made him responsible in case of a false oath for all the damages that resulted because of his failure to testify, and he had to bring a sin-offering for the sin of perjury. It was the duty of everyone to furnish testimony if he was able. Whoever wrongfully withheld his testimony was regarded as obliged to make reparation for the injury which he had caused (*B.K.* 56a). Only kings and high priests were exempt from the duty of serving as witnesses (Maimonides, *Hilchoth Melachim* 3:7 and commentaries). A special privilege was accorded sages and prominent individuals; they were not required to appear before the court as witnesses, but could have their evidence taken down in their own homes.

Jewish law pays considerable attention to the punishment of falsely conspiring witnesses (*'edim zomemim*). This is a noteworthy feature of Jewish law, and it underwent a special development. It is the only case where the unsuccessful attempt to commit a crime is punished in the same manner as the successful commission of the crime; this exception was due to the heinous nature of the offense. Biblical law (*Deut.* 19:16-21) requires that they be punished in exact proportion to their intended offense (*lex talionis*): "Then shall ye do unto him, as he had purposed to do unto his brother." The Sadducees interpreted the verse to mean that false witnesses should be punished only if the unjust sentence caused by their false testimony had been actually executed; but the Pharisees insisted that they be punished only if the execution was intended, but not accomplished. Hence, in the latter view, false witnesses were punished only if their perjury was discovered between the time of the pronouncement of the sentence and its execution. Maimonides (*Hilchoth Eduth* 20:2) makes a compromise between the two views. He accepts that of the Pharisees in capital crimes; false witnesses can not be punished after a death sentence is executed. But in cases involving corporal punishment or fines they may be punished if their perjury is found out before the sentence is executed.

There are further limitations on the stigmatizing of witnesses as testifying falsely. They are not considered "conspiring witnesses" unless other witnesses testify that they could not have been at the place and at the time they had testified they were. If their testimony proved to be con-

tradictory to that of other witnesses, this merely invalidated their testimony and did not make them subject to punishment.

The Mishnah points out certain cases in which false witnesses can not be punished literally as the Bible directs. For instance, if they accuse a person of a crime punishable by exile, or accuse a priest of being the offspring of a forbidden marriage, they can not be condemned to exile or be considered a "profane priest" (*halal*). In such cases they received corporal punishment.

WITTE, COUNT SERGEI JULIEVITCH, Russian prime minister, non-Jew, b. Tiflis, Georgia (Asia), 1849; d. Petrograd, 1915. In 1892 he became minister of transportation and afterward minister of finance.

At the close of the Russo-Japanese War (1905) Witte was sent as Russian plenipotentiary to negotiate peace terms under the mediation of President Theodore Roosevelt. On his return to Russia he was made a count. In October, 1905, Witte was appointed prime minister, when his appeal to the czar to establish a quasi-parliamentary system in Russia was accepted. He remained prime minister until April, 1906, when he was unexpectedly dismissed just before the opening of the First Duma.

Witte was, after Speransky, the most talented statesman in Russia in the 19th and in the early part of the 20th cent. A convinced monarchist, he nevertheless understood that the heyday of autocracy was over, and that liberal reforms would have to be instituted if the dynasty in Russia was to be maintained. His views on the treatment of the Jews in Russia were expressed to a Jewish deputation that came to him when he was appointed prime minister. He said that equal rights had to be granted to Jews, but gradually, and that Jews had to abstain from revolutionary activity, leaving that to Russians. Witte was not responsible for the wave of pogroms which spread over the Pale of Settlement on the publication day of the Manifesto establishing the new form of government.

In 1908 and 1911, in interviews with Herman Bernstein, Witte declared that there was no anti-Semitism among the Russian masses and that he would like to abolish the Pale of Settlement and open all educational institutions to Jews. Witte's second wife was of Jewish origin. SAMUEL L. KUTSCHEROFF.

Lit.: Witte, S. J., *Mémoires* (1922-23); Hurwitz, Elias, *Staatsmänner und Abenteurer* (1925); Struve, Peter, *S. J. Witte* (1915); Bernstein, Herman, *With Master Minds* (1913).

WITTING, RICHARD (originally **Witkowski**), Prussian deputy, and banker, b. Berlin, 1856; d. Berlin, 1923. He was a brother of Maximilian Harden and, like him, was baptized. After serving for several years in the administration of Berlin, he went to Danzig, where he became city councillor and city treasurer (1889), and then to Posen, where he was elected mayor (Oberbürgermeister) in 1891, thus automatically becoming a member of the upper house of the Prussian parliament; he held the two positions until 1902. During the eleven years of his administration Witting did much for the beautification and improvement of Posen, and was helped in this endeavor by Emperor William II's policy of making Posen a bulwark of his empire.

He was slated to receive a ministerial post despite his progressive opinions (he was a National Liberal), but Witting declined the offer and preferred to accept

Jozef Wittlin

a position as a director of the Nationalbank für Deutschland, which he held until 1911; thereafter he became chairman of its board. After the first World War, Witting joined the Democratic Party, and for a time was chairman of the Berlin Democratic Club. He advocated German-French rapprochement.

WITTLIN, JOZEF, Polish poet, novelist and essayist, b. Dmytrów, Poland, 1896. During the first World War he served in the Austrian Army. After the War he was a high school teacher in Lwów (1919-22). From 1922 to 1924 he was the literary director of the municipal theatre in Lodz and director of its dramatic school. He escaped from Warsaw during the German invasion of Poland in 1939 and, by way of France, came to the United States in 1941.

Wittlin first published several collections of his poems under the general title of *Hymny* (Hymns; 1920, 1925 and 1929), and a verse translation of Homer's *Odyssey* (1924 and 1931). Of his *Saga of the Patient Foot-Soldier,* dealing with the first World War as it affected the life of a peasant in Galicia, then part of the Austrian Empire, only the first volume was published. This was translated into ten languages, and appeared in English as *Salt of the Earth* (1939); the volume was published in its entirety in *Le Temps* of Paris and *Het Volk* of Amsterdam. The style has been called by critics Biblical in its simplicity and the characters likewise Biblical for simplicity and symbolism.

One of the interesting aspects of the book, it has been pointed out (*The Jewish Chronicle Supplement,* June, 1939, p. 7), is "the unstressed and natural acceptance of the toleration between the Galician and the Jewish peasants."

He was awarded the Polish P.E.N. Club Prize (1935), the Polish Independent Academy Prize (1936), and the Golden Laurel of the Polish Academy of Literature.

WLACH, OSCAR, architect, b. Vienna, 1881. He studied at the Architekturtechnische Hochschule in Vienna from 1898 to 1903 as a pupil of Carl König. Soon after concluding his studies he was entrusted with the task of building the Statthaltereipalast in

Trieste (1905). In the following year he returned to Vienna, where he built villas and apartment houses. In 1907 he went to Italy. Classical architecture and particularly the monuments of ancient Rome impressed him greatly. Although he was modernistic in his style, Wlach's architectural work was always distinguished by classical measure and proportion. After a year's sojourn in Italy, the artist returned to his native city, where he became associated later on with two of the foremost young Austrian architects, Oscar Strnad and Josef Frank. Many apartment houses, theatres and hotels were executed by them.

Wlach's activities were interrupted by his service during the first World War. In 1917 he was appointed technical calculator to the Turkish government in Constantinople. In Turkey he built colonies of small private houses in Istanbul, which was the first step on the way toward his later housing projects. The slaughterhouse in Haidar-Pascha is his work, and he made projects for Istanbul and Smyrna.

In 1919 he returned to Vienna, where he participated in its monumental housing projects. Wlach planned workmen's colonies, workmen's houses, and huge apartment houses for working men (*Gemeindehäuser*) for the community of Vienna. Besides this public work, he built many private houses and planned burial monuments. He founded Haus und Garten, a center for modern interior decoration, for which he designed furniture in modern style. He was guided by practical ideas; his innate and highly developed sense for beauty of forms guided him. He was one of the foremost exponents of modern architecture. His guiding ideals were perfection of craftsmanship, the use of the right material in the right place, according to its particular character, and purity of design.

His plans won him many first prizes and gold medals in international exhibitions, such as in Paris, Brussels, Milan, Cologne, Essen, Leipzig, Stuttgart and Vienna. He was a collaborator of many architectonical periodicals. A publication of his, *Einküchenhaus,* appeared in 1919, and his book *Die Polychromie in der toscanischen Architectur* gives an account of his architectural-historical studies.

After the German invasion of Austria in 1938 Wlach came to the United States, and settled in New York city. There he continued his activities as an architect, chiefly in planning private houses. ELISABETH GUTMAN.

WODIANER, noted Hungarian family of Jewish origin. The ancestor of the Wodianers, Samuel Woidzislaw, came to Hungary from Bohemia about 1750. He settled at Eperovác in the Bácska district.

PHILIP WODIANER (d. 1820), called also Feivish Ehprevitz, was the son of Samuel Woidzislaw. He went to Szeged about 1780. In 1792 he gave a plot and contributed 10,000 gulden toward the erection of a synagogue in that city. He became assistant judge and later judge of the Jewish community.

COSMAN WODIANER (b. 1789; d. Győrsziget, 1831) was a son of Philip Wodianer. He maintained at his own cost a Yeshiva and dormitories at Győr. His Hebrew writings were published by his son Arnold (Aaron) Wodianer under the title of *Sefer Nahlath Yehoshua. Liber Hereditatis Josuae* (1890), with a Hebrew introduction by Wilhelm Bacher.

SAMUEL WODIANER (b. 1786), an elder son of Philip Wodianer, was in business at first at Szeged and later at Pest. The firm of S. Wodianer and Son was engaged in banking and in the produce business. In 1844 the king bestowed upon Samuel Wodianer a domain at Kapriora, Transylvania, with the title of nobility. From that time on the members of this branch of the family called themselves Wodianer de Kapriora. The sons of Samuel Wodianer, Mór and Albert, accepted the Christian faith.

MÓR WODIANER (DE KAPRIORA) (1810-85), a son of Samuel Wodianer, was president of the Danubian steamship company and of the Austro-Hungarian state railways. In 1863 he was made an Austrian baron and in 1874 a Hungarian baron. He was also a member of the Hungarian upper house.

ALBERT WODIANER (DE KAPRIORA) (1818-98), a brother of Mór Wodianer, was a privy councillor, a member of the Hungarian upper house, and was made a Hungarian baron in 1886. He bequeathed funds for the establishment of sanitariums, and endowed the Hungarian academy. His estate of eighty million crowns went to the three daughters of his brother Mór. The three baronesses Wodianer married members of the Hungarian nobility and aristocracy. The male line of this branch of the family became extinct.

RUDOLF WODIANER, a third son of Samuel Wodianer, lived as a wealthy merchant at Pest at the beginning of the 19th cent. His private home was one of the sights of that city.

BÉLA WODIANER (DE MAGLÓD), the son of Rudolf Wodianer, served as an engineer with the rank of captain in the Hungarian revolutionary army (1848-49). After the revolution he engaged in farming and the export of agricultural products. He became consul of Bavaria and subsequently of the German Reich. In 1869 he was knighted, and authorized to use the suffix "de Maglód." He was repeatedly elected a deputy to the Hungarian lower chamber. His son Rudolf and his grandson Andor were in the diplomatic service in the rank of ministers plenipotentiary. This branch of the family also accepted the Christian faith.

PHILIP WODIANER (DE VÁSÁRHELY) (b. Hódmezővásárhely, Hungary, 1822; d. Budapest, 1899) was the founder of a third branch of the family. He was a printer, and enlisted as a soldier in the revolutionary army in 1848. Kossuth placed him in charge of the printing of the newspaper *Pesti Hirlap* and subsequently of the printing office of the revolutionary government. Later Wodianer founded his own printing office and publishing house at Pest, and became the owner of several daily and weekly newspapers. He was knighted in 1897 with the privilege of adding to his name the suffix "de Vásárhely." His publishing business was continued and expanded by his son Artur (b. 1860; d. 1921); his son Hugo (b. 1868; d. 1920) inherited the publisher-ownership of the newspapers. Hugo Wodianer embraced the Christian faith.

WOGUE, LAZARE ELIEZER, rabbi and scholar, b. Fontainebleau, France, 1817; d. Paris, 1897. After receiving his rabbinical diploma in 1843, he became assistant rabbi to Chief Rabbi Marchand Ennery of Paris. In 1851 he was called to the newly established chair of theology at the rabbinical seminary (École Centrale Rabbinique) at Metz (from 1859 on at Paris as Séminaire Israélite de France), where he served until 1894, when he became professor emeritus. At the same time he was, from 1868 on, principal of the teachers' preparatory school of the seminary, and from 1879 to 1895 editor-in-chief of *L'univers israélite.* In 1885 he was made a chevalier of the Legion of Honor.

Wogue wrote extensively on scholarly topics, and gave popular presentations of Judaism. His most notable achievement was a translation of the Torah into

George Wolf

French (1860-69), together with explanatory notes. His other writings include: *Histoire de la Bible et de l'exégèse biblique jusqu'à nos jours* (1881); *Le rabbinat français au dix-neuvième siècle* (1843); a prayer-book, *Shomer Emunim, le guide du croyant israélite* (1857; 2nd ed., 1898); *Esquisse d'une théologie juive* (1887); *La prédication israélite en France* (1890). He translated into French the first two volumes of Graetz' *Geschichte der Juden* and a number of rabbinical works written in Hebrew.

Lit.: *L'univers israélite*, vol. 52 (1897) 133.

WOHLBRÜCK, OLGA (known also as Olga Bern), actress and author, b. Gainfarn, near Vienna, 1867; d. Berlin, 1933.

She was the daughter of a sugar manufacturer. As a small child she was taken to Russia, where her father owned a factory. She attended the Gymnasium in Moscow, where she soon showed a great talent for languages. She began writing short stories in German, Russian and French. The family then moved to Kiev. A vacation trip to her grandmother on her father's side in Paris led to permanent residence in the French capital. The grandmother, once an actress, brought her into contact with the stage.

Olga Wohlbrück received a stage education and was soon engaged at the Théâtre National de l'Odéon, where she appeared until—in 1887—she married the writer Maximilian Bern. This marriage did not last long, however, and in 1904 she married the composer W. Wendland. With her husband she moved to Berlin, appeared as guest star on the Berlin and Moscow stages, and finally turned to writing. She became one of the most widely read light fiction writers of her time. She also wrote poems, essays and comedies.

Among her many works are the following: (Fiction) *Aus eigener Kraft* (1898); *Im Dunkel* (1901); *Extreme* (1902); *Die Boyersen* (1908); *Aus den Memoiren der Prinzessin Arnulf* (1911); *Die neue Rasse* (1912); *Primadonna* (1919); *Der König von Troplowitz* (1920); *Die Lust am Manne* (1931). (Comedies) *Der fremde Herr* (1901); *Der moralische Oskar* (1902). Among the Jewish subjects which she treated is *Vater Chaim und Pater Benediktus* (1895). Together with her first husband, Maximilian Bern, she wrote the comedy *Besonderer Umstände halber* (1896).

Lit.: Brümmer, Franz, *Lexikon der deutschen Dichter und Prosaisten des 19. Jahrhunderts* (1901).

WOLBARST, ABRAHAM LEO, physician, b. New York city, 1872. He received the M.D. degree from Columbia University (1898), and was consultant urologist of several New York hospitals. Wolbarst was associated with Paul Ehrlich, and was among the few Americans who were given a supply of "606" for clinical trial. An authority on venereal diseases, he was the inventor of the five-glass test in the diagnosis of urethral discharges in the male. He stated that Jews, because of the fact that their male children are circumcised, never suffer from penile cancer. For thirty years Wolbarst served on the Jewish Board of Guardians.

An associate editor of the *Journal of the International College of Surgeons,* he was the author of *Gonococcal Infection in the Male* (1930) and *Healthy Sex Life* (1932), and of translations from the French and German.

Lit.: Kagan, Solomon R., *Jewish Contributions to Medicine in America* (1939) 222.

WOLF, ADOLPH GRANT, judge, b. Washington, D. C., 1869. He was a son of the historian Simon Wolf. He studied at Johns Hopkins University (A.B., 1890), the University of Berlin and Columbian (later George Washington) University (LL.M., 1893). From 1904 to 1941 he served as associate justice of the Supreme Court of Puerto Rico, and from 1918 to 1930 he was a member of the Commission on Uniform State Laws from Puerto Rico.

WOLF, EDWIN, manufacturer and banker, b. Ulrichsville, Ohio, 1855; d. Philadelphia, 1934. His family originated in Bavaria, Germany, whence his father, Elias Wolf, emigrated to the United States in 1837, at the age of seventeen. Edwin Wolf first succeeded his father in the manufacturing business, and later joined his four younger brothers in their various commercial enterprises. In 1901 he was elected to the board of public education of Philadelphia, where he installed a new system of accounting which was still in use in 1943, was elected president in 1917 and retired from the board in 1920. He was the first Jew to become president of this body.

Wolf was also a board member of the Free Library of Philadelphia, and a governor of the Eastern State Penitentiary. In 1902 he was elected president of the Jewish Publication Society of America; during his term of office the English translation of the Bible, executed by Jewish scholars, was published.

Lit.: Miller, Simon, "Edwin Wolf," *American Jewish Year Book,* vol. 37 (1935) 55-60.

WOLF, GERSON, educator and historian, b. Holleschau, Moravia, 1823; d. Vienna, 1892. He received the traditional Jewish education, but at the same time attended the Gymnasium and then went to Vienna, where he studied pedagogy, philosophy and modern languages at the university and contributed articles to several magazines. When he published his first book, *Die Demokratie und der Sozialismus* (1848), he was as a result ordered expelled, but this order was rescinded. Wolf was again arrested and imprisoned for several weeks in 1852, when the police found in his home a book, *La démocratie en France,* by Guizot. In the same year he received the Ph.D. degree and was appointed religious instructor in the schools of the Jewish community of Vienna. In this capacity Wolf wrote numerous textbooks on Jewish history which were used in the schools of Vienna until the dissolution of the community during the second World War. He was also a co-founder of a society for the aid of destitute Jewish students (1861), and chaplain of the Jewish inmates at the houses of correction in Vienna and Stein on Danube, Lower Austria. From 1884 until his death he was inspector of the Jewish religious schools of Vienna.

Among Wolf's numerous books and monographs the following are important: *Geschichte Israels für die israelitische Jugend* (1856; 11th ed., 1928); *Ferdinand II. und die Juden* (1860); *Geschichte der israelitischen Kultusgemeinde in Wien 1820-1860* (1861); *Judentaufen in Österreich* (1863); *Die Juden in der Leopoldstadt* (1863); *Zur Geschichte der jüdischen Ärzte in Österreich* (1864); *Joseph Wertheimer, ein Lebens- und Zeitbild* (1867); *Geschichte der Juden in Wien von 1156 bis 1876* (1876); *Joseph II* (1878); *Die alten Statuten der jüdischen Gemeinden in Mähren* (1880).

Lit.: *Die Neuzeit* (1892); *Allgemeine Zeitung des Judentums* (1892); *Österreichische Wochenschrift* (1892); Wachstein, Bernhard, "Bibliographie der Schriften Gerson Wolfs," *Zeitschrift für die Geschichte der Juden in der Tschechoslowakei* (1930), No. 1.

WOLF, GUSTAV, graphic artist and painter, b. Östringen, near Karlsruhe, Germany, 1887. After studies in Florence, Rome and Paris, and extensive travels in Egypt, Italy, Greece, Syria, Morocco and Spain, he served until 1933 as professor of graphic arts at the Staatliche Kunsthochschule in Karlsruhe. His

fine feeling for nature expressed itself in his tender paintings of the Dutch lowlands and landscapes, but later developed into fantastic productions. As a result of his profound emotional vision he created visions of the primitive period of world history and cosmic dreams, which form paintings of unique colors. In the large number of the illustrations which he devised for classical and modern works (especially during the decades when he worked for the noted Diederichs publishing house in Jena, Germany) he combined superb mastery of technical expression with a rare ability to sense the poetical and literary contents of the works which he issued.

His numerous publications include: *Confessio* (twelve woodcuts with text); *Die Schöpfungstage* (seven lithographs with the Biblical text; 1914); Goethe's *Märchen* (1916); *Creaturen* (1924); *Die Reise nach Tetuan* (1925). His book illustrations, handbills, productions in the fields of applied graphics, newspapers and motion pictures, as well as his decorative murals were enthusiastically received.

In 1938 Wolf came to the United States, settling in New York city, where he created colored woodcuts in illustration of a novel by the Jewish author Jacob Picard, and issued a portfolio entitled *Vision of Manhattan,* containing a series of twelve etchings which illustrate the profound impression made by New York city upon the immigrant. In 1942 Wolf's works were exhibited at Columbia University and at the Williston Academy, at East Hampton, Conn.; in the early part of 1943 a large-scale exhibition of his works was being planned by the Berkshire Museum in Pittsfield, Mass.

Lit.: *Sendschreiben an die Freunde der Graphik über das Werk von Gustav Wolf, vom Verlage Eugen Diederichs zu Jena* (1922); *Cicerone,* Feb., 1927; *Die Horen,* vol. 9 (1928-29); *Velhagen und Klasings Monatshefte,* Nov., 1931; *Menorah Journal,* Autumn, 1941.

WOLF, HARRY BENJAMIN, American Congressman, b. Baltimore, 1880. After graduating from the University of Maryland Law School he was admitted to the bar in 1901. He was elected a member of the Maryland State House of Delegates in 1906. Soon thereafter Wolf was elected as a Democrat to the United States Congress, serving from 1907 to 1909, but was defeated for reelection in 1908, whereupon he resumed the practice of law in Baltimore.

WOLF, JOHANN CHRISTOPH, non-Jewish Hebraist and historian, b. Wernigerode, Prussia, 1683; d. Hamburg, Germany, 1739. His principal work, *Bibliotheca Hebraea* (4 vols., Hamburg, 1715-33), was originally intended to form a supplement to Giulio Bartolocci's *Bibliotheca Magna Rabbinica.* However, by making use of the 8,000 volumes of Hebrew books and manuscripts in the possession of David Oppenheimer, Wolf turned his work into an independent Hebrew bibliography. It was the most valuable reference book for Hebrew literature until the appearance of Moritz Steinschneider's catalogue of the Hebrew books in the Bodleian Library (1852-60).

Lit.: Zunz, Leopold, *Zur Geschichte und Litteratur,* vol. 1 (1845).

WOLF, JULIUS, political economist, b. Brünn, Moravia, 1862; d. Berlin, 1935. He was instructor at the University of Zurich, Switzerland (1885-87), assistant professor at the University of Vienna (1887-89) and associate professor at Zurich (1889-97). Thereafter he taught at the University of Breslau (1897-1913) and at the Technical College in Berlin (1913-33). He distinguished himself by his reorganization of the banks which issued the federal currency of Switzerland, and was noted as a champion of economic individualism as opposed to Marxism. Deeply interested

Lucien Wolf

in problems of social science, finance, population, sociology of sex life, customs and international economics. Wolf was the founder and publisher of the *Zeitschrift für Sozialwissenschaft* and *Finanz- und Volkswirtschaftliche Zeitfragen,* and chairman of the Deutsche Gesellschaft für Bevölkerungspolitik and of the Internationale Vereinigung für Sexualforschung.

His published writings include: *Zur Reform des Schweizerischen Notenbankwesens* (1888); *Die gegenwärtige Wirtschaftskrise* (1888); *Eine eidgenössische Hochschule für Staatswissenschaft* (1889); *Sozialismus und kapitalistische Gesellschaftsordnung* (1892); *Kathedersozialismus und soziale Fragen* (1899); *Das Zweikindersystem in Anmarsch* (1913); *Die neue Sexualmoral und das Geburtenproblem unserer Tage* (1928); *Mutter oder Embryo? Zum Kampf um den Abtreibungsparagraphen* (1930); *Physiognomie und Völkergeschichte, nach Vorlagen aus dem altägyptischen und altorientalischen Bilderschatz* (1935). Wolf embraced Christianity.

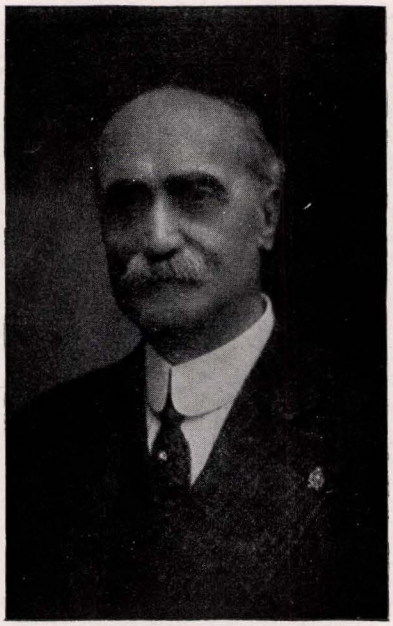
Lit.: Wolf's autobiography, in *Die Volkswirtschaftslehre der Gegenwart in Selbstdarstellungen* (1924).

WOLF, LUCIEN, journalist and historian, b. London, 1857; d. London, 1930. He devoted a great part of his life, on behalf of the English Jewish community, both before and after the first World War, to the struggle for the rights of Jews in the countries where the Jewish population was subjected to persecution and to restrictive laws. Wolf wrote for the London *Jewish World* between 1874 and 1894, and from 1905 to 1908 he was editor of that periodical, but he won his great reputation as a newspaperman and as a specialist in foreign affairs as foreign editor of the *Daily Graphic* (1890-1901), for which he wrote under the pseudonym of Diplomaticus. From 1888 on he was a member of the Joint Foreign Committee formed by the Anglo-Jewish Association and the Board of Deputies of British Jews; he was its secretary during the last thirteen years of his life. Under his direction as a member and as secretary, and through his perseverance and able work the Joint Foreign Committee earned great authority in the countries where a Jewish question existed, an authority which was almost equal to that of the Alliance Israélite Universelle in the latter half of the 19th cent. Wolf himself was called the "British

Jewry's Secretary for Foreign Affairs" or the "Jewish Plenipotentiary Minister." Following in the footsteps of Adolphe Crémieux and Sir Moses Montefiore, he visited the influential statesmen and political leaders of those countries which practised governmental anti-Semitism, and, like his predecessors, he secured solemn promises, but never serious changes. Before the first World War he concentrated his activities on the two chief anti-Semitic countries, Russia and Roumania.

At the Peace Conference in 1919 it was due mostly to his untiring efforts that the minority treaties were framed with a view to guaranteeing the rights of Jews. Wolf himself drafted Article 7 of the Roumanian Minority Treaty. He presented to the Peace Conference his "Notes on the Diplomatic History of the Jewish Question," and a collection of documents about the Jewish question in Roumania. He then collaborated with the Comité des Délégations Juives, but parted with it when the Comité wanted to secure for the Jews recognition as a national minority with special national rights, besides their recognition as a religious, racial or linguistic minority and the granting of political and civil rights.

After the first World War Wolf continued his activity in Geneva as a representative of the Joint Foreign Committee, of the Alliance Israélite Universelle and of the Jewish Colonization Association close to the League of Nations. Here he was always in contact with the European political leaders in order to defend Jewish interests. His vast correspondence with them and his annual reports issued in the name of the Joint Foreign Committee have a great historical value, and they evidence that from the beginning the countries bound by the Minority Treaties were not intent on respecting them and that the League of Nations had neither the power nor the will to enforce them. Wolf was the founder and delegate of the Advisory Committee of the High Commissioner for Refugees of the League of Nations.



Like the Alliance Israélite Universelle and the English Jewish organizations which he represented, Wolf opposed Jewish nationalism and Zionism, despite his personal sympathy for Theodor Herzl, whom he tried to help when the latter was carrying on negotiations with the Turkish sultan. In 1904 Wolf published an article entitled "The Zionist Danger," and on May 24, 1917, he published a letter in the London *Times* to the same effect. He was a territorialist.

Wolf wrote much on colonial and foreign questions in the *Fortnightly Review* and other important magazines and newspapers. In 1905 he published a jubilee edition of the novels of Lord Beaconsfield (Benjamin Disraeli), and in 1884 a biography of Sir Moses Montefiore on the occasion of Montefiore's hundredth anniversary. He founded (1893) the Society for Jewish History in England, and was its first president. In his *The Myth of the Jewish Menace in World Affairs* (1921) he proved the falsity and the forgeries of the *Protocols of the Elders of Zion*. He wrote also about the Marranos of Portugal. His *Essays in Jewish History* were edited by Cecil Roth and published with a memoir and bibliography of his writings (1934).

On Wolf's seventieth anniversary Sir Herbert Samuel, presiding at the celebration dinner, praised him as "a journalist and man of letters, an archaeologist and historian, and one of the foremost diplomatists of the Jewish people."

Despite his ill health and his extremely bad eyesight in the last years of his life—he was then almost blind—Wolf went regularly to Geneva and worked unrelentingly for the cause of Jewish emancipation and Jewish human rights. SANIEL LABIN.

Lit.: *Publications of the American Jewish Historical Society; American Hebrew,* Oct. 17, 1924, p. 716; Jan. 28, 1927, p. 402; Aug. 29, 1930, p. 397; Nov. 2, 1934, p. 481.

Simon Wolf

WOLF, SIMON, lawyer and Jewish leader, b. Hinzweiler, Rhenish Bavaria, Germany, 1836; d. Atlantic City, N. J., 1923. He came to the United States with his grandparents in 1848. For a while he worked as a salesman and bookkeeper for his uncles in their store at Ulrichsville, Ohio. He began to read law in 1859, and was admitted to the bar of Ohio in 1861. At the beginning of the Civil War he tried to enlist in the Union Army, but was rejected because of defective eyesight. In 1862 he opened an office for the practice of law in Washington, D. C.

Wolf became "the spokesman of the Jews of the United States" (*Publications of the American Jewish Historical Society,* No. 29, p. 198). He was one of several who had President Abraham Lincoln rescind General Ulysses S. Grant's Order No. 11 (1862), which excluded Jewish civilians from the army lines; and, afterwards, Wolf accepted and publicized Grant's explanation that he himself had not issued the order. When the Board of Delegates of American Israelites (organized in 1859) was merged into the Union of American Hebrew Congregations in 1878 and called the Board of Delegates of Civil and Religious Rights, Wolf was elected chairman of its standing committee. He continued as chairman for more than thirty-three years. Until the formation of the American Jewish Committee in 1906, the Board of Delegates of Civil and Religious Rights was the only body officially representing the Jews of the United States. Wolf was also the Washington representative of the Independent Order of B'nai B'rith, of which he was president during 1904 to 1905. "No subject arose, from 1870 to 1923, affecting the interest of American Jews, in which he was not active, and if, in a rare instance, he was not directly appealed to by those immediately concerned, the Government itself would call him into counsel, so well-known was his devotion to Jewish interests, good judgment and sterling American patriotism" (Kohler, Max J., in *Publications of the American Jewish Historical Society,* No. 29, p. 202).

But Wolf's activities were not limited to American Jews. During President Ulysses S. Grant's administration, Wolf took the lead in securing the appointment of Benjamin F. Peixotto as consul at Bucharest in an attempt to help the persecuted Jews of Roumania. The note of John Hay (1902), American secretary of state, denouncing Roumania for her violation of the Treaty of Berlin of 1878 with respect to the Jews, and the plans of President Woodrow Wilson for protecting the Jews of Roumania in the Treaty of Versailles (1919) were due, in part, to Wolf's efforts. He was prominent in protesting Russian discrimination against Jews with American passports, in violation of the treaty of 1832, and helped secure its abrogation by the United States in 1911. He gained an important ruling from the immigration authorities to the effect that persons dependent on private charity were not public charges, and he was said to have been instrumental in preventing the deportation of large numbers of Jewish immigrants from the United States (*Bulletin* of the Hebrew Sheltering and Immigrant Aid Society, December, 1916).

A false statement in the *North American Review* in 1891 to the effect that Jews had not fought for the Union in the Civil War on the battlefields led Wolf to an examination of the army and navy rolls of each state and the listing by name in his *The American Jew as Patriot, Soldier and Citizen* (edited by Louis Edward Levy, 1895) of more than 6,000 Jews who served in the Federal forces. He included also the names of more than a thousand Jews who were Confederate soldiers or sailors, establishing participation by the Jews in the Civil War far beyond their quota on the basis of population.

Together with Max J. Kohler, he published a paper, "Jewish Disabilities in the Balkan States: American Contributions toward their Removal, with Particular Reference to the Congress of Berlin" (*Publications of the American Jewish Historical Society,* No. 24, 1916). In 1918 he published his autobiography, *The Presidents I Have Known from 1860-1918.* A memorial volume, *Selected Addresses and Papers of Simon Wolf,* appeared in 1926.

In 1869 Wolf was appointed (by President Grant) Recorder of Deeds for the District of Columbia, and he served as such until 1878. He had been uncertain about accepting the post. But when his appointment was objected to solely because he was a Jew, he secured it in order to fill the office as well as he could. He was appointed a municipal judge in the District of Columbia by President Rutherford B. Hayes and, in 1881, consul general to Egypt by President James A. Garfield. Wolf was the first Jew to hold so important a post in the diplomatic service of the United States. He resigned in the following year to resume the practice of law in Washington.

For many years Wolf was president of the Washington Hebrew Congregation. Among his many Jewish philanthropic activities was the founding by the B'nai B'rith of the Hebrew Orphan Home of Atlanta. He was also a member of the Board of Charities and of the Board of Education of the District of Columbia.

See also BOARD OF DELEGATES OF CIVIL AND RELIGIOUS RIGHTS. CHARLES REZNIKOFF.

Lit.: Kohler, Max J., "Simon Wolf," *Publications of the American Jewish Historical Society,* No. 29 (1925) 198-206; idem, "Simon Wolf," *American Jewish Year Book 5685,* vol. 26 (1924-25) 404-19; Levinger, Lee J., *A History of the Jews in the United States* (particularly pp. 306-8).

WOLFE, BERTRAM DAVID, writer, b. Brooklyn, N. Y., 1896. He studied at the College of the City of New York (B.A., 1916), at the University of Mexico (1922-25), and at Columbia University (M.A., 1931). He taught English in Boys High School, Brooklyn, from 1916 to 1917 and in the Miguel Lerdo High School in Mexico City from 1922 to 1925. He was a director of the Workers School in New York city for four years (1925-29), and then devoted himself to writing.

Wolfe is the author of *Portrait of America* (1934); *Portrait of Mexico* (1937); *Civil War in Spain* (1937); *Diego Rivera: His Life and Times* (1939); and *Deathless Days* (1940). He wrote in Spanish also: *El romance tradicional en Mexico* (Madrid, 1925); *Mundo sin muerte* (Santiago de Chile, 1941).

WOLFE, HUMBERT (originally **Umberto Wolff**), British government official and poet, b. Milan, Italy, 1885; d. London, 1940. The son of Italian Jews, he was brought to England by his parents in the year of his birth.

The family lived at Bradford, Yorkshire, where he went to grammar school; thereafter he attended Wadham College, Oxford. His boyhood and college years he colorfully described in *Now a Stranger* (1933) and *The Upward Anguish* (1938), respectively. At Oxford he started writing verse, but "was disturbed by metaphysics." "As a result of this disturbance" he entered the civil service (1908) in the Board of Trade, and he played a part in the formation of the nucleus of the labor department there, which subsequently led to the establishment of the Ministry of Labor.

During the first World War Wolfe was an official of the Ministry of Munitions. In 1918 he was appointed principal assistant secretary of the Ministry of Labor, and in 1938 deputy secretary to the Ministry of Labor; he held this position until his death. For seven years he represented Great Britain on the Governing Body of the International Labor Office at Geneva. Wolfe was noted for his efficiency in helping in arbitration cases in which the Ministry intervened to prevent strikes. He was the author of the handbook *Labor Suppy and Regulation* (1923) and of articles on similar subjects in the *Encyclopaedia Britannica.* Wolfe was a Commander of the Order of the British Empire (1918) and a Companion of the Bath (1925). In a necrology published in the London *Times,* Sir William Henry Beveridge paid tribute to Wolfe's work as a civil servant in which "his initiative, imagination and astonishing agility and quietness of mind made a contribution of first-rate importance."

Despite these responsibilities, Wolfe was a very prolific and conscientious writer, the author of some forty books, in addition to numerous articles. Although he was at home in all fields of writing, he was particularly esteemed as a lyrical poet. Critics praised his great technical dexterity, skill in imagery, power of rising to sure climaxes and delicacy of word handling. His verses are conservative in form and full of music; "a lyricist who plays delicate melodies on his sun shot flute," he was called by Herbert Gorman. His *Requiem* (1927), through which, in his own words, he "emerged from comparative obscurity into comparative recognition," was generally regarded as his best work. It is a series of poems, taking two groups of personalities, the losers and the winners in this world, and letting each of them, soldier, harlot, huckster, builder, teacher, common man, speak in his or her moment of agony immediately after death. The book was frequently compared with Edgar Lee Masters' *Spoon River Anthology,* but it differs from the American work insofar as the people in *Requiem* represent types, speaking for the entire order to which they belong. Wolfe's satirical vein, noticeable in this work, is at its best in such of his works as *Shylock Reasons with Mr. Chesterton*

(1920); *Lampoons* (1926); *News of the Devil* (1926); and *The Uncelestial City* (1930).

Some critics maintained that Wolfe was greater as a satirist than as a lyricist. His other works include: *Circular Saws,* fables in prose (1923); *The Unknown Goddess,* poems (1925); volumes of biography and literary criticism (*Dialogues and Monologues,* 1928; *Tennyson,* 1930; *Signpost to Poetry,* 1931); and translations (*Portrait of Heine,* 1930; *Homage to Meleager,* 1930; Edmond Fleg's *The Wall of Weeping,* 1931; Edmond Rostand's *Cyrano de Bergerac,* 1937). His adaptation of *The Silent Knight,* a romantic comedy in free verse by the Hungarian Eugen Heltai (1937), was produced in London.

Together with Isaac Rosenberg and Siegfried Sassoon, Wolfe was one of the few outstanding Anglo-Jewish poets. He took no active part in Jewish affairs, and only rarely showed interest in things Jewish. Most revealing is the section in his autobiographical *Now a Stranger* (pp. 116-36) in which he explained why he was "ashamed of being a Jew." He loathed the religious service that lacked dignity, the mediocre rabbi, and his fellow Jews whose behavior was repulsive to him. In *The Upward Anguish* he explained that Judaism as a religion was finished as far as he was concerned. He did not, however, actually renounce Judaism: "He (his autobiographical books are composed in the third person) was probably restrained by fear of hurting his mother, and there was also something stubborn in his blood which remembered Zion."

Wolfe did not lack sympathy for his fellow Jews and interest in Jewish literature, however. He translated into English Fleg's *Wailing Wall* and Heinrich Heine's poems, reviewed Jewish anthologies, and occasionally addressed Jewish meetings. He also composed a few poems on Jewish topics, such as "For the Jews," but generally his poems are full of Christological allusions.

Torn between Christian mysticism and his Jewish heritage, he seems to have had an unhappy life, with his "longing for mystical assurance" unsatisfied, and his last volume of poetry, *Out of Great Tribulation* (1939), gives vent to his deep affliction. ALFRED WERNER.

Lit.: Gorman, Herbert, "Humbert Wolfe," *The Bookman,* vol. 65 (1927) 634-39; *Living Authors, A Book of Biographies* (1931); Leftwich, Joseph, "The Case of Humbert Wolfe," *National Jewish Monthly,* Jan., 1941.

WOLFE, S. HERBERT, actuary and soldier, b Baltimore, 1874; d. New York city, 1928. He studied at the College of the City of New York, and became consultant of numerous insurance companies. He was a member of the commission to frame scientific pension laws for city employees (1913). He served as captain and major with the American Expeditionary Force (1918), and was appointed by President Warren G. Harding a brigadier general in the Officers Reserve Corps (1921). Wolfe lectured and wrote a great deal on insurance and actuarial topics, and helped prepare the War Risk Insurance Act. He was awarded the Distinguished Service Medal of the United States and the Cross of the Legion of Honor, of France.

His writings include *Investment Directory of Insurance Companies* (1903) and *Inheritance Tax Calculations* (1905). He was a Fellow of the Royal Statistical Society of Great Britain and of the American Statistical Association.

WOLFENSTEIN, MARTHA, author, b. Insterburg, Prussia, Germany, 1869; d. Cleveland, 1906. She was the daughter of Rabbi Samuel Wolfenstein (1841-1921), who for many years headed the Jewish orphanage at Cleveland. She was brought to the United States in her infancy, and received her education in Cleveland. She was a prolific contributor to the Jewish press and general magazines, especially short stories.

S. Herbert Wolfe

Most of them are based on her father's reminiscences and describe life in a small community in Moravia in the middle of the 19th cent. *Idylls of the Gass* (Philadelphia, 1901) is a series of stories about the same characters; *A Renegade and Other Tales* (Philadelphia, 1905) contains stories with various characters, but the same locale.

WOLFF, AARON, merchant and mayor, b. St. Kitts (St. Christopher), one of the Leeward Islands, British West Indies, 1795; d. London, 1872. About the year 1815 he removed to the island of St. Thomas, then a Danish possession, in the West Indies. He was appointed to the position corresponding to mayor, and ranked second to the governor of the island, at one time filling the latter office. He was president of the Bank of St. Thomas, and its manager for thirty-two years. For many years he was president of the synagogue; in 1842 he founded there a Sunday school. Wolff was decorated by the king of Denmark, and was a member of the Royal Council. He received the title of colonel.

MOSES WOLFF, a son of Aaron Wolff, was one of the leading merchants of the West Indies. In order to give his children the benefit of a better education, he moved with his family to New York city.

EMITA P. WOLFF, better known as Emita May Lewi (b. Venezuela, 1851; d. New York city, 1931), was a daughter of Moses Wolff. She was married first to Lewis May, who for thirty-three years served as president of Temple Emanu-El, New York city, and after his death to Isidor Lewi, a member of the editorial staff of the New York *Times.* Mrs. Emita May Lewi was actively associated with Temple Emanu-El; during the first World War she was engaged in the Red Cross work of the Temple.

Lit.: New York Times, Jan. 24, 1931.

WOLFF, ALBERT LOUIS, conductor, b. Paris, 1884. He was graduated from the Paris Conservatory with first prize in piano accompaniment. In 1908 he was appointed chorus master at the Opéra Comique, making his bow as conductor at the same house three years later. He distinguished himself as a conductor of French operas and achieved fame throughout Europe. In 1919 Wolff went to the United States as a conductor of the Metropolitan Opera House. In 1921 he returned to his conductor's post at the Opéra

Comique, resigning in 1924 to become musical director of the Théâtre Champs Élysées.

In 1928 Wolff became conductor of the Lamoureux Orchestra, and in 1934 conductor of the Pasdeloup Orchestra, proving himself as much at home in symphonic literature as in opera. Wolff composed several operas, one of which, *The Blue Bird*, was introduced at the Metropolitan Opera House in 1919.

WOLFF, ALFRED R., mechanical engineer and author, b. Hoboken, N. J., 1859; d. New York city, 1909. He studied engineering at the Stevens Institute of Technology, in Hoboken, graduating in 1876. Wolff served as assistant engineer in the United States Navy. He was a specialist on the science of windmills, steam heating and ventilation of buildings, and lectured before the Franklin Institute and other scientific bodies. He helped found the Ethical Culture School of New York (1878), and was president of the executive committee (1904-9). He was an alumni trustee of Stevens Institute of Technology (1893-96), and a permanent trustee from 1900 to his death.

Among the many important buildings which Wolff equipped with heating, cooling, and ventilating plants were St. Patrick's Cathedral, New York; Stevens Institute of Technology; Columbia, Princeton and New York Universities; and the Public Library and Metropolitan Museum of Art of New York city. He was author of *The Windmill as a Prime Mover* (New York, 1885); *The Heating of Large Buildings* (New York, 1900); and of other technical works.

Lit.: *Stevens Institute Indicator*, Jan., 1909, pp. 1-30.

WOLFF, BERNHARD, journalist and editor, b. Berlin, 1811; d. Berlin, 1876. A physician by profession, he turned to journalism, became a partner in the old Vossische Buchhandlung, a bookselling and publishing firm, in Berlin, and translated French and English scholarly books. During the 1840's he became owner of the *Berliner Bank- Börsen- und Handelszeitung*.

In 1848 Wolff took over the management of the *Nationalzeitung* (he became its owner in 1855), and also founded, with the help of private backers, the Telegraphisches Korrespondenzbureau Bernhard Wolff. It was the first of its kind in Prussia to make use of the newly invented telegraph for the press, and to receive information from the government. As the telegraph wires went only as far as the border of the country, Wolff founded branch establishments in all important European capitals. Subsequently he added, to his Wolff'sches Telegraphenbureau, branches at Frankfort, Munich and Stuttgart. He also acquired the German branch office of the Reuter Bureau, and brought his enterprises to the highest point of efficiency.

After the Franco-Prussian War (1870-71) the Wolff'sches Telegraphenbureau (W.T.B.) became a joint stock company, and Wolff remained its director until 1875. It was largely employed by the German government, and therefore had official standing. The Nazi Deutsches Nachrichten-Bureau (D.N.B.) was the successor of the Wolff'sches Telegraphen-bureau.

Lit.: Fuchs, Friedrich, *Telegraphische Nachrichten-Büros* (1919) 73 et seq.; Salomon, L., *Geschichte des deutschen Zeitungswesens*, vol. 3 (1900) 552 et seq.; *Allgemeine Deutsche Biographie*, vol. 55, p. 661; Groth, Otto, *Die Zeitung, ein System der Zeitungskunde*, vol. 1 (1928) 491.

WOLFF, ERNST VICTOR, harpsichordist and pianist, b. Berlin, 1889. His music studies took place at the Scharwenka Conservatory in Berlin, and his academic study at the University of Berlin. In 1911 he came to the United States as assistant to the musicologist Max Friedländer, who had been appointed lecturer at Harvard University and other American educational institutions. Returning to Europe, Wolff received his doctorate at the University of Berlin, then began his concert career as pianist and harpsichordist. He was appointed Primo Maestro al Cembalo for the Handel festivals at Göttingen, and assisted at numerous other Handel festivals throughout Germany. He also appeared frequently over the radio in recitals of harpsichord music.

Theodor Wolff

In 1931 he was appointed harpsichord instructor at the German Institute for Foreigners at Berlin. The rise of the Nazi government brought him to the United States, where he has been uniquely active as a recitalist, performer over the radio, and assisting artist with leading orchestras.

WOLFF, THEODOR, editor and author, b. Berlin, 1868. At the age of twenty-one he joined the editorial staff of the *Berliner Tageblatt*, covering literature and theatre. At the same time he took an active part in the literary movement of the Freie Bühne, which was devoted mainly to modern drama, especially the plays of Henrik Ibsen and Gerhart Hauptmann. Wolff published the drama *Die Stille Insel* in 1894, and some other plays and novels. He also translated some plays of the French dramatist Alfred Capus and of Georges Clemenceau into German. He traveled through Spain, Italy, Turkey and England, and was Paris correspondent of the *Berliner Tageblatt* from 1894 to 1906. He became deeply interested in the Dreyfus case, whose development coincided with his stay at Paris, and made the acquaintance of the leading Dreyfusards, especially Georges Clemenceau, later French prime minister, and Anatole France. The latter influenced Wolff's views and literary style decisively.

In 1906 Wolff was appointed editor-in-chief of the *Berliner Tageblatt*, and in this function played an important part in the political history of Germany until 1933. Wolff not only became the most respected German columnist, but he was often consulted by the German pre-war chancellors Bernhard von Bülow and Theobald von Bethmann-Hollweg. Wolff belonged to the left wing of the German Liberal Party, and was

opposed on principle to the semi-autocratic form of government maintained by the chancellors, but in some important questions he supported the chancellors against German nationalism and enabled them to influence Emperor William II in favor of a relatively moderate policy.

After the outbreak of the first World War Wolff was one of the very few political writers who publicly deplored the march of events and dared (August 3, 1914), in an editorial, to recognize the efforts made by the British cabinet to maintain peace. On November 30th of the same year Wolff openly accused the German government of having created, by the declaration of war, a fait accompli without the previous consent of the people, and in the spring of 1915 he opened a campaign in favor of a negotiated peace and of the establishment of parliamentary government in order to avoid further faits accomplis. Wolff therefore incurred the wrath of the German nationalists and of the German high command, and for some months he was forbidden to publish articles. His authority, however, was so great that even Chancellor Michaelis, who succeeded von Bethmann-Hollweg as political trustee of Hindenburg and Ludendorff, asked his advice, but without heeding it. When Prince Max von Baden became chancellor, Wolff summoned him to provide a tutor for the grandson of William II in order to proclaim him emperor and to avoid the ousting of the dynasty or to prepare the nomination of another German prince as future emperor. He was thus opposed to the establishment of a German republic, being aware that the German people did not possess apt political leaders, and being convinced that the establishment of parliamentary government would be sufficient to maintain political liberty and peace.

After the so-called German revolution in November, 1918, Wolff was one of the founders of the German Democratic Party, which was organized in his office, but in 1926 he separated from it because the party tried to reconcile the rightists. Wolff published in 1919 *Vollendete Tatsachen,* a collection of his editorials printed in the *Berliner Tageblatt* during the War. In the summer of the same year Wolff agitated against the signing of the Treaty of Versailles, endeavoring to demonstrate that the tactics intended by the republican government, to sign and afterward to elude the obligations, would have fatal consequences. After the Treaty was signed Wolff advocated fair execution as much as possible.

In 1925 he published *Das Vorspiel,* a history of the genesis of the War, followed by *Der Krieg des Pontius Pilatus,* published in 1934 (English trans., *The Eve of 1914,* 1935-36). In 1936 he published *Der Marsch durch zwei Jarhzehnte* (English trans., *Through Two Decades,* 1936), containing letters and confidential talks with the chancellors von Bülow and von Bethmann-Hollweg, and with other influential though less known German statesmen, and a report on a discussion with Ludendorff.

In 1933 Wolff emigrated to Switzerland, and afterward resided in Nice, France, where he remained when, at the end of 1942, this region was occupied by Italian troops.

WOLFFE, FREDERICK, railway builder and banker, b. Switzerland, 1832; place and date of death unknown. He came to the United States in 1855. During the Civil War he was appointed general agent of the Confederate States for the purchase of supplies, and he served also as captain in the Confederate Army. After the war he was in the cotton and commission business at Mobile, Ala. In 1877 he purchased the Alabama and Chattanooga Railroad for the Erlanger syndicate, and thereafter built, leased, reorganized and purchased many other railroads. Engaged in the banking business, he made compromises and exchanges with the state of Alabama in connection with several millions of dollars worth of Alabama state bonds held at London and Frankfort. In 1886 Wolffe purchased the entire loan of $3,400,000 in Georgia state bonds.

WOLFFE, JOSEPH BARNETT, physician, b. Vilna, Lithuania, 1896. After receiving the M.D. degree from the Temple University School of Medicine (1919) and serving at Mt. Sinai Hospital, he became a member of the faculty of the Temple University School of Medicine (lecturer, 1924; associate, 1927; associate professor, 1932), chief cardiologist at Willow Crest (1923), and cardiologist of the Temple University Hospital (1926). His chief contributions were in the field of cardiology. Thus he described an instrument for the practical determination of cardiac efficiency (1926), devised methods of teaching cardiac arrhythmias, proposed a new classification for rheumatic heart disease (1930), and was the first to study the tissue extract substance known as desympatone and to discuss its use in the treatment of angina pectoris.

With Digilio, Wolffe investigated the use of pancreatic extract in the treatment of hypertension (1937). Wolffe was a governor of the Philadelphia Heart Association (1927-35) and a director of the Witkin Foundation for Research in Heart Disease.

Lit.: Kagan, Solomon R., *Jewish Contributions to Medicine in America* (1939) 129-30, 602.

WOLFFSOHN, DAVID, merchant and Zionist leader, b. Dorbiany, province of Kovno, Lithuania, 1856 or 1858; d. Homburg, Hesse, Germany, 1914. He was a son of the Talmudic teacher, Rabbi Eisik Wolffsohn, and received the traditional Jewish education. At an early age he went to Memel, East Prussia (1872), in order to escape military conscription. There he came under the influence of Rabbi Isaak Rülf, one of the earliest champions of Zionism in Germany. Later he lived at Lyck, East Prussia, in the house of David Gordon, editor of *Hamaggid,* who strengthened Wolffsohn's Zionist outlook.

After a hard struggle for a living and many unsuccessful business ventures, Wolffsohn became a partner in a large timber firm and settled first at Papenburg, East Frisia, where he founded a synagogue, and from 1887 on at Cologne, where, as a prosperous merchant, he remained until his death. In Cologne he was very active in the Jewish Literary Society, where he lectured on the Talmud, Russian Jewry (he took great pride in his East European origin) and Zionism. In 1893 he founded, together with Max Isidor Bodenheimer, the Kölner Verein zur Förderung von Ackerbau und Handwerk in Palästina, and in the following year the Jüdisch-Nationale Vereinigung.

After Theodor Herzl published *Der Judenstaat,* Wolffsohn entered into relations with the author (1896), and the two men became close friends. "Deep-rooted in Jewish folk origins, close-bound to Judaism by instinct, reflection and knowledge, and withal a clever and experienced man, who incorporated the best characteristics of the simple Jew, Wolffsohn was the perfect complement for Herzl: an admonisher, inspirer and teacher, ever ready to extend his help, independent in action, glad to accept responsibility and yet prepared, in all lesser matters, to subordinate his own opinions for that of the leader" (Bein, Alex, *Theodor Herzl*). Herzl called him "Daade," and named one of the main figures of his novel *Altneuland,* David Litwak, after his friend. Among Zionist leaders Wolffsohn was considered a business wizard because of his uncanny knowledge of financial affairs.

David Wolffsohn

Wolffsohn was the intermediary between Herzl and his opponents within and without the Zionist Movement, and he undertook the difficult task of founding the Jewish Colonial Trust in London (1898), the bank which was expected to become the mainstay of future colonizational activities, and was prominently active in its management until his death. He chose the color scheme for the Zionist flag, taking the blue and white from the traditional prayer-shawl (1897). In the fall of 1898 he accompanied Herzl to Constantinople and Palestine, and took part in the arrangement of Herzl's reception by Emperor William II of Germany at Jerusalem. After Herzl's death (1904) Wolffsohn, together with Leon Kellner and Johann Kremenetzky, took care of his literary remains, and he made a national appeal for a fund to provide for Herzl's family and for the education of his children.

Despite his unwillingness to accept the role of a leader, and against a strong opposition within the movement, Wolffsohn was nominated for the presidency and elected at the Seventh Zionist Congress (Basel, 1905). In order to preserve peace in the movement, he tried to conciliate the "practical Zionists," who emphasized colonization, while he himself faithfully clung to Herzl's "political Zionism," agreeing with the late leader that "it is only when we are in possession of such a charter (from the Turkish government), which must carry with it public recognition and the legal guarantee of our right, that we can begin with the great colonization action." But this policy was opposed by the "practical Zionists," led by Menahem Mendel Ussishkin and Chaim Weizmann, as well as by the "Ugandists," who separated from the Zionist Movement and, under the leadership of Israel Zangwill, founded the Jewish Territorial Association.

In defiance of these setbacks, Wolffsohn continued along his line, and traveled to South Africa, Palestine, Russia, where he talked with Prime Minister Stolypin and with Foreign Minister Isvolsky, seeking to induce them to ease the lot of the Russian Zionists, to Budapest, where he discussed with Minister of the Interior Count Andrássy the means of checking anti-Semitic activities, and Constantinople, where he conducted negotiations with the sultan. These negotiations looked promising, but the overthrow of the regime by the Young Turk Revolution (1908) thwarted Wolffsohn's plans.

At the Ninth Zionist Congress (Hamburg, 1909) he faced a determined opposition. Although at the Tenth Zionist Congress (Basel, 1911) he was again supported by a majority, he resigned, physically worn out and suffering from a heart disease caused by overexertion. A member of the opposition, Otto Warburg, was elected president of the organization. At the Eleventh Zionist Congress (Vienna, 1913), which was presided over by Wolffsohn, the fight centered around the Zionist banks and their management, and he succeeded in preventing them from being turned over to the "unbusinesslike" cultural Zionists. His influence upon the Jewish Colonial Trust, the Anglo-Palestine Company and the Jewish National Fund was lifelong.

In his last will Wolffsohn directed his executors to use the major portion of his estate for the erection of a meeting hall for the Zionist Congresses, or of a university building. In 1922 his executors decided to erect a building to house the library of the Hebrew University at Jerusalem, and in 1930 the Beth David Wolffsohn (David Wolffsohn House) was dedicated on Mount Scopus, near Jerusalem. In this Library are deposited Wolffsohn's archives, together with the furniture of his home. The archives consist of an abundance of Zionist material, embodied in the personal files and diaries of Wolffsohn, and of his correspondence with Herzl.

ALFRED WERNER.

Lit.: Robinsohn, Abraham, *David Wolffsohn* (1921); Böhm, Adolf, *Die zionistische Bewegung*, vol. 2; Cohn, Emil Bernhard, *David Wolffsohn, Herzls Nachfolger* (1939); Bein, Alex, *Theodor Herzl* (1940).

WOLFFSOHN, SALLY, civic worker, b. Europe, about 1855; d. Belize, British Honduras, 1933. He came to British Honduras about 1875, engaged successfully in business, and became so completely identified with the affairs of the colony that he was frequently called to high office. He was for more than twenty-five years a member of the legislative council, served on the Belize Town Board, was a prominent member of the chamber of commerce, and first president of the British Honduras Agricultural Society. Wolffsohn was especially known for his ardent advocacy of the building of suitable roads in the colony.

WOLFOVSKY, MENACHEM ZALMAN, Hebrew author, translator and poet, b. Suradge, province of Chnernigov, Russia, 1893. He studied in the traditional Heder, and took courses in teaching. During the first World War he served in the Russian Army. He belonged to the Zeire Zion movement. In 1921 he emigrated to Palestine. Wolfovsky was one of the most important Hebrew poets of the young generation. His verse excels in lyricism and in its intimate tone. He wrote for *Hashiloah* and other Hebrew periodicals.

In 1927 a volume of his poems appeared under the title of *Roads' End* (Hebrew). In 1940 his novel of Palestinian life, *One Walks and One Runs* (Hebrew), was published. Wolfovsky was considered one of the finest Hebrew translators in Palestine. He translated into Hebrew numerous Hebrew novels from European and American literature. He also edited translations for Mizpeh, the Palestine publishers.

WOLFSFELD, ERICH, etcher and painter, b. Krojanko, West Prussia, 1884. His family moved to Berlin when he was one year of age.

After graduating from high school, he became a pupil of the Academy of Fine Arts in Berlin, studying under Boese. Later he proceeded to Paris, where he became a student of the Academy Lefebvre. In 1906 he was sent to Asia Minor by the German government for the purpose of copying early Christian paintings there. The Orient and its types left their mark on his work, as did his journey to Italy.

Wolfsfeld went to Rome in 1907, and entered into relations with the graphic artist Otto Greiner, who was then the central figure of the German colony in Rome. He visited Milan, and was impressed by the work of Leonardo da Vinci. In 1909 he went to Basel to study the portraits of Hans Holbein the Younger, and then returned to Germany. He became a professor at the Berliner Staatsschule der Bildenden Künste at an early age, and kept on teaching there until stopped by the "New Order" after the Nazis' rise to power. The artist remained in Berlin until 1940, when he left for England, where he settled in London.

Wolfsfeld's artistic work consists mostly of the graphic, although he exhibited paintings also throughout his career. His etchings are often lifesize, thus adding, in the outer form, to the monumentality of his plastic conception. The first work which made him popular was *The Checker Players.*

Among his early portraits, the likeness of the sculptor Gerhard (1909), *The Fettered* (1909), and *The Archers* (1910) won wide recognition. Outstanding among his etchings of Biblical scenes are *Job* (1912) and *Jacob's Blessing* (1918). They prove his development from character studies of a strictly plastic nature to expressive compositions and more "painterlike" handling of shimmering highlights. Numerous studies of mendicants which he executed in etching found final expression in his painting *The Blind Mendicant* (1919). His works were represented in most of the German galleries. Wolfsfeld deserves great credit as a teacher who provided generations of young artists with a sound foundation in craftsmanship. ELISABETH GUTMAN.

Lit.: Donath, Adolf, *Erich Wolfsfeld* (1920); Baumeister, Engelbert, "Erich Wolfsfeld," *Die graphischen Künste* (1914) 108-12; Stahl, Fritz, "Erich Wolfsfeld," *Die Kunst für Alle* (1914) 111-14; Opperlin, Manfred, "Der Radierer Erich Wolfsfeld," *Zeitschrift für bildende Kunst* (1914) 133-36.

WOLFSKEHL, KARL, poet, b. Darmstadt, Hesse, Germany, 1869. He was descended from a distinguished family of financiers and bankers who for generations had served the grand dukes of Hesse. His father, the banker OTTO WOLFSKEHL, was an alderman of the city of Darmstadt and, for a time, vice-president of the parliament of Hesse.

Karl Wolfskehl studied German philology under Otto Behaghel at the University of Giessen, where he received the Ph.D. degree, his thesis being *Germanische Werbungssagen.* In 1892 he became acquainted with the first volumes of Stefan George's poetry, while still at Giessen, and this experience decided the direction of his life. As he confessed some three decades later (*Literarische Welt,* July, 1928), after this reading his outlook was completely changed and life had gotten a new sense for him. At the end of the following year he made the acquaintance of the poet George, who was only a year his senior and who, too, had been a pupil of the Gymnasium of Darmstadt. A friendship developed between the son of the Rhenish winegrower and the descendant of Jewish financiers that was ended only by George's death in 1933.

Wolfskehl became one of the outstanding members of the inner circle of the George-Kreis which revolutionized German literature, art and even politics in a peculiar way, emphasizing nationalist, conservative and other, often contradictory, aspects. He was a contributor to the *Blätter für die Kunst,* and for a time was a close collaborator of George, jointly editing with him the three-volume anthology *Deutsche Dichtung* (*Goethe, Jean Paul, Das Jahrhundert Goethes,* 1900-2). Financially independent, he lived at Munich, where his home became a noted center of literature and art, and the "Wolfskehlsche Dienstage" gathered together many outstanding literary men and women of Germany, chiefly those belonging to the George group.

After the first World War the poet, who had lost his fortune in the crisis, spent five years in Italy making a living as a private tutor and teacher. In 1925 he returned to Munich, where he worked for publishers, libraries and literary periodicals and made new translations of De Coster's *Till Ulespiegel* and of the libretto of Mozart's *Le nozze di Figaro.* After the Nazis' assumption of power (1933), Wolfskehl left Germany and in 1943 he was living in New Zealand.

His poetry (*Gesammelte Dichtungen,* 1903; 2nd ed., 1921; *Der Umkreis,* 1927; *Höret die Stimme,* 2nd, enlarged ed., 1936) followed rather closely the symbolist pattern of Stefan George, yet besides strong Greek, Teutonic and Catholic inclinations it frequently showed a decidedly Judaic trend.

Of special interest is his drama *Saul* (1905), presenting the inevitable antithesis of youth and old age. Wolfskehl published several translations from the Old German, mystery plays, and epics, and edited *Älteste deutsche Dichtung,* together with Friedrich von der Leyen (1909). His collected essays appeared under the title of *Bild und Gesetz* (1930). ALFRED WERNER.

Lit.: Landau, Erwin, *Karl Wolfskehl, stilkritische Untersuchung seiner Lyrik* (1928); Wolters, Friedrich, *Stefan George und die Blätter für die Kunst* (1930); Dulberg, Franz, "Karl Wolfskehl," *Preussische Jahrbücher* (1931) 256-66.

WOLFSOHN, JOEL DAVID, state official, b. Chicago, 1900. He was the son of Jacob M. Wolfsohn, editor of the *Jewish Daily Courier,* of Chicago. Joel Wolfsohn studied at the University of Missouri (B.J., 1922) and at Kent College of Law, Chicago (LL.B., 1931). After working as a political writer for and city editor of the Chicago *Evening Post* (1925-32) and as a staff writer for the Chicago *Herald and Examiner* (1932-34), he was made superintendent of reports of the state of Illinois in 1934. In the same year he was appointed executive secretary of the National Power Policy Committee, a position which he still held in 1943. Subsequently he served as a delegate to the Third World Power Conference (1935-36) and as assistant to the Commissioner, General Land Office, Department of the Interior (1937-41). In 1941 he was promoted to the office of assistant commissioner, General Land Office, and still held this position in 1943.

Wolfsohn was secretary of the Zionist Organization of Chicago for two and a half years, a member of the administrative committee of the Zionist Organization of America, and a member of the board of directors of the Jewish Community Center of Washington, D. C.

WOLFSOHN, JULIUS MASR, physician, b. San Francisco, 1883. He received the M.D. degree from Johns Hopkins University (1911), and in 1913 became clinical professor of neuropsychiatry at Leland Stanford Jr. University, in San Francisco, where he was still serving in 1943. During the first World War he was major in the American Expeditionary Forces and also attached to the British Army for eleven months. He was president of the Northern California Psychiatric Society. Wolfsohn did pioneer work in syphilology, describing the cutaneous reaction of syphilis (luetic reaction) and advising treatment of syphilis of the central nervous system with intraspinal injection of mercurialized serum.

Lit.: Kagan, Solomon R., *Jewish Contributions to Medicine in America* (1939) 185-86.

WOLFSON, HARRY AUSTRYN, scholar, b. Austryn, province of Vilna, Lithuania, 1887. Wolfson studied at the Slobodka Yeshiva, and, on his coming

Harry A. Wolfson

to the United States, in 1903, at the Yeshiva Rabbi Isaac Elchanan. He was graduated from Scranton Central High School in 1908, receiving the highest award of the school, namely, a scholarship of one year to Harvard University. While in Scranton he taught in a Talmud Torah. He received the A.B. degree from Harvard in 1911 (as of 1912), and the A.M. degree in 1912. He was the Harvard Sheldon Traveling Fellow from 1912 to 1914, and studied in France, Germany and England. In 1915 he received the Ph.D. degree from Harvard, and was appointed instructor in Jewish literature and philosophy there. He served as a private in the United States Army (1918-1919), returning to Harvard on being mustered out. He became assistant professor in 1921; he also taught at the Jewish Institute of Religion from 1923 to 1925 as professor of Jewish history and philosophy. In 1925 he was appointed Nathan Littauer Professor of Jewish Literature and Philosophy at Harvard, which position he still held in 1943.

In the late 1920's and early 1930's he was instrumental in greatly augmenting the number of Hebrew books at Harvard, so that it possessed a relatively large library of Hebraica and Judaica, including several valuable incunabula. He was honorary curator of Jewish history and literature in the University Library. The honorary degree of Doctor of Hebrew Literature was conferred upon him by the Jewish Institute of Religion in 1935, and by the Jewish Theological Seminary in 1937. At Harvard he taught not only text courses in Talmud, Midrash and Biblical commentaries, as well as lecturing on Jewish philosophy, literature and history, but also the course on Spinoza, and conducted a seminar in medieval philosophy for graduate students. He was a member of the board of freshman advisers at Harvard, as well as of numerous important scientific societies, such as the American Philosophical Society, the American Oriental Society, the Mediaeval Academy of America, and the Society of Biblical Literature and Exegesis; he was a fellow of the American Academy of Arts and Sciences, the Jewish Academy of Arts and Sciences, and the American Academy for Jewish Research, of which latter organization he was president (1935-1937).

Wolfson is the author of many articles and essays, both scientific and popular, on Jewish and general subjects, in both English and Hebrew, as well as of two large works on philosophy. In 1912 appeared his article on "Maimonides and Halevi" (*Jewish Quarterly Review*), in which he shows that whereas Maimonides, as rationalist, is closely akin to the medieval schoolmen, and the *Guide* is but another scholastic apology of religion, Halevi is almost modern in his empirical method and his voluntaristic assumptions. Wolfson also finds that Halevi's historic sense and his emphasis on the high morality of the Jewish Scriptures makes him par excellence the Hebraic thinker, in contrast to the Hellenic approach of Maimonides.

Wolfson showed an early interest in Crescas with his essay on "Crescas on the Problem of Divine Attributes" which appeared in 1916 (*Jewish Quarterly Review*), and where he discusses the matter of Universals in relation to the Godhead. In 1919 he wrote on "Crescas' Definition of Time" (*Jewish Quarterly Review*), a note on *Or Adonai,* I, ii, 11. And finally he published his magnum opus on this philosopher, *Crescas' Critique of Aristotle* (1929), which consists of a long and learned introduction, the text of the first part of *Or Adonai* (with some rearrangement) and an English translation, and scientific and critical notes (which make up the greater part of the volume).

The notes indeed are often essays on various metaphysical problems and may be read independently; the author shows vast erudition, and a profound grasp of not only Jewish but also general philosophy. The basis of the work is in the twenty-five propositions which Maimonides presents as a summary of Aristotle, but for which he gives no proofs, and which lack Crescas supplies, with the view to refuting them. Wolfson brings to light the critical attitude and vast learning of 14th cent. Jewish scholars.

Wolfson found that what led to his interest in Crescas at the same time led him to the study of Spinoza; and thus his second large book, in two volumes, was *The Philosophy of Spinoza: Unfolding the Latent Processes of his Reasoning* (1934). Wolfson points out that Spinoza's *Ethics* did not "spring out of the clear sky." He uses the historical-critical method in this book, tracing Spinoza's indebtedness and sources to the Jewish philosophers before him. Wolfson holds that one cannot understand Spinoza without a clear knowledge of the background not only of the terminology which Spinoza uses, but of the intellectual atmosphere in which he lived and the problems which agitated him; the *Ethics* is often obscure, and many of its propositions seem unnecessary, if one does not know what was in the back of its author's mind. Wolfson also indicates that the scholia often give a better picture of what Spinoza has under consideration than the formal proofs themselves. Furthermore, Wolfson, with his profound knowledge of Jewish philosophy, shows for the first time in a systematic and perhaps definitive fashion that Spinoza owes more to Maimonides, Crescas and the other Jewish writers than to non-Jewish sources.

The geometric method of the *Ethics,* according to Wolfson, is not a necessary aspect of Spinoza's work; that method is meant to illustrate only the two principles of "the denial of final causes in the universe and of freedom in human actions." The formal Benedictus who presents a system of philosophy to the modern world is constantly activated, motivated and made meaningful by the inner Baruch, who never loses his proper place in the personality and thought of Spinoza. Spinoza is modern not because of the influence of his contemporaries, many of whom were essentially medieval in their thinking (as for instance Descartes on God), but because much of medieval Jewish thinking is modern and because Spinoza had the vision and the intellectual honesty to do what his contemporaries did not do, namely, to accept in its major implications the principle of the unity of nature. Wolfson's philosophical keenness, added to his philological virtuosity, gives the reader remarkable light on innumerable matters in philosophy which he considers in many excursive digressions. Wolfson amplified his work on Spinoza by discussing in a later article "Some Guiding Principles in Determining Spinoza's

Mediaeval Sources" (*Jewish Quarterly Review,* 1937). He published three articles in 1935, "The Internal Senses in Latin, Arabic, and Hebrew Philosophic Texts" (*Harvard Theological Review*), "Maimonides on the Internal Senses" (*Jewish Quarterly Review*), "Isaac Israeli on the Internal Senses" (*Kohut Memorial Volume*).

His scholarly articles include "Classification of the Sciences in Mediaeval Jewish Philosophy" (*Hebrew Union College Jubilee Volume,* 1925, and "Additional Notes" thereon in *Hebrew Union College Annual,* 1926); "On Maimonides' Classification of the Sciences" (*Jewish Quarterly Review,* 1936); an article in Hebrew on "The Testimony of Clemens of Alexandria Concerning an Unknown Custom in the Yom Kippur Abodah in the Temple" (*Horeb,* 1936); a fine piece of bibliographical writing called "Isaac ibn Shem-Tob's Unknown Commentaries on the Physics" (*Freidus Memorial Volume,* 1929); and a study of "Solomon Pappenheim on Time and Space and His Relation to Locke and Kant" (*Abrahams Memorial Volume,* 1927). Wolfson's style is rich, keen and has almost a Midrashic deftness in marshalling ideas in indirect manner; his sentences are chiseled, graceful yet sturdy; his thinking honest, comprehensive and thorough, and his scholarship encyclopedic.

Of his popular essays we shall mention only one, "How the Jews Will Reclaim Jesus," the introductory essay to Jacobs' *Jesus as Others Saw Him* (1925). Wolfson looks upon Jesus as a rabbi whose sayings or Mishnah were preserved by his disciples, even as the disciples of other minority teachers for a time may have preserved their teachers' words. But since he was a minority teacher, one among many, his school, the Beth Jesus, did not attain official sanction, a fate it had in common with other similar teachers. If the Synagogue should ever reclaim Jesus, it will be in the form of a Midrashic tale: There was a man whom some held to be God, and others the son of God, and in whose name many gorgeous temples were built, but whose soul did not find rest until it returned to its native Galilee, and so on. Wolfson is as delicate in Midrashic writing as he is profound in philosophic insight. SAMUEL J. B. WOLK.

WOLFSON, LEO, lawyer, journalist and lecturer, b. Hussi, Roumania, 1882. He came to the United States in 1900, and studied at New York University (LL.B., 1906). As correspondent for the International Jewish Press Bureau he covered the Peace Conference and the signing of the Treaty of Versailles (1919). Wolfson was one of the founders of the United Roumanian Jews of America, and served as its president, later as its honorary president. He took part in the founding of the American Jewish Congress, and served on its executive and administrative board.

Wolfson also held high positions in the Zionist Organization of America. Other activities of his include leadership in the Progressive Party of New York County and lecturing for the board of education of New York. He wrote *The Jews in Roumania* (1914).

WOLFSON, THERESA, economist, b. Brooklyn, N. Y., 1897. She studied at Adelphi College (A.B., 1917), Columbia University (M.A., 1922), and Brookings Institute (Ph.D., 1925). For a while she was field investigator for the National Child Labor Committee (1918) and executive secretary of the Consumers League of New York State (1923); from 1924 to 1926 she was director of health education of the Health Center of the International Ladies' Garment Workers' Union. In 1922 she became an instructor of economics in the classes for the education of workers conducted by the International Ladies' Garment Workers' Union, and continued in that capacity until 1926. She was appointed an instructor of economics in Brooklyn College in 1927, and in 1935 professor of economics; she was still serving in this post in 1943.

She was the author of *The Woman Worker and the Trade Unions* (1928) and of an article, "Women in the Trade Unions" (in *Annals of the Academy of Political Science,* March, 1930). From 1935 on she was a member of the board of editors of *The Woman Today.*

WOLFTHORN, JULIE, painter and graphic artist, b. Thorn, West Prussia, Germany, 1868. Her name originally was Wolf, and she assumed the name Wolfthorn as an artist. She studied first in Berlin, and then in Paris, as a pupil of the Academy Colarossi. She continued her studies in other parts of France, where she came into contact with many other artists. She was influenced principally by Aman-Jean. When she returned to Berlin she was drawn to the "Jugend" circle in the 1890's.

Her fine feeling for somewhat sentimental moods was expressed in romantic landscapes. The same fine sense enabled her to set down in her portraits the typical characteristics of her models, and to give to their likenesses the expression of the ideas for which they stood, such as keen determination to *The Fencer* (Haute Claire), dreamy softness to the poetess, Hedwig Lachmann, and sophisticated taste to the interior decorator, Fia Wille. Another of her expressive portraits is that of her brother, the sculptor Georg Wolf.

Julie Wolfthorn portrayed the famous poet, Richard Dehmel, and his wife also, several times. The group portrait of the wife and children of the architect Muthesius is well known. She became popular as a portraitist of children. Her still lifes are distinguished by fine and poetic arrangement. The pictures *Girl in a Boat* and *The Sick* belonged to the city of Berlin; the portrait *Conrad Ansorge* was in the Nationalgallerie in Berlin. When last heard of, in 1941, she was reduced to misery in Berlin, and was anxiously seeking a visa for immigration to the United States.

Lit.: Scheffler, Otto, "Die Malerin Julie Wolfthorn," *Deutsche Kunst und Dekoration* (1904) 315-19; Hermann, Georg, "Julie Wolfthorn," *Ost und West* (1911) 1090 et seq.; Csuratow, J., "Julie Wolfthorn," *Meister der Farbe* (1916) 914.

WOLHEIM, LOUIS, actor, b. New York city, 1881; d. Los Angeles, 1931. He received a degree in engineering from Cornell University (1906) and the B.S. degree from the College of the City of New York, and taught mathematics for six years at the Cornell Preparatory School. Encouraged by Lionel Barrymore, he made his debut on the stage in *The Jest,* by Sem Benelli (1918). He subsequently made notable appearances in *The Hairy Ape,* by Eugene O'Neill (1922), and *What Price Glory,* by Maxwell Anderson and Laurence Stallings (1924).

He then entered moving pictures, where he created a world-wide reputation, his greatest role being in the film adaptation of Erich Maria Remarque's war novel, *All Quiet on the Western Front* (1930). Wolheim was admired for the brutish-looking types he portrayed and for his realistic characterizations.

Lit.: *New York Times,* Feb. 19, 1931, p. 23.

WOLK, SAMUEL J. B., rabbi, educator and writer, b. Olkiniki, province of Vilna, Lithuania, 1902. According to family tradition, he was a descendant of Saul Wahl. The family produced several rabbis; Rose Wolk, an aunt on Wolk's father's side, was the wife of Isaac Blaser, a leader in the Musar Movement. Wolk was brought to the United States in 1908 and completed his education at the Rabbi Isaac Elchanan Yeshiva (1916-21), the University of Cincinnati (A.B., 1925), the Hebrew Union College (rabbi, 1926), Columbia University, where he was Union of American Hebrew Congregations fellow (M.A., 1929), and St. Lawrence University (LL.B., 1936; J.S.D., 1939). He served on the faculty of the Hebrew Union College School for Teachers (1926-32) and of the School for Jewish Studies (1933-37; dean from 1935 on).

In 1927 Wolk became educational director of Temple Beth Emeth, Brooklyn, and in 1933 also chaplain of the New York State Department of Mental Hygiene; he was serving in both capacities in 1943. He was volunteer civilian chaplain at Fort Tilden in 1942, and was serving in the same capacity at the Brooklyn Army Base in 1943. He was an office editor of the *Universal Jewish Encyclopedia* (1936-37) and subsequently became contributing editor in the field of religious philosophy.

WOLLEMBORG, LEONE, economist and Italian statesman, b. Padua, Italy, 1859; d. Loreggia, Italy, 1932. A graduate of the University of Padua (1878), he later became the promoter of rural cooperatives in Italy, a task to which he devoted his main energies for many decades. He founded for this purpose (1895) a special periodical, *La cooperazione rurale,* of which he was chief editor until it ceased publication in 1904. In 1892 Wollemborg was elected a deputy in the Italian parliament, and remained there until 1913, when he was nominated senator. In the Senate he was a member of many commissions, and shaped numerous laws of economic and financial nature.

In 1901 he became minister of finance. However, he soon resigned when his project of tax reform encountered strong opposition in the Italian parliament. During the first World War he was chairman of the Roman War Relief Committee. After the advent of Fascism he was frequently outspoken in his criticism of various financial and fiscal measures of Mussolini's government. Wollemborg's speeches and economic studies appeared in a special volume issued under the auspices of the Italian Library for Social Science (*Scritti e discorsi di economia e finanza,* Turin, 1935).

Lit.: Luzzatto, F., "Economia e finanza nell'opera di Leone Wollemborg," *Giornale degli economisti* (1932); Graziani, A., introduction to *Scritti e discorsi di economia e finanza* (1935).

WOLLHEIM, GERT, painter, one of the most eminent exponents of "expressionism" in Germany, b. Dresden, Germany, 1894. He studied at the art school in Weimar, served as a soldier in the first World War, and in 1920 settled in the city of Düsseldorf, in the Rhineland, which was then a center of art, where he became a co-founder of the Junges Rheinland, an association of artists which was of great importance. Wollheim's individual art consisted in the combination of a brilliant color portrayal with an unusual and very peculiar power of pictorial fantasy. He evidenced rare skill in combining groups of various kinds of figures, in which romantic and contemporary figures, every-day persons and phenomena as though taken from Rhenish masquerading processions were brought into original relations the one with the other and formed a motley, variegated play.

The best-known painting of this kind was his *Departure from Düsseldorf* (1925), painted at the time when Wollheim removed from the Rhine region to Berlin, where his works always found a place among the most interesting paintings set out in the Secession exhibitions. In 1934 he went to Paris, where his artistic skill experienced a new impulse. However, neither in 1940 nor thereafter was he able to leave France; in 1943 his whereabouts and his fate remained unknown.

WOLMAN, ABEL, sanitary engineer, b. Baltimore, 1892. He studied at Johns Hopkins University (B.A., 1913; B.Sc. in Engineering, 1915), where he lectured on sanitary engineering (1921-27 and 1936-37) and which conferred upon him the honorary degree of Doctor of Engineering (1937). Wolman entered the United States Public Health Service in 1913, served from 1922 to 1939 as chief engineer at the Maryland State Department of Health, and was from 1935 to 1941 chairman of the Water Resources Committee of the National Resources Planning Board. In 1937 he was appointed professor of sanitary engineering at the School of Sanitary Engineering, Johns Hopkins University, and still held this position in 1943.

From 1930 on he was also on the Reference Board of the Medical and Public Health Department of the Hadassah Organization. Wolman published numerous scholarly papers, and served from 1921 to 1937 as editor-in-chief of the *Journal of the American Water Works Association.*

WOLMAN, LEO, economist, b. Baltimore, 1890. He studied at Johns Hopkins University (A.B., 1911; Ph.D., 1914), and taught at Hobart College, the University of Michigan, Johns Hopkins University, Harvard University, and the New School for Social Research, in New York city. In 1943 he was professor of economics at Columbia University, and a member of the research staff of the National Bureau of Economic Research, a trustee of the Mutual Life Insurance Company of New York, and vice-president of the Academy of Political Science. Wolman served as economic adviser to the Amalgamated Clothing Workers Union, chairman of the Interstate Commission on Unemployment Insurance (1931), president of the American Association for Labor Legislation (1934), chairman of the Labor Advisory Board of the National Recovery Administration (1933-34), member of the National Labor Board (1933-34), chairman of the Automobile Labor Board (1934-35), and in 1919 he was attached to the American Peace Mission at Paris.

Wolman was associate editor of the *American Statistical Journal* (1920-33). In addition to articles contributed to the *New Republic, Nation, Yale Review,* and the *Political Science Quarterly,* he wrote the following works: *Boycott in American Trade Unions* (1916); *The Growth of American Trade Unions, 1880-1923* (1924); *Planning and Control of Public Works* (1930); *Ebb and Flow in Trade Unionism* (1936); and was co-author of: *Business Cycles and Unemployment* (1923); *Recent Economic Changes* (1929); *Recent Social Trends* (1933); *The State in Society* (1940).

As a member of the Joint Palestine Survey Commission (1927), Wolman made a report on industry and labor in Palestine.

WOLOFSKY, HARRY, publisher and journalist (pseudonym, Yankel Shmid), b. Szidlowic, Poland, 1876. He came to Canada in 1900, settling in Montreal. He founded the Yiddish periodical, the *Jewish Daily Eagle* (1907), and the English periodical, the *Canadian Jewish Chronicle* (1914), and was still their publisher in 1943. He was a founder and later honorary president of the Jewish Community Council, the United Talmud Torahs, the Federation of Polish Jews of Canada, the Hebrew Consumptive Aid Association, the Old People's Home, the Adath Yeshurun congregation, the Vaad of Yeshivas, and the Vaad of Canadian Jewish communities.

Wolofsky was a member of the Jewish Agency (1929-37) and a justice of peace for the province of Quebec. He wrote *Europe and Palestine After the War* (1922) and *Fun Eibigen Qual* (1930).

WOLPE, STEFAN, composer and teacher, b. Berlin, 1902. He studied at the Academy of Music in Berlin with Busoni, Juon, Schreker, Anton von Webern, and Herman Scherchen, graduating in 1924. He devoted himself to teaching and composition until compelled, in 1933, to leave Germany. In 1934 he toured the Soviet Union, where he participated in forty concerts devoted to his own works. He then went to Palestine where, until 1938, he taught theory and com-

position, and served as professor of music at the Palestine Conservatory in Jerusalem. In 1938 Wolpe came to the United States, and shortly after this became head of the department of theory at the Settlement Music School in Philadelphia.

He was a composer of radical tendencies, and his works had wide performance both in Europe and in the United States. In 1939 the League of Composers featured his *March and Variations,* for two pianos. In 1941 his psalms for voice and piano were performed at the International Festival for Contemporary Music held in New York.

A ballet, *The Man from Midian,* was successfully introduced by Eugene Loring in 1942. Wolpe composed also numerous songs for solo voice and for chorus, dances for orchestra, and a variety of other smaller pieces. He was, in 1943, a member of the executive committee of the World Center of Jewish Music, and a member of the composers' committee of the League of Composers.

Lit.: Rosenfeld, Paul, "Stefan Wolpe's Music," *New Republic,* Jan. 6, 1941.

WOLSEY, LOUIS, rabbi and communal leader, b. Midland, Mich., 1877. In 1899 he received the B.A. degree from the University of Cincinnati, and in the same year was ordained at the Hebrew Union College. He took post-graduate studies at the University of Chicago, Western Reserve University, and the University of Pennsylvania.

Wolsey served Congregation B'nai Israel, Little Rock, Ark., from 1899 to 1907, when he was called to the Euclid Avenue Temple, Cleveland. Here he directed the building of that congregation's synagogue. Although awarded a life contract by the Cleveland congregation, he was released in 1925 to accept the pulpit of Congregation Rodeph Shalom, Philadelphia, where he was still serving in 1943.

His indefatigable energies, administrative abilities and devotion to the cause of Reform Judaism brought Wolsey many offices of importance and responsibility. He was president of the Hebrew Union College Alumni Association (1913-14), president of the Central Conference of American Rabbis (1925-27), chancellor of the Jewish Chautauqua Society (1925-38), and a charter member of the World Union for Progressive Judaism. He was chairman of the Central Conference of American Rabbis' Committee on the *Union Hymnal* which published a revision of that work in 1936. He was a co-founder of the Leo N. Levi Memorial Hospital in Hot Springs, Ark. In 1939 he was awarded the honorary D.D. degree by the Hebrew Union College.

In each community which he served as rabbi, Wolsey took a prominent part in civic life. He was a member of the board of education in Little Rock (1906-7), and served as chaplain general of the Arkansas State Guard in 1906. In Cleveland he was a member of the Charter Commission (1920) and president of the Cleveland Society of Sociology (1922-23). In Philadelphia he was chairman of the Mayor's Vice and Crime Commission (1937), and recommended the reform of the parole system for the state of Pennsylvania.

Throughout his career Wolsey was a champion of American Reform Judaism. In 1942 he was one of the moving forces that brought a group of non-Zionist rabbis together in Atlantic City, N. J., to consider the whole relationship of Reform Judaism to Jewish nationalism and its ramifications, and was acting chairman of a group of rabbis who were in agreement with the purposes of that meeting.

WOMAN. The physical, mental and spiritual similarities and disparities between men and women are carefully noted in Jewish literature and are given full consideration by Jewish law. The number of disparities

Louis Wolsey

was so great as to cause the rabbis to remark that "women are a nation unto themselves" (*Sab.* 62a). Realizing that women mature more quickly, both physically and mentally, than men, Jewish law provides that girls attain their legal majority at the age of twelve and boys at thirteen. Though women mature more rapidly in intellect, men continue their development for a longer period; it is therefore stated that at the age of twenty men and women have reached the same level of mental development (*Midrash Gen.* 14:7). The signs of physical maturity are noted in detail in the Talmud (Maimonides, *Mishneh Torah, Hilchoth Ishuth* 2:7).

Although the Bible and the Talmud had occasion to enumerate some of the most common failings of women, in particular loquacity and fondness for gossip (*Kid.* 49b), as well as jealousy, curiosity, haughtiness, talebearing and gadding about (*Midrash Gen.* 18:2; 45:5), words of praise for women are far more frequent in Jewish literature. Man and woman were created in full equality in the image of the Lord (*Gen.* 1:15); the Talmud, basing itself on the Bible, remarks that women possess more intuitive wisdom than do men (*Nid.* 45b). The Bible's many glorious descriptions and praises of women's sterling qualities are well known, especially the acrostic poem in *Prov.* 31:10-31, which is recited every Friday evening by the husband in honor of his wife.

Men and women were subject to the same punishments for infringement of the laws laid down in the Bible and legal codes. However, since the woman was burdened with numerous household duties, she was exempted from those religious obligations for the performance of which a definite time was set (*mitzvath 'aseh shehazeman gerama*), such as laying phylacteries (*Kid.* 29a), and from such other obligations as propagating the species and studying the Torah (*Kid.* 34a). This rule did not apply to precepts which contained both a positive and negative aspect, such as the keeping of the Sabbath. In exempting women from these laws the rabbis pointed out that it was not the quantity of precepts observed which was most important, but rather the zealousness with which they were performed (*Seder Eliyahu Rabbah* [9] 10). Women were the first to evince willingness to accept the Torah, and they did not participate in the sins of the worship of the golden calf and the sending of the spies. It was through the merits of women that the Israelites were redeemed

from Egypt (*Sotah* 11b). Two books of the Bible, *Ruth* and *Esther*, are named after women. Sarah, however, was the only woman to whom God spoke directly.

Women are the equal of men in most legal rights, duties and provisions. The main exception is their disqualification to act as witnesses in most cases of criminal and civil law, though their testimony was accepted in questions of religious law. The main reason for this disqualification was the realization that women are often swayed by their emotions, as a result of which their evidence may be colored or distorted. For the same reason women were not permitted to serve as judges. In no case did these disabilities wreak any hardship on women.

In many instances the Bible goes out of its way to insure that women will be protected. There were special provisions to spare the widow from financial distress. The honor and purity of women were protected in such laws as those which provided that a violated captive of war could not be sold as a slave but should be married or freed, that one who had seduced or raped a girl had to marry her, and that prostitution was not to be tolerated.

The main function of woman was that of presiding genius and guardian of the home. "The home is the real temple of woman, the education of her children is her divine service, and her family is her congregation" (Remy). It was her duty to supervise all domestic matters—the maintenance of the dietary laws (Kashruth), the home celebration of the Sabbath and festivals, the early education of her sons and a good measure of the education of her daughters. The wife also encouraged her husband to study Torah, and examples were quoted to show that the influence of wives upon their husbands is more directed toward religious ends than contrariwise (*Midrash Gen.* 17:12). As a rule women never studied Torah as academically as men, but by constant practice they became familiar with the main body of the everyday laws. Many women are recorded as being Torah scholars in the fullest sense of the word. The legal opinions of Beruriah, wife of Meir, are quoted with deference in the Talmud. The wife of Jacob ben Judah Mizrahi continued to direct his Yeshiva after his death. The daughter of the exilarch Samuel ben Eli of Baghdad and Miriam Shapira both taught Torah to male students from whom they were separated by a curtain.

A special literature, generally written in the vernacular, was created for the spiritual edification of women. The most famous book of this genre is the *Tzeenah Ureenah*, a Yiddish translation of Haggadic and Midrashic passages referring to the Bible text. Since its first publication in 1615 the book went through about seventy-five editions and was read faithfully by most women on the Sabbath. Ethical and Musar works were written or translated in their behalf. Books of instruction on the religious duties of women have been composed in the language of almost every country where Jews have resided.

The tender feelings of women were taken into consideration in many ways. For example, they were given precedence over men in receiving charity and clothing (*Yeb.* 100a). Unlike men, women could not sell themselves or be sold as slaves to pay for their thefts. They might not be given charity in private lest their reputation suffer by it. For the same reason women were not allowed to purchase slaves. The rabbis believed that men and women should not be together during worship, and therefore a special compartment or balcony was built for them in the synagogue. The Talmud did not consider it dignified for women to be exposed to the roughness of everyday life, quoting *Ps.* 45:14, "The king's daughter is all glorious within" (*Yeb.* 77a). Certain customs were adopted to please the womenfolk (*Hag.* 16b).

By nature a woman's main function is to act as a helpmate to her husband. Marriage is more than a mere civil contract; it is a sanctification before God, a spiritualization of earthly instincts, and the family is a unit for the perpetuation of God's Torah. An unmarried man is without blessing, joy or good, and is not even considered a man (*Yeb.* 62b-63a). A beautiful wife, beautiful without cosmetics, doubles the days of her husband and increases his mental comfort (*Yeb.* 63b; *Ber.* 57b). As the eyes are the gates of the soul, beautiful eyes are taken as an indication of inner goodness (*Taan.* 24b). Short engagements were preferred, and individuals were told not to take a mate in whose family certain diseases were hereditary. A great disparity in ages of the married pair was to be avoided, and the Talmud very realistically asserts that a father who marries off his young daughter to an old man virtually forces her to be unfaithful to him (*Sanh.* 76a). Marriages for money or position were denounced in bitter invective (*Kid.* 70a), and one who has thoughts of another while on the marital bed is guilty of mental adultery, which is "as bad as real adultery" (*Tanhuma,* edit. Buber, *Nasso* 13). For holidays the husband had to buy his wife new clothes and finery, and he had always to guard himself against causing his wife to shed tears, for God counts the tears of women.

The husband's duties to his wife are: food, shelter, clothing, marital relations, medical attention, and furnishing ransom if she is taken captive. If he is unwilling or unable to fulfil any of these duties he must give her a divorce. He may also be forced to divorce her if he is guilty of infidelity or mental cruelty, acquires a loathsome disease, engages in an obnoxious occupation, or restricts her freedom of movement. If he divorces her for any of these reasons he must pay a sum stipulated at the time of marriage (the Kethubah). The wife may be divorced if she does not grant her husband connubial rights or is seriously lax in religious matters. The Talmud commands a man to treat his wife and children better than himself (*Hul.* 84b). The obligations of a husband to his wife are thus more numerous than her reciprocal duties. The goodness of a good wife is infinite, while one who suffers from a bad wife will be spared some of the torments of Gehinnom (Purgatory; *Erub.* 41b). As women prefer domestic accord, the husband is not believed when he contends that his wife starts domestic quarrels (*Eben Haezer* 154:3). The rabbis relaxed certain laws of the Sabbath, of mourning, and of the period of menstrual separation, permitting women to beautify themselves so that they "should not become displeasing in the eyes of their husbands."

Some traces of the matriarchate in the period of the Bible have been found by Aptowitzer. Polygamy and concubinage seem to have disappeared by the time of the Second Commonwealth (6th cent. B.C.E. to 1st cent. C.E.), and there are almost no records of actual polygamy in the Talmudic period (up to 500 C.E.). Rabbenu Gershom, about 1000, forbade polygamy and the divorcing of a woman without her consent. Polygamy still existed in the 20th cent. among the Oriental Jews of Moslem countries, where the decree of Rabbenu Gershom was not accepted. During the Middle Ages many changes were made by the rabbis to further the interests of women. For instance, it was decreed in one place that a widow should receive one half of her husband's estate, although as a general rule a widow

was supported from her husband's estate as long as she did not collect her Kethubah. In the late Middle Ages many women began to engage in commerce so that their husbands could devote their time to scholarship, though the Talmud opposed a husband's relying on his wife's earnings. This necessitated certain changes in the legal status of women. For example, wives with businesses of their own were treated as independent principals rather than as agents of their husbands. It is generally admitted that the social position of the Jewish wife in the Middle Ages was much superior to that of her Christian or Moslem compeers.

The rabbis especially praised the charitableness, kindheartedness and modesty of women. Other observations concerning women are the following:

"Women from six to sixty are always willing to dance" (*M.K.* 9b).

"A woman is jealous only of other women's beauty" (*Meg.* 13a).

"A woman's weapons are always with her" (*Yeb.* 115a).

A man suffers from continence more than a woman does. Secrets should under no circumstances be revealed to a woman. Judah ibn Sabbatai (13th cent.) wrote a satire against women and marriage, which was answered by Jedaiah Bedaresi in his *Oheb Nashim* and by the satirist Isaac in his *Ezrath Nashim* (Davidson, Israel, *Parody in Jewish Literature,* 9).

The beauty of women had always been a snare to the instincts of man. The Midrash explains that Eve was created after Adam so that he could be reminded, when he complained about her, that it was he who had prayed to God to create a companion for him. Abel's beautiful wife was one of the main causes of strife between him and his brother Cain. The Talmud records the prayer of an exceptionally beautiful girl that men should not be led to sinful thoughts by her beauty. A man is not allowed to recite certain prayers in the presence of a woman who is not fully dressed. This law changes somewhat with the modes of dress followed by various groups of Jews at various times (*Orah Hayim* 75). For social and religious reasons suffrage was not extended to women in the Middle Ages, but in modern times they have been granted the vote in European Kehillahs. According to the aforementioned principle that women can not be judges or legislators the extreme Orthodox group refused to participate in the elections for the Jewish National Council (Vaad Leumi) in Palestine, because women were given the right to vote. More moderate Orthodox Jewish leaders, such as David Hoffmann, were of the opinion that although women could not hold office (passive suffrage) it was legal for them to vote (active suffrage).

Jewish women have distinguished themselves in practically every field that Jewish men have. The matriarchs were almost as much esteemed as the patriarchs. Miriam was one of those who brought about deliverance from Egyptian bondage (*Micah* 6:4); Deborah was one of the Judges; Huldah was one of seven prophetesses; Athaliah and Salome Alexandra reigned over the Jews. During the medieval period there were a number of woman scribes, copyists, translators, typesetters and publishers. In the middle of the 19th cent. the "Maid of Ludomir" functioned as a Hasidic Rebbe and had many pious adherents. The many famous Jewesses who presided over salons in 18th cent. Germany were of great importance in inspiring and supporting contributions to literature, philosophy, sciences and the arts. The courage and fortitude of the women pioneers (Halutzoth) in modern Palestine, who insist on standing side by side with the men in the most arduous and dangerous work, make them worthy descendants of their ancestresses Jael, Judith and Hannah, the mother of the martyred seven sons. In the 19th and 20th centuries many women's organizations were created, such as Hadassah, the National Council of Jewish Women and the women's branch of the Mizrahi. These have issued special periodicals and publications of interest to Jewish women.

The following is a list of the outstanding women whose biographies and some of whose portraits may be found in this encyclopedia:

Aaronsohn, Sarah, the "Jeanne d'Arc of Palestine," 1891-1917.
Abarbanell, Lina, actress and singer, 1852-1922.
Abigail, wife of David.
Abramowitz, Bina, Yiddish actress, 1865- .
Adler, Nettie, communal worker, 1868- .
Adler, Sarah, Celia, Frances, Julia and Stella, actresses.
Adlerblum, Nima Hirschensohn, author and communal worker, 1891- .
Aguilar, Grace, writer, 1816-47.
Akerman, Rachel, German poetess, 1522-44.
Allen, Anna, communal worker, 1800-88.
American, Sadie, communal leader, 1862- .
Andrews, Esther M., civic worker, 1861-1938.
Antin, Mary, author, 1881-.
Apolant, Jenny, champion of women's rights, 1874-1925.
Aria, Eliza, journalist, 1866-1931.
Arnstein, Fanny von, philanthropist, 1757-1818.
Arnsztajn, Felicya, Polish author, 1865- .
Ascarelli, Deborah, Hebrew poetess, 16th and 17th centuries.
Askowith, Dora, historian, 1884- .
Assing, Ludmilla, German and Italian author, 1827-80.
Athaliah, queen of Judah, 842-836 B.C.E.
Ayrton, Hertha, physicist and inventor, 1854-1923.
Baker, Belle, singer, 1898-.
Balabanoff, Angelica, socialist leader, 1877- .
Bamberger, Florence Eilau, educator, 1882- .
Baron, Deborah, short story writer.
Barron, Jennie Loitman, judge, 1891- .
Bath-sheba, wife of David and mother of Solomon.
Bauer, Marion Eugenie, composer, 1887- .
Baum, Vicki, novelist, 1888-.
Bayes, Nora, actress, 1880-1928.
Behrend, Jeanne, musician, 1911- .
Belisario, Miriam, author, 1820-85.
Bella, Talmudist, 1564-1622.
Bellette, scholar, 11th cent.
Belmonte, Benvenida Cohen, Spanish poetess, 18th cent.
Berend, Alice, German writer, 1878- .
Berend, Charlotte, artist, 1880- .
Berenice, sister of Agrippa II, 1st cent.
Berg, Gertrude, actress and dramatist, 1899- .
Bergner, Elisabeth, actress, 1900- .
Berlin, Fanny, surgeon, 1852-1921.
Bernhardt, Sarah, actress, 1844-1923.
Bernson, Edith Jane, aviatrix, 1897- .
Bernstein, Aline, stage designer, 1882- .
Bernstein, Elsa Porges, German poetic dramatist.
Bernstein, Lena, aviatrix, d. 1932.
Bernstein, Pearl, public official, 1904- .
Bernstein, Theresa F., artist, 1903- .
Beruriah, wife of Meir, 2nd cent.
Besso, Amalia Goldman, Fascist party leader, 1857-1929.
Bildersee, Adele, educator, 1883- .
Blind, Mathilde, writer, 1841-96.
Bloch, Elisa, sculptress, 1848-1904.
Bloch, Regina Miriam, writer, 1889-1938.
Bloch, Suzanne, musician, 1907- .
Block, Anita, author, 1882- .
Blondell, Joan, actress, 1909- .
Bloomfield-Zeisler, Fanny, pianist, 1863-1927.

WOMEN'S INTERNATIONAL ZIONIST ORGANIZATION (WIZO), association of Jewish women, founded at London in 1920, at the first Zionist Congress after the first World War, to assist the Zionist cause through the following program of action:

1. To awaken, stimulate and organize the consciousness of the Jewish women of the Diaspora.

2. To promote and provide the vocational and agricultural training of pioneer women in Palestine, and make them self-supporting in their future life in the National Home.

3. To promote child welfare throughout the land.

4. To support the two national colonizing funds, the Keren Hayesod and Keren Kayemeth.

For this purpose the following institutions were created in Palestine:

Agricultural schools at Nahalal (founded by the WIZO Canadian Hadassah organization), and Ayanoth, near Nes Ziona (founded by the Roumanian WIZO), and four training farms for girls at Nachlath Yehudah, Petach Tikvah, Shechunath Boruchov and Afule.

A domestic science school at Nahlath Isaac, a suburb of Tel-Aviv.

A baby home in Jerusalem.

A mothercraft training center in Tel-Aviv.

Twenty-three infant welfare stations, of which three in Tel-Aviv have been taken over by the municipality.

A network of creches, playgrounds, milk centers, holiday homes and summer camps, run by the WIZO alone or in cooperation with Hadassah.

Trade schools for girls old enough to leave school, in Haifa and Jerusalem.

Evening classes for teaching, cooking, typewriting and various handicrafts.

WIZO cooperative shops where the products of home industry made by middle-aged women immigrants are sold.

The WIZO house in Tel-Aviv, which acts as an advisory bureau for training and employment, and serves as a center for clubs, lectures, exhibitions and other WIZO activities.

The organization also maintains a system of ambulant teachers who bring instruction to the settlements.

By the end of 1942 thousands of women had passed through the WIZO training schools and had been absorbed into the economic life of Palestine as managers of various institutions, farmers, farmers' wives, factory workers, cooks, domestic helpers, trained nurses, dressmakers, and the like. They have raised the standards in these fields, and spread the appreciation of health and efficiency. It is through WIZO's instrumentality that Palestine became "woman-training-minded." During the second World War these courses became a very important factor in the war production, since it became possible to replace the fighting men who had left fields, farms, workshops and factories by trained women, who were also found to be the best material for the Auxiliary Training Service (ATS).

At the last census (1939) there were WIZO branches in forty-five countries and about 108,000 members. By agreement with Hadassah, there are no branches in the United States. The WIZO Executive is elected at biennial conferences of representatives of the constituent federation; it is divided into a Palestine section which carries out the program of activities, and a London section which makes Zionist propaganda and assumes responsibility for the budget. In 1943 Mrs. Israel M. Sieff was chairman of the London Executive, Mrs. Edwin Samuel was chairman of the Palestine Executive, and the Viscountess Samuel and Mrs. Chaim Weizmann were honorary presidents of the organization.

VERA WEIZMANN.

WOMEN'S LEAGUE OF THE UNITED SYNAGOGUE OF AMERICA, *see* under UNITED SYNAGOGUE.

WOMEN'S ORGANIZATIONS. The formation of special groups of women in Jewish communities evidently began in Europe in the early modern period, after the de-orientalization of the attitude toward women. A Hebrath Nashim, or women's society, is known to have existed in Rome in 1617.

The structure of the organizations, however, even in the New World, remained local. In the United States the first women's group on record was the Female Hebrew Benevolent Society, founded in Philadelphia in 1819 by Rebecca Gratz, Mrs. Aaron Levy and Hannah Levy. With the approach of emancipation for women in the 20th cent., the structure began to change until it acquired not only a national but an international aspect. Social welfare, education, women's welfare, and finally the several segments of Jewish political life provided the purposes for the groups.

Among the early national societies were the National Council of Jewish Women in the United States (1893), the Union of Jewish Women in England (1902), the Jüdischer Frauenbund in Germany (1904) and the Joodsche Vrouwenraad in Holland and Belgium. An International Council of Jewish Women was founded in 1922, but it did not include the women's organizations of Switzerland, France and Austria.

Zionism, which gave women full suffrage rights from the beginning, has been the aegis of several important national organizations which used their funds for Palestinian projects. The Verband Jüdischer Frauen für Kulturarbeit in Palästina, established in The Hague in 1907, with headquarters later in Berlin, enlisted the efforts of Jewish women on the European continent for reconstructive activity in Palestine. Hadassah, which had its inception under Henrietta Szold in the United States in 1912, became the largest such body in that country, and the Women's International Zionist Organization (WIZO), founded in England in 1920, represented largely British Jewish women's cooperation

in Palestine. The Women's League for Palestine (United States, 1928) was a newer national group with Palestine as the object of its endeavors, and the Pioneer Women's Organization (1925) represented Labor Zionism.

In the United States, in 1943, there were, in addition to the innumerable local women's groups and the special auxiliaries, more than twenty women's societies of significance. These included:

Alpha Epsilon Phi Women's Fraternity, founded in 1909, with a membership of more than 5,000.

Conference Committee of National Jewish Women's Organizations (1929), with nine constituent organizations.

Hadassah (1912). With this was affiliated Junior Hadassah (1920).

Histadruth Ha Rabboneoth (1941), an organization of rabbis' wives.

Iota Alpha Pi (1903).

Mizrachi Women's Organization of America (1925), the women's auxiliary of the Mizrachi Organization of America.

National Council of Jewish Women (1893), an organization fostering many types of social welfare and educational activity. With it was affiliated the National Council of Jewish Juniors (1919).

National Federation of Temple Sisterhoods (1913), a coordinating group of the sisterhoods affiliated with the Union of American Hebrew Congregations.

Phi Sigma Sigma Sorority (1913).

Pioneer Women's Organization (1925).

Sigma Delta Tau Sorority (1917).

Women's American Ort (1927), the women's group of the American Ort.

Women's Branch of the Union of Orthodox Jewish Congregations of America (1923), an affiliate of the Union of Orthodox Jewish Congregations of America. A subsidiary group of the Women's Branch was Habanoth, which includes girls of high school age.

Women's Division of the American Federation of Polish Jews (1932), a group sponsoring aid for Jews in Poland and for refugees.

Women's Division of the American Jewish Congress (1933), sponsoring the support of American Jewish Congress activities and of the Congress Refugee Houses, hostels for refugees.

Women's Division of the Palestine Hebrew Culture Fund (Keren Hatarbut, founded in 1939), supporting cultural activities in Palestine.

Women's League for Palestine (1928).

Women's League of the United Synagogue of America (1917), representing the Conservative synagogue membership.

Women's Supreme Council of the B'nai B'rith (1940), an auxiliary supporting the activities of the B'nai B'rith.

WOOD-BEARING, FEAST OF, *see* AB, FIFTEENTH OF.

WOODBINE, a borough in Cape May county, New Jersey, about thirty miles southwest of Atlantic City, the seat of a Jewish industrial and small agricultural settlement. The colony was founded in 1891 by the Woodbine Land and Improvement Company, an adjunct of the Baron de Hirsch Fund, on 5,300 acres of uncleared land in the south of New Jersey, parcelled off into thirty-acre farms, with 800 acres set aside for a town development. About sixty immigrant families, mainly of South Russian origin, were settled as pioneers on the land, under the superintendence of the agricultural expert Professor Hirsch Leib Sabsovich. The intention of the founders was to establish an exemplary farming settlement as a better way of life for Jewish immigrants in the New World. But the site was ill-chosen, the settlers had no experience and very little capital, and in a short time the manufacturing industries which had to be introduced into the village as supplementary employment far outstripped the agricultural pursuits; the settlement became perforce an industrial center, with a few outlying small farms.

The colony's most notable contribution to Jewish agricultural education was the Woodbine Agricultural School, established in 1895 as the first secondary agricultural school in the United States. The school was the special creation of Sabsovich. Among those trained there, and who subsequently had distinguished careers in their several fields, were Jacob G. Lipman (d. 1939), world-famous soil expert; his brother, Charles B. Lipman, plant physiologist; and the entomologists Jacob Kotinsky and David Fink. The school was closed in 1917 and its buildings and farms were donated to the state of New Jersey for the Institution for Feebleminded Males, established in 1921.

After more than a decade of difficult pioneer adjustment, Woodbine was incorporated as a borough, in 1903, and thus became the first all-Jewish political unit in the United States. Sabsovich was elected the first mayor. By 1905 there were in the place about 350 families, numbering 2,000 persons, of whom 94 per cent were Jewish. The majority were employed in the town's industries. Attentive to the economic welfare of the inhabitants, the Baron de Hirsch Fund provided subsidies to various industries to locate in the town, which was not naturally adapted to industrial enterprise. Chiefly, clothing factories were established; notably, a machine shop operated for twenty-seven years until 1918; later a rubber factory was opened. The inhabitants were involved in an ebb and flow of economic prosperity, through general industrial conditions and the peculiar vicissitudes of local enterprise.

In the period of the second World War three clothing factories manufacturing for government needs were employing the majority of the townspeople, and in addition a large commuting population of workers. The highest total of wages in the history of the town was paid out in 1942. By that time the farming in the community had reduced itself to a pretty steady level of just under fifty small farmers, most of them engaged in poultry raising, which had been introduced in 1930, and the rest in truck and orchard farming.

The Woodbine Brotherhood congregation was organized in 1894, and with individual members contributing personal manual labor as well as money, a synagogue was erected. At one time the whole community went to work on a road-building job and contributed their earnings to the synagogue fund. The ordained rabbis who served the Woodbine Brotherhood included Harold Lasker (1938-39), Alter Abelson (1939-41), and Henry J. Benn (1941-). There was, in 1943, an Orthodox Synagogue, Tifereth Israel.

The Woodbine Kehillah Council was organized, and included the Woodbine Brotherhood, the Ladies' Auxiliary, the Parent-Teachers Association and the Hevrusa Club. An active Hadassah group was formed.

For the more general needs of the community, and particularly to interest the youth who tended to leave Woodbine, a Community Center with an unusually active program was founded, and a spacious clubhouse dedicated in 1928. Destroyed by fire, it was replaced by a playground and a children's playhouse. The Community Center served not only the Jewish population, which in the year 1943 constituted about 40 per cent of the total population of 2,111 (census of 1940), but also the non-Jewish groups as

well, including a large percentage of Negroes, Poles and Italians. In 1930 the Community Center Council was established with seven Jewish and three non-Jewish representatives of the town. The aid of the Baron de Hirsch Fund to the center had to be substantially diverted to families of German Jewish emigrants who began to be settled in the town in 1933. In 1943 there was a total of fifteen such refugee families, with six engaged on farms.

Although the proportion of Jews had thus sharply declined, Woodbine continued to be characterized as an all-Jewish town. Mayors who succeeded Sabsovich were Joseph Rabinowitz (1912-14), Samuel Greenstein (1930), Nathaniel Rosenfeld (1936-38), and Joseph Levenson (1938-40). The majority of the councilmen were also Jewish, as were the majority of members of the board of education and the board of health. The general economic level of the town, where most of the residents came to own their homes, did not tend to rise much above comfortable livelihood, and the limited taxes were used mainly to support the excellent schools. The town itself, with broad streets and tree-lined avenues, was kept in attractive condition, avoiding any characteristic drabness of an urban lower middle-class factory center. In 1942 to 1943 the Baron de Hirsch Fund formally withdrew its last interest in the settlement; rent-free factory buildings had already been deeded to the enterprisers, and the Woodbine Land and Improvement Company turned over as a gift all its land to the borough of Woodbine.

WOODWARD, HELEN (née Rosen), author, b. New York city, 1882. From 1903 to 1923 she was active in the advertising business in New York city, and in her first book, *Through Many Windows* (1931), she described her rise from a stenographer to an important position in the advertising world.

Her other books, some of them written in collaboration with various authors, include: *Two Hundred Years of Charleston Cooking* (1931); *Way of a Lancer and Lances Down* (1932); *Queens in the Parlor* (1933); *Three Flights Up* (1935); *It's An Art* (1938); *Bowling Green Murders* (1940). She married William E. Woodward, noted non-Jewish historian, biographer and novelist.

Lit.: Benedict, L., in *American Hebrew,* Oct. 1, 1926.

WOOLF, ALBERT EDWARD, chemist and inventor, b. New York city, 1846; d. New York city, 1920. He was the son of Edward W. Woolf, founder of *Judy,* the first illustrated comic paper in the United States (1837). In 1874 Albert Edward Woolf introduced peroxide of hydrogen into the bleaching industry, and he was the first to show its antiseptic properties. He discovered the electro-decomposition of seawater for sanitation, which is now used for purifying drinking water. His method was employed by the American government to combat yellow fever in Cuba.

Woolf discovered the method of reclaiming marshy land by killing the germ of putrefaction and propagating the germ which transforms refuse into fertile soil. He demonstrated the value of hypochlorites, which later came to be employed by the United States, France and Great Britain in their navies. Woolf also discovered methods of treatment for various maladies, such as Riggs Disease.

WOOLF, LEONARD SIDNEY, writer and publisher, b. England, 1880. He was educated at Cambridge and entered the Ceylon Civil Service in 1904. After his return to England in 1911 he began to write; his first published book was *The Village in the Jungle,* a fictionalized study of Ceylon life (1913). This was followed by *The Wise Virgins* (1914). In 1917 Woolf and his wife, Virginia Woolf, the novelist, established the Hogarth Press in London; under its aegis appeared numerous belletristic and theoretical books of an unorthodox character. Woolf's later work consisted largely of studies in sociology and economics, written with simplicity and clarity, and expounding a socialist point of view.

Among his published books were: *International Government* (1916); *Cooperation and the Future of Industry* (1918); *Socialism and Cooperation* (1921); *Hunting the Highbrow,* a collection of essays (1921); *Imperialism and Civilization* (1928); *Quack, Quack,* a study of dictatorships (1935); *Barbarians at the Gate* (1939); *The War for Peace* (1940). His most important study was *After the Deluge* (vol. 1, 1931; vol. 2, 1939), a survey of the deciduous as well as the nascent factors and tendencies that brought about the first World War and its ensuing events. Woolf was the editor of the *Political Quarterly* (1931-), and the honorary secretary of the advisory committees on international imperial questions to the Trade Union Congress and the Labour Party.

WOOLF, SAMUEL JOHNSON (pen name, S. J. Woolf), artist and writer, b. New York city, 1880. He was a grandson of Edward Woolf, one of the founders of the New York Philharmonic Orchestra, and a brother of the playwright Edgar Allan Woolf. He studied at the College of the City of New York (B.A., 1899) and at the Art Students' League. Woolf painted the well-known portraits of Mark Twain, John Finlay, Solomon Schechter, Justice George Ingraham and other celebrities. During the first World War he served as correspondent with the American Expeditionary Forces, making a series of widely published portraits of American generals and troops. He was awarded first prizes at the Louisiana Purchase Exhibition (1903), the Hallgarten prize of the National Academy of Design (1904), and at the Appalachian Exposition (1910), and his works were permanently acquired by the Metropolitan Museum of Art, the Public Library, Hunter College and the College of the City of New York, all of New York city, and other museums and public buildings in the United States.

Woolf was a frequent contributor to the New York *Times.* His writings include: *A Short History of Art* (1909); *Drawn from Life* (1931); *Here Am I* (1941). In 1942 he received the Townsend Harris Medal, in recognition of his "notable post graduate attainments," awarded to him by the College of the City of New York.

WOONSOCKET, R. I., *see* RHODE ISLAND.

WORCESTER, a city of Massachusetts, with a population of 193,694 (census of 1940), including, according to a community census taken in 1942, a Jewish population of somewhat more than 9,500. The history of the Jews in this community can be traced back to 1783, when a Lopez family owned a general store in Leicester, a nearby community. After the Civil War a small number of Jewish families established themselves at Worcester as store owners. Among these were the Gross and Strauss families. The first Jewish settlement of any size began in 1870, when a group of Jews headed by Abraham Feingold and Z. Epstein came to Worcester. By 1877 the community was large enough to organize its first synagogue, the Sons of Israel, and shortly afterward laid out its first burial ground in Hope Cemetery. Landsmanschaft organizations followed in the early 1890's. After 1900 the population increased rapidly. In 1888 it was estimated that the Jews in the city numbered approximately 200. By 1905 their number was 1,000, and in 1915 it was 8,000.

The early Jewish settlers in Worcester were for the most part peddlers of various kinds. Later, some opened mer-

cantile houses to supply this peddling trade. With the influx of the mass Jewish population, Worcester Jews engaged as laborers, and in 1902 the first branch of the Workmen's Circle was organized, followed later by two additional branches. The lodge of the B'nai B'rith was organized in 1904.

Following the organization of the first Orthodox congregation, a number of others were formed. Sons of Abraham was founded in 1888 and moved into its synagogue that year; this was replaced by a new structure in 1915. Tiferes Israel was founded in 1904 and moved into its first synagogue the same year. A new house of worship was erected in 1914. Both these congregations were served in 1943 by Rabbi Mordecai J. Golinkin. In all, in course of time, and particularly after 1905, seven Orthodox congregations were instituted by the community: Sharai Torah, Sons of Israel, Sons of Jacob, Sons of Abraham, Agudas Israel Anshe Sefard, Congregation Tiferes Israel and Tower of Truth Synagogue. Of these only Congregation Sharai Torah was, in 1943, served by a full-time rabbi, Jacob Weisenberg. Other Orthodox rabbis serving the community were Rabbi L. Hurwitz of Congregation Sons of Jacob and Rabbi A. M. Kaufman of Congregation Agudas Israel Anshe Sefard. The Vaad Hair was organized in 1921. Together with the Hebrah Kaddisha (founded in 1877), it employed a full-time English-speaking rabbi, Jacob Leibowitz (1935-36). In 1943 Gersion Appel was head, dividing his time among five of the Orthodox congregations.

Conservative Beth Israel Synagogue was organized in 1924, and built a house of worship in 1939. In 1940 Rabbi Israel Chodos was called to occupy its pulpit; he was succeeded in 1942 by Rabbi Emanuel Green.

The Reform members of the community organized Temple Emanuel in 1921, and called as their first rabbi Maurice M. Mazure (1923-26). He was succeeded by Julius Gordon (1926-29) and Levi A. Olan (1929-).

The Hebrew Free School was organized about the year 1905, and built its school in 1910. The Tarbuth was housed in the cellar of a small synagogue. These two institutions combined in 1927 to become the Worcester Ivriah School. The general communal structure of Worcester developed until in 1943 there were approximately thirty-three parent organizations of social, civic, religious and fraternal nature. These included notably the Jewish Social Service Agency, formerly the United Jewish Charities (founded in 1920); the Jewish Home for Aged and Orphans (organized in 1915); the Jewish Welfare Fund (1939). National organizations represented were the Zionist Organization of America, the Senior Hadassah, and the National Council of Jewish Women. In 1936 the Jewish Community Council came into existence, representing all major organizations.

In 1943 the Jews of Worcester were engaged in every variety of occupation, with a not unduly high proportion in the professional and "white collar" groups. Jewish doctors represented about 10 per cent of the total of physicians in practice in the city, and other professional groups had a like percentage. A large group were employed as skilled or unskilled workers. But only a small percentage outside of the individually owned tailor shops were in the garment industry, numerous firms of which had removed from Worcester during the 1930's. Small retail merchants were numerous in 1943, while the number of peddlers was negligible.

Jews in public office in Worcester included Louis Glixman, first Jew to hold the office of city councilman. Elias Pofcher was alderman-at-large in the late 1930's. In 1943 Archibald M. Hillman was assistant city solicitor; Jacob Asher was special justice of the Worcester District Court; and Wilfred B. Feiga was assistant clerk of the superior court.

JACOB GROSS.

WORDS, PLAY ON. Plays on words are extremely frequent in the Bible, the Talmud and later Jewish literature. They serve the purpose of explaining unusual words, or bringing striking and unrelated ideas into connection, thus furnishing a ready source for wit, humor, compliment or satire. According to the main reasons for such plays on words they can be divided into two main forms: the etymological and the esthetic. The former seeks to explain the meaning of another word; the latter is similar to rhyme, alliteration and assonance in poetry in that it strives to emphasize its point by the recurrence of a particular sound.

Etymological plays on words are found frequently in the Bible, especially in interpreting the names of the early personages. Thus every one of the twelve sons of Jacob is described as having been given a name by his mother on the basis of some event or idea that occurred either prior or just subsequent to his birth. The name Eve (*Havvah*) is interpreted as "mother of all the living" (*hai; Gen.* 3:20); that of Cain (*Kayin*) as from the expression "I have acquired" (*ḳanithi; Gen.* 4:1); that of Noah (*Noah*) from "he shall comfort us" (*yenahamenu; Gen.* 5:29). The name Isaac is given three explanations, all connecting it with the verb *tzahaḳ*, "to laugh" (*Gen.* 17:17; 18:12; 21:6). A similar play on words is that which connects the name Babylon (*Babel*) with the confusion of tongues (*balal*, "to confuse"). These etymologies, which often give a meaning to the name entirely different from its probable original sense, are to be distinguished from other cases in the Bible, such as Ichabod ("the glory is departed"; *I Sam.* 4:21), where the name is deliberately given in memory of an event.

Esthetic plays on words are of far more frequent occurrence in Jewish literature. They are intended to arouse the reader or listener by bringing together words of similar sound but different meaning. Thus the story of the Garden of Eden makes use of two different meanings of the word *'arum*: "naked" (*Gen.* 2:25) and "subtle" (3:1). Other similar combinations of similar sounds are *dam* ("blood") and *'adam* ("man"; *Gen.* 9:6), and Nabal and *nebalah* ("folly") in *I Sam.* 25:25.

The prophets and sages in particular make use of assonance in words to emphasize their messages; this served to make the saying easier to remember and to impress it upon the listeners. Among these are:

"He looked for justice (*mishpat*), but behold violence (*mispah*); for righteousness (*tzedaḳah*), but behold a cry" (*tze'aḳah; Isa.* 5:7).

"If ye will not have faith (*tha'aminu*), surely ye shall not be established" (*the'amenu; Isa.* 7:9).

"For that nation and kingdom that will not serve thee (*ya'abeducha*) shall perish" (*yobedu; Isa.* 60:12).

"'I see a rod of an almond-tree' (*shaḳed*). Then said the Lord unto me: 'Thou hast seen well; for I watch (*shoḳed*) over My word to perform it'" (*Jer.* 1:11-12).

"And He said: 'Amos, what seest thou?' And I said: 'A basket of summer fruit' (*ḳayitz*). Then said the Lord unto me: The end (*ḳetz*) is come upon My people Israel" (*Amos* 8:2).

"A good name (*shem*) is better than precious oil" (*shemen; Eccl.* 7:1. Cf. also *Song of Songs* 1:3).

Daniel's interpretation of four words indicating coins, Mene, Mene, Tekel, Upharsin, as a prophecy of doom to Belshazzar (*Dan.* 5:25-28) is an example of the use of different meanings of the same word or root to convey a moral lesson.

Another form of play on words was that of giving a well-known name another form which had an unfavorable meaning in order to cast scorn on it. Thus Baal-

zebul ("lord of the palace"), the name of a heathen god, is referred to as Baal-zebub ("lord of flies"); Amos changes the name of Beth-el ("house of God") to Beth-aven ("house of iniquity"; *Amos* 5:5, Hebrew), and the usage is carried on by his successor Hosea (*Hosea* 10:5). In later times the name of T. Annius Rufus, the Roman governor of Judea in the time of Hadrian, was turned into Turnus Rufus, as if to connect it with the Greek word *tyrannos,* "tyrant."

Still another literary device that is employed in the Bible is that of making puns on the names of various cities. There is a series of such plays on words in *Micah* 1:10-15.

In Talmudic literature plays on words are frequently invoked to convey a moral lesson. Thus in the sayings of the rabbis as recorded in *Aboth* there are such turns as *vedila mosif yasef* ("he who does not increase his knowledge decreases it"; 1:13), and *lefum tza'ara 'agra* ("according to the pain the gain"; 5:26). A proverb states that a man's character can be determined by three things: *koso, kiso vecha'aso* ("his cup, his purse and his anger"; *Erub.* 65b). A favorite method was that of bringing a new meaning into a Biblical passage by a change in a vowel of a word, making use of the formula "Do not read it as . . . but as. . . ." Thus in connection with the Biblical verse, *vechol banayich limmude 'adonai* ("And all thy children shall be taught of the Lord"; *Isa.* 54:13), the interpretation is, *'al tikre banayich 'ela bonayich* ("do not read 'thy children,' but 'thy builders' "; *Ber.* 64a). An elaborate play on words is found in the interpretation of the commandment to love the Lord "with all thy might" (*bechol me'odecha; Deut.* 6:5); it runs: *bechol middah umiddah shehu moded lecha have modeh lo bime'od me'od* ("Whatsoever measure He metes out to you, praise Him exceedingly"; *Ber.* 9:5).

There are frequent plays on words in the religious (Piyut) and secular Jewish poetry of the Middle Ages, although the effects in the latter, which is free to employ wit, are generally more felicitous than in the former, where the straining after striking assonances often produced a very artificial effect. Jewish popular proverbs, like those of all peoples, often turn upon puns, the similarity of the sound of words, or reinterpretation of well-known combinations. Thus the idea of not speaking evil of the dead is given in a proverb which combines the names of two successive Scriptural portions (Parashahs): Ahare Moth, Kedoshim (literally, "After death, holy"). SIMON COHEN.

WORK PROHIBITED ON THE SABBATH. The institution of the Sabbath as a day of rest from all work is distinctly stated in the Fourth Commandment (*Ex.* 20:10; *Deut.* 5:14). These passages, however, are merely general principles and do not define what forms of activity are forbidden on the Sabbath, although elsewhere in the Bible there are stories that indicate that among the forbidden types of work were gathering manna (*Ex.* 16:22-30), preparing it as food (verse 23), leaving one's residence (verse 29), kindling a fire (*Ex.* 35:3) and gathering wood (*Num.* 15:32-36). No business of any sort was conducted on the Sabbath (*Amos* 8:5); it is true that when the Jews settled again in Palestine after the Babylonian Exile Nehemiah had some trouble in enforcing this regulation (*Neh.* 10:32; 13). All these statements in the Bible, however, did not constitute a sufficiently accurate definition of the term "work."

The Talmudic rabbis settled the question for themselves by setting up thirty-nine main categories of work (*'aboth mela'chah*), based on the operations necessary for the erection of the Tabernacle. These are:

1. sowing.
2. ploughing.
3. reaping.
4. binding sheaves.
5. threshing.
6. winnowing.
7. cleansing crops.
8. grinding.
9. sifting.
10. kneading.
11. baking.
12. shearing wool.
13. washing wool.
14. beating wool.
15. dyeing wool.
16. spinning.
17. weaving.
18. making two loops.
19. weaving two threads.
20. separating two threads.
21. tieing a knot.
22. loosening a knot.
23. sewing two stitches.
24. ripping out to sew two stitches.
25. hunting a gazelle.
26. slaughtering.
27. flaying.
28. salting a hide.
29. curing a skin.
30. scraping a skin.
31. cutting up a skin.
32. writing two letters.
33. erasing to write two letters.
34. building.
35. pulling down.
36. putting out a fire.
37. lighting a fire.
38. striking with a hammer.
39. carrying objects from one domain into another (*Sab.* 7:2).

Of these thirty-nine classes, the last is the most inclusive, as it can be applied to practically every form of work not mentioned in the preceding thirty-eight. These regulations and others are discussed in elaborate detail in the tractate *Sabbath.*

In the post-Biblical period some additions were made to the thirty-nine classes of work, or amplifications of the individual classes were discussed. Thus the prohibition of riding on the Sabbath, not mentioned in the earlier sources, was added with the explanation that one who rode an animal on the Sabbath might be tempted to pull off a branch of a tree to use as a whip. When smoking tobacco came into vogue, the majority of rabbis decided to prohibit it on the Sabbath as a violation of the prohibition of kindling a fire. Scrupulous Orthodox Jews will not make or answer telephone calls, since lifting the receiver from the hook causes a light in the telephone exchange switchboard to light up. Another prohibition was that of any action that causes a sound, such as pressing the button to ring a doorbell.

On the other hand, exigencies of the time made it necessary to employ certain devices in order to relieve the rigors of the Sabbath prohibition of work. The institution of Erub, which turned an entire village or the Jewish quarter of the town into private property, made possible the removal of objects within the area. In cold climates it became impossible to do without fire, and this was solved by having the fires lit by a non-Jew (the "Shabbes Goy"). The Karaites, however, refused to accept this compromise. Further, work may be done on the Sabbath provided that it is necessary for the saving of human life. Nor does the Sabbath set aside the necessity of performing those acts which the Torah provides should be done at a fixed time, such as the Temple service and the circumcision of a boy.

All these prohibitions were dictated for the purpose of making the Sabbath a real holiday, a day of rest that would be pleasing to God. In modern times, however, many Jews are no longer able to observe all of them, while Reform Jews in particular reject the enumeration of specific acts as defining work and try to make their Sabbath observance conform to modern ideas of what is work and what is pleasure.

WORKERS' BANK, LTD. (Bank Hapoalim), a bank established in 1921 by the World Zionist Organization and the General Federation of Jewish Labor in Palestine. Its headquarters are in Tel-Aviv. The purpose of the bank is to finance the cooperative

movement and the mutual aid institutions of the Histadruth Haobedim (General Federation of Jewish Labor) in Palestine, and thus it differs from the labor banks established in other parts of the world at the end of the first World War. Elsewhere the banks were founded to distribute the reserve funds accumulated by trade unions; the Workers' Bank in Palestine had first to finance the workers' enterprises and to enable them to absorb large-scale immigration.

More than 100,000 shares of the bank were sold in the United States; from 1930 on a dividend of 4 per cent was paid. The loans are issued for the purpose of constructing houses and barracks in workers' suburbs and agricultural settlements, for the purchase of livestock, tractors and other farm implements, for the establishment of part-time farming for laborers employed in private colonies, for irrigation and as operating capital. Among the clients of the bank (1942) were more than 250 agricultural settlements, sixty-seven cooperative labor groups of workers in private colonies; sixty-four consumers' cooperatives, which had a turnover of £1,200,000 in 1941; agricultural cooperatives with an annual turnover of more than £1,000,000; producers' and service cooperatives, including transportation systems; loan and savings societies; the Kupath Holim (Histadruth sick-benefit society), supplying help to more than 300,000 annually; and various labor councils. Between 1922 and 1942 the Workers' Bank developed as follows:

	1922 Palestinian pounds	1942 Palestinian pounds
Paid up capital and surplus	24,000	221,000
Deposits and special funds for loans	10,020	530,857
Cash on hand	6,800	206,405
Outstanding loans	69,000	557,000

WORKMEN'S CIRCLE. The Workmen's Circle is a Jewish labor organization formed primarily for the purpose of mutual aid. In 1943 it had 750 chapters in the United States and Canada, and a national membership of 73,000. It is the largest organization of its type in the world.

The Workmen's Circle was founded in 1892, became a fraternal order in 1900, and was officially chartered in 1905. Its founders were Jewish immigrants from Eastern Europe who could not fit into the existing fraternal orders, consisting at that time of, and controlled by, the wealthier "German" Jews. These immigrant workers were prompted to band together for fellowship and friendship in a kind of social home. In addition, they were held together by the need to try to overcome through cooperative efforts some of the hazards of a worker's life in the America of the 1900's. It is characteristic that the official appellation decided upon—and still used in the Workmen's Circle—was the word "friend."

The initial fraternal benefits extended by the Workmen's Circle were sick benefit and cemetery-funeral provisions. Sickness benefit was especially important since these immigrants worked in sweatshops under unfavorable conditions, received inadequate wages, and hence in case of illness were truly helpless. Cemetery and funeral expenses were and still are relatively high for workers, and on an organized basis the early members of the Workmen's Circle were able to cope with it.

The fraternal structure of the Workmen's Circle became fuller in the course of the years. In 1943 it owned and operated its own sanatorium at Liberty, N. Y. (opened in 1910), for tuberculars among its members. The New York Workmen's Circle and the chapters in many other cities conduct medical clinics and sponsor medical departments for their members. There is a special aid fund for members over sixty-five years of age. New York city conducts a social service department offering guidance and advice to Workmen's Circle members on matters of vocation, education, and domestic problems.

But the Workmen's Circle does not confine itself to fraternalism in the narrow meaning of the word. It conducts numerous social and educational activities for its membership such as camps, lyceums, choruses, orchestras, dramatic groups. In the field of Jewish education its most noteworthy achievement is its network of schools (their establishment was authorized by the 1916 convention). It sponsors and supports 150 afternoon schools attended by 8,000 children. These children attend these schools five times a week and receive instruction in the Yiddish language, in Jewish history and literature, in the Jewish labor movement and in the biographies of fighters for freedom.

The Workmen's Circle publishes four monthly journals: in Yiddish—*The Friend* (from 1910), its official organ; *Kultur un Dertzieung,* issued by the Education Committee; *Kinder Tzeitung,* for the children of its schools; in English—*The Workmen's Circle Call,* its English official organ. Besides publishing these journals, it issued a number of textbooks. Over 500,000 copies of these had been sold up to 1943.

Since the Workmen's Circle is essentially a family organization, it organized a number of women's chapters (eighty-two) and (from 1929) youth chapters (seventy-five). It carries on varied youth activities, thus bridging the cultural gap between the older immigration generation and the younger American-born generation.

The Workmen's Circle occupies an important and unique place in Jewish life. It is acknowledged to be the representative of the progressive, labor-conscious sector in Jewish life. As such it is a part of the Jewish Labor Committee which is the general aid-agency of American Jewish labor. It aided every important Jewish cause, directed toward the Jewish masses, such as ORT, HIAS and the Jewish Federated Charities. In 1943 it was active in behalf of the war effort; over 5,000 of its members and sons of members were in that year in the armed forces of the United States, and it had bought, through its national office alone, close to a million dollars' worth of war savings bonds.

Ideologically, the Workmen's Circle is directed toward the Jewish masses; is closely affiliated with the Jewish trade union movement; fights for the preservation of the economic, civil, and political rights of the Jewish people in the countries where they live; supports all educational institutions making for the enrichment and preservation of the folk-language (Yiddish) and folk-culture of the Jewish people; and, finally, believes that the solution of the "Jewish question" is possible only in a free, democratic, cooperative world.

Its officers in 1943 were: Joseph Weinberg, president; Yechiel Eberil, vice-president; Saul Rifkin, treasurer; Joseph Baskin, general secretary; Benjamin Gebiner, assistant general secretary; Nathan Chanin, educational director; Israel Knox, director of the Youth and English-Speaking Division.

Its presiding officers up to 1943 were: Samuel Shapiro (1904-5), Harris Golding (1905-8), Joseph Weinberg (1908-9, 1923-25, 1927-30, 1932-35, 1937-39, 1941-43), Shabsi Boulgach (1909-11), Isaac Gotthelf (1911-12), Meyer Davidoff (1912-13), Samuel Jonas (1913-15), William Edlin (1915-16), Abraham Epstein (1916-20), Ephim H. Jeshurin (1920-21), Reuben Guskin (1921-23, 1936, 1939-41), Nathan Feinerman (1925-27), Nathan Chanin (1930-32, 1935-36).

WORLD, CREATION OF, *see* CREATION.

Session of the World Union for Progressive Judaism, held in July, 1918, in the chamber of the Prussian House of Lords at Berlin

WORLD, PRESENT; WORLD, FUTURE, *see* OLAM HAZEH AND OLAM HABA.

WORLD JEWISH CONGRESS, an association of Jewish communities and organizations throughout the world for the sole purpose of defending rights and interests which Jews have in common. It is not a parliamentary body and has no legislative power.

The World Jewish Congress is an outgrowth of the Comité des Délégations Juives which, at the end of the first World War, played an important part in the defense of Jewish rights at the Versailles Peace Conference (1919). The leaders of the Comité, in cooperation with the American Jewish Congress, summoned a number of conferences as a result of which the World Jewish Congress was organized at a meeting held in Geneva in 1936. Four hundred delegates, representing twenty-six countries, were present.

Because of the second World War, the headquarters of the Congress were moved to New York city. Other offices were, in 1943, maintained in London (European headquarters), Geneva, Sydney, Buenos Aires, and Mexico City.

The activities of the Congress are carried out under the direction of an executive committee. During the second World War these were chiefly attempts to alleviate the condition of Jews remaining in, and of those who had escaped from, countries occupied by the Nazis, and preparations for peace.

In 1943 this committee was presided over by Stephen S. Wise; the chairman of the administrative committee was Nahum Goldmann, and the chairman of the administrative council was Louis Lipsky.

Lit.: *Bulletin of the World Jewish Congress,* Sept., 1942 (vol. 1, No. 1) et seq.

WORLD UNION FOR PROGRESSIVE JUDAISM. The World Union for Progressive Judaism was launched in July, 1926, in London, after an International Conference of Liberal Jews, held at the Liberal Synagogue, London. A provisional committee was formed with Claude G. Montefiore as president, the Honorable Lily H. Montagu as honorary secretary, E. M. Joseph as honorary treasurer, and Mrs. J. Walter Freiberg, Ludwig Vogelstein, Rabbi Louis Wolsey of the United States, Rechtsanwalt Heinrich Stern, Rabbi C. Seligmann (of Germany), and Rabbi Israel I. Mattuck (of England) as vice-presidents.

The provisional constitution which was adopted arranged for the affiliation of organizations or groups of Progressive Jews, with the right of representation on the governing body.

The World Union in 1943 federated the Central Conference of American Rabbis, the Union of American Hebrew Congregations, the Union of Liberal Rabbis (Germany), the Jewish Religious Union (England), the West London Synagogue of British Jews (England), the Liberal Synagogue (Paris), and the Jewish Religious Union (Bombay).

The object of the World Union is to unite all sections of Progressive Jews in combatting religious indifference by revitalizing Judaism on progressive lines.

From its foundation, the World Union organized two conferences, the first in Berlin, in August, 1928, the second in London, in July, 1930. At both these conferences important contributions were made to the Liberal Jewish theology of the age and a stimulus was given to furtherance of the cause of religion in all parts of the world.

In the years when no Conference is held a bulletin is issued dealing with matters of religious importance. The first number of the *World Union Bulletin* appeared in December, 1929, and contained reports of the constituent organizations of the World Union, and reviews of developments of various kinds in many countries.

After its foundation, the officers of the World Union were in correspondence with men and women resident in countries in which no progressive organization exists. The need was stressed for a new presentment of Judaism, if the religion is to survive the passage of time in this crucial era. In many countries Jewish life was not alone disrupted but actually uprooted, and the practical problems of survival are paramount.

In each country there is a group of Jews devoted to their religion and anxious that it should preserve its hold over the young people at present drifting into a hopeless despond because of the onslaught of an atheistic and barbarous totalitarianism on civilization. The World Union had applications from many countries to send representatives to explain the principles of Progressive Judaism, and to try to reclaim for Judaism the men and women who are drifting about in the new countries to which they were suddenly driven to take up residence. In this way the World Union did pioneer work in South Africa, South America, the West Indies, Palestine, India and Australia.

The World Union planned in 1943 to establish in these countries a center for cultural and social activity on defi-

nitely religious lines. The guiding and controlling spirits of the World Union in that year were Dr. Israel Mattuck of England, Dr. Ismar Elbogen, formerly of Germany, who later settled in the United States, and the Honorable Lily H. Montagu, O.B.E., J.P., with offices at The Red Lodge, 51, Palace Court, London, W. 2, England. The World Union was able to stimulate religious interest in Judaism among members of the constituent organizations, even while these organizations preserved their autonomy as absolutely inviolate. It was able also to collect information by means of sectional committees on liturgy, on youth activities and on social betterment.

A Federation of Youth Organizations was, in 1943, part of the World Union activities. Useful pronouncements on the relation of Judaism to social betterment may also be expected, from time to time, from the World Union, which in 1943 was collating suggested proposals for world religious and economic reconstruction after the war, as suggested by prominent clergy and laymen from all over the world.

WORLD WAR, *see* SOLDIER, JEW AS; the articles on the various countries.

WORMS, a city in the former grand duchy, later the free state, of Hesse-Darmstadt, Germany, with a total population of 50,000, including 1,000 Jews (1933). In Hebrew sources it is referred to, together with the cities of Speyer and Mayence, by the contracted initials SHUM. Like these cities, and Cologne, Worms contained one of the oldest Jewish communities in Germany, the beginnings of which are shrouded in legends. The Jewish settlement is believed to date back to the times of the Roman fort of Borbetomagus, the predecessor of Worms, but the first authentic historical reference is a statement that Jews from Worms attended the Cologne fair about the year 1000.

An idealized view of the old city of Worms was painted on the wall of the synagogue of Mohilev, Russia, about 1750 by Hayim ben Isaac Segal. The famous synagogue, founded by a childless couple, Jacob and Rahel, was opened in the month of Elul, 4794 (1034). It was probably the oldest synagogue of Germany, and services were held there, with interruptions, for more than 900 years, until its destruction by the Nazis in 1938. The oldest tombstone in the Jewish cemetery dates from the year 1044.

The Jews of Worms helped Emperor Henry IV financially; in recognition of this help they were granted the same privileges of tax-exemption and free commerce as the other citizens (1074). These and other privileges granted them by the emperor were renewed by Henry V (1112) and Frederick I (1157), who designated them as subjects of his treasury ("cum ad cameram nostram attineant"); under Frederick II the privileges granted the Jews of Worms were extended to all Jews of Germany. Thus the Jewish community of Worms was placed under the immediate protection and jurisdiction of the emperor; its local administration, however, was carried out by the Judenbischof (bishop of the Jews) or Episcopus Judaeorum, first mentioned in a privilege granted to the Jews of Worms by Henry IV in 1090. The Judenbischof was elected by a council of twelve ghetto elders. Michael Gernsheim, the last to hold this title, died in 1792.

During the Crusades the community suffered heavily. In the First Crusade (1096) all the Jews of Worms, with the exception of a few who were baptized, were killed. When, in 1201, Worms was besieged by the army of the rival king, Otto of Brunswick, the Jews participated in the defense of the city. In the year of the Black Death (1349) the community was virtually annihilated after most of the Jews, more than 400 in number, had set their houses on fire on the tenth of Adar Sheni, i.e. the first of March, in order that they might perish in the flames rather than be slain by the mob. But a few years later there again existed a Jewish settlement in the city. In the three centuries which followed the privileges granted to the Jews of Worms by Henry IV were confirmed by the German emperors and, due to imperial protection, the life of the community was less troubled than that of others.

But in 1615 the hostile guilds succeeded in forcing the Jews to emigrate, despite the Elector's intercession; a year later, however, owing to an imperial decree, the Jews had to be readmitted to the city. In commemoration of this event the community designated the eve of the 15th of Shebat as a fast day. The community also suffered heavily in the Thirty Years' War (1618-48) and during the French invasion (1689), when the synagogue was demolished. In 1699 a new community arose.

In the 19th cent. the community numbered 1,000 persons. It had a Jewish hospital and several charitable organizations. From 1848 to 1851 a Jew, Ferdinand Eberstadt, served as mayor of the city. In general, the history of the community of Worms is identical with the development of German Jewry. In 1934, already under the Nazi regime, the 900th anniversary of the opening of the synagogue of Worms was celebrated in the entire German Jewish press. Four years later, in the night of November 9 to 10, 1938, the synagogue was set on fire by the Nazis and completely destroyed; many male Jews were arrested and thrown into concentration camps. It is unknown whether there were still some Jews left at Worms in 1943.

The community of Worms played a noble part in the spiritual life of medieval Jewry. At Worms lived Isaac ben Eliezer Halevi, the 11th cent. Talmudist and liturgical poet; three of his learned sons, together with their mother, Hannah, died as martyrs in Worms during the First Crusade (1096). During the Third Crusade (1196) the wife and two daughters of the Tosafist and poet, Eleazar ben Judah ben Kalonymus, were slain, while he and his son were wounded by crusaders; he represented the Kehillah of Worms at the synod of Mayence (1220) which promulgated ordinances (Takkanoth SHUM) that were accepted by the Jewries of these three communities, and later by the Jews of Germany in general. Rabbi Solomon ben Isaac (Solomon Yitzhaki), known as Rashi, lived at Worms for a time, not as a teacher, as was formerly believed, but as a pupil.

A native of Worms was Meir ben Baruch of Rothenburg, whose father, Baruch ben Meir, was active in Worms. A famous rabbi of Worms was Jacob ben Moses Halevi, known also as Jacob Mölln and as the MaHaRIL. A native of Fulda, the sexton and Schulklopfer Jephthah Juspa ben Naphtali, who was known as Juspa Shammes and was the author of liturgical poetry and other works in Hebrew, lived at Worms from 1623 until his death in 1678. Born at Worms was Samson Wertheimer, the famous financier and court Jew. The cemetery contained the graves of Baruch ben Meir, Meir ben Baruch of Rothenburg and the MaHaRIL.

Of considerable historical and artistic interest was the synagogue. It consisted of the Romanesque building of 1034, a wing in the Gothic style ("Frauenschul"), added in 1213, and the Rashi chapel of 1624. The synagogue contained among its numerous treasures the 13th cent. Torah scroll inscribed on buckskin by Meir ben Baruch of Rothenburg when he was confined in the fortress of Ensisheim as a hostage by Emperor Rudolph; imperial documents of 1562 to 1776, dealing with the Jews' right of residence in the

city; a holiday prayer-book of the 13th cent., ornamented in gold leaf; the so-called Rashi's table and chair, and rare books and precious ceremonial objects in silver. Practically everything was destroyed in November, 1938. ALFRED WERNER.

WORMS, RENÉ, sociologist, b. Rennes, France, 1869; d. Paris, 1926. He became the auditor of the Conseil d'État in 1894, and was made a member of it in 1924. Noteworthy among his earlier writings were *Le morale de Spinoza* (1892) and *Organisme et société* (1896). At first he appeared as champion of organic sociology, but then he abandoned the analogy of society and organism, and in his chief work, *Philosophie des sciences sociales,* he supported the positivist philosophy of Comte. He lectured on sociology at the University of Paris from 1907 on, and in 1919 was given a chair at the academy of commerce. Worms was also a member of the Académie de l'Agriculture de France. In 1892 he founded the first international revue on sociology, and in 1894 the Institut International de Sociologie, of which he was secretary-general until his death.

He arranged the institute's congress, and simultaneously managed the publication of an international library on sociology, which included works of French and foreign sociologists. Worms wrote besides the works mentioned above: *Éléments de philosophie scientifique et de philosophie morale* (1891); *Les principes biologiques de l'évolution sociale* (1910); *La sociologie, sa nature, son contenu, ses attaches* (1921).

Lit.: Revue Internationale de Sociologie, vol. 23 (1925) 577-80; *Sociology and Social Research,* vol. 13 (1929) 403-25; Essertier, Daniel, *La sociologie, philosophes et savants français du xxe siècle,* vol. 5 (1930) 232-44.

WORMSER, ISAAC MAURICE, jurist, b. New York city, 1887. He studied at Columbia University (A.B., 1906; LL.B., 1909), and was assistant professor of law at the University of Illinois (1911-13). In 1913 he was appointed professor at Fordham University; he still held this position in 1943. During the first World War he served as government appeal agent, in 1927 he was a special assistant counsel to the New York Transit Commission, and from 1938 to 1941 he took part in the crime investigation of King's County as a consulting counsel.

Wormser edited the *New York Law Journal* from 1920 to 1931, and was the author of leading case-books and texts on corporation law, the law of contracts, and the law of mortgages. He wrote also *Frankenstein, Incorporated* (1931). In 1924 he was awarded the LL.D. degree by Fordham University, from which he received also the Distinguished Service Medal in 1933.

WORMSER, SEKEL (diminutive for Isaac), called also "Baal Shem of Michelstadt," rabbi, b. Michelstadt, Hesse, Germany, 1768; d. Michelstadt, 1847. He was a descendant of Elijah ben Moses Loans and a student at the Yeshiva of Frankfort. After great tribulations he moved to Mannheim and later to Michelstadt, where he was elected rabbi in 1822. The larger part of his library was consumed by fire in 1825. Widely known because of his ascetic piety, he acquired, in connection with some strange incidents, the reputation of a miracle worker. After witnessing the death of fourteen children, he died in poverty. Wormser was highly esteemed by both Jews and non-Jews.

WORSHIP, *see* DIVINE SERVICE; PRAYER.

WOYSLAVSKY, ZVI, Hebrew writer and editor, b. Grayeva, Poland, 1890. He studied in the Heders of various towns, and later in the Yeshiva of Radin conducted by the famous Israel Meir Kahan (Hafetz Hayim). He went to Berlin shortly afterward and studied at the university; in 1934 he went to Palestine. Woyslavsky was one of the important Hebrew publicists and thinkers of his generation. His articles dealing with current events appeared in *Haolam, Moznaim* and other publications. In Berlin he co-edited the Hebrew periodicals *Haolom, Aidenu,* and *En Hakore.* In 1943 he edited the monthly *Moznaim,* published at Tel-Aviv by the Society of Hebrew Writers, and was one of the editors of the books of the Bialik Institute in Jerusalem.

He published (in German) a book on the philosophy of the capitalist mentality. His book, *Yehidim Bireshuth Harabbim,* was published in New York (1942) by the Keren Hatarbuth and the Histadruth Ivrith. He translated into Hebrew the collected works of Hermann Cohen, and also the fourth volume of Shemarya Levin's *Memoirs.*

WRATH OF GOD. The concept of divine wrath follows directly from the doctrine of the holiness of God. Kohler calls it an emanation of His holiness (*Jewish Theology,* 107). If the Eternal is essentially moral in His nature, He can not remain inactive in the presence of moral evil. The demands of the just and righteous moral order which He has established necessitate these manifestations of His anger. In a world of cause and effect relationships, in which personal suffering and social maladjustment are the consequences of sin, the doctrine of the Unity of God is incomplete without the concept of God's righteous wrath. Furthermore, Judaism does not regard evil as a separate power, hostile to God. Catastrophe and suffering must be regarded as part of His plan and purpose. Frequently they are manifestations of His displeasure with sinful men and nations, His means of purifying the world. "They have roused Me to jealousy with a no-god; they have provoked Me with their vanities; and I will rouse them to jealousy with a no-people; I will provoke them with a vile nation. For a fire is kindled in My nostril" (*Deut.* 32:21-22).

The wrath of God must be considered in the light of three important Jewish interpretations: 1. The Almighty is a merciful God, slow to anger and abundant in lovingkindness. He is not easily provoked to wrath. Before the destruction of Solom and Gomorrah God assured Abraham that, for the sake of only ten righteous men in these cities, He would withhold punishment (*Gen.* 18). Unto the thousandth generation He keepeth mercy and forgiveth transgression (*Ex.* 34:7). The iniquities of the fathers are visited upon the children *only* if "they adhere to their evil ways" (Rashi to *Ex.* 20:5). One of the tenderest manifestations of Divine mercy is found in *Hosea* (11:8 et seq.) in which the Lord

The Torah Writer, by Ephraim Lilien; showing the methods used by ancient and modern scribes

asks, "How shall I give thee up, Ephraim? How shall I surrender thee, Israel? . . . My heart is turned within me . . . I will not execute the fierceness of Mine anger." Even toward the wicked God is long-suffering (*Yoma* 69b). His wrath is never aroused toward the innocent objects of idolatry, but only against those who worship them (*A.Z.* 54b).

2. Divine wrath is never arbitrary or capricious. It is always provoked by continuous stubbornness and wickedness on the part of individuals or of nations. His fury was kindled against Judah and Jerusalem because of their evil tongues and their iniquitous doings which "provoke the eyes of His glory" (*Isa.* 3:8). If He is a God who has indignation every day, it is because men refuse to repent (*Ps.*7:13).

3. In His wrath, as in His love, God is impartial. The book of *Amos* opens with this declaration. The prophet pictures the day of wrath, when the righteously indignant God will bring punishment to many nations for their wrongdoing. Damascus and Gaza, Tyre and Edom, Ammon and Moab will feel the heat of His anger because of the sins which they have committed. But Israel and Judah will not escape the consequences of their evil ways. "So will I send a fire upon Judah, and it shall devour the palaces of Jerusalem" (*Amos* 2:5). Punishment is all the more certain because God has known Israel and Judah more intimately than all the other nations. "Therefore will I visit upon you *all* your iniquities (*Amos* 3:2).

In Jewish theology Divine wrath is a necessary part of God's nature. Man's iniquity can not go unheeded, for the moral order of the universe must be maintained. But in no sense is the Jewish view of God overshadowed by the concept of divine anger. As necessary as it is in the maintenance of the world, God is aroused to anger only after endless provocation. His inclination is toward mercy and love. "For His anger is but for a moment, His favour is for a life-time; Weeping may tarry for the night, but joy cometh in the morning" (*Ps.* 30:6).

ABRAHAM SHUSTERMAN.

WRESCHNER, ARTHUR, psychologist, b. Breslau, Germany, 1866; d. Zurich, Switzerland, 1932. He started his career as an instructor at the University of Zurich (1900) and at the Technical College of the same city (1903). He was appointed assistant professor of the University of Zurich in 1910, and occupied this post until his death.

Wreschner's published writings include: *Methodologische Beiträge zu psychophysischen Messungen* (1899); *Die Reproduktion und Assoziation von Vorstellungen* (1907 and 1909); *Das Gedächtnis im Lichte des Experimentes* (2nd ed., 1910); *Die Sprache des Kindes* (1912); *Vergleichende Psychologie der Geschlechter* (1912); *Methoden zur Analyse der Vorstellung und des Gedächtnisses* (1922); *Angewandte Psychologie* (1926); *Psychologische Untersuchungen an Normalen, Schwachbegabten und Epileptikern* (1927); *Das Gefühl* (1930).

WRITING. Since writing was not frequent in very ancient times, there are comparatively few references to writing in the Bible. The Canaanites of the Amarna Age (15th and 14th centuries B.C.E.), prior to the entrance of the Israelites, made use of the clay tablets and the cuneiform stylus writing of the Babylonians and Assyrians, but there is no definite record that the Israelites ever adopted this form of writing. The Ten Commandments are recorded as having been written on slabs of stone, on which they were engraved (*heruth; Ex.* 32:16). This was to indicate that the letters were cut into the stone with a pointed instrument of metal. According to the directions given by Moses to Joshua, the Israelites were to take large stones and cover them over with a lime composition, and upon this write the words of the Law, apparently again with a metal tool (*Deut.* 27:2-8; *Josh.* 8:30-32). While all these accounts were written down much later than the actual events, they reflect the tradition of the Israelites that early writing was in this form. There are references to a slab (*luah*) for writing and a metal pen (*'et*) as late as the beginning of the 6th cent. B.C.E. (*Jer.* 17:1), and apparently this form of writing was used for inscriptions and proclamations.

In the meantime, however, more convenient forms of writing came into use. It is possible that the Israelites, like the Arabs in later times, made use of the large shoulder-bones of animals as materials upon which to write. Sherds of clay vessels were a favorite writing material, as is evidenced by the finds of excavation. However, the most convenient form must have been the tanned and scraped skin of an animal (*sefer*); the writing instrument in this case was a reed (*kaneh*), and there is mention of an inkstand (*keseth; Ezek.*

9:2). There is a reference to ink (*deyo; Jer.* 36:18), though the composition of such a writing fluid in ancient times is unknown. Scribes made use of a penknife (*Jer.* 36:23) which served the double purpose of sharpening the reed pen and of making erasures. There are references to books and documents being sealed (*Isa.* 29:11; *Jer.* 32:12-14). The latter reference mentions "that which is sealed and that which is open"; hence it may have been a clay tablet such as is frequently found in Mesopotamian excavations, in which a legal document, such as this is, was written in full twice, once on a large clay tablet and once on a smaller one, and the latter was enclosed in the former, the object being that, if a charge of falsification of the outer document was made, it could be broken and the inner document examined to ascertain the exact facts.

In the rabbinical period the chief writing materials were parchment and papyrus, the reed or metal pen, and ink of various composition, such as lamp-black and water, oak-galls, or red dye. There are a number of prescriptions in rabbinical literature as to the proper writing of Scrolls of the Law, the parchments in such objects as Tefillin and the Mezuzah, and similar important texts.

Hebrew is always written from right to left, and up to about the 6th cent. only consonants were used. A shift from the ancient Hebrew characters to the Syriac (*'ashurith*) square characters began in the time of the Second Temple. The latter was used in manuscripts for convenience in reading and out of it various printed forms developed; for correspondence and notes, however, a more cursive form was employed.

WULMAN, LEON (LEIB), physician, b. Berdichev, Russia, 1887. He received the M.D. degree from the University of Warsaw Medical Faculty in 1916. In 1925 he became affiliated with the OSE World Union. In 1923 he became a member of the TOZ (Society for the Preservation of Health among the Jews in Poland). He served as a member of the European Council of the World Jewish Congress and of the Yiddish Scientific Institute, was a co-founder of the TOZ in Poland, and of the World Union of Jewish Physicians, and a member of the International Board of Hospitals (Paris) and of the Polish Anti-Tuberculosis Union.

Wulman came to the United States in 1939, settling in New York city. He was a co-founder of the American Committee of the OSE, and was its secretary in 1943. In addition to articles in the *Jewish Morning Journal* and in the magazine *Social Medicine,* Wulman was for twelve years editor of the *American OSE-Review* (1927-39), edited the reports of the Congress of Jewish Physicians (Warsaw, 1934), published articles on social medicine in scientific periodicals, wrote for the *Jewish Social Studies,* and was the author of *Guarding Jewish Health* (Warsaw, 1937) and *In the Fight for Jewish Health* (Warsaw, 1935). He was a co-founder of the Association of Polish Immigrants.

WUNDERLICH, FRIEDA, professor of economics and sociology, b. Berlin, 1884. She graduated from the Universities of Berlin and Freiburg. She was for a time professor at the Berufs-Pädagogische Institut in Berlin, director of the Bureau für Sozialpolitik, and editor (1923-33) of *Soziale Praxis.* She was a member

Frieda Wunderlich

of the city council of Berlin from 1926 to 1933, and for the same period a member of the Federal Institute for Placement and Unemployment in Prussia. From 1930 to 1933 she was a member of the Prussian Diet, and at the same time a member of the Women's Committee of the International Labor Office.

Forced to leave Germany in 1933, she came to the United States, where she joined the Graduate Faculty of Political and Social Science at the New School for Social Research. She was chosen dean of the school for 1939 to 1940, the first woman to hold such a post.

In the United States she continued her investigations and her writing. Among her longer published works were: *Betriebswissenschaft und Fabrikpflege* (1925); *Die Bekämpfung der Arbeitslosigkeit in Deutschland seit Beendigung des Krieges* (1925); *Der Kampf um die Sozialversicherung* (1930); *Versicherung und Fürsorge* (1930); *Labor under German Democracy* (1940); *British Labor and the War.*

WÜNSCHE, AUGUST, non-Jewish Hebraist, b. Hainwalde, near Zittau, Saxony, Germany, 1839; d. Dresden, Germany, 1913. A pupil of Franz Delitzsch and Julius Fürst, he took a keen interest in Jewish religious literature. By profession he was a teacher at the women's college in Dresden (1869-1905). Wünsche distinguished himself especially as German translator of the Midrashim and of the Haggadic parts of the Talmud. In 1880 appeared *Der jerusalemitische Talmud in seinen haggadischen Bestandteilen zum ersten Mal ins Deutsche übertragen,* followed by *Der babylonische Talmud in seinen haggadischen Bestandteilen* (1886-89). Another important translation of his was the German rendering of the Midrash Rabbah and of the *Pesikta de Rab Kahana* (1880-85).

Aus Israels Lehrhallen (5 vols., 1907-10) was a translation of the legends in Adolf Jellinek's *Beth Hamidrash.* Together with the rabbi of Dresden, Jakob Winter, he published an anthology, *Die jüdische Literatur seit Abschluss des Kanons* (3 vols., 1894-97), the first comprehensive survey of the entire post-canonical Jewish literature. His other writings include *Die Schönheit der Bibel* and *Die Bildersprache des Alten Testaments,* both published in 1906.

WUPPERTAL, German municipality created in 1929 and incorporating the former cities and towns of Elberfeld, Barmen, Vohwinkel, Ronsdorf and Kronenberg. During the 18th cent. the Jews of these places were subjects of the duke of Jülich-Berg and belonged to the Jewry of his duchy, whose center was at Düsseldorf. They were granted civil rights when Napoleon Bonaparte occupied the country, and the

Napoleonic decrees remained valid after the towns were annexed to Prussia in 1815.

The first Jew of Elberfeld known by name was Isaac Meyer, who was granted a safe-conduct by the duke elector in 1691. In 1704 the Jewish community of Elberfeld rented the place for a cemetery. In 1794 the Jews were expelled from Elberfeld and Barmen, on the request of the artisans of the cities, but returned immediately after French administration was established. In 1808 the Jewish community of Elberfeld, which until 1894 included the Jews of Barmen, numbered 218. By 1933 there were about 800 Jews in Barmen and 2,000 in Elberfeld. The Jews of Barmen were active in haberdashery; those of Elberfeld created and developed (from 1870 on) the clothing industry, which had been unknown before in Western Germany. This industry, from 1900 on, attracted many Jewish tailors coming from Eastern Europe.

From 1866 to 1907 Z. Auerbach was rabbi of Elberfeld. He was a grandson of Rabbi Abraham Abiesri Selig Auerbach, rabbi in Strasbourg during the French Revolution and a friend of Cerfberr. From 1907 to 1933 Joseph Norden, a radical Reformer, was rabbi.

WÜRTTEMBERG, a province in southern Germany. The oldest authentic information as to the presence of Jews in Württemberg dates back as far as the 12th cent. and relates to Ulm. In the 13th and 14th centuries Jews were living also in various other cities, for instance Esslingen, Reutlingen, Tübingen and Stuttgart. The persecutions, especially in the Black Death period (1348-49), led to the destruction of numerous communities described in the histories of martyrdom (martyrologies).

In the course of the 15th cent. the Jews were gradually expelled from various individual cities of Württemberg, and eventually the law banished them from the entire province (1521). Jewish travel and trade also were affected by the law of the province in an oppressive and humiliating manner. The spirit of intolerance continued essentially up to the end of the 18th cent., with only occasional interruptions, as in the period of the most unfortunate Jewish financier, Joseph Süss Oppenheimer (1734-37), in Stuttgart, and in the towns of Freudenthal and Hochburg, belonging to the crown, where special regulations favorable to Jews were enacted (1731 and 1780). No fundamental change for the better took place until 1806 when, with the incorporation of Neuwürttemberg, the number of Jews grew from 534 to 4,884.

With the reign of King Frederick I the situation of the Jews began to improve. A progressive spirit was shown in the Gesetz in Betreff der öffentlichen Verhältnisse der israelitischen Glaubensgenossen (1828), which regulated the juridical position of the Jews. In 1849 the constitutional laws of the Frankfort National Assembly became effective, and in 1864 King Charles signed the law which put the Jews of Württemberg on an equal level with the rest of the population. Through the laws of the Northern German Confederation (1869) anti-Jewish discriminations were abolished.

Notable among the institutions of Württemberg's Jewry were the Wilhelmspflege orphan asylum at Esslingen on Neckar, founded in 1831, and the Wilhelmsruhe Home for the Aged at Sontheim, near Heilbronn, founded in 1908.

In the year of the Nazis' assumption of power (1933) Württemberg had 10,827 Jews in a total population of 2,580,000. The forty-five Jewish communities were divided into eight rabbinical districts, in addition to which there was the city rabbinate of Stuttgart. Nearly half of the Jews of Württemberg lived in the capital, Stuttgart (4,408 Jews); other large communities were at Heilbronn (790 Jews in the city proper, 254 Jews in the surrounding district) and Ulm (516 Jews). Albert Einstein was a native of Ulm. Owing to the decidedly religious and democratic spirit of the population, both Catholics and Protestants, there was less anti-Semitism in the province than elsewhere in Germany. Even under the Nazi regime anti-Jewish riots were infrequent, and the pogroms of November, 1938, were less atrocious there than in other regions. The anti-Jewish legislation, however, was, of course, enacted there with the same force as elsewhere, and the emigration of Jews from Württemberg was considerable. At the outbreak of the second World War (September, 1939) there were, however, still Jews living in Württemberg.

Of historical interest was the organization of Württemberg's Jewry, which was regulated by laws of 1828, 1912 and 1924. The law of 1828 provided that all native Jews were to be united into Kirchengemeinden (ecclesiastical bodies) which were headed by the Oberkirchenbehörde (supreme ecclesiastical authorities). In 1924 the body of Württemberg's Jewry was turned into a corporation, headed by the Israelitischer Oberrat; its legislative body was the Landesversammlung.

WÜRZBURG, capital of Lower Franconia, Bavaria, Germany. The first Jews lived at Würzburg probably at the end of the 11th cent.; the earliest historical records dealing with Jews in the city are from the year 1119, when the Jew Jacob acquired a house and an estate from the chapter Neumünster at Würzburg for annual payments. In 1147, during the Second Crusade, the mutilated corpse of a man was found in a pond. The Jews were charged with the murder, and attacked; about twenty of them were killed, including three rabbis.

The victims were buried in the suburb of Pleichach, in the so-called "Judengarten" (Jews' Garden), the site of which in the 20th cent. was occupied by the Julius-Hospital; the ground where the ghetto had been located was acquired by the city as a cemetery. In the 12th cent. also two other ghettos existed near the "Grüner Markt" of modern times, at the so-called "Theatrum Judaeorum." At the time of Bishop Otto of Lobdeburg (1207-21) the Jew Jehiel was mintmaster of the bishopric of Würzburg. The collections of the Würzburg Historical Society contained coins with Jehiel's name in Hebrew letters. There was also another Jewish mintmaster at Würzburg.

In the second half of the 13th cent. the Jewish minnesinger Süsskind von Trimberg was said to have been a physician at the St. Egidius and Dietrich Hospital at Würzburg. Other Jewish physicians at Würzburg were Heilmann, the physician to the court of the bishop, Seligmann, and the woman doctor, Sarah. In 1298 at Röttingen, Franconia, a persecution of the Jews started which spread all over the country; on the 23rd of July of that year several hundred Jews were slaughtered or drowned. In 1336 Pope Benedict XII permitted Bishop Otto von Wolfskehlen to declare null and void all promissory notes issued by him to his

Jewish creditors. In the course of this action to liquidate all debts owed to the Jews violent anti-Jewish riots were started; the Jews were seized by the citizens of Würzburg and released after paying a large ransom.

Bishop Johann II (1413-40) imprisoned all Jews of the city and of the bishopric, and held them in the ransom sum of 60,000 guilders, an enormous amount of money at that time. In 1349, the year of the Black Death, the Jews of Würzburg, instead of being slain by the mob, on the 20th of April set the whole ghetto on fire and perished in the flames.

In the 15th cent. Jews settled at Würzburg again. They acquired real estate from Bishop Gottfried (1446), built a synagogue and established a cemetery on the site of the abandoned cemetery of old. But their number was probably small. In 1559 Bishop Friedrich obtained permission from the German emperor, Friedrich II, to expel the Jews; by 1567 the last Jews had left the city. A few individual Jews may have lived at Würzburg in the two centuries which followed, but a full-fledged community was not reestablished until the beginning of the 19th cent. It was founded by a butcher from the neighboring community of Heidingsfeld, and in 1813 it consisted of fourteen families. It received an official status in 1836, when the number of Jews at Würzburg had risen to sixty. A new synagogue, replacing the old private synagogues, was dedicated in 1841.

From 1861 on the number of Jews quickly increased, and the city of Würzburg, at the beginning of the 20th cent., had 4,000 Jews; the community of Würzburg was one of the most important Jewish communities in Bavaria. By 1933, however, the number of Jews had decreased to 2,200. Since Lower Franconia was an early center of Nazism, the Jews of Würzburg suffered more heavily from anti-Semitism than the Jews in other parts of Bavaria. During the pogroms of November, 1938, the synagogue was destroyed and many Jews were thrown into concentration camps. By 1943 no Jews were living at Würzburg.

In the Middle Ages Würzburg had famous Talmudic academies, and its Minhag was adopted by many other communities. Among the important rabbis of medieval Würzburg were Eliezer ben Nathan, author of *Zaphenath Paneah,* Eliezer ben Joel Halevi, Isaac ben Moses of Vienna, and Meir ben Baruch of Rothenburg. After the dissolution of the community in the 16th cent. the rabbinate was transferred to the town of Heidingsfeld, but in 1813 Würzburg again became the seat of the rabbinate. Among the rabbis in the 19th cent. were Abraham Bing, Seligmann Bär Bamberger, the founder of the Jewish Teachers' College at Würzburg, and his son Nathan Bamberger. M. WEINBERG.

L., *Ein Blick auf die Geschichte der Juden in Würzburg* (1905); idem, *Beiträge zur Geschichte der Juden in Würzburg-Heidingsfeld* (1906); Bamberger, Herz, *Geschichte der Rabbiner der Stadt und des Bezirks Würzburg* (1905); Szulwas, M. A., *Die Juden in Würzburg* (1934).

WYLER, WILLIAM, motion picture director, b. Mulhouse, Alsace, France, 1902. He was educated at the École Supérieure de Commerce, Lausanne, Switzerland (1919), and at the Conservatory of Music in Paris (1920). Because of his knowledge of French and German, he was brought to the United States by his relative, Carl Laemmle, to do foreign publicity in the office of the Universal Pictures Corporation, New York city (1920). Sent to Hollywood, Cal., in 1922, he started his career in the motion picture industry as an office boy, later becoming director (1925) and director of full length features (1929) of the Universal Pictures Corporation. Wyler left the Universal studios in 1934 and became associated with Samuel Goldwyn, becoming a director of his firm in 1935. In 1943 he was serving as a major in the United States Army Air Force. The most successful of the many pictures which he directed were: *These Three* (1935); *Dodsworth* (1936); *Dead End* (1937); *Wuthering Heights* (1939); *The Letter* (1940); *The Little Foxes* (1941); *Mrs. Miniver* (1942). Wyler was a descendant of Berthold Auerbach.

WYNN, ED (Israel Edwin Leopold), actor, author and producer, b. Philadelphia, 1886. His father was a manufacturer of millinery, but he escaped from that business early (1902) to become an actor in vaudeville. The influence of the millinery business remained, perhaps, in his use of comical hats (including a fire-chief's helmet). For many years he acted the clown in vaudeville until he appeared in *Ziegfeld's Follies* (1914, 1915), and was the star of the *Passing Show* (Winter Garden, 1916).

As a result of joining the striking actors in 1920, he found that no manager would hire him. Accordingly, he wrote the book, songs, and music of *The Ed Wynn Carnival* and produced it himself. This was followed by his *The Perfect Fool* and *The Grab Bag.* He also wrote and was likewise the star of *Simple Simon* and *The Laugh Parade.* In 1942 he produced, and was master of ceremonies of, a vaudeville show, *Laugh, Town, Laugh.*

Wynn appeared in radio as "The Fire Chief." He was the first to broadcast the entire production of a musical comedy. He was also the star of several motion pictures (*Rubber Heels, Follow the Leader, The Chief*). For some time, until 1929, he conducted in many newspapers a syndicated humorous feature, "Ed Wynn's Question Box."

Lit.: Woolf, S. J., "How to Hatch a Joke," *New York Times Magazine,* July 5, 1942, p. 12; McCarthy, Charles E. M., "Twenty-Five Years a Laugh-Maker," *American Hebrew,* May 13, 1927, p. 5.

WYOMING, a central western state of the United States, with a population of 246,763 (census of 1940), including in 1943 about 1,000 Jews. Jews played a role in the pioneer upbuilding of this region even before Wyoming was organized as a territory in 1869. Reports suggest that the first prospector in Wyoming, who was also the discoverer of Hahn's Peak, was a Jew. Henry Altman (b. Germany, 1841) moved west from Pennsylvania in the late 1860's, and was one of the first white men to settle at the Indian trading post of Cheyenne. There he peddled merchandise to the construction gangs of the Union Pacific Railroad.

About 1875, in partnership with Joseph Wasserman, a fellow-Jew, Altman went into cattle-raising, and he soon became famous for his great herd of prize stock, which were shipped to both domestic and foreign markets. A member of the territorial assembly, Altman was a leader in the movement to make Wyoming a state (1890), and he subsequently served in both the lower and upper houses of the state legislature. He came to be known as the "Grand Old Man" of Wyoming. Another prominent Cheyenne pioneer was Max Idelman (d. Cheyenne, 1913), who was appointed by the then governor of Wyoming to represent the state at the Paris Exposition of 1900. He started the firm of Goodstein, Idelman and Franklin, and was succeeded in business by his son Samuel Idelman.

The number of Jewish inhabitants in the state showed marked fluctuation. In 1880 there were an estimated forty Jews; by 1897 the number was placed at 1,000. In 1917 a new estimate gave 500 Jewish inhabitants; in 1927 the number 1,319 was reported, and in 1937 it had dropped to less than 1,000. A survey of the communities for the latter year reported 650 Jewish

inhabitants in Cheyenne, sixty-one in Casper, forty in Rock Spring, and fewer than twelve each in nine other localities of the state.

The first Jewish woman said to have settled in Wyoming was Mrs. William Myers, who came to Cheyenne about 1875. She organized a Sunday school and was president of the Cheyenne Jewish Circle, the first organization of Jewish women in the city.

Jews of Cheyenne, mainly of Eastern European origin, organized themselves into the Orthodox Mt. Sinai Jewish Synagogue, and by 1915 they were prosperous enough to erect their house of worship, at a cost of $12,000. This synagogue was still in use in 1943. The congregation established a Talmud Torah and a Sabbath school. In 1935 Hyman Krash was elected rabbi; he was still the incumbent in 1943.

Under the leadership of Abraham Goldstein, the Cheyenne Jewish Relief Association was founded in 1925, to organize fund-raising and fund-distribution for various Jewish causes. Five years later, in 1930, Abraham Goldstein founded the Wyoming *Jewish Press*. Cheyenne Jews also maintained, in 1943, a lodge of the B'nai B'rith and its ladies' auxiliary, and a chapter of Hadassah.

A congregation was also organized by the Jewish community of ROCK SPRINGS. At CASPER, the Jewish Community Association was formed.

At Cheyenne, Jews were engaged mainly in business as merchants. In addition to those already mentioned, a number participated prominently in the civic affairs of the community. Isidor L. Davis was a member of the board of education. Abraham Goldstein was director of the community chest (1925-30). He was elected in the primary to the Wyoming state legislature. At Evanston, Wyo., Isador Kastor was mayor (1914-16) and a member of the board of education (1920-30). Shirley Kastor of Evanston was in the state legislature (1929-34). Clarence Morris was appointed (1927) instructor in law at the University of Wyoming at Laramie.

Lit.: *American Hebrew,* Sept. 10, 1926, p. 526; Linfield, Harry S., "Jewish Communities of the United States," *American Jewish Year Book,* vol. 42 (1940-41).

WYZANSKI, CHARLES EDWARD, JR., judge, b. Boston, 1906. A great-grandson of the founder of the first Hebrew Free School in Boston in 1852, Wyzanski studied at Phillips Exeter Academy and Harvard College and Law School.

After receiving the A.B. (1927) and LL.B. (1930) degrees, Wyzanski was associated with the firm of Ropes, Gray, Boyden and Perkins (1930-33). During this time he had leave of absence to serve as law secretary to United States Circuit Judge Augustus N. Hand (October, 1930, to September, 1931) and to United States Circuit Judge Learned Hand (October to November, 1932).

Shortly after the beginning of the administration of Franklin D. Roosevelt, Wyzanski went to Washington as solicitor in the United States Department of Labor (1933-35). During this time he was designated acting secretary of labor in the absence of the secretary and the assistant secretary of labor. In 1935 he represented the United States at the seventy-second and seventy-third sessions of the governing body of the International Labor Office in Geneva, Switzerland. He was also advisor and substitute delegate of the United States at the nineteenth session of the International Labor Conference in Geneva (June, 1935).

Following his return to the United States, he was appointed special assistant to the attorney general of the United States and assigned to the staff of the solicitor general. He held this post from November, 1935, to August, 1937. During this period Wyzanski argued in the United States Supreme Court in support of the constitutionality of unemployment compensation and old-age provisions of the Social Security Act, in behalf of the National Labor Relations Act, and in defense of the Senate's right to investigate into the primary campaigns of senatorial candidates.

After returning to Boston and engaging in law practice, he reentered government service in 1941 as an alternate and later as a member of the National Defense Mediation Board. He was appointed United States district judge for Massachusetts in December, 1941, and took his seat on January 26, 1942. On January 11, 1943, he was appointed a lecturer in government at Harvard University. He was (1943) a member of the Council and Executive Committee of the American Law Institute (from 1942); a member of the Visiting Committee of the History Department and Law School of Harvard University; and a member of the Phillips Exeter Academy Alumni Council.

HENRY W. LEVY.

XANTEN BLOOD ACCUSATION. In the evening of June 29, 1891, the body of a five-year-old boy, Johann Hegmann, with his throat slashed, was found in the barn of the tavern-keeper Küppers in Xanten on Rhine, Germany. The anti-Semitic press immediately proclaimed that, for the purpose of obtaining blood, a ritual murder had been committed by the Jews. Suspicion of having performed the "cut" was directed against a butcher, the former Shohet of the Jewish congregation, Adolf Buschhoff.

At a jury trial which was held in Cleve from July 4 to 14, 1892, it was proved that the crime had been perpetrated in the same place where the corpse had been found, namely in Küppers' barn; the child could therefore not have been slain in Buschhoff's house, as was maintained originally. It was ascertained on competent medical testimony that there was not the slightest clue to warrant the assumption that blood had been removed from the scene of the crime. Thereupon the accused was acquitted of the ritual murder charge.

YAABETZ, *see* EMDEN, JACOB ISRAEL.

YAALEH ("May There Arise"), the beginning of a poem which is sung during the Evening Service of Yom Kippur (Day of Atonement) after the Tefillah in the synagogues that follow the Ashkenazic or the Italian rite. The poem is appended to the prayer "Yaaleh Veyabo," and is in stanzas of three lines each. It makes use of the verbs of that prayer, and introduces in each line words which begin with the successive letters of the Hebrew alphabet in reverse order. The contents refer to the forgiveness of sin and the grace of God. In the *Union Prayer Book* of the Reform ritual, the Yaaleh is represented by the poem, "Unto Thee Our Prayers Arise," in the service for the Eve of Yom Kippur.

YAD (pointer used in reading from the Torah), *see* TORAH, ORNAMENTATION OF.

YAD HAHAZAKAH, *see* MAIMONIDES.

YADAYIM ("hands"), eleventh tractate of Toharoth, the sixth division of the Mishnah. It contains four chapters, and deals principally with regulations about the ritual uncleanliness of the hands. It discusses cases where the hands acquire various degrees of uncleanliness by contact with objects that cause uncleanliness, and describes the washing of the hands necessary for their purification. In chap. 3 there is a mention of the fact that canonical Scriptural writings "make the hands unclean," that is, require a washing after they are touched. This leads to a discussion of the canonicity of certain books of the Bible, and a report that the question was settled on the day when Gamaliel II was deposed. Chap. 4 then records other discussions which took place on that day (*bo bayom*), all of which have nothing to do with the main subject of the Mishnah. The tractate ends with three disputes between the Pharisees and other sects.

The Tosefta, which consists of two chapters, gives further details about the canon and about disputes between the sects, besides elaborations of the main discussions of the Mishnah. There is no Gemara to the tractate in either Talmud.

YAHRZEIT (the word has been adopted into English from the German *Jahrzeit,* "yearly time" or "season"), the anniversary of the day of death of parents and other near relatives. It is observed from year to year, upon the return of the same date (according to the Jewish calendar), by the children or by the parents as a day of remembrance of the departed. The usual means for the observance of the Yahrzeit are divine services, the lighting of memorial lights (Yahrzeit candles or lights), the recital of the Kaddish prayer, visits to the grave (Keber Aboth), and by many also through fasting and the reading of a chapter from the Mishnah. The institution of the Yahrzeit and the recital of the Kaddish connected with it are of comparatively recent origin.

Among German Catholics the *jartag* or the *jarcit* is mentioned as early as the 11th cent. Isaac Or Zarua in 1220 records that in Bohemia and the Rhine region it was the custom for orphan children to say Kaddish. However, the custom was altogether unknown in France. It may be assumed that the observance of the Yahrzeit began in Germany about the year 1400 and gradually became common among the Jews of the civilized world, although Joseph Caro (d. 1575) evidently did not know of it, since his *Shulhan Aruch* contains no regulations at all for the observance of the Yahrzeit.

Abraham S. Yahuda

See also: MEMORIAL SERVICE; YAHRZEIT LIGHT.

YAHRZEIT LIGHT, a light kindled and left burning for the entire twenty-four hours of the anniversary of the death of a relative for whom one says Kaddish. There are indications in the Bible that it was customary to kindle a light at the grave of a parent (*I Kings* 11:36; *II Kings* 8:19), but it is doubtful how long this usage survived. The Yahrzeit light does not appear as a custom until about the 16th cent. and in Central Europe; the *Shulhan Aruch* does not mention it. It probably was suggested by the Catholic custom of burning candles to the saints, and it manifestly became popular because it furnished an evident and easily procured sign of reverence for the dead. The light was interpreted as symbolizing the soul of the departed. Aaron Berechiah ben Moses of Modena declared that the soul was the candle of God (cf. *Prov.* 20:27), and pointed out that the numerical value of the letters of *ner daluk* ("a kindled light"; 50 + 200 + 4 + 30 + 6 + 100) was 390, the same as that of *hashechinah* ("the divine presence"; 5 + 300 + 20 + 10 + 50 + 5).

Yahrzeit lights were originally candles that were lit within the home. In modern times a special candle of large size and set in a tumbler is often used. Gas and electric lights are likewise kindled as Yahrzeit lights; one special form of Yahrzeit light has the wires arranged in the form of a Shield of David (Magen David). Yahrzeit lights are sometimes lit in synagogues in memory of the departed, and special stands are placed there for that purpose. In other cases, memorial tablets are provided with sockets by the side of each name; in these a small electric bulb is placed and lit during the services of the week in which the Yahrzeit of the particular individual occurs.

YAHUDA, ABRAHAM SHALOM EZEKIEL, orientalist, b. Jerusalem, 1877. He was descended from a noted Sephardic family which traced its origin back to the Gaonim of Babylonia and to a number of outstanding scholars and communal workers in medieval Spain. As a youth he mastered Hebrew, Arabic and Judeo-Spanish, the languages spoken in his home, and also learned several other Oriental as well as a few

European languages. At fifteen he published a book, *Kadmoniyyoth Haarabim* (Arab Antiquity; Jerusalem, 1893), which went through a second edition in 1895.

Yahuda studied at the Universities of Heidelberg and Strasbourg, at the latter under the famous orientalist Theodor Nöldeke, and received the Ph.D. degree in 1904. From 1905 to 1914 he was professor of Biblical exegesis and Semitic philology at the Hochschule für die Wissenschaft des Judentums in Berlin; he was also lecturer in the Arabian language at the Orientalisches Seminar of the University of Berlin. In 1915 the Spanish government created for him a special chair for the Hebrew language and literature of the Jewish Golden Age in Spain. As Max Nordau remarked, writing in the London *Jewish Chronicle,* Yahuda was "the first Jew called to a Spanish University Chair, or, indeed, receiving any state appointment in Spain since the wholesale expulsion of the Jews from the Peninsula by the Catholic kings in 1492." During his stay in Spain Yahuda, who retained his British citizenship, was instrumental in having King Alfonso XIII of Spain intervene personally with the emperors of Germany and Austria-Hungary as well as with the sultan of Turkey to restrain Jemal Pasha from destroying Palestine's Jewry. An early follower of Theodor Herzl, he showed on numerous other occasions an active interest in Jewish political and national affairs.

In 1922 Yahuda gave up his chair at the University of Madrid, and in the following years lectured at many universities and colleges, chiefly in England (King's College, University College, The Royal Asiatic Society of London, at Oxford and Cambridge), also at the Hebrew University in Jerusalem and at Cairo and Lisbon. In 1942 he was appointed research professor at the New School for Social Research, New York city, for Middle and Near Eastern civilization.

Yahuda devoted much energy to opposing the conclusions of Bible critics. Discovering a close relationship between Hebrew and Egyptian and applying the combined method of comparative philology and archeology, he claimed to have proved the antiquity of the Pentateuch as well as the accuracy of the Biblical records (*Die Sprache des Pentateuchs in ihren Beziehungen zum Ägyptischen,* 1929; English trans., *The Language of the Pentateuch in its Relation to Egyptian,* 1933; *The Accuracy of the Bible,* 1935).

In addition to the books already mentioned, Yahuda published: *Hapax Legomena im Alten Testament* (1902); *Prolegomena zu einer erstmaligen Herausgabe des Kitab al-Hidaya* (1904); *Die biblische Exegese in ihren Beziehungen zur semitischen Philologie* (1906); *Bagdadische Sprichwörter* (1906); *Jemenitische Sprichwörter* (1911); *Contribución al estudio del judeo-español* (1915); *Les murailles d'Jéricho* (1935); *The Nazi Menace to the Liberty of Thought* (1935); *Don Isaac Abravanel* (1937); *The Symbolism and Worship of the Serpent* (1939); *On Freud's Moses* (Hebrew; 1942). He published a critical edition of the original Arabic text of the *Hoboth Halebaboth* of Bahya ibn Pakuda (1912).

YAHVEH.[1] **1. The Word.** Yahveh is the most probable transliteration of the ancient Hebrew name for God. It is frequently, especially among German scholars, written Jahweh, Jahveh, Jahve or Yahweh; but these forms call either for the German pronunciation of *j* as *y,* or of *w* as *v,* or both. The oldest traditions as to the pronunciation of the name Yahveh are found in the church fathers. Of these, Clement of Alexandria (about 215 C.E.; *Stromata* 5, 6:34) writes Ἰαουαι = Ἰαουέ, while Theodoret (about 386-457 C.E.; *Quaestio 15 in Ex.*) gives Ἰαβέ as the Samaritan pronunciation and Ἰα as that of the Jews (cf. also Epiphanius, *Adversus haereticos* 40:5, who also has Ἰαβέ). The earliest post-Biblical Hebrew reading of the name known to us is יהביה, which is found in an old incantation bowl from the 6th or 7th cent. C.E. (Montgomery, J. A., in *Museum Journal* of the University of Pennsylvania, 1910, pp. 28-30). This was evidently vocalized as Yahbeh.

Going still further back in history, one meets the divine name on the Assuan papyri, which come from the 5th cent. B.C.E. Here it is written יהו and יה, and in two cases יהה is found. These were probably pronounced as Yahvoo, which contracted to Yahu and Yah; however, the form יהה suggests the possibility of Yahō. The ostraca found in the palace of Ahab in the ruins of Samaria come from the 9th cent. B.C.E. or from the first half of the 8th cent. B.C.E. In these lists eleven names appear which are compounded with the name of the God of Israel. In these compounds the name of God is always written with but two consonants: יו. Among them are עגליו (no. 41), עבדיו (nos. 50 and 52), and יוידע (no. 65). Such forms seem to point to the pronunciation Yav or Yavoo. Alongside of these should be placed the jar-handles of the Rhodian type found at Jericho, upon which the characters יה were stamped; but it is not clear that this was intended for the divine name. Some late Greek magical papyri write the divine name as Ἰάω.

Reaching still further back, one encounters many instances of the name of the Hebrew God in the cuneiform literature of the Assyrians and Babylonians. There it is written in three forms, Ya, Yau, and Yahu; for example, Ya-u-ha-zi (Jehoahaz), Ha-za-ki-ya-a-hu (Hezekiah), Ha-za-ki-ya (Hezekiah) and Ia-a-hu-na-tan-nu (Jehonathan). The name of a king of Hamath in the 8th cent. B.C.E., which is found in an inscription of Sargon II, reads Ya-u-bi-di. That Ya-u is here a divine name is clear from the fact that the cuneiform determinative for "god" precedes it and from the further fact that the same king is called Ilu-bi-di, *ilu* being the Assyrian word for "god." That the divine name was frequently shortened is clear from the occurrence of the short form Yah, which frequently occurs at the end of Hebrew personal names, such as Elijah and Jeremiah, and in the word Hallelujah; Yah also occurs a few times independently, as in *Ex.* 15:2; *Isa.* 12:2; *Ps.* 68:5; 118:14.

In the light of these facts, it is clear that the first syllable of the name was Ya-, and the only possible element of uncertainty attaches to the second syllable. Was the name originally Yah, Yahu, Yahō or Yahveh? If the original pronunciation was Yahveh, then Yahu is most easily explained as a contraction, in the same manner as the verb form *yishtahaveh* ("he prostrates himself") is contracted when the Vav Consecutive is prefixed, as in *vayishtahu.* In this case the old form Yahveh and the new form Yahu continued side by side. If Yah or Yahu was original, then Yahveh is a later theologizing expansion.

However, the reading יהוה is very old, being found in line 18 of the Moabite Stone, the inscription of King Mesha of Moab, written in the 9th cent. B.C.E. This goes far toward establishing the priority of the four-lettered name (Tetragrammaton). It is the oldest known datable independent occurrence of the divine name. The Assyrian, ostraca and Assuan forms are all

[1] This article is written entirely from the point of view of Bible criticism.

elements compounded in proper names, and so subject to abbreviation. Unfortunately this Moabite form, being unvocalized, gives no help as to pronunciation. The prevailing opinion is in favor of the reading Yahveh, but even this is open to some question. The use of *-eh* as an ending for Lamed He verbs is not attested by the Moabite Stone, for in two cases of the use of such verbs there, the third radical is a Vav. There is a bare possibility that Hebrew and Moabite usage differed on this point and that the name of the Hebrew God was allowed to retain its native form even in this Moabite document. It may be further noted that where He occurs as a final letter in the Moabite stone, it sometimes marks the third person masculine singular, and it is doubtful whether in such cases it is to be read as *ō* or as *ahu*.

It may be briefly noted here that the form Jehovah has no warrant at all in Hebrew literature, being a hybrid formed from the consonants of Yahveh and the vowels of Adonai, which was used to replace the name of God, held too sacred to pronounce, even before the Christian Era.

The use of the name Yahveh characterizes certain writings and can be employed as one of the characteristics with which a Biblical document is marked. In the analysis of the Hexateuch, one of the earliest evidences to be discovered regarding the existence of various documents within it was the fact that many sections of the text were characterized by the use of the name Yahveh, in contrast to certain other sections in which the word Elohim ("God") appeared with equal consistency and frequency. Now it is recognized that the use of different divine titles is not the only difference between these sections, but that their theological standpoints and their literary style likewise differ. In the 20th cent. these sources are known as the *J* and *E* documents of the Hexateuch, *J* being a survival of the old spellings Jehovah and Jahweh, and *E* being the first letter of Elohim.

In like manner, in the Psalter, the psalms are grouped partly according to the divine name that they employ. The first of the five divisions of the Psalter (*Ps.* 1 to 41) is made up of psalms in which the name Yahveh is regularly used; while *Ps.* 42 to 72, on the other hand, consistently use Elohim. In these two collections, *Ps.* 14 and 53 are duplicates, the one copy belonging to a Yahvistic Psalter and the other to an Elohistic Psalter.

2. Meaning. Whatever the original spelling may have been, the problem of the meaning of the name Yahveh remains. An interpretation of the name is given in *Ex.* 3:14, where the answer to the question, "What is His name?" is: *'ehyeh 'asher 'ehyeh,* "I am that I am," or, perhaps better, "I will be that which I will be." This probably means that Yahveh is self-determining by nature. But this is a relatively late interpretation of the name, and probably does not represent its original content. The *E* document of the Hexateuch, in which this theological interpretation is found, is commonly placed in the latter part of the 9th or the first half of the 8th cent. B.C.E. The name Yahveh originated at least four or five centuries earlier, and it is not likely that the primitive God-idea was as abstract and metaphysical as this interpretation implies.

Objection has been made to the primacy of the form Yahveh on the ground that Semitic god-names are not formed in the imperfect form of the verb. But it should be remembered that Jacob-el, Joseph-el and perhaps Yisra-el themselves are imperfects and are clearly the names of gods. One would never know from the Bible that Jacob and Joseph once had -el attached to them. It is quite possible that the original form of the name was Yahveh-el (cf. the name Joel).

Several suggestions have been made as to the meaning of Yahveh. One would make it equivalent to *yihyeh,* from *hayah,* "to be" or "to become," and so meaning the self-existent one. But this is improbable, for *havah* and *hayah* are not identical, and so abstract an idea is not primitive. Another view is to make it a Hiphil of the same verb and so give it the meaning, "He Who brings into being," "the Creator." But no Hiphil forms of *hayah* are known to exist. The Arabic and Assyrian verb *havah,* "to breathe," has been called into play, and Yahveh has thus been made a god of the wind and the weather. Yahveh has been made a weather-god also by the connection of the name with the verb *havah,* "to fall," that is, He who makes rain, hail and lightning descend upon the earth, that is, the thunder-god.

One other origin may be suggested, namely, a connection with the noun *havvah,* "destruction." Yahveh would then mean "the destroyer" of His people's foes. In this connection attention may be called to the divine name Shaddai, which may be connected with *shadad,* "to destroy," and thus mean, like Yahveh, "the destroyer." If any one of these origins be predicated of Yahveh, it is quite obvious that with the passage of time the original idea was supplemented and transformed by being filled with ethical content.

The Hebrew God-idea kept pace with the progress of knowledge from the beginning of time until the Greek period. It profited by all that which Oriental history and experience had to contribute, and when the Hebrew mind encountered the learning of the Western world as represented in Greek thought and civilization it rapidly assimilated what it needed therefrom and enriched its own thought greatly thereby.

It was chiefly to the prophets of Israel that this purification and enrichment of the Yahveh-idea was due. Amos pointed out that Yahveh, operating through strict justice, would pass judgment on all peoples, including His own. Isaiah and Jeremiah spoke of faith in God in the midst of the calamities that threatened the nation. Ezekiel taught the exiles in Babylonia that they could still worship Him, and Deutero-Isaiah pointed out the folly of idolatry and issued a clarion call for the service of God. By the time of the Second Temple the great and noble God-idea in *Jonah, Job* and *Psalms* had become an integral part of the faith of the Hebrew people.

The character of Yahveh as finally worked out by the Hebrews in the pre-Christian period combined the universal and metaphysical qualities of omnipotence, omnipresence, omniscience and holiness with the human and concrete qualities of justice, honesty, truthfulness, dependability, mercy and personality in such a way and in such proportions as to win the loyalty and worship of all sorts and conditions of men.

YAKNEHAZ, *see* HAGGADAH, PASSOVER.

YALKUT ("collection"), name of various literary compilations of Haggadic material, arranged according to the Biblical verses to which they apply. The most famous of these is the Yalkut Shimeoni to the entire Bible, which is described in a separate article. The *Yalkut Hamachiri,* compiled by Rabbi Machir ben Abba Mari of the 14th cent., who probably lived in Spain, is a collection of Talmudic and Midrashic sentences commenting on *Isaiah, Jeremiah, Ezekiel,* the twelve minor prophets, *Psalms, Proverbs* and *Job.* The following parts were published: *Isaiah,* by I. Spira, Berlin, 1894; *Psalms,* by S. Buber, Berdichev, 1899; *Proverbs,* by L. Grünhut, Frankfort, 1902; the minor prophets, by W. Greenup, London, 1909-13.

The *Yalkut Reubeni,* which was compiled by Rabbi Reuben ben Hoshke Cohen of Prague (d. 1673), is a collection of Cabalistic and Midrashic comments in Hebrew and Aramaic, arranged according to the weekly portions (Sidras) of the Pentateuch. Although it gives detailed extracts from rare Cabalistic works, it is without scientific value.

Lit.: Buber, S., Introduction to his edition (1899); Poznanski, in *Revue des études juives,* vol. 40, pp. 282-86; Benjakob, I. A., *Otzar Hasefarim,* 222; Friedberg, *Beth Eked Sefarim,* 267.

YALKUT SHIMEONI, often called "the Yalkut," a collection of Halachic and Haggadic, ethical and historical statements, compiled by Simeon Kara Hadarshan of Frankfort, Germany, in the 13th cent. This material is arranged according to the Biblical books to which it refers, and covers the entire twenty-four books. It consists of two parts: the Pentateuch, with 963 paragraphs, and the Prophets and Hagiographa, with 1,085. Out of more than fifty sources, several of which are no longer extant, the compiler collected interpretations and explanations of the Biblical passages and arranged them in proper order, at the same time indicating the sources from which they were derived. The collection is not only a convenient reference work for the Midrash, but is also of great value as an aid to textual and literary criticism, since it gives a comparatively early text.

YARMOLINSKY, AVRAHM, librarian and author, b. Haisin, Russia, 1890. He came to the United States in 1913, and completed his education at the College of the City of New York (A.B., 1916) and Columbia University (Ph.D., 1921). He became instructor in Russian in the evening session of the College of the City of New York in 1917, and chief of the Slavonic division of the New York Public Library in 1918, and still held both these positions in 1943. From 1919 to 1920 he taught Russian language and literature in the extension division of Columbia University. His writings include: biographies of Turgenev (1926) and Dostoevsky (1934); *The Jews and Other Minor Nationalities Under the Soviets* (1928); *Picturesque United States of America* (1930); *Russian Literature* (1931); *Early Polish Americana* (1937).

Yarmolinsky was the translator of Alexander Benois' *Russian School of Painting* (1916); the memoirs of Count Witte (1921); *Modern Russian Poetry* (with his wife, Babette Deutsch; 1921); *Contemporary German Poetry* (with Babette Deutsch; 1923); *Russian Poetry* (with Babette Deutsch; 1927); and Alexander Blok's *The Twelve* (1937).

He edited: Dostoevsky's *The Brothers Karamazov* (trans. Garnett, 1933) and *The Possessed* (trans. Garnett, 1936); *The Works of Alexander Pushkin* (1936); *A Book of Short Stories by Maxim Gorki* (with Baroness Moura Budberg; 1939). Yarmolinsky contributed numerous articles to periodicals and to the *Universal Jewish Encyclopedia;* he was contributing editor to the latter in the field of Russian history and literature. In 1939 he was awarded the Townsend Harris Medal.

Lit.: Twentieth Century Authors (1942) 1559-60.

YARMUK, a river of Palestine which rises in the Hauran mountains, flows westward, forming the northern boundary of Gilead (modern Aglun), and empties into the Jordan just below the sea of Chinnereth. It is not mentioned in the Bible, but is referred to by Pliny as Hieromyces and is called the chief river in Palestine, next to the Jordan, by the Talmud (*Parah* 8:10). In fact, it has almost as much water as the Jordan at the point of their juncture. A stream of lava once flowed in the site of the bed of the Yarmuk, and the hot springs of Gadara are found in its valley. The Yarmuk was the site of the great battle between the Arabs and the Byzantines in 637, which won Palestine for the former. After the first World War it became part of the boundary between the British mandate of Palestine and the French mandate of Syria. The utilization of the water power of the Yarmuk is the basis of the Rutenberg project.

YASSER, JOSEPH, musicologist and organist, b. Lodz, Poland, 1893. In 1917 he was graduated from the State Conservatory of Moscow, and from 1918 to 1920 he was head of the organ department of Moscow Conservatory. He held numerous posts as organist in Russia, and gave many recitals, before coming to the United States in 1923. In the United States he filled several major positions as organist, with the Free Synagogue, Temple Emanu-El, Temple Rodeph Sholom, and the Transamerican Broadcasting and Television Corporation. Yasser expounded his theories about music in lectures at colleges and conservatories in America and Europe, in his books, *A Theory of Evolving Tonality* and *Mediaeval Quartal Harmony,* and in his numerous articles in the leading music journals of the world.

Yasser exerted a profound influence on American and Jewish musicology through his various offices, including those of vice-president of the American Library of Musicology, chairman of the New York Chapter of the American Musicological Society, vice-president of the World Centre for Jewish Music, member of the Board of Governors of the Jewish Music Forum, and member of the Committee on Studies in Jewish Music of the American Academy for Jewish Research.

YAYIN NESECH, wine intended for use as a libation to idols, and therefore entirely forbidden to Jews. According to Talmudic law, no Jew may have in his possession as much as the size of an olive of such wine, and vessels which formerly contained it must be thoroughly rinsed before they can be used by Jews (*A.Z.* 29b-31a). From this specific prohibition the interdiction was expanded to include any sort of wine (*setham yenam*) of idolaters, since one could never tell when it might not be used for idolatrous purposes. In addition to the motive of not having anything to do with idolatry, there was the remembrance of occasions on which the rabbis had decreed that Jews should avoid all social relations with idolaters. Thus the famous thirty-nine regulations which the Shammaites put through in a time of tension (probably 66 C.E.; *Yer. Sab.* 1:4) included one against using the wine of the heathen.

Strictly speaking, the law of Yayin Nesech should not apply to the wine of Christians and Moslems, both adherents of monotheistic religions. However, by the time that these religions became predominant Jews had become so accustomed to using no other wine than that which they themselves had prepared and handled that the prohibition was extended to the wine of Christians (especially as wine is used in such rituals as the Eucharist) and to wine of Jews that had been touched by a Christian or a Moslem. The *Shulhan Aruch* (*Yoreh Deah* 123 to 137) therefore includes all the prohibitions and applies them to wine belonging to or touched by non-Jews; Isserles, on the other hand, favors a more liberal interpretation. Hence conservative Jews insist on using only Kosher wine, while others have disregarded the prohibition as no longer binding. The lasting influence of the early prohibition is evidenced in a story told of Moses Mendelssohn. While he and Lessing were drinking wine together and engaging in friendly discussion, Lessing picked up Mendelssohn's cup and waved it about; Mendelssohn would not drink the wine that was in the cup.

YEBAMAH, *see* LEVIRATE MARRIAGE.

YEBAMOTH ("sisters-in-law"; some scholars would vocalize the word as *Yabmuth,* "levirate marriage"), first tractate of Nashim, the third division of the Mishnah and Talmud. It contains sixteen chapters, and deals for the most part with the regulations concerning the Biblical commandment (*Deut.* 25:5-10) requiring a brother to marry the widow of his deceased brother in case there are no children from the marriage. The tractate discusses degrees of relationship between the wife and her brother-in-law which prevent the second, or levirate marriage, from taking place and other cases where such a marriage is prohibited, cases where a brother is born after the death of the childless brother, status of half-brothers from non-Jewish mothers, and the like. A good part of the discussion deals with cases where two or more brothers marry two or more sisters. In some cases levirate marriage is required, in others the liberating ceremony (Halitzah) must be performed. Part of the tractate is concerned with the rights of the wife during the period between the death of her first husband and the subsequent levirate marriage of Halitzah, and the difference which either ceremony makes in her status. There are discussions as to marriage law in general and as to illegitimacy. Chap. 12 describes the Halitzah ceremony, chaps. 13 and 14 deal with the right of a girl who has been betrothed during her minority to annul the marriage, and the last two chapters deal with evidence as to the death of an absent husband.

The Tosefta, which consists of fourteen chapters, has the same general arrangement as the Mishnah. The Babylonian Gemara is particularly rich in biographical and historical data of the Tannaitic period. Especially noteworthy are the regulations concerning proselytes (*Yeb.* 46 et seq.), and the final chapter dealing with the problems of the Agunah, or woman whose husband is absent and has disappeared, a problem which received elaborate treatment in the responsa literature.

YEDIDYAH, *see* COLONIES, AGRICULTURAL.

YEFETH BEN ALI HALEVI (Arabicized, Yafith ibn 'Ali; in Arabic, Abu 'Ali al-Hasan ibn 'Ali al-Lawi al-Basri), Karaite writer, probably a native of Basra, who lived in Jerusalem in the second half of the 10th cent. Yefeth is by far the most eminent of the Karaite Biblical commentators of the golden age (9th to 11th centuries) of Karaite literature. He wrote commentaries (in Arabic) on the entire Hebrew Bible, including a running Arabic translation of the sacred text. The translation is very literal, often in direct violence to the rules of Arabic grammar, but in his commentaries Yefeth endeavors to supply not only a natural explanation of the simple meaning of the Holy Writ, but also allegorical interpretations, sometimes quite fanciful; he intersperses also valuable observations relating to Hebrew grammar and lexicography, even including a whole glossary of difficult Hebrew words attached to his commentary on *Hosea.* While he does not name his sources, much of his material is obviously taken from older Karaite authorities, and occasionally he borrows from rabbinic works, so that to a considerable extent Yefeth is a compiler, rather than an original thinker.

In addition to their exegetical value, Yefeth's commentaries, through their frequent attacks on Saadia, supply numerous quotations from such of the Gaon's exegetical and polemical works as have been incompletely preserved or have been lost altogether. Aside from Rabbinism, Yefeth occasionally engages in criticism of Christianity and Islam, the passages devoted to the latter faith being especially caustic. In spite of his rigid conservatism, however, Yefeth had no objection to the cultivation of secular studies, in glaring contrast with the obscurantist Solomon ben Jeroham.

The excellence of Yefeth's commentaries was immediately recognized by his contemporaries and successors, and they were eagerly read and excerpted, and some were later translated into Hebrew for the use of the Byzantine Karaites who knew no Arabic. Yefeth is expressly mentioned by Abraham ibn Ezra, but his influence upon him and upon other Rabbinite commentators has not yet been sufficiently investigated.

Yefeth composed also polemic tracts against Saadia and his pupil Jacob ben Samuel and a work on the precepts (*Sefer Hamitzvoth*). LEON NEMOY.

Lit.: Skoss, S. L., in *Encyclopaedia Judaica,* vol. 8 (1931), cols. 754-59 (to the full bibliography given there must now be added Ph. Birnbaum's edition of the commentary on *Hosea,* 1942).

YEFETH BEN DAVID IBN ZAGHIR, Karaite author and physician who lived in Cairo, Egypt, in the 14th cent. Zaghir may perhaps mean "younger," and may have been added to distinguish him from Yefeth ben Ali Halevi. Yefeth's *Book of Commandments,* written in Arabic and for the most part still extant in manuscript, quotes extensively from Karaite authors. Of the Rabbinite scholars he mentions Hai Gaon, the *Sefer Hapardes* of Rashi, Abraham ibn Ezra, Maimonides (whom he calls "unbeliever"), and the *Kitab Alkaffayat* of Abraham ben Moses Maimon.

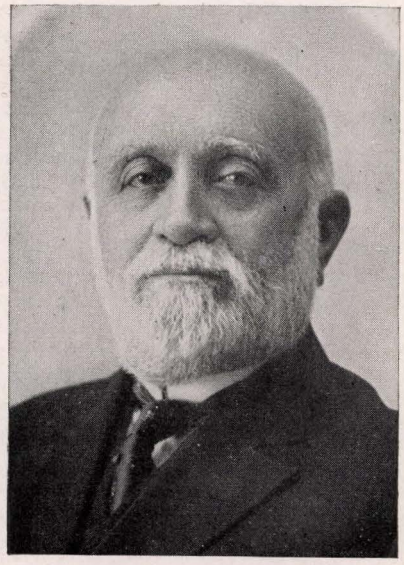
YEHUDAI GAON, *see* JEHUDAI GAON.



YEKOPO (abbreviation for Yevreiski Komitet Pomoshchi Zhertvam Voiny; the Jewish War Relief Committee), a committee set up in August, 1914, in St. Petersburg (Leningrad) as a coordinating agency for the various relief organizations which came into existence at the outbreak of the War. It concerned itself particularly with the Jewish refugees from the northwestern provinces of the empire and with the hundreds of thousands of Jews expelled from the war zone by the military authorities. Needy Jews in occupied Galicia also received some assistance. It found homes for refugees in the interior of the country, and cared for their health, their economic welfare, and the education of their children. Cooperating as it did with other welfare agencies, such as the ORT and OSE, it played an important role in Jewish life. By the end of 1916 it was giving aid to a quarter of a million persons. The budget of the organization for the first three years of its existence totaled thirty-two million gold rubles. These funds came from Jewish communities at home (500 of them taxed themselves for the benefit of the Committee) and from foreign relief bodies, notably the Joint Distribution Committee. Subsidies also came from the government.

After the revolution the headquarters of the Committee were transferred to Moscow. In 1918 its Kiev branch became the central Jewish relief organization of the Ukraine. It ministered to the needs of the victims of the pogroms that occurred during the civil war there. In 1921 the organization ceased to exist. The Vilna branch continued to function independently for at least another decade.

YEKUM PURKAN ("May deliverance arise"), two Aramaic prayers recited in the Ashkenazic ritual just after the reading from the Torah on Sabbaths, and called thus after their opening words. The first prays for the welfare of the academies in Palestine and Babylonia and their leaders; the second for the individual congregations. The first of these prayers was composed in Babylonia, where Aramaic was the vernacular of the Jews, but the exact time can not be determined, as it first appears in the *Mahzor Vitry* (11th cent.); the second does not appear there at all, and is probably of later origin.

Both are absent from the Sephardic ritual. In Reform as well as some Conservative rituals the first prayer is omitted as no longer applicable, while the second is generally combined with the prayer for the congregation that follows.

David Yellin

YELAMMEDENU, *see* TANHUMA.

YELLIN, DAVID, Hebrew writer, educator and philologist, b. Jerusalem, 1864; d. Jerusalem, 1941. His grandfather was a successful businessman of Lomza, Poland, who settled in Palestine, and his father was active in the development of the Jewish settlement in that country; his mother was of the Sassoon family of Baghdad. David Yellin received a traditional education, but evinced an interest in Hebrew, Arabic and European languages. His father, recognizing his interests, sent him to London to study at the university there; but in London Yellin met Nissim Behar, who was then planning to establish a Hebrew school in Jerusalem, and was persuaded by the latter to change his plans and return to Palestine. When the school was opened in 1882 under the auspices of the Alliance Israélite Universelle, Yellin entered it and, before he had finished its course, was made one of its teachers. This action of his aroused a storm of protest among the rabbis of the Jerusalem community, and both Yellin and his father were excommunicated.

In 1887 he was appointed one of the teachers in the Lämel School conducted by the Hilfsverein der deutschen Juden. He remained there until 1914, when he resigned on the occasion of the dispute as to whether German or Hebrew was to be the language of instruction in certain schools in Palestine. From 1904 to 1914 he was teacher and from 1910 on dean of the teachers' seminary founded in Jerusalem by the Esra Verein. In 1903 he founded a teachers' association, Agudath Hamorim, and was its president for a number of years. He also founded kindergartens and lecture courses in Jerusalem. During the first World War he was exiled by the Turkish government to Damascus, and returned to Palestine only after the conquest of that country by the British. He took a lively interest in the seminaries and schools founded by the Zionists. He visited the United States three times to secure support for them, and succeeded in winning that of the B'nai B'rith. While he was in America in 1924 he lectured at the Jewish Institute of Religion and Columbia University. In 1926 he was appointed lecturer on Hebrew poetry of the Middle Ages at the

Samuel Yellin

Hebrew University, and in 1936 was appointed professor. In 1885 he married Etta (d. 1943), daughter of the Hebrew writer Jehiel Michael Pines.

Yellin took an active part in many movements. In 1888 he was one of the founders of the first B'nai B'rith lodge in Jerusalem; he made many trips through Egypt and Turkey as its president, and was later elected to the Grand Lodge of the B'nai B'rith. He served as representative of the Jews to the Turkish government, and actively supported the Young Turk movement of 1908. From 1920 to 1928 he was head of the Vaad Leumi.

His scholarly writings are in the field of Jewish history and literature of the Middle Ages, Hebrew philology, Bible, Judeo-Arabic, and the history of the Jewish settlement in Palestine. They are scattered in various Hebrew periodicals. His books include: a series of textbooks for children (1887 on); *Shirath Yisrael al Admath Yishmael* (Jerusalem, 1891); *Rabbenu Mosheh ben Maimon* (Warsaw, 1898); *Hamibta Vehaḳethib Baibrith* (Jerusalem, 1905); *Hikre Mikra,* a commentary on *Job* and *Isaiah* (Jerusalem, 1927-39); a Hebrew dictionary, with Judah Grazovski (Jaffa, 1919; revised ed., 1927); an edition of Todros Abulafia's *Gan Hameshalim Vehahidoth* (Jerusalem, 1932-33); translations of such works as the Turkish agrarian laws (with Pines), Oliver Goldsmith's *Vicar of Wakefield,* David Philipson's *Old European Jewries,* Israel Abrahams' *Jewish Life in the Middle Ages,* and *The Arabian Nights.*

He was editor of the works of his father-in-law, Pines. On the occasion of his seventieth birthday, in 1934, the Vaad Hayobel issued two volumes of his writings, *Kethabim Nibharim* (published at Jerusalem, 1936, 1939), and a special jubilee volume, *Minhah Ledavid* (Jerusalem, 1935).

YELLIN, SAMUEL, metal worker, b. Poland, 1885; d. New York city, 1940. He was already a master craftsman when, at the age of twenty, he emigrated to the United States and settled in Philadelphia (1907). Yellin established his own workshop and, twenty years after his arrival in the United States, he was employing 200 men working at forty-five forges. Among the products of his workshop were the giant hand-wrought grilles and other decorative ironwork of the Federal Reserve Bank, and metal embellishments for the Cunard Building, the Cathedral of St. John the Divine and the Church of St. Vincent Ferrer in New York city, and the estate of J. Pierpont Morgan at Glen Cove, L. I. Yellin also designed and supervised the hammering-out of the gates to the Harkness Memorial Quadrangle at Yale University, and the Memorial Chapel screen at Valley Forge, Pa. Among his largest undertakings was a pair of gates for the Packard Building in Philadelphia, thirty-five feet high, twenty-one feet wide and weighing ten tons.

He also contributed metal structures to The National Cathedral in Washington, D. C., the McKinlock Memorial at Northwestern University, the Grace Cathedral in San Francisco, and to various university buildings. Works of his were to be found in the Cloisters branch of the Metropolitan Museum of Art, New York city, the Columbia Library, the New York University Hall of Fame and several other public buildings in New York city.

Yellin was noted for his endeavors to revive the skill and artistry in fashioning decorative ironwork which marked it in medieval days. He contributed an article on metal work to the *Encyclopaedia Britannica.* Yellin was the recipient of medals from the American Institute of Architects, the Art Institute of Chicago and other institutions. In 1926 he won the $10,000 Edward M. Bok award in Philadelphia for "having performed during the last year a service to advance the best and largest interests of Philadelphia."

Lit.: American Hebrew, Sept. 11, 1925; *New York Herald Tribune,* Oct. 4, 1940.

YELLOW BADGE, *see* JEW BADGE.

YEMEN, an imamate (ecclesiastical Mohammedan state) situated to the north of the British protectorate of Aden in the southwest corner of Arabia. In this country there are the most orthodox, even fanatical, Moslem community and the most ancient Jewish colony in the world.

According to a legend, Jews settled in Yemen immediately after the destruction of the First Temple (586 B.C.E.).

During the first centuries of the Common Era there were political and cultural relations between Yemen and Ethiopia, and in both countries the Jews played an important part until Christianity became the official religion in Ethiopia and Islam was established in Arabia. In the fifth decade of the 20th cent. the economic structure of the Jews of Ethiopia was very similar to that of the Yemenite Jews. In both countries the Jews were craftsmen and artisans by preference, being engaged principally in smithing, carpet-making, weaving, and the manufacture of pottery. The Jews of Yemen were, in addition, highly reputed silversmiths and goldsmiths, and had a virtual monopoly on the handicrafts.

In the 6th cent. the South Arabian dynasty of the Himyarites became converted to Judaism, but their rulership weakened because the majority of the population, especially the noble families, continued to adhere to paganism. The Himyarite kings waged war several times against Aksum (Ethiopia). Dhu Nuwas, the last Jewish king of Yemen, retaliated for the persecutions of the Jews in the Byzantine Empire by executing Byzantine Christian merchants who crossed Arabia on the way to India and by killing 340 Christians after the conquest of the city of Negra. These facts were exaggerated by Christian hagiographers, and were related as a general persecution of Christians by a Jewish king. Traces of this incident are to be found in the legends of some Christian martyrs. Subsequently Dhu Nuwas, defeated by the Ethiopians, committed suicide,

A Yemenite type, drawn by Elias M. Grossman

and many Yemenite Jews were slain by the Ethiopian invaders, but a great number of Jews continued to resist, entrenched in the mountains, and the efforts of Ethiopian Christian missionaries to convert the Jews in the cities proved a failure. After the country of Yemen became subjected to Persian rulership, Judaism was tolerated by the Persian government, and the Jews of Yemen became prosperous.

Yemenite girl, by Fred Taubes

While Mohammed was eager to exterminate the Jews of Northern Arabia, he let Yemen alone and refrained from persecuting the South Arabian Jews. But the succeeding caliphs, applying Islamic law also to Yemen, rendered the situation of the Yemenite Jews considerably worse. To a certain degree, however, the Jews of Yemen continued to live, economically, in tolerable circumstances. Letters of a Gaon found in the Cairo Genizah and directed to the Jews of Yemen during the 11th cent. prove that the latter contributed money to the Babylonian Jewish academies. Other letters found in the same Genizah show that relations existed between the Jews of Yemen and those of Egypt.

In the 12th cent. the Jews of Yemen suffered from peculiarly severe persecutions. In 1172 Maimonides therefore sent his famous consolatory *Iggereth Teman* (Epistle of Teman, i.e. Yemen) to Rabbi Jacob ben Nathanael, chief of the Yemenite Jews, encouraging them and exhorting them to remain faithful to Judaism in spite of all the persecutions. This letter of Maimonides had a great and lasting effect. Judaism in Yemen, threatened not only by persecution from without but also by dissolution from within, was fortified, and although a few of the Jews of Yemen were converted to Islam during the 13th cent., the vast majority of them became more conscious of their religion than they had been before. Maimonides became and remained very popular among the Jews of Yemen, who included his name in the Kaddish prayer. Obadiah of Bertinoro, a traveler, related in 1489 that the Jews of Yemen had no Talmudic books, but that all of them were well acquainted with the works of Maimonides.

Some Jewish tribes living in the northeastern part of the country maintained their independence until they were subjected by Imam El-Mansur at the end of the 13th cent.; the Jews of Nejran, who resisted him, were beleaguered, and their city was destroyed. But El-Mansur slaughtered both Jews and Arabs, while other rulers favored the Jews, some of whom held high offices during the 13th cent., and helped them rebuild the synagogue of Nejran. During the following centuries the constant wars between Turks and Arabs, Turks and Eygptians, and Arabs and Portuguese resulted mostly in persecutions of the Jews, but there were also intervals during which the Jews were favored, especially during the Turkish occupation.

In the middle of the 17th cent., the Jews of Yemen became victims of the enthusiasm aroused by Sabbatai Zevi. They prepared to emigrate to Palestine, but were captured, and the chief rabbi of Sana, the greatest Jewish community of Yemen, was horribly tortured. The persecutions of the Jews of Yemen continued until, in 1818, the Turks occupied the country again. But in

Interior of a Yemenite school near Jerusalem

the 18th cent. some Jews held high offices, and the Jew Oraki (Salem ben Aaron Aragi Hakohen) was the favorite of two successive imams. Oraki protected his coreligionists and introduced the manufacture of gunpowder, which he commissioned the Jews to exercise.

In spite of all the persecutions, many Jews were royal minters at almost every period of the history of Yemen during the last centuries. When the famous Danish-German explorer Carsten Niebuhr visited Yemen in 1763, he stated that the Jews were prosperous. In 1833 Rabbi Baruch of Pinsk was physician and minister of Imam Abdullah-el-Mahdi, but, after being calumniated, Baruch was shot by the imam, who afterward repented of his murder and favored the Jews, often visiting the Jewish quarter of his capital and collecting Jewish books. The imam was finally suspected by his son of having become converted to Judaism. After the death of Abdullah-el-Mahdi, his son and successor, Abdullah-el-Nasr, persecuted the Jews, accusing them of having misled his father.

The rise to power of the fanatic Wahabis caused new disturbances and especially persecutions of the Jews, while the following imams refrained from restoring order. The demoralization of the country increased after the opening of the Suez Canal, when the Turks tried to consolidate their regime, and a series of insurrections increased the troubles of Jews and non-Jews. In 1904 a new rebellion was led by Yahia Hamid ed Din, who obtained the rulership (1905) and in 1913 was recognized by the sultan as an autonomous ruler. After the first World War Yahia, in spite of his previous association with the Turkish cause during the War, was recognized as the completely independent ruler of Yemen by international treaties. His reign still continued in 1943.

Until Portuguese Jews settled in Aden in the 16th cent., the Jews of Yemen knew almost nothing about the other Jews, and were almost unknown to the latter. Benjamin of Tudela, the famous Jewish traveler of the 12th cent., did not describe them on the ground of personal knowledge and investigation, but gathered news about them in Hilla, near Baghdad. The first authentic description, although a fragmentary one, came from Ludovico di Vartheme, a Christian traveler from Bologna, Italy, who visited Aden in 1503 and there slew a Yemenite Jew. Carsten Niebuhr's description (1763) became basic for almost all geographical and ethnological textbooks. Joseph Wolff, a baptized Jew and missionary, was the first to study the Yemenite Jews expressly. He was followed by Henry Abraham Stern, also a baptized Jew and missionary, whose descriptions aroused the interest of the European press in the Jews of Yemen. In 1859 Jacob Saphir, rabbi of Jerusalem, visited Yemen and brought back reports of the plight of his Yemenite coreligionists. Ten years later the great orientalist Joseph Halévy went to Yemen, disguised as a Palestinian Jew, and entered areas never before accessible to any European. Halévy laid the foundation for scientific research into the history and civilization of the Yemenite Jews. He was followed by two other Jewish explorers, Eduard Glaser and Hermann Burchard; the latter was murdered in Yemen in 1909. In 1910 Yomtob Zemah, of Beirut, Syria, director of a Jewish school supported by the Alliance Israélite Universelle, gave a reliable sociological and economic analysis of the Yemenite Jews after visiting the country several times.

The reports written by the authors mentioned above stirred the interest of the other Jews and resulted in efforts to improve the situation of the Yemenite Jews, mainly by helping them to emigrate. Despite the law prohibiting their emigration, the first group Aliyah of Yemenite Jews took place in 1882, two years after the first Aliyah of the Russian Biluim. From 1909 on a larger number of Yemenite Jews succeeded in emigrating to Palestine after tremendous hardships. Imam Yahia was eager to prevent Jewish emigration, not only because of the ancient laws, but also because he feared the loss of his ablest artisans. Up to 1943 more than twenty settlements of Yemenite Jews had been established in Palestine. The Yemenite Jews were highly esteemed by the other Jews of Palestine because of their moral and professional qualities. Previously a certain number of Yemenite Jews emigrated to Egypt and Eritrea (formerly an Italian colony before its conquest by the British in the course of the second World War) or settled in the British protectorate of Aden, but from 1919 on, emigration to Palestine prevailed, and was still continuing in 1943.

In the independent state of Yemen the status of the Jews is defined by Islamic law in addition to the ancient Arabic caste system. The Jews, being the only "infidels," according to Islamic law, while there are scarcely more than twenty Christians in the country, are dealt with as foreigners and at the same time as subjects of the imam. Every Jew is bound to pay a poll-tax. Jews are forbidden to bear arms and to ride on horseback, while previously, at least from 1240 on, they were forbidden to ride even on camels and donkeys. Jews are not allowed to wear white or colored garments; they are restricted to black and dark blue hues. They are not permitted to emigrate, and Jewish orphans are forced to become converted to Islam. The ancient system of clientele continuing to exist, every Jew has to choose a protector (*gár*), in general a member of the noblest caste of the Gabili, to whom he must pay a special tax. Most of these personal protectorates or clienteles have been hereditary for many generations. Legally the Jews of Yemen, like the Jews of the Christian Middle Ages, are the property of the imam or the sheiks. In certain districts actual Jewish serfdom existed until well into the 20th cent.

The Jews of Yemen elect Jewish authorities of two different kinds. One is the Nasi, generally a wealthy and mostly also a learned man who represents the Jews of his community before the government of the imam. The other is the Mori, the rabbi, judge, Shohet and teacher. The synagogues (knīs) are private properties, and there are neither communal schools nor public welfare organizations or buildings. Nevertheless, the religious education of the Jews of Yemen is on a high level. In daily life the Jews speak Arabic, but they know Hebrew and Aramaic, and almost all of them are well acquainted with the Bible (called Tadsch, the crown) and with their commentaries, written by native authors. Numerous Midrashim were created in Yemen. The prayer-book received especial attention, and many native poets composed Piyutim. Cabala is popular among the Jews of Yemen, and there were many Cabalistic authors in their ranks, the greatest of whom was Mori Salim Sabezi (b. 1619), who wrote *Hemdath Yamim*. He was considered the greatest poet of the Jews of Yemen.

Yemenite Jewish prayer-books were, like most of their other books, written by hand. Not before 1892 was a Yemenite prayer-book printed in Jerusalem. In the synagogue the weekly portion from the Torah is recited in Hebrew, every verse being translated into Arabic by young schoolboys.

From the anthropological point of view, the Jews of Yemen are different from other Jews. They are mostly dolichocephalous (with long heads), smaller in size and of darker skin, and with coal-black hair. A characteristic feature are their ear-locks (Peoth), similar to those of the Polish Jews.

Brauer, in his *Ethnologie der jemenitischen Juden,* estimates that there were 35,000 Yemenite Jews in the imamate, 4,000 in Aden, 5,000 in Palestine and about 1,000 in Egypt and Eritrea. Sloan estimated that there were 5,000 Jews living in Sana, and the rest in the smaller towns and villages. The court of Sana, the largest Jewish community in Yemen, is recognized by all the Jews of the country as the supreme court. The chief revenue of the community of Sana was obtained from the Gabella (salt tax), and served for charitable purposes and the purchase of land. The second city of Yemen with a Jewish population of about 2,000 is Saadeh. Most of the Jews of Yemen lived in villages, and most of them were itinerant workmen who returned home every week just before the beginning of the Sabbath.

A Yemenite Jew, by Hermann Struck

YERUSHALMI, *see* TALMUD; TARGUM.

YESHIVA (*yeshibah,* plural *yeshiboth,* "Talmudic academy"), also Beth Hamidrash, an institution in which the studies begun in the Beth Hasefer (in later times the Heder) are continued and completed. The Yeshiva performed the function of preserving the traditional material and of educating judges and teachers. The word Yeshiva means "seat" (also "session," Aramaic *methibta*), perhaps the chair from which the master, the head of the school, the Rosh Yeshibah or Hacham or Heber Ir, holds his lectures and directs the discussions. Another opinion derives the name from the fact that the disciples sat at the feet of their master. In Babylonia the academies were sometimes located outside of the city and within the Sabbath boundary (*tehum*); hence they were called also Tehuma. Many Yeshivas also had dwelling-rooms for the pupils, *tarbitzoth* ("boarding-schools").

I. Origin. In the oldest Yeshivas the teaching material consisted of the traditional lore, and this was delivered orally by the head of the school. About the time of the completion of the Mishnah the traditional sentences were recited by special monitors, the *ba'ale mishneh,* or by the class, and then explained and expounded by the teacher. The Amoraim stood by the side of the Resh Methibta, and rendered the traditions into the vernacular and discussed them. The presidents of the two most important academies in Babylonia, those of Sura and Pumbeditha, were assisted by a teaching staff consisting of the chief judge, the proxy, who was generally designated as the successor of the president, and the seven heads of the teaching assembly, Reshe Kallah. In the time of the Geonim these Babylonian *methibtoth* issued the regulations for all Israel. The peculiar characteristics of the Yeshiva, which have remained to the present day, such as the singing manner of speech and the use of ingenuity in the manner of teaching (*harife Pumbeditha,* "the ingenious students of Pumbeditha"), as well as the demands made upon the students, were developed in Babylonia. During the Byzantine period in Palestine (Tiberias) we find the Reshe Pirke as heads of the schools. In the Middle Ages and in modern times the material taught in the Yeshivas received a considerable increase in extent through the rabbinical literature, including the codifiers, which in the meantime had grown to gargantuan proportions. It was the task of the master to give the lecture, which consisted of the *perush,* or explanation of the text "on the page," and the Tosafoth, or additions and subtleties in the teaching material. He also had to be able to give *hiddushim* ("new comments"), that is to form new combinations and make original explanations. Thanks to the peculiar nature of the Talmud, which is so all-embracing as to include almost all fields of knowledge, the pupils of the Yeshiva were protected from a one-sided education, despite the fact that their studies were limited to a very narrow range and every other form of knowledge was left for private studies. Those who attended the Yeshiva were called *talmide hachamim,* "disciples of the sages." Later on this designation was used only for savants, and the students were then called *bahurim.* The expression *shi'ur* or *she'ur* was used for the task or daily lesson; later on it became a designation for the Yeshiva itself.

II. Development. In the Middle Ages the *bahurim* much resembled the "wandering students" who attended the Christian universities both as to their way of living and their peculiarities as a class. They followed the Talmudic schools or their masters, and journeyed from community to community without having any fixed abode. Just as the Christian students had their *Scharteken* (composition-books) from which they studied, so the *bahurim* had their *kobetz* ("collection") and *likkutim* ("selections"). These consisted of pieces from manuscripts, lectures of teachers, responsa of distinguished rabbis, and scholarly notes which were acquired here and there and which took the place of a library. Thus the chief work of Jacob ben Moses Mölln (Maharil) arose only after his death from the notes of his disciple Zalman of St. Goar. As a rule the *bahurim* were poor; many of them were married, some in their early years. Like the Christian students, they usually lived in a special house provided for them, where they were well taken care of. On the other hand, they were frequently distinguished from the Christian students by their assiduous diligence, since they generally devoted night as well as day to their studying, or *lernen.* They differed from other students

A Palestinian Yeshiva (Meron)

also in being pious and continent, although they did not suffer for lack of joy in living.

The Yeshiva would often confer scholarly degrees. The lower one was that of Haber ("companion of the sages"). A higher one was the title of Morenu ("our teacher"), which goes back to Rabbi Meir ben Baruch Halevi, rabbi at Vienna (about 1370), and indicated that the holder was capable of filling any rabbinical position.

The Yeshivas had also a certain order of studies and a definite method. In the 17th and 18th centuries in Moravia, for instance, each one of the individual cities in a district was assigned a certain minimum number of *bahurim* which it was expected to support. In Poland congregations consisting of fifty members were obligated to provide for thirty *bahurim*. In both countries the same tractate (*massechta*) of the Talmud had to be studied at the same time throughout the country. Both memory and ingenuity were exercised in the Yeshivas. The methods of dialectics for sharpening the intellect (Hilluk, "hair-splitting," first mentioned about the end of the 15th cent.) and disputations (Pilpul), often veritable mental acrobatics, were native to Poland in particular, and from there spread to the German Jews (Prague, Frankfort on Main, and Fürth). Some of these methods, with the individuality of their play of question and answer, had a designation derived from their origin, such as the "Nuremberg," the "Regensburg," and the like. In the first decades of the 19th cent. most of the Yeshivas of Western Europe closed their doors, since the one-sided education of the youth was no longer satisfactory there. One of their functions, the education of rabbis, was taken over by the rabbinical seminaries that arose at that time.

III. Spread of the Yeshivas. A. In Ancient Times and the Middle Ages. The most important academies in Palestine in ancient times included the houses of study of Hillel and Shammai, then that of Rabban Johanan ben Zakkai (at Jerusalem, Jabneh, and Beror Hayil), the schools of Eliezer ben Hyrcanus and Tarfon in Lydda, and the academy of Akiba at Bene Berak. After the severe catastrophe of the Hadrianic persecutions (132-141) academies arose in Usha, Sepphoris, Tiberias, Caesarea, Beth Shearim, and Achbara; they were conducted by various presidents who succeeded one another.

The Babylonian Talmud, the main vehicle of Jewish intellectual life for all the time following, grew out of the most important centers of learning at Nisibis, Sura, Nehardea, Pumbeditha, Nehar Pakod, Mahoza, Shekan-Sib, and Silhi, which retained their lustre for many generations. There were Yeshivas also in Baghdad and in Yathrib in Arabia. In the 4th and 5th centuries many of these schools languished because of political oppressions; later they flourished anew, and the principal schools, which were the seats of the Geonim, retained their glory up to the 11th cent.

After the eventual downfall of the academies in the Orient, Western Europe, especially as the result of the labors of the most important commentators to the Talmud, became the seat of many prominent Yeshivas, which took on a different and characteristic impress in accordance with the different countries and epochs in which they were located. They were the nurseries of the spiritual culture of the Jewish people in the Diaspora. The following were some of the most famous: in France: the Talmudic academies of Narbonne, Troyes, Ramerupt, and Paris; in Germany: Metz, Worms, Speyer, Mayence, Regensburg, Fürth, and Altona; in Spain: Cordova (the "Andalusian Sura"), Lucena, Barcelona, and Toledo; in Italy: Mantua, Ferrara, Padua, and Venice; in Austria: Vienna, Wiener Neustadt, Marburg, Prague, Nikolsburg; in Poland: Jaroslaw, Lemberg, Lublin, Cracow, and Warsaw; in Palestine: Safed, Hebron, and Jerusalem.

H., *Zichronothai; Jewish Encyclopedia,* vol. 11, pp. 595-600.

B. Modern Times. Although the Yeshivas ceased their activities in Western Europe in the 19th cent., they were of great importance for Russia and Hungary; new Yeshivas were created in addition to the old ones. In the following paragraphs some of these Yeshivas are depicted, a certain number of which are chosen because they represent a type.

1. LITHUANIA, POLAND, and RUSSIA. a. The Yeshiva of *Volozhin* was started in 1803 and became the most important Russian Yeshiva. Its founder and president, Hayim of Volozhin, was an opponent of Pilpul, like his teacher, Elijah Vilna. The number of pupils was small at first, but speedily increased, although only those who had received a thorough previous education were admitted. After the death of Hayim of Volozhin (1821), his son, Rabbi Isaac of Volozhin, directed the institution. In 1824 the Yeshiva, which now had more than 200 pupils, was closed by order of the government. In spite of this, it actually continued to maintain its existence up to the time when it was again officially sanctioned in 1843. When Isaac of Volozhin died, he was succeeded by his son-in-law Rabbi Eliezer Isaac, then by Rabbi Naphtali Zebi Judah Berlin; after 1854 the latter and Joseph Baer Soloweichik were jointly in charge of the Yeshiva. Berlin was an adherent of Elijah Vilna's method of teaching, while Soloweichik favored the Pilpulistic method. As a result of this a dispute arose; after it had been settled, Berlin retained the sole direction.

In 1858 the Yeshiva was again closed by the government, but thanks to the energies of Berlin, it was further developed in spite of this, and numbered about 400 students. After a second legalization and another closing, its re-opening was violently opposed by the Maskilim; it was accomplished only under the condition that certain secular studies also should be taught there (1891). These conditions were not carried out, and this led to the final official closing (1892). After this it still continued to exist, despite the lack of official sanction, until the first World War, under the direction of Rabbi Raphael Schapiro, the son-in-law of Berlin. During its hundred years of existence its influence on the cultural life of Russian Jewry was unusually strong. Many of the important rabbis of Russia and Poland, as well as many Hebrew authors, were students there. Other great Yeshivas of the same type include the Yeshiva at Telshi, Lithuania, founded by

Rabbi Eliezer Gordon, and in 1941 under the direction of Rabbi A. I. Bloch, and those of Slobodka, Mir, Kamenetz-Podolsk, Radin, Grodno, Lublin, Kletz and Baranowice. The outstanding heads of Yeshivas, past and present, include the Finkel and Kamai families in Mir; the Blochs and Rabinowitzes in Telshi; I. M. Kahan and N. Tropf in Radin; Simon Shkop, B. B. Leibowitz, M. M. Epstein, Meir Shapiro, Aaron Kotler and Elhanan Wasserman.

As a result of the Nazi persecutions, most of the East European Yeshivas were closed in 1943. A few students had gone to Palestine, most of them were in Turkestan, while a large number were in Shanghai, where they printed their textbooks and continued their studies despite great handicaps.

b. *Musar and Hasidic Yeshivas.* Rabbi Israel Lipkin, founder of the Musar movement in the late 19th cent., and his pupils, Isaac Blaser, Simhah Ziessel of Chelm and Naphtali Amsterdammer, founded many Yeshivas to carry out the Musar ideal. Lipkin's outstanding pupil, Joseph Josel Hurwitz, founded a network of Musar Yeshivas, called "Novarodok" Yeshivas after the place of the principal one of the group. About the same time the Hasidic rabbi, Sholem Bär Schneersohn, founded Hasidic Yeshivas in various smaller cities (Horoditch, Liubavicz, Shtshedrin). In these not only the Talmud, but also the Hasidic literature (*habad*) were taught. The Yeshivas were called "Tomeche Temimim."

c. *Lida.* This was founded in 1885 by Rabbi Isaac Jacob ben Solomon Naphtali Reines, the leader of the Mizrachi. It was distinguished from the other Yeshivas by the fact that the time of study was divided into two parts, and that it had a systematic method of teaching. In the first four years the Talmud and its commentaries were studied: the last two years were devoted to the later authorities, but at the same time emphasis was laid upon the acquisition of a good general education.

d. *Odessa.* The Yeshiva in Odessa was reorganized in 1905 under the direction of Chaim Tchernowitz, and a modern program was adopted; later on it was conducted by Israel Rabin and Simhah Assaf. Here the first four years were devoted to Jewish studies and a general education, and the actual rabbinical education was given only in the later years. This Yeshiva was completely modern and enjoyed no high regard in Orthodox circles. Joseph Klausner and Chaim Nachman Bialik were on its faculty.

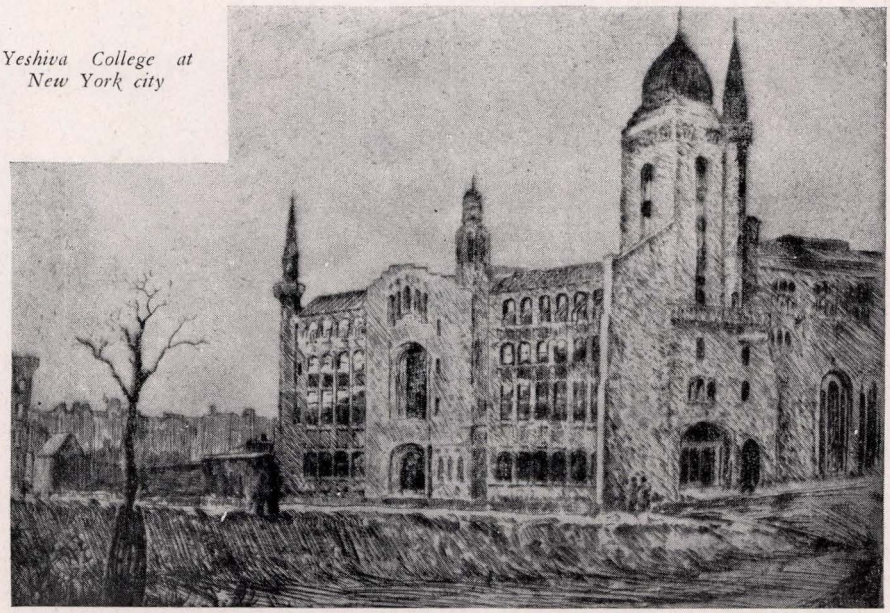
In addition to these Yeshivas which were for the most part established in the 19th cent., the following are also of a certain importance: Lomza, Slutzk, Poneviez, Vilna, Chelm, Slonim, Kovno, and Vitebsk.

2. Hungary and Slovakia. a. *Eisenstadt* (Kismarton). The Yeshiva at Eisenstadt, founded in 1851 by Israel Hildesheimer, played an important part in Hungary. Hundreds of young men from Hungary and Germany were educated there. Hildesheimer himself taught there; besides courses of a Talmudic nature, there were also others in German, Latin, Greek, and mathematics. Solomon Kutna, Hildesheimer's successor as rabbi, succeeded him also as director of the Yeshiva; but its best days were already over.

Lit.: Klein, *Einiges über die Tätigkeit Dr. I. Hildesheimers in Ungarn* (1851-69); Fischer, P., in *Jeschurun* (1928), Nos. 5 and 6.

b. *Hunsdorf.* The Yeshiva at *Hunsdorf* (Hunfalva) was organized by Samuel Rosenberg (1825-1914), who, incidentally, had been a pupil of Moses Sofer. It soon became one of the most highly regarded Yeshivas in Hungary; the average number of students there was 300, and it was not until the beginning of the first World War that it sank to 200. The Yeshiva had three divisions; the first two consisted of four semesters each, the third, of six. Only graduates of a Talmud Torah who had already completed their scholastic requirements were admitted. The Yeshiva, which broke up at the end of 1928, was a developed type of rational or "public" Yeshiva. It offered not only better hygienic conditions but also better methods of instruction than the institutions of the large cities.

c. *Pressburg* (Pozsony). The Yeshiva in Pressburg has been in existence since about 1700. Among the great masters who taught there may be mentioned: Rabbi Meir Barbi of Halberstadt (from 1768-89 in Pressburg), Rabbi Meshullam Tismanitz (1794-1801), and Rabbi Moses Sofer (1807-40). The latter inaugurated a new era in the development of the Yeshiva. His personality made Pressburg the foremost community of Hungary, and its Yeshiva the most important. Many hundreds of scholars flocked to it from all countries, and the government recognized it as an institution for the education of rabbis. After Moses Sofer died, his son Ketab Sofer took over the direction of the Yeshiva, of which he had charge until 1871. He was succeeded by his son, Rabbi Simhah Bunem (to 1906), and by the latter's son, Rabbi Akiba (Sofer) Schreiber (from 1906 on). The Yeshiva is remarkably well organized as to pedagogy and administration.



In addition to these, the following important Yeshivas may be mentioned: Mattersdorf (Nagymarton), Nyitra, Pápa, Grosswardein (Nagyvárad), Szatmár, Galanta, Bonyhád, and Huszt.

3. Palestine. The most famous of the many Yeshivas in Palestine are the Etz Hayyim, directed in 1943 by Rabbi I. Z. Meltzer, the Hebron Yeshiva, an offshoot of the Slobodka Yeshiva founded by Rabbi M. M. Epstein, the Merkaz Harab founded by Rabbi Abraham Isaac Kook, and the Petach Tikvah Yeshiva, directed in 1943 by Rabbis R. Katz and E. Duschnitzer. The Mizrachi opened a modern Yeshiva in Tel-Aviv under the direction of Rabbi Amiel. Rabbi Duschinsky and the Gerer Rabbi conducted small Yeshivas. The Musar group and the Pressburg Yeshiva opened branches in Palestine. In 1943 there were Yeshivas also in Tiberias, Safed, Meron and other cities.

In 5681 (1921) Chief Rabbi Abraham Isaac Kook founded the "Universal Yeshivah at Jerusalem" (Yeshibah Merkazith Olamith). In 1943 it had over 100 students, including graduates from the most important Yeshivas in Lithuania, Poland, Roumania, and Hungary. This Yeshiva is intended for the education of the "intellectual Halutzim," with special regard to the important tasks in the Holy Land that are awaiting solution.

All the courses at this Yeshiva are given in Hebrew. The curriculum comprises: 1. the entire Babylonian and Palestinian Talmuds, including the earliest sources and later explanations and reworkings; Bible, with the kindred sciences, especially philology; 3. a knowledge of Palestine, with all divisions of the subject; 4. Jewish philosophy. On graduation, the student is given an authorization as rabbi. Chief Rabbi Kook conducted the Yeshiva until his death in 1935; he was succeeded by his son, Zebi Judah Kook, who was still acting in that capacity in 1943. Among the teachers in the Yeshiva were Rabbi Moses Charlap, Rabbi Yitzhak Arieli and Rabbi David Kahan.

Yeshiva College at New York city

4. Western Europe and America. The migrations of the Jews from Eastern Europe, beginning toward the end of the 19th cent., and the increasing conservative tendency in modern Jewish life again created the necessity for Yeshivas in Occidental countries. Yeshivas were once more established in Germany, especially at Frankfort by Rabbis S. Breuer (1890), M. Schneider (1920) and J. Hoffmann (1924), at Hamburg (by Rabinow) and at Nuremberg (by A. Klein). A Yeshiva was established at Montreux in Switzerland (by Botschko). The Agudath Israel founded the Keren Hatorah for the strengthening of this movement.

Yeshivas have been organized in the larger communities of the United States, especially New York city, Brooklyn, Chicago, Cleveland and Baltimore. The best known is the Rabbi Isaac Elchanan Theological Seminary and Yeshiva College, in New York city (treated in a separate article). It has the power to grant the degree of Doctor of Divinity, and the first to receive that honorary degree from it were Rabbis Bernard L. Levinthal of Philadelphia and Herbert S. Goldstein of New York city.

The Yeshiva Torah Vadath is situated in Brooklyn and housed in 1943 about 700 children of the lower grades and about 200 young men for the branch devoted to higher Jewish learning (Methibta). Rabbi Mendelowitz was head of this Yeshiva in 1943. The Hebrew Theological College in Chicago is the second largest institution in the country and is patterned after the Rabbi Isaac Elchanan Theological Seminary. In 1943 Saul Silber was head of the institution and Meyer Waxman and Rabbi Korb members of the faculty. The Yeshiva in Cleveland has merged with the Yeshiva of Telz in Poland. Other important Yeshivas in New York city in 1943 were those which bore the names Tifereth Jerusalem, Hayim Berlin, Solomon Kluger and Hafetz Hayim. The Yeshiva Ner Israel in Baltimore was directed by Rabbi Ruderman. A branch of the Musar Yeshiva was opened in New York city; branches of the Lublin and Hasidic Yeshivas were opened in both the United States and Canada. In 1943 there was a small Kolel in Lakewood, N. J., under the directorship of Rabbi Aaron Kotler. There were also a number of smaller Yeshivas in various cities of the United States and Canada.

(This article is the product of the collaboration of the following: Marcus Cohn, Herbert S. Goldstein, Salomon Hugo Lieben, Isaac Markon, Moritz Rosenfeld.)

YESHIVA COLLEGE. Yeshiva College is an integral part of the Yeshiva Rabbi Isaac Elchanan Theological Seminary in New York city, the corporate name of the entire institution being Rabbi Isaac Elchanan Theological Seminary and Yeshiva College. The institution, in its entirety, consists of the following five departments listed in the order of their establishment: the Yeshiva, Talmudical Academy High School, the Teachers Institute, Yeshiva College, and the Bernard Revel Graduate School.

The Yeshiva had its beginning in 1886, when the Yeshiva Eitz Chaim, one of the first, if not the first Yeshiva in America, was founded. It was patterned after the Yeshiva of Volozhin. Its purpose was "to give free instruction to poor Hebrew children in the Hebrew language and the Hebrew Law—Talmud, Bible and Shulchan Aruch" as well as an elementary secular education at afternoon sessions.

As a further advance in the level of Hebrew instruction, in tradition with the European Yeshivas, the Yeshiva Rabbi Isaac Elchanan was founded in 1896 as a higher institution for the study of the Talmud and related literatures, and in 1897 was chartered as the Rabbi Isaac Elchanan Theological Seminary. Many of its students, like those of the Yeshivas of Europe, received financial support in order to devote their entire time to their Hebrew studies.

The Yeshiva was reorganized in 1908, and in 1915 merged with the Yeshiva Eitz Chaim. In the same year Bernard Revel, a young but already renowned Talmudic scholar, was called to the presidency of the faculties of the combined institutions, which post he occupied until his death in 1940. One of his initial acts was the establishment of the first academic high school under Jewish auspices, to make it possible for students to continue simultaneously their Hebrew and secular studies. It was organized as the Eitz Chaim Talmudical Academy. In 1919, with the chartering of the Talmudical Academy High School, the Yeshiva high school became recognized as a full-fledged secondary school. In 1921 the Mizrachi Teachers Institute, founded in 1917 by the Mizrachi Organization of America "to train teachers and supervisors for the

The Library of Yeshiva College

Hebrew schools of the United States and Canada," became the third department of the Yeshiva. The charter of the Rabbi Isaac Elchanan Theological Seminary was amended in 1924 to empower it to grant the degree of Doctor of Hebrew Literature.

In view of the fact that many Yeshiva students who, because they continued their advanced Hebrew studies during the day, could attend only the evening courses given at the colleges and universities in the city of New York, Revel urged the creation of a college of liberal arts and sciences under Jewish auspices. Such a college, Revel felt, would not only overcome the physical difficulties which students had to undergo to continue their higher academic studies, but would also integrate, in spirit and curriculum, the ideals of Torah and Americanism. As a result, the charter was further amended in 1928 to permit the creation of the Yeshiva College, the only college of liberal arts and sciences in America under Jewish auspices, and offering courses leading to the degrees of Bachelor of Arts and Bachelor of Science. This made it possible for the students to continue their Jewish studies further while preparing for the baccalaureate degrees. In 1933 the New York state Board of Regents approved another amendment to this charter, authorizing the institution to confer the honorary degrees of Doctor of Humane Letters and Doctor of Laws.

In 1929 the institution moved to elaborate quarters on Washington Heights, one wing of which is a dormitory with rooms for over 225 students.

To these schools there was added, in 1937, a graduate division of Jewish and Semitic studies, which was named in 1941 the Bernard Revel Graduate School, after the late president of the Seminary and of Yeshiva College. This school grants the degree of Doctor of Hebrew Literature. In 1940 the charter of the Yeshiva was further amended, authorizing the conferring of the honorary degree of Doctor of Divinity.

Including the class of 1942, the Yeshiva ordained more than 250 rabbis, and a like number of teachers were graduated from the Teachers Institute. Among the world-renowned Talmudic scholars who have taught in this department are Solomon Polachek, Simon Shkop and Moses Soloveitchik. The Talmudical Academy graduated 1,500 high school students; Yeshiva College graduated over 300 students with the A.B. degree.

The faculty of Yeshiva College included many illustrious men, Jews and non-Jews, such as: Nelson P. Mead, former acting president of the College of the City of New York; Henry E. Garrett, head of the psychology department at Columbia University; Isaac Husik, professor of philosophy at the University of Pennsylvania; Charles F. Horne, professor and head of the department of English at the College of the City of New York; Bernard Drachman. Also a number of refugee scientists and educators, such as Heinrich von Neumann, internationally famous ear specialist, and Bruno Kisch, previously professor of biochemistry and experimental pathology at the University of Cologne, were in 1943 members of the faculty of Yeshiva College. In that year the institution had about 750 students.

The Yeshiva Library, known as the Mendel Gottesman Library, contained in 1943 about 45,000 volumes and pamphlets, including one of the finest collections of responsa and Halachic literature in the United States. The Yeshiva College Library had about 17,000 volumes in 1943. Professor Aaron M. Margalith was librarian.

Among the scholarly publications issued by the Yeshiva College are *Scripta Mathematica,* a quarterly journal devoted to the philosophy, history and expository treatment of mathematics, under the editorship of Jekuthiel Ginsburg, professor of mathematics at Yeshiva College, and *Horeb,* an annual devoted completely to Jewish history and Hebrew literature, published by the Teachers Institute of the Yeshiva, and edited by Pinkhos Churgin, dean of the Teachers Institute.

In 1943 the academic administration included: Samuel Belkin, president of Yeshiva and Yeshiva College; Pinkhos Churgin, dean of the Teachers Institute; Moses L. Isaacs, dean of Yeshiva College; Shelley R. Safir, principal of the Talmudical Academy High School; Samuel L. Sar, dean of men; Jacob I. Hartstein, registrar of the Yeshiva College and of the Bernard Revel Graduate School; Joseph Noble, registrar of the Teachers Institute; Norman B. Abrams, administrative assistant of the Yeshiva and of the Talmudical Academy High School. The Honorable Samuel Levy was, in 1943, president of the board of directors of the Yeshiva and Yeshiva College. SIDNEY D. BRAUN.

YETZIRAH (in Cabala), *see* CABALA.

YETZIRAH, BOOK OF (*Sefer Yetzirah,* Book of Creation), the oldest Cabalistic work extant. The Talmud mentions that some of its sages were acquainted with the magical use of the letters of the alphabet, by

which Bezalel had constructed the Tabernacle, and they had constructed, among other things, a live calf, which they ate (*Ber.* 55a; *Sanh.* 65b). Here there are hints of a "Sefer Yetzirah" which contained the secrets of this magical art. However, the present book is probably not identical with that mentioned in the Talmud. It exists in two versions, a shorter and a longer one. In both cases it consists of six chapters, written in an excellent Hebrew but in so terse and cryptic a style that it is extremely difficult to understand.

According to the book of Yetzirah, there are thirty-two elements which participated in the creation of the world, the ten Sefiroth, or powers of God, and the twenty-two letters of the Hebrew alphabet. The ten Sefiroth, which appear for the first time in Jewish literature, are divided into two classes: the spirit of God and the three elements of air, water and fire; the six directions, namely, the four main points of the compass and the two directions up and down. The letters of the alphabet are divided into groups, according to the organs used in their pronunciation—the beginnings of Hebrew phonetics. Aleph, Mem and Shin are regarded as the basic letters of the alphabet and are related to air (*'avir*), water (*mayim*) and fire (*'esh*), respectively. Both Sefiroth and letters are brought into relation with the planets, the signs of the zodiac and various parts of the human body. They are divided into opposing pairs and arranged into patterns.

The closing verse of the book declares that Abraham read it and understood its mysteries. This, however, is plainly an addition intended to give it an air of antiquity. Modern critics have given widely different estimates as to the time of its origin, ranging from the 2nd cent. B.C.E. to the 8th cent. C.E.; traditionally it was ascribed to Akiba (2nd cent. C.E.). All agree that the most probable place of its composition was Palestine. The earliest evidence as to the existence of the book are the Baraitha of Samuel and the Piyutim of Eleazar Kalir (about the 8th cent.).

The subject of the book and its cryptic nature led to many commentaries and at the same time to an interest in theology which contributed largely to the development of medieval Jewish philosophy. Saadia (10th cent.) was the first commentator; after them there were about a score of others, including those by Isaac Israeli the Elder, Sabbatai Donnolo, Judah ben Barzilai Albargeloni, Judah Halevi (partial), Abraham ibn Ezra (lost), Eleazar ben Judah of Worms, Isaac the Blind, Moses Botarel, Moses Cordovero, Isaac Luria and Elijah Vilna. The first edition of the book (Mantua, 1562) contains both recensions; it has been frequently reprinted. The first translation, into Latin, was made by G. Postel (Paris, 1522); there are English translations by Kalisch (1877), Edersheim (1883), Westcott (1893 and 1911) and Stenring (1923).

SIMON COHEN.

YEVREISKOYE ISTORIKO-ETNOGRAFITSHEKOYE OBSHTSHESTVO, Jewish historical and ethnographical society. This society was formed in Leningrad in 1908 from the historical and ethnographical commission which existed in connection with the Society for the Spread of Enlightenment among the Jews in Russia. The society, of which M. Winawer was president, published the second and third volumes of *Regests and Inscriptions* (1910 and 1913; vol. 1, 1899), the periodical edited by S. M. Dubnow until 1918, *Yevreiskaya Starina* (it appeared continuously as a quarterly from 1909 to 1916, and from then on, irregularly, a volume appeared in 1918, 1924, and 1928 respectively), and a Biblical chrestomathy by M. Soloweitchik.

The society created an archive and a museum which contained the An-sky collection of Jewish art and folklore. Those who distinguished themselves as associates, besides Dubnow, were M. I. Kulischer, S. M. Goldstein, J. Hessen, L. A. Sew, L. J. Sternberg, M. L. Triwus, and Mark Wischnitzer.

YEVSEKTSIA, *see* COMMUNISM.

YEYASHER KOHACHA, *see* GREETING AND WISH FORMULAS.

YEZIERSKA, ANZIA, novelist, b. Poland, 1885. With Abraham Cahan and Mary Antin, she belonged to a group of American Jewish writers whose work mainly recorded their experiences as immigrants in the New World.

In 1901 she emigrated to the United States. Since she had had no regular education, she had to start as an unskilled worker. She was in turn a sweatshop worker, laundress, waitress and cook in private households, until she finally prepared herself to become a school teacher. At the age of thirty-three, notwithstanding her language difficulties, she began to write stories depicting the miserable life of the Jews of the Lower East Side of New York city, and she enjoyed the help and encouragement of Frank Crane, author and Methodist Episcopal clergyman. The *Metropolitan Magazine* was the first to publish a story of hers (1918), "Where Lovers Die."

In 1919 Edward O'Brien selected her story, "The Fat of the Land," published in the *Century,* as "the finest imaginative contribution to the short story" during that year. It depicted the common tragedy of Americanized children of Jewish immigrants whose Americanization causes them to be ashamed of their uneducated mother who starved and toiled for them. In 1920 she began to emerge from relative obscurity through the publication of *Hungry Hearts,* a collection of short narratives dealing with East Side life. She sold the motion picture rights to the Goldwyn company, which employed her for a time at Los Angeles to supervise the preparation of the picture.

Her next book, *Salome of the Tenements* (1922), was a novel about an East Side girl, Sonya Vrunsky, who becomes the wife of the Anglo-Saxon millionaire and philanthropist, John Manning, but, unable to share his outlook, she leaves him and starts a career of her own as a dress designer. *Children of Loneliness* (1923) was a collection of short stories and essays covering the immigrant's joys and sorrows, and *Bread Givers* (1925) dramatized the struggle between "a father of the Old World and a Daughter of the New." Neither of these books, however, nor those that followed, *Arrogant Beggars* (1927) and *All I Could Never Be* (1932), gained the attention given to her earliest works.

Anzia Yezierska, who was frequently dubbed "Queen of the Ghetto" in appreciation of her work as chronicler of the immigrant's fate, distinguished herself from other contemporary writers through her strong realism. She completely disregarded, as she herself said, the taboos in which short stories were held: tragedy, religion, sex and filth. On the other hand, the characters of her stories represent the spiritual hunger of the immigrant Jew, his lust for life, love and beauty, and their gloom was mitigated by a spirit of optimism. While praising the realism of her plots, critics deplored the fact that the speech of her heroes was

often falsely poetic and that her style, at times, was exaggerated. ALFRED WERNER.

12. The Development of Yiddish in the United States.

1. Name. There are a number of names for Yiddish in various languages and by various groups of Jews. In the older literature it is called *Taitsh,* a corruption of the German *deutsch,* and sometimes *Jiddisch,* from *jüdisch,* "Jewish." The older rabbinical literature, written in Hebrew, speaks of the "Ashkenazic (i.e. German) language" and often of "our language." The designation *Ivritatsh* ("Hebrew-German") was used for the archaic language employed to translate religious books. The term *Judendeutsch* ("Jews' German") is rather rare and obsolete. The popular terms *mameloshon* ("mother tongue") and *prost-Yiddish* ("plain Yiddish") are, strictly speaking, not designations. Neither is the term *Jargon,* used contemptuously by the earlier followers of Haskalah and employed for a time even by Yiddish writers. The term *Judeo-German* has sometimes been used by scientific writers, but this term ignores the fact that Yiddish is a separate language. In the United States the term is sometimes translated as "Jewish," which is a misnomer because it falsely implies that the language is spoken by all Jews.

2. History. As the Jews, in the course of history, spread over various countries, new languages or dialects were formed among them; some of these have disappeared with the groups that spoke them, while others still exist. Yiddish is the most important of all the languages now spoken by Jews, and is surpassed only by Hebrew, because of the religious significance of the latter. It is superior to all other Jewish languages in autonomous development of forms, cultural importance, and extent of use.

The cause for the rise of Yiddish was not external oppression or "ghetto exclusiveness." The Jews, with their extremely ancient culture, could not have been "driven out of the general cultural life," since this was not "general," but Christian, and they never belonged to it (though the two forms of culture exerted mutual influences). The origin of Yiddish, therefore, is due to the fact that the Jewish religion was strong enough to create a culture of its own. As soon as the Jews as a group made German their vernacular, it was inevitable that they would soon develop it in their own fashion. Accordingly, it can be safely said that the Yiddish language is almost a thousand years old.

As Yiddish passed from its most ancient to the older period of its existence, its development paralleled the transition from Middle to Early New High German; but it always followed its own independent line of development. In Middle Yiddish, around 1450 to 1650, a considerably extensive independence had already been attained. The flight of the Jews eastward reached its height after the massacres due to the Black Death (1348-49). In the Middle Yiddish period the center of gravity for Ashkenazic Jewry was already in Eastern Europe. It was there that the independent cultural and psychical life of the Jews found its most important expression in the development of the New Yiddish language, the Yiddish of modern times. The present form of the language may have been reached even before the 18th cent. In Western Europe, on the other hand, its development had been previously checked; thus when the waves of fleeing Jews came back to Germany in the middle of the 17th cent., the Yiddish of Germany was unaffected by any influences from Eastern Europe. Later on, in the period of enlightenment and rationalism which began with the closing years of the 18th cent., the traditional life of nearly all of German Jewry was broken up; the consequence was that the Jews adopted the culture and language of their neighbors. Accordingly, from the beginning of the 19th cent. on, the Jews of Western Europe hardly even remembered that they ever possessed a language of their own.

3. Spread. In Western Europe Yiddish spread to the north, west and south of the German-speaking countries. In Eastern Europe it spread further east, north and south from Poland as a center. In the 1940's there were about twelve million persons who spoke

The following phonetic transcriptions are used throughout the article. (These are made as simple as possible; it must be remembered that in Yiddish vowels are pronounced somewhat higher in the mouth than in other languages, and that there is often a slight glide at the end of a long vowel.):

VOWELS:

a, e, i, o, u are the Latin (or general European) sounds.
ō = *o* in "note."
y = the Slavic sound, wider than the English *i,* and very close to the sound of *i* in "milk."

ĕ = the unaccented *e* in "father."
j = consonant *y* in "you."

DIPHTHONGS:

aj = *y* in "my."
ej = *ey* in "they."
oj = *oy* in "boy."
uj = *uoy* in "buoy."
au = *ow* in "how."
yj = the sound of the Hebrew Tzere, a shorter and higher vowel than the *ay* in "gay."

CONSONANTS:

χ = *ch* in "Loch Lomond" or "Bach."
š = *sh.*
č = *ch* in "church."
ž = z in "azure."
ts is pronounced as the Hebrew Tzade, and is never separated. All other consonants are as in English.

Yiddish, the so-called eastern group of the Ashkenazim. Three-fourths of the territory in which the language was spoken lies within the following limits: to the north, the Gulf of Finland; a line drawn from there to the Sea of Azov; to the south, the shores of the Black Sea and the Danube; and to the west, the western borders of Transylvania, Carpathorussia (Ruthenia), Poland and Lithuania. There are also considerable settlements of Jews from Eastern Europe all over the world, the largest being in the United States.

4. Old Yiddish. There has been very little scientific investigation of the beginnings of Yiddish. In its oldest stage it was one of the dialects of Middle High German; in its middle stages it is connected with those dialects which formed a transition to Early New High German. From the very beginning it possessed a Hebrew element, although this was not so fully developed as it was later on. The vocabulary also contains a Romance element, which is probably due to the French origin of Jewish groups in western Germany; there are certain features in it, however, that have not as yet been genetically explained.

Among such words are: *antspōsen,* "espouse" (Old French *espouser,* Italian *sposare*); *prajen,* "invite" (Old French *preier*); *pyltsel,* "girl" (French *pucelle*). Many Romance words are no longer used. Others have been retained in modern Yiddish, such as: *benšn,* "bless" (cf. Latin *benedicere*); *šulĕnt,* "Shalet" (cf. Italian *scaldato,* Old French *chauld*). Many of the words, forms and meanings of that period, which were derived from German or from German materials, have disappeared, such as aχpern, "praise" (German *zu achtbar*); *bešajdliχ,* "plainly" (German *bescheidlich*); *brauleft,* "wedding" (Middle High German *brûtlouf[t]*); *dermajĕn,* "amuse" (Middle High German *meien,* "be happy," "make May"); *entslit,* "face" (Middle High German *antlütte, antlitze*); *ḳestigĕn,* "admonish" (Middle High German *ḳastîgen,* "chastise"); *mistot,* "crime" (Middle High German *missetat*). Others have vanished from colloquial speech, but have survived in the traditional diction into which religious literature is translated. Such are: *baštidl,* "door-posts" (Middle High German *bîstudel*); *gryntfestĕn,* "establish" (cf. German *Grundfeste*); *latsyjliḳĕn,* "favor" (cf. German *leutselig*); *leftsn,* "lips" (German *Lefzen*); *pipernutĕr,* "basilisk" (Middle High German *vîpper* and *nâter*); *vidĕršpenikn,* "be stubborn" (Middle High German *widerspaenec,* "stubborn"); *zaḳroyb,* "booty" (Middle High German *sacroup,* "something stolen").

5. Relation to German Dialects. The Middle Yiddish of Western Europe had a relatively uniform linguistic structure. One of its characteristics is the combination of the individualities arising out of various German dialects. This is still more noticeable in the Yiddish of Eastern Europe. Because of this combination it is impossible to connect modern Yiddish dialects with any definite German dialects. Instead there is a unified structure, out of which only in the larger features can High and Central German elements be separated.

The following characteristics are probably of High German origin: the dropping of the silent "e" at the end of a word, such as *hent* for *Hände;* the substitution of a short vowel for *o,* such as *trikn* for *trocken;* the Yiddish forms *gyjn* and *štyjn,* which correspond to the Bavarian forms *gên* and *stên* in the Middle Ages; the lengthening of a vowel before "r"; omission of the Umlaut; avoidance of a hiatus, as in *tsinim* for *zu ihm;* insertion of "d," as in *hindl,* "little hen"; perhaps the diminutive "l", as in *egl,* "little eye"; similarity in the pronunciation of the German "ch" after "e" and "i" to that after "a," "o" and "u"; and perhaps a number of words such as: *epĕs,* "something"; *huběr,* "oats"; *ḳnyjdl,* "dumpling"; *tok,* "doll."

The following especially important features point to a Central German origin: a single vowel instead of the High German diphthong; instead of the Indo-Germanic *p, f* is used at the beginning, and *p* at the end of a word, as *fafn* for *pfeifen* and *ḳop* for *Kopf;* the Yiddish *oj* replaces the German *au* and *o,* and the sound of *ei* becomes heightened. The two latter features are best explained by assuming that the Central German form was the original source of the present Yiddish form, or a transitional form from the High German.

6. Yiddish Language Elements That Have Disappeared from German. The following are examples of linguistic phenomena found in modern Yiddish which are of Germanic origin but have disappeared from German except where they are present in dialects: *atsindĕr,* "now" (Middle German *iezunt*); *yjnikil,* "grandson," older form *Enigḳel* (Middle High German *enenḳel*); *antplekn,* "reveal" (Middle German *blecken,* "show"; cf. German *Zähne blecken*); *batn,* "exchange" (Middle German *biuten,* cf. German *Beute*); *tsvugn,* "wash" (dialect German *zwagen,* Middle German *twahen*); *doziḳer,* "this" (cf. the old German form *dasig*); *giχ,* "quick" (Middle German *gaehe, gâch,* "hasty"); *milgroum,* "pomegranate" (Middle German *malagrana*); *šwyjĕr,* "father-in-law" (Middle German *sweher*); *zyjgĕr,* "watch" (old German form *Seiger,* Middle German *seiger,* "clock of a steeple"); *zelnĕr,* "soldier" (Middle German *soldenaere*); *tsimmĕrfojgl,* "butterfly" (Bavarian *Sommervogel*).

7. Semitic and Slavic Elements. Although European Yiddish is chiefly of Germanic origin, the number of words of this sort amounting to about 85%, there is an appreciable proportion of words derived from Hebrew (10%) and from Slavonic languages (5%). Hebrew includes a few Aramaic words derived from the language of the Talmud. The influence of Semitic languages is felt not only in the vocabulary but also in the syntax and the inflexion. Semitic words in Yiddish are not merely those which belong to the realm of religion, ritual or intellectual pursuits, but also those which deal with things in ordinary life. Slavic words are usually from Polish, White Russian and Ukrainian, and are for the most part confined to objects and ideas for which there was no exact equivalent in Germanic or Semitic sources.

8. Synthesis of the Elements. All three main elements are bound together in an inseparate unity, in all parts of grammar, which gives the language the charm of a very unusual flexibility, and the ability to express delicate shades of feeling. In this Yiddish resembles English which, like it, is composed of diverse elements blended into a unity. The most characteristic sign of Yiddish synthesis is seen in the fact that the inflexion is the same for all words, no matter what their origin may be. Thus

For the verb:

Infinitive	2nd person singular present	Present participle	Past participle
zugn, "say"	*zugst*	*zugndik*	*gĕzugt*
hulĕmn, "dream"	*hulĕmst*	*hulĕmndik*	*gĕhulĕmt*
ratevn, "save"	*ratevst*	*ratevndik*	*gĕratevt*

For the noun:

Group 1.		Group 2.	
Singular	Plural	Singular	Plural
koječ, "strength"	*kojĕχs*	*menš,* "man"	*menšn*
bruχĕ, "blessing"	*bruχĕs*	*emĕs,* "truth"	*emĕsn*
bik, "ox"	*bikĕs*	*pogrom,* "pogrom"	*pogromn*
mymĕ, "aunt"	*mymĕs*		
χvaljĕ, "wave"	*χvaljĕs*		
štyjrn, "forehead"	*štyjrns*		

Group 3.		Group 4.	
Singular	Plural	Singular	Plural
jusĕm, "orphan"	*jesojmĕm*	*hujn,* "hen"	*hyjnĕr*
doktĕr, "doctor"	*doktojrĕm*	*pujnim,* "face"	*pyjnĕmĕr*
		sujd, "garden"	*syjdĕr*

There are evidences of hybridization in such forms as *mojde zan,* "to confess," and *nitsl vyjrn,* "to escape." Ex-

amples of combination and imitation are: *farblondžẽt,* "gone astray"; *ausglaχẽn,* "make straight"; *gevirntẽ,* "rich woman"; *ḳolẽrlyj,* "all sorts of"; *dam-sojnẽ,* "mortal enemy"; *imḳuvẽd,* "dishonor"; *šlimẽzalnik,* "unlucky fellow."

The unity of sounds is just as clearly evident. The Middle High German *o,* the Hebrew Holem, and the Slavic *o* all may be transformed into the Yiddish *oj;* the Middle German *e,* the Hebrew Tzere and Seghol, and the Slavic *e* all tend to become Yiddish diphthong *yj.* Thus German *ore* becomes Yiddish *ojẽr,* "ear"; Hebrew *mora* becomes Yiddish *moirẽ,* "fear"; Hebrew *sefer* becomes Yiddish *syjfẽr,* "book"; Slavonic *dzed* becomes Yiddish *zyjdẽ,* "grandfather." The fact that Yiddish shifts the accent in words derived from Hebrew and Aramaic from the last to the next to the last syllable can not be due to the influence of German since, apart from other considerations, German never had such an accent. It is probable that the shift had taken place in the pronunciation of Hebrew long before Yiddish arose as a language.

9. Dialects. Yiddish was formerly divided into two groups of dialects: eastern and western. A small remnant of the latter still exists in modern times in the dialect of Slovakia, western Hungary and Burgenland. In this such forms as *tsva, erajn* and *fin* are used instead of the corresponding East Yiddish *tsvyj, aran* and *fyn.* The dialects of East Yiddish fall into two main groups, a northern and a southern. The southern group is used by about three-fourths of those who speak Yiddish, and is to be found in Poland, Carpathorussia (Ruthenia), Roumania and the Ukraine; the northern group is spoken in Polish Lithuania, Lithuania, White Russia, Latvia, Estonia and northwestern Russia. The most noticeable difference is in the vowels. This is illustrated in the following table:

Middle High German, Semitic or Slavic Originals	West Poland, etc.	South	East Roumania, etc.	North Lithuania, etc.
name, "name"	*nůjmẽn*		*numẽn*	*nomẽn*
wâge, "balance"	*vuig*		*vug*	*vog*
tzofen, "north"	*tsujfn*		*tsufn*	*tsofn*
baba, "midwife"	*bujbẽ*		*bubẽ*	*bobẽ*
stat, "city"		*štujt*		*štot*
poter, "free"		*pujtẽr*		*potẽr*
hove, "court"		*hojf*		*hejf*
brôt, "bread"		*brojt*		*brejt*
olam, "people"		*ojlẽm*		*ejlẽm*
oug, "eye"		*ojg*		*ejg*
hûs, "house"	*hauz*		*hujz, hauz*	*hojz, hujz*
nebel, "cloud"		*nejpl*		*nepl*
mel, "meal"		*mejl*		*mel*
ḳaese, "cheese"		*ḳejz*		*ḳez*
gehoeren, "belong"		*ḳejrn*		*ḳern*
teva, "nature"		*tejvẽ*		*tevẽ*
weisse, "wheat"	*wajts*		*wyjts*	*wejts*
snê, "snow"	*šnaj*		*šnyj*	*šnej*
draeen, "draw"	*drajẽn*		*dryjẽn*	*drejẽn*
ḳetene, "chain"	*ḳajt*		*ḳyjt*	*ḳejt*
hoehe, "height"	*hajχ*		*hyjχ*	*hejχ*
sefer, "book"	*sajfẽr*		*syjfẽr*	*sejfẽr*
wiss, "know"		*vas*		*vajs*
vriunt, "friend"		*frant*		*frajnt*
sheelah, "question"		*šalẽ*		*šajlẽ*
sumer, "summer"		*zimẽr*		*zumẽr*
sukḳah, "booth"		*sikẽ*		*sukẽ*
reuven, "Reuben"		*rivn*		*ruvn*

Although as a medium of conversation in private life (home, street and business) every variety or shade of Yiddish dialect is used without fear or favor throughout the United States, two dialects have gained undisputed supremacy, each in a special field of public performance, due to historical circumstances.

In the theatre the southern (Ukrainian-Volhynian) dialect is uniformly cultivated, because the earliest playwrights (Goldfaden, Hurwitz, Latteiner, Gordin) and the first leading stars and actors (Mogulesco, Adler, Haimovich, Thomashefsky, Kessler, Feinman, Moskowitz) were either Ukrainian, Bessarabian, Roumanian or Galician.

On the speaker's platform at public gatherings the northern (Lithuanian) dialect is the norm to which all speakers conform perforce, because in the 1880's and 1890's the most prominent men who harangued the struggling workers (Abraham Cahan, Feigenbaum, Vintshevsky, Kranz, W. Kats, Isaac Hourwich, Hilkowitz and the poet Morris Rosenfeld) had been born in Lithuania.

10. Modern Use. Yiddish was the language of the family and of commerce, of popular tales and popular songs, of elementary and high schools, of haggling at the market and of the scholarly discussions of the greatest rabbinical authorities, of the play of children, and of the proceedings in the court of justice. All this was true of its oral use; but it was quite different in literary matters. Men always wrote letters in Hebrew, whenever they had a command of that language, and the literature of scholarship was almost entirely in rabbinic Hebrew. On the other hand, works of general religious instruction, edification and entertainment generally made use of Yiddish, and so its share in Ashkenazic literature is considerable. The older Yiddish literature formed, so to speak, the Haggadic half of Ashkenazic writings, the Halachic half being in Hebrew.

This description is no longer true of Western Europe, since it has lost its Yiddish. For the Jews of Eastern Europe, where the domain of Yiddish is almost unimpaired, about half of the Jews still maintain Yiddish in its former place. In the Soviet Union Yiddish is recognized as the language of the Jews. Among the other half of the Jews in Eastern Europe Yiddish is the vehicle of new ideas, national or cultural. Its work comprises Yiddish popular poetry and song, belles lettres, plays, the study of Yiddish philology, a European system of education conducted in it from kindergarten to academy, and the fight for the recognition and equality of Yiddish as the language of a Jewish minority. The place of Yiddish in American Jewish life is a more peculiar one, since it represents a transplantation to a new environment. Large numbers of Jews in the United States (1,750,000, according to the census of 1940) in the 1940's were bilingual, using Yiddish among themselves, reading the Yiddish press, but using English freely in their contacts with the outside world.

11. Writing and Orthography. Yiddish is uniformly written in Hebrew letters, for which it had the precedent of other Jewish languages, such as Judeo-Arabic, Judeo-Spanish and Judeo-Persian. The square character is used in printed matter, the cursive in written. The old Yiddish orthography was phonetic, no attempt being made to follow the spelling of Germanic or Slavonic words, but rather to reproduce the sounds of the words. In the case of Hebrew vowels, however, their pronunciation was the same as that in Hebrew in the various dialects spoken by Jews. Thus the Kametz might be read as *o, u* or *uj,* and the Holem as *ō* or *oj.* The same is true of the Hebrew diphthongs. The consonants are used for the most part without the distinguishing points, the softer forms of the four letters which change the sound in taking the Dagesh Lene (Beth, Kaf, Pe, Tav) being indicated by a stroke above the letter (Veth, Chaf, Fe, Sav). The Ashkenazic pronunciation of consonants is uniformly followed. The most usual system is as follows:

Aleph, silent, used only with vowels; Beth, *b* and *v;* Gimel, *g;* Daleth, *d;* He, *h;* Vav, used as in Hebrew with points to indicate vowels; Double Vav, *v* and *w;* Zayin, *z;* Heth, *χ*; Teth, *t;* Yod, English *y,* phonetic *j;* Kaf, *k* and *χ*; Lamed, *l;* Mem, *m;* Nun, *n;* Samech, *s;* Ayin, the vowel *e;* Pe, *p* and *f;* Tzade, *ts;* Kof, *ḳ;* Resh, *r;* Shin, English *sh,* phonetic *š;* Sin, *s;* Tav, *t* and *s.*

Hebrew words are usually written in their ordinary unvocalized form. In the Soviet Union, however, even Hebrew words are spelled phonetically; thus *'emeth,* "truth," is not spelled Aleph-Mem-Tav but Ayin-Mem-Ayin-Samech. A few attempts have been made to print Yiddish works in Roman characters, but this movement has met with little success. New sounds are represented by a combination of letters, such as Daleth-Zayin-Shin for the *j* in "judge."

SALOMO BIRNBAUM.

12. The Development of Yiddish in the United States. Conveniently, though not strictly, it may be said that American Yiddish began to develop with mass immigration after the Russian pogroms of 1881 to 1882. The newcomers were thrown into the rushing American life with its wealth of unfamiliar objects, surroundings, conditions and ideas for which they had no ready terms. Their adjustment to these novel scenes necessitated the adoption of new designations together with the objects of such designations; furthermore, the "path of least resistance" and the desire not to be dubbed "greenhorns" caused English words to elbow out deeply-rooted Yiddish terms in many instances. The new element in Yiddish was treated on an equal footing with the other traditional components (Middle High German, Hebrew and Slavic) in the course of this adaptation to the New World.

The following list will give an idea of the English terms that have been adopted into American Yiddish vernacular (the corresponding English term, when not immediately clear, is given in parentheses):

I. Phonetics. A. Consonants:

1). *r* vanishes as in street English: *Sentl Paḳ* (Central Park); *mač* (march); *padě* (party); *palě* (parlor); *fojnitsě* (furniture); *piktsě* (picture); *sosě* (saucer); *krekě* (cracker); but is retained in appellations of artisans: *ḳapetner* (carpenter), *pyjntner* (painter), as in the Yiddish *šrajber, bleχer,* and *šnajder,* and in such words as: *daler* (dollar); *voder* (water); *leder* (letter), *moder* (mother), and the like.

2). *w* becomes *v.*

3). *th* becomes a) *d: badern* (bother); *ḳlodingstor* (clothing store); *dadldu* (that'll do); *moderinlo* (mother-in-law); *dyjnkjě* (thank you!); or b) *t: sojt* (south); *tutpik* (toothpick).

4). Initial *s,* followed by a vowel, becomes *ts: tsinglman* (single man); *tsetlen* (settle); *tsomis* (summons; *aryjsnemen atsomes* means "to take out a summons"); initial *sh,* followed by a vowel, becomes *č: čeḳ hents* (shake hands).

5). Final and intervocalic consonants a) become unvoiced (changed from *v* to *f,* or from *z* to *s,* and the like): *syjfn* (save); *šyjfn* (shave); *Tajms* (Times); *bojes* (boys); *vaštěp* (wash-tub); *lonč* (lounge); *pekeč* (package); *Bruklin Brič* (Brooklyn Bridge); *orěnčes* (oranges); b) become voiced: *leder, voder* (*melon*); *bodnhol* (buttonhole); *ḳvoder* (quarter); *svidojl* (sweet oil); *ajzḳrim* (ice cream); *afḳoz* (of course); c) or become lost: *lendler* (landlord); *Kuni Ajlěn* (Coney Island); *nevermajn* (never mind); *sponč ḳě* (spongecake); *byjsman* (basement).

6). *t* becomes *r* as in vulgar English: *šarap* (shut up!); *gěrarě* (get out!); *gěradže* (get out, you!); *vacimerě* (what's the matter?), the latter form being influenced by the Yiddish *voz iz der mer?*

B. Vowels. SIMPLE VOWELS:

1) *a* and *e* become *e* (Hebrew Seghol): *het* (hat); *beḳ* (back); *sleḳ* (slack); *skeb* (scab); *bedrum* (bedroom); *albeču* (I'll bet you); *rent.*

2) *ang* and *aṅḳ* become *yjng* and *yjnḳ: byjnks* (bangs); *dyjnkju; blyjnḳět* (blanket); *gyjngster* (gangster).

3) *e* and *i* become *i: mitung* (meeting); *gudivnung* (good evening!); *pin; bil.*

4) *o* becomes either *a: stapn* (stop); *badern* (bother); *tapfl(j)or* (top floor); *šap* (shop); or *o: Bronks* (Bronx); *orěnčes.*

5) *u* becomes either *o: kopě kave* (cup of coffee); *ḳof* (cuff); *trobl* (trouble); or *a: saper* (supper); *ḳater* (cutter); *hariap* (hurry up!); *šarap; aptan* (up town).

DIPHTHONGS:

1) *ā, ai, ay, ea* and *ei* become *yj* (Hebrew Tzere): *byjbě* (baby); *byjsman; pyjdě* (payday); *styjḳ* (steak); *fryjt* (freight). Exceptions are such words as *gud(d)ej!* (good day!); *sej!* (say!); *sejl* (sale; in advertisements); *mejer* (mayor).

2) *oi* and *oy* are always *oj,* never *uj: bojes; bojčiklaχ; džojnt* (joint); *endžojen siχ* (enjoy); *lojer* (lawyer), in contrast to the form *lujern.*

3) *o, oa* and *oe* become either a) *uj: pujḳer* (poker); *sujde(r) vaser* (soda water); *spujz* (suppose); *klujzpindl* (clothespin); *lujfer* (loafer); b) *u: Kuni Ajlěn; Hubokn* (Hoboken); *smukn* (to smoke); *vutn* (to vote); *ḳakeruč* (cockroach); c) *o: džoḳ* (joke); *bodnhol; hol lat* (whole lot); *halo* (hello); *pos(t)l ḳard* (*t;* postal card); *holdap* (hold-up); or d) *l: dipl* (depot); *dzombl nots* (Jumbo nuts); *Manĕrol Strit* (Monroe Street).

4) *ou* and *ow* become either a) *a: danstes* (downstairs); *dantan* (downtown); *aptan; sidan* (sit down!); *ḳanter* (counter); b) *uj: pujder* (powder); *krujd* (crowd); *hujskiper* (housekeeper); *ujtsajd* (outside); or c) *l: enĕhol* (anyhow). However, the English "flower" retains its pronunciation, and "lounge" becomes *lonč.*

As in all Yiddish words, vowels following an accented syllable are reduced to the indeterminate *ĕ,* written as Ayin, Yod or not at all:

a: pĕneně (banana); *ombrelĕ* (*r;* umbrella); *selĕr* (cellar); *pos(t)l-ḳard(t).*

i and *y: byjbĕ; lyjdĕ* (lady); *ḳendĕ* (candy); *fekterĕ* (factory; *londrĕ* (laundry); *(de)tektĕv* (detective); *byjsn* (basin).

o and *ow: vindĕ* (window); *patyjtĕ* (potato); *tamyjtĕ* (tomato); *yjprĕn* (apron); *leměn* (lemon); *myjsn* (mason); *ḳandoktĕr* (conductor).

u: herḳet (haircut); *vaštěp* instead of *vaštop* (wash-tub).

Various: *pikčĕ; fojničĕ; sponč ḳĕ; henḳčĕ* (handkerchief); *fljuněrĕ* (funeral); *pritiklĕ* (particular, particularly).

II. Lexical Borrowings: 1) Home, Kitchen and Utensils: *selĕr; byjsman; stup* (stoop); *flet* (flat); *palĕ; kičn* (kitchen); *bedrum* and *betrum* (bathroom); *rumḳe; apstes* (upstairs); *danstes; stezĕs* (stairs); *fl(j)or; siling; ruf; front; beḳ; vindĕ; ḳojtn* (curtain); *pyjnt; volpyjpĕr; ḳapĕt; rog; ojlḳlot* (oil-cloth); *čer* (chair); *kičntyjbl; benč; dreser; bjurĕ* (bureau); *fojničĕ; pikčĕ; fryjm; brum; broš* (brush); *šupalčš* (shoe polish); *mečĕs; ḳendl; ketl; (ti)pat; šovl; bord(er); kopĕ; sosĕ(r); frajpen* (frying-pan); *vaštěp; sink; dišĕs; silvĕrver; pičĕr; gez; ĕlektrije; bel.*

2) Food and Meals: *brekfĕs(t);* *lonč; diner; sapĕr; padĕ* (party); *rols; čokstyjḳ* (chuck steak); *hambojgers; fryjnkfu(r)ters; kyjḳ; sponč ḳĕ; paj; kukis; krekĕs; ḳendĕ; ajzḳrim; sujdĕ-voder, -vaser; rifrešmans* (refreshments); *čiz* (cheese); *pa(t)čiz; krim* (cream); *krimčiz, -ḳez; bodermilk; patyjtĕ; tamyjtĕ; ledĕs* (lettuce); *svidojl; keběč; yjgs; (voder)mel(o)n; korn; gryjps; or(ĕ)nčĕs; lem(ĕ)n; strobĕrĕs* (strawberries); *ryjzbĕrĕs* (raspberries); *kremběrĕs; čerĕs* (cherries); *redišĕs; pajnepl; dželĕ* (jelly); *pĕneně; viniger; viskĕ.*

3) Street and Market: *Junajtet Styjc* (United States); *strit; sajdvoḳ* (sidewalk); *ḳoner* (corner); *lujfers af di ḳoners; brič* (bridge); *dak; ferĕ; sobvyj* (subway); *tryjn; styjšn; dipl; ḳar(fer); ikspres; drajver; ḳandokter; motormen; ikspres-vagĕn; byjbĕ-ḳereč; puškĕ(r;* pushcart); *stimer* (steamer); *makĕt* (market).

4) Shop, Factory and Industry: *svet-šap* (sweatshop); *fektĕrĕ; benč; pališn* (to polish); *hant; bos; for-man, -lyjdĕ; manifekčĕrer* (*ha kloḳs, ujber-kujts, suts, dres(ḳ)es, vyjstlaχ, nipens*); *bizĕ; sleḳ; stapn; overtajm; hem-stičn; simen* (seam); *byjstĕven* (baste); *rofls; baksplits* (box pleats); *slifs* (sleeves); *paḳĕts* (pockets); *ḳaler; ḳof; belt; lajning* (or *-ung*); *vajt guds; lyjs; nidl* (*tryjd*); *ḳatn; spul;*

pin; bodnhol; vul; silk; linčn; bokrěm (buckram); *kalikě; for, for kujt* (fur coat); *skeb; strajk-bryjker; pikět(n); tsetlen a strajk (a šap); djus; voking-delčgět; miting* (or *-ung*); *pajnt of (v)oder* (point of order); *amendčment; kenvčsn* (to canvass); *kanvenšn* (convention); *member; teks(n); džab (-l, -ke;* job); *plyjz* (place).

5) Business: *(monki-)biznes; bizněven; drogister* (drug-store); *stor(-ke); kanter; makět; grosěrě; byjkěrě; kofisalun* (coffee saloon); *birsalun; londrě; baberšap* (barbershop; *ibervarten tsvyj "nekstn"*); *bagčn* (bargain); *syjl; fyjln in-, tsetlen a biznes; afis; pajnšap* (pawnshop; "to pawn" is *farpajntn*); *byjnk; not* (note); *keš(n), endosn a ček(l); hetček* ("a check dated ahead"); *(fojst, seknd) mogeč* (mortgage); *pyjnt; vaneš* (varnish); *berl* (barrel); *boks (baks); pekčč; bek* (bag); *dozn; daler; kvoder; dajm; nikl; penč; sent; a drajdalerdiker bill* ("the sum of three dollars"); *kostčmer-pedler; pedlen.*

6) Professions and Occupations: *dakter; lojer; dentčst; endžinir* (engineer); *tičer (-n, -ke;* teacher); *nojs* (nurse); *midvajf; dzoč* (judge); *politsman; lederkerier* (letter-carrier); *(sajn-)pyjntner; kapetner; dresmyjker(n); kater; find(č)šer; groser; baber; byjker; miliner; (e)lektrišn; ikspresman; stendkiper(-n, -ke;* stand-keeper); *bukiper(n); hujzkiper(n); njus-diler; vyjder; famer* (farmer).

7) Dress, Adornment and Personal Appearance: *stajl; dre(ke); skojt(l); vyjst(l); yjberkujt; het(-pin); sveder; šus; šu-šajn, -lyjses; per av glovs (-mitns); slipers; saks; staking; nipens; najtgan* (or *-gon*); *reper* (wrapper); *klo(u)k; yjprčn; nektaj; saspenders; belt; ribn; šol; henkěčč; paketbuk; ambrele(r);* vač(e)nčyjn (means "watch" only, and not "chain"); *bryjslčt; herkčt; šyjf(-n); byjnks* (bangs); *kojls* (curls); *viskčs* (whiskers); *mosteš; blyjnkčt; dajper* (diaper); *syjfčti-* (safety), *klujz-pin.*

8) Family Life and Relations: *byjbě; kozn; onkl; ent; grempa; grema; neksdorike* ("next door neighbor"); *boj; gojl; feler; lyjdč; džentlman; mis; mister; misčs; engejdžd* (engaged); *veding-hol; kanfirmejšn; fljunčrě; semčtčrě.*

9) Amusements: *tiejter* (theatre); *šō; muvis; muving-pikče; benefit; tikčt; ošer* (usher); *sit* (seat); *ajl* (aisle); *senter; styjdž; o(r)kčstre; belkonč; gelčrě; baks-ofis; kešir; menčdžer; pjanč; čelč; vajolin; bolgyjm* (ball game); *futbol; gembler; lekčer; ikskojšn* (excursion); *kontrě; lyjk; nemen a vok; dens(hol); smukn; sigar; sigaret; pajp; endžojn zix; hobn a gut tajm; ekter(-ke); starine* ("woman star").

10) Intellectual and Cultural Life: *lajbčrě* (library); *najt-, ivningskul; hajskul; kalčč* (college); *printsipl; pensl; ruler; pyjper; leder* (letter); *stemp; pos(t)l-kard(t); saskripšn* (subscription); *paskripšn* (prescription); *pričn* (preach); *ladž; kangrčgyjšn.*

11) Political and Social Life: *palitišn(er;* politician); *sitčšner, sitiz(e)n* (citizen); *erste pyjpers; afčdyjvit* (affidavit); *vutn; belčt; olderman; asemblčman; mejer; gove(r)ner; džoč; penitenščrě; prizn(t); Suprim Kort; kort(rum); sitihol* (city hall); *(a)lekšn; (a)lektn; namčnirn* ("nominate"); *apojntn; mčdžarčtč* (majority); *ma(r)čn; di čer hot gerult* ("the chair has ruled"); *tyjblen di mōšn; greft; prahibišn; spikizč.*

12) Miscellaneous: *bikoz; afkoz* (of course); *jes; no; vel; sej; nevermajn(d); halo; gutmo(r)ning; gudej; gudivnč (ung); gudnajt; gudbaj; hadidu* (How do you do?); *dadldu; olčrajt* or *arajt* (all right); *šur; spojz; pliz; dyjnks; dyjnkju; bitvin zer un zer evčnju; ko(r)ner Medisn Evčnju.*

III. Other Features. A. Idioms and Double Translations: *letstn jor, letste vox,* instead of *farajorn, faraxtogn; jix lyjg arajn majn* (equals *di) hent in majn kešenje, nem arujs majn henkěčč und viš op majn ponim; er est zajn sapčr; farnemt ajere* (equals *di) plecer; jix bin* (equals *mir iz) kalt, hyjs, umčtik, špet (hob ix farspetikt?); albeče jix max a vet; a krimčiz kezl* (compare the Yiddish combination of Germanic and Hebrew elements in *an yjnyjntsiker ben-joxid).*

B. Morphology. Nouns have no longer a neuter gender in American Yiddish. English words are given Yiddish suffixes, as in the words: *olrajtnik (-nitse); rielestyjtnik; bojčiklax; klujzpindlax; tyjbele* (equals *tišele); rumkes; dreskes; vyjstlax; a klyjn gademetl; haloele* (hello!); *gerarčle* (get out!). English verbs are given infinitives that follow Yiddish forms, such as 1). *-n: skrobn; kečn; mufn; pyjntn; smukn; vutn; stapn; pesn;* 2). *-en: frajen; endžojen; ringen; spyjnken; stimen; klinen; pedlen; reflen* (raffle); *troblen,* as in genuine Yiddish verbs; or 3). *-even: bizneven; spičeven* (speech); *boseven.* They are conjugated in the perfect tense with Yiddish forms, either with *ge-,* as in: *geklint; gerungen; tsugedžompt* (jump), or without, as: *farbodnt* (button); *tsedžompt zix; er hot zix bahyjbt (-vt;* behaved).

C. Syntax. There is a preference for passive constructions, such as: *a mitung vet opgehalten vern unter der forzitsung fun . . . ; di bixer zajnen ufgegesn gevorn fun* (equals *hobn ufgegesn) majz; a gefyjlter biznes; gčtsetlte šeper.* Other typical forms are: *er šajnt tse zajn* (equals *kentik iz er) zyjerer a frajnt; zogst bist krank, du kukst es nit ujs* ("you don't look it").

D. Semantic Developments: *prapčtč* (property) means only "real estate"; *vačnčyjn* (watch and chain) means only "watch"; *a drajdalerdiker bill* refers to the sum or to coin; *er iz nox a boj* means "he is single"; *pyjde* (payday) means "wages."

E. Intonation. In the following typical sentences the emphasis in intonation is indicated by spacing the letters:

Jix hob es k y j nmol nit gčz o o g t! ("I never said so").

Hot ir šyjn am o o l e p es azyjns gčzen? ("Have you ever seen anything like it?").

YIDDISH LITERATURE, *see* LITERATURE, YIDDISH.

YIDDISH SCIENTIFIC INSTITUTE (YIVO, the abbreviation of the Yiddish name), founded in 1925 by a group of Jewish scholars, including Nochum Shtif, Jacob Lestschinsky, Elias Tcherikower, Zalman Reisen and Max Weinreich, who felt the need for an institution for research in Yiddish. The center was established in Vilna, Poland. Four research sections were formed: the section of history, with Elias Tcherikower as permanent research secretary; the section of economics and statistics, with Jacob Lestschinsky as research secretary; the section of literature and linguistics, with Max Weinreich as research secretary; and the section of psychology and education (formed in 1929), with Leibush Lehrer as research secretary.

At the convention of 1935 the following were elected to the Central Executive Board: Abraham Golomb, Isaac Giterman, Shlomo Gilinsky, Hertz Gilishensky; Jacob Hellman, Leib Wulman, Max Weinreich, Boruch Vladek, Elias Tcherikower, Joseph Jashunsky, Israel Yefroikin, Boruch

Kahan-Virgili, Jacob Lestschinsky, Yudel Mark, Nachmen Maisil, Noah Prilutsky, Nathan Feinerman, Chaim Shlomo Kasdan; Zelik Kalmanovitch, Boris Kletzkin, Zalman Reisen, Emanuel Ringelblum, Jacob Shatzky, Isaac N. Steinberg, Isaac Shipper.

For many years the Yivo was able to engage in its work largely because of voluntary help. As the income gradually increased from private contributions and local government subventions the staff grew, and in 1935 the Yivo moved into its own building. The center remained in Vilna, while numerous branches were organized in many countries. The American branch (Society of Friends of the Yiddish Scientific Institute) was founded as early as 1925 primarily for the purpose of contributing financially to the mother organization, but it slowly began its own research activity and the collection of its own library.

At the outbreak of the second World War in 1939 the American branch was able to take over the functions of the center. Some of the staff members from Vilna and Paris arrived in the United States. Thus the Yivo was able to continue its activities thanks to the fact that it was never completely centralized but engaged in work from many points. In December, 1942, the Yivo moved from rented quarters into its own building in New York city at 535 West 123rd Street.

The three main aims of the Institute are: (1) documentation; (2) research; (3) training.

(1) **Documentation.** At its very inception the Yivo began its collection of books and archive materials. By 1939 the library had over 40,000 volumes, and the archives over 10,000 leaflets, pamphlets, placards, and the like, and over 10,000 volumes of periodicals. The Folklore Committee had over 100,000 units in its collection. The department for youth research had over 300 autobiographies of Jewish adolescents. In addition, the historical archives were housed first in Berlin, later in Paris and finally in the United States. A bibliographica office was set up which kept a catalogue of all items of Jewish interest published in the press of all the world in all languages. This rich library remained intact until late in 1941, when it was believed transferred to Germany. The library of the Yivo in the United States had by 1943 over 26,000 catalogued items, excluding periodicals, pamphlets, and the like. In addition to the historical archives mentioned above, the Yivo obtained many other valuable materials. Of especial interest are the rich collection of life histories (about 300) of immigrants and several thousand private letters written from Europe to America, the earliest dating from 1848.

(2) **Research.** Besides the bimonthly *Yivo Bleter,* which published studies in all fields of research, each research section of the Yivo publishes monographs and collections of studies. The Section of Literature and Linguistics published five volumes of studies, including one on theatre and drama and one on folklore (*Filologishe Shriftn*); the Section of History, three large volumes (*Historishe Shriftn*), the last of which is a collective history of the origins of the Jewish labor movement; also a two-volume collective study on the Jews in France. This section has undertaken the publication of a six-volume study, *History of the Jewish Labor Movement in the United States,* the first volume of which appeared at the beginning of 1943. The Section of Economics and Statistics published two volumes of studies, and the Section of Psychology and Education one volume.

Yiddishe Ekonomik, a bimonthly dealing with the problems of Jewish economics and statistics, was published in Vilna from 1937 to 1939; *Yiddish far Ale,* a bimonthly dealing with Yiddish linguistics, was published from 1938 to 1939. From 1941 on *Yiddishe Shprach,* devoted to the problems of standard Yiddish, was published in New York.

The *Yedies* of the Yiddish Scientific Institute, eighty numbers of which appeared from 1929 to 1939, presented news in the organization and development of the Yivo.

By the close of 1942 the Yivo had published over 37,000 pages of research. A bibliography of all the Yivo publications appeared in 1943, and contains over 2,500 numbers.

(3) **Training.** In 1935 the Yivo started the Research Training Division (Aspirantur), named for Dr. Zemach Szabad, one of the leading figures in the community of Vilna, to train young men and women for independent research in the Jewish social studies. In 1937 a junior department (Proaspirantur) was attached to this division, and named after Boruch Kahan-Virgili. Over one hundred young persons received training in these groups. In 1940 both the Aspirantur and the Proaspirantur were reorganized in New York, built along the same essential principles as formerly, but adapted to the American setting. In the academic year 1942 to 1943 the Aspirantur embarked on a broader program with a view to becoming the Yivo Graduate School for Jewish Social Studies.

The Yivo is a unique institution in Jewish life that seeks to bring to the Jews the sum total of their cultural heritage in the framework of academic research based on the principles of modern social science. Only by a painstaking search for, and study of, facts can truth be ascertained, and only by applying the findings of such study to the realities of Jewish life in its manifold forms can the multiple problems of the Jews be solved.

YIGDAL ("Magnified Be [the living God]"), opening word of a poem which is at the beginning or at the end of the Morning Service (Shaharith) in the Orthodox prayer-books. It is metrically constructed, has a single rhyme throughout, and is a poetic rendering of the thirteen articles of Maimonides' creed, the Sheloshah Asar Ikkarim. It arose in Italy about the beginning of the 14th cent.; its composer was probably Daniel ben Judah Hadayan at Rome. The Hasidim, like the opponents of Maimonides in former centuries, do not recite the Yigdal. In some localities it is said also during the Afternoon Service. In Reform prayer-books the last line is usually modified so as to substitute the idea of immortality for that of resurrection.

YISHUB (Jewish settlement in Palestine), *see* COLONIES, AGRICULTURAL; PALESTINE.

YITZHAK, *see* ISAAC.

YIZKOR, a prayer for the repose of the soul of an individual, recited in the synagogue by a son, daughter or other close relative; it receives its name from its first word. The phraseology of the prayer varies according to the sex and relationship of the individual mentioned. For a father it runs as follows:

May God remember the soul of my revered father, N. son of N., who has gone to his eternal home; may his soul be bound up in the bundle of life with the souls of Abraham, Isaac and Jacob, Sarah, Rebekah, Rachel and Leah, and with all the other righteous men and women in Paradise. Amen.

It is usually customary to add a promise to give a certain amount of money to charity.

The custom of saying a prayer for the repose of the dead, accompanied by an offering, is very ancient in Judaism, and probably antedates the use of the Kaddish as a mourners' prayer. A sacrifice for the dead in the form of charity is mentioned in Talmudic times (*Sifre Deut.* 210; *Hor.* 6a), and *Pesikta* 174b (6th cent.) mentions a special prayer for the memory of the dead that was recited on Yom Kippur. Just when the Yizkor

formula arose is uncertain, but forms of it are given in the *Mahzor Vitry* (12th cent.) and the *Rokeah* of Eleazar ben Judah of Worms (1160-1238). It is unknown in Italy and the Orient.

The Yizkor is usually said by relatives on four occasions in the year: Yom Kippur, the eighth day of Passover, the second day of Shabuoth, and Shemini Atzereth, and the money offered in connection with it is usually given to the synagogue. Reform Jewish congregations hold public memorial services, but have no individual Yizkor prayers by the worshippers; the names of the departed are often mentioned in the Kaddish prayer of services just after or on the anniversary (Yahrzeit) of their death, by the rabbi.

YOD, *see* ALPHABET.

YOKEL, ALEX, theatrical producer, b. Chicago, 1887. He started as a newspaper reporter at an early age, rose to city editor, and was brought to New York city as confidential political investigator by William Randolph Hearst. In 1911 he was sent to Berlin to take charge of Central European news correspondence. He was the first to flash the news of the coming outbreak of the first World War, and the only American correspondent to be present at the siege of Liége. In the same year he returned to the United States to become press agent for Cohan and Harris. He interrupted this during the War by serving in the United States military service.

In 1926 Yokel decided to launch out as a theatrical producer, his first venture being *The Sap.* This was followed by others, including some outstanding successes: *The Song Writer* (1927); *Three Men on a Horse* (1935); *Bury the Dead* (1936); *Love from a Stranger* and *Young Mr. Disraeli* (1937); *Horse Fever* (1940). Early in 1943 he was preparing to produce *The Snark was a Boojum.*

YOM KIPPUR (originally *yom hakippurim,* "Day of Atonement"), the holiest day of the Jewish religious year, on the 10th of Tishri (middle of September to the beginning of October). It is the earnest and consecrating close of the ten Penitential Days, which begin with the judgment of God on Rosh Hashanah. The Day of Atonement, like the time for repentance in general, is especially devoted to the renewal of religious and moral life. Its purpose is to effect the forgiveness of sins and reconciliation with God as the result of sincere repentance and the purification of mankind.

In the Torah, Yom Kippur is first of all the great yearly day of atonement, on which certain rites of atonement are performed by the high priest in order to make expiation for the people and the sanctuary (the Tabernacle and the Temple; *Lev.* 16). In the Babylonian Exile, after the destruction of the Temple (after 586 B.C.E.), the Jewish people was keenly aware of its own sinfulness; but the knowledge that it could not purify itself by its own powers made it feel an intense desire for an atonement brought about by God. This led to a rapid and intense development of the guilt and sin offerings, as well as to a great annual expiation of the people and the sanctuary on the Day of Atonement.

The need for atonement and the rite of expiation, which was performed with such holy exaltation and the highest devotion, arose out of the sincere turning of their hearts to God, clearly expressed in the commandment that they should afflict their souls before the Lord (*Lev.* 16:29, 31; 23:27, 29; *Num.* 29:7). Fasting was part of this affliction of soul. This latter feature, the confession of sins (Viddui), and the prayer for divine favor together with the inner readiness for repentance, became more and more prominent. When the Temple was destroyed a second time (70 C.E.), the loss of the sacrificial ritual of expiation, which had been largely invested with a mystic consecration, affected the people painfully; but Johanan ben Zakkai comforted them by quoting the word of the prophet, "For I desire mercy, and not sacrifice" (*Hosea* 6:6). From this time on the prophetic ideal of the day was observed.

When the New Year's day became the day of God's judgment, no doubt under Babylonian influence, the atoning character of Yom Kippur became still stronger. It became the consecrating close of the ten Penitential Days, the day when the divine judgment was finally sealed. However, this atoning nature of the day made it by no means a mournful occasion; on the contrary, it became most emphatically the season of grace, when God was near and the soul was joyful. It was this thought that led to the wearing of the Sargenes, or white garment, which was originally intended for a festal purpose; it was only in later times that it was interpreted as the shroud (Tachrichin) which is donned in order to strengthen the disposition to repentance. (These otherwise unornamented robes were held together by a girdle, the clasp of which was often an artistic piece of work.) At the same time, the readiness for repentance and the earnestness of the moral demand were unmistakably expressed in the repeatedly uttered confession of sins. The prophetical portion (Haftarah) read in the morning (*Isa.* 57:14 to 58:14) expressly opposes a purely external expression of repentance; that read in the afternoon (*Jonah* 1 to 4) opposes an illiberal conception of God's relation to mankind. The former characterizes self-sacrificing love of others as true fasting; the latter includes even the heathen in the divine grace and forgiveness.

The Talmud contains a warning against a false conception of the atoning power of the day: "If one says, 'I will sin, and the Day of Atonement will bring me forgiveness,' the Day of Atonement will bring him no forgiveness. For sins of man against God, the Day of Atonement atones; but for sins against one's neighbor, it does so only after one has first become reconciled to him" (*Yoma* 8:9). In agreement with the second part of this saying, it was the custom that not only members of a family should ask one another for forgiveness on the Day of Atonement for real or imaginary failings, but also that they should become reconciled with their enemies. Thus Yom Kippur becomes a very potent agency for religious and moral regeneration, and even those who in other ways are unaffected by religious life can not utterly escape its influence.

As a preparation for the Day of Atonement it is customary, as on fast days, to visit the cemetery, and also, in accordance with *Prov.* 12:2, to perform special acts of benevolence to the poor. The custom of "Kappores umschlagen" (whirling a chicken around the head as a sort of atonement sacrifice) was already known in Gaonic times, and was opposed by many savants. The confession of sins is said at the preceding Minhah (afternoon) service, which is recited early. The bath on the day before (Ereb Yomtob) has a symbolic significance. The idea is that the Jew should appear before God on the holiest day of the year pure both in body and soul. The lights which many kindle in the synagogue during the entire day are said to be in remembrance of the dead; but it is probable that they were originally intended to give light to those pious individuals who remained in the synagogue all night.

The evening prayers, which are invested with an

especial sanctity, are called "Kol Nidre," after the opening prayer. From very early times the service of prayer during the day lasted uninterruptedly from morning to evening. Penitential prayers (Selihoth) are inserted in every division of the service; in these the verses *Ex.* 34:6-7, which speak of the pardoning love of God, are often inserted. A large portion of the Musaf (additional) service is given over to the Abodah, the description of the rites of expiation on Yom Kippur in the Temple at Jerusalem. The last section of the service is known as the Neilah (closing prayer); it ends with the confession of faith, spoken joyfully and with the greatest exaltation: *Shema Yisra'el, Baruch shem ḳebod malechutho le'olam va'ed* ("Praised be the name of His glorious kingdom forever and ever"), and *'Adonai hu ha'elohim* ("The Eternal is the true God"). The sound of the Shofar announces the end of Yom Kippur.

YOM KIPPUR KATAN ("lesser Day of Atonement"). From the 16th cent. on, the day before each new moon (Rosh Hodesh) has often been considered as a "lesser Day of Atonement." The designation of the new moon as the "time for atonement" was a result of the feeling of repentance which had increased because of the expulsion of the Jews from Spain (1492) and the growing influence of the Cabala. This led to giving the day before the new moon the same atoning character that was accorded the beginning of the year. For this reason many fasted on that day. During the afternoon prayer (Minhah), the portions from the Torah and the prophets which were assigned to the fast days (*Ex.* 32:11-14 and 34:1-10; *Isa.* 55:6 to 56:8) were read. The prayers also included the penitential prayers and the confession of sins (Viddui) taken from the liturgy of Yom Kippur, and certain Psalms; the prayer *'anenu* ("Answer us") is inserted in the Eighteen Benedictions (Shemoneh Esreh).

YOM TOB, *see* HOLIDAYS.

YOM TOB (tractate), *see* BETZAH.

YOM TOB SHENI, *see* HOLIDAYS, SECOND DAY OF.

YOMA ("the day," a short form of *Yoma Rabba,* "the great day," the Day of Atonement), the fifth tractate of the second division (Moed) of the Mishnah. It is called Kippurim, and Yom Hakippurim in the Tosefta. The Mishnah has eight chapters and the Tosefta five.

The contents of the Mishnah are: Chap. 1. Preparing the high priest for the service on the Day of Atonement. Chap. 2. How lots were cast four times a day to assign the services performed by the priests; how the sacrificial victims were put upon the altar. Chap. 3. Further preparations of the high priest from dawn to the first confession of sins; casting of lots over the two sin-offerings provided by the community; the golden lots of Joshua ben Gamla. This is followed by an appendix which mentions certain individuals for praise for their improvements in the sanctuary, such as Ben Kattin, King Monobaz and Queen Helena, and certain persons for blame for refusing to instruct others in the preparation of the showbread and of compounding the incense. Chap. 4. Casting lots upon the two goats; binding of the red ribbon; the second confession of sins by the high priest. Peculiarities of the Day of Atonement with regard to offering incense, ascending the altar, and the washing of hands and feet. Chap. 5. The three times that the high priest enters the Holy of Holies; purification of the altar of gold. Chap. 6. The qualifications for the goats. Third confession of sins; sending away the scapegoat to the wilderness Azazel; how his arrival there was known in the sanctuary. Chap. 7. Scriptural portions read by the high priest and the benedictions pronounced by him. The rest of his service; his eight garments. Chap. 8. Prohibitions concerning eating, drinking, working on the Day of Atonement; the fasting of children; procedure in the case of danger to life. The means of atonement: sin-offering, guilt-offering, death, the Day of Atonement and repentance. In what cases no atonement is effected. Sins against God are expiated by the Day of Atonement, while sins against men are wiped out only when the sinner has appeased his fellow man.

The Tosefta contains additions and amplifications of the Mishnah, especially Haggadic and historical material. A portion of the priesthood censured in the Mishnah is defended in the Tosefta, which gives as reason for their actions their fear that those whom they taught might use their knowledge in the service of idolatry. Of interest is also Jose's statement that he had seen in Rome the curtain from the sanctuary and that stains of the blood of the sacrifices were still visible upon it. Both the Babylonian and Jerusalem Talmuds are also replete with Haggadic explanations and stories of the lives of such famous sages as Hillel and Meir.

YOMTOB BEN ABRAHAM ISHBILI (of Seville), Spanish Talmud commentator, b. before 1270; d. between 1328 and 1350. He is generally known as RITBA, from the initials of his name. Yomtob seems to have been descended from a scholarly family, for he mentions his grandfather's comments on the Talmud (commentary on *Erub.* 13b). His chief teachers were Aaron ben Joseph Halevi and Solomon ibn Adret. There is a note at the end of his commentary on *Abodah Zarah* which states that the work was completed at Alcolea de Anca in 1342. According to some scholars, these words were written by Yomtob himself; others think they were added by the scribe. Yomtob's occupation and place of residence are both unknown, but he seems to have been rabbi and head of a Talmudic academy in a small city.

His chief work is a commentary on the Talmud which is distinguished by extreme clarity, an almost entire absence of casuistry, and a keen analytic discussion and definition of fundamental legal concepts. In addition, he usually prefaces his own comments with a digest of the opinions of previous commentators; hence his commentaries have become very popular among Talmud students.

They are extant to the following tractates: *Erubin, Moed Katan, Rosh Hashanah, Yoma, Sukḳah, Megillah, Yebamoth, Kethuboth, Kiddushin, Gittin, Baba Metzia, Abodah Zarah, Makḳoth, Shebuoth, Hullin* and *Niddah.* Only the first chapter of the commentary to *Baba Metzia* is by Yomtob himself; the rest is by his pupils. The commentary on *Sabbath* ascribed to him is really by Rabbenu Nissim, and that on *Pesahim,* with a similar ascription, is also not his. On the other hand, Yomtob is the author of the commentary on *Sukḳah* that is ascribed to Solomon ibn Adret. It appears from his own writings that Yomtob also composed commentaries on *Berachoth, Betzah, Nazir, Arachin, Hagigah, Sabbath, Baba Kamma* and *Baba Bathra;* the last three of these are extant in manuscript. The commentary

on part of *Sanhedrin* ascribed to him and published in *Leshon Hachamim* (1781) is really by David Bonafed.

Yomtob wrote his commentaries in two recensions: an early one at great length, and a later one in abridged form. He wrote the latter for the benefit of his pupils, as the Jews of Spain were at that time undergoing severe persecutions which made intensive study difficult. The same reason may account for the extremely corrupt state of the text of these commentaries. The first attempt to emend the text was by Zevi Hirsch Bleiweiss in the 19th cent., in his notes *Kur Lezahab* and *Tzar Zahab;* in the 20th cent. Chaim Bloch edited a few of the commentaries with copious notes. Most of these commentaries have gone through six editions, the latest and most complete edition being that of Munkacz (1908). The little personal information that can be gathered from Yomtob's writings indicates that he was of a peace-loving, scholarly and modest disposition.

His other published works are: *Sefer Zikkaron* (published by S. Halberstam, 1868), a defense of Maimonides against the attacks of Nahmanides in the latter's commentary on the Bible; *Hilchoth Berachoth* (published by C. Mussafia in his *Hayim Vehesed,* 1864), on benedictions; a supercommentary to the commentary of Nahmanides on *Nedarim* (printed in most editions of the Talmud); a commentary to Alfasi's compendium on *Taanith* (published with the rest of his commentaries); a commentary on the Passover Haggadah (printed in a number of editions of the latter); notes on *En Yaakob,* gathered by the latter's author, Jacob ibn Habib, from Yomtob's various commentaries. His Haggadic explanations on the one hand reveal the rationalism which he inherited from his teachers, as when he explains unusual sayings by the rabbis as dreams or visions (*En Yaakob, Hakotheb, B.B.* 74b); on the other, he was not entirely unaware of the Cabalistic movement which was so strong in Spain (commentary on *Sukkah* 28a).

He also mentions such of his writings as responsa, homilies, a Halachic pamphlet against the views of Dan Ashkenazi and commentaries on the *Sefer Yetzirah* and the code of Alfasi; some of these are extant in manuscript. Samuel de Uzeda, in the introduction to his *Midrash Shemuel,* mentions that he quotes from Yomtob's commentary on *Aboth* which, he says, is ascribed by some to his pupils. *Hukkath Hayim,* a book ascribed to Yomtob, was actually written by Abraham ibn Tasarat. Nineteen of Yomtob's responsa were published by Wolf Biedonowitz in his *Hut Hameshullash* (1939). HIRSCHEL REVEL.

YOMTOB BEN ISAAC OF JOIGNY, called "the martyr," French Tosafist and liturgical poet of the 12th cent. He became the chief rabbi of York, England. During the siege of that city by the Crusaders he exhorted his coreligionists who had taken refuge in the tower to lay hands on themselves rather than to foreswear the faith of their fathers. On the eve of the Sabbath before Passover, 1190, the besieged died the death of martyrs. One of Yomtob's hymns, "Omnam Ken," is still chanted on the eve of the Day of Atonement. It begins:

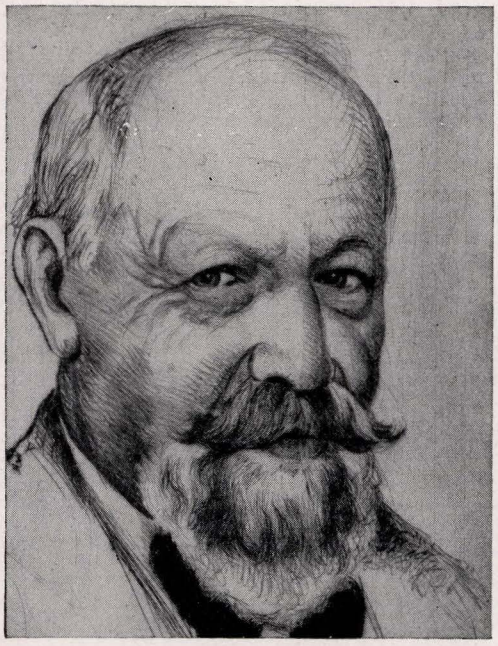
Ay 'tis thus evil us hath in bond;
By Thy grace guilt efface and respond:
Forgiven!

He was a pupil of the famous French Tosafist Jacob ben Meir Tam, and author of a commentary on the Pentateuch.

YONKERS, a city of Westchester county in New York state, adjoining New York city on the north, and including in 1943 an estimated 7,000 Jewish inhabitants in its general population of 142,404 (census of 1940). Yonkers was chartered as a city in 1872. Even before then the locality had attracted an overflow of immigrant Jews who chose not to remain in the congested areas of New York city itself.

An item in the local paper of the year 1870 reports: "The Hebrews of Yonkers have leased and fitted up for a synagogue the entire fourth story of Anderson's Building on Getty Square, and the Rev. M. Bernstein has been engaged to minister to them." There is no further record of this early organization, however; and it was not until 1887 that the community became solid enough to carry on a continuous organized existence. At that period Jews of Yonkers were mainly from Hungary. Among them were Adolf Klein, Aaron Abrahamovitz, Hillel Golden, Adolph Braun, Bernard Gross, Moritz Aneiss, David Hertz, M. Frommberg, Lewis Klein and Max Goldsmith. The first public high holy day services of the community were held in the fall of 1887 in Temperance Hall on North Broadway. Subsequently the congregation bought and remodeled Teutonia Hall.

In 1903 the congregation assumed the permanent name of Ohab Zedek, and in the following year dedicated the new synagogue on Prospect Street, the first to be erected in Yonkers. Several fraternal organizations were formed there, and the women of the community established the Hebrew Women's Charity Organization, still in existence in 1943. In 1925 the sisterhood was organized. A Hebrew Free School was also instituted. In 1943 Rabbi Alexander S. Rosenberg was serving in the pulpit of Congregation Ohab Zedek, having succeeded his father, Philip Rosenberg.



The Orthodox congregation Agudas Ahim was organized in 1909 and purchased a church building which was remodeled into a synagogue. Rabbi Jacob I. Mendelsohn served the congregation from 1921 to 1925, and was succeeded by David M. Shohet, who still continued to occupy the pulpit in 1943.

The Orthodox congregation Sons of Israel was organized in the 1920's, and built an imposing house of worship on Elliot Avenue. In 1943 Rabbi Irving Freedman was temporarily in the pulpit, replacing Rabbi Morris Sandhaus, who, on leave of absence, was serving as a chaplain in the United States Army.

Fourth of Yonkers' Orthodox synagogues in 1943 was Congregation People of Righteousness, which had, however, no resident rabbi. All four Orthodox congregations maintained daily Hebrew schools.

In 1901 the Reform Jews of Yonkers organized Congregation Staff of Aaron, which came to be known as Temple Emanuel, joining the Union of American Hebrew Congregations in 1920. The congregation was served for a short period by the Reverend Bernard Lissauer, and then called as its rabbi Samuel J. Levinson (1909-11). Succeeding rabbis included Jacob Tarshish (1919-22), Emanuel Jack (1926-31), Jacob Werne (1931-35), and Benjamin Schultz, who, elected in 1935, continued to occupy the pulpit in 1943. Rabbi Jack (d. 1942) served from 1926 to 1931 and was a leader in interfaith work; he was editor of the *Westchester Jewish Weekly,* and national chaplain of the Veterans of Foreign Wars (1931). The congregation replaced its portable church building, which had served as a house of worship from its inception, with a Temple erected on Hamilton Avenue in 1912. A new school building adjoining the Temple was built in 1939.

For charitable purposes, Yonkers Jewry organized, in addition to the Yonkers Hebrew Women's Charity Association, the Hebrew Ladies' Aid Society. The Y.M.H.A. was an early organization of the community, started before 1900. A new organization was formed in 1910 among the younger men of the city, and the two, combining in 1913, purchased a building for their use. Eventually the Y.M.H.A. and the Y.W.H.A. were absorbed into the larger Jewish Community Center, erected in 1929. The Center, affiliated with the Community Chest, became the nexus of all Yonkers Jewish

Heinrich York-Steiner. From a drawing by Elias M. Grossman

activities, outside of the congregations proper, and functioned under the jurisdiction of the Jewish Federation of Yonkers, incorporated in 1936, and constituted by delegates from every important Jewish organization. Isidore Beierfeld was executive director of the Center in 1943. National groups represented at Yonkers included the B'nai B'rith, the Zionist Organization and Hadassah, and the National Council of Jewish Women.

At Yonkers, which became a center of several large manufacturing plants, Jews were engaged mainly as small merchants. A good proportion were in the professions. Representatives of the community in civic affairs included Maurice Blinken, president (1933), and Harry C. Adams, at one time vice-president, of the board of education. In 1943 Abraham Rosenblum was serving on the board of education. Isidor Sack was an executive in the Community Chest of the city, and Rabbi Benjamin Schultz held executive office in the local Red Cross. Morris L. Rosenwasser was associate corporation counsel. Arthur J. Miller served in the state assembly (1926-27), and was later secretary of contract and supply in the city. SHERRY ABEL.

YOREH DEAH, *see* SHULHAN ARUCH.

YORK-STEINER, HEINRICH, author and Zionist leader, b. Szenitz, Upper Hungary, 1859; d. Tel-Aviv, Palestine, 1934. He was actively associated with Theodor Herzl, participated in the preliminary conference in Vienna (March, 1897), where the holding of a "World Congress of Zionists" and the founding of a Zionist organ were decided upon, and in 1904 succeeded in obtaining from the papal secretary of state the promise that the Apostolic See would place no obstacles in the way of the colonization of Palestine, which he regarded as a humanitarian work.

York-Steiner was one of the founders of the Zionist weekly, *Die Welt,* but withdrew from Zionist activities shortly after the death of Herzl (1904). He wrote first on literature, and later published narratives from the life of Orthodox Jews. His writings include: *Künstlerfahrten vom Atlantischen bis zum Stillen Ozean* (1883); *Anti* (1895); *Mutter Eva* (1897); *Der Talmudbauer* (1904); *Vom sterbenden Geld* (1920); *Die Kunst als Jude zu leben* (1928). He wrote a drama, *Der hohe Kurs,* and was an editor of *Die Zeit.*

EDWARD ALFRED STEINER, sociologist (b. Szenitz, Upper Hungary, 1866), was a brother of Heinrich York-Steiner. He emigrated to the United States, embraced Christianity, and became a Congregational minister and professor of applied Christianity at Grinnell College, Ia. (1903).

He wrote: *Tolstoy, the Man* (1903); *On the Trail of the Immigrant* (1906); *The Mediator* (1907); *The Immigrant Tide* (1909); *Against the Current* (1910); *The Broken Wall* (1911); *From Alien to Citizen* (1914); *Introducing the American Spirit* (1915); *Nationalizing America* (1916); *Sanctus Spiritus and Company* (1919); *Old Trails and New Borders* (1921); *The Eternal Hunger* (1925); *The Making of a Great Race* (1929).

Lit.: (on York-Steiner) Richards, Bernard G., "York Steiner Goes Home," *New Palestine,* Nov. 10, 1939; Bein, Alex, *Theodor Herzl* (1940).

YOTZEROTH (plural of *yotzer,* "Creator prayers"), Piyutim to the benedictions of the Shema. They are classified by the portions of the prayer to which they are attached. The most important Yotzeroth are: (a) Yotzer poems ("Who created [the heavens]"); (b) Ofan poems (one of the names for angels); (c) Zulath poems ("[there is none] besides [God]"). In addition to these basic types, there are (d) Meorah poems ("light") and (e) Ahabah poems ("[With great] love") before the Shema, and (f) Mi Chamocha poems ("Who is like unto Thee") and (g) Geullah poems ("redemption") after the Shema.

The poetic version of the Nishmath prayer and all the accompanying poetic pieces are also erroneously called Yotzeroth; in fact, it has been the mistaken custom to call all the poetic insertions in the Morning Service by that name.

Lit.: Elbogen, Ismar, *Der jüdische Gottesdienst,* 210-11; Idelsohn, A. Z., *Jewish Liturgy* (1932).

YOUNG ISRAEL, NATIONAL COUNCIL OF, an adult-led organization of and for Jewish Orthodox youth in the United States. It was founded in 1912 by a group of young men and women on the lower East Side in New York city for the purpose of preserving Jewish Orthodoxy and learning. In 1915 it organized as a model synagogue, conducting services in one of the rooms of the Educational Alliance. First limited to the lower East Side of Manhattan, the group expanded, and similar organizations were founded in Brooklyn, The Bronx and Jersey City. In 1922 a Council of all Young Israel was formed to centralize the various activities and to act as an authoritative body in the expression of the ideas of the movement. The National Council of Young Israel had, in 1943, a total of 25,000 youth members, half of whom were in New York city, and seventy branches throughout the United States.

It published a monthly magazine, *Young Israel Viewpoint.* J. David Delman acted as president in 1943. The organization sponsored an employment bureau for Sabbath observers. Other activities included adult education, youth clubs, synagogue services, participation in Zionist activities, support of Torah institutions in the United States and abroad, and participation in all activities which promote Orthodox Judaism and Americanism.

YOUNG JUDAEA, children's Zionist organization, affiliated with the Zionist Organization of America and Hadassah, founded in 1909.

Professor Israel Friedlaender was elected first president, and David Schneeberg secretary. Succeeding presidents were Sundel Doniger, Mrs. N. Taylor Phillips, Rabbi David de Sola Pool, Rabbi Jacob Kohn, Samuel J. Borowsky, Rabbi Israel Goldstein, Rabbi Louis I. Newman, David Levine, Louis P. Rocker and Carl Alpert. Herbert H. Lehman was for many years honorary president, and still held this post in 1943. In 1916 the Federation of American Zionists pro-

vided a substantial subsidy, and with Schneeberg as executive secretary the body expanded considerably, opening its own offices.

Young Judaea was incorporated as part of the work of the Zionist Department of Education headed by Henrietta Szold in 1918, and Emanuel Neumann became director of its activities. Later the subsidy was withdrawn and Young Judaea became self-supporting, although it retained its association with the parent body. In 1941 constitutional changes were effected whereby it came under the immediate supervision of the American Zionist Youth Commission, of which Shlomo Bardin was director.

Aharon Kessler served as executive director of Young Judaea. Others who have served as executive directors include Samuel J. Borowsky, Jacob S. Golub, Mrs. A. H. Vixman, and Rabbi Aryeh Lev.

The organization was, in 1943, composed of some 500 clubs, with a total membership of over 15,000 boys and girls between the ages of ten and eighteen. It conducted a diversified program of educational, religious and physical activities. It published a considerable amount of literature for young people dealing with Zionism, Jewish holiday observances and contemporary Jewish life in America, and issued many books.

Much of this educational material was used by Sunday schools, centers and other Jewish youth groups. Periodicals included the monthly children's magazine, *The Young Judaean,* and bulletins, *The Leader* and *Hashachar.* Many of the leading American Zionists obtained some of their early Jewish schooling in Young Judaean clubs.

YOUNG MEN'S AND YOUNG WOMEN'S HEBREW ASSOCIATIONS (Y.M.H.A. and Y.W.H.A.), organizations for the intellectual, social and physical welfare of Jewish men and women. The earliest Y.M.H.A. was that founded at Baltimore in 1854, and about a score of such societies came into being in the next twenty years. However, most of them failed to flourish, and it was not until a Y.M.H.A. was formed in New York city in 1874 that a permanent movement was started. The first Y.W.H.A. was founded in New York city in 1902.

For a description of the activities of these associations, *see* CENTER, THE JEWISH.

YOUNGSTOWN, a city of Ohio with a population of 167,720 (census of 1940), including, in 1943, an estimated 6,000 Jewish inhabitants. Jews are known to have settled in Mahoning Valley as early as 1826. It was not until 1837, however, that the first authentic record of Jews in Youngstown is found. The first Jew to settle in Youngstown was Jacob Spiegel, who came with his family from Alsace, France. David Theobald of Bavaria followed, and shortly afterward came Emanuel Herzog and Simon Lowenstein.

By 1867 a sufficient number of Jews had settled in Youngstown to form a congregation. On May 12th of that year David Theobald, Charles, Edward, Ferdinand and Abraham Ritter, Emanuel Herzog, Abraham Walbrum, S. J. Lambert, S. Lowenstein, M. Ullman, A. Schaffner, William Jonas, Henry Theobald, Emanuel Guthman and Abraham Printz founded Congregation Rodef Sholom.

Lippman Liebman was called to the pulpit in 1868, and served until 1887. In that latter year the congregation dedicated its first Temple. Liebman was succeeded by J. B. Grossman (1887-93 and 1899-1912); Emanuel Schreiber (1893-1897); and Moses P. Jacobson (1897-1899). In 1912 Isador E. Philo was elected to the pulpit, which he occupied (1913-42) for thirty years, when he became rabbi emeritus. During his incumbency, in 1914, Rodef Sholom built its imposing new Temple (dedicated 1915), still housing the worshippers in 1943. Philo was succeeded by Rabbi Abraham H. Feinberg.

With the passing of the pioneers, a new generation arose to carry on the religious, cultural and philanthropic work of the Jewish community. Among them were Isaac Strouss and Bernard Hirshberg, who founded the largest department store in Youngstown, and Max Brunswick, who served as city solicitor for two terms.

First of the Orthodox congregations of Youngstown was B'nai Israel, organized in 1887 by Herman Rice, Isaac Friedman, Moses Kalver and S. B. Frankle. In 1943 the congregation had no regular rabbi.

The Orthodox Congregation Emanu-El was formed in 1907, and among its founders were Isaac, Nathan and Louis Ozersky, Meyer Altshuler, Isaac Eidelman, Herman Robins and Benjamin Warner. A synagogue was built in 1908, during the incumbency of the first rabbi, Saul Silber (1907-9). Rabbi Irving Miller served from 1923 to 1928. In 1929 Carl L. Manello was called to the pulpit, which he was still occupying in 1943. Congregation Emanu-El established the Hebrew Institute (daily Hebrew school) in 1910.

The third congregation maintained by the Orthodox community of Youngstown in 1943 was Ohev Tzedek, organized in 1924 by Sam Roth, Sam Hansburg, Max Braff, Ben Polonsky, Morris Sussman and Joseph Davis. The congregation built its synagogue in 1926, but had, in 1943, no resident rabbi.

The Conservative Congregation Anshe Emeth, growing out of a split in the membership of B'nai Israel over the matter of the separate seating of men and women worshippers, was organized in 1919, largely under the leadership of Rabbi Solomon Goldman of Cleveland. A. Max Frankle was founder. The first structure erected was a school building, to house the modern school for the children of the community. In 1927 the large Temple of the congregation was built. The first rabbi to occupy Anshe Emeth's pulpit was B. H. Birnbaum (1923-29). He was succeeded by Eugene Kohn (1929-30), Elias Charry (1930-33), Nathan Kollin (1933-41), and Morris Gordon (1941-).

The active Jewish Federation of Charities was organized at Youngstown in 1935. In 1943 Youngstown Jews maintained also a Jewish Center, an active Zionist organization, a Senior and Junior Hadassah, a lodge of the B'nai B'rith, a Senior and Junior Council of Jewish Women, a post of the Jewish War Veterans, and an outstanding Jewish Choral Society of 100 members. Rabbi Isador E. Philo, awarded (1942) a citation for his interfaith work by the Youngstown Rotary Club, was head (1943) of the board of control of the Interfaith Chapel of Friendly Bells, composed of Catholics, Protestants and Jews.

In 1943 community leaders included Clarence Strouss, president from its inception of the Jewish Federation; Bert Printz, Herman Ritter, I. Harry Meyer, Harry Levinson, Dr. Solomon M. Hartzell, Dr. A. M. Rosenblum, I. S. Weil, Murray Nadler, Morris Tamarkin, Joe Wilkoff and Mose Frankle. Benjamin Roth was, in 1943, a member of the city council. Maurice Lioscher was elected to the upper house of the state legislature (1934-).

At Youngstown, a center of the steel industry, Jews were mainly engaged in mercantile pursuits, in 1943. A number were employed in several branches of the steel industry both as fabricators and millworkers, and in other manufacturing enterprises. A comparatively large percentage were in the professions; some engaged in social service work.

ISADOR E. PHILO.

YOUTH, CARE OF, *see* SOCIAL SERVICE.

YOUTH LITERATURE. The 20th cent. may well be called the Children's Century. Everywhere, the world over, people are striving to give children an ideal environment. Books are an essential part of a happy childhood and proper character building; hence the

literature of youth has come in for a large measure of attention. The movement has given birth to specialized children's departments with children's editors in the book publishing field, and children's librarians in public libraries and schools.

Reading habits acquired in youth will continue to give delight and stimulation. "Next to persons, books are our greatest influencers of character." Jewish parents, it has been said, are more appreciative of learning than almost any other group. They are unquestionably more self-sacrificing in providing educational and cultural opportunities for their children. Book learning has ever been encouraged by the Jews. The Talmud even goes so far as to say that "the scholar takes precedence over kings."

Whereas the generation of the 1940's has inherited many childhood favorites from the past with basic roots that indicate the sameness of all lands and literatures, no special Jewish childhood favorite books have as yet been developed for a heritage. In general, these childhood favorites are not those which have been outmoded in language and incident; they are the real classics with a perennial demand and which reappear from time to time in new dress—imaginative literature, the rhythmic cadences of the Bible in juvenile terms, picture books, folklore, myths and legends, poetry and biographies, and, of course, fiction.

Years ago, in the days when only a knowledge of the Bible and its commentaries was necessary, a Jewish child's imagination dared not take flight. Certainly, fancy was not encouraged. Perhaps these historic backgrounds are partly responsible for the very sparse and prosy literature especially written for the Jewish child.

In the case of Jewish juveniles specifically, the demand made by the religious schools of the last generation for material as aids in teaching resulted in Bible retellings in elementary terms;—or didactic preachments in fiction form which were drab and prosy. As time went on aids to ethics and definitions of holidays came into play. The normal fields of poetry, picture books, nature and animal stories were largely untapped because there has been no aggressive leadership in the Jewish juvenile field.

Jewish publishers in America in the past issued their juveniles with a business sense and utilitarian motive, without too keen an understanding of the realm of childhood. Since about 1935 the pattern has changed, and Jewish juveniles are taking on a modern and artistic note. The most carefully edited Jewish juveniles, attractive and modern in format, have been issued by Behrman's Jewish Book House. There is a wealth of material and rich literary treasures to be tapped in the storehouses of Jewish literature by authors who have a sympathetic understanding of and are "en rapport" with childhood, who will write *for* children but not *down to* children. There is also a great need for imaginative literature, and a literature that will yield the American Jewish child a sense of completeness in regard to history and the traditions of his past. This is necessary for harmonious unity with the entire story of the Jewish people.

The literature for Jewish youth needs a master hand; in writing it, it is well to bear in mind what Albert Einstein said: "Imagination is more important than knowledge, for knowledge is limited, whereas imagination enhances the entire world of thought, stimulating progress and giving birth to evolution."

Book lists and bibliographies of Jewish juveniles have been made available by publishers and schools, but in the main these attempts have been shoddy, ill prepared, haphazard collections of titles. They have been a listing chiefly of names into rough classes and age groups with definitely utilitarian purposes in mind and have been devoid of literary standards and sympathetic understanding of the needs of youth. These graded lists were chiefly issued for pedagogical purposes, unconcerned in the main with the age mentality of the children. They attempted a wide range listing of books from pre-school age to practically eighteen, including many adult books, a philosophy which has been outmoded by juvenile experts. Other lists have erred and lost in value by painfully including books definitely useful only as tools for teacher or parent, but without any appeal to the child.

From the point of view of the trained librarian, familiar with highly specialized modern work in youth literature, other standards assert themselves. Whether the selection of a book for listing is governed by age or by scholastic grade, juvenile book lists in the main should range from the picture book age through the fourteen-year period or the normal second year high school child.

The post-first World War decade in America was in danger of religious and literary disintegration. To offset this tendency Jewish Book Week started in Boston in 1925. The momentum gathered through this effort had by 1943 resulted in a more formal observance of Jewish Book Week in America. The principal purpose of this week is to call attention to the large amount of literature of and about the Jews, and to arouse interest in Jewish books and literary backgrounds at large. The chief slogans developed in this project are "A Jewish Book Shelf in Every Home," and "The Jewish Child's Book Shelf." It is the Jewish child's special book shelf and its development in the Jewish home with which we are definitely concerned, and for which the following list has been compiled.

In selecting these works of one hundred authors who are in the main Jewish, special attention has been given to the content matter of the book: its timeliness, its adaptability, its literary value and its potentialities in fitting into the progressive scheme of Jewish education. Definite classics which have been perennially carried on secular or high school lists, such as George Eliot's *Daniel Deronda* or Sir Walter Scott's *Ivanhoe,* have been omitted. Books such as Grace Aguilar's *Vale of Cedars* and Church's *The Hammer* have been omitted because they are out of print.

Textbooks, pure and simple, without any recreational touch, have also been omitted, on the theory that in the main the entertainment function of books with the young is important. In the case of pioneer juvenile writers like Elma E. Levinger it was impossible to include many of her titles, but preference has been given to representative ones in the different groups.

Biblical Backgrounds. 1. *For Very Young Children:*

Altman, Addie Richman. *The Jewish Child's Bible Stories.* New York. Bloch. 1920. 152 pp. Bible stories written in simple language. The ethical value of the stories is emphasized.

Bible Selections. *David.* Illustrations by Elizabeth Orton Jones. New York. Macmillan. 1937. 66 pp. The artist's pictures show a rare understanding of the story.

Calisch, Edith Lindeman. *Bible Tales for the Very Young.* New York. Behrman. 1930. 163 pp. Twenty-four stories, well written and illustrated, extending from Creation to the death of Moses.

Bible Tales for Young People. Book 2. New York. Behrman. 1934. 168 pp. Covers the period from Joshua to the Maccabees.

Cohen, Lenore. *Bible Tales for Very Young Children.* Cincinnati. Union of American Hebrew Congregations. 1934. x, 189 pp. Plates. Emphasizes the values of the Bible and what educational theory has developed to meet the needs of little children.

Estabrook, Helen Slocum, compiler. *Seventy Stories of the Old Testament.* With reproductions from the works of

master woodcut artists of the 15th and 16th centuries. Portland, Me. 1938. This book is delightful in format, as well as faithful in the retelling of these inspiring stories.

Goldin, Hyman. *Illustrated Bible Stories.* New York. Hebrew Publishing Company. 1930. 256 pp. Fifty-three Bible stories simply retold for very young children. The illustrations are by the famous French artist, Gustave Doré.

Ish-Kishor, Sulamith. *The Bible Story.* 3 vols. New York. United Synagogue of America. 1921. 155, 221, 250 pp. The Bible retold in simple language.

Lathrop, Dorothy. *Animals of the Bible.* New York. Stokes. 1937. Plates. 67 pp. A well-chosen collection of thirty stories of memorable animals in the Bible. Distinguished illustrations.

Levinger, Elma E. *Bible Stories for Very Little People.* New York. Behrman. 1925. 142 pp. Written especially for Jewish children. A useful book for the bed-time hour and for reading out aloud. Vol. 2, "Great Jews since Bible Times for Young People."

Petersham, Maud and Miska, adapters. *Stories from the Old Testament.* Philadelphia. Winston. 1938. Colored illustrations. Joseph and His Brothers; Moses; Ruth; David. For the youngest readers. Also in separate volumes.

Robinson, William Wilcox. *Book of Bible Animals.* New York. Harper. 1938. Ten stories of the animals in the Bible. A distinctive picture book.

2. *For Intermediate Children:*

Asch, Sholem. *In the Beginning.* New York. Putnam. 1935. v, 120 pp. Illustrated. The stories of Genesis for young readers.

Bialik, Hayim. *And It Came to Pass . . .* Legends and Stories about King David and King Solomon. Translated by Herbert Danby. Woodcuts by Howard Simon. New York. Hebrew Publishing Company. 1938. 281 pp. A collection of legends and tales, adapted from Arabic and Jewish sources—ancient, medieval, and modern. All reflect the narrative and poetic talent of Bialik.

Bonser, Edna M. *How the Early Hebrews Lived and Learned.* New York. Macmillan. 1924. xviii, 269 pp. A dramatic retelling of some Bible stories, outlining the progress which the Hebrew people made in agriculture, industry, literature, and religion in the 1,500 years after Abraham.

Browne, Lewis. *The Graphic Bible.* New York. Macmillan. 1928. 160 pp. Contains eighty animated maps, which are in themselves an alluring invitation to a trip through Bible-land.

Cohen, Emily Solis. *David the Giant Killer.* Philadelphia. Jewish Publication Society. 1908. 250 pp. A Jewish grandmother tells stories from the Old Testament and Apocrypha to her grandchildren.

Goldin, Hyman E. *Bible and Talmud Stories.* A Biblical history for school and home with stories from the Talmud and Midrash, questions, maps, and illustrations. New York. Star Hebrew Book Company (1931). 3 vols., 208, 205, 210 pp. Vol. 1, Beginning to Death of Moses. Vol. 2, Fall of Jericho to Death of Solomon. Vol. 3, Division of Kingdom to Second Temple.

Jenness, Mary. *Men Who Stood Alone.* The Hebrew Prophets in Action. New York. Long and Smith. 1932. vii, 114 pp. Twelve stories for boys and girls based on dramatic incidents in the lives of the prophets of the Old Testament.

Levinger, Elma E. *Wonder Tales of Bible Days.* Philadelphia. Jewish Publication Society. 1929. viii, 348 pp. Stories of Abraham, Joseph, Moses, David, Solomon, and Elijah presented in a new dress.

Books for Younger Boys and Girls. 1. *Fiction:*

Braverman, Libbie L. *Children of the Emek.* Brooklyn, N. Y. Furrow Press. 1937. 118 pp. The story of the life of two children of the Jewish settlement in Nahalal, a workers' cooperative in Palestine.

Calisch, Edith Lindeman. *Fairy Tales from Grandfather's Big Book.* New York. Behrman. 1938. 130 pp. Thirteen strange and exciting Jewish fairy stories about demons, angels, and beasts. A book useful for story-telling.

Conovitz, Michael. *Dorothy and David Explore Jewish Life.* Cincinnati. Union of American Hebrew Congregations. 1938. 206 pp. Illustrated. An excellent book for children on the institutions in a well-organized Jewish community.

Friedlander, Gerald. *The Jewish Fairy Book.* New York. Stokes. 1920. ix, 188 pp. Quaint, colorful tales selected from the wealth of Jewish folklore and ancient literature. With eight beautiful illustrations in color.

Gaer, Joseph. *The Burning Bush.* Cincinnati. Sinai Press. 1929. xix, 333 pp. Stories of personalities and events of the time. The volume takes its name from the "Burning Bush" of the Bible. "The Unconquered" continues with the period of the Second Temple.

Gamoran, Mamie G. *Hillel's Happy Holidays.* Cincinnati. Union of American Hebrew Congregations. 1939. 205 pp. The author describes the customs connected with the observance of the Sabbath and nine Jewish holidays in very simple English.

Ish-Kishor, Sulamith. *The Heaven on the Sea and Other Stories* (together with 20 poems). New York. Bloch. 1924. 191 pp. Twenty stories based on rabbinic legends and historical incidents. Each story is preceded by a poem dealing with nature, the synagogue, the holidays, and the like.

Kalisher, Betty. *Watchmen of the Night.* Cincinnati. Union of American Hebrew Congregations. 1936. xiii, 205 pp. Collection of stories of twenty-one eminent characters in Jewish history from the time of Johanan ben Zakkai through that of Theodor Herzl.

King, Marian. *Amnon: a Lad of Palestine.* Boston. Houghton Mifflin. 1931. 96 pp. A little Jewish boy in Modern Palestine. Bible days are recreated in present day life and festivals.

Kruckman, Herbert L. *Joey Meets His People.* New York. Hebrew Publishing Company. 1940. 44 pp. An imaginative story of a little Jewish boy who misbehaves in Hebrew school and is taken on a strange adventure where he learns about the great Jewish heroes of history.

Landa, Gertrude (Aunt Naomi). *Jewish Fairy Tales and Legends.* New York. Bloch. 1921. 294 pp. Contains twenty-five tales and fables, especially written for Jewish boys and girls.

Learsi, Rufus (Israel Goldberg). *Shimmele,* and *Shimmele and His Friends.* 2 vols. New York. Behrman. 1940. 116, 113 pp. Stories of the adventures of a little New York East Side boy, Shimmele Cohen, and his friends.

Levinger, Elma E. *Pilgrims to Palestine,* and Other Stories. Philadelphia. Jewish Publication Society. 1940. 274 pp. A collection of readable stories dealing with Jewish young people of many lands and times; the emphasis is on the modern scene, and there is much instructive material.

Mazer, Sonia. *Yossele's Holiday and the Brave Maccabees.* New York. Doubleday, Doran. 1934. iiii, 60 pp. Plates. A story of family life in a Jewish village of Russia; the account of the Maccabees is based on the Apocrypha.

Simon, Solomon. *The Wandering Beggar . . .* or the Adventures of Simple Shmerel. Illustrated by Lillian Fischel. New York. Behrman. 1942. 118 pp. A delightful juvenile emphasizing the parables of Jewish life as manifested through the faith and wisdom of the hero.

Steinberg, Jehudah. *The Breakfast of the Birds.* Translated from the Hebrew by Emily Solis-Cohen. Philadelphia. Jewish Publication Society. 1917. 175 pp. Eighteen beautiful stories which belong to that literature which is timeless. A child was chosen to illustrate the book in order to find expression from the child point of view, and the value of the book was thus enhanced.

Weilerstein, Sadie Rose. *What Danny Did.* New York. Bloch. 1928. 107 pp. Aims to present the everyday religious life and customs to the smallest Jewish child.

The Adventures of K'tonton, a little Jewish Tom Thumb. New York. Women's League of the United Synagogue of America. 1935. 100 pp. Through the adventures of an imaginary Tom Thumb, the small child learns of traditions, customs, and ceremonies in the Jewish home.

What the Moon Brought. Philadelphia. Jewish Publication Society. 1942. 159 pp. The cycle of the Jewish year and its holidays is interpreted to the American child by means of prose and poetry in simple terms.

2. *Non-fiction:*

Bialik, Hayim N. *Far Over the Sea.* Translated from the Hebrew by Jessie Sampter. Illustrated by Louis Korbin.

Cincinnati. Union of American Hebrew Congregations. 1939. 90 pp. A book of whimsical verse by the great Hebrew poet, containing much variety as to subject material and especially poems about Jewish holidays, close to the heart of the Jewish child.

Burstein, Abraham. *A Jewish Child's Garden of Verses.* New York. Bloch. 1940. 116 pp. A collection of both gay and grave poems. The patterns of many of the verses are familiar from other sources, but the subject matter and the idioms introduced are strictly Jewish.

Fast, Howard and Bette. *Picture Book History of the Jews.* New York. Hebrew Publishing Company. 1942. 57 pp. An appealing, attractive and successful panorama of Jewish history with which to introduce a child to his people. A brief and simplified text is enlivened by the animated and colorful sketches which present 2,500 years of Jewish life.

Gamoran, Mamie G. *Days and Ways.* Cincinnati. Union of American Hebrew Congregations. 1941. 205 pp. An interesting presentation of the Jewish holidays and ceremonies.

Ish-Kishor, Sulamith. *Jews to Remember.* New York. Hebrew Publishing Company. 1941. 127 pp. Brief biographies of famous Jews of the world and their contributions.

Levinger, Elma E. *With the Jewish Child in Home and Synagogue.* New York. Bloch. 1930. 124 pp. Introduces in a manner easily intelligible for the child those things which make up the life of the Jew.

Lurie, Rose G. *The Great March.* 2 vols. Cincinnati. Union of American Hebrew Congregations. 1931, 1940. 228, 254 pp. A collection of stories of famous Jews and Jewesses of all times with a historic interpretation.

Raisin, Jacob S. *Twice-told Talmud Tales.* New York. Behrman. 1929. 186 pp. Stories in dialogue form with a moral quality, retaining the atmosphere of the Talmud.

Salaman, Nina, edit. *Apples and Honey.* New York. Bloch. 1922. 348 pp. A varied and interesting collection of stories, poems and articles covering a wide range of Jewish life and thought.

Sampter, Jessie E. *Around the Year in Rhymes for the Jewish Child.* New York. Bloch. 1920. 91 pp. Poems for every important occasion in the Jewish year. Contains a number of Hebrew blessings, with English translations in verse.

Zeligs, Dorothy F. *A Child's History of the Hebrew People.* New York. Bloch. 1935. 179 pp. "Child's history of Jewish life for the first sixteen centuries of the Common Era," 1937, 250 pp. and "A History of Jewish life in modern times for young people," 1938, 446 pp. Describes vividly and graphically the life and achievements of the Jew from the patriarchal nomadic period to the present.

Books for Intermediate Boys and Girls. 1. *Fiction:*

Berkowitz, Henry J. *The Fire Eater.* Philadelphia. Jewish Publication Society. 1941. 394 pp. An adventure story featuring a Jewish hero who meets life with courage and daring.

Burstein, Abraham. *The Boy Called Rashi.* New York. Behrman. 1940. 116 pp. A story about the great commentator Rashi. A fine picture of the life of the period.

Judah Halevi in Granada. New York. Bloch. 1941. 180 pp. The story of Judah Halevi's boyhood with the rhymed translations of his better poems woven into the story.

West of the Nile; A Story of Saadia Gaon. New York. Hebrew Publishing Company. 1942. 143 pp. A story of the Jewish scholar Saadia Gaon of the 10th cent., and leader of Jewry in medieval Babylonia.

Canfield, William W. *The Sign above the Door.* Philadelphia. Jewish Publication Society. 1912. 325 pp. A fine story of the time of the Exodus from Egypt.

Cooper, Samuel William. *Think and Thank.* Philadelphia. Jewish Publication Society. 1890. 120 pp. Sir Moses Montefiore's boyhood. The troubles of Jewish school boys who encountered race prejudice, and how through pluck and honesty they won success.

Gollomb, Joseph. *That Year at Lincoln High.* New York. Macmillan. 1920. 290 pp. An excellent story of democratic life in a New York school. Football, baseball, athletic meets, radios, and other activities are vividly described. Sequels, Tuning in at Lincoln High, 1925, 255 pp.; Working through at Lincoln High, 1923, 228 pp.

Hewes, Agnes Danforth. *Spice and the Devil's Cave.* New York. Knopf. 1930. 331 pp. Presents a kindly picture of the Jewish money lender of medieval society.

Isaacs, Abram S. *Under the Sabbath Lamp.* Stories of our time for old and young. Philadelphia. Jewish Publication Society. 1919. 259 pp. Highlights on domestic and religious life in an American environment, emphasizing the elements which shape and preserve Jewish ideals.

School Days in Home Town. Philadelphia. Jewish Publication Society. 1928. 162 pp. A story of life in a Jewish boarding school.

Learsi, Rufus. *Kasriel the Watchman.* Philadelphia. Jewish Publication Society. 1925. 311 pp. Realistic pictures of modern Jewish life on the East Side of New York.

Levinger, Elma E. *In Many Lands.* New York. Bloch. 1923. 143 pp. Stories of how Jews kept the festivals in the various countries of their dispersion.

Rothgiesser, Ruben. *Ship of Hope.* Philadelphia. Jewish Publication Society. 1939. 144 pp. The story of a group of Spanish Jewish children of the 15th cent. who found refuge from their persecutors in North Africa.

Rubinstein, Marion. *Adventuring in Palestine.* New York. Knopf. 1935. 187 pp. The story of three German refugee children who are introduced to Palestinian life by their cousins, who live in a commune. Many fine photographs.

Saphire, Saul. *The Caliph of Cordova.* New York. Bloch. 1929. 204 pp. A picturesque story of the days of the Golden Age of Spain, and the Jewish contribution to the history, political and economic, of that day.

Tunis, John R. *All-American.* New York. Harcourt. 1942. 245 pp. A football story, emphasizing the importance of certain ethical concepts, such as fair play, courage and tolerance.

2. *Non-fiction:*

Davis, Mac. *From Moses to Einstein. They All Are Jews.* New York. Jordan. 1937. 127 pp. Highlights in the lives of sixty Jewish figures whose deeds were dramatic and varied in scope.

Fast, Howard. *Haym Salomon, Son of Liberty.* New York. Messner. 1941. 243 pp. The life story of the Polish Jewish broker and financier who did so much to help the American cause during the Revolution.

Fein, Harry H., translator. *Gems of Hebrew Verse; Poems for Young People.* Boston. Bruce Humphries. 1940. 120 pp. An anthology containing seventy poems selected from the works of thirty-four Hebrew poets under such headings as Sabbath and Holidays, Palestine, Legends, Personalities, Nature, Humorous Poems.

Fleg, Edmond, edit. *The Jewish Anthology.* New York. Harcourt, Brace. 1925. 399 pp. An anthology of Jewish life through twenty-five centuries. Both prose and verse.

Gabriel, Gilbert W. *The Seven-Branched Candlestick.* New York. Bloch. 1917. 189 pp. The schooldays of a young American Jew in which he relates his anti-Semitic experiences in school and college.

Hertz, Joseph H. *A Book of Jewish Thoughts.* New York. Bloch. 1926. xv, 367 pp. Inspiring thoughts from Jewish literature. The best of what has been written by and about the Jew.

Hurwitz, Hyman. *Hebrew Tales.* New York. Bloch. 1911. xiii, 170 pp. Fifty-five instructive tales and parables from the ancient Jewish sages.

Levin, Meyer. *The Golden Mountain.* New York. Cape and Ballou. 1932. xvii, 357 pp. Marvelous tales of Rabbi Israel the Baal Shem, and of his great-grandson, Rabbi Nahman, retold from Hebrew, Yiddish and German sources.

Pascheles, Wolff, and others. *Jewish Legends of the Middle Ages.* London. Robert Scott. No date. 152 pp. Selected and translated by Claud Field. An interesting collection, throwing a vivid light on Jewish life in medieval ghettos.

Zeligs, Dorothy F. *The Story of Jewish Holidays and Customs.* New York. Bloch. 1942. 252 pp. Explains the holidays that are observed in a modern American Jewish home in the light of their historical significance.

Books for Older Boys and Girls. 1. *Fiction:*

Aronstam, Noah. *Lost Nation.* New York. Behrman. 1940. 105 pp. A historical tale about the Khazars or Kuzeri, a nomadic people who were converted to Judaism.

Asch, Sholom. *Kiddush Hashem. An Epic of 1648.* Translated from the Yiddish by Rufus Learsi. Philadelphia. Jewish Publication Society. 1926. 227 pp. A story of Orthodox Jewish life and its persecutions at the time of the Chmielnicki pogroms (17th cent.). A story with a deep spiritual note.

Baron, Joseph Louis, edit. *Candles in the Night.* Philadelphia. Jewish Publication Society. 1940. xxiii, 391 pp. A group of short stories, all by non-Jewish authors on Jewish themes.

Bialik, Hayim. *Aftergrowth and Other Stories.* Translated from the Hebrew by I. M. Lask. Philadelphia. Jewish Publication Society. 1939. 216 pp. Contains also "The Shamed Trumpet" and "The Short Friday," with an important biographical introduction of value to the reader unacquainted with Bialik.

Blandford, Benjamin W. *Off the Capes of Delaware.* Cincinnati. The Riverdale Press. 1940. 325 pp. Stories of American Jewish heroes.

Mosenthal, Salomon Hermann. *Stories of Jewish Home Life.* Translated from the German. Philadelphia. Jewish Publication Society. 1907. 381 pp. Ghetto stories.

Peretz, Isaac L. *Bontshe the Silent.* Translated from the Yiddish by A. S. Rappoport. Philadelphia. McKay. 1928. 259 pp. "Bontshe the Silent" is a Yiddish classic. Also contains twenty-five short stories of Jewish life.

Rabinovitz, Shalom (Shalom Aleichem, pseudonym). *Jewish Children.* New York. Knopf. 1926. 268 pp. Nineteen masterful stories for and about children. The author is called the "Jewish Mark Twain."

Wassermann, Moses. *Judah Touro.* A Biographical Romance. Translated from the German by Harriet W. Mayer. New York. Bloch. 1923. 275 pp. Describes a Jewish settlement in Rhode Island at the time of the War of 1812; the hero's participation in mercantile life on the seas and in France; and his pioneer life in Mississippi and Louisiana.

Wolfenstein, Martha. *Idyls of the Gass.* Philadelphia. Jewish Publication Society. 1901. 295 pp. Fascinating pictures of past life in an Austrian ghetto.

Zangwill, Israel. *Selected Works.* A Golden Jubilee Volume. Philadelphia. Jewish Publication Society. 1938. 553, 487, 486 pp. Contents: Children of the Ghetto; Ghetto Comedies; Ghetto Tragedies. A book which definitely belongs in every Jewish home as an introduction to the works of a great 19th cent. novelist.

2. *Non-fiction:*

Edidin, Ben M. *Jewish Holidays and Festivals.* Illustrated by Kyra Markham. New York. Hebrew Publishing Company. 1940. 226 pp. The origin, traditions, customs and ceremonials relating to the Jewish holidays, and of the American national festivals which are bound up with Hebraic ideals.

Eisenstein, Judith Kaplan. *The Gateway to Jewish Song.* New York. Behrman. 1939. 172 pp. Contains over 100 songs arranged in five parts for greater use and enjoyment.

Fast, Howard M. *Romance of a People.* New York. Hebrew Publishing Company. 1941. 238 pp. History of the Jewish people for older boys and girls.

Fleg, Edmond. *Why I Am a Jew.* Translated by Mrs. Stephen S. Wise. New York. Bloch. 1929. 100 pp. An inspiring autobiography by a great French author.

Gaer, Joseph. *How the Great Religions Began.* New York. Appleton. 1929. 424 pp. The book presents to the young the religions of the world.

Gershenfeld, Louis. *The Jew in Science.* Philadelphia. Jewish Publication Society. 1934. 224 pp. Records the thrilling accomplishments of the Jew in science, ancient, medieval and modern.

Levin, Shemarya. *Childhood in Exile.* Translated by Maurice Samuel. New York. Harcourt, Brace. 1929. 277 pp. The autobiography of a prominent Zionist leader. A book of simplicity and charm. Sequels, The Arena, 1932, 305 pp.; Youth in Revolt, 1930, 294 pp.

Levinger, E., and Rabbi Lee J. Levinger. *The Story of the Jew for Young People.* New York. Behrman. 1928. 302 pp. A record of Jewish life, over a period of 4,000 years.

Lewisohn, Ludwig. *Upstream.* New York. Liveright. 1922. 248 pp. An autobiography which is a record of disillusionment. Of high literary value. Sequel, Mid-Channel, 1929, Harper.

Lowenthal, Marvin. *Memoirs of Glueckel of Hameln (1646-1719).* New York. Harper. 1932. 295 pp. The first translation into English of the autobiography which for 200 years has been a Jewish classic in German. The quaintness of the language and the pictures of the day have been admirably and delightfully rendered.

Pessin, Deborah. *Giants on the Earth.* New York. Behrman. 1940. 256 pp. Twenty-eight short biographies of great Jewish men and women from the time of the discovery of America to the present.

Sampter, Jessie E. *Brand Plucked from the Fire.* Philadelphia. Jewish Publication Society. 1937. 211 pp. The poems deal especially with the rebuilding of Palestine in terms of ardent Zionism.

Schwarz, Leo W., edit. *The Jewish Caravan.* Great Stories of Twenty-five Centuries. New York. Farrar and Rinehart. 1935. 768 pp. "A selection of stories and narratives by Jewish writers who felt the need of expressing themselves as Jews . . ." (preface). The selections range from Old Testament narratives to stories by Fleg, Feuchtwanger, Lewisohn and their contemporaries in Russia and Palestine.

Weyne, Arthur. *The Treasure Chest.* Tales and Legends from Jewish Lore. New York. Judea Publishing Corporation. 1941. 206 pp. A treasury of Jewish folklore presented in simple terms culled from the Bible and other religious writings of the Hebrews and famous rabbis.

FANNY GOLDSTEIN.

YOUTH MOVEMENTS. General History. Jewish youth movements can be understood only in the setting of general historical conditions. By definition, youth movements imply a conscious revolt of youth against social, political and cultural conditions representative of and created or tolerated by the older generation. With the progress of the 19th cent. and the growing complexity of the new industrial civilization, with the development of mammoth cities, mass proletariats and a class consciousness, the cleavage between the potentialities of the age and its sordid realities in most European countries became evident and awakened in many young people the urge for a better world. They felt a desire to come once more closer to nature; they rebelled against the trend of making the individual wholly subservient to existing conventions; philosophical nihilism, Nietzschean irreverence and Ibsenian moral courage were mingled to lend their drive a sweeping, if vague urgency. Young people's movements sprang up in most European countries where an authoritarian and feudal order repressed the natural ambitions of youth. Thus youth movements found their most fertile field in Germany (where, in addition, romanticism flavored all ideology) and in Russia, where all energies were soon directed toward definitive social and political ends, through the channels of the underground socialist parties. France and England, on the other hand, were largely unaffected.

The first World War, instead of solving the growing unrest of youth, added to their desire for reshaping the universe. Heretofore youth programs had been for the most part vaguely idealistic and individualistic; they now gave their adherence to definite political ideologies which promised to save them from the recurrence of national and spiritual disasters. In Germany and Italy youth movements became the vehicle for the ascendance of supreme leaders (the very term "leader" is intimately linked to the structure of youth movements), and finally ended their historical cycle by enslaving those whom they had originally meant to be free. In

Russia the youth movements integrated themselves completely into the new social order. In other countries, too, the erstwhile indefiniteness of ideas was replaced by political, social and religious doctrines which were more or less committed to specific programs and parties. With the arrival of the second World War, youth movements in the *original* sense of the word were dying and had even lost their emphasis on "youth," inasmuch as they were now inspired by adult groups and leadership. The "new" youth movements had become political rather than social and, as "party movements," had changed into youth sections of adult organizations.

Jewish youth movements reflect, in their rise and development, the general picture. Since, however, Jewish youth never became an integral part of its environs—for even in Western Europe a social ghettoization always persisted—they were affected by the general trend in a somewhat retarded measure, and did not feel the full impact of the Wandervogel and similar ideologies until the first decade of the 20th cent. But even when they did then, adopting many of the external features of other youth movements (as, for example, hiking and scouting), they invested them soon with a particular Jewish meaning. This was due to two reasons. Negatively, Jewish youth felt unwelcome in the general movements which strove for a certain amount of homogeneity and looked upon the Jew as an interloper and cultural stranger. On the positive side, Jewish youth, left to its own resources, discovered its own heritage and made the revival of Jewish cultural values an outstanding part of its program and a mark of distinction from other youth movements. It soon fell in with the rising tide of political and cultural Zionism, gave it its youthful impetus, and was in turn buoyed up by it. With few exceptions (notably in Germany) Jewish youth supported the Zionist program, following the lead of the German Blau-Weiss and the East European Hashomer Hatzair.

The influence of youth movements on Jewish life was immense. Practical Zionism became Halutz-borne and thereby largely a youth movement. It afforded a unique opportunity for self-realization, and produced the historically fundamental, youth-founded and youth-inspired Kibbutzim and Kvutzoth. At the same time, however, when youth began to leave the stage of vague idealistic pursuit and continued the realization of its program, the factionalism of the adult world entered into its endeavors. After the War, moreover, the first generation of Jewish youth had "graduated" into political and social life and become the standard bearer for the younger elements. Imperceptibly, Jewish youth movements started to be led and inspired by older leaders and their formulated doctrines. Much of the original spontaneity was lost and the young were educated along party lines—political, cultural and religious—which the adult leaders had drawn. While a good deal of genuine enthusiasm for the attainment of social and specific Jewish ends continued to persist, Jewish youth now followed the pattern of world youth more quickly than it had done thirty and forty years before. By 1930 most youth movements had become organizations for the advancement of youth and proceeded to spend much of their energy in settling ideological controversies. They were each now affiliated with some adult organization, movement or party, which directed its policies, set its educational standards and often supported it financially. This was particularly the fate of the Zionist youth movements, and is shown most clearly in an analysis of present-day Palestinian youth organizations (see below).

In yet another respect had the emphasis of the movements shifted. In their inception only those associations whose programs were molded along lines of social and political reform were considered youth "movements." By 1930 this term was being applied also to groups which fostered purely intellectual or religious or athletic advancement—as long as the membership was composed of young people.

In the Anglo-American countries general as well as Jewish youth movements were slow to start, owing to the absence of the autocratic systems and national minority problems which drove European and Oriental youth into rebellion. In the Western democracies youth movements in the original sense of the term never came to full life; although beginning with the depression years a number of independent organizations arose which, however, in turn soon took their cue from adult groups existing in their own or in foreign countries. Among Jewish youth, the Hashomer Hatzair, Habonim and similar organizations whose emphasis was on social problems were introduced into England and America; but their membership remained small compared with that in the "new" youth movements—religious, educational and athletic or scouting groups under the influence of parent sponsors—whose social philosophies have only a minor or no part in their programs.

After 1933 youth organizations in Germany and, with the advance of Nazism, also in other European countries, became largely survival groups, training their members for emigration and at the same time intensifying their Jewish consciousness. In this respect they performed an invaluable service. Quite naturally, Zionist youth movements experienced a resurgence of vitality and importance since Palestine was the chief center of both Jewish thought and immigration. At the end of December, 1942, most European Jewish youth movements were likely to have shared the fate of European Jewry in general. Where they still existed, they were bereft of their freedom and could carry out their program only in a very restricted manner, laboring under constant danger of annihilation.

Survey of Youth Movements. An accurate and up-to-date picture of extra-American Jewish youth movements is practically unobtainable at this time. Wherever statistics are given, the year of the latest census is added. Emphasis is laid upon three lands: Germany, Palestine and the United States; the first because of the intrinsic historical interest, the last two because of their present-day importance.

The distinction between the "original" and the "new" youth movements has developed, as has been pointed out, into an almost complete disappearance of the former. Nearly all youth movements today are adult-dominated; and nearly all outside (and most inside) of Palestine have political, religious, educational and athletic rather than socio-economic emphases and motivations. Practically all young people's groups have therefore been included for consideration; and the line has been drawn only where the aspect of "movement" has been too much obliterated (as in the Y.M.H.A. and Center youth groups), where, in other words, a guiding ideology is not present. All youth movements discussed below have two features in common: they have some ideological directives, and they have a program of Jewish cultural revitalization.

Germany. The Jewish youth movement in Germany exhibits a rich and varied development which set in most strongly during and after the first World War, and continued with growing force up to the destruction of German Jewry in 1938. The decisive influence of the general German youth movement on the Jewish persisted even after 1933, testifying to the

strength of the original impact. Corresponding to the political groupings in pre-Hitler Germany, there may be differentiated the Zionist and the German-Jewish (deutsch-jüdische) federations; and according to religious groupings, the Liberal and the Orthodox.

1. POLITICAL. The first Zionist federation in Germany was Blau-Weiss which, organized in 1913, numbered some 3,000 members in its prime and had a tremendous influence on the inauguration of both similar and oppositional organizations in Germany and abroad. It proclaimed itself to be "the army that marches to Palestine," but it soon suffered a serious set-back and ultimate dissolution when many of its Halutzim experienced great difficulties in integrating themselves into the Yishuv. Its successor was the JJWB (Jungjüdischer Wander-Bund), which became the strongest Zionist youth federation in Germany. There followed the Tzofim ("scouts," a secession from the neutral Kadimah), the Tzeire Mizrachi (Orthodox Zionist youth), and the Hehalutz, combining members from all Zionist groups into its ranks, helping them to prepare themselves culturally and vocationally for migration to Palestine. In 1932 Habonim was founded through a combination of the Brith Haolim (the later name of the JJWB) and Kadimah, and also committed itself to the Halutz idea. But it was not until 1933 that German youth in great numbers joined the ranks of the Zionist Movement, which now became the chief medium of practical emigration to Palestine. From them came much of the fifth Aliyah (wave of immigration). The following individual organizations were in existence shortly before the destruction of German Jewry:

The socialist Hashomer Hatzair, Habonim and Hehalutz (by 1936 the last had sent over 8,000 Halutzim to Palestine); the Center groups: comprising the Young People's Groups of the Zionist Organization in Germany, the sport organization Maccabi and its young-scout affiliate, Maccabi Hatzair (which in 1934 had amalgamated the Jüdischer Pfadfinder Bund), the Werkleute (intellectual middle-class Zionists under Buber's and Gerson's influence), and the Brith Yehudim Tzeirim (which developed out of the originally neutral Verband der jüdischen Jugendvereine Deutschlands, and served the smaller communities); the Orthodox Bahad (Brith Halutzim Dathiim) and its youth affiliate, Brith Hanoar shel Tzeire Mizrachi; finally, the revisionist Herzlia (affiliated with the international Brith Trumpeldor).

Among the German Jewish federations two stand out, the DJJG (Deutsch-jüdische Jugend-Gemeinschaft) and the Kameraden, both founded in the 1920's. The latter was most strongly under the impress of the general youth movement, sharing its philosophy, games, songs and love of nature. The events of 1933 brought it into the fold of Zionism (Werkleute). The DJJG, however, even after 1933, continued its opposition to Zionism and the development of German culture among its members. It joined with other groups of similar outlook into the Ring, and was dissolved, by government decree, in 1936. The youth groups of the Schild represented the sport movement in this faction.

2. RELIGIOUS. In 1917 the religiously liberal elements among German youth formed the Arbeitsgemeinschaft jüdisch-liberaler Jugendvereine (Ili), which placed its emphasis on bringing to young people a deeper sentiment for and a keener understanding of religious values in a modern setting. It became part of the Ring in 1933. The Reform Congregation in Berlin also maintained a youth group, as did the strictly Orthodox Agudath Israel. The latter's youth organizations (Esra and Noar Agudathi) were affiliated with the international Tzeire Agudath Yisrael, and found their approach to the upbuilding of Palestine through their religious outlook.

All youth movements in Germany were members of a roof organization, the Reichsausschuss jüdischer Jugendverbände (National Council of Jewish Youth Associations), which was founded in 1924 and which, after 1933, became the official representative of Jewish youth to the government authorities.

Western Europe. Aside from Hehalutz and other international organizations, the outstanding youth movement in France was the Union Universelle de la Jeunesse Juive, founded and guided along Zionist lines by Aimé Pallière (publication, *Halom*). Branches were founded in Belgium and Holland. In the latter country the Joodsche Jeugdfederatie with a membership upward of 1,000 was active. A Scandinavian Jewish Youth Federation was founded in 1919 in Copenhagen, and had branches in Sweden and Norway. *Israeliten* was its literary mouthpiece.

England's youth groups exhibit a picture similar to that of other Western European countries. Her youth movements have lacked the ideological and social zeal as well as the Jewish urge of their German and Eastern European counterparts. The Association for Jewish Youth, numbering 15,000 members in 1939 and embracing youths from eight to eighteen, had little or no Jewish content and was in the main a club association. Likewise the Union of Jewish Literary Societies and its corollary, the Union of Young Israel Societies (1,000 members in 1939), are associations rather than movements. Attached to the synagogue, they draw their membership from middle class congregations. The Council of Orthodox Jewish Youth Societies (Sinaist Organization, Young Mizrachi, Tifereth Bahurim, and others) and the Inter-University Jewish Federation are numerically rather weak. The strongest force in 1943 as a "movement" was the Federation of Zionist Youth, which published *The Young Zionist* and showed signs of promise for an active and youthfully independent expression of Judaism. Of its members, Hashomer Hatzair had of late gained in strength, as had Habonim (publication, *Itton Habonim*) and Hehalutz (publication, *Alumoth*), while Maccabi gave direction to the Jewish sport movement. This recent activization, particularly of Zionist youth, expressed itself in the formation of the Institute for Jewish Youth, and is in no small degree due to the Nazification of Europe and to an influx of continental refugees.

Central Europe. Central European youth groups generally subscribed to the Zionist program. International Zionist federations like Hehalutz and Hashomer Hatzair (founded in Vienna) had their branch organizations everywhere. Austria, before the Anschluss, had a Blau-Weiss group and the Brith Hamishmar, which was, like the German JJWB, affiliated with the international Brith Hanoar, as was the Czech Jewish Socialist Youth. A Czech Techeleth-Laban (Blue-White) carried on a more middle-class Zionist program. All Central European countries had strong Maccabi groups which sent representatives to the first and second Maccabiad (Jewish Olympic Games in Tel-Aviv and Haifa, 1932 and last in 1935, when the Austrian Maccabi placed first among over twenty national representations). In Switzerland both Hashomer Hatzair and Hehalutz were active in 1943 (the latter had its international offices in Geneva in that year), as was the Brith Hanoar, an affiliate of the Orthodox Torah Vaabodah movement. A Federation of Zionist Youth was also in existence in 1943.

Eastern Europe. The following was the picture up to 1939: First among the movements was the Hashomer Hatzair, which was founded in Vienna, during the first World War, by refugee students from Galicia, and which immediately spread back to and through the east. A Zionist pioneer movement with strongly

marked Hebraic and radical social tendencies, it had, in 1939, about 65,000 members throughout the world, and upward of 35,000 in Poland and Roumania alone.

Other Zionist groups with their youth affiliates soon followed its lead, and made the Eastern European Jewish youth movement the most active in the Diaspora. From its ranks came the majority of the third, and a goodly part of the fourth and fifth Aliyah. The youth groups of the Poale Zion were Freiheit (Dror) and the Poale Zion Jugendverband; and of the Zeire Zion, Gordoniah. They stayed apart even after the parent organizations had combined. Freiheit, although found in Palestine today, had less of a Halutz viewpoint than Gordoniah (about 8,000 members before the second World War) which subscribed to A. D. Gordon's "Religion of Labor" philosophy and was Hebraistic in its cultural outlook.

The most important of all groups from a practical standpoint was Hehalutz (with its younger affiliate, Hehalutz Hatzair). Existent in all countries, it combined in its ranks members of most other Zionist youth movements and prepared them for migration to Palestine. It was, at the outbreak of the second World War, Jewry's greatest single pioneer agency.

The Revisionist outlook was finding increasing support among the young people (Hashomer Haleumi, Hehalutz Haleumi, Betar); and of the religious movements, Mizrachi as well as Agudah groups were particularly strong in most Eastern European countries. The Agudath Hanoar Haibri had a general Zionist and cultural character; while the Bund youth groups followed a non- or even anti-Zionist policy, with a Yiddishist and radical socialist program. In the early days of the youth movements Russian Jewish youth played a conspicuous part, supplying much of the social drive; today the Jewish content of the Komsomols hardly goes beyond the use of the Yiddish language.

Outside of Europe. Zionist youth groups are found in most countries with a substantial Jewish city population. They exist in many South and Central American countries (Hehalutz, Maccabi, Betar, Hashomer Hatzair—the latter, for example, in Cuba, Mexico, Argentine and Chile) as well as in India (Habonim, which publishes *Kol Habonim* in Bombay). South Africa has its Young Mizrachi (publication, *Young Mizrachi Exponent*) and Habonim, which is here, however, an exponent of General Zionism, and not of the Zionist Labor Movement (publication, *Habinyan*). Maccabi, too, is fairly strong, and in 1935 sent a successful team to the Maccabiad in Palestine. A Zionist Youth Council with headquarters in Johannesburg publishes *The South African Menorah*.

Palestine. The strength of Jewish youth movements was most clearly demonstrated in the upbuilding of Palestine, whither they carried much of their social idealism and found an opportunity of translating it into reality. Palestine has been built by young people who were, most of them, products of youth movements in their native countries. Quite naturally, they proceeded to transplant their organizations into the Land of Israel, and henceforth their influence spread back to their old Diaspora groups. Today, Zionist youth movements throughout the world are in close contact with and ideologically in a large measure dependent upon the movements in the Yishuv. The following international organizations had their groups, and many of them their headquarters, in Palestine in 1943:

Political: Hanoar Haborochovi (left socialist, in nine countries before the War); Hashomer Hatzair (Marxist philosophy, sponsors *Kibbutz Artzi*, eighteen countries); Dror (Freiheit in Eastern Europe, orientated toward Poale-Zion-Hithahduth; sponsors the Kibbutz Meuchad; eleven countries); Gordoniah (affiliated in Palestine with Mapai; sponsors the Kvutzah collectives; ten countries); Hehalutz Hatzair (youth under eighteen who in Palestine graduate into Hanoar Haobed [see below] and into Hehalutz outside of Palestine); Hanoar Hatziyyoni Aleph (of the non-socialist faction of the Histadruth; twenty-five countries); Hanoar Hatziyyoni Beth (affiliated with the General Zionists, five countries); Brith Hakanaim (State Party youth, five countries); Betar (Brith Trumpeldor, Jabotinsky's separatist Revisionists).

Orthodox: Torah Vaabodah (affiliated with international Mizrachi); Tzeire Agudath Yisrael (affiliated with the international Agudath Israel movement).

Scout and Sport Movements: Hashomer Hatzair Tzofi-Halutzi (founded in 1930); Hapoel (sport organization of the Histadruth); Maccabi (dedicated to cultural and physical education; had in 1939 groups in thirty-four countries with a membership of over 200,000); Maccabi Hatzair (its scout affiliate in ten countries); Akiba (scout movement with emphasis on cultural Zionism; in three countries).

The following youth groups existed in Palestine only in 1943. They give further evidence of the tremendous stratification of the Yishuv, and at the same time expose the great danger that its youth may give itself to ideologies more than to ideals:

Hanoar Hamarxisti (left Poale Zion study circles); Habacharuth Hasotzialistith ("Socialist Youth," affiliated with Mapai); Hanoar Haobed (youth section of the Histadruth); Mahanoth Haolim (academic youth, in support of the Kibbutz Meuchad); Bnai Akiba (youth movement of the Poel Hamizrachi) and Elitzur, its sport group; Brith Hashmonaim and Brith Hanoar Hadathi (Orthodox youth groups; the former with Revisionist policies, the latter recruited from German immigrants); Histadruth Hatzofim (educational and scout activities, supported in part by the American Young Judeans, through the Keren Hanoar); other smaller scout groups like Bnai Zion, Adath Hatzofim, and Degel Zion (for Oriental Jews, mostly Yemenites); Wizo Hatzeirah ("Young Women's Zionist Organization").

Most of the youth movements in Palestine which are of international character belong to the Mercaz Hanoar, the Palestinian equivalent of territorial councils established in twelve countries after the Zionist Congress in Zurich in 1937. The main object of the Mercaz is vigorous support of the Jewish National Fund, a project common to all Zionist youth movements.

In 1940 the working youth in all Palestine numbered about 10,000, and school youth about 68,000 (aged three to twenty). Of the total of less than 80,000, about 25,000 were organized into youth groups affiliated with the World Zionist Organization; 5,000 belonged to the Revisionist and other independent factions. Altogether, about 38 per cent of Palestinian youth are organized; half of them in sport and scout, the other in political and educational movements. Strongest single groups are Hanoar Haobed, with 6,000 members (publication, *Bamaaleh*); Hapoel, with 6,000 (publication, *Sport Laam*); Maccabi; Maccabi Hatzair (publications of like names); and Tzofim (publication, *Hatzofeh*), with 3,000 members each.

United States and Canada. North American Jewish youth is heterogeneous in American background as well as in Jewish outlook and also Jewish interest, and therefore exhibits a great multiplicity of separate and disconnected organizations. There were about 350,000 organized youths in 1943, which includes the affiliates of the Jewish Welfare Board (center groups), but is exclusive of school fraternities and sororities as well as of the membership of general scouting or social clubs. This means that about 32 per cent of American Jewish youth belonged in that year to youth "groups," as compared to 38 per cent affiliated in Palestine. However, only half, or 16 per cent, belonged to youth "movements," since the 175,000 organized in the center groups can not properly be so designated. Of the movements, over 80 per cent were either sympathetic to or affiliated with Zionism, and a similar percentage

subscribed to a religious program. All of them stressed the revival of Jewish culture.

Due to the standard of economic and political security enjoyed by American Jewry, its youth movements have had much less of the Halutz ideology than is found in other countries; and most of them have not only the furtherance of Jewish culture but also its permanent integration into the American way of life as one of their major objectives.

For reasons stated in the introduction to this survey, American youth has lacked the spontaneous social urge, and where Jewish groups were formed they were derivative rather than original. This was in no small measure due also to the fact that until a few years ago American Judaism as a whole had not as yet developed its own spiritual resources, and relied greatly upon its old world heritage. Most youth groups arose in response to adult ideologies and pressures, and many of them are financially sponsored by adult organizations. Among these are five major national inter-sectarian organizations with a general educational, social and philanthropic program:

The AZA (Aleph Zadik Aleph), the Junior B'nai B'rith which was organized in 1924 and had (1943) a membership of about 11,000 between the ages of fifteen and twenty-one. It has a general recreational and educational program which includes support of specific Zionist projects. Chief publication, *The Shofer.*

Hillel Foundations of the B'nai B'rith, organized in 1923; educational, social and religious activities on college campuses, reaching, in 1941, about 30,000 students. Publications: campus papers.

Young Circle League, about 3,000 members, affiliate of the Workmen's Circle, labor-orientated, but not definitely political.

Intercollegiate Menorah Association, which is dedicated to the advancement of Jewish study and culture on the campus and publishes *The Menorah Journal.*

National Council of Jewish Juniors, membership about 9,000, affiliate of the National Council of Jewish Women, following its civic and educational program.

Zionist youth in North America runs the gamut from radical Left to Revisionist Right orientation.

Hashomer Hatzair came to America in 1927, and has the program of the international movement: auto-emancipation through self-realization in the collective life of Palestine. Chief publication, *Hashomer Hatzair* (*Youth and Nation*).

Habonim, youth affiliate of the Poale Zion-Zeire Zion, the Jewish National Workers' Alliance, and the Pioneer Women's Organization; absorbed Gordoniah in 1938, with the latter's socialist-Zionist outlook. Chief publication, *Haboneh.*

Hadassah and the Zionist Organization of America (General Zionist, middle-class policy), with four affiliates: Young Judea, oldest American-Jewish youth movement (1909), with 20,000 members and 1,000 leaders, for youths twelve to eighteen years of age; with a strong program of American-Jewish integration, in addition to its Zionist education. It supports the Tzofim in Palestine through its Keren Hanoar project. Its boy graduates enter Masada, which has been weakened severely by the military emergency; its girl graduates, Junior Hadassah (16,000 members, maintains Meir Shfeyah colony in Palestine); both boys and girls enter the co-educational Avukah (i.e. Torch) on the campus, the latter, from 1935, subscribing to a fairly radical political program. All four groups are guided by the National Zionist Youth Commission which is composed of representatives of the two adult bodies, and allocates contributory funds as well as supervises educational policies. Chief publications: *The Young Judean, Masada News, Hadassah Newsletter, Avukah Student Action.*

Hehalutz maintains two farms in the United States and, from 1930 on, sent about 400 Halutzim to Palestine.

Both Hapoel Hamizrachi and its scout affiliate, Hashomer Hadathi, follow the program of Torah Vaabodah ("religion and labor"), while the Agudath Israel Youth Council represents the separatist, but middle-class and extremely Orthodox Zionist element. Chief publications: *The Horizon, Hamigdal, The Jewish Life.*

Separatist also is the American branch of Betar (Brith Trumpeldor), with 3,500 members. Chief publication, *Hadar.* Most aforementioned Zionist groups maintain Hachsharah or other educational camps for their members, and a number of them are organized into the Council of Zionist Youth Organizations.

Among the mainly educational organizations, two stand out: Young Israel, organized in 1912, with 10,000 members and a traditional religious outlook as well as a non-partisan Zionist program; and the Histadruth Hanoar Haivri, a purely educational Hebrew culture movement for young people. Publications: *Young Israel Viewpoint* and *Niv.*

The two synagogue youth movements in the United States and Canada are the Young People's League of the United Synagogue and the National Federation of Temple Youth. The former, organized in 1921, comprises nearly 400 youth groups affiliated with Conservative congregations, and shares their religious and educational program. The latter, organized in 1939, has seventy-five youth groups and 12,000 members, and is affiliated with the Union of American Hebrew Congregations (Reform). It shares its program, emphasizing religious, social and civic activities, and gives a National Service Award to its individual members for outstanding achievements in synagogue, group and war service, and education. Chief publications, *The National YPL,* published by the Young People's League of the United Synagogue, and *The Messenger,* the latter a monthly bulletin published in place of the discontinued *The Youth Leader* by the National Federation of Temple Youth.

Minor national organizations include Yardoniah and the State Party youth groups (Revisionist); several Maccabi chapters and the American Jewish Club (communistic tendencies). In addition, a host of individual youth organizations are in existence throughout the continent.

Two major attempts have been made to create an agency for *all* Jewish youth groups. In 1934 the Youth Division of the American Jewish Congress was founded, which succeeded in affiliating several national youth organizations, and also accepted individual members who organized into Congress youth chapters. In 1943 the latter type of membership was predominant, the attempt at coordinating the majority of Jewish youth movement having failed so far.

In 1939 the National Jewish Youth Conference was founded by fifteen organizations and proclaimed as its purpose: "The creation of a forum where the various national youth organizations may meet without sacrifice of their individual autonomy, to discuss Jewish problems of common interest, to consult with one another concerning them, and to act in concert on practical procedures where sentiment for united action emerges." Up to 1943 the Conference had remained largely a paper organization.

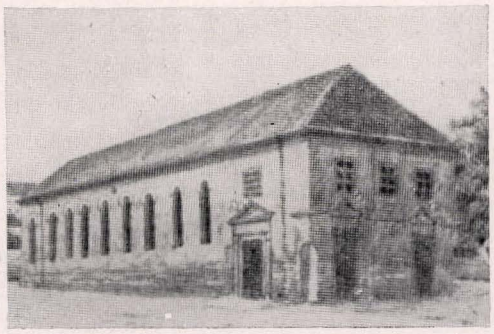
International Youth Federations have been mentioned in the text. Of the three largest, Hehalutz had its headquarters in 1943 in Geneva; Maccabi in London; and Hashomer Hatzair in Merchaviah, Palestine.

No world federation of Jewish youth exists. Closest to it comes the (Zionist) Supreme Council of International Youth Federations which cooperates with representatives from the adult Zionist bodies through the Joint Committee for Youth Affairs, and has its seat in Jerusalem. For England and America an additional Palestine Council for Anglo-American Youth was established to deal with their special problems; it, too, was located in Jerusalem in 1943.

W. GUNTHER PLAUT.

Lit.: The best summary of general youth movements is Hans Kohn's article in the *Encyclopaedia of the Social Sciences,* vol. 15 (1935) 516 et seq. A comprehensive bibliography of recent American general youth literature was published

by the American Council on Education: *American Youth, An Annotated Bibliography,* edit. Menefee and Chambers (1938). On Jewish movements: Kanowitz, S., "Jugendbewegung," *Encyclopaedia Judaica,* vol. 9 (1932), col. 585 et seq.; *Dareche Hanoar,* edit. G. Hanoch (1937). On Germany: *Gemeinschaftsarbeit der jüdischen Jugend,* published by the Reichsausschuss der jüdischen Jugendverbände (1937); Reissner, Hanns, "Der 'Blau-Weiss,'" *Der Morgen* (1933) 347 et seq. Europe: Bistritsky, Nathan, *Bitzur Hanoar* (1938). Palestine and Zionism: Kanowitz, S., *Zionistische Jugendbewegung* (1927); Bardin, Shlomo, *Pioneer Youth in Palestine* (1932); *Pirke Hapoel Hatzair,* edit. Shochat and Shurer (13 vols., 1934 et seq.); *Moladeti,* published by the Jewish National Fund (with statistics and addresses, Jerusalem, 1941) 192-95; *Bemaarechoth Hanoar,* published by the Palestine Foundation Fund (Jerusalem, 1941; it contains some recent information about European youth). United States: *Jewish Youth—Challenge and Promise,* published by the Department of Youth and Education of the Zionist Organization of America (edit. S. Blumenfield, 1941; with a selected bibliography); "Aspects of American Jewish Youth Problems," *Proceedings of the National Conference of Jewish Social Service* (1936) 54 et seq. A prodigious amount of literature is scattered in pamphlets, year books and periodicals of the individual organizations, as well as in numerous magazine articles.



YUDGHAN (supposedly a Persianized form of Judah), founder of the sect of Yudghanites; he lived, presumably at Ispahan (rather than Hamadan), in Persia, in the first half of the 8th cent.

The earliest and most reliable data on this obscure sectarian are supplied by the Karaite writer al-Kirkisani (first quarter of the 10th cent.), who speaks as follows: "After Abu Isa al-Isfahani appeared Yudghan, whom his followers call 'The Shepherd' (in Arabic *al-Ra'i*), meaning that he was the shepherd of the (Jewish) people. He is said to have been a pupil of Abu Isa. He claimed to have been vouchsafed (the gift of) prophecy, while his followers say that he was the Messiah. They say that he never died, and they expect him to return. The Yudghanites forbid the consumption of meat and wine, and observe a great many prayers and fasts. They say that the Sabbath and the holy days are no longer obligatory upon them, but are merely memorials (of the past); some Karaites follow them in this belief." From this account are probably derived (directly or indirectly) all later notices of Yudghan, both in Karaite and in Mohammedan literature (in the works of al-Shahrastani and al-Biruni), and the additional information, often distorted, given in them is therefore, pending confirmation from older and as yet undiscovered sources, to be regarded with suspicion. According to these later accounts, Yudghan acknowledged the prophetic mission of Jesus and Mohammed; he is said also to have asserted the freedom of the human will (as opposed to the doctrine of predestination) and to have advocated the allegorical interpretation of anthropomorphic passages in the Holy Writ; the two latter doctrines are identical with those of the Mutazila school of Mohammedan theology.

The ascetic rigor of Yudghan's teaching attracted, naturally enough, only a limited number of followers, and in al-Kirkisani's time only a score or so of Yudghanites remained in Ispahan. The sect seems to have been eventually submerged into the more numerous sect of Ananites, founded by Anan (the titular father of the Karaite synagogue), who in their turn were finally incorporated into official Karaism; in any case, the same monastic tendencies are clearly visible in some of Anan's teachings.

Al-Shahrastani tells of a disciple of Yudghan, named Mushka, who founded the sub-sect of Mushkanites, and attempted unsuccessfully to recruit new converts by threat of armed force; the movement assumed the character of a political insurrection and was quickly exterminated by the Mohammedan authorities. The entire story, as well as the unusual name of Mushka, is highly suspicious and may have little, if any, foundation in historical fact. LEON NEMOY.

Lit.: Al-Kirkisani, *Kitab al-Anwar,* edited by Leon Nemoy, vol. 1, pp. 12-13, 52-53 (English rendering in *Hebrew Union College Annual,* vol. 7, pp. 328, 383); Graetz, H., *Geschichte der Juden,* 3rd ed., vol. 5, pp. 446-47.

The old synagogue in Belgrade, Yugoslavia

YUGOSLAVIA. Yugoslavia, the "country of the South Slavs," was welded together after the first World War when the National Assembly of the former Hungarian provinces of Croatia and Slovenia proclaimed their independence and a National Council was established in which representatives of other Slav states of the dissolved Austro-Hungarian Empire—including Bosnia and Herzegovina, Dalmatia, Carinthia, Carniola and Southern Styria—were admitted. Subsequently a union with Serbia and Montenegro as the Triune Kingdom of the Serbs, Croats and Slovenes became effective on December 29, 1918.

1. Before 1918. The settlements of Jews in the territory of the present-day Yugoslavia go back to antiquity. There were Jews in the province of Illyria as early as the times of the Romans. When Fran Bulić conducted excavations at Salona, the former great commercial town of Roman times in the vicinity of the modern Split (Spalato), he found the remains of a Jewish cemetery from the 3rd cent. The president of the Yugoslavian academy, Vladimir Mažuranić, in his posthumously published book *Gebalim,* agreeing with the hypotheses of earlier investigators, endeavored to prove that Mar Saul and Mar Joseph, who conveyed the letter of Hasdai ibn Shaprut to the king of the Khazars, was a member of an embassy of Krešimir, king of the Croats. The Byzantine writer, Johannes Kimanos, mentions a tribe of "Halissoi."

These facts, the Jewish names of places and persons that can be shown to have existed in Dalmatia even in the early Middle Ages, various folk tales, and the presence of the former Gnostic sect of the "Bogumili," warrant the conclusion that in present-day Yugoslavia, as in Bulgaria, there were certain Slavic tribes which became converted to Judaism. Zagreb (Agram) had a Jewish community of its own soon after it was founded; the acts of the court there mention Jews from the neighborhood, so it may be assumed that at least a part of these were the descendants of such proselytes.

Slovenia had Jews as early as the 12th cent. Valvasor reports that in 1213 the Jews of Laibach (Ljubljana) rebuilt their synagogue, which had been destroyed by fire. The principal community was that of Maribor (Marburg). There the Jews had their own quarter of the city with a synagogue and a Jews' tower, a Jews' judge and a Jews' master, whose activities for a time extended to the neighboring communities as well. Fa-

mous rabbis, such as Amshel Marburg and Israel Isserlein (1427-35), held office in Marburg.

We know also of Isaac Zarfati, who sent his famous circular letter from Adrianople about 1470 to 1480; it was addressed to the Jews of Austria and Germany, and invited them to emigrate to Turkey. The Jews of Slovenia were for the most part engaged in agriculture and viticulture, and dealt also in horses and wines. They were on good terms with the rest of the population, especially the nobility and the clergy; it was only the commercial cities that were not well-disposed toward them. However, there was eventually an expulsion of the Jews, from Styria in 1496, and from Carniola in 1519. Some of the exiles settled in the nearby communities, the present-day Burgenland. After the beginning of the 19th cent. their descendants often emigrated to Zagreb, Varaždin (Warasdin), and other cities of Croatia. Many of the Jews of Marburg emigrated to Italy, where they took the name "Morpurgo," while others went to Moravia and Galicia. The Jewish community in Zagreb disappeared at the same time as the Jews were banished from Slovenia.

It can be proved that Jews were continuously in Dalmatia from the times of the Romans to the present day, especially as regards the two communities of Split (Spalato) and Dubrovnik (Ragusa).

Jews were in Serbia in the early Middle Ages, although not in large numbers. Jewish settlements in Bitolj, Ochrid, Štip, Struma and Priština are attested by folk traditions and rabbinical literature. Belgrade (Beograd) also had an old Jewish community, which grew steadily as a result of the influx of fugitives from Germany and Hungary. At the beginning of the 16th cent. numerous exiles from Spain and Portugal immigrated by way of Salonika and Dubrovnik. In this manner the large Sephardic communities in Belgrade, Skoplje (Uskub), Monastir, Sarajevo and Travnik arose. The spiritual center of all these communities was Salonika. Belgrade became a city known to all Jewry because of its rabbis, Judah Lerma, Simhah Koen and Joseph Almosnino. It had close connections not only with the community of Ofen, which at that time was likewise under Turkish rule, but also with Amsterdam. When Eugene of Savoy captured Belgrade, an Ashkenazic community arose there too.

After the peace of Požarevac (1718), Belgrade was restored to the Turks, and the community adopted the Sephardic ritual. Since the peace treaty permitted Turkish subjects to stay in the Hapsburg empire, a Jewish community arose in Zemun (Semlin). The most important of the rabbis there was Judah ben Solomon Hai Alkalay, the well-known champion of Zionism. In Belgrade the Jews lived in a special quarter of the city, "Na Jaliji" and "Djordjol"; they created their own trade corporation, the delegates of which subscribed themselves "Por los Mercaderes Judios."

However, the wars brought about continual disturbances, and in 1846 the Jews were no longer allowed their former freedom of trade and were forbidden to stay in the province. Eventually the great powers intervened in their behalf, but conditions took a turn for the better only when Serbia became an independent kingdom.

In Croatia and Slavonia the Jews were forbidden to stay on the ground of Article XIX of the Law of 1729. Yet as early as the middle of the 18th cent. they immigrated sporadically into that portion of Croatia which was not under military control but was governed by the banus (or ban, the royal lieutenant or governor-general of Croatia). Jewish community life gradually developed despite the hostility of the guilds and magistrates. But the "military frontier" was still closed to them for a long time.

The oldest community was that of Varaždin (Warasdin), where the first Jews settled in 1777. In 1793 they leased a room in the tower of the city castle for the purpose of holding services. Subsequently communities were formed in Zagreb (Agram), Karlovac, Cernik, Našice, Vukovar, Virovitica, Osijek (Esseg) and Požega. In time the use of the Croatian tongue became more widespread among the Jews.

Zionism brought a great change for the better in Jewish life in Croatia and Slavonia; nearly all the young people joined the movement after Theodor Herzl's appearance. The Zionist movement, which was under the leadership of David Alkalay in Serbia and Alexander Licht in Croatia, had its own organ in the *Zidovska Smotra* of Agram. The founding of the Yugoslavian state in 1918 brought under one government all these territories, with their different languages and civilizations. LAVOSLAV ŠIK.

2. After 1918. According to the first census of 1921, there were in Yugoslavia 64,746 Jews, constituting .46 per cent of the total population. The second census of March 31, 1931, however, revealed an increase to 76,654, or 18 per cent during this decade. In conformity with the general trend of Jews toward urbanization, those of Yugoslavia were concentrated in the larger cities, such as Zagreb with 12,315 (or 6.6 per cent of the total), Belgrade with 8,936 (3.5 per cent) and Sarajevo with 8,090 (10.3 per cent). Two-thirds of the Jews, numbering 47,244, were of Ashkenazic, or East European, origin. The Sephardim, residing in Belgrade, Southern Serbia and Bosnia, numbered 26,459, and there were also 2,951 Jews who formed a separate Orthodox group.

The economic structure of the Jews was by no means uniform throughout the country, conditions differing from province to province in accordance with the varying standards of the local populations. Concerning their occupational distribution there were no official figures. It was established, however, that agriculture absorbed 3 per cent, commerce 37 per cent, handicraft 13 per cent, industry and finance 2 per cent, liberal professions 8 per cent, white-collar workers 25 per cent, and miscellaneous 12 per cent.

Geographically and culturally the Jews of Yugoslavia fell into four groups (corresponding to the four areas out of which the united kingdom was constituted in 1918), i.e.

1. The Jews of Croatia and Slavonia, and of Banat and Bacska, formerly part of Hungary. These were Ashkenazim, and constituted two-thirds of the entire Jewish population. Modern and, to a certain extent, assimilated, they were both intellectually and economically in advance of their coreligionists in other areas. They possessed mills, banks, department stores, and lumber yards. Only a small proportion of them depended upon charitable assistance. The Jews of Banat and Bacska were more Magyarized, while the Croat and Slavonian Jews were pro-Slav nationalists.

2. The Jews of Bosnia and Herzegovina, formerly under Austro-Hungarian rule (1878-1908). In that province the Jews, chiefly Sephardim, dominated as middlemen and small traders. In recent years they also penetrated the liberal professions. For the most part, however, they were shoemakers, tailors, plumbers, longshoremen, and the like, and their standard of living fell far below that of the Western world. A large number of these Jews lived in Bosnia, especially in Sarajevo, where there was a strained political atmosphere, involving constant clashes between the Islamic, Greek Orthodox and Croat Catholic populations.

3. The Jews in Serbia. Mainly Ashkenazim, these represented a substantial middle class, consisting of small storekeepers, merchants, white-collar workers and exporters, as well as physicians, lawyers, architects, bankers and a few large industrialists. They were an industrious element, contributing greatly to the cultural and economic advancement of the country. They were greatly assimilated, and some, such as Pachu, minister of finance, held high political and military positions.

The graves of famous rabbis in the old Jewish cemetery at Spalato, Yugoslavia

4. The Jews of Macedonia (annexed in 1920). This group consisted mainly of Sephardic and Oriental Jews and was, in marked contrast to the others, uncultured and poverty-ridden, living in ghettos.

Jewish Community Life. Owing to Zionist initiative, the 121 Jewish communities (seventy-two Ashkenazic, thirty-six Sephardic and thirteen Orthodox) with their 68,107 members formed a Federation of Jewish Communities (Savez Jevrejskih Veroispovenih Opstina). By a law, passed on December 14, 1929, regulating the relation of the Jewish community to the state, the Federation was officially recognized and was granted full autonomy in religious matters. It was, however, under the supervision of the ministry of justice, and received a government subvention. The Federation's president, its officers and delegates to the conference were democratically elected. The Zionists constituted, with 191 out of 200 delegates, 95 per cent of that body. The president was Friedrich Pops, vice-president of the Zionist Organization of Yugoslavia, and the secretary was Simon Spitzer (executed by the Nazi Germans in December, 1941).

The Zionists scored a great victory in the elections of the Belgrade Sephardic Community in June, 1938. David Albala, vice-president of the Zionist Organization and president of the Jewish National Fund in Belgrade, became president of the community, and the president of the Palestine Foundation Fund (Keren Hayesod), Samuilo Demajo, became vice-president.

The board of governors, together with the administrative committees of the Jewish communities of Zagreb, Belgrade, Sarajevo and Subotica, nominated three candidates for the office of chief rabbi and submitted this list to the minister of justice, who selected one candidate, finally appointed by the king. The chief rabbi, who was addressed as "Eminence," held equal rank with the Greek Orthodox Patriarch, the Catholic archbishop and the Moslem leader, the Reis ul Ulema.

The literary and intellectual life of the community was advanced also by the work of a special association of the rabbis of the entire kingdom (thirty-six rabbis and forty-one Hachamim), formed on October 17, 1923. Isaac Alkalay was elected president, and shortly thereafter was appointed chief rabbi of Yugoslavia. The association published a year book, *Jevrejski Almanah,* edited by Rabbi Leopold Fischer of Vrsac.

Of significance for Yugoslavia's Jewry were the theological seminary and teachers' institute in Sarajevo, established in 1928 and headed by the historian, Rabbi Moritz Levy, and the imposing community center in Belgrade, founded in 1929.

On the other hand, international developments naturally aroused among the Jewish population fears of internal repercussions, and this found expression in mass conversions to Christianity. Thus, 300 wealthy Jews who, although only 3 per cent of Zagreb's Jews, had hitherto provided one-third of the Jewish community's tax income, were baptized in that city alone. Indeed, these conversions assumed such proportions as to persuade the Congress of the Protestant Church on April 5, 1939, to impose severe conditions on baptism. The Congress demanded a one-year trial period before the conversion became effective.

Anti-Semitism. Anti-Semitism in Yugoslavia was only a recent and alien growth, due almost entirely to Nazi influence. Moreover, it did not represent any genuine feeling on the part of the masses, but was the creation only of political exigency and pressure.

King Alexander, who was assassinated at Marseille, France, in 1934, was an avowed friend of the Jews, while his cousin, the English-educated Prince Paul, who subsequently headed the Regency Council, managed at first to resist the German pressure, suppressing all attempts to fan racial hatred. Later, however, as the economic stranglehold of the Reich increased (in 1939 Nazi Germany controlled 32.5 per cent of the import and 39.9 per cent of the export trade), the government was obliged to walk the tightrope of political expediency and, while overtly professing its championship of the Jews, to countenance the subtle encroachment of anti-Semitism. Fascist attempts to introduce anti-Semitism into the national life met with little official encouragement, in spite of Nazi pressure.

Nevertheless, the virus percolated to an ever-increasing degree into the intellectual circles of the urban centers, especially the students, and proceeded thence to infect public offices and ministries. State and municipal contracts, for instance, were withheld from Jews on the flimsiest pretexts, while positions as officials or communal agents were also denied them. Some 400 Jewish public officials, who had been appointed during the early days of the kingdom, were likewise gradually eliminated, while the intricate system of fiscal taxation was operated to the detriment of the Jews.

Anti-Jewish Legislation. All these measures, however, were extra-legal, and it was not until late in 1940 that legislative curbs on Jews were introduced. By a decree of October 5th, licenses previously granted to wholesale food concerns owned or financed either wholly or partially by Jews were summarily discontinued, renewal of them being left to the discretion of local authorities. The latter were further empowered to place state commissioners in charge of those concerns, the licenses of which were revoked, to see that these enterprises were liquidated within two months. Punishment up to two years' imprisonment and a fine of 500,000 dinars were provided for violation, with internment and forced labor for repeated violation.

A further decree of the same date restricted Jewish pupils in state schools to the proportion of Jews in the population, exceptions being granted only in the case of children of war veterans or of those who had been of service to the state. Foreign Jews were barred alto-

gether from secondary schools. Finally, under a new decree, all Jews were excluded, in mid-October, from printing, publishing and newspaper concerns, and from bookstores. This action followed expulsion of Jews from motion picture, theatre and broadcasting concerns.

Reaction to Anti-Semitism. It was reported that dissension prevailed among Yugoslav cabinet members over the Jewish issue. Some of them were understood to have threatened to resign if the government embarked on a large-scale anti-Semitic program. Nor was the opposition confined to government circles. On April 24, 1939, the democratic students of the University of Belgrade (90 per cent of the entire student body), in a special issue of their journal, *Mladost* (Youth), condemned anti-Semitism, and appealed to the entire youth to combat racialism as the "grave of civilization," while on October 9, 1940, at a meeting of the Yugoslav Society of High School Professors, resolutions were adopted condemning the limiting of Jewish students and teachers as unconstitutional and unfair.

After the Outbreak of the Second World War. Charging that the War had been forced on Germany by "British Imperialism and Jewish capital," Adolf Hitler, on April 6, 1941, hurled his mechanized legions against Yugoslavia, which grimly prepared to resist the invasion. While the country speeded mobilization, representatives of all Jewish communities and organizations convened in Belgrade and pledged maximum aid and cooperation to the government. During the military operations, more than 700 Jews were killed, and scores of synagogues and Jewish community centers were destroyed in a series of savage air raids which reduced Belgrade to a city of fire and ruins, it was reported on April 14, 1941. Many lost their lives when they sought protection in the city's famous Oneg Shabbos center, headquarters of local Zionist and women's organizations. All were buried under tons of debris when the building was hit by a bomb.

Following the Nazi occupation, Nazi officials, on April 20, 1941, ordered Jews to appear at Gestapo headquarters with all their jewelry and valuables. A warning was issued that those who failed to report voluntarily would be shot. The occupation of Yugoslavian cities had no sooner begun than the Gestapo walked in and took control. They came armed with lists of Jews to be arrested. Indeed, wholesale arrests of Jews and other pro-British elements preceded the arrival of Heinrich Himmler, chief of the secret police. As the result of this, a wave of self-destruction broke out. Among those who preferred death to surrender were several who had played conspicuous and important parts in the Jewish life of the country, such as Samuel Pinto, president of the Sarajevo Sephardic Congregation, and Rabbi Uhrbach, head of the Ashkenazic community in the same city.

In so-called old Serbia, a decree of May 20, 1941, established the legal status of Jews. Jews were excluded from all cultural activities, from the press, literature, the film industry and the theatre. They were eliminated also from the liberal professions, with the exception of a small number of physicians who were permitted to treat Jewish patients. Significantly, the decree was entitled: "Law on Jews and Gypsies." Children of mixed marriages were also defined as Jews if they belonged to a Jewish communal organization prior to April 5, 1941. All Jews were obliged to wear yellow badges bearing the inscription "Jew."

All Jewish bank accounts were blocked, Jews were forbidden to remove valuables from safe deposit boxes, and they had to make an inventory of all their property. All men between fourteen and sixty years of age were subjected to forced labor. Jews who left their homes during the War were not allowed to return. Between 8 P.M. and 6 A.M. Jews were not permitted to be seen on the streets. They were barred from theatres, restaurants and other public places, and a system of registration of the Jews was established. Hundreds of Jews were shot for alleged acts of sabotage and, after the outbreak of the Russo-German war (June 23, 1941), as alleged Communists.

In Macedonia, the situation did not differ greatly from that in old Serbia.

The fate awaiting the 29,000 Jews in Croatia was best illustrated by the fact that one of the leaders of the new "free" Croatian state was Ante Pavelitch, an Italian-financed terrorist, who was convicted in absentia of complicity in the assassination of King Alexander and who subsequently fled to Rome. In a special broadcast to the Croats on April 14, 1941, Pavelitch declared that the new government would confiscate the property of Zagreb's 12,000 Jews and distribute it equally among the Croats. By order of Pavelitch, the offices of the Zionist Organization and of other Jewish communal organizations in Zagreb were sealed on April 21st, Nazi troopers being posted at the doors.

The Germans initiated their regime by issuing an order on April 20th, requiring Jews in Croatia and in captured territories to deliver the keys of all community centers, synagogues and institutions to the local military headquarters. On the same day, Jewish business men in Croatia were instructed to compile lists of their possessions and to turn over to the Nazis duplicate keys of their enterprises and safes. This order, it was believed, foreshadowed a Nazi move to expropriate all Jewish-owned property. The largest synagogue in Zagreb was demolished.

It is difficult to estimate the number of Jews killed by the Croatian government. The Jews sought various forms of escape. It was stated that nearly all Jews in Croatia became converted to Catholicism. Even if this was of no great value in Croatia itself, it helped those who succeeded in escaping to Italian-occupied territory, where 5,000 Croatian Jews were reported.

A special category of "honorary Aryans" was introduced by legislation, and thousands of Jews petitioned for that status. It is interesting to note that marriage to a Jewess did not in any way affect the status of a Croatian. The reason for this seeming liberalism was that the leaders of the Croatian regime (Pavelitch, General Kvaternik, the commander in chief of the Croatian army, and Minister Janitch) were married to Jewesses.

The loyalty and courage of Yugoslavian Jewry is demonstrated by the fact that among the fighters in the Serbian guerrilla army, headed by General Draga Mihailovitch, there were many Jews in 1943, and also a special Jewish Patriot Brigade. Many members of the latter were former prisoners of concentration camps liberated by Chetnik commandos.

YULEE, DAVID LEVY, American Senator, b. St. Thomas, West Indies, 1810; d. New York city, 1886. His father, Moses Elias Levy, figured prominently as a pioneer in the early history of Florida Territory. Yulee, who was originally named David Levy, accompanied his father on a trip to the United States in 1818, and later resided in Norfolk, Va., from 1819 to 1827. His father having become prominent in Florida, Yulee followed him thither and became the manager of a plantation in Alachua County. He studied law in St. Augustine, and was admitted to the bar in 1832. He entered politics and made rapid advancement; in 1837 he was elected to the state legislature, and in the next year he was a delegate to the convention which framed the constitution of Florida. The following years (1841 to 1845) found him active as a territorial delegate in Congress for Florida and a leader in the movement to obtain the admission of Florida into the Union, which occurred in 1845. Yulee was then elected a United States Senator from his state, thereby becoming Florida's first Senator and the first Jew in the United States Senate. He served in the Senate from 1845 to 1851, and was reelected in 1855, but resigned in 1861 in order to join the Confederacy.

He did not take a very active part in the Civil War, however, although he served in the Confederate Congress. After Lee's surrender at Appomattox Court House (1865), the governor of Florida sent Yulee to Washington to see the president with regard to the readmission of Florida into the Union. He was arrested before reaching the Capitol and returned as a prisoner of state to Fort Pulaski; a year elapsed before he regained his freedom. He retired from politics after the war, and lived with his family at Fernandina, Fla., devoting himself to railroading. He moved to Washington in 1880.

While his father was an observant Jew, Yulee himself married a Christian, Miss Wickliffe, in 1845, and permitted his children to be brought up in the Christian faith; by an act of the Florida legislature at his request, his original name of David Levy was changed to David Levy Yulee in 1846, shortly after his marriage, and on January 12, 1846, his name was changed to Yulee upon the rolls and records of the United States Senate, in conformity with the act.

YUSHKEVICH, SEMION, author and dramatist, b. Odessa, Russia, 1868; d. Paris, 1927. He went to Paris in 1893, and after graduating from medical school returned to Russia. His literary debut was made with a short story, "Portnoi" (Tailor), published by *Russkoe Bogatstvo* in 1897. A novel, *Raspad* (Ruin), written during his student days, was contributed to *Voskhod* in 1902. It attracted attention because of the author's ability to portray the destruction of middle-class Jewish traditions by changes in the social and economic system. This theme runs through most of Yushkevich's works, among them *Yevrei* (Jews; dedicated to Maxim Gorki); *Leon Drei;* and *Ita Gaine.*

David L. Yulee

During thirty years of literary activity Yushkevich wrote about twenty-five volumes of short stories, novels and dramas. Some of his plays, which were produced on the Russian and European stages, were translated into and produced also in Yiddish. They are: *Der Hunger* (1906); *Der Kenig* (1907); *In Shtot* (1909); *Di Heirats-Komedie* (1910); *Miserere* (1917).

After the October Revolution Yushkevich went to Paris. In 1921 he came to the United States and became a contributor to *Der Tog* (New York Jewish daily) and *Di Tzukunft* (New York Yiddish periodical), for which he wrote a series of short stories and novels. During this period the following plays of his were produced: *An Orimans Cholem* (1921); *Miserere* (1925); *Der Luft-Mensh* (1925); *Mendl Spivak* (1926; at the Yiddish Art Theatre in New York); and *Taivls-Gelt* (1925) and *Der Gelt-Cot* (1928; at the People's Theatre in New York).

Among his last works are a collection of short stories, *Avtomobil* (Paris, 1922); *Ulitza* (Berlin, 1922); *Dudka* (Berlin, 1922); *Golubinoye Tzarstvo* (Berlin); and a novel, *Epizody,* which pictures the Russian civil war (Berlin, 1923; Soviet Russia, 1926).

He returned to Paris in 1927.

Lit.: *Sovremennyya Zapiski,* vol. 31 (1927); *Bolshaya Sovetskaya Entziklopedia,* vol. 65 (1931); *Lexicon of the Yiddish Theatre,* vol. 2 (Yiddish; 1934).

ZAAR, ISAAC (Selig Abramovich Rabinovich), Yiddish writer and editor, b. Smorgon, province of Vilna, Lithuania, 1885. His first literary work was done in Russian, in 1906, when he wrote a series of articles on Poale Zionism for the *Yevreiskaya Zhizn,* a Zionist periodical published in Petrograd. Zaar was at that time a leader in the Labor Zionist movement, and when he was sent as delegate to the Eighth Zionist Congress in The Hague (1907) he was invited to the United States to edit the *Yiddisher Kemfer,* the Labor Zionist weekly issued in New York city.

From 1909 to 1913 Zaar lived in Chicago, where he was associated with the *Jewish Courier;* later he edited the *Folkvechter* in Minneapolis. Returning to New York in 1916, Zaar resumed his Zionist and other Jewish communal activities. He was a delegate to the fifth World Conference of

the Poale Zion in Vienna in 1920, and remained in Europe until 1922, as a member of the Executive of the Poale Zion World Confederation. In 1922 he became editor of the *Yiddisher Arbeiter,* and in 1924 he joined the staff of the Jewish *Morning Journal,* with which he was affiliated in 1943. For a time (1927-30) he edited *The Vanguard,* a monthly published in English as an opposition organ to the incumbent Zionist administration.

ZABIM ("those who have an issue"), ninth tractate of Toharoth, the sixth division of the Mishnah. It consists of five chapters, and gives the regulations about men and women who suffer from certain discharges mentioned in *Lev.* 15 and regarded as ritually unclean. The tractate discusses under what conditions and for what periods such persons become ritually unclean, and the different ways in which they convey their uncleanliness to other persons or to objects by contact. The end of the tractate compares this form of uncleanliness with other forms, and enumerates the cases in which the heave-offering becomes unfit for the altar.

The Tosefta, which also has five chapters, covers the same material as the Mishnah; there is no Gemara.

ZABOTINSKY, ALEJANDRO, dentist, b. Alexandrovsk, Russia, 1880; d. Buenos Aires, Argentina, 1941. He came to America as a young man and studied at the University of Buenos Aires (M.D., 1909) and at New York University, specializing in surgical dentistry. In 1926 he was appointed professor of dentistry in the medical faculty of the University of Buenos Aires. He wrote a number of works on dentistry, including: *La piorrea alveolar; Incrustaciones de oro y de porcelana; La enseñanza de odontología en Estados Unidos.* He took a lively interest in Jewish communal affairs, serving for twenty-two years as president of the Ezrah society and being founder and first director of the Jewish Hospital.

ZACK, LÉON, painter, b. Nizhnii Novgorod, Russia, 1892. He began to paint in his early teens. He studied in Moscow as a pupil of the painter Machkow, a follower of Cézanne, who belonged to the "valet of the square" group.

In the Tschoukine Collection he learned to know the great art of modern France. He left Moscow in 1920 and, after a short stay in Constantinople, he went to Florence, Italy, where he spent two years. His Italian studies were of great importance for his further development. Accidental influences of Florentine art of the 15th cent., especially of the art of Donatello, can be traced in his paintings.

Of greater importance is the influence of late-antic heads of simple outline and magic depth in the eyes which seem to be revived in his work. The economical use of colors indicates the same source. Above all, as in Greco-Roman and Italian art, the ideal structure of the human body and of the human features are always a solid foundation of his figures. Even in such representations where the naturalistic form is neglected for the purpose of greater expressive power this structure is never abandoned.

After his sojourn in Florence the artist lived for a year in Berlin. There he designed the decoration for a ballet by Gluck and for one by Mozart, which were performed, in 1923, by the Russian "Romantic Ballet" in the Champs-Élysées Theatre in Paris. In the same year Zack settled in France, working there until 1941.

He exhibited in several countries. Works of his were shown in the museums of Amsterdam, Antwerp, and in the Musée du Jeu de Paume in Paris. His art is very impressive. George Waldemar recognized a new "humanism" in his work, which he had in common with a small group of modern artists who, in contrast to the painters of more formal tendencies, returned to the problems of the representation of human personality. Pierre Mornand found "mystery" in Zack's representation of human beings. In his Bible illustrations Zack portrays noble and earnest likenesses of the prophets, and his well-known picture, *Job and His Friends,* has greatness and simplicity, in the true sense of the Bible. ELISABETH GUTMAN.

Abraham ben Samuel Zacuto

Lit.: Waldemar, George, "Humanity Lost and Found, Leon Zack," *Formes* (1931) 26-28; Fierens, Paul, "Apropos d'humanité et d'italianité," *Les Beaux Arts,* June 2, 1933, p. 6; Mornand, Pierre, "Léon Zack, le maître des visages énigmatiques," *Courrier Graphique,* May, 1937, article No. 3, pp. I-VIII; reproduction *Les Beaux Arts,* June 25, 1937, portrait of Arthur Rimbaud.

ZACUTO, ABRAHAM BEN SAMUEL, astronomer and rabbinical scholar, b. Salamanca, Spain, about 1450; d. Turkey, after 1510. Renowned as an astronomer, he served as professor at the University of Salamanca and later at the University of Saragossa. After the expulsion of the Jews from Spain in 1492, Zacuto emigrated to Lisbon, Portugal, where he was appointed court astronomer and historiographer to King João II. When the king consulted him with regard to Vasco de Gama's contemplated expedition to India, Zacuto responded in its favor. Zacuto improved upon the methods of computing astronomical tables, and perfected the astrolabe, which de Gama used.

Zacuto's services and attainments, however, did not protect him against religious fanaticism. He was forced to flee from Portugal at the time of the persecutions under King Manuel, and sought refuge in Tunis where, in 1504, he wrote his *Sefer Hayuhasin,* a genealogical work from the creation to his day (first printed in 1566). Zacuto wrote an astronomical treatise, *Biur Luhoth,* which was translated into Latin and Spanish. An extensive astronomical work ascribed to him is still in manuscript.

Lit.: Filipowski, H., edit., Introduction to the *Sefer Yuhasin* (2nd ed., 1924); Marx, A., in *Linda R. Miller Memorial Book* (1938) 167-70; Burgos, Cantera, *Abraham Zacuto, siglo XV* (Madrid, 1935).

ZACUTO, MOSES BEN MORDECAI (called ReMeZ, an abbreviation of Rabbi Moses Zacuto), Cabalist writer and poet, b. Amsterdam, Holland, 1625; d. Mantua, Italy, 1697. He was a pupil of Saul Levi Morteira and apparently a fellow student of Baruch

Spinoza. He went to Posen, Poland, in order to complete his Talmudic learning. Although at first he intended to make a pilgrimage to Palestine, he later decided to accept the position of rabbi in Venice, where he was occupied also as proofreader. In 1673 he was appointed rabbi of Mantua.

Zacuto wrote: *Tofteh Aruch* (1st ed., Venice, 1715); the first dramatic poem in Hebrew, which A. Berliner edited under the title of *Yesod Olam* (The Foundation of the Universe; Berlin, 1874); *Iggeroth Haremez* (The Epistles of ReMeZ), containing Cabalistic letters by various contributors, to which he appended the poem *Elef Alpin*, consisting of a thousand words each beginning with the Hebrew letter Aleph. Zacuto left unpublished commentaries to the *Zohar* and the Jerusalem Talmud, as well as Cabalistic interpretations of words, homilies and miscellaneous writings.

Lit.: Kahana, in *Hagoren*, vol. 3, p. 175 et seq.; Berliner, A., Introduction to *Yesod Olam* (1874); Friedman, Introduction to *Tofteh Aruch* (1922); Baron, Salo W., *The Jewish Community* (3 vols., 1942).

ZACUTUS LUSITANUS, ABRAHAM (Abraham Zachuth), physician and author, b. Portugal, 1576; d. Amsterdam, Holland, 1642. He was a great-grandson of Abraham ben Samuel Zacuto. As a Marrano he bore the name of Manoel Alvares, and studied medicine and philosophy at the Universities of Salamanca and Coimbra. For thirty years he practised medicine in Lisbon, enjoying a good reputation there, but in 1625 he fled from the Inquisition to Amsterdam, where at the age of fifty he entered the covenant of Abraham.

He was so much esteemed and beloved that his praise was sung by poets, such as the Spaniard Johannes Piutus Delgado. He wrote a number of works, including a twelve-volume history of medicine, *De medicorum principium historia* (Lyon, 1642). Zacutus Lusitanus was a friend of Manasseh ben Israel, and corresponded with Frederick, prince of the Palatinate, and with several noted Dutch physicians.

Lit.: Graetz, H., *History of the Jews*, vol. 4 (1927) 678; Roth, Cecil, *A History of the Marranos* (1932) 297-98.

ZADDIK AND ZADDIKISM. The term *tzaddik* is used in the Bible to denote the completely righteous man (*Gen.* 6:9), who is characterized both by his just dealings with his fellowmen (*Prov.* 21:15; 29:27) and by his observance of God's commandments (*II Sam.* 23:3). The Talmud continues to apply the term in its Biblical connotation, using the appellation *tzaddik gamur* ("completely righteous") to denote one who is almost entirely free from sin (*R.H.* 16b).

Basing itself on the Biblical passage, "The righteous (*tzaddik*) is the foundation of the world (*yesod 'olam*)" (*Prov.* 10:25), the Talmud declares that the world exists only on the merits of the Zaddik (*Yoma* 38b; *Hag.* 12b). The *Zohar Hadash* (26b) is of the opinion that there is one outstanding Zaddik in each generation who is akin to Moses, and who is the potential Messiah, should his generation be found worthy of redemption.

The Talmud also declares that the world always has thirty-six Zaddiks who receive the countenance of the Shekinah (divine presence), and of these thirty-six, three are privileged to have this boon at any time they choose (*Sanh.* 97b; *Suk.* 45b). These three outstanding Zaddiks have special mention (*Midrash Num.* 3:1). Inclusion in this group of thirty-six does not depend upon one's learning, but on one's piety and reverence of God (*Ber.* 34b). Rabbinic literature also states that the world is never without thirty Zaddiks like Abraham (*Yer. A.Z.* 2:1), of whom eighteen are in Palestine and twelve in the rest of the world, or contrariwise, depending on the dispersion of the Jews (*Midrash Ps.* 5:5). A variation of this old tradition places thirty Zaddiks in Palestine and fifteen outside, a total of forty-five (*Hul.* 92a). God originally created the world to be judged on the basis of strict justice, but soon saw that the world could not continue to exist unless strict justice were tempered with mercy. These thirty or forty-five Zaddikim can be judged solely on the basis of strict justice. From a Biblical passage (*Gen.* 18:26; cf. *Targum Jonathan* to the passage) the Midrash derives the conviction that God will never destroy the world, no matter how wicked its inhabitants, as long as there are at least fifty Zaddikim in it (*Pirke de Rabbi Eliezer* 25). It is perhaps to these different groups of Zaddikim that the Talmud refers when it states that a Zaddik does not die until his counterpart has been created (*Kid.* 72b). The *Tikkune Zohar* (no. 21) states that there are always seventy-two Zaddikim in the world, half in Palestine and half in other countries.

Any observant Jew may expect God to fulfill his prayers, even to the extent of exempting him from some general disaster (*B.M.* 106a). However, the great Zaddikim can usually persuade God to cancel His decrees (*Sab.* 63a; *M.K.* 16b; *Yer. Taan.* 3:10). The one outstanding Zaddik can, through his intercession with God, control the forces of nature, such as the rain (*Taan.* 23a); three outstanding Zaddikim who unite in prayer can have almost their every wish granted, even to the extent of resurrecting the dead (*B.M.* 85b). The Zaddikim can also tell if their prayers are being answered (*Ber.* 34b). As these Zaddikim are in such close communion with God, their actions are judged very strictly by Him (*Yeb.* 121b) and they are held partly accountable for the sins of their generation (*Sab.* 33b). The outstanding Zaddikim among the Tannaim were Honi Hameaggel, Hanina ben Dosa, and Phinehas ben Jair. God is sometimes called "the eternal Zaddik" or "the Zaddik of the world."

The *Zohar* and other medieval mystical writings repeat the Talmudic concept of the Zaddik, modifying it in certain respects. It was believed by many that the soul of Isaac Luria, greatest of the medieval Cabalists, ascended every evening to heaven, where it conversed with the great teachers of the past. The mystical doctrines of Cabala and its distortions encouraged the credulity of the ignorant and the fantastic beliefs of the lower stratum of the people in the power of its leaders, and helped prepare the ground for the disastrous movements of such pseudo-Messiahs as Sabbatai Zevi and Jacob Frank.

Israel Baal Shemtob (1700-60), the founder of the Hasidic movement, whose leaders took the title Zaddik and later that of Rebbe (in contrast to Rabbi), and who were sometimes known as Guter Yid, considered the function of the Zaddik to be the bringing of the people nearer to the love and understanding of God by precept and example. Hasidic doctrine removed the Jewish center of gravity from the knowledge of Torah to place the greatest stress on its cardinal virtue of Debekuth ("cleaving unto God"), attained through Kavvanah ("spiritual absorption in religious acts") and Hithlahabuth ("emotional state of concentrated spiritual enthusiasm").

Baer of Meseritz (1710-72) and Jacob Joseph of Polonnoye, the principal disciples of Baal Shemtob, were the first to develop the theory of "active Zaddikism," or the concept of the Zaddik as the intermediary between God and man. This "active Zaddikism" consisted in the coming of the Hasidim to the Zaddik with all their financial, physical and spiritual problems, and invoking his blessings and intercession on high, by giving him a Quittel ("a note with a request written on it"), which was accompanied by a sizable gift of money called *pidyon* (literally, "ransom"). This constant use of intermediaries is contrary to rabbinic theology. "Active Zaddikism" was carried to theoretical and practical extremes by most of Baer's Galician and Polish disciples, such as Elimelech of Lizianka, who made the Zaddik a demi-god and de-

George Wolf

scribed him in terms which were almost blasphemous. The Zaddiks were considered infallible, not subject to the laws made for ordinary man, and were believed to possess the power to grant prosperity, forgive sins, and cure barrenness and other physical ailments. In fact, some of their followers firmly believed that their Zaddiks were visited by Elijah, and that during the night they ascended to heaven, where mystical secrets of the Torah were revealed to them.

Many unscrupulous and avaricious characters took advantage of the fact that a Zaddik needed no extensive scholarship, but had merely to be able to impress the gullible populace with his supposed saintliness and holiness. Another weakness of Zaddikism was the custom of automatically investing descendants of worthy Zaddiks with the holiness of their progenitors, of whose piety and ability they often fell miserably short. As the Hasidim took a great delight in recounting tales of the miracles performed by their Zaddiks, a number of unscrupulous authors found it very profitable financially to invent or to copy stories about certain Zaddiks; these stories, in the form of pamphlets or books, sold readily among the Hasidim. For this reason the same story is often found related of many different Zaddiks and many of the stories themselves are ludicrously beyond the pale of possibility. These negative aspects of Zaddikism occasioned the bitter satires of Isaac Erter, Isaac Baer Levinsohn, Judah Lob Levin and many others.

There were, however, men who fully deserved the title of Zaddik which they bore. Levi Isaac of Berdichev, a disciple of Baer of Meseritz, is admitted by all to have been unequalled in his love for Israel. He is also reputed to have reached the heights of Debekuth and God-consciousness, until his contemporaries, in awe, likened his prayers to the service of the high priest in the Holy of Holies. Abraham, the son of Baer of Meseritz, was called "the angel" (Malach), and was regarded as being "not of this world" because of the completeness with which he divorced himself from the physical world and the intenseness of his devotions and prayers. A number of Zaddiks left all their possessions and journeyed to Palestine under great hardships. There were a few Zaddiks who would not stay in any one city but wandered from town to town, soothing troubles with spiritual balm, dispensing wise counsel, cheering the downcast, and organizing help for the needy.

Another pupil of Baer of Meseritz, Shneor Zalman of Ladi (1747-1813), was responsible for the spread of Hasidism in Lithuania. Lithuania, which was the center of Talmudic learning, had been the center of opposition to the Hasidic movement. Although most of the Jews of Lithuania remained adamant opponents of Hasidism (Mithnaggedim), Shneor Zalman, who was a great Talmudist and the author of *Tanya,* a philosophic-mystical system of thought, succeeded in winning many converts. These were known as the Liubavicz or Habad Hasidim, and they placed Torah and the *Tanya* on an equal footing. In Poland, Isaac ben Meir Alter (d. 1866), a noted Talmudic scholar, succeeded his teacher, Menahem Mendel of Kock, and headed a new group of "Gerer" (from Ger, near Warsaw) Hasidim who placed more emphasis on the study of Torah than on other Hasidic pursuits. Many internationally renowned Talmudists have been Gerer Hasidim. The Hasidim of the Spira dynasty of Munkács are noted for their uncompromising piety and their study of practical Halachah. Only these three last mentioned groups, who swung Hasidism back to the study of Torah, have retained appreciable numbers of followers in the 20th cent.

Most of the Zaddiks lived in enormous courts, where the faithful would visit them at times of trouble or on festive occasions. The high holy days were the occasion for special pilgrimages. Although the Zaddik seldom appeared in public, as most of his business was transacted by his Shammash ("attendant"), he joined the communal meals, especially on the Sabbath. The Zaddik would taste of a dish and then there would be a mad scramble to get part of the food which he had touched (*shiraim*). After the meal the Hasidim sang various beautiful melodies (Niggunim). These melodies, often the compositions of the Zaddiks themselves, had the power of raising listeners to transports of ecstasy, or *hithpashtuth hagashmiyuth* ("total oblivion of one's physical surroundings"). Then the Zaddik would deliver a short discourse on some ethical or theological subject, which would be followed by more singing and dancing. The most successful Hasidic rabbis in America are those who are masters of these melodies.

The three widespread Zaddik dynasties are the following: that of Sadagora, founded by Israel Ruzhiner (d. 1850); that of the Halberstamms, founded by Hayim Halberstamm (d. 1876); that founded by Nahum of Chernobyl, whose numerous progeny divided the Ukraine among themselves. There are a large number of Liubavicz and Gerer Hasidim in America. Joseph Isaac Schneersohn, a direct descendant of Shneor Zalman and head of the Liubavicz group, came to the United States in 1940 and was residing there in 1943; Abraham Mordecai Alter, head of the Gerer Hasidim, was residing in 1943 in Palestine. There are a number of Hasidic rabbis of the Chernobyl, Halberstamm, Sadagora and other dynasties in the larger cities of the United States. They call themselves "grand rabbis" and are known by the honorary title of Admur (an abbreviation of Adonenu, Morenu, Rabbenu). Many sayings of the various Zaddiks have been translated into English by Louis I. Newman.

ZADDIKIM, LAMED VAV, *see* LAMED VAV ZADDIKIM.

ZADKINE, OSSIP, sculptor, b. Smolensk, Russia, 1890. When fifteen years old, he was sent to school in Newcastle on Tyne in England, "to learn English and good manners."

But half a year later the youngster ran away to London, to learn sculpture. To earn a living he worked in ateliers as a wood-carver, attending art classes at Regent School in the evenings. With an allowance from his family, he later became a pupil of the Polytechnical School of Arts and Crafts. Eventually he proceeded to Paris where he settled in 1909. Paris was in an artistic revolution in this time; academism was banished, and therefore, after two years of study at the École des Beaux Arts, Zadkine rented a small studio and went on his own.

Zadkine exhibited first in 1911, and attracted immediate attention. His work was primitive in form and symbolistic in content. *Job and His Friends* and *The Prophet* date from this period to which the first World War put an end. In 1914 the artist joined the army. After the war he plunged into work again, full of initiative and ready to experiment. His favorite material was wood in various textures—gilded, painted or with intarsia.

His *Tiger, Gladiator,* and *Slave,* made at that time, were full of expression and movement, and more articulate than his incipient works. Toward the second half of the 1920's cubistic order motivated his forms. Besides wood, stone—from alabaster to granite—became the medium of his sculptures. "The soul of the material is a sister to the soul of the artist," he said. The motion of his figures gained in expressive beauty. Although his human forms were never

naturalistic in a photographic sense, his figures became almost a part of nature, as exemplified in his *Seated Woman,* under the trees of a garden, or in his *Torso,* rising from a pool.

Toward the end of the fourth decade of the 20th cent., Zadkine's compositions became complex. Group compositions give an abundance of abstract yet expressive forms in a beautiful play of lights and shades. The thesis that form is created by light and shade was fundamental to his art. Hence, he often used concave forms to create plasticity. *The Three Graces* and *The Three Musicians* are examples of this style. His *Young Girl with the Dove, "Intimité"* and *Sundial* have all the charm and purity of form that can be attained by reflected light. His *Orpheus* is of almost classical aloofness and beauty. But the play of light and shade appealed to the artist's sense of color, and in the 1930's he made his *Odalisque* of painted wood, heightening the colorful apparition of the statue by actual polychromy. His thirst for color was so strong, that he started to paint his famous guashes. At the same time he gave to his sculptures, by variety in the handling of the surfaces, a more colorful appearance. Together with the conquest of color came the conquest of space. Curving planes extended into space with dynamic power and gaiety. Paul Haesaert called Zadkine's work "winged sculpture." His interest in motion had been foreshadowed, in the late 1920's, in *The Ball Players;* it was developed in the beginning of the 1940's to the more concise and pure conception of *The Menades.* This conciseness and a greater richness of the surfaces characterize his later works, such as *Hommage à Bach, Concerto of Two Violins,* and *The Warrior.*

After the fall of Paris, the artist came to the United States. Here he wrought the compositions mentioned above, as well as portraits, and continued to create his delicate animal sculptures which were executed mostly in alabaster. In 1942 Zadkine's work was represented in many museums, including those of Paris, Grenoble, Amsterdam, Antwerp, Prague, Moscow and Tokio. Yet the vigorous young artist seemed not to have reached the peak of his career, and his great versatility and love of experiment forecast a further development. ELISABETH GUTMAN.

ZADOK. 1. One of the chief priests (the other being Abiathar) in the time of David and Samuel. According to the notices about them in *II Samuel* and *I Kings,* they were of equal rank. During the rebellion of Absalom they remained in Jerusalem to guard the Ark, at the same time sending David information of events in the city by means of their sons. After the defeat of Absalom they urged the tribe of Judah to welcome the return of the king. In the dispute over the succession to David, Zadok espoused the cause of Solomon and Abiathar that of Adonijah; accordingly, after the triumph of Solomon, Abiathar was banished and Zadok made chief priest. Zadok's son Ahimaaz married a daughter of Solomon and was governor in Naphtali. The subsequent line of high priests descended from Zadok took the name of "sons of Zadok" (*Ezek.* 44:15). *I Chron.* 5:27-41 gives a list of the descendants of Zadok; some scholars regard this as an artificial construction intended to legitimatize the line of the high priesthood by tracing it back to Aaron.

2. Reputed pupil of Antigonus of Socho who, together with Boethus, founded the sect of the Sadducees. The story, as reported in *Aboth de Rabbi Nathan,* is as follows: Zadok and Boethus misunderstood the saying of their teacher, "Be not like servants who serve their master for the sake of receiving a reward," and assumed that there was no reward in future life and no resurrection of the dead—doctrines which were held by the Sadducees. Graetz and Eduard Meyer think that this story may be a reminiscence of an actual Zadok who lived in the 2nd cent. B.C.E. and founded the Sadducean party; Geiger, however, regards the story as entirely fictitious and derives the word Sadducee from the priestly line of the sons of Zadok. The original Hebrew of *Sirach* supports the latter view by praising God for having chosen the sons of Zadok to be His priests.

3. One of the oldest Tannaim of the 1st generation, in the 1st cent. C.E. He was of priestly origin (*Tos. Yoma* 1:12), and is said to have fasted for forty years before the destruction of the Second Temple in a futile attempt to prevent the threatened catastrophe. As a result of this he became so weak that his life was in danger, and Johanan ben Zakkai asked Vespasian to provide a physician for him (*Git.* 56b). After his recovery, he joined the academy at Jabneh, and remained there in great honor. Gamaliel II gave both him and his brothers special seats to the right of the Nasi (*Yer. Sanh.* 1:4). His son, grandson and great-grandson were all Tannaim. Since he and his grandson had the same name, it is uncertain to which of them the teachings uttered as coming from Zadok are to be credited. The same is true of the recorded saying (*Aboth* 4:5): "Do not make the Torah a crown with which to glorify yourself or a spade with which to dig for yourself."

ZAGAJSKI, MIECZYSLAUS, industrialist, b. Poland, 1895. He graduated from the Commercial College in Leipzig, and returned to Poland to take over the directorship of the industrial enterprises already instituted by his father, Hirsch Zagajski.

Zagajski established numerous factories, developed chalk and marble quarries, constructed highways and, in cooperation with the Polish government, founded a concern for the manufacture of gasoline. He was also the representative in Poland for the delivery of chemical raw materials from the Soviet Union. He was vice-president of the Central Merchants' Union of Poland.

Among Zagajski's posts in Jewish affairs were his membership on the Jewish Agency, that on the council of the World Jewish Congress, and that on the executive board of the central committee for aid to refugees from Germany in Poland. After coming to the United States following the outbreak of the second World War, Zagajski was made an honorary consul for Poland. He was also appointed to membership on the executive of the United Jewish Appeal. The Polish government had earlier awarded him a Cross of Merit.

ZAGREB (Agram), capital of the former kingdom of Croatia, founded in 1093; after 1919 it was part of Yugoslavia, with 160,000 inhabitants, among whom were about 11,000 Jews (1940). Jews lived in Zagreb as far back as the 14th cent.; they were then free and equal with the inhabitants, having equality before the law. Unlike the condition prevailing in neighboring

countries, there existed in Zagreb no special degrading form of oath taken by Jews, for here their testimony carried the same weight as that of Christian witnesses. The "domus judaeorum," evidently a synagogue, is mentioned in a city document of 1440. The Jews took an active part in the economic life of the city in the Middle Ages, but gradually they disappeared from Zagreb in the 16th cent.

In 1787 a Jewish family again settled in Zagreb. In 1806 there existed a community of seventy-five persons, recognized by the city magistrate, and in 1811 there was a Jewish cemetery. Sermons in German and a choir were introduced in 1840, as well as a Jewish public school in the German language. A new large synagogue was built in 1867, of which Hosea Jacobi of Berlin was appointed rabbi; he acquired the Croatian language, which became the only official language of the college and the synagogue. His successor, Gavro Schwartz, developed a far-reaching social and cultural activity, especially marked since Dr. Hugo Kon became president of the community in 1920. There were a home for the aged, a hospital, vacation colonies and numerous societies.

After 1841 there existed a separate Orthodox community in Zagreb, which was, originally, territorially independent in this city; but later it was more often a devotional sect of the main community. In 1925 in addition, another, rather small, Orthodox Sephardic community arose, with its own rabbinical administrator. In 1927 the Jewish community published a year book in the Croatian language.

After the German conquest of Yugoslavia (1940), Zagreb was again the capital of an autonomous Croatia. The Jews of Zagreb were visited with heavy persecutions, many being sent to work in salt mines and the rest thrown into concentration camps. In January, 1942, it was reported that all the Jews in Zagreb had been expelled and their property confiscated.

ZAHALON, ABRAHAM BEN ISAAC, Talmudist and Cabalist, who flourished in Italy in the 16th cent. He published a work on the Jewish, Christian and Mohammedan calendars entitled *Yad Harutzim* (Venice, 1594-95), and wrote *Yesha Elohim* (Venice, 1595), a commentary on *Esther,* and *Marpe Lanefesh* (Venice, 1595), a Cabalistic treatise on ethics.

Lit.: Steinschneider, Moritz, *Catalogus librorum hebraeorum in bibliotheca bodleiana* (2nd ed., 1931), col. 711; Fürst, Julius, *Bibliotheca Judaica,* vol. 3, p. 541.

ZAHALON, JACOB BEN ISAAC, physician and author, and rabbi at Rome and Ferrara, Italy, b. Rome, 1630; d. Ferrara, 1693. In addition to rabbinical literature, he studied medicine and surgery, receiving the degree of doctor of medicine from the University of Rome; his medical writings and his rabbinical achievements make him outstanding among the numerous rabbi-physicians of medieval and modern times. During the Rome plague of 1656 he zealously aided the afflicted. The Jewish community engaged him as teacher and preacher, and he utilized this latter position, particularly during the plague, for delivering public sermons. Later he left Rome and settled in Ferrara, where he served as rabbi until his death.

Zahalon, a voluminous writer, wrote works embracing not only medical but also homiletical, philosophical and rabbinical commentaries. His *Otzar Hahayim* (Venice, 1683) is a comprehensive medical work in thirteen parts, one of which describes the conditions prevailing during the plague. In his *Margaliyyoth Toboth* (Venice, 1665), an abridgement of Bahya ibn Pakuda's *Hoboth Halebaboth* interspersed with prayers, he urges physicians to recite weekly his "physicians' prayer," which he composed and included in this work. Works of his which still remain in manuscript deal with Maimonides, theology, philosophy, and *Ecclesiastes* and *Song of Songs.* Isaac Lampronti, Moses Zacuto and Nathaniel Segre published his responsa.

Lit.: Vogelstein, Hermann, and Rieger, Paul, *Geschichte der Juden in Rom,* vol. 2 (1895) 268-70; Landau, *Geschichte der jüdischen Ärzte* (1895) 75; Friedenwald, "Jacob Zahalon of Rome," *Jewish Forum,* vol. 2 (1919) 653-64; Carmoly, E., *Histoire des médecins juifs* (1844) 171.

ZAHALON, MORDECAI BEN JACOB, rabbi, author and physician, d. Ferrara, Italy, 1748. He was the successor to his father, Jacob ben Isaac Zahalon. He wrote: *Megillath Naharoth* (Venice, 1707), a description of the impending destruction which threatened the Jewish community of Ferrara during the deluge of 1707, and its rescue; *Metzitz Umelitz* (Venice, 1715), a lecture delivered at the Ferrara Talmud Torah on modulating the tone of the religious worship. Aside from his literary and professional accomplishments, he was a gifted poet; several of his liturgical poems are still recited in the synagogue of Ferrara.

Lit.: Steinschneider, Moritz, *Catalogus librorum hebraeorum in bibliotheca bodleiana* (2nd ed., 1931), col. 1675; Carmoly, E., *Histoire des médecins juifs* (1844) 239.

ZAHALON, YOMTOB BEN MOSES, Talmudist and rabbi at Safed, Palestine, b. 1557; d. about 1638. He engaged in Halachic discussions with many of the prominent scholars of his day, including his mentor Joseph Caro and Moses Galante the Elder. In disputes between the Sephardim and Ashkenazim in Jerusalem he often sided with the latter, although he himself was of Sephardic descent. He wrote *Lekah Tob* (Safed, 1577), a commentary on Esther; *Magen Aboth* (still in manuscript), a commentary on *Aboth de Rabbi Nathan;* and numerous responsa, which were published by his grandson Yomtob in 1694.

ZAK, EUGEN, painter, b. Moligno, Russia, 1884; d. Paris, 1926. He was the son of Polish parents who, in 1892, returned to Warsaw, where he got his first artistic education. In 1900 he went to Paris, continuing his studies with Jerome at the École Nationale des Beaux Arts. During a sojourn in Italy, in 1903, he studied in Rome and Florence, which he later left for Munich, to study at the Hochschule der Schönen Künste. Returning to Paris, he exhibited (1904) in the Salon d'Automne. This won for him an associate membership in this institution. He returned to Poland during the first World War, staying there until 1921, when he was called to Bonn to decorate the house of the architect Breuhaus. He returned to Paris in 1922, and was active there until his death.

Zak was a refined artist of classicistically manneristic forms. His figures have a plastic character and are surrounded by a simple but definite architectonical space. They are modeled in large, soft splashes of light and shade; their movements are of graceful oddity. Zak's paintings confer a mood of quaint and sweet melancholy beauty. His works are in the museums of Paris, Chateau Thierry, Düsseldorf, Elberfeld, Hamburg, London and Chicago.

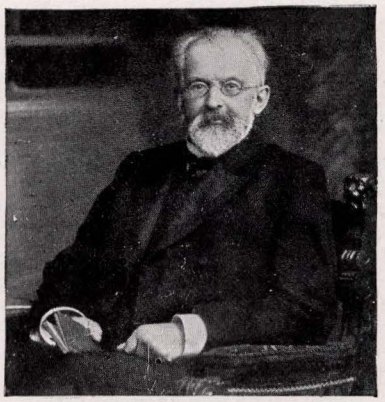
ZALINSKI, EDMUND LOUIS GRAY, soldier and inventor, b. Kurnich, Prussian Poland, 1849; d. New York city, 1909. He was brought to the United States by his parents in 1853, and grew up in Seneca Falls, N. Y. He entered the army in 1864 as a volunteer, and in 1865 was promoted to second lieutenant for bravery at the battle of Hatcher's Run, Va. After the Civil War he reentered the army, and rose in rank

until he retired as major in 1904. From 1872 to 1876 he was professor of military science at the Massachusetts Institute of Technology, and during 1889 and 1890 he was in Europe, studying military matters. He invented a pneumatic dynamite torpedo-gun, an intrenching tool, a ramrod-bayonet, a telescopic sight for artillery, and a system of range- and position-finding for seacoast and artillery firing. He is said to be the model for the hero of Kipling's story "The Captive" (included in *Traffics and Discoveries,* 1904).

Lit.: *Publications of the American Jewish Historical Society,* No. 19 (1910) 196-97.

ZALINSKI, MOSES G., army officer, b. New York city, 1863; d. 1937. He was educated at the Artillery School, graduating in 1894. He served as private, corporal and sergeant, Batteries G and H, First Artillery (1885). Four years later he was made first lieutenant and promoted through grades to brigadier general (1925), and appointed assistant to the quartermaster general of the United States Army. Zalinski was awarded the Distinguished Service Medal, and retired from military service in 1927.



ZALUDKOWSKI, ELIAS, rabbi and cantor, b. Moltshad-Kalisz, Poland, 1890; d. Pittsburgh, 1943. The son of a cantor, Noah Lidaer Zaludkowski, from whom he learned the art of Hazanuth, Zaludkowski studied Talmud with private teachers, attended the Gymnasium and Yeshiva of Kalisz and Slonim, studied voice in Milan, and studied music in Berlin at the Stern Conservatorium. He then served as assistant rabbi and cantor at Sinai Synagogue, Warsaw (1912-14), cantor of the Choral Synagogue at Rostov on Don (1914-21), cantor of the Choral Temple at Vilna (1922-25), of the Central Synagogue, Liverpool (1925-26), and then came to the United States, where he served as cantor of Congregation Sharey Zedek, Detroit (1926-32), of Congregation Shaarey Zedek, New York city (1932-37), and of Beth Shalom, Pittsburgh (1937-43).

Zaludkowski published: *Die Musik in Neintzenten Yorhundert* (London, 1925); *Kulturtrager fun der Yiddisher Liturgie* (Detroit, 1930), a collection of biographies of cantors and choir leaders, as well as some articles based mainly on Aaron Friedmann's similar work, *Lebensbilder berühmter Kantoren* (3 vols., Berlin, 1918, 1921 and 1927); and contributed articles to many newspapers and magazines both in the United States and in Europe on the subject of music and Hazanuth.

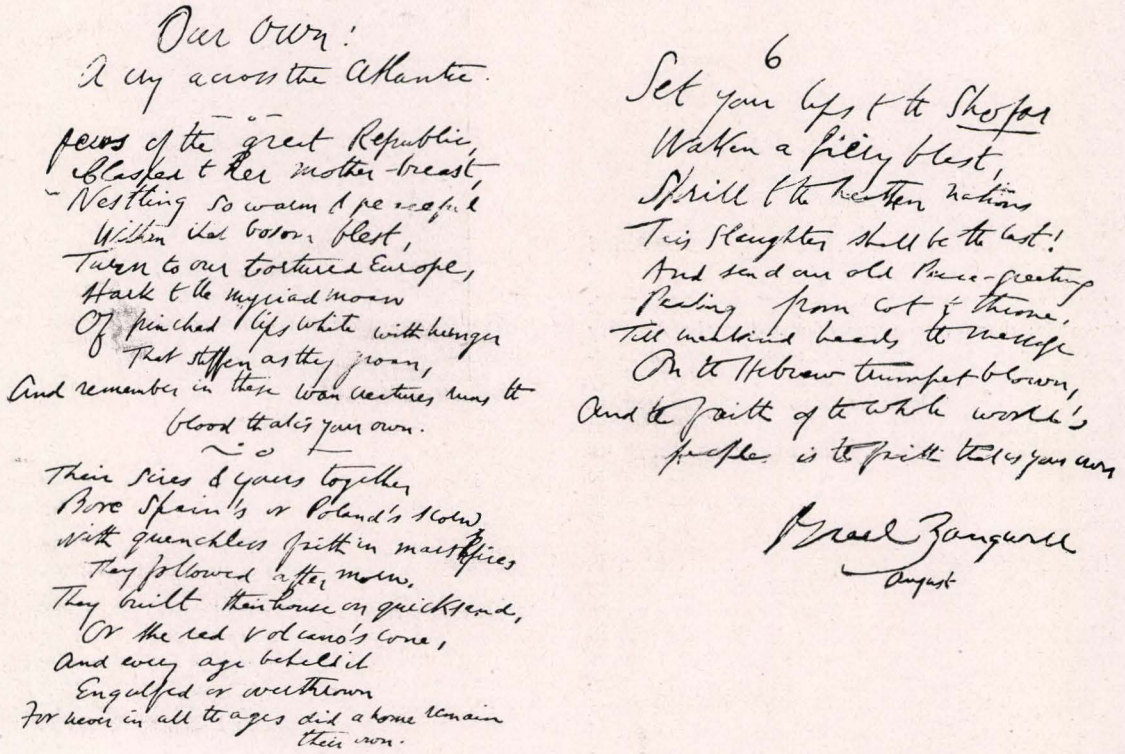
ZAMENHOF, LUDWIG LAZAR, founder of the universal language Esperanto, b. Bialystok, Poland, 1859; d. Warsaw, Poland, 1917. His father Marcus was a teacher of languages. Esperanto, the international language which Zamenhof made his life work, included only 900 root words compared with the more than 20,000 words of the modern languages. Zamenhof ingeniously fashioned a grammar containing only sixteen rules, thus facilitating the method of studying this language. In 1887, the year when the first meeting of the Esperanto enthusiasts was held in Warsaw, he published his first textbook, in Russian, under the pseudonym of *Dro Esperanto* (The Hopeful One).

For years Zamenhof's universal language was the butt of animosity and sneers. However, when Esperanto students came from practically every country to the first international congress held at Boulogne-sur-Mer, France, in 1905, Esperanto seemed to be an accomplished fact. From then on more and more followers came to the congresses. The main office of the Esperanto association, Universale Esperanto Asocio, is in Geneva.

There are more than a hundred periodicals published in

Ludwig L. Zamenhof

Esperanto, and more than 5,000 books, some of which were written in Esperanto, the others being translations. Esperanto is today recognized by some countries, and is taught in their schools. The printing-house of Rudolf Mosse, in Berlin, published an Esperanto world library, *Biblioteko Tutmonda,* including the works of the most famous writers of all countries.



In 1927, at a congress of Esperantist physicians convened in Danzig, the substitution of Esperanto for Latin as an international medium in medical work was favored. Zamenhof himself translated Schiller's *Die Räuber,* Goethe's *Iphigenie auf Tauris,* Shakespeare's *Hamlet,* Gogol's *Revisor,* Molière's *Georg Dondin,* Orzesko's *Marta,* and many other classical works into Esperanto, as well as almost the entire Bible. In 1902 he wrote an essay called *Hillelismo;* in this he pointed out how the Jewish people could be of service to the world. In another essay, *Homaranismo* (1906), he pleaded for unity among all men according to the fundamental principles of justice. Zamenhof published an Esperanto textbook in Hebrew. His addresses at the various openings of the Esperanto congresses were published in Vienna (1929) in both Esperanto and German. After his death Esperanto congresses were held annually, the thirtieth Esperanto Congress being held at London in 1938.

In 1910 Zamenhof visited the United States, remaining for one year, and delivered lectures on Esperanto in various cities of the country. In 1928 a monument to Zamenhof was erected at Warsaw, Poland, and another statue at Bialystok, Poland, in 1931. Postage stamps printed in Esperanto were issued in Soviet Russia, Canada, the United States, Malta, and other countries.

Lit.: *World Unity Magazine,* Nov., 1931, pp. 83-88; *Jewish Chronicle* (London), July 22, 1938, p. 30; *American Hebrew,* June 4, 1926, p. 109; Aug. 10, 1928, p. 395; Aug. 7, 1931, p. 209; Aug. 12, 1932, p. 256; Privat, Edmond, *Life of Zamenhof* (1931).

ZANGWILL, ISRAEL, writer, b. London, 1864; d. Middlehurst, Sussex, England, 1926. His father came to England in 1848 from Russia, and Zangwill's early acquaintanceship with the lives of immigrant Jews and of other Jews who had not relinquished the ritual and customs of Orthodoxy was the later wherewithal of a large part of his accomplishments in literature. He was a scholarship pupil at the Jews' Free School, and during his period of study at London University he was a pupil teacher at the Free School.

Zangwill's first literary work was published during his years as student and teacher, and consisted of commentaries and sketches in the *Jewish Standard.* His first novel, *The Premier and the Painter,* appeared in 1888, followed by *The Bachelor's Club* (1891) and *The Old Maid's Chest* (1892), both collections of light stories. These were not works of Jewish content, but his occasional sketches in

Our Own!
I cry across the Atlantic.

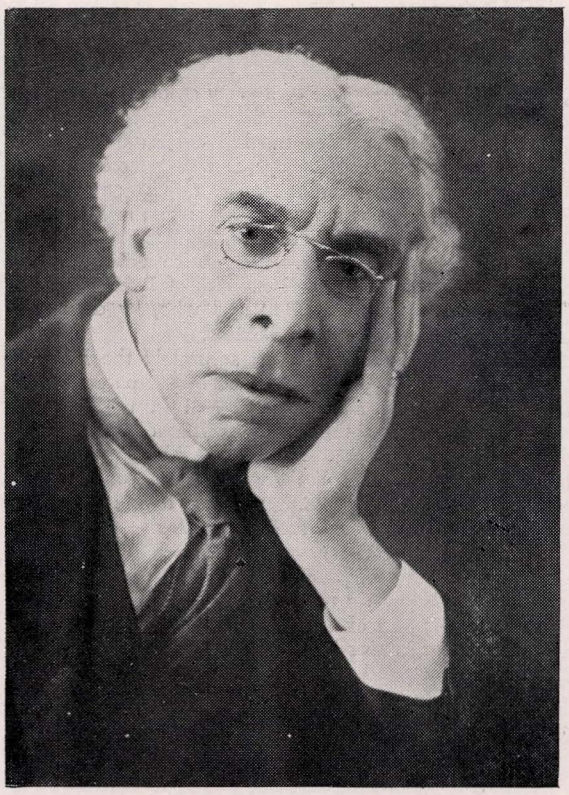
Peers of the great Republic,
Clasped to her mother-breast,
Nestling so warm & peaceful
Within that bosom blest,
Turn to our tortured Europe,
Hark to the myriad moan
Of pinched lips white with hunger
That stiffen as they groan,
And remember in these wan creatures runs the
blood that is your own.

Their sires & yours together
Bore Spain's or Poland's stow
With quenchless faith in manifoes
They followed after woe.
They built their house on quicksand,
Or the red volcano's cone,
And every age beheld it
Engulfed or overthrown
For never in all the ages did a home remain
their own.

6
Set your lips to the Shofar
Waken a fiery blast,
Still the embittered nations
This slaughter shall be the last!
And send our old Peace-greeting
Pealing from out the throne,
Till multitudinous hands to music
On the Hebrew trumpet-blown,
And the faith of the whole world's
freedom is to-night that is your own.

Israel Zangwill
August

Facsimile of a famous poem by Israel Zangwill



Jewish periodicals sustained his probings into the Jewish milieu. From Mayer Sulzberger, then chairman of the publication committee of the Jewish Publication Society of America, came the invitation to write a full-length book depicting Jewish life in the countries of immigrant settlement. *Children of the Ghetto* (1893) was the result.

In this book Zangwill wrote with prolixity of detail and a Dickensian picturesqueness about the Jews who lived in the crowded East End sections of London, but included also excursions into the more cosmopolitan world. Candor and familiarity with the real sources of his characters' behavior combined to make the book—a collection of varied incidents—informative to the outside world and enlightening to the Jews themselves. The devotion to family, the attachment to tradition, the speed and the excitability of their mental processes—all these are told through the actions of the people themselves. To the middle 20th cent. reader, the forms of speech to which Zangwill resorted—translating the Yiddish *du* into an English *thou,* and retaining idiomatic Yiddish sentence structure—offer occasional quaint obstruction. And beside the refinements of the studies of Jewish temperament in relation to the rest of the world which motivated literature after Zangwill's pathbreaking undertaking, his depictions seem primitive. But in the period about which he wrote the picturesque, the exotic, and the foreign were more evident than they were five decades later. Even if they had not been, the very newness of Zangwill's subject matter would have required clarity and contrast. For its time, and therefore in a certain sense for all time, *Children of the Ghetto* was a bridge from one existence to another and an interpretation of one history to another.

From the massive picture out of which he had drawn the still large *Children of the Ghetto,* Zangwill now gathered smaller, more detached bits. *Ghetto Tragedies* and *Ghetto Comedies,* both of which appeared in 1894, were sketches of the same immigrant milieu that was the background for the longer book. In *The King of Schnorrers* (1894) Zangwill went back to 18th cent. Jewish life in England, and created a roguish and fascinating beggar. *Dreamers of the Ghetto* (1898) is a collection of fictionized sketches about historic Jewish figures.

As early as in *Children of the Ghetto,* and through to *The Melting Pot* (1908), Zangwill's hope in the benefits of occidentalization to the Jew led him to supersede England with America. His characters turn to the west as if there lay their dawn, and by the time he wrote *The Melting Pot* he had added intermarriage to the constituents of his hope—a reflection, perhaps, of his own happy marriage to Edith Ayrton. His literary work that did not touch on Jewish subjects continued throughout his career. Among his works were *Merely Mary Ann* (1893); *The Mantle of Elijah,* a study of peace and war (1903); *Italian Fantasies,* perhaps his best work (1910); *Jinny the Carrier* (1919); and *We Moderns,* the last of his many plays (1923). As a poet Zangwill was more pedestrian in phrase than he was in idea; the collection *Blind Children* (1903) contains some verses that occasionally rise to effulgence, and among these are some of Jewish content. His translation of the poems of Ibn Gabirol from the Hebrew (1923) was an admirable achievement, and many of his adaptations of medieval Hebrew prayers are included in the English synagogue liturgy.

Hardly had Zangwill's avowed acceptance of his Jewish heritage been turned into literary accomplishments than he threw his person, too, into Jewish activities. In 1896 he met Theodor Herzl while Herzl was in London. Herzl came to see Zangwill, hoping to find in him a British ally, and he did. Zangwill

Israel Zangwill

became a protagonist of Herzlian Zionism, he aided Herzl in winning the ear, if not the support, of other leading English Jews, he attended the Zionist Congresses, and wrote and spoke for Zionism. Not until 1905 did he break with the Zionist Congress, over the issue of Territorialism. Then Zangwill helped to found the Jewish Territorial Organization and became its president, which he remained until the organization discontinued activities in 1925. After the issuance of the Balfour Declaration in 1917, Zangwill once more—from his unchanging territorialistic point of view—returned to the support of political Zionism. But not long afterward he broke with it again, charging that the tactics of the official Zionist group had hindered the development of Palestine and failed to force Great Britain to fulfill its mandate.

Yet he called persistently for unification in the Jewish ranks and for forthright action by them.

> "Hear O Israel, Jehovah, the Lord our God, is one. But we, Jehovah His People, are dual and so undone."

So he wrote in *Blind Children*. But the purpose of the unity and the forthrightness for which he called became less and less clear. In the assistance rendered, under Zangwill's leadership, to immigrants by the Jewish Territorial Organization, there was no cleavage: places of settlement and access to them were needed. In most of his work the west seemed to be the goal; in *The Melting Pot* he had already added to it the desire for intermarriage. Palestine, set in the more general scene of his territorial ideas, seemed to become only the source of *The Voice of Jerusalem* (1920), in which he expressed the belief that from Jerusalem might emerge that example of anti-nationalism that would prevent the wars he hated. And in a contribution to a series called *My Religion* (1925) he called even more sternly for a de-Judaizing of Judaism, toward the attainment of an idyllic undivided faith among all peoples. Nevertheless, he wanted definitive Jewish action, and with an outspokenness that sometimes piqued he attacked inarticulateness and compromise; *Watchman, What of the Night,* an address before the American Jewish Congress in 1923, with its lashing of the "Grand Dukes" of Jewish life, was typical of this ultra-definitive aspect of his demands.

Like Isaac Disraeli before him, Zangwill seems finally to have been baffled by the need to place his Jewishness with absolute clarity in the world at large. Unlike Disraeli, he did not find comfort in an established church; he looked, rather, toward the creation of a new faith that would obviate further quests. He wanted to hold, in this new faith, the full measure of his heritage, but he did not want it to be a burden. That Jewishness, like all the other bequests of life, may perhaps have to remain always partly a burden, and always partly insoluble, was a thought he either did not have or rejected. ZANSER HASIDIM, *see* HALBERSTAM, HAYIM.

ZAPHENATH-PANEAH, the Egyptian name given to Joseph after he was raised to eminence by Pharaoh (*Gen.* 41:45). The Septuagint gives it as Psonthomfanech, which may imply a somewhat different underlying text. There have been attempts to explain the name from the earliest times. The Jewish interpretation, "revealer of secrets," is artificial, being based on the Hebrew root *tzafan,* "to conceal." Jerome's rendition, "savior of the world," seems based on hardly better ground. The explanation most widely accepted among Egyptologists is De-pnute-ef-onh, "The god speaks and he lives."

ZAREPHATH, a village located about eight miles south of Sidon; its modern name is Sarfend. It lay in the territory of the Phoenicians and it was thither that Elijah fled from the persecution of Ahab and there that he lodged with a widow, whose son he restored to life (*I Kings* 17:8-24). Zarephath is mentioned in *Ob.* 20 as being the boundary of the captivity of the Israelites among the Canaanites (Phoenicians). The same verse mentions Sepharad; when the latter became identified with Spain, it was natural to apply the term Zarephath to the neighboring country of France, which is often called *'eretz tzarefath* in medieval Jewish literature. Names such as Zarfati or Sarfatti indicate a family of French Jewish origin.

ZARFATI (also **Zarfathi** and **Sarfati**), family name derived from *Tzarefath,* the medieval Hebrew term for France; it always indicates a French origin. The earliest known person who bore this name was Meir Zarfati (Meir Hakohen), who lived in Narbonne and emigrated to Toledo, where he died in 1263. Other early members of the family were Abraham Zarfati, who migrated to Catalonia and was the author of *Tamid Hashaar,* the mathematician Joseph ben Moses Zarfati, and Isaac Zarfati, who migrated to the Orient, and about 1450 issued an appeal to the Jews of Western Europe to follow his example.

SAMUEL ZARFATI, physician to the pope, lived in the 15th and 16th centuries. When the Jews were expelled from Provence (1493-1500) Samuel, who lived there, was assured by King Louis XII that he personally would not be molested. He nevertheless preferred to emigrate in 1498, and settled in Rome, where he became famous for his cures. He represented the Jewish community at the coronation of Pope Julius II (1503), and became the latter's personal physician. His reputation was greatly enhanced in 1511, when he successfully predicted the recovery of the pope from a serious illness at a time when all the pope's other physicians had given up hope. He was permitted to treat Christian patients and was granted full rights of residence; he and his family were exempted from wearing the Jew badge. He died about 1513.

JOSEPH BEN SAMUEL ZARFATI, son of Samuel, was a mathematician and physician. He is called Josiphon, Giosofante and Giuseppo Gallo by Christian writers. He was versed in Hebrew, Aramaic, Arabic, Greek and Latin, and enjoyed high favor in the papal court, receiving a confirmation of the family privileges from Pope Leo X (1513-21). The latter part of his life was dogged with misfortune. An unfaithful servant ran off with his fortune, he was falsely accused of being a spy, he was beset by robbers, and he escaped the siege of Rome in 1527 only to fall victim of the plague and to die outside of the city of Vicovaro.

ISAAC ZARFATI was physician to Pope Clement VII (1523-34), who renewed the privileges granted to the family. He was an intimate of the papal household.

Another Zarfati family, whose descent was traced by Azulai from Rashi and Rabbenu Tam, settled in Fez, Morocco. Its earliest known member is Vidal Zarfati I, who was rabbi in Fez in the middle of the 16th cent. His grandson, Vidal Zarfati II, was rabbi there about 1660 and was the author of *Tzuf Debash* (Honeycomb), a Talmudic commentary. The latter's son, Samuel ben Vidal Zarfati (d. 1713), was chief rabbi of Fez; he wrote a defense of Maimonides, *Nimmuḳe Shemuel,* and several rabbinical works. Samuel's grandson, Elijah Zarfati, was chief rabbi of Fez about 1770.

AARON BEN ABRAHAM ZARFATI, who was a grandson of Vidal Zarfati II, was teacher and preacher in Amsterdam. He wrote *Misgab Immahoth* and published the work of his grandfather (1718). David Zarfati de Pina, his son, was a noted physician, poet and preacher in Amsterdam. He is supposed to have been one of the first men to deliver a lecture in the great synagogue in Amsterdam after its dedication (1675).

MORITZ FREIER.

ZARISKI, OSCAR, mathematician, b. Kobryn, Poland, 1899. He studied at the Universities of Kiev and Rome (Dottore in Matematiche, 1924), and emigrated to the United States in 1928. In the same year he became affiliated with Johns Hopkins University, Baltimore, where he was appointed full professor of mathematics in 1937; he still held this position in 1943. Zariski also taught at the Institute for Advanced Study, Princeton, N. J. (1934-35), the University of Moscow (1935) and Harvard University (1940-41).

He published under the title of *Essenza e significato dei numeri; continuità e numeri irrazionali* his Italian translation of a German book by R. Dedekind (Rome, 1926), and *Algebraic Surfaces* (Berlin, 1935). He was editor of the *Transactions of the American Mathematical Society* and of the *American Journal of Mathematics,* and associate editor of the *Annals of Mathematics.*

ZBARAZER, WÖLWEL, *see* EHRENKRANZ, WOLF.

ZEAL, *see* JEALOUSY.

ZEALOTS, the name of a party among the Jews in the period beginning with the reign of Herod, 37 B.C.E., and lasting until the fall of Jerusalem in 70 C.E. They were a religious party, but differed in some important respects from the other religious parties of the time. They were not pacifists like the Pharisees, nor priestly politicians like the Sadducees, nor pious recluses like the Essenes. They were wild fanatics, banded together against all enemies of Israel, all who oppressed the people of God and who, by doing so, were held to affront God himself.

The name Zealot represents accurately the Hebrew *Kannai,* by which name members of the party are referred to in rabbinic literature and in the Gospels, although the name there is somewhat disguised (Cananaean, *Mark* 3:18). As an organized party, the Zealots are seen for the first time as followers of Judas of Galilee in 6 C.E. when a census after the Roman manner was enforced upon the Jews by authority of Quirinius, the governor. The holding of the census was the most conspicuous act of Gentile domination which had till then been endured by the Jewish people, and Judas of Galilee made it the occasion for a protest not in words but by violence. He gathered round him a band of desperate men who swore undying hostility to the Gentile oppressor.

The origin of the Zealots is to be found, however, in an earlier period of history, and the underlying motive of their action as a religious party becomes clearer when seen in the light of that earlier history. The Maccabean revolt (168 B.C.E.) had had a twofold purpose: to defend the religion whose symbol was the Torah, and to secure liberty for the Jewish people from the yoke of the Syrian kingdom. The two objects were so closely allied (though by no means identical) that they formed an irresistible bond of union among the insurgents, and made possible the victory which was achieved. It was a victory of those who were "zealous for the Torah," and that meaning of the Maccabean revolt was never forgotten. Henceforward the Torah was owned by Jews of all parties as the symbol of the national religion and of its triumph over all forms of Hellenism.

But not all parties put the same meaning upon their devotion to the Torah. The attitude of those who became the Pharisees and the Sadducees is described in the articles dealing with those parties. There were those who saw in the Torah the word of the God Who had chosen Israel, Who was not merely the one only God but the one only lawful King over Israel ("the gods of the nations are idols"). The rights of the true God were infringed by all worship given to others, and no less by all oppression of His chosen people.

The century which followed on the Maccabean revolt, down to the reign of Herod, provided plenty of material for the growth of such ideas, although during that time no actual outbreak of importance took place. But when Herod pushed his way onto the throne of the Maccabean princes, being himself no Jew but a hated Idumean, and when he showed himself a cruel and vindictive tyrant, then the smoldering fires of fanatic anger began to glow here and there.

The historian Josephus tells of one Hezekiah, whom he calls a "robber-chieftain," and who was put to death by Herod at the beginning of his reign. Hezekiah was the forerunner of the Zealots, for it was his son who was the Judas of Galilee known to history as the actual founder of the Zealot party. But Judas

only carried on with more success what his father had begun, and fanned into fiercer flame the fire which had already been kindled, and whose fuel was heaped up by the successive cruelties and protracted tyranny of Herod. The band of fanatics who followed Judas set themselves to promote the cause of religion by violence, directed against all who were not "zealous for the Torah," whether Gentile oppressors or poor-spirited Jews ready to save themselves by timid compromise. Open war against Herod or against Rome was not yet possible, and the means used were assassination and robbery, committed by roving bands of desperadoes or by single stealth.

The name of Sicarii, or dagger-men, was applied to the Zealots; and there seems no ground for distinction between them. The principles of the Zealots may not originally have included the use of the dagger, as a means of propaganda; but, in practice, the passage from the one to the other was very speedily made and never retraced.

The unhappy years from the reign of Herod till the fall of Jerusalem gave only increasing provocation to the fanaticism of the Zealots. Judas left to his sons, Simeon, Jacob and Menahem, a legacy of hate against Rome; and his grandson Eleazar, at the close of the war against Vespasian in 68 C.E., was the hero of the last stand in the fortress of Masada when it was stormed and captured. The war from beginning to end was mainly the work of the Zealots, although, when it had broken out, all Jews of whatever party were more or less involved in it.

The Zealots are not mentioned by name after the war against Vespasian; but the later war against Hadrian (132-35 C.E.) shows that then also there was an outbreak of the old Zealot fury, for the same reasons and by the same methods as on the earlier occasion. In each case the same result followed, the crushing defeat of the attempt to win by violence what had seemed, to those who used violence, the goal of the dearest hope of Israel.

The Zealots were not Pharisees. The fact that both parties reverenced the Torah proves nothing in this connection. Since the Maccabean revolt all Jews reverenced the Torah; every type of the Jewish religion was based on it. The Pharisees worked out an elaborate system of interpretation of the Torah, and the conceptions of Halachah and Haggadah were fundamental in their system. Moreover, the Pharisees were on principle pacifists, and opposed to all attempts to bring about by violence what God would send in His own time and way. The Pharisees never coalesced with the Zealots, and were swept into the great wars only against their will, and by mere force of numbers. It is true that a Pharisee, Zadok, is said to have supported Judas in forming the Zealot party, just as Akiba, in 135, declared for Bar Kochba; but in neither case did the Pharisees as a whole, or in any considerable numbers, follow those solitary examples. Nor could they have done so, however great the provocation of Gentile oppression, without being false to their principles. The Zealots and Pharisees were both independent growths from what may be called the original Torah stock.

In accordance with this view, the large literature which includes the writings known as Apocalyptic is probably to be regarded as expressing the ideas of the Zealots. It is certainly not Pharisaic. And, while it may be fairly doubted whether the fighting men of the Zealots had time or inclination for writing books, yet whoever did write the Apocalyptic books was well acquainted with the ideas of the Zealots, on both the nobler and the baser side. It is only fair to say that this view is not the one commonly held.

R. TRAVERS HERFORD.

Lit.: Herford, R. Travers, *The Pharisees* (1924) 176-97; Kohler, K., in *Jewish Encyclopedia,* vol. 12, pp. 639-43.

ZEBAHIM ("sacrifices"; older name, Shehitath Kodashim, "slaughtering of the holy things"; in the Tosefta, Korbanoth, "offerings"), first tractate of Kodashim, the fifth division of the Mishnah and Talmud. It contains fourteen chapters, and gives the regulations about the sacrifices as performed in the time of the Second Temple. The opening three chapters describe how a sacrifice may become unfit because of oversights in the sacrificial act or improper intention on the part of the priest or the donor. Next there are discussed such topics as the sprinkling of the blood, offerings made by non-Jews, the places where the various animals are slaughtered and their blood sprinkled, and for how long their flesh may be eaten. Most of chaps. 6 and 7 deals with the sacrifice of birds. Then comes the discussion of what happens when various animals intended for sacrifice, or their bloods, become mixed, and what things can not be removed once they are placed on the altar. The remaining part of the tractate discusses such topics as the cleansing of garments and vessels touched by the blood of the sacrifices and the division of the portions among the priests. The last chapter discusses how the sacrifices were offered in the "high places" and in the shrines of the Tabernacle, and at Gilgal, Shiloh, Nob and Gibeon.

The Tosefta to the tractate (13 chaps.) has some interesting additional information, such as a description of the altar (6:11), an explanation of the term *shelamim* for one type of sacrifices (11:1), and the length of the periods in which the sanctuary was at various places before the Temple was built in Jerusalem (13:6). The Babylonian Gemara has similar information, and is one of the most difficult portions of the Talmud. There is no Palestinian Gemara.

Lit.: Danby, Herbert, *The Mishnah* (1933) 468-90; Lauterbach, J. Z., in *Jewish Encyclopedia,* vol. 12, pp. 643-44.

ZEBAOTH, *see* GOD, NAMES OF.

ZEBULUN. 1. The sixth son of Jacob and Leah, born in Haran. There are two explanations of the name in *Gen.* 30:20. The first is connected with the idea of a gift from God (*zabad*); the second, apparently, with the idea that Leah's husband will now dwell (*zabal*) with her.

2. A tribe of the same name, of which Zebulun was the reputed ancestor. Its territory was in the north of Palestine, close to that of Issachar, Reuben, Asher and Naphtali. As given in the land division in *Josh.* 19, it was wholly inland; but other passages (*Gen.* 49:13; *Deut.* 33:18-19) hint at a residence along the shore of the Mediterranean. From the latter passage it would appear that the tribe engaged in trading and glass manufacture. Zebulun is mentioned as one of the six tribes which engaged in the great battle with Sisera (*Judges* 4:6, 10; 5:14, 18), and it produced one of the judges, Elon (*Judges* 12:11-12). Nothing is heard of the tribe in the period of the kings. Its territory was among that devastated by Tiglath-pileser of Assyria in 732 B.C.E., and it is probable that its members were led into exile at that time.

Lit.: The Biblical commentaries and histories.

ZECHARIAH ("God remembers"), eleventh in the canon of the twelve Minor Prophets, "the son of Berechiah, the son of Iddo" (1:1, 7; cf. *Ezra* 5:1; 6:14), to whom is attributed a collection of prophecies, eschatological predictions, and apocalyptic visions in the fourteen chapters of the book which bears his name. He was a priest (*Neh.* 12:16), a contemporary

of Haggai, and probably one of the exiles who returned to Jerusalem with Joshua and Zerubbabel. Vitally interested in the rebuilding of the Temple (520-516 B.C.E.), Zechariah began his ministry in the second year of Darius Hystaspes, probably in November of the year 520 (1:1), some two months after Haggai's first oracle. Other authentic preachments of Zechariah are dated the middle of February, 519 (1:7), and December 7, 518 (7:1). Zechariah had seen the fulfillment of Jeremiah's prophecies (*Jer.* 15:1; 29:10), but for the restoration of the Temple. Haggai had so inspired the people that twenty-four days after his first sermon the foundations of the structure were laid. It was left for Zechariah to complete the work (*Ezra* 3:8-10; *Zech.* 1:16). The altar was set up (*Ezra* 3:2-3), but there was no worthy priest to officiate (*Zech.* 3:3). Zechariah had to overcome the apathy of the people and to inspire them to complete the structure and restore the sacrificial cult. In all this the prophet was successful. Zechariah received the word of God through visions, mediated by an angel of God, often referred to merely as "the angel," who is contrasted with "the satan," the mischief-making source of the people's pessimism and apathy (3:1-2).

The book of Zechariah consists of eight visions of the night (1:7 to 6:8), preceded by an introductory address (1:1-6) and an appendix (6:9-15). The authentic words of Zechariah are concluded with oracles treating the observances of fasts (chaps. 7 and 8). The initial preachment (1:1-6) exhorts Israel to return to God, so that He will return to them. The visions may be summarized: 1. The rider and horses presaging the Messianic age when the Temple will be rebuilt, the Jews will prosper, and the heathen suffer (1:7-17); 2. The four horns of the nations broken by the four smiths (2:1-4); 3. The man with the measuring rod to indicate that Jerusalem can have no bounds, so great will be its population and possessions (2:5-9); 4. The high priest Joshua is richly clothed and the coming of the scion of David is announced (3:1-10); 5. The golden Menorah between the two olive trees limns the rebuilt Temple served by Joshua and Zerubbabel (4:1-10); 6. The scroll of curses destroys the houses of the wicked (5:1-4); 7. Wickedness, personified in a woman, is transported to Babylon (5:5-11); 8. Four chariots go forth to the four directions of the earth (6:1-8). The historical data appended to the last vision, as analyzed by Hyatt and Pfeiffer, indicate that it was Zerubbabel and not Joshua who was crowned, presumably with insufficient secrecy, for Zerubbabel was soon spirited away by the Persian authorities. He never ascended the throne, for two years later one Bethel-sar-ezer is the leader of Judea. Embarrassed by this failure of Messianic expectation, a later editor substituted the name of Joshua for Zerubbabel in 6:11 and omitted the detail of Zerubbabel's unhappy fate.

In the closing oracles Zechariah declares that obedience to God's moral law, not fasting, is His will (7:4-7). Since the forebears of Israel had turned a deaf ear to God's prophets, in his wrath God had scattered Israel and destroyed its sanctuary (7:9-14). The second address consists of ten short oracles, wherein God assures discouraged Israel that He will dwell in a Jerusalem soon to be populous, if Jewry becomes righteous again (8:1-17). The four fast days are to become feast days, and the nation will come to Jerusalem to worship God (8:18-23).

The second part of Zechariah, chaps. 9 to 14, are clearly from another hand and a different historical period. The strange historical allusions and apocalyptic visions contrast so sharply with the clear historical background of chaps. 1 to 8 that scholars are agreed that the oracles, 9 to 11 and 12 to 14, are the work of a Second Zechariah. The latter two sections are units except that 13:7-9 originally followed 11:4-7. The apocalyptic nature of this Second Zechariah may be noted in the five distinct apocalypses in these chapters. In the first (9:1-10), a divine invader, possibly Alexander, will devastate Syria, Phoenicia and Philistia, to be followed by the conversion of the Philistine remnant and the coming of the Messianic king. In the second, the dispersed Jews will unite with Judah and Ephraim, defeat the Greeks, and usher in an era of peace and prosperity (9:11-17). In the third, all Jews (Judah, Joseph, and those abroad) will defeat the rulers of Egypt and Syria, probably the Ptolemies and the Seleucids (10:3 to 11:3). In the fourth, Jerusalem will be delivered from attack through God's intervention, will mourn the death of its chosen one, will be freed of idolatry and false prophecy, and will be purified by a divine fount (12:1 to 13:6). In the fifth, Jerusalem is to be sacked, but half the people are to be spared; the millennium is to dawn following the great earthquake, with greater fertility and peace than ever before; Jerusalem's enemies will rot away and the remaining nations will be compelled to serve God in Jerusalem at the Feast of Tabernacles (chap. 14). It is likely that all five oracles are the work of one author, rather than of two or more, as has been suggested by various critics, although they were probably written at different times.

The allegory of the shepherds (11:4-17 and 13:7-9) points to a definite but unknown historical period. It is unlikely, however, that it is either during the days of the Kingdom of Israel (933-722 B.C.E.) or at the beginning of the Maccabean revolt (168 B.C.E.), as some writers believe. Since no part of Second Zechariah is earlier than the time of Alexander the Great (d. 321 B.C.E.), it is probable that this section, as well as the five apocalypses, belong to that obscure period of Jewish history of the 3rd cent. B.C.E. Such a dating is consistent with the apocalyptic nature of the prophecies, as well as with more detailed evidences of the late post-Exilic period, such as emphasis on ritual and ceremony (9:7, 11; 14:16-20), reference to Jewish communities in the Diaspora (9:11-12; 10:8-11), the remote likelihood of a true prophet's appearing (13:2-6), and imitation of parts of *Ezekiel,* Second Isaiah, *Joel,* and of earlier post-Exilic apocalypses. Maccabean origin of Second Zechariah is precluded by the fact that Sirach (about 200 B.C.E.) knew "The Twelve Prophets" (*Sirach* 49:10) substantially as canonized.

The outlook of the historical Zechariah, unlike that of his colleague Haggai, whose only purpose was the rebuilding of the Temple, embraced both popular millennial dreams and deep religious convictions. Striving to restrain Israel from being caught up in the surge of rebellions that began in 521 B.C.E., he announced that the world was at peace (1:11) and that Jerusalem's walls need not be rebuilt (2:5-9). He did, however, yield sufficiently to participate in the coronation of a Messianic king (6:9-15) and to pronounce anathema upon great empires (2:1-4, 12-13). Like Second Isaiah, he really favored conversion of the nations to Judaism, rather than their destruction (2:12-15; 8:20-23), effected through divine intervention rather than military prowess (2:9, 17; 4:6). While somewhat reluctantly, Zechariah supported the rebuilding of the Temple (1:16; 4:9); the rites, ceremonies and symbols were secondary. Like the earlier prophets, he regarded justice and righteousness, mercy and morality (7:8-11; 8:16-17) as the essence of true religion.

Hardly a great writer or original thinker, Zechariah is distinguished from his colleagues, writes G. A. Smith, by his "gift of plain speech." His visions were not the spontaneous outpourings of a heart overflowing with the burden of prophecy, but rather the labored effort of a diligent but ordinary mind. The book is significant, however, not only as a transition between prophecy and apocalypse, but as a reaffirmation of prophetic teachings at a time "when prophecy was rapidly running to its own extinction."

ZECHARIAH, TOMB OF, *see* under ABSALOM'S TOMB.

ZECHUTH ABOTH ("merit of the fathers"), a doctrine which attained prominence in rabbinical literature and received considerable attention in the traditional Jewish prayer-book, to the effect that the surplus merit acquired by the men (and women) of extraordinary righteousness and piety, and more especially by the founders of the faith, above and beyond what was needed by themselves to earn salvation, could be drawn upon and actually was drawn upon by their direct descendants and by subsequent generations in Israel generally, to make up for the latter's own deficiencies.

The use of the term "doctrine" here is to be understood not in any rigid sense but rather as a notion, fluid in character and flexible in application, with a spiritual rather than a theological function, indeed more as a poetically conceived moral certitude. The conception courses through Haggadic literature, that is, the recorded utterances of the sages and rabbis intended for edification, in which they allowed their vivid imagination to luxuriate in fanciful speculation on life and destiny. It hardly figures at all in the legal (Halachic) literature. The picture of court proceedings and phraseology is employed by these sages in their poetic speculation on this doctrine, but the Divine Judgment which is envisioned therein does not operate on the basis of legal evidence but rather on that of ethical justification or condemnation, and God's attribute of mercy is always relied upon to soften His attribute of strict justice (*Midrash Gen.* 12 and 33; *Pesikta, Shubah* and *Bahodesh; Sanh.* 92a; *Ber.* 48b; *Midrash Lev.* 29).

The doctrine of Zechuth Aboth is rooted in the conviction that man has been endowed by the Creator with the capacity, deriving from his freedom of will, of subordinating his inclination to evil (Yetzer Hara) to his inclination to good (Yetzer Hatob) and that there is available to him, in this conflict between his two selves, an additional aid in the form of the spiritual illumination and the resultant strength which come from revelation through the Divine Law (Torah). The righteous who fill themselves with the spirit of the Law and live a godly life acquire more merit than they need for their own salvation, and this surplus virtue accumulates, so to speak, as a treasury of merit transferable to their own children and their children's children and to Israel at large throughout the generations.

While this doctrine is occasionally used by the rabbis in reference to ancestors generally, and somewhat more frequently in reference to the early heroic Biblical figures who distinguished themselves by exceptional acts of faith and works of righteousness, its most common and specific application is to the three Patriarchs—Abraham, Isaac and Jacob. (In this article we shall confine ourselves to this last-mentioned phase; the two other, less restricted, aspects are dealt with in detail in the literature cited below.)

Rabbinical fancy, harking back to the beginnings of Israel's history as the golden age, delighted in extolling and idealizing the Founding Fathers, minimizing or ignoring their faults and magnifying their virtues. The following are a few of the wealth of passages on this subject: "At the very beginning God wanted to found the world but He did not find it possible . . . As soon as the Fathers arose and manifested their merit, God said, 'For the sake of these will I found the world' " (*Midrash Ex.* 15). Israel was redeemed from Egypt because of the merit of the Fathers (*Sifra* 94a). God went before Israel in the wilderness because of the merit of Abraham (*Midrash Ex.* 15). God spoke to Moses from the mountain (that is, revealed the Torah on Sinai) because of the merit of the Fathers (*Midrash Ex.* 28). God did not answer Elijah until he appealed to Him as the God of Abraham (*Midrash Ex.* 44). When Israel sinned in the wilderness, Moses stood long before God and offered many prayers but was not answered; however, when he said: "Remember Abraham, Isaac and Jacob, Thy servants," he was answered at once (*Sab.* 30a). In addition to the credit for their personal virtues, the Patriarchs earned and stored up an inexhaustible fund of merit which they passed on to Israel at large for all eternity by reason of their making the Covenant with God.

Of all the great deeds of the Patriarchs the Akedah (literally, the "binding" of Isaac), described in *Gen.* 22, was seized upon as the noblest and was extolled and magnified. The great merit of Abraham, manifested in his being willing and ready to offer his beloved son to God, forms a main theme in old Jewish literature. Isaac, the rabbis emphasized, was Abraham's precious son, his very soul (*Sifre* to *Deut.* 32:10; *Tanhuma* to *Num.* 15:55), and yet Abraham's love of God was stronger than any earthly attachments (*Sefer Hayashar,* chap. 2; *Jubilees* 17:16; Philo, *De Abrahamo* 35; *Sanh.* 89b; Maimonides, *Moreh Nebuchim,* book 3, chap. 24). The angels themselves wept when they saw Abraham reach out for the knife, and they implored God to stay his hand (*Pesikta Rabbathi* 40; *Zohar I., Vayera*). God credited Abraham with as much merit as if he had offered himself as a sacrifice (*Midrash Gen.* 56).

Thus has rabbinical imagination exalted and magnified Abraham for suppressing the pangs of a father's feelings to obey the command of God. The basis for all this is, nevertheless, Biblical. But there is another phase of the Akedah which has no Biblical basis whatsoever, namely, *the merit of Isaac.* This new element is altogether the product of post-Biblical thought.

Haggadic literature attempts to show Isaac's merit in three ways: 1. by representing Isaac at the time of the sacrifice as being older than he probably was and therefore as capable of resisting his father, had he desired to do so, when the latter bound him; 2. by picturing him as willing, nay longing to be sacrificed in order to obey the will of God; 3. by representing the process of the sacrifice as having gone further than it did according to the Biblical account, that is, that his soul departed from his body the moment the sword touched his neck and returned to it only by divine command. In short, it was not a proposed sacrifice, but an actual one! (*Targum Jonathan* to *Gen.* 22:1, 10; *Midrash Gen.* 55 and 56; *Tanhuma,* edit. Buber, 109, 114; *Targum Yerushalmi* to *Gen.* 22:10; Ibn Ezra on *Gen.* 22:4; *Seder Olam Rabbah,* Amsterdam ed., chap. 1; *Sanh.* 89b; Josephus, *Antiquities,* book 1, chap. 13).

Thus Isaac is depicted as assisting his father heartily in preparations made for his own death. How glorious this appeared to pious idealists! God was sitting and watching the father binding and the son being bound, each with his whole heart (*Pesikta Rabbathi* 40; *Targum Jonathan* and *Targum Yerushalmi* to *Gen.* 22:10; *Pirke de Rabbi Eliezer* 31). Great was the reward of the two Patriarchs for this extraordinary demonstration of willingness to serve God. Not so much in its immediate compensation, however, as in its future bear-

ings did the reward consist. The minutest link in the chain of actions constituting the Akedah became a theme for homilies and praise. The Akedah in its single parts and in its totality was portrayed as a perfect event, so extraordinary in its superiority as to constitute a special treasury of merit upon which later generations could draw without ever exhausting it. The Jews of later times, living in an unfriendly world, suspecting that it was their own sinfulness and unworthiness that had brought them to their low estate, turned away from the miserable present to the glorious past when God was more favorably inclined toward Israel, when the great men among the builders of the faith created a vast reservoir of virtue as a legacy for their descendants. Abraham is represented as making precisely this proviso with God, that his and Isaac's descendants might, when they fell into distress, be permitted to draw upon this reservoir of merit created by the Akedah.

In a prayer to God he says that just as he did not insist upon his just rights, not hesitating to offer Isaac as a sacrifice although God had only a short time before promised to perpetuate his seed through this his beloved son, so God should be lenient with Isaac's descendants: "When the descendants of Isaac fall into sin and bad deeds, remember for their benefit the Akedah of Isaac, their father, and rise from the throne of justice to the throne of mercy" (*Midrash Lev.* 29; *Pesikta, Bahodesh; Yer. Taan.* 2:6; *Tanhuma,* Vienna ed., 28b; *Targum Jonathan* and *Targum Yerushalmi* to *Gen.* 22:14). And God answers: "The descendants of Jacob are indeed going to sin before Me, and I shall judge them on Rosh Hashanah; but if they want to be declared innocent before Me in judgment (to find Zechuth for themselves) by My recalling for their benefit the Akedah of Isaac, let them blow to Me on the horn (Shofar) of this ram (indicating the ram substituted for Isaac in the sacrifice)" (*Tanhuma, ibid.; Pesikta Rabbathi* 40; *Midrash Lev.* 29).

The doctrine of the merit of the fathers is already adumbrated in the Bible in the Second Commandment (*Ex.* 20:6) in the clause, "showing mercy unto thousands (of generations) of them that love Me and keep My commandments." Philo (1st cent. B.C.E.) devotes many pages to show that Abraham's act in the affair of the Akedah was more distinguished and exalted than all other similar deeds related in history (*De Abrahamo* 35). Josephus likewise elaborates and magnifies this act of Abraham beyond the account given in the Bible (*Antiquities,* book 1, chap. 13). The doctrine emerged in early post-Biblical centuries and became a favorite concept in the ethical dicta of the Haggadists, who flourished approximately 100-500 C.E., and in the utterances of subsequent teachers recorded in later works of the same pattern and spirit. It is interesting to note that in the ancient synagogue unearthed (1928-29) at Beth Alpha in Palestine, which dates from the reign of Justinian (6th cent.), the mosaics of one section of the floor portray the sacrifice of Isaac.

The idea of the merit of the fathers attained prominence in the traditional Jewish prayer-book. The benediction known as *Aboth,* the first of the Eighteen Benedictions of the daily prayers, and the Akedah narrative (*Gen.* 22), said as an "extra" by very pious individuals after the daily prayers; the petition *Attah Zocher* ("Thou rememberest," in which the binding of Isaac is specifically recalled) in the New Year liturgy; the public reading of the Akedah section from the Scroll of the Law on the second day of Rosh Hashanah—these and many other passages attest to the fact that this doctrine became a living force in the consciousness of the Jewish people.

Indeed S. Levy, in his essay "Original Virtue," presents the novel thought that the Akedah concept assumed the stature of a major doctrine offered by these early teachers as the answer of Judaism to the Christian doctrine (then advanced) of Original Sin in the scheme of salvation—that this transcendent act of virtue on the part of Abraham and Isaac gave mankind a fresh start in its career, nullifying the sin of Adam and Eve in the Garden of Eden (which never struck root in Jewish theology) and creating a vast, inexhaustible reservoir of merit upon which the individual and the race could draw as an aid to righteous living and as a helpful factor in relation to Divine Judgment.

R. Travers Herford has shown conclusively that "merit" and "reward" as used by the rabbis and sages were seldom identified with material returns but rather with spiritual satisfactions. He, Levy, Schechter and Marmorstein have made it clear that this doctrine did not have the effect of leading people to rely on the extra virtue stored up by ancestors for their benefit as an excuse for evil doing or irresponsibility on their own part—something the rabbis warned against time and again when expounding this very doctrine —but that, far from silencing the conscience of the individual, it acted as a spur and an inspiration for higher conduct on his part, conduct worthy of the exceptionally righteous deeds of his forebears. It was a case of original virtue stimulating parallel virtue in the descendants, of what we know as "noblesse oblige." Perhaps the modern conception of "heritage," with all that it implies in pride, dignity and emulation, best expresses the idea "merit of the fathers" as well as its operation in relation to its intended beneficiaries.

Finally, it is to be observed that this concept is but one phase of the more inclusive doctrine of merits; that there is also found in rabbinical literature the notion of Original Sin as a counterpart of the doctrine of Original Virtue (although, as pointed out above, it never attained the importance it did in Christian theology and indeed holds but a minor place in Jewish religious thought)—a notion which may be designated as the doctrine of demerits; there is furthermore the intriguing thought entertained by some of the rabbis in this same literature that both the virtues and sins of their descendants exert an influence for good or bad retroactively on their progenitors, by way of anticipation, in the Divine Judgment. All these elements together will be seen as constituting a theory of human salvation, divinely planned, which is founded on the basic thought of the solidarity of mankind, every individual affecting for good or bad his own kin and all his fellowmen, before and after him, and every generation influencing beneficially or adversely every other generation before and after it. "Why has the Holy One, blessed be He," asks Simai, "created just and wicked people? In order that they shall atone (make compensation) for each other." "Why has the Holy One, blessed be He, "asked Tanhum bar Hiyya, in the same context, "created poor and rich? In order that they may sustain one another" (*Pesikta,* edit. Buber, 191ab).

ZEDEKIAH (*Tzidkiyahu*), son of Josiah and last king of Judah (597-586 B.C.E.). He was placed on the throne by the Babylonian king Nebuchadrezzar after the siege and capture of Jerusalem and the deportation of Jehoiachin and a large part of the people; however, according to seals excavated in Palestine, he seems to have been merely the regent for Jehoiachin, who was still regarded as the rightful king. His original name was Mattaniah, Zedekiah being his throne name. The eleven years of his rule were marked by a steady decline in the fortunes of the kingdom. Zedekiah himself

was a weak man, swayed by his counsellors, now grasping at the straw of Egyptian help and persecuting Jeremiah for his predictions of destruction, now calling Jeremiah for advice in time of peril. False prophets predicted the speedy destruction of the Babylonian yoke, and messengers from the neighboring countries of Edom, Ammon, Moab, Sidon and Tyre urged Zedekiah to join in a general revolt.

The opportunity seemed to be at hand about 590 with the rise of Pharaoh Hophra of Egypt. Zedekiah pretended loyalty, sending an embassy to Babylon, but revolted when Tyre and Sidon opened their gates to the Egyptians. Nebuchadrezzar sent his armies westward to besiege the revolting cities in 588 or 587, and Zedekiah appealed to Egypt for aid. The armies of the Pharaoh marched into Palestine and the siege of Jerusalem was raised for a time; but the Babylonians defeated the Egyptians and the siege was resumed. The city, weakened by famine, fell in Ab, 586 B.C.E. Zedekiah attempted to flee, but was overtaken and captured. His sons were slain in his presence, and he was blinded and taken captive to Babylon, where he died in prison. A vivid account of these events is given in *II Kings* 24 and 25; *Jer.* 19 to 22, 24, and 28 to 39.

ZEDERBAUM, ALEXANDER, Hebrew and Yiddish writer and editor, b. Zamoshtch, Russia, 1816; d. St. Petersburg, 1893. He was not formally educated, and even after going to Odessa at the age of twenty-four he took up tailoring as an occupation. But his progressive mentality led him, in 1860, to the establishment of the *Hamelitz,* the first Hebrew periodical in Russia. Appearing first as a weekly, it was in 1886 turned into a daily. Zederbaum's connection with the publication went through various stages, but he remained one of its mentors throughout his life.

Combined with a devotion to Hebrew literature was his interest in the use of Yiddish as a cultural medium. In 1862 he added a Yiddish supplement, *Kol Mebasser,* to the *Hamelitz;* subsequently the Yiddish periodical, the first to be published in that language anywhere, began to appear independently. Through both journals Zederbaum carried on his support of the Haskalah movement, battling against the influences of Hasidism as well as against the propaganda of over-Russification. He was instrumental in the consolidation of the geographic dialects of Yiddish into a uniform orthography. In 1871 *Kol Mebasser* was banned by the czarist government. Zederbaum transferred the publication offices of the *Hamelitz* from Odessa to St. Petersburg, where he established also the Russian periodical *Vyestnik Russkich Yevreyev,* which lasted for two years.

From 1879 to 1883 he was the co-publisher of *Rassvyet.* In 1881 he won his fight for permission to publish another Yiddish periodical, and established the *Yiddishes Folksblatt.* Here the new nationalist tendencies, looking toward Palestine, found expression, and writers like A. B. Gottlober, M. L. Lilienblum, Jacob Dinensohn and Eliakim Zunser were among its contributors. Zederbaum's multiple activities, however, led finally to financial difficulties that forced the transfer of the *Yiddishes Folksblatt* to other hands and its eventual demise (1887). Some of Zederbaum's work was issued in book form, including *Keter Kehunna,* a history of Hasidism (1868); *Bain Hamitzrim o Yihus Atzmoh,* a novel about Jewish life in Russia (1864); *Aharon* (1868); and *Die Geheimnisse fun Berditchev* (1870).

Lit.: Reisen, Z., *Lexikon fun der Yiddisher Literatur, Presse un Filologie,* vol. 3 (1929), cols. 325-50; Waxman, Meyer, *A History of Jewish Literature,* vol. 4 (1941) 433-37.

ZEDNER, JOSEPH, bibliographer, b. Glogau, Germany, 1804; d. Berlin, 1871. He was teacher at the Jewish school in Strelitz, tutor in the family of A. Asher in Berlin, and a bookseller. In 1845 he was appointed librarian of the Hebrew division of the British Museum, where he served until 1869. His chief work was his *Catalogue of the Hebrew Books in the Library of the British Museum* (London, 1867).

Zedner also made a Hebrew chrestomathy of historical texts (*Auswahl historischer Stücke . . .,* Berlin, 1840), published an edition of Ibn Ezra's commentary on *Esther,* and issued several minor works.

ZEELAND MEMORANDUM, *see* BRANDEIS, LOUIS DEMBITZ.

ZEISLER, FANNY BLOOMFIELD, *see* BLOOMFIELD-ZEISLER, FANNY.

ZEISSL, HERMANN VON, dermatologist, b. Vierzighuben, near Zwittau, Moravia, 1817; d. Vienna, 1884. He received the M.D. degree from the University of Vienna (1846), and became instructor there in venereal diseases in 1850. In 1861 he was appointed assistant professor. Zeissl was the first Jew to serve as professor and chief physician in the general hospital (Allgemeines Krankenhaus) in Vienna (1869-82). Due to his efforts, a department of syphilis was established at this hospital in 1869. Zeissl devoted his entire life to the study of syphilis, and treated more than 30,000 patients. He was regarded as one of the foremost authorities in his field.

Among his published works, *Lehrbuch der konstitutionellen Syphilis* (1864) and *Grundriss der Pathologie und Therapie der Syphilis* (1876) were esteemed as valuable textbooks and translated into several languages. He was a recipient of the Russian Order of Stanislaus, and was knighted by the Austrian emperor.

ZEITLIN, AARON (ELIEZER), Yiddish and Hebrew writer, b. Uvarovicze, Russia, 1898. He was the son of Hillel Zeitlin. Zeitlin studied philosophy at the University of Warsaw, but had already begun to write in Yiddish and Hebrew during his adolescence. His earliest work, mainly poetry in Hebrew and Yiddish, appeared in various Russian periodicals. Zeitlin's first published book was *Matatron,* a long poem (1922), followed by *Shottens oifn Shnai* (1922).

Subsequently Zeitlin wrote also novels and plays, including *Brennendige Erd,* a two-volume novel, published in 1938, which won the Peretz Award. His plays *Jacob Jacobson* (1932), *Esterke* (1938) and *Chelmer Chachomim* (1938) were awarded prizes in Poland. The play *Chelmer Chachomim* was produced also by Maurice Schwartz in New York city, and other plays were given under the auspices of the Vilner Truppe and of Ohel in Palestine. Living in Warsaw, Zeitlin was one of the founders of the daily Yiddish newspaper, *Unzer Express,* to which he contributed a series of lyric-philosophical essays of Hasidic origin.

Leaving Poland after the entry of the Nazis into the country, Zeitlin settled in New York, where he was living in 1943. He was a staff member of the *Morning Journal,* and a contributor to other Yiddish and Hebrew periodicals.

Lit.: Reisen, Z., *Lexikon fun der Yiddisher Literatur, Presse un Filologie,* vol. 3 (1929), cols. 297-99.

ZEITLIN, ALEXANDER, sculptor, b. Tiflis, Georgia, Russia, 1872. He gave his first exhibition in his native city at the age of thirteen; it was attended by Grand Duke Michael, a brother of Czar Alexander II of Russia. Zeitlin was educated at the Royal Academy of Vienna and at the Académie des Beaux Arts in Paris. While in the Austrian capital he attracted notice by executing a portrait bust of the famous actor, Friedrich Mitterwurzer. He did a portrait bust of Archduke

Otto, a nephew of Emperor Francis Joseph I of Austria, and was presented by the archduke with a diamond button and a recommendation in his own handwriting.

He had had his studio in Paris for more than twenty years before he moved (1915) to the United States, where he was still living in New York city in 1943. For his portrait busts of Camille Flammarion he was awarded Palmes Académiques by the French government (1903), and for the monumental statue of Senator Bizarelli in Valence he was made officer of public instruction (1907). Zeitlin did a portrait bust of the Prince of Wales shortly before he became King Edward VII of England. This sculpture was on exhibition at the London Smithsonian Institute, and a copy was in the possession of President Calvin Coolidge.

Zeitlin executed busts of numerous outstanding contemporaries, including Max Liebermann, Efrem Zimbalist, Leopold Auer, Israel Zangwill, Émile Zola, Jean de Rezke, Jules Claretie, Eleanora Duse, Peter Kropotkin, Albert Einstein, Charles A. Lindbergh and Michael Bakounin (for the Birobidjan Museum). For his sketch of the monument to Samuel Gompers he was awarded first prize by the American Federation of Labor (1929).

Lit.: Freed, Clarence I., "A Maker of Living Statuary," *American Hebrew,* Oct. 9, 1925.

ZEITLIN, HILLEL, Hebrew and Yiddish writer, critic and philosopher, b. Korma, province of Mogilev, Russia, 1872. Reared in a Hasidic environment, he studied the Talmud and the works of the Posekim, and gained a reputation as the Illui (prodigy) of Korma. At sixteen he had to earn a livelihood by teaching in various villages and towns, and two years later he began the study of secular subjects and the metaphysical method of philosophy. The writings of Baruch Spinoza, in particular, exercised a great influence upon him. While at Homel he made his first literary contribution to the *Hashiloah* of Ahad Haam, an article entitled "Hatob Vehara" (The Good and the Evil; 1898). In this study he treats the problems of optimism and pessimism in the history of philosophy. Subsequently Zeitlin published monographs on Spinoza (1900), Nietzsche and other philosophers.

Zeitlin also developed a religious philosophy of his own. He wrote basic works on mystical subjects, including *Mafteah Lesefer Hazohar.* He was also one of the first Jews of Russia to become active in the Zionist Movement, served for a short time as proponent of the Uganda project, and championed the territorialistic idea in *Hazeman,* an important Hebrew newspaper published in Vilna, as a steady contributor.

Zeitlin began to write Yiddish in *Dos Yiddishe Volk* (Vilna, 1906). In 1907 he became editor-in-chief of *Dos Yiddishe Vochenblatt* (Warsaw), and leading publicist of the daily newspaper *Haint.* In 1912 he was co-founder of the newspaper *Der Moment,* in which he published thousands of articles.

Zeitlin's articles, in the Hebrew and Yiddish press, and his books concerned themselves with profound problems of religious thought. His works in book form include: *Kethabim Nibharim* (Selected Works; 1911), containing Jacob Fichman's biography of Zeitlin; *Hahasiduth Leshitotheha Utheromeha; Rabbi Nahman Mibratzlav; Dabar Leammim; Sefron shel Yehidim; Demamah Vekol; Shriften* (selected Yiddish works; 1910); *Chasidus* (1922); *Der Aleph-Bes fun Yudentum; Torah-Licht; Gezangen fun En-Sof* (religious poems). He was editor of *Di Teiva, Aleph, Blitz,* and *Hillel Zeitlins Blettlach.* He was reported to have been killed in the annihilation of the Warsaw ghetto in 1943.

ZEITLIN, JACOB, educator, b. Gorky, province of Mogilev, Russia, 1883; d. Urbana, Ill., 1937. He came to the United States in 1892. He studied at Columbia University (A.B., 1904; A.M., 1905; Ph.D., 1908), and became an instructor in English at the University of Illinois in 1907. He was appointed an associate in 1910, assistant professor in 1916, associate professor in 1921, and full professor in 1925.

Zeitlin edited a number of textbooks: *Hazlitt on English Literature* (1913); *College Readings in English Prose* (with Franklin W. Scott; 1914; revised ed., 1926); *Select Prose of Robert Southey* (1916); *Types of Poetry* (with Clarissa Rinaker; 1926); *Seventeenth Century Essays* (1926); *Essays Formal and Informal* (with Franklin W. Scott; 1927). He translated and edited Petrarch's *Life of Solitude* (1924) and Montaigne's *Essays* (in two volumes, of which only the first was published in 1934). He is the author of *Life and Letters of Stuart Sherman* (with Homer E. Woodbridge; 1929).

ZEITLIN, JOSHUA, assistant to Potemkin, Catherine II's favorite, and patron of Hebrew learning, b. Shklov, White Russia, 1742; d. Kherson, Ukraine, 1822. When young, he studied under Aryeh Löb ben Asher, author of *Shaagath Aryeh.* He was made a councilor of the imperial court (Nadvorny Sovyetnik) for his management of the supplies for the Russian Army during the war with Turkey (1787-92). Among Potemkin's projects in which Zeitlin assisted was the colonization of the steppes of southern Russia. Upon the death of Potemkin in 1791, Zeitlin retired to his estate in the province of Mogilev.

Zeitlin was consulted on Talmudical questions by rabbis, and he supported many Talmudists at his estate. These included Nahum, the author of *Tosafoth Bikkurim;* Mendel Levin, author of *Heshbon Hanefesh;* and Baruch Schick, the physician. He was a friend of the Gaon Elijah Vilna, and aided him in his attacks upon Hasidism. Zeitlin himself wrote annotations to the *Sefer Mitzvoth Katan,* and these were published in 1820 together with some of his responsa.

ZEITLIN, SOLOMON, scholar, b. Tshashaniki, Russia, 1892. He studied at the University of Paris, as well as at the École Rabbinique in that city, becoming a rabbi and doctor of theology in 1914. In the following year Zeitlin came to the United States, where he received the Ph.D. degree from Dropsie College in 1917. In 1918 he was made professor of Jewish history at the Rabbi Isaac Elchanan Theological Seminary in New York, retaining this post until 1925, when he became a lecturer. In 1925 he was appointed professor of rabbinical literature at Dropsie College, which post he held in 1943. In 1940 he became co-editor of the *Jewish Quarterly Review.*

Zeitlin was the author of important studies on rabbinic literature and Jewish history. Among these were: *Megillat Taanith* (1922); *Studies in the Beginnings of Christianity* (1924); *History of the Second Jewish Commonwealth* (1933); *Maimonides* (1935); *The Jews—Race, Nation or Religion?* (1936); *The Sadducees and the Pharisees* (1936); *The Pharisees and the Gospels* (1937); *Who Crucified Jesus?* (1942); *Religious and Secular Leadership: Rashi, Maimonides, Saadia* (1943).

ZEITLIN, WILLIAM, bibliographer, b. Gomel, province of Mogilev, Russia, 1850; d. Leipzig, Germany, 1921. He studied in Berlin, and wrote for newspapers and periodicals in Leipzig, especially on Hebrew bibliography. At St. Petersburg, in 1882, Zeitlin published in the *Yevreiski Kalendar* an index of all books which had been written on the subject of the Hebrew calendar; in this index he listed seventy-seven Hebrew books. His most important work was *Bibliotheca Hebraica Post-Mendelssohniana* (2 vols., Leipzig, 1891 and 1895), a bibliographical dictionary of modern Hebrew literature, including books and essays, beginning with the period of Moses Mendelssohn

(1729-86) and extending up to the year 1890. This comprehensive work includes biographical and scientific articles, and formerly bore the title *Kiryath Sefer*.

Zeitlin published in the *Zeitschrift für hebräische Bibliographie* (1905) an index of the anagrams and pseudonyms employed by modern Hebrew authors, arranging the list in alphabetical order. He wrote *Bibliotheca Sionistica* (Frankfort, 1909), containing an index of all Hebrew works written on the subject of Zionism between the years 1852 and 1905, and was chief collaborator on Peter Thomsen's *Die Palästina-Literatur* (*Systematische Bibliographie der Palästina-Literatur;* 4 vols., 1908-27).

ZÉLIQZON, LÉON, philologist, b. Vantoux, near Metz, Lorraine, France, 1858. He was head of the Gymnasium of Metz for thirty-six years, and founded the Metz Verein for the study of Jewish history and literature. In collaboration with Peter Thiriot, he wrote a book on the ethnology of Lorraine (1912). In 1923 he published *Dictionnaire des patois romans de la Moselle,* which was awarded a prize by the Académie des Inscriptions et Belles Lettres in Paris. Zéliqzon was honorary professor at the Lycée de Metz. He was known to be still living at Metz in 1939.

Zéliqzon was the author of the following philological articles: "Lothringische Mundarten" (in Supplement I of *L'annuaire de la Société d'histoire et d'archéologie lorraine,* 1899); "Aus der Wallonie" (in the supplement of *L'annuaire du Lycée de Metz,* 1893); "Die Mundart von Malmedy" (in *Zeitschrift für romanische Philologie,* vol. 17, 1893, p. 419); "Glossar über die Mundart von Malmedy" (*ibid.,* vol. 18, 1894, p. 247); "Mundartliches aus Malmedy" (in *Beiträge zur romanischen Philologie, Festgabe für Gustav Gröber,* Halle, 1899); "Patoislieder aus Lothringen" (in *L'annuaire de la Société d'histoire et d'archéologie lorraine,* vol. 13, 1901, p. 124); "Textes patois recueillis en Lorraine" (in collaboration with M. G. Thiriot; in Supplement IV, *ibid.,* 1912); "Zur lothringischen Volkskunde" (*ibid.,* vol. 25, 1913, p. 67); "La famille ridicule" (a comedy in patois verse of the beginning of the 18th cent.; in Supplement V, *ibid.,* 1916); "Deux documents relatif aux Juifs de Metz sous l'Ancien Régime" (in *Revue juive de Lorraine,* 1934).

ZELOPHEHAD, a man of the tribe of Manasseh who, according to the narrative in *Num.* 27, died leaving no sons, but five daughters. The latter approached Moses and asked him what would become of the inheritance, for evidently at that time only sons inherited. Moses consulted God, and then rendered the decision that in all cases where there were no sons to inherit, the inheritance should be shared among the daughters. This established a precedent for the future. In *Num.* 36 a story is told of a further complication in the ruling, because the daughters might marry outside of the tribe and thus convey their land from their tribe to another. This led to a new ruling, according to which daughters who inherited were limited to marrying men of their own tribe. The story may not be literally true, but it gives a picture of how decisions in individual cases developed into general laws.

The rabbis discuss the question of the sin which is mentioned (*Num.* 27:3) as the cause of Zelophehad's death. It is expressly said there that he was not of the followers of Korah; so some suggest that he was the man who was put to death for breaking the Sabbath (*Num.* 15), others that he was among those who attempted to enter Canaan too soon (*Num.* 14), and still others that his general conduct was sinful.

Lit.: The Biblical commentaries on the passages cited.

ZEMACH, BENJAMIN, dancer, choreographer and stage director, b. Wolkowysk, Poland, 1902. He studied first in Bialystok and later attended the University of Moscow. In 1919 Zemach became associated with the Habimah Theatre in Moscow, which had been founded in 1918 by his brother, Nahum Zemach. He remained with the Habimah in Russia until 1926, when it was moved to Palestine; in 1927 he accompanied the troupe to the United States, where he remained. In addition to giving recitals of his own dance conceptions, which were stylized, tremendously effective portrayals drawing largely on Jewish themes, Zemach was affiliated with various group playhouses in America as choreographer and stage director.

Among these were the Pasadena Playhouse, Artef, the New York Labor Stage and the American Negro Theatre. In 1936 and 1937 he was a member of the cast of *The Eternal Road.* Zemach was the founder of the Jewish Ballet and a director of the Theatre Dance Company.

ZEMACH, NAHUM, theatre director and founder of the Habimah Hebrew Theatre, b. Wolkowysk, Poland, 1887; d. New York city, 1939. Although literature and the theatre had interested him early in life, he became a successful business man before he turned finally to following his inclinations. In 1913 Zemach took a small group of Hebrew-speaking actors with him from Russia to Vienna, where the Habimah Hebrew Theatre was founded. Later it moved to Warsaw, and in 1918, after the revolution in Russia, to Moscow, where Zemach had lived.

In Moscow the Habimah functioned from 1918 to 1926, winning international acclaim for its impressionistic productions. The use of Hebrew went counter to certain extremist groups in Soviet circles, but the artistic accomplishments of the theatre were so great that it had the support of Soviet cultural leaders. Eventually, however, Zemach found it necessary to take the troupe on a tour. It visited the United States in 1926, and Zemach remained in that country, although the Habimah organization, eventually reestablished in Tel-Aviv, became the national theatre of Palestine. Zemach himself went to Palestine from the United States, and for a few years directed the Beth-Am Theatre there. He was made manager of the Jewish Theatre unit of the Federal Theatre Project in 1937.

Zemach's contribution to Jewish cultural life was greater than his achievements in the theatre alone. Here he did create a synthesized unit of presentation, which transcended linguistic barriers as well as did the Moscow Art Theatre. His production of the *Dybbuk,* which he was called on to direct in English, was a culminating fusion of spiritual eloquence, supernatural weirdness, and physical vitality. But it was the statement to the world, through the magnetic medium of the theatre, that Hebrew had been reborn into it, ready to take on every modern mode of expression, that constituted Zemach's greatest triumph.

ZEMACH, SHLOMO, writer and agricultural expert, b. Plonsk, Poland, 1886. He studied the traditional Jewish subjects in the Heders and higher schools of Poland, and later he graduated from the Sorbonne in Paris and from the agricultural school at Nancy, France. In 1903 he went to Palestine and became an agricultural worker.

Zemach was one of the founders of Hapoel Hatzair and helped in writing its program. In 1907 he organized the land workers group, Hachoresh. From 1909 to 1914 he studied at Paris. During the first World War he taught at the Gymnasium Hinuch in Warsaw. From 1918 to 1920 he was teacher of natural history at the teachers' seminary in Odessa. In 1921 he returned to Palestine and until 1923 taught agricultural subjects in Mikveh Israel. From 1923 to 1932 he di-

rected the extension department of the Agricultural Experiment Station under the auspices of the Zionist Organization. In 1932 he represented Palestine at the International Agricultural Convention in Rome. In the years 1932 to 1936 he was director of the Kadoorie Agricultural School on Mount Tabor.

In 1936 Zemach visited the United States in connection with a campaign of the Palestine Foundation Fund. Subsequently he visited North Africa. Zemach was a novelist, short story writer, essayist and critic well known to Hebrew readers. His stories of Jewish intellectuals in the Diaspora and of Jewish workmen in Palestine are replete with brief, original descriptions and fine psychological probing.

His writings appeared in almost all the Hebrew periodicals, particularly *Moznaim,* of which he was editor for a time. Zemach's published works (in Hebrew) include: *Elijah Margolies* (Warsaw, 1919), a novel; *In the Lands of Wandering,* essays on European writers; *Seventeen Stories* (Tel-Aviv, 1928); *Tanchum from Yanuach* (Tel-Aviv, 1929), a historic drama based on the life of the early Jewish ascetics; *Concerning the Beautiful,* essays on esthetics, which was published by the Bialik Foundation. Zemach wrote numerous pamphlets on agricultural problems.

DANIEL PERSKY.

ZEMIROTH, songs in the form of Piyutim (liturgical hymns or songs) which are sung on Friday evening (Ereb Shabbas) and on the Sabbath as well as after the Sabbath meal. The Zemiroth songs tell of the joys and delights of the Sabbath and of the Sabbath meal. The best-known of the Zemiroth are: the graceful and cheerful *Mah Yafith* (How Fair!, cf. *Song of Songs* 7:7); the Aramaic hymn *Yah Ribbon Olam* (Lord, the Master of the Universe), composed by Israel ben Moses Nadjara; and the last *Tzur Mishelo Achalnu* (O Rock, from Whose Substance We Have Eaten), a praise uttered to God over the full wine cup and which introduces the grace after meals, some of the contents of which it parallels. There are Zemiroth also for the conclusion of the Sabbath.

ZEMLIACHKA, SAMOILOVA (Communist Party name of Rozaliya Samoilovna Zalkind), public official, b. Kiev, Russia, 1876. Upon graduation from high school Rozaliya Zalkind (Zemliachka) went to Lyon, France, but returned to Russia in 1896. At the age of twenty she joined the revolutionary movement, working at first in Kiev for the Social-Democratic organization. Arrested, she spent two and one half years in prison. Thereafter she became representative of the *Iskra,* first Social-Democratic newspaper, in Odessa and Yekaterinoslav.

In 1903 she participated in the work of the second congress of the Russian Social-Democratic Labor Party as a delegate (under the pseudonym of Osipov) from the Odessa organization. At this congress Zemliachka took a definite stand on the side of Nikolai Lenin and, after the split in the Party, she joined Lenin's adherents.

In the fall of 1903 she was co-opted as a member of the Central Committee of the Social-Democratic Labor Party, but in the summer of 1904, when the majority of members made clear their attitude of compromise (with the Mensheviks), she resigned. In 1904 she participated in what was known as the "Conference of the 22 Bolsheviks" held at Geneva. Elected to the Bureau of the Committee of the Majority, she represented (1905) the Petersburg party organization at the third congress of the Russian Social-Democratic Party.

During the December, 1905, uprising in Moscow, Zemliachka was secretary of the Moscow Committee of the Bolshevik organization. After the suppression of this revolt she transferred her activities to the military organization. Arrested in 1906 at the All-Russian Military Conference, she managed to escape. Then she worked in St. Petersburg until the arrest of the entire Petersburg Committee (October, 1907). Freed in 1908, she proceeded to Baku and there carried on revolutionary activity. In 1909 she was obliged to emigrate, and worked abroad under the direct guidance of and in close association with Lenin.

In 1914 Zemliachka returned to Russia. Two years later she became a member of the Moscow Bureau of the Central Committee, during the February revolution secretary of the Moscow Committee of the Bolshevik Party, and later organizer of the Rogozh-Simonov district. After the October revolution she served again as secretary of the Moscow Committee and as organizer of the Zamoskvorets district of Moscow. Between 1918 and 1921 (during the civil war) Zemliachka made herself useful at the front. Upon liberation of the Crimea from the Whites, she became secretary of that region's bureau of the Party.

For services at the front Zemliachka was awarded the Order of the Red Banner. In 1921 Zemliachka returned to Moscow and was thereafter secretary of the Zamoskvorets District Committee until the end of 1923. A member (1924-25) of the southeastern bureau of the Central Committee (Rostov on Don), she was also secretary of the Motovilikhin District Committee in the Urals. For various periods after 1927 she was a member of the Collegium of Workers' and Peasants' Inspection, of the Central Control Commission, and of the Collegium of People's Commissariat of Railways. In September, 1931, she won the Order of Lenin for outstanding services in improving the efficiency of the state apparatus.

At the 18th Congress of the Communist Party of the Soviet Union (CPSU), Zemliachka was elected to membership in the Central Committee, attaining to chairmanship of the Soviet Control Commission (1943) and vice-chairmanship of the Council of the People's Commissars.

Lit.: *Bolshaia Sovetskaia Entziklopedia,* vol. 26 (1933); *Pravda,* Feb. 14, 1938; *Izvestia,* June 1, 1939; *Moscow News,* March 27, 1939; *Collection of Soviet Laws and Decrees,* Dec. 4, 1939.

ZEMLINSKY, ALEXANDER, composer and conductor, b. Vienna, 1872; d. New Rochelle, N.Y., 1941. After studies at the Vienna Conservatory he composed an opera, *Sarema,* which won the Lentpold Award in 1897. But it was as conductor rather than as composer that he first became famous. In 1906 he was first conductor of the Vienna Volksoper where he inaugurated a brilliant epoch. Important engagements in Mannheim and Prague added to his stature as musical interpreter. From 1927 to 1932 Zemlinsky was conductor at the Berlin State Opera, and following that he appeared as guest conductor of the foremost orchestras and opera houses in Europe. During this period he enjoyed an enviable reputation also as teacher, his pupils including Erich Wolfgang Korngold and Arnold Schönberg. He served as a brilliant director of the Deutsche Musikakademie after 1920, and as teacher of composition and conducting at the College of Music in Prague.

Zemlinsky composed several operas, including *The Birthday of the Infanta* and *Kreidekreis,* three symphonies, and some chamber music. Although his idiom is a modern one, he was not noticeably influenced by his brilliant pupil and brother-in-law, Arnold Schönberg. Following the occupation of Austria by Nazi Germany, Zemlinsky settled in the United States.

ZEMURRAY, SAMUEL, fruit magnate and philanthropist, b. Bessarabia, 1877. He came to the United States at the age of eleven, and at the age of twenty entered business as a fruit merchant at Mobile, Ala. As the business expanded he moved to New Orleans and continued to prosper, until by 1929 his Cuyamel Fruit Company had become a gigantic business. In 1930 his company merged with the United Fruit Company and Zemurray retired, but in 1933 he returned to become managing director of the United Fruit Company, of which he had obtained a controlling interest. In 1938 he became its president, and was still serving in that capacity in 1943. After the entrance of the United States into the second World War he put the company's fleet at the service of the country for the conveying of needed rubber, rotenone, hemp, wood, oils and other vital products.

Zemurray made numerous benefactions to various institutions in New Orleans, especially for the establishment of the Child Guidance Institute. For this achievement he was awarded the loving cup of the New Orleans *Times-Picayune* for 1938, the presentation being made in December, 1940.

SAMUEL ZEMURRAY, JR. (b. 1911), son of Samuel Zemurray, was a major in the United States Army Air Force, and was killed in action in North Africa in January, 1943.

Lit.: *Coronet,* Feb., 1943, pp. 125-30.

ZENNER, PHILIP, neurologist, b. Cincinnati, 1852. He studied at the Miami Medical College (M.D., 1875) and in several European capitals, and was made professor of neurology at the medical department of the University of Cincinnati (1900).

In 1910 Zenner became professor emeritus. He was the author of *Education in Sexual Physiology and Hygiene* (1910) and *Mind Cure and Other Essays* (1912). In 1929 he established a loan fund for prisoners released from the Ohio Penitentiary.

Lit.: Kagan, Solomon R., *Jewish Contributions to Medicine in America* (1939) 626.

ZENOBIA (Latinized form of the Arabic Zainab; in Aramaic, Bath Zolbai), queen of the Aramaized Arab state of Palmyra (Hebrew, Tadmor) in the Syrian desert. She succeeded to rulership after the assassination of her husband Odenathus (267), extended her rule over Palestine and Syria, and became independent of Rome, but was finally defeated and captured by the Roman emperor Aurelian (273), whose triumph she graced. She seems to have been a friend of the Jews, and Christian sources even report her to have been of Jewish descent.

Zenobia and her son Vahaballatus renewed the grant of sanctity to a Jewish synagogue in Egypt. On the other hand, certain Talmudic sources (especially *Yer. Taan.* viii, 46b) describe her as speaking harshly to Jewish leaders.

Lit.: Graetz, H., *History of the Jews,* vol. 2 (1927) 528-30.

ZENTLER, MICU, industrialist and communal leader, b. Ploesti, Roumania, 1873. He was head of the Distributia Produselor Petrolifere, the largest Roumanian concern engaged in the sale of petroleum and its products, and he fostered the development of the Roumanian petroleum industry. He contributed to philanthropic organizations and served as president of the Templul Coral, the most important Bucharest institution. His greatest achievement in this connection was the founding of the Institutul de Cultura al Templului Coral, a cultural institute and Jewish literary and historical academy, which served as the rallying-point for Jewish writers and teachers and was provided with a museum and a historical archive. This, like other Jewish institutions, was confiscated by the anti-Semitic government in 1940.

ZENTRALWOHLFAHRTSSTELLE DER DEUTSCHEN JUDEN (Central Welfare Organization of the Jews in Germany), founded in 1917 and recognized as the main welfare organization of German Jewry by the law of 1926. It included all Jewish welfare organizations in Germany which were supported by communities, societies and endowments. Affiliated with it were the federation of Jewish hospitals and nursing homes, the social committee of the Allgemeiner Deutscher Rabbinerverband, the committee Lehrerschaft und Jugendwohlfahrt, and the national committee of the Jewish youth organizations.

The organization had branches in all sections of Germany. In 1930 it comprised 207 institutions and fourteen branches of institutions with 9,113 beds, eighty-four aid organizations with 4,547 beds, sixty-five health stations, thirty clinics and polyclinics, ten consulting bureaus, about 190 men's organizations and 440 women's societies, and about 1,550 other welfare organizations, comprising altogether 200,000 members. The Zentralwohlfahrtsstelle issued periodicals (*Nachrichtendienst,* 1922-28; *Zedakah,* 1925-28; *Zeitschrift für jüdische Wohlfahrtspflege und Sozialpolitik,* 1930-38), books and pamphlets. The extent of its work increased considerably after the Nazis' advent to power (1933), but the organization was dissolved after the pogroms of November, 1938.

Lit.: Ollendorff, "Von Zielen und Wegen jüdischer Wohlfahrtspflege," *Vom Wesen der Wohlfahrtspflege* (1918); Wronsky, "Jüdische Wohlfahrtspflege," *Handwörterbuch der Staatswissenschaften,* vol. 3 (1924); Segall and Baeck, "Jüdische Wohlfahrtspflege," *Handwörterbuch der Wohlfahrtspflege* (1929).

ZEPHANIAH ("God is hiding"), ninth in the canon of the twelve Minor Prophets, "the son of Cushi, the son of Gedaliah, the son of Amariah, the son of Hezekiah, in the days of Josiah . . . king of Judah" (*Zeph.* 1:1). G. A. Smith suggests that the name indicates that the prophet's birth took place during Manasseh's reign of murder and godlessness. Since Zephaniah's ancestry is traced back four generations, we can conclude that the last named must have been a person of great importance, probably Hezekiah, king of Judah (720-692 B.C.E.). Whether of royal blood or not, Zephaniah shows a knowledge of Jerusalem, its topography (1:4, 10-11), and the corruptions of the royal house (1:8-9). The period of Zephaniah's brief ministry falls in the early part of Josiah's reign before the reforms of 621 B.C.E., for there is nothing in the book to indicate that they had already taken place. The first two chapters fit the historical setting of Josiah's early reign at the time of the Scythian invasion along the Mediterranean (630-624 B.C.E.). Zephaniah looked upon the Scythian advent as God's instrument for Amos' terrible Day of the Lord, bringing punishment to Israel and to the corrupt neighboring nations.

The book of Zephaniah consists of three distinct parts: 1:1 to 2:3; 2:4-15; and chap. 3, each successively containing a greater amount of editorial additions (1:2-3 and 2:1-3 are the editorial introduction and conclusion to Zephaniah's chief oracle). Zephaniah's principal oracle (1:4-18) denounces Judah for its worship of foreign deities, Baal, the stars, and Milkom (1:4-5), the royal princes and officials for their extortions and adoption of foreign dress and practice (1:8-9), and the merchants and people of Judah for their moral complacency (1:10-14). Appalled, as was Jeremiah, by the Scythian advance, Zephaniah pro-

claims upon them all the judgment of the Day of the Lord (1:7-8, 14-18). In the second part, Zephaniah delivers his oracles of destruction against the Philistine cities (2:4-7), Egypt (2:12), Nineveh (2:13-14; verified by a later writer in 2:15). A writer who knew the unfriendly attitude of Moab and Ammon after 586 B.C.E. inserted imprecations against them (2:8-11). In the third part (chap. 3), greatly expanded by later writers, Zephaniah bewails the corruption of Jerusalem despite all warnings (3:1-7), and announces God's final judgment: Destruction of certain cities (3:8), invasion of others, and removal of Israel's corrupt so that the pious remnant may dwell in peace (3:11-13). God is to be praised for championing Israel and bringing about the millennium (3:14-20).

Strongly influenced by Isaiah and Amos in his thinking, Zephaniah has a forceful, vigorous and picturesque style. His description of the Day of the Lord is classic. He approaches the Scythian onslaught with none of the distraught panic of Jeremiah, but likewise without his great contemporary's deep moral convictions. Zephaniah emphasized God's providential control of the nations, the visitation of His judgment upon corrupt Israel and his neighbors, and the prevailing notions of a surviving remnant, worthy to enjoy God's kingdom. Like the book of *Isaiah* and other prophetic writings, the canonical Zephaniah has the threefold editorial arrangement of the denunciation of the people for its sins, oracles against the nations, and the visions of Israel's glorious future. ADOLPH J. FEINBERG.

ZEPHANIAH (SOPHONIAE), APOCALYPSE OF, a lost pseudepigraphic work of Jewish origin. Clemens Alexandrinus cited a verse from it, and there is apparently a fragment of it in the Coptic manuscript edited by G. Steindorff (*Apokalypse des Elias,* Leipzig, 1899, p. 153). It seems to have received little or no editing at all by Christian hands.

Lit.: Weinel, *Neutestamentliche Apokryphen* (1904).

ZEPHATH, *see* SAFED.

ZEPIN, GEORGE, rabbi and religious executive, b. Kiev, Russia, 1878. He was brought to the United States in 1882. He graduated from the University of Cincinnati (A.B.) and from the Hebrew Union College (1900), and served as rabbi at Kalamazoo, Mich. (1900-1903). He then became director of synagogue and school extension for the Union of American Hebrew Congregations (1903-1906), superintendent of the Jewish Social Agencies of Chicago (1908-1909), and rabbi of Congregation Beth El, Fort Worth, Texas (1909-1910). In 1910 Zepin became secretary of the Union of American Hebrew Congregations, serving until 1941, when he was appointed its honorary secretary as well as secretary of the Joint Committee on Rabbinical Pensions. While serving as rabbi in Fort Worth he was appointed commissioner of charities of the city (1909-10).

As secretary of the Union of American Hebrew Congregations for more than three decades, Zepin was a constructive worker in the field of Jewish religion and Jewish social service.

Many of the institutions which in 1943 formed a part of the Union owed their origin wholly or in part to Zepin's foresight and initiative, especially the department of synagogue and school extension, which he organized. This department embraces a section on Jewish education, which was in 1943 the largest publishing agency in the United States of Jewish educational literature; a department of public information about Jews and Judaism which has circulated over a million and a half of well written pamphlets widely distributed to universities and molders of public opinion; a department of synagogue programming, the first of its kind in the United States.

Zepin took a prominent part in the organization and early development of the Sisterhood, Brotherhood and Youth national federations, and was for a number of years executive secretary of the first two. In 1942 the Hebrew Union College conferred upon him the honorary degree of doctor of divinity.

ZERAHIAH BEN ISAAC HALEVI, *see* GERONDI, ZERAHIAH BEN ISAAC HALEVI.

ZERAIM ("seeds"), first division of the Mishnah. It consists of the following eleven tractates: *Berachoth* (9 chaps.); *Peah* (8 chaps.); *Demai* (7 chaps.); *Kilayim* (8 chaps.); *Shebiith* (10 chaps.); *Terumoth* (11 chaps.); *Maaseroth* (4 chaps.); *Maaser Sheni* (5 chaps.); *Hallah* (4 chaps.); *Orlah* (3 chaps.); *Bikkurim* (3 chaps.). The Tosefta gives a somewhat different order. *Berachoth,* dealing with prayers, was placed first in the division in order to become the first tractate of the Mishnah; the other tractates all contain regulations as to agricultural products. There is a Gemara to *Berachoth* in both Talmuds, but only a Palestinian Gemara to the other tractates.

See the articles on the individual tractates.

ZERE, *see* VOWELS, HEBREW (under TZERE).

ZERLINA, woman physician, who practised medicine in Frankfort, Germany, about 1430 and distinguished herself especially as an oculist. She was allowed to reside outside of the ghetto. Her petition for tax exemption, however, was refused by the city council.

Lit.: Kayserling, M., *Die jüdischen Frauen,* 144; Münz, I., *Die jüdischen Ärzte im Mittelalter,* 57.

ZEROA (lamb-bone), *see* SEDER.

ZERUBBABEL, governor of Judah in the latter part of the 6th cent. B.C.E. The accounts of his life as given in *Ezra, I Esdras, Haggai* and *Zechariah* are meager and contradictory, so that scholars have differed widely on practically every point. He was of the royal line, being the son of Shealtiel, the son of Jehoiachin (Jeconiah), king of Judah who was deposed by Nebuchadrezzar in 597 B.C.E. (the name of his father is given as Pedaiah in *I Chron.* 3:19, but this is probably a scribal error). It is uncertain just when he came from Babylonia to Jerusalem. Some would identify Zerubbabel with Sheshbazzar, leader of the first group of exiles, but the latter is probably the same as Shenazzar, a brother of Shealtiel (*I Chron.* 3:18). *I Esdras* 3 and 4 has a story of how Zerubbabel was a page of Darius and so won the favor of the king by his brilliant defense of truth as the greatest of all things that the latter put him at the head of a group of Jews who were to return to Palestine. While the story itself bears the stamp of legend, it may contain the historical truth that Zerubbabel became governor at the beginning of the reign of Darius (521 B.C.E.).

At the urging of the prophets Haggai and Zechariah,

Chaim Zhitlowsky

Zerubbabel and the Jews set about rebuilding the Temple. This aroused the opposition of the neighboring peoples, who appealed to Darius; in the sequel Darius permitted the Jews to complete the Temple, and this was done by 516 B.C.E. In the meantime, it appears, Haggai and Zechariah made predictions that Zerubbabel would revive the Davidic kingship; and this prophecy became plausible during the years of revolt and civil warfare that marked the beginning of the reign of Darius. Whether Zerubbabel actually participated in this movement is uncertain; he disappears from the scene abruptly. He was apparently removed from office and forced to return to Babylonia. *I Chron.* 3:19-24 preserves the record of ten generations of Zerubbabel's descendants.

Lit.: The Biblical commentaries and histories; Sellin, *Serubbabel* (1898); idem, *Studien zur Entstehungsgeschichte der jüdischen Gemeinde* (1901).

ZEVI, SABBATAI, *see* SABBATAI ZEVI.

ZHIRKOVA, YELIZAVETA IVANOVNA (pseudonym, Elisheva), Palestinian Russian author, b. Riazan, Russia, 1888. Born of the marriage of an Englishwoman with a native Russian of the Greek Orthodox faith, she spent her youth in Moscow. Here, while she was still at school, she fell in with a pious Jewish family, married the Hebrew writer Simon Bychowsky, and gradually came to attach herself body and soul to the Jewish people. She learned Yiddish, and this led her to the study of Hebrew, which she soon mastered. She translated verse and prose in both these languages into Russian, and in 1919 published two slender volumes of original verse in Russian: *Minuty* (Minutes) and *Tainyye Pesni* (Secret Songs). The latter bears a motto taken from the Book of Ruth: "Thy people shall be my people, and thy God my God," concluding with a lyric entitled "Eretz Israel." From 1920 on this remarkable proselyte devoted herself exclusively to Hebrew literature and to the cause of the Jewish renaissance in the land of Israel. It is there that she was making her home in 1943.

She contributed extensively to Hebrew periodicals (in and outside of Palestine) such as *Hatekufah, Haolam, Hatoren, Hapoel Hatzair,* and *Kethubim.* In 1926 she published a volume of Hebrew poems, which was followed two years later by another book of lyrics, as well as a collection of stories under the title of *Sippurim.* In 1929 her novel *Simtaoth* appeared, under a Tel-Aviv imprint.

Lit.: "Autobiography" in *Kethubim,* Aug. 27, 1926; *Jewish Chronicle,* Sept. 26, 1930, pp. 3-4.

ZHITLOWSKY (SCHITLOWSKY), CHAIM, writer, b. Uschatchi, Russia, 1865; d. Calgary, Canada, 1943. He studied in high school at Vitebsk, and in 1886 went to St. Petersburg. Prior to that he had already been involved in various Jewish movements, including the precursors of Zionism, but the publication (1887) of his first article, a study in Russian of Jewish history, aligned him permanently against any further such interpretations of the Jewish role. The article won the criticism and condemnation of numerous Jewish critics, and was praised by the spokesmen for the Russian revolutionary movements.

In 1888 Zhitlowsky went to Berlin, then to Zurich and Bern, where he received the Ph.D. degree in 1892. That same year another of his early provocative studies was published, *Yevrey ve Yevreyam,* calling Jewish thinkers and leaders to collaboration with the Jewish masses, for the economic solution of Jewish difficulties on a socialist revolutionary basis in the countries where the Jews lived. In 1891 Zhitlowsky had begun to write in Yiddish, and it was not long before his significance as a publicist in that language became obvious. Yet his work continued to appear in Russian as well. As one of the founders of the Russian Socialist Revolutionary Party, he was a spokesman in radical Russian journals published in the many émigré centers throughout Europe, and he was himself co-editor of *Russky Rabotchy.* He wrote studies in economics in German.

With John Edelheim, he founded the Akademischer Verlag für Soziale Wissenschaften in 1900, and issued the *Sozialistische Monatshefte* (1900-3). In 1904 Zhitlowsky came to the United States for the first time, traveling with Catherine Breshkovskaya, the "grandmother of the Russian revolution," on behalf of the Russian Socialist Revolutionary Party. But he had obtained permission also to agitate for Jewish causes, to which some interest in territorialism had been added. While in the United States he edited *Dos Folk.*

Returning to Europe in 1906, Zhitlowsky lived for a while in Lemberg, then in Russia. He stood for election to the Russian Duma, but his successful candidature to the electoral body was invalidated by the Russian government because of his revolutionary activity. In 1908 he came to the United States again, and until 1913 edited *Dos Neie Leben,* in which he propagated his triple creed: cultural-philosophical idealism in cultural questions, revolutionary socialism in social matters, and Jewish national rebirth in the countries of the Dispersion. His *Die Filosofie* (2 vols., 1910) was the first serious study of philosophy to appear in Yiddish. He became a member of the staff of the *Day* at its founding in 1914, and except for short intervals remained with the paper from that time on.

Zhitlowsky's sixtieth birthday in 1925 was celebrated throughout the world, for he had by that time become the most stirring figure of the cultural-economic point of view which he represented. In New York his birthday celebration was attended by some 20,000 persons. As the result of these ceremonies in various countries, the publication of his collected works was arranged for, and they eventually appeared in twenty-one volumes. In 1943 he was writing for the *Day* and participating, as left-wing representative, in numerous Jewish cultural enterprises. BARUCH MEYERSON

Lit.: American Hebrew, May 17, 1935, p. 13.

ZICHRON YAAKOV, *see* COLONIES (I. Palestine).

ZICHRONOTH ("remembrances"), one of the three prayer-portions which are recited at the Additional Service (Musaf) of Rosh Hashanah (New Year), and which are peculiar to the New Year's Day alone. The Zichronoth portions praise God as the Judge, and consist of nine Biblical verses arranged in succession; the Malchuyoth and Shofaroth, on the other hand, consist of ten such Biblical verses. The nine verses of the Zichronoth are divided into three groups, taken from the Torah, the Hagiographa (Kethubim), and the Prophets, respectively. They are introduced by the hymn *Attah Zocher* ("Thou rememberest"), which, like the introductions to the Malchuyoth and Shofaroth, were probably composed by Abba Aricha. In the earliest times the Yaaleh Veyabo prayer likewise formed a part of the Zichronoth of the festival of the New Year; even today this prayer is contained in the Avignon prayer-book.

In addition, one of the petitions inserted into the old liturgy for the fast days was called Zichronoth (cf. *Taan.* 2). American Reform prayer-books which omit Musaf or additional services have transferred an abridged form of the Zichronoth (as of the Malchuyoth and Shofaroth) from the Shofar service of the Musaf to the Shofar service which traditionally follows the Torah reading.

Lit.: Elbogen, Ismar, *Der jüdische Gottesdienst,* 141-44; Idelsohn, A. Z., *Jewish Liturgy* (1932) 30, 213 et seq.; Singer, S., and Abrahams, I., *The Authorised Daily Prayer Book* (1922) 249-50, cxcviii-cxcix.

ZIDDUK HADIN, *see* BURIAL.

ZIEGFELD, FLORENZ, theatrical producer, b. Chicago, 1869; d. Hollywood, Cal., 1932. The son of Florenz Ziegfeld, organizer of the Chicago Musical College, the younger Ziegfeld began his career of producer at the Chicago World's Fair in 1893. There he achieved his earliest fame as manager of Eugene Sandow, "the perfect man."

Later he left for New York city, where his first production, *A Parlor Match* (1896), starred Anna Held, whom he had brought from Paris for the show, and whom he married. Similar productions followed, rapidly enhancing his fame: *The French Maid* (1898); *Papa's Wife; The Little Duchess;* and *Miss Innocence.* Then came a period abroad. In Paris, Ziegfeld was inspired by the *Folies Bergère;* and returning to New York in 1906, he produced (1907) the first of the series of annual *Follies* which continued for twenty years, and established his unique and popular renown as "glorifier" of the American girl.

Ziegfeld's genius as an impresario came to be associated with lavishness of production in all departments: music, dancing, stage sets, above all, beautiful show girls.

Abandoning the *Follies* in 1927, Ziegfeld gave a new turn to his fame as a fabulously successful producer by putting on a series of musical shows. It was estimated that among these *Sally, Show Boat,* and *Kid Boots* (starring Eddie Cantor) netted him $1,000,000 each. He revived the *Follies* in 1930. Backed by William Randolph Hearst, Ziegfeld built the Ziegfeld Theatre in Sixth Avenue, New York, in 1927.

His death elicited nation-wide tribute to his theatrical genius. Ziegfeld had no formal connections with Jewish life; but among his benefactions were his contributions to the Israel Orphan Asylum of New York.

ZIELONKA, MARTIN, rabbi, b. Berlin, 1877; d. El Paso, Texas, 1938. After studying at the University of Cincinnati (A.B., 1899) and the Hebrew Union College (rabbi, 1899), he served as rabbi of Congregation Rodef Sholom of Waco, Texas, from 1899 to 1900, and of Temple Mount Sinai, El Paso, from 1900 to his death. He helped organize the El Paso Health League (1905), the Memorial Park (1920) and the College of the City of El Paso (1915), of which he was director until 1920. In 1921 he organized and became chairman of B'nai B'rith work in Mexico. He was a chairman, with the rank of major, in the United States Officers Reserve Corps (1922-27). Zielonka was a member of the executive committee of the Central Conference of American Rabbis, and president of the Hebrew Union College Alumni Association from 1929 to 1931.

DAVID LEOPOLD ZIELONKA (b. El Paso, 1904), his son, became rabbi of Temple Beth El at Corsicana, Texas, in 1929, and in the following year rabbi of Congregation Schaarai Zedek, Tampa, Fla., where he still served in 1943.

ZIFF, WILLIAM BERNARD, publisher and author, b. Chicago, 1898. After studying at the Art Institute of Chicago (1915-17), he became a cartoonist and commercial artist. During the first World War Ziff served in the 202nd Aero Squadron of the United States Army. After the War he entered the publishing field. He was editor of *Aeronautics Magazine* from 1931 to 1933, and in 1943 was the editor and publisher of *Flying* (a technical journal of aviation), *Radio News, Popular Photography,* and other technical and popular magazines. In 1941 he was awarded a diploma of honor by the Ligue Internationale des Aviateurs for his service in spreading knowledge of aviation. Ziff was interested in public and Jewish affairs. He was a Republican candidate for Congress in 1932. In 1935 he was president of the Zionist Revisionist Organization of America.

He is the author of *The Rape of Palestine* (1938; "the Mandatory for Palestine has followed a deliberate defaulting policy in respect to its obligations there," p. ix) and of *The Coming Battle of Germany* (1942; discussing the organization and strategy of a bombing offensive). The latter became a best-seller soon after publication.

ZIGELBOJM, SAMUEL, Polish official, and Jewish communal leader, better known among the Jewish laboring masses of Poland as "Chaver Arthur," b. Chelm, Poland, 1894; d. London, 1943. At the age of fourteen he joined the Polish "Bund" (Jewish Socialist Party), and in 1924 he served as secretary general of the Federation of Jewish Labor Unions in Poland.

Two years later he was elected a member of the Warsaw municipal council. After the Nazi German conquest of Poland (September, 1939), Zigelbojm organized a Jewish underground movement. Held for a time as a hostage by the Nazis, when he was freed he became a member of the Warsaw Jewish Council, which administered Jewish life in the ghetto there. Suspected by the Nazis of carrying on an underground movement, he fled to Paris, but after the fall of France (June, 1940) he went to the United States. In 1942 he settled in London, after his appointment by the Polish government-in-exile as a member of the Polish National Council, representing organized Jewish labor in Poland. As such Zigelbojm maintained relations with the Jewish underground movement in Poland, and played an important role in making public the atrocities committed by the Nazis in the Polish ghettos.

In May, 1943, Zigelbojm, a sufferer from chronic gastric ulcers, committed suicide in London after the crushing of the heroic resistance conducted for five weeks by the Jews in the Warsaw ghetto, in protest against what he called the indifference of the world to the Nazis' annihilation of the Polish Jews. In a letter which he left, addressed to the Polish premier, Wladyslaw Sikorski, and which received world-wide publicity, Zigelbojm said in part: "From some 3,500,000 Polish Jews and about 700,000 other Jews deported to Poland from other countries—according to official statistics provided by the underground Bund organization—there remained in April of this year only about 300,000, and this continuing murder still goes on. I cannot be silent—I

cannot live—while remnants of the Jewish people of Poland, of whom I am a representative, are perishing. . . . It was not my destiny to die there [in the Warsaw ghetto] together with them, but I belong to them, and in their mass graves. . . . Perhaps by my death I shall contribute to breaking down that indifference of those who may now—at the last moment—rescue the few Polish Jews still alive from certain annihilation."

ZILBERCWEIG, ZALMEN, writer and editor, b. Ozorkow, Poland, 1894. He was first an actor, appearing on various Yiddish and Hebrew stages in Poland from 1912 to 1918. At the same time (1913-24) he was a writer for the *Lodzer Tageblatt.* Then he went to Palestine, where he was from 1924 to 1926 the correspondent for the *Forward* in New York, as well as for European papers. Coming to the United States in 1926, Zilbercweig was made editor of the Yiddish *Theater Lexicon,* published under the auspices of the Hebrew Actors Union in New York city. The first volume appeared in 1931, a second in 1934.

He was the author also of several other books relating to the theatre, including *Theater-Figuren* (Buenos Aires, 1936) and an *Album of the Yiddish Theatre* (1937). As a translator, Zilbercweig was responsible for the rendition into Yiddish of works by Alexandre Dumas, Guy de Maupassant, and Russian writers.

Lit.: Zalmen Zilbercweig Yubel-Buch (1941).

ZILBERTS, ZAVEL, composer and conductor, b. Karlin, Pinsk, Russia, 1881. He was the son of the local cantor, Baruch Hirsh. At the age of fifteen he lost his father, and was appointed as his successor.

His talent for composing was already evident, and many of his compositions became popular. Desirous of advanced musical studies, he left his position and at the age of eighteen entered the conservatory of Warsaw, where he studied voice, piano and composition, and thought of choosing the opera for his life's work. It was, however, in the field of Jewish music that he finally found his muse.

In 1903 Zilberts became conductor of the renowned Hazomir choral society in Lodz. He led this organization in many classical oratorios as well as in many of his own compositions. Here he led three other choral institutions. In 1906 the large new synagogue in Moscow was finished, and Zilberts was invited to assume leadership of the synagogue choir. In 1920 he went to the United States, where he conducted such well-known choirs as those of the Jewish Ministers Cantors Association, Workmen's Circle, Paterson Arbeiter Ring, Hazomir of Newark, and the Zilberts choir of New York.

His compositions include many excellent songs in Yiddish and in Hebrew, for solo voice and for mixed choir. In these he evinced an exuberance of charming melodies, gracefully treated, all imbued with the Jewish spirit. Such were: *Neginoth Yisrael,* a Sabbath Eve service according to the *Union Prayer Book* (1932), based on the old Nusachoth (traditional modes); *Yaaleh,* for the Kol Nidre service (1921); *Havdalah* (1923); *Jacob's Dream,* a Biblical cantata in Yiddish (1934).

But perhaps his finest creations are his quartets and cantatas for male voices with solos mostly written for the Cantors Association of New York. These are *Yismechu; Heye im Pifiyoth; Psalm* 137 (all in 1923); *Psalm* 30 (1924); *Psalm* 134 (1936); *Rachamono* (1938).

MAX WOHLBERG.

ZILBOORG, GREGORY, psychiatrist, b. Kiev, Russia, 1890. He studied in Kiev and then in St. Petersburg at the Psychoneurological Institute (M.D., 1917). During the first World War he was a physician at a base hospital of the Russian Army. He took part in the first Revolution of 1917, and was appointed to a post in the ministry of labor under Lvov and Kerensky. Upon the fall of the latter's government, Zilboorg edited a daily newspaper in Kiev until it was captured by the Germans. He came to America in 1919.

In the United States, Zilboorg made his living, at first, as a writer. He wrote *The Passing of the Old Order in Europe* (1920) and translated from the Russian; he was the translator of Andreyev's *He Who Gets Slapped* (1921) and Zamiatin's *We* (1924). In 1926 he was graduated from the College of Physicians and Surgeons of Columbia University and was appointed to the staff of the Bloomingdale Hospital for mental diseases.

From 1931 on Zilboorg was in practice as a psychiatrist and psychoanalyst in New York city.

Zilboorg was secretary of the New York Psychoanalytic Society (1933), and president of the New York Society for Medical History.

He translated Alexander and Staub's *The Criminal, the Judge and the Public* (1931) and Fenichel's *Outline of Clinical Psychoanalysis* (1934). He is the author of *The Medical Man and the Witch During the Renaissance* (1935; a collection of his lectures as Noguchi lecturer on the history of medicine at Johns Hopkins University); *History of Medical Psychology* (with George W. Henry; 1941); *Mind, Medicine and Man* (1943).

ZIMAND, SAVEL, writer, b. Jassy, Roumania, 1893. He studied in Berlin and came to the United States in 1913. For a time he worked as a mechanic, then became a teacher of languages (1914-17). In 1917 Zimand joined the staff of the economics division of the New York Public Library, where he remained until 1919, although during the period of American participation in the first World War he was a research assistant with the War Labor Policies Board. Subsequently, while holding posts with various industrial and economic research organizations, Zimand also made trips to Europe and to the Far East as a special correspondent for the New York *Evening Post,* the New York *Times* and the *Survey Graphic* (1920-24). In 1929 he became administrative assistant of the Bellevue-Yorkville Health Demonstration, and was administrative director from 1930 to 1934.

Made assistant director of Public Health Education for the New York City Public Health Department in 1935, he became administrative assistant in 1937, and in 1943 held this post. Zimand was co-author and also author of several works on public health and editor of *Neighborhood Health* (1934-36) and of *Our Nurses* (1937-41). Among his other books were: *Modern Social Movements* (1921); *State Capitalism in Russia* (1926); *Living India* (1928).

ZIMBALIST, EFREM, violinist and composer, b. Rostov, Russia, 1889. Upon graduating from the St. Petersburg Conservatory, where he was a pupil of Leopold Auer, he was awarded the gold medal for violin playing together with the Rubinstein prize of 1,200 rubles. His debut took place in Berlin when he was eighteen, and was followed by appearances with leading European orchestras and in recitals. After achieving success in Europe he came to the United States, making his American debut in 1911 as soloist with the Boston Symphony Orchestra. This marked the beginning of a long and triumphant career.

With aristocratic style and exquisite taste, as well as with command of the violin, he earned for himself a dominating position among the violinists of his generation. Wherever he played—in practically every major city in the world—he was acclaimed.

In 1914 Zimbalist married Alma Gluck, famous soprano of concert hall and opera. For several years they appeared together successfully in joint recitals. For many years head of the violin department of the Curtis Institute of Music, Zimbalist was appointed full director of the Institute in 1941. Zimbalist composed an opera, a string quartet, and numerous smaller pieces for the violin, and some songs. He wrote also *One Hour's Daily Exercises,* for the violin.

ZIMRI, 1. son of Saul, a prince of the tribe of Simeon, who was slain by Phinehas in the sight of the elders for cohabiting with a Midianite woman (*Num.* 25:6-14).

2. usurper of the throne of Israel about 889 B.C.E. He slew the reigning king, Elah, and seized power; but the army chose Omri as king. Omri so quickly assailed Zimri that the latter set his palace on fire and perished in the flames after a rule of only seven days (*I Kings* 16:9-20). Jezebel used the word "Zimri" as a taunt in her defiance of Jehu (*II Kings* 9:31).

ZINBERG, ISRAEL (in Russian, Sergei Lazarevitch), Yiddish literary historian, b. in a village near Lanvitz, Volhynia, Russia, 1873; in March, 1943, he was reported to have died in a Russian concentration camp. He studied privately and later abroad, received the degree of chemical engineer at the Polytechnicum at Karlsruhe and his doctorate at the University of Basle. In 1898 Zinberg settled in St. Petersburg (Leningrad), where he was for years the head of the chemical laboratory in the famous Putilov plants.

Zinberg began his literary career in 1899 with a book on popular science in Yiddish. Following that he wrote much on chemistry in Russian and German in specialized periodicals. Beside his regular work, Zinberg devoted all his time to the study of Jewish literature. At the beginning of the twentieth century, together with some friends, he founded Di Naye Bibliotek for the publication of Yiddish books. He was known particularly as a literary critic and reviewer, and also for his many articles on Jewish social and cultural problems at that time. In 1900 he began publishing monographs on personalities in Yiddish and Hebrew literature.

In 1903 he wrote a larger paper (in the *Voskhod*) on the "Jargon" literature and its readers, which for a long time served as a major source of information for the origins of Yiddish literature. Together with Ginzburg, he worked on the *Perezhitoye,* historical yearbooks, was editor of the section for Hebrew and Yiddish literature of the *Yevreiskaya Entziklopedia,* member of the editorial staff of Dubnow's *Yevreiskaya Starina* and a member of the Historical and Ethnographic Society in St. Petersburg. In 1915 he published a history of the Jewish press in Russia in relation to social trends, written in Russian. Because of the war, it was little known outside of Russia. In 1929 Zinberg published the first volume of his monumental *Geshichte fun der Literatur bai Yidn.* By 1943 eight volumes of this work were published.

The whole study is to encompass the period up to 1914 and was originally planned in ten volumes. The work contains many of Zinberg's own translations into modern Yiddish from old Yiddish and Hebrew works, translations which bespeak his intimacy with Yiddish and his devotion to the creations in this language.

LUCY SCHILDKRET.

Lit.: Reisen, Zalman, *Lexikon fun der Yiddisher Literatur, Presse un Filologie,* vol. 3 (1929), cols. 310-17; idem, "Doktor Yisroel Zinberg un zayn Lebnsverk," *Literarishe Bleter* (1929) 1011-13.

ZINGHER, ABRAHAM, public health officer, b. Jassy, Roumania, 1885; d. New York city, 1927. He was brought to the United States in 1900, and was graduated from the Cornell Medical College in 1908. In 1917 he received the degree of Doctor of Public Health from New York University. About 1913 he became bacteriologist in the research laboratory of the New York City Department of Health, and was soon made assistant director, holding this position until his death. He was, in addition, assistant professor of hygiene at the Bellevue Medical College, lectured regularly at the College of Physicians and Surgeons and at Flower Hospital Medical College, and was affiliated with many important hospitals in New York.

Zingher served overseas during the first World War as supervisor of the laboratory units in France. He was instrumental in the initiation of international health and hygiene activities by the League of Nations. Zingher achieved distinction for his pioneer efforts in the prevention, control and treatment of infantile paralysis, diphtheria, measles and scarlet fever. He was equally zealous in research and in the practical application of his findings. LOUIS I. HARRIS.

ZINN, ABE LUCINE, judge, b. Denver, Col., 1893. In 1921 he was elected a member of the New Mexico state senate and served until 1924; for the last two years of his term he was Democratic floor leader. In 1924 he entered the practice of law and was subsequently attorney for the town of Gallup. In 1932 he became an associate justice of the New Mexico Supreme Court, and was still serving in that capacity in 1943.

ZINOVIEV (RADOMISLOWSKII), GRIGORII EVEEVICH, revolutionary propagandist, b. Elisavetgrad, Russia, 1883; d. Moscow, 1936. He joined the Russian Social Democratic Labor Party in 1901 and, after the split between Mensheviks and Bolsheviks at the Second Congress of the Communist Party of the Soviet Union (1903), he sided with the Bolsheviki. From 1905 to 1907 he was a member of the Petersburg Committee; in 1907 of the Communist Party Central Committee as well.

During the years of reaction (1908-17) he was an émigré abroad, working on the editorial staffs of such periodicals as the *Proletarii* and the *Sotsial-demokrat.* At that time, under Lenin's leadership, he helped wage the struggle against Liquidators, Kautskyites, Social-Chauvinists, and other oppositionists.

In April, 1917, Zinoviev returned to Russia. During the period of preparation for the October Revolution, he and Kamenev adopted a "strike-breaking" position. He was opposed to armed uprising. At the Central Committee meeting of October 29, 1917 (new calendar), he voted against the revolution, calling Lenin's proposals adventuristic. Zinoviev was fought by Lenin and Stalin. With the October Revolution (November 7, 1917, new calendar) triumphant, he advocated formation of a government that would include Mensheviks and Social Revolutionaries. Some time later he became chairman of the Petrograd Soviet and a member of the Political Bureau of the Bolshevik Party until 1926. Zinoviev served as chairman of the executive committee of the Communist International from 1919 to 1926. In 1925 he headed the "New Opposition," in consequence of which he was removed from the Political Bureau on charges of factionalism (1926).

Having formed a bloc with Leon Trotsky, he was expelled from the Communist Party of the Soviet Union (November, 1927). Upon a statement acknowledging his errors and a declaration of having broken with Trotsky, Zinoviev was readmitted to the Party (1928). He then became a factor in the administration of the All-Union Consumers Association, later a member of the Collegium of the People's Commissariat of Education. For connivance with the Riutin counter-revolutionary kulak group, and for duplicity within the Party, Zinoviev was expelled again in October, 1932. In less than a year he once more publicly renounced his errors; this resulted in his reinstatement at the Seventeenth Congress (January, 1934). According to Zinoviev's subsequent admission, he had had actually no dif-

ferences with Trotsky after the Fifteenth Congress in 1928. In 1932 a united Trotskyite-Zinovievite center came into being. Organized on a terroristic basis, these conspirators were accused of aiming first to destroy Stalin, Kirov (subsequently assassinated) and Voroshilov.

It was in company of Lenin that Zinoviev had returned to Russia in 1917 to foment the revolution. He was instrumental in the overthrow of the Kerensky regime. Like Trotsky and other early leaders of the Russian revolution, Zinoviev was noted as an orator and as an adroit pamphleteer. He was in charge of communist propaganda abroad. Upon Lenin's death Zinoviev, together with Stalin and Trotsky, formed a powerful triumvirate which, for a time, ruled the destinies of the Soviets. From 1926 on it was a succession of disgraces for Zinoviev, culminating in his execution.

Zinoviev was arrested (1934) as a leader of the Trotskyite-Zinovievite Terrorist Center, tried (August 19 to 24, 1936) before the Military Collegium, and found guilty of:

1. Having organized the united Trotskyite-Zinovievite terrorist center for the purpose of assassinating leaders of the Soviet government and of the Communist Party of the Soviet Union (CPSU).

2. Having paved the way for and on December 1, 1934, caused the murder of Kirov (Leningrad Party leader) through the medium of the Leningrad underground terrorist group.

3. Having organized a number of terrorist groups who made preparations to assassinate Stalin, Voroshilov, Zhdanov, Kaganovich, and Ordzhonikidze.

On the basis of the above (and according to articles 319 and 320 of the *Code of Criminal Procedure of the R.S.F.S.R.*) the Military Collegium of the People's Commissariat of Justice of the U.S.S.R. sentenced Zinoviev to be shot, and ordered all his property confiscated.

A so-called "Zinoviev letter" created, in 1928, a sensational scandal in English politics. The publication of that letter, which subsequently proved to be a forgery, was believed to have contributed to the downfall of the McDonald Labor Government in England in the election of that year, and to the restoration to power of the conservative government.

Zinoviev wrote a biography of Lenin, a history of the Russian Communist Party, and a book entitled *Leninism* (1926). Many of his prolific speeches and pamphlets appeared in various languages.

Lit.: *Bolshaia Sovetskaia Entziklopedia,* vol. 27 (1933); *Outline History of the Communist Party of the Soviet Union* (Part II, 1934); Report of Court Proceedings of *The Case of the Trotskyite-Zinovievite Terrorist Center* (1936); Davies, Joseph E., *Mission to Moscow* (1942).

ZION, name originally given to one of the hills of Jerusalem. It was the location of a fortress which was captured by David (*II Sam.* 5:6-9) and renamed the city of David. This was apparently the southeastern hill of Jerusalem. As the city of David grew, the nearby Temple Mount, with the central sanctuary upon it, was given the title of Zion (as in *Isa.* 10:12). Later Zion became a poetical term for all Jerusalem (*Amos* 6:1), of which it was the most prominent part, and even for all of Palestine (*Isa.* 1:27); the term "daughter of Zion" (*bath tziyyon*) is used for the entire people of Israel. Due to the influence of medieval Jewish poetry, especially the *Zionides* of Judah Halevi, Zion became the symbol of the hope for the return of the Jews to Palestine.

I. Concept and Purpose. Zionism is a modern movement aiming to fulfill the traditional ideal of the return of the Jewish people to Zion, the poetic name for Palestine. It seeks to create in Palestine an autonomous, self-governing Jewish community upon a revived Hebraic pattern. The movement was initiated in the middle of the 19th cent. in various parts of Europe, chiefly in Russia. These independent groups were merged in 1897 in the organization created at the First Zionist Congress called by Theodor Herzl and held in Basel, Switzerland, which adopted a definition of its objective in the text of what is called the Basel Program, which reads as follows:

The aim of Zionism is to create for the Jewish people a home in Palestine secured by public law.

The Congress contemplates the following means to the attainment of this end:

1. The promotion, on suitable lines, of the colonization of Palestine by Jewish agricultural and industrial workers.

2. The organization and binding together of the whole of Jewry by means of appropriate institutions, local and international, in accordance with the laws of each country.

3. The strengthening and fostering of Jewish national sentiment and consciousness.

4. Preparatory steps towards obtaining Government consent, where necessary, to the attainment of the aim of Zionism.

This text was never altered. In the development of the movement, however, Zionist Congresses gave various interpretations of the document which may be regarded as amendments or modifications of the program. After 1922 its working political basis was the Palestine Mandate. The preamble in the Mandate refers to "the establishment of a national home for the Jewish people." In Article 1 of the Mandate, the reference is to "the establishment of a Jewish National Home." The Zionist Congresses also made declarations as to the relation of the movement to the claims of the Arabs of Palestine. A Zionist Congress accepted the general proposal of the mandatory government for the partition of Palestine, in which a Jewish state was to occupy a prescribed segment of the whole. In 1922 the Zionist Organization committed itself to the establishment of Palestine as the Jewish commonwealth and the control of immigration under the auspices of a Jewish Agency.

The term Zionism is said to have been coined in

1893 by Nathan Birnbaum, a journalist and propagandist living in Vienna. Zionism regards the Jewish people as a national or ethnic unity and accordingly speaks of the "Jewish nation"—as contrasted with those Jewish tendencies and views that regard Judaism as chiefly a religion—although Zionism is conscious of the fact that the Jewish people do not possess all the characteristics of a normal national group.

The purpose of Zionism is to regain for the Jewish people those attributes of a nation which it lacks. The Jewish problem, according to Zionism, is primarily a national problem and can be solved only through political action. Modern Zionism was developed in the last quarter of the 19th cent. with the awakening of Jewish national consciousness, which manifested itself in the revival of a secular Hebrew literature with a distinctly national tendency, as well as in various efforts to return to Palestine and begin its redemption through agricultural colonization. Zionism attained its final form, however, through the application of the methods of modern European national movements. Its organization is the creation of Theodor Herzl. Herzlian Zionism combined the effort to achieve national emancipation and the love for Palestine into a synthesis. In its further development Zionism experienced many internal changes. It was recognized in international world affairs in the Balfour Declaration, issued on November 2, 1917. The Zionist Organization was given political and national status as the Jewish Agency for Palestine, representing the organized Jewish people, in the text of the Palestine Mandate.

Zionism met vehement opposition from the start. It was opposed by non-Jewish groups as well as by Jews. The first decades of Zionist history were characterized by the discussion and struggle over the issue of Zionism. Zionist and non-Zionist groups engaged in controversy. As regards practical work in Palestine, a cooperation between Zionists and non-Zionists was achieved in 1929 in the form of the expanded Jewish Agency, in which American Jewish leadership played an important part. In this, however, the continued development of Zionism was not affected with respect either to its ideology or its organization. ROBERT WELTSCH.

II. History. 1. The Palestine Ideal in Jewish History. The longing for the return to Zion runs through the books of the prophets, in the psalms, in the synagogue prayers, and in the customs and traditions of Jewish life. It forms an integral part of the doctrine of the Messiah and the Messianic time. The idea of the return to Zion prevailed among Jews from the beginning of their exile. Jews domiciled in Babylonia looked forward to the reestablishment of the ancient kingdom. The destruction of the Temple (70 C.E.) by the Romans drove the Jews into exile, but the hope of restoration was soon kindled anew. The unsuccessful revolt of Bar Kochba in 132 C.E. followed, but the hope persisted.

From time to time, Messianic movements on a fairly large scale arose in various parts of Europe. These movements were centered around the idea of a return to the Promised Land. In 720 a Messiah named Serenus made his appearance with the ambition to conquer Palestine. About 1147 David Alroy of Amadia, in Kurdistan, called upon the Jews of Asia to take up arms to free Jerusalem. The 12th cent. was particularly prolific in the production of Messiahs who called upon the Jewish people to return to Palestine under their leadership. There were such Messiahs in Isfahan, in Fez, in Cordova, and in France. The most important of these Messianic movements was that led by Sabbatai Zevi (1626-76), who claimed that he was the authentic Messiah and announced the restoration of the Promised Land to the Jews. Many communities were prepared to follow Sabbatai Zevi, and believed in him even after his apostasy had been established.

In the 16th cent., Don Joseph Nasi, duke of Naxos, tried to use his connection with the Turkish court to prepare the way for the creation of an autonomous status in Palestine for Jews. The 17th cent. was under the influence of mysticism (Cabala) and Zionism found its expression in the effort of Judah the Saint, who emigrated to Palestine at the head of a group of enthusiastic mystics, to pray and to fast and thus to hasten the approach of the Messianic days. There are references to the movement in various passages of medieval Jewish literature, as in the writings of David Kimhi, Moses Maimonides, Isaac Abravanel, and many others who advocated the effort to reestablish the Jewish homeland in Palestine. The Palestinian movement was stimulated in the second half of the 18th cent. by the Hasidic movement.

Beginning with the latter part of the 17th century, a number of projects, Utopian and otherwise, outlining the idea of a Jewish State in Palestine, became known in the form of letters, memoranda, petitions, pamphlets and books:

1). The Dane Holger (Oliger Paulli) submitted in 1695 to King William III of England a memorandum concerning the reestablishment of the Jewish kingdom in Palestine. His ideas influenced several of his contemporaries.

2). In 1714 a French adventurer, the Marquis de Langallerie, carried on negotiations with the Turkish ambassador at The Hague for the establishment of a Jewish state in Palestine. Langallerie conferred with Jews with reference to the collection of funds to further his project. He was arrested in 1717 by the Austrian authorities and brought to a prison in Vienna, where he died.

3). Hermann Moritz of Saxony (1696-1750) planned the establishment of a Jewish state in South America, and intended to have himself proclaimed its king.

4). In 1770 a "man of high rank" submitted a plan to Moses Mendelssohn to reestablish a Jewish state. In his reply, Mendelssohn rejected the idea.

5). In 1781 a group of German military officers visiting Livorno, Italy, disclosed to the Jews of that city a plan purporting to emanate from Ali Bey, a Turkish leader, who at that time was governor of a considerable part of Palestine, including Jerusalem. Ali Bey was apparently interested in the purchase of Palestine for the "Jewish nation." His interest seemed to be financial. The negotiations were interrupted by the death of Ali Bey.

6). In 1797 Prince de Ligne prepared a memorandum concerning the establishment of a Jewish State in Palestine, which he submitted to a friend of his, Baroness Grotthus, the daughter of a Jewish banker.

7). In 1798 an anonymous Jew issued a call in France for the establishment of a Jewish state in Palestine which should be given support by the French government.

8). Among his other political activities and plans, Napoleon Bonaparte, during his military campaign in Egypt, gave consideration to a project for the establishment of a Jewish State. In April, 1799, he issued a proclamation to the Jews of Asia and Africa, in which he called upon them to gather around his flag in order to restore the ancient city of Jerusalem. It is not known whether Napoleon took any steps toward the realization of his plan.

9). Colonel Pestel, the leader of the first revolutionary movement which arose in Russia in the 1820's, suggested, in a contribution to the *Russkaya Pravda,* that a Jewish state be established in some part of Asia Minor. Another member of the same revolutionary group, Grigori Perez, son of the baptized court Jew, Abraham Perez, also advocated a solution of the Jewish problem on the basis of the founding of a Jewish state.

10). In 1825 Mordecai Manuel Noah, an American journalist and playwright, once in the consular service of the

The Second Zionist Congress in session at Basel (1898), with Theodor Herzl presiding

A ZIONIST CONFERENCE.

SIR,—I am desired to announce that preparations are being made for the holding of a representative Zionist Congress at Munich, on August 25th next.

The preliminaries have been settled by well-known Continental Zionists, prominent among whom is Dr. Th. Herzl, who, as many others, has been struck with the necessity for combining the several Zionistic movements, and for giving shape and direction to their ideas.

The details so far settled are that representatives of all countries in which Jews reside shall meet at Munich on the above-mentioned date, and during a session lasting three days shall discuss the all-important questions that so deeply affect Jewish interests, the Zionist ideals to which the masses of Israel so zealously—and so persistently cling.

Everything will be done to render this Congress, the first to be held by Jews, as imposing, as its discussions will be of importance to Israel. In order to give the Conference a thoroughly representative character delegates will be invited from all Zionist movements, political or philanthropic, local or general, in their aims.

As the Agenda has, of course, not been definitely fixed, I shall be glad to receive suggestions and convey them to the proper quarters. The following topics will be deliberated upon:

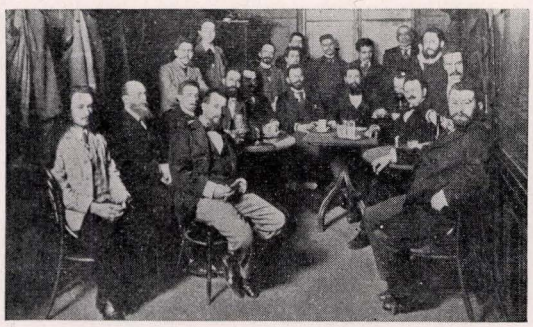
(*a*) The position of the Jews in all the countries in which they reside (one representative to report on each country), with statistical information on the economical, social and political situation.
(*b*) Reports on colonisation movements.
(*c*) The Chaluka.
(*d*) The Emigration Question.
(*e*) Agitation, Funds, &c.

It will be seen that this world congress has undertaken no light task, but the scheme of organisation will, I am sure, prove equal to the occasion.

My object in making public this proposal, is to gain for it the sympathy it needs, and at the same time to obtain as general an expression of opinion as possible on the issues involved.

To this end, I shall be glad if the Secretaries of the Zionist Associations, as well as the administrators of colonisation societies, Jewish farm schools and kindred organisations, will communicate to me at the undermentioned address.

I shall, with your permission, give further details of the forthcoming Congress at an early date.



Yours obediently,
JACOB DE HAAS.

8, South Street, Finsbury, E.C.,
London, March 16th, 1897.

Facsimile of the official call for the First Zionist Congress, issued from London in 1897

Theodor Herzl, founder of the modern Zionist movement, and his three children

Meeting at the Café Louvre, Vienna (May, 1896) which brought into being the weekly "Die Welt," first official Zionist organ. With Herzl (center) are shown some of his closest aides, known as his first general staff

United States, issued a summons to all Jews, calling upon them to cooperate with him in establishing a homeland for the Jews on Grand Island in the Niagara River, near Buffalo, New York. He called the new state "Ararat." The opening of the newly-formed "Jewish State" was the occasion for a great celebration which took place on Adar 1st, 5586 (February 8, 1826). The call of Noah and the celebration made only a slight impression even upon the Jews of New York. In 1844 Noah renewed his plea for the solution of the Jewish problem in two lectures, which he delivered in New York city. But here he advocated the establishment of a Jewish state in Palestine.

11). In December, 1832, Bernhard Behrend, a merchant of Rodenberg, in Hesse, Germany, worked out a project for the purchase of land somewhere in North America, in order to establish a Jewish colony there. He submitted his plan to Baron Rothschild and also to Gabriel Riesser. The plan got no further.

12). During the years 1832 to 1839 a man appeared in Austria who claimed that he was the authorized representative of a certain Siegfried Justus. In an appeal issued to the Jews, he announced that he was the destined liberator of Jerusalem and that the time had come for the Jews to return to Palestine. The Austrian police intervened to put a stop to his activities. When the matter was submitted to Joseph Perl, a leader of the Haskalah movement in Galicia, Perl made a statement to the authorities that the Jews had long abandoned any attempt or effort to return to Palestine.

13). In 1839 a series of articles appeared in the London *Globe,* which was regarded as the official organ of the English foreign ministry, dealing with the establishment of a neutral state in Syria, which included Palestine, where large masses of Jews could be settled. These ideas were approved by Lord Palmerston and other English statesmen. One of them, Lord Shaftesbury, was greatly absorbed in the thought of the return of Jews to Palestine and presented a memorandum to Lord Palmerston in which he declared that it was the duty of England to make good the historic injustice against the Jewish people. Mass meetings were held, at which Queen Victoria was asked to give her support to the cause. The problem was discussed by the Five Power Conference which met in London in 1840, but no practical results were achieved.

14). In Austria, Moritz Steinschneider, the great bibliographer, who was then a student, founded a society in Prague in 1836, which included in its program the restoration of Jewish independence in Palestine. Steinschneider also founded a similar organization in 1840 in Vienna and secured the support of Adolphe Crémieux, the French statesman. The project did not get beyond the drawing of a written plan. A similar student organization was founded in Berlin in 1841 where Steinschneider, Samuel Kristeller, Julius Barasch, Oscar Kassel and Ernest Kassel established a branch of the society Steinschneider had formed in Vienna.

15). Of considerable interest at this time was the appeal published in 1840 by an anonymous writer in *Der Orient,* in which the Jews were summoned to proceed with the reestablishment of their state in Palestine. About the same time, another anonymous writer published a pamphlet entitled *Neue Judea,* in which he advocated the establishment of a Jewish state in America.

16). Under the influence of the English "Restoration of the Jewish People" movement, concrete plans were prepared in England about this time. There was a project by Colonel Churchill which was submitted to Sir Moses Montefiore, in which the idea was suggested that there be established a political organization to support the restoration and reconstitution of the Jewish State. When Montefiore presented this plan to the Board of Deputies of the British Jews it was rejected.

17). In the United States, Emma Lazarus wrote a number of stirring poems on Zionist themes and in 1882 published a series of articles entitled "Epistles of the Hebrews" in *The American Hebrew,* in which she pleaded for an independent Jewish nationality and Jewish home in Palestine.

18). A memorial was presented to President Benjamin Harrison on March 5, 1891, by a Protestant minister, William E. Blackstone of Chicago, Illinois, in which the President and his secretary of state were urged to use their good offices and influence with the governments of Russia, England, Germany, Austro-Hungary, Turkey and Italy and all other sovereign governments of Europe "to secure the holding, at an early date, of an international conference to consider the condition of the Israelites and their claims to Palestine as their ancient home, and to promote, in all other just and proper ways, the alleviation of their suffering condition." Among the signatories to this memorial were outstanding American citizens. These included the chief justice of the United States, Melville W. Fuller, Cardinal Gibbons, John D. Rockefeller, J. Pierpont Morgan and Russell Sage.

19). A number of articles on the reestablishment of the Jewish State appeared in the Jewish periodical *Morgenland,* published at Basel (1839-41). The author was a Swiss named Samuel Preiswerk. Almost all the periodicals of the time, with the exception of the periodical *Der Orient,* published in Leipzig under the editorship of Julius Fürst, took a negative attitude toward the subject. Especially severe was Ludwig Philippson, editor of the *Allgemeine Zeitung des Judentums.*

20). A writer using the name Klemens Przezora published a pamphlet in Poland in 1841 dealing with the return of the Jews, in which he proposed that the Jews of Palestine be taken over to the uncultivated and uninhabited territories of the Crimea and be given the opportunity to establish an autonomous Jewish communal life under the protection of Russia, with the political attributes of a sovereign state. A similar project had been suggested in Poland in 1818.

21). After the Crimean War (1853-56), the conference of the Great Powers, held in Paris in 1856, had placed before them the suggestion that Jewish colonization in Palestine be promoted. Writing in the London *Jewish Chronicle* of March 21, 1856, Abraham Benisch contributed an article in which he referred to the revival of the Jewish nation in Palestine. From 1850 to 1870, well-known English and French statesmen referred to the need for Jewish colonization in Palestine. The problem of the Jewish State was discussed by Disraeli in his novels *Tancred* and *David Alroy.* A deep impression was made upon the English-speaking world by George Eliot's novel entitled *Daniel Deronda* (1876); her *Impressions of Theophrastus Such* also urges the creation of a Jewish state. In 1852 an Englishman named Hollingsworth urged the establishment of a Jewish state in Palestine as protection for the British overland route to India. In 1870 Benedetto Musolino, an Italian patriot, formulated a plan for a Jewish state in Palestine and tried, without success, to interest Lord Palmerston and the Rothschilds. An Englishman, George Gawler, in a book, *Tranquillization of Syria and the East* (1845), said that the Jews were the only people in a position to rebuild these territories through regular and systematic colonization. A Frenchman, E. Guers, advocated the return of the Jews to Palestine in his work *Israel aux derniers jours de l'économie actuelle* (Paris, 1856).

22). In France, Joseph Salvador advocated the return of the Jews in his *Rome, Paris and Jerusalem.* In 1864 a French Jew, Lazar Lévy, published an article in the *Archives Israélites* entitled "The Restoration of the Jewish Nation," in which he said that the Jewish problem could be solved only through the return of the Jewish people to Palestine. The French author, Ernest Laharanne, private secretary to Napoleon III, in a book entitled *The Reconstitution of the Jewish Nationality* (French; Paris, 1860), favored the return of the Jews to Palestine. The first Palestine research society was organized in 1876 by the founder of the Red Cross, Jean Henry Dunant (1828-1910). He was also an advocate of the Zionist idea.

2. Beginnings of Jewish Colonization. In the meantime, various attempts were made to undertake Jewish colonization in Palestine. The first to take the initiative was Sir Moses Montefiore. From 1850 to 1870, he supported the attempts of a number of societies organized in England to engage in colonization in Palestine. He was given strong support by Charles Netter. In 1876 a nephew of Sir Moses Montefiore, Hayim Guedalla, undertook to negotiate for the purchase of Palestine from the Turkish government.

Movements in this direction started among Jews between 1860 and 1880. Among the first propagandists of this idea were Rabbi Elijah Gutmacher of Grätz, Rabbi Zebi Hirsch Kalischer of Thorn, Judah Alkalay and Hayim Lorje of Frankfort on Oder. Kalischer and his co-workers colored their idea of a Jewish state with religious purposes and aspirations. In their opinion, Judaism represented a national religion which was in constant danger of dissolution in the Diaspora, and, therefore, should seek its salvation in Palestine. Kalischer convened a meeting of distinguished rabbis and laymen at Thorn in 1860 to discuss practical measures for the colonization of Palestine. As a result of this conference, the first colonization society was founded at Frankfort in 1862. This was followed by the organization of a number of other societies with the same purpose.

While Kalischer and his friends were engaged in laying the foundations for colonization in Palestine based on religious and national ideas, Moses Hess, a socialist theoretician, in his *Rom und Jerusalem* (1862), discussed the idea of the restoration of Jewish nationalism in a political sense. Hess believed that the definitive solution of the Jewish problem could not be achieved in the Diaspora since the Jews were always regarded as members of an alien body. "The Jewish nation could be reconstructed on a sound and national basis," he argued, "through the creation of a national center in Palestine." He urged the creation of the new Jewish life in Palestine on the basis of Mosaic principles, which, in his view, were thoroughly socialistic. He saw the literature of Judaism as a historic plan for the development of mankind. He visualized the solution of the Jewish problem as a stepping-stone on the road to universal brotherhood. Although colonization in Palestine was fostered by individual Jewish groups here and there, the ideas of Hess found no echo among the Jews of his time. He was the first Zionist in the modern sense.

Lord Shaftesbury, a distinguished English reformer, in 1876 championed the return of the Jews to Syria and Palestine. He urged that England become the champion of the return of the Jews to Palestine. Laurence Oliphant, in a similar way, espoused the cause of the Jewish right to colonize in Palestine. He visited the Orient in 1879 and 1882, and on his journeys sought to obtain the approval of the Turkish government for his plans. He did not succeed. He had in mind the founding of a society to purchase Palestine from Turkey, but his efforts were fruitless.

3. Factors Favoring the Development of Zionism. Modern Zionism is a product of developments of the 19th cent. The Jews of Western Europe were emancipated from their medieval disabilities and the door of political equality was opened to them. A trend toward assimilation followed, which expressed itself in an implicit repudiation of the traditional Jewish hope for the return to Zion. But emancipation did not give Jews the equality they had anticipated, and the newborn nationalisms were turned against them. These national aspirations helped to isolate the Jews, but the reaction led to a renewal of their own national consciousness, in which the centuries-old longing for Zion came to the surface. Thus, two influences worked to favor the development of modern Zionism: on the one hand, the rise of nationalism; on the other, the development of anti-Semitism.

Anti-Semitism developed in power and intensity throughout Europe from 1880. It was at first underestimated. Many Jews believed that it would disappear with the advance of culture and education and the appreciation of the values of enlightenment. When it appeared evident that anti-Semitism had the more or less overt support of a number of European governments, many Jews were finally convinced that anti-Semitism was not a left-over of pre-emancipation days, but was destined to grow. To meet the situation, Jews contented themselves with efforts to apologize and to ward off blows as they fell, offering in general a passive resistance, relying upon the ultimate triumph of the ideals of justice and democracy. Organizations to reply to anti-Semitism appeared in Germany and in Austria, and support was found among many liberal-minded Christians.

4. The Hibbath Zion Movement. The problem of the return of the Jews to Palestine was thoroughly discussed in modern Hebrew literature, which had a remarkable development from 1870 to 1880. These discussions became more systemized and specific in the course of time and led to the beginnings of the Hibbath Zion (Love of Zion) movement. In 1870, David Gordon published in the *Hamaggid,* which he edited, a number of articles in which he advocated colonization of Palestine by Jews as a preliminary step towards the renaissance of the Jewish people as a nation. Eliezer ben Jehudah, who subsequently developed Hebrew as a spoken language in Palestine, wrote articles in the *Hashahar* in 1879, in which he insisted that coupled with the Jewish colonization, the Hebrew language should become the spoken language of the Jewish people. A memorandum was submitted by a number of Jews to the Berlin Congress in 1878, in which the whole problem of the return of the Jews to Palestine was dealt with. This memorandum asked for the re-establishment of the Jewish state. Commenting on this document, the president of the Berlin Congress, Count Otto von Bismarck, said that it seemed to have originated with persons of unsound mind and therefore he would not permit even the discussion of the document.

Perez Smolenskin edited *Hashahar* in Vienna, and in the 1870's was engaged in controversy against the assimilationist movement. Smolenskin was one of the first protagonists of a national-cultural renaissance. Moses Leib Lilienblum, one of the leaders of the Russian Haskalah movement, emphasized the urgent need of national rebirth. The *Hashahar* and *Hamaggid* were the organs in which the new national-cultural movement was reflected. Under the impress of the pogroms which took place in Russia in 1882, Jewish youth began to find their way back to Jewish nationalism. Groups were formed in many cities to advance the idea of Zionism. These called themselves Chovevei Zion (Lovers of Zion), and the movement Hibbath Zion.

One of the most influential brochures written at that time was the *Auto-Emancipation* of Leo Pinsker. Pinsker proposed the formation of groups which, through political action and the promotion of Jewish colonization, should achieve the creation of a Jewish center in Palestine. In order that the groups already in existence might be enabled to start a systematic colonization activity, he decided to call a conference. There were many Chovevei Zion societies formed in Russia during this time. The Chovevei Zion included in its membership many distinguished personages, such as Saul Pinchas Rabinowitz, Moses Leib Lilienblum, Kalonymus Wolf Wissotzky, Judah Löb Lewanda, Rabbi Samuel Mohilewer and Samuel Joseph Fünn. Similar societies were also formed in Roumania headed by Samuel Pineles, Eleazar Rokeah and Karpel Lippe. There were a number of them in Galicia. The conference met at Katowice in November, 1884.

In his opening address, Pinsker proposed the estab-

lishment of a Montefiore Association for the promotion of agriculture among Jews and the support of the Jewish colonies in Palestine. The group of Jewish students called *Bilu,* who had emigrated to Palestine in 1882, had settled there with the aid of the Chovevei Zion and their first colony, Rishon Le Zion, was founded. The Chovevei Zion fostered the establishment of a number of other colonies. These were soon confronted with grave difficulties. The colonists were unskilled and lacked experience. In order to support their colonies, the Chovevei Zion appealed to Baron Edmond de Rothschild of Paris for assistance. He was not only won over to the idea of supporting the colonists, but engaged in colonization on his own account. Chovevei Zion societies were also founded in Germany by Pinsker. The foundation for the movement was laid in England by Colonel Albert E. W. Goldsmid and Elim Henry D'Avigdor. The Chovevei Zion groups formed in Austria were called Admath Jeshurun. Similar societies were formed in the United States—in New York city, Philadelphia, and other cities.

The work of the Chovevei Zion in Russia met with great difficulties. A second conference was called at Druskeniki in 1887, where the legalization of the work was the chief subject of discussion. In 1889 a third conference was held at Vilna. The Russian government confirmed the statutes of the society in 1890. On April 14, 1890, the first general assembly of the legalized "Society for the Support of Jewish Agriculturists and Artisans in Syria and Palestine" took place. Leo Pinsker was elected president of the organization.

The philanthropic character of the colonization work was severely criticized by some discontented members, including Ephraim Deinard, Pincus Friedman, and Asher Ginzberg (Ahad Haam). Ahad Haam published a severe criticism of the activities of the Chovevei Zion after a visit to Palestine. The order of the Bene Mosheh, organized by Ahad Haam, devoted itself to cultural activity. The first modern Hebrew publishing house in Russia—Ahiasaf—was founded by the Bene Mosheh, but it was dissolved in 1896 due to disagreements with the Chovevei Zion. Subsequently, Ahad Haam established the first modern Hebrew magazine, *Hashiloah,* which established a high literary standard.

In 1888 the first Jewish national student corporation, the Kadimah, was founded in Vienna. Nathan Birnbaum published a Jewish national newspaper, *Selbst-Emanzipation,* in Vienna in 1885. Birnbaum is also credited with an attempt in 1893 to call a Zionist congress. In 1881 Gustav G. Cohen, a merchant of Hamburg, wrote a work entitled *Die Judenfrage oder die Zukunft,* which was published in 1891 and encouraged the reestablishment of the Jewish nation in Palestine. Leo Motzkin, Joseph Lurie, Victor Jacobson and others—Russian Jewish students studying in Germany—founded a Jewish scientific union in 1889 in support of the Jewish renaissance. A German Jewish student corporation was founded in Berlin in 1893 by Heinrich Loewe, the bibliographer. These cultural societies met at a conference in Vienna in 1893 under the chairmanship of Nathan Birnbaum. The Zionist movement had made considerable progress, but a well-organized national movement had not been formed. The various societies carried on their independent efforts and no steps were taken to establish a co-ordination of their activities. Finally, in 1896, Theodor Herzl published *Der Judenstaat* (*The Jewish State*), a book which revolutionized all Zionist efforts, and brought about the formation of the international Zionist organization.

5. The Work of Theodor Herzl. The Zionist solution of the Jewish question was lifted into the realm of international political affairs by the call of Theodor Herzl and his appearance as its advocate in the capitals of Europe. Herzl first incorporated his ideas in an address to Baron de Hirsch, which he sent to the great philanthropist in 1895. A second version of this first address Herzl compiled in a sixty-five-page pamphlet which he sent to Baron Edmond de Rothschild. He thought he could secure the financial and political cooperation of leading Jewish philanthropists. In 1896 he published a little book in German entitled "The Jewish State: An Attempt at a Modern Solution of the Jewish Question," which attracted general attention. In this book he proposed the formation of a society of Jews and a Jewish company. The society was to be an organization of all Jews who endorsed the idea of a Jewish State. The company was to be the executive instrument for the colonization of Jews. Although the location of the future state was not specifically mentioned, it soon became apparent, even to Herzl, that the unnamed country would have to be found, and Palestine was included in his plan. The Sultan was to be persuaded by the Great Powers to give the Jewish company a charter for Palestine. Herzl's first effort was directed to win the support of Kaiser Wilhelm II of Germany. He found a supporter in the grand duke of Baden, who was a firm believer in the return of the Jewish people to the Promised Land.

Herzl visited Constantinople for the first time in June, 1896. He proposed that the Sultan grant the charter for the Jewish state and offered, as a consideration, that the Jews reorganize the finances of the Turkish Empire. But the progress in this direction was very slow and Herzl was impatient. He had initiated and conducted conversations with the grand duke of Baden, with the advisors of the Sultan, and with various other leading personalities, on his own responsibility. Finding the road to Jewish philanthropy closed, he turned to what he called "the organization of the masses." He found popular support in London, Vienna, Berlin and in Russia. He carried on an active campaign through the mail and the newspapers, and then decided to call the first Zionist Congress. He intended it to be held in Munich, but the protest of a number of Jewish communities in Germany led to the selection of the city of Basel.

The First Zionist Congress was held in Basel in August, 1897. There were delegates present from practically every country in Europe and from the United States, Algeria, and Palestine. The program of the movement was formulated by Max Nordau and revised in committee, and in its final form defined the objective as: "Zionism seeks for the Jewish people a publicly recognized, legally secured home (or homeland) in Palestine for the Jewish people." (The official text of the Basel Program is given above; portraits of the delegates are found opposite vol. 2, p. 102.)

The First Zionist Congress laid the foundations for an international organization. It absorbed the many groups of the Hibbath Zion movement. Any Jew could become a member of the organization by endorsing the Basel Program and paying a shekel, at that time equivalent to one German mark, or an English shilling, or an American quarter. The seat of the Congress was to be Vienna. An executive committee of five was elected, all of whom were residents of Vienna. Herzl was elected chairman of the executive committee. Everything that was unfolded later in the Zionist movement was visible or latent in the first assembly at Basel. The Jewish Colonial Trust, the Jewish National Fund, and the Hebrew University were mentioned. The clash between the "practicals" and the "politicals" arose in

The Extraordinary Zionist Conference (known as the Biltmore Conference) held in New York city on May 9, 10, 11, 1942. Among those on the dais, with Chaim Weizmann presiding, are Israel Goldstein, Louis E. Levinthal, David Wertheim, Louis Lipsky, Stephen S. Wise, David Ben Gurion, Nahum Goldmann, Mrs. Tamar de Sola Pool, Abba Hillel Silver, Wolf Gold, and other Zionist leaders from Palestine, Europe and America

the debates. The beginnings of socialist participation in Zionism were evident.

The Zionist Congress became an institution, which continued to meet regularly, at first every year, later every second year. The issues of the movement were usually discussed in the Zionist press, at Zionist meetings and local conventions. A larger executive council was created at which issues were given intermediate consideration, but the final authority was vested in the Congress. Most of the Congresses were held in Switzerland, but there were Congresses held in London and in Hamburg. The outstanding orator of the Congresses in the first decade was Max Nordau, whose speeches were given an international hearing, and who was one of Herzl's closest friends and collaborators.

After the first Congress Herzl renewed his Turkish endeavors with more resoluteness. The Jewish Colonial Trust, incorporated under English law, was officially opened in August, 1899. The Jewish National Fund was incorporated in 1901. Arminius Vámbéry, professor of oriental languages at the University of Budapest, gave Herzl a letter of introduction to the Sultan. In 1900 new immigration restrictions were imposed on Palestine, and the invitation to see the Sultan did not come until 1901. Herzl made an effort to raise £1,500,000 as the first step toward acquiring the charter. The value of Herzl's interview with the Sultan was depreciated by many Zionists. His negotiations in Paris with Baron Edmond de Rothschild were fruitless. In the end, it was apparent that the Sultan could not be induced to favor the development of an autonomous Jewish community in any part of his realm. This had the effect of strengthening the position of the "practical" Zionists, headed by Menachem Ussishkin, who were constantly pressing Herzl for immediate activities in Palestine.

While pursuing the Turkish objective, Herzl had an alternative project constantly in mind. He thought of territories in the vicinity of Palestine. His opportunity to raise the question in English circles came in 1902 when he was invited to testify before the British Aliens Commission. By now Herzl was convinced that an alternative for Palestine had to be found. To the chairman of the British Aliens Commission, Lord James, he submitted plans with regard to the Sinai Peninsula, El Arish and Cyprus. Through Lord Rothschild an official outline of a plan for the colonization of El Arish was submitted to Joseph Chamberlain, then colonial secretary. In October, 1902, Herzl had an interview with Joseph Chamberlain and mentioned Cyprus, El Arish, and the Sinai Peninsula. Chamberlain declared that the conditions in Cyprus were not promising, for the Greeks and the Moslems would oppose the movement. He took a favorable attitude toward the El Arish proposal. The foreign office agreed to the sending of a small commission of investigation to the Sinai Peninsula. After protracted negotiations, it developed that the Egyptian government opposed the proposal. When Herzl saw Chamberlain and discussed the situation, Chamberlain, for the first time, referred to Uganda, or East Africa. Again the question arose of a commission to investigate. The general plan, as submitted by Herzl, provided for the organization of a company that would serve as the colonization instrument. After five years the settlers were to be given complete autonomy over their affairs. An official proposal with regard to Uganda or East Africa came from Sir Clement Hill, permanent head of the foreign office. This letter was the first official proposal which Herzl was able to submit to a Zionist Congress.

In this letter it was stated that Lord Lansdowne had studied the question with the interest which His Majesty's Government felt bound to take in every serious plan for the betterment of conditions of the Jewish race. The time had been too short for a closer examination of the plan and its submission to the British representative for the East African Protectorate. "Lord Lansdowne assumes," the letter continues, "that the Bank desires to send a number of gentlemen to the East African Protectorate to establish whether there is in that territory land suitable for the purpose in view; should this prove to be the case, he will be happy to give them every assistance in bringing them together with His Majesty's representative, so that they may discuss with him, before the next Zionist Congress, the conditions under which the settlement could be carried out. Should an area be found which the Bank and His Majesty's representative consider suitable, and His Majesty's Government consider desirable, Lord Lansdowne will be glad to consider favorably proposals for the creation of a Jewish colony or settlement under such conditions as will seem to the members to guarantee the retention of their national customs. . . ." The document went on with an offer of a Jewish governorship and internal autonomy.

When the letter of Sir Clement Hill was submitted to the Sixth Congress, in 1903, the overwhelming majority of Russian Zionists were arrayed against Herzl. The East African project was submitted in the form of a resolution calling for the appointment of a commission of nine to investigate conditions in East Africa. The final decision on the report of the investigating committee was to be left to a special Congress. Although the vote showed a majority in favor of the official resolution, the debate revealed an overwhelming opposition and after the vote, the Russian delegation left the Congress in a body. They reappeared on the following day and received assurances that none of the Zionist funds would be used to defray the expenses of the commission investigating the East African project, and that when it would be prepared to report, it would report to the Greater Actions Committee before submitting its findings to the Congress. In effect, however, the Sixth Congress practically disposed of the issue.

A meeting of the Greater Actions Committee was held in April, 1904. After two days of debate, a unanimous resolution was adopted allowing for the sending of the expedition to East Africa and reserving the right of further discussion of the merits of the plan.

The Sixth Zionist Congress, with Herzl's approval, authorized the creation of a Palestine Commission to consider problems of immediate work in Palestine. The Commission was headed by Professor Otto Warburg, and among its members were Franz Oppenheimer and S. E. Soskin. It was decided to activize the Anglo-Palestine Company, which had established several branches in Palestine. Various plans were considered to utilize the Jewish National Fund for the purchase of land. Thus, in the lifetime of Herzl, the issue of immediate action in Palestine was blunted by enterprises recommended by the Palestine Commission. In spite of this fact, however, the theoretical dispute between the "practicals" and the "politicals" continued without abatement and a group of practicals was formed under the name of "Zione Zion," which was led by Ussishkin.

A short time after the Sixth Zionist Congress Herzl, who had suffered from a heart ailment for many years, fell sick and died (July 3, 1904). He had held the leadership in the movement for less than seven years. He gave Zionism all that he had, including his personal fortune. His colleagues in Vienna were all personal friends. Only after the Uganda project had become an issue did he admit the collaboration of members of the larger Executive Committee, and this only due to the pressure of the Russian delegates. He himself car-

ried all the burdens of the organization, of its finances and of its political work. With his own means, he maintained the Zionist organ *Die Welt,* and met the budget of administrative expenses in the Vienna office. When he died, he left his family penniless.

6. From the Death of Herzl to the First World War. The movement was greatly shaken by the death of Herzl. Max Nordau declined the leadership. Finally, David Wolffsohn of Cologne, one of Herzl's first disciples, was selected to head the movement. Wolffsohn was a merchant of large means and a Zionist of the old school. He believed that practical work should be undertaken in Palestine, but with moderation and business caution. He was a man of solid conviction and resisted the pressure of the Russian Zionists for immediate activities in Palestine on a large scale. He devoted himself to the preservation of the financial instruments of the movement. He regarded the Jewish Colonial Trust and the Jewish National Fund as trusts. He was averse to the use of these public funds for enterprises which in his judgment were hazardous. On the other hand, the practical Zionists insisted that new positions of political value should be established in Palestine wherever possible, without delay. Wolffsohn clung to the idea that new ventures should not be made until the old enterprises had been firmly established. He transferred the seat of the Zionist Executive and the headquarters of *Die Welt* to Cologne, where he resided, and called Nahum Sokolow to be its editor.

Political activities were virtually suspended during Wolffsohn's entire administration. The first Congress after the death of Herzl was held in Basel in 1905. It was preceded by a formidable conference of the "opposition" held in Freiburg. This conference adopted the formula: "Side by side with diplomatic and political activity, which must be regarded as basic in the movement, the systematic development of Zionist positions in Palestine must be pursued in order to balance the entire program." The Congress in 1905 did not agree with the opposition. It reelected Wolffsohn as president with an executive of seven who were sympathetic to his views. The opposition was driven into greater activity for Palestine on its own responsibility as a consequence of the adverse position taken by the Congress. Many young men were induced to go to Palestine following the Russian Revolution of 1905. The labor movement (Poale Zion) was organized in Palestine with supporting branches in various parts of the world. The Eighth Congress was held at The Hague in 1907. There it was decided to establish a Palestine Bureau in Jaffa and to organize the Palestine Land Development Company. Arthur Ruppin was selected to head the Bureau. After the Young Turk Revolution in 1908, a political bureau was established in Constantinople with Victor Jacobson, a leading Russian Zionist, as its director.

Successive attacks had been made on the Wolffsohn administration, each attempt resulting in a weakening of its position. The attacks were usually made on Wolffsohn with special praise of Otto Warburg, head of the Palestine Commission, who was responsible for most of the Palestine activities. The opposition found itself in the majority at Hamburg but was unable to form an administration of its own and had to reelect Wolffsohn as president of the organization. In August, 1911, at the Tenth Zionist Congress, the opposition was not only strong enough to defeat Wolffsohn, but had prepared in advance an executive committee of its own composition. The majority at the Tenth Zionist Congress elected the following executive: Otto Warburg, chairman; Victor Jacobson, Arthur Hantke, Shemarya Levin, Jechiel Tschlenow, and Nahum Sokolow. The head office of the Zionist Organization was removed to Berlin. Sokolow and Jacobson were placed in charge of politics, Hantke of organization, Levin of propaganda, and Warburg of Palestine activities. But the new regime was handicapped by the fact that Wolffsohn, although he had resigned as leader, had not retired from the management of the financial instruments of the movement—the Jewish Colonial Trust and the Jewish National Fund. An attempt to oust the Wolffsohn group from these financial positions was made at the Eleventh Congress, held in Vienna, in 1913, but without success. The following year, the first World War began.

7. The Balfour Declaration and the Palestine Mandate. With the outbreak of the War, the direction of Zionist affairs from Berlin could not be maintained. Jemal Pasha, the Turkish governor of Syria, expelled many Jews on the ground that they were not Turkish citizens. The leaders of the Zionist movement were sent out of the country. Zionist work was halted. The center of the movement was transferred to Copenhagen, where a number of the leaders found an opportunity to resume their contacts. The Provisional Committee for Zionist Affairs was formed in the United States, with Louis D. Brandeis as its chairman, in the fall of 1914. The Provisional Committee maintained Zionist relations in Allied countries, the Copenhagen office holding open communications with Germany and Austria. The political line at first was sympathetic toward Germany, but gradually all Zionist tendencies turned in the direction of a reliance upon the Allies. The Copenhagen Office was directed by Tschlenow, Motzkin and Jacobson. Responsibility in the United States was assumed by Brandeis, Shemarya Levin and other American leaders. London was the center in which activities were initiated that led ultimately to the issuing of the Balfour Declaration. The leading personality there was Chaim Weizmann, who had succeeded in interesting Balfour, Lloyd George, Herbert Sidebotham, H. L. Brailsford, and many others. Sokolow was given the task of discussing Zionism with French and Italian statesmen. Brandeis was responsible for negotiations with President Wilson and leading Americans. In England, considerable opposition developed from Jews, and in Italy, from leaders of the Catholic Church.

On November 2, 1917, in reply to memoranda submitted by the Zionists, Balfour sent to Lord Rothschild a letter incorporating the declaration regarded as the first official recognition of Zionist efforts. It read:

> I have much pleasure in conveying to you, on behalf of His Majesty's Government, the following declaration of sympathy with Jewish Zionist aspirations which has been submitted to, and approved by, the Cabinet.
>
> "His Majesty's Government view with favour the establishment in Palestine of a national home for the Jewish people, and will use their best endeavours to facilitate the achievement of this object, it being clearly understood that nothing shall be done which may prejudice the civil and religious rights of existing non-Jewish communities in Palestine, or the rights and political status enjoyed by Jews in any other country."
>
> I should be grateful if you would bring this declaration to the knowledge of the Zionist Federation.

The issuing of the Declaration aroused enthusiasm among Jews in all lands. It was the occasion for demonstrations and mass meetings. Special prayers were offered in the synagogues. The Declaration was assumed to be the prelude to the recognition of the ancient hope of the Jewish people for the reestablishment of the Jewish commonwealth.

Palestine was in English hands a few weeks after the Declaration was issued. General Allenby entered Jerusalem on the first day of Hanukah in 1917, but it was not until September, 1918, that all of Palestine was conquered by the English. A Jewish Legion recruited from many lands, including several thousand in the United States, was with General Allenby when he entered the Holy City. A Zionist Commission was organized at the request of the British government to act for the Jewish community in Palestine in relation to the provisional government set up. Weizmann was named the chairman of the Commission. He arrived in Jerusalem in April, 1918. While in Palestine at this time, he met Prince Feisal, son of King Hussein of the Hedjaz, with whom he later (January 3, 1919) drafted a treaty which was signed by Feisal and himself in London. The main points of the agreement are embodied in the following four articles:

Article I: The Arab State and Palestine in all their relations and undertakings shall be controlled by the most cordial goodwill and understanding and to this end Arab and Jewish duly accredited agents shall be established and maintained in the respective territories.

Article III: In the establishment of the Constitution and Administration of Palestine all such measures shall be adopted as will afford the fullest guarantees for carrying into effect the British Government's Declaration of the 2nd of November, 1917.

Article IV: All necessary measures shall be taken to encourage and stimulate immigration of Jews into Palestine on a large scale, and as quickly as possible to settle Jewish immigrants upon the land through closer settlement and intensive cultivation of the soil. In taking such measures, the Arab peasant and tenant farmers shall be protected in their rights, and shall be assisted in forwarding their economic development.

Article VIII: The parties hereto agree to act in complete accord and harmony on all matters embraced herein before the Peace Congress.

The Zionist delegation was given a hearing at the Peace Conference on February 27, 1919. Its spokesmen were Weizmann, Sokolow, Ussishkin, and Professor Sylvain Lévi. The position of the Zionists was indicated in a statement of Weizmann, who said that the Zionist Organization wanted Palestine established under a mandatory power, with the possibility of settling 70,000 to 80,000 Jews a year; they asked for the right to build up a nationality which would be as Jewish as the French nation is French and the British nation, British. They expected that when the Jews formed the majority, they would have the right to establish a government conforming to their ideals.

On April 20, 1920, the Supreme Council of the Peace Conference accepted the Balfour Declaration, proclaimed Palestine as mandated territory, and assigned the mandate to England. Herbert Samuel, an English Jew, was appointed High Commissioner for Palestine and took office in July, 1920. In advance of his arrival, an Arab riot resulting in bloodshed took place. Among those implicated in these riots was Haj Amin al-Husseini, who was the leader of the extreme Arabs in Palestine. Haj Amin al-Husseini was sentenced to two years' imprisonment for his connection with the riots, but fled the country. Samuel recalled him from exile and appointed him Mufti of Jerusalem. He also gave a large section of land in the vicinity of Beisan to the Arabs as a token of friendship. The immigration during the first year of Samuel's administration rose to about 1,000 per month.

A lively discussion ensued among Zionists with regard to future plans and methods. These were considered at a conference held in London in the summer of 1920. This conference was the first international assembly of Zionists held since the Vienna Congress of 1913. It was attended by a large American delegation, headed by Brandeis. It revealed a serious clash between the Americans and the Europeans. Brandeis had come to the definite conclusion that political activities could now be subordinated and that plan and method of colonization were of supreme importance. He believed that there should be a strict differentiation between what is to be public work and what is to be assigned to private initiative. The old forms of propaganda should be abandoned and an effort made to stimulate general initiative in Palestine work in every Jewish community. Brandeis emphasized decentralization and the building up of an organization based on federal relationships. The supporters of Weizmann pointed to the greater responsibilities of the Zionist Executive under the Mandate, the need for large financial resources to build up the economic foundations of the country. Instead of less power to the Executive, the situation required the exercise of broader functions. In their view, the building of a national home could be achieved only through national funds and with a national budget.

The London Conference elected Weizmann as president, Sokolow as the chairman of the Executive, and added Ussishkin, Julius Simon, and Nehemia de Lieme as members of the Executive. The dissatisfaction with the achievements in London was transferred to the United States. The American Zionists declined cooperation in the launching of the Keren Hayesod (Palestine Foundation Fund), upon which the London conference had decided. When the Brandeis-Mack administration reported to a national convention of the American Zionists held in Cleveland in 1921, their report was rejected by a two-thirds majority. The resignation of the Brandeis-Mack administration followed. A new administration, headed by Louis Lipsky, was elected, which was committed to the support of the Keren Hayesod and to maintaining the authority of the Zionist Executive.

The High Commissioner, Herbert Samuel, pressed the government for a statement of policy in order to stabilize relations with the Arabs. This led to the formulation of the first White Paper, with which the name of Churchill is associated. The Churchill statement had far-reaching effects on the future development of the Zionist movement. It was regarded as a repudiation of promises made to Zionist representatives at the time the Balfour Declaration was published. Nevertheless, the Zionist Executive accepted the Churchill White Paper on June 19, 1922. The Churchill White Paper was officially published on July 1, 1922. It was issued as an interpretation of the Mandate in advance of the Mandate's approval by the League of Nations. The Churchill Paper denied that the government had intended to create a predominantly Jewish state. It rejected the idea that Palestine was to become "as Jewish as England is English." It declared that the Balfour Declaration did not contemplate that Palestine as a whole should be converted into a Jewish national home, but that such a home should be founded *in* Palestine. It affirmed that it was not intended to impose the Jewish nationality upon the inhabitants of Palestine as a whole, but that the Jewish national home was to be the further development of the existing Jewish community, "in order that it may become a center in which the Jewish people as a whole may take, on grounds of religion and race, an interest and a pride. . . . But it is essential that it should know that it is in Palestine as of right and not on sufferance." But the Churchill Paper failed of its desired effect upon the Arabs.

8. The Zionist Organization and the New Settlement. The Twelfth Zionist Congress, which met in Karlsbad in September, 1921—the first normal Congress since that of Vienna in 1913—concerned itself chiefly with the financial and economic problems of the movement. It issued a world appeal for support of the Keren Hayesod. It adopted a resolution favoring an agreement with the Arabs. The Congress rejected the Simon-De Lieme report of reorganization which was opposed by a large American delegation, headed by Louis Lipsky. Weizmann became president of the Organization, Sokolow, chairman of the Executive; Joseph Cowen, Richard Lichtbein, V. Jabotinsky, Leo Motzkin, and M. Soloweitchik, members of the Executive in London; Ussishkin, M. D. Eder, Arthur Ruppin, Herman Pick, and Joseph Sprinzak, members of the Executive in Jerusalem. At the annual conference of the central council of the Organization, held in Karlsbad a year later, the Zionist Organization assumed the functions of the Jewish Agency referred to in the Mandate. But authority was given to the Zionist Executive to proceed with arrangements for a World Jewish Congress, based on democratic principles, which should elect an enlarged Jewish Agency. The idea of a World Congress was abandoned for practical reasons. Weizmann initiated discussions with English and American Jews with a view to drawing them into the proposed Enlarged Jewish Agency. When he revealed his purpose to the Zionist legislative bodies, he found himself at once in difficulties with a formidable opposition. The Radical Party, with Isaac Grünbaum as its leader, was formed to oppose the inclusion of non-Zionists in the Jewish Agency. This issue was the subject of violent discussion at the Thirteenth Zionist Congress in Karlsbad in August, 1923. This Congress authorized Weizmann to continue the discussions with non-Zionists, but under certain prescribed restrictions. At this Congress, Louis Lipsky of New York and Colonel Frederick H. Kisch were added to the Zionist Executive; Kisch became the political representative in Jerusalem.

The initial negotiations with leading non-Zionists in England were not successful. In the United States, however, a group headed by Louis Marshall offered to join the Jewish Agency and discussed the proposal at a conference held in 1924. In 1925, the established good relations were disturbed by frictions arising between the American Zionists and the Joint Distribution Committee over the Crimean project. At the Fourteenth Congress, held in Vienna in August, 1925, Weizmann's Agency plan suffered a setback, but he was given authority to continue his negotiations with the Marshall group.

The most disturbing feature of the movement at this period, 1921 to 1925, arose from its economic and financial difficulties. The budget of the Keren Hayesod was constantly being overspent. The labor elements pressed for immigration on a large scale and immigration of persons without means was fostered, and financial support for such an immigration was not forthcoming. The first efforts to colonize were colored by social experiments. Most of the colonies were cooperative or communist colonies, all property being held in common. This system of colonization was opposed by groups in the United States, in Poland, and even in Palestine. The Zionist Executive, under the direction of Arthur Ruppin, expert on colonization, had faith in settlers trained for work in farm schools. It was felt that bringing untrained settlers to Palestine would be expensive and unproductive. On the other hand, the critics of Ruppin's system insisted on fostering a sound middle-class colonization with the funds of the Keren Hayesod. They were opposed to what was called socialist schemes. In the year 1924, a large immigration set in from Poland. It was called the Fourth Aliyah. Over 40,000 Jews came to Palestine in 1924 to 1925. This was due in large measure to the repressive measures of the Polish prime minister Grabski, which forced an exodus of middle-class people. They came to Palestine, after having disposed of their goods, with Polish zlotys in their pockets. Prices of land went up amazingly and caused a housing problem. When the capital brought by the Polish Jewish settlers vanished with the collapse of the zloty, a full-fledged crisis ensued in the settlement of Palestine. The following year, unemployment was the chief problem of the Zionist Executive. A large part of the Keren Hayesod was used to maintain the unemployed. All plans for new colonization were halted. Thousands of the newcomers were forced to go back, ruined and hopeless. The crisis caused by the Fourth Aliyah continued until the end of 1927. Immigration ceased for about two years. In the meantime, however, on the ruins of the Fourth Aliyah, a new development in the orange industry ensued and business improved.

As a result of these experiences, there was great complaint against the administration of the Zionist Executive. In 1927, it was decided to form a Palestine Executive and to exclude party representatives, giving larger powers to this Executive in order to rationalize the work of the administration. The Palestine Executive consisted of three persons, Frederick H. Kisch, Harry Sacher, and Henrietta Szold.

An agreement between the Zionists and the American non-Zionists facilitated endeavors to win the support of the non-Zionists in other lands. Lord Melchett and D'Avigdor-Goldsmid headed the English group. The German group was headed by Oskar Wassermann. Committees were formed also in Poland and in Roumania, in Switzerland and in Holland. The constitution of the enlarged Jewish Agency was drafted by Leonard Stein, legal representative of the Zionist Executive, and revised by Louis Marshall in New York. It provided for a fifty-fifty arrangement as between Zionists and non-Zionists, representation in a council and in an administrative committee, as well as in the Executive, being assigned in equal parts.

The Sixteenth Zionist Congress held in Zurich, in 1929, adopted the constitution of the new agency in spite of the opposition of the Radical and Revisionist Parties. The enlarged Jewish Agency was formally established at a conference held a few days later in Zurich—August 11, 1929—at a joint meeting of Zionists and non-Zionists. The opening session was regarded as an event of international importance. The assembly was one of the most representative gatherings of Jews held in modern times. Among the speakers at the formal opening, over which Weizmann presided, were Herbert Samuel, Albert Einstein, Léon Blum, Lord Melchett, Felix M. Warburg, Louis Marshall, Menachem Ussishkin, Sholom Asch, Hayim Arlosoroff, and Nahum Sokolow. Baron Edmond de Rothschild was elected honorary president of the agency and Weizmann became its president. The agreement between the Zionists and non-Zionists was signed at a public meeting on August 14, 1922. Within a few weeks after the adjournment of the conference, the Arabs of Palestine initiated the most destructive riots held since the coming of Jews to the Promised Land.

LOUIS LIPSKY.

9. The Arab-Jewish Problem. During the services at the Wailing Wall on the Day of Atonement, 1928, following Arab protests, a portable screen set up by the Jews to

separate men and women was forcibly removed by a British official. By spreading wild rumors about alleged Jewish designs on the Moslem holy places the Arab authorities, led by the Mufti, Haj Amin al-Husseini, magnified the incident and exploited it to stir up religious fanaticism in Palestine and the neighboring countries. As a consequence relations between Arabs and Jews deteriorated. A demonstration of Jewish youths at the Wall on August 15, 1929, was followed the next day by one of Arabs who destroyed Jewish prayer-books. Tension mounted, but in the absence of the High Commissioner, Sir John Chancellor, the Palestine administration failed to take adequate precautionary measures.

On August 23rd large crowds of fellaheen gathered in Jerusalem and attacked and massacred a number of Jews. The following day more than sixty Jewish men, women and children of the old Yishuv were murdered in Hebron; on August 29th attacks on the Jewish quarter of Safed resulted in the death or wounding of forty-five Jews. There were outbreaks in Jaffa and Haifa, and attacks on various Jewish rural settlements ended with the destruction of six of them. Looting and other crimes against property followed, and synagogues were desecrated. There were a few cases of retaliation on the part of Jews. The inadequate military forces were used but hesitantly by the administration, and the Jews had to rely on self-defense groups for their protection. Order was gradually restored when army reinforcements were rushed from Egypt to Palestine. The riots took the lives of 133 Jews and 116 known Arabs, of whom the majority were killed by the army and police. The courts imposed twenty-seven death sentences, but only those on three Arabs were actually carried out.

An investigation of the riots by a British commission headed by Sir Walter Shaw followed. While establishing that the disturbances were "a vicious attack by Arabs on Jews accompanied by wanton destruction of Jewish property," the commission absolved the Arab Executive, the Mufti and the Palestine administration from serious blame for their actions during the disturbances. Considering Arab animosity to the establishment of the Jewish national home the basic cause of the disorders, the report recommended a clarification of Britain's Palestine policy with regard to Jews and non-Jews, a limitation of Jewish immigration and a land policy based on improved methods of cultivation. One member of the commission, Harry Snell, held the Arab leaders responsible for the riots and emphasized the importance of Jewish immigration for Palestine (Cmd. 3530, March, 1930).

Acting upon these recommendations, the British government sent Sir John Hope Simpson to Palestine to examine land settlement, immigration and development. Simpson estimated the area of cultivable land at 6,544,000 dunams, a figure much lower than previous official estimates. Arguing that Jewish land purchases were creating a class of landless Arabs, Simpson declared that there was no room for a single additional settler under prevailing methods of cultivation. Palestine's absorptive capacity had reached its saturation point, and immigration schedules should be limited in accordance with unemployment and economic conditions in the whole of Palestine and not of the Jewish sector alone (Cmd. 3686).

The Simpson report was published by the Ramsay MacDonald government in October, 1930, simultaneously with its statement of policy known as the Passfield White Paper (Cmd. 3692). Written in a language decidedly unfriendly toward Zionist activities, the document reaffirmed Great Britain's adherence to the mandate. Its most important section was the statement that no more land was available for Jewish buyers and that immigration would have to be curtailed, conclusions which were taken almost verbatim from the Simpson report.

The Jewish world, startled by the Shaw commission's analysis of the 1929 riots which indirectly put the Jews in the position of defendants, was profoundly shocked by the new policy. Weizmann, considering the Passfield Paper incompatible with the mandate, resigned his joint office of president of the Zionist Organization and the Jewish Agency. Likewise, Lord Melchett, chairman of the council, and Felix M. Warburg, chairman of the administrative committee of the Agency, resigned. Statesmen like Baldwin, Austen Chamberlain, Amery, General Jan C. Smuts, Sir John Simon and Lord Hailsham termed the White Paper a reversal of British policy, and in the House of Commons Lloyd George, Herbert Samuel, Snell and Kenworthy severely criticized the government's policy.

This strong opposition caused the labor government to enter into conferences with Jewish Agency representatives. As a result, Prime Minister MacDonald, in his letter of February 13, 1931, to Weizmann, gave an interpretation to the Passfield Paper which was acceptable to the Jews. Land acquisitions, MacDonald stated, would not be prevented and immigration schedules would be based on purely economic considerations.

The peace of Palestine, except for a one-day Arab strike and demonstrations protesting against Jewish land purchases and immigration, in October, 1933, was not seriously disturbed again until 1936. In that year Great Britain's delicate position during the Italo-Ethiopian war, the concessions which Egyptian and Syrian nationalists had wrung from Great Britain and France, and Jewish opposition to the contemplated establishment of a legislative council provided the background for Arab agitation. The friction caused by murders of Jews by Arab highway robbers and the subsequent murder of two Arabs, apparently in retaliation, was brought to a head when Arabs, incited by wild rumors, killed several Jews in Jaffa in broad daylight on April 19, 1936. An Arab Higher Committee presided over by the Mufti was immediately formed and proclaimed a general strike which was to enforce its demands, including the complete stoppage of Jewish immigration. The High Commissioner, Sir Arthur Wauchope, addressed several appeals to the Arabs to end the strike, but refrained from using the military forces vigorously to check the increasing wave of violence. Jews, British troops and Arabs opposed to the strike were attacked by Arab terrorists and armed bands reinforced from Syria. Sniping at cars, attacks on Jewish settlements, the derailment of trains, and the burning of fields and forests were almost daily occurrences. With the approach of the citrus season and a near-collapse of Arab economy the Arab Higher Committee, using the intervention of Arab rulers, was forced to call off the strike after nearly six months, in October. A brief lull during the presence in Palestine of the royal commission headed by Earl Peel in the winter of 1936 to 1937 was followed by a new wave of terrorism, which culminated in the assassination of District Commissioner Andrews in Nazareth. Subsequently the Arab leaders were exiled and the Mufti escaped to Lebanon, but although large British forces were stationed in Palestine, the disorders continued and did not die down until 1939. The Jews defended their settlements valorously and, with a few exceptions, did not retaliate against the Arab population.

The six members of the Peel commission stayed in Palestine from November, 1936, to January, 1937. The commission took testimony in thirty public and forty private sessions, at first from British and Jewish witnesses alone because the Arabs declined to testify as long as Jewish immigration continued. The Palestine government and the Jews both presented their cases fully in a number of reports and memoranda. The Arabs finally yielded and gave evidence, twelve days before the commission left for England.

The Peel report was published in July, 1937 (Cmd. 5479). Conflicting Arab and Jewish aspirations, it stated, made the mandate unworkable. Suggestions such as the institution of a political high level for Jewish immigration and the formation of an Arab Agency were termed mere palliatives. The report recommended the partition of Palestine into an Arab and a Jewish state, the latter comprising the coastal plain, the Emek and Galilee, with a British mandate for the holy places. In an accompanying statement of policy the British government accepted partition in principle (Cmd. 5513).

The Arabs rejected partition almost unanimously. At the Twentieth Zionist Congress at Zurich in August, 1937, opinion was sharply divided. Weizmann secured a compromise by which the congress authorized the Executive of the Jewish Agency to enter into negotiations "with a view to ascertaining the precise terms of His Majesty's Government for the proposed establishment of a Jewish state." The Congress rejected those parts of the Peel report which declared the mandate to be unworkable and envisaged restriction of immigration and land purchase.

Zionist leaders attending a session in London (Feb.-March, 1939) of the Arab-Jewish round table conference called by the British Government, with Prime Minister Neville Chamberlain (at head of table in rear) presiding. Among those present were (front) Selig Brodetsky, Chaim Weizmann, David Ben Gurion, Rose Jacobs, Moshe Shertok, Arthur Lourie. Elsewhere on the picture are Joseph H. Hertz, Berl Locker, Benzion Mossinson, Lord Lionel Walter Rothschild, Nahum Goldmann and others

In April, 1938, a British partition commission under Sir John Woodhead went to Palestine to work out the boundaries of the proposed three states. The report of the Woodhead commission was issued in November of that year and stated that no plan for a Jewish state inside of Palestine containing only a small Arab minority and capable of absorbing many Jewish immigrants could be formulated. Besides, no self-supporting Arab state could be set up (Cmd. 5854). On the basis of this report partition was dropped by the government as impracticable (Cmd. 5893).

The Chamberlain government, in search of a new formula for Palestine, then convened a round table conference of Arabs and Jews in London during February and March, 1939. The British leaders conferred separately with both the Jewish and the Arab delegations, since the Palestinian Arabs refused to meet the Jews. There were, however, two meetings between the Jewish Agency representatives and those of the Arab states. The Arabs insisted upon the termination of the mandate, of Jewish immigration and of land purchase, and no compromise was reached.

The London conference having failed, the government imposed its own solution of the problem, in Colonial Secretary Malcolm MacDonald's White Paper of May, 1939 (Cmd. 6019). Jewish immigration was to stop after a total of 75,000 Jews had been admitted over a period of five years. The essence of the White Paper was to freeze the Jews into a minority of about one-third of the total population of Palestine. In certain areas land transfers to Jews were to be forbidden or restricted. Palestine was to be made an independent Arab state in alliance with Great Britain within ten years.

The MacDonald Paper, unanimously rejected by the Jews, was passed by Parliament, though with an unusually low majority. The Permanent Mandates Commission of the League of Nations characterized the document as being contrary to Britain's own interpretation of the mandate. The second World War broke out before the Council of the League could vote on it, but its acceptance of the White Paper was at least doubtful.

The government, however, proceeded to implement its policy through the Palestine Land Transfers Regulations of February, 1940 (Cmd. 6180). Palestine was divided into three zones, with only one-twentieth of the country open to Jewish buyers. Land transfers in the other two zones were entirely forbidden or severely restricted. The Jews protested bitterly, especially since their land-buying had been proved not to be detrimental to the Arabs and had helped to develop the country, and demonstrations took place in Palestine.

War was imminent when the Twenty-first Zionist Congress meeting in Geneva in August, 1939, rejected the MacDonald White Paper as a complete reversal of the mandatory obligations to facilitate Jewish immigration and to encourage close settlement by Jews on the land.

10. The Second World War. The Geneva Zionist Congress met on the eve of the outbreak of the second World War. In a letter dated August 29, 1939, to Prime Minister Neville Chamberlain, Weizmann stated that "the Jews stand by Great Britain and will fight on the side of the democracies," and offered to organize the man-power and resources of Palestine Jewry for the war effort. The issue of a special Jewish military force was raised. In September, 1939, a voluntary registration of Palestine Jewry was organized. Out of a community of half a million, 85,781 men and 50,262 women, between the ages of eighteen and fifty, volunteered for national service. At the same time, the Jewish Agency approached the British Commanding Officer in Palestine and offered to provide 40,000 young Jews to enlist immediately in the British Army in Jewish units to fight in defense of Palestine. This offer was not accepted. In September, 1940, after Winston Churchill became prime minister, Weizmann submitted a further proposal for "a recruitment of the greatest possible number of Jews in Palestine for fighting services, to be formed into Jewish Battalions or larger formations." Although this proposal was approved in principle and a British general was named to be commander of these forces, and matters of detail were already under discussion, the whole proposal was delayed until March 4, 1941, when the new colonial secretary, Lord Moyne, informed Weizmann that the proposal for the raising of a Jewish contingent would have to be postponed for another period of six months. In October, 1941, Weizmann was informed that a final decision had been taken by His Majesty's Government against the establishment of a Jewish fighting force. In the meantime, however, the shortage of man-power in the Near East had become acute and the government

was persuaded by the military authorities to agree to the recruitment of Palestinian Jews in distinctive Jewish units for various army needs. These units were mostly in the technical services. A further stage in the development of the movement to secure the recognition of a Jewish fighting force came when the government announced the formation of a Palestine regiment to consist of Jewish and Arab infantry battalions. At this time there were more than 20,000 Palestinian Jews enrolled in various Jewish units of the British Army.

Under the policy of the MacDonald White Paper of 1939, government action against Jewish immigration became much more severe. Stringent measures were adopted to prevent the entry of Jews without immigration certificates. Some 1,500 refugees who had managed to land in Palestine were, after a brief period of detention in a camp at Athlit, deported to the island of Mauritius. 200 Jewish refugees were drowned when the *Patria* sank. The story of the *Struma* is a part of the same tragic picture. This small vessel, with 765 refugees from the Balkans on board, after spending many weeks in a Turkish harbor awaiting permission to proceed to Palestine, was forced to put out to sea, where, with a single exception, all those on board were drowned.

The government subsequently modified its attitude toward refugee immigration. It was finally announced that the government was ready to grant, from the balance of 75,000 certificates available under the MacDonald White Paper policy, 4,000 certificates for Jewish children in Balkan countries, together with 500 for adult Jews.

The movement for the recognition of an army of Palestinian and stateless Jews was initiated in the United States by a special committee, of which Pierre van Paassen, journalist and author, was chairman. This committee carried on a vigorous publicity campaign in support of the demand for a Jewish Army. In spite of all efforts, however, the movement failed of success. The American government was disinclined to run counter to British policy in a territory over which it had a responsibility. Weizmann spent months of his time, during the first years of the War, in the United States seeking to win American public opinion to the support of the Zionist political program. The resolution adopted at the New York Conference of December 6, 1942, favoring Palestine as a Jewish commonwealth and Jewish control of immigration, was affirmed in the presence of Weizmann. Weizmann also was responsible for negotiations with non-Zionists to establish an agreed political program. After fifteen months of discussion, however, agreement was found to be impossible. LOUIS LIPSKY.

III. Zionism in the United States. Mordecai Manuel Noah (1785-1851) may be said to have been the first American Zionist. Major Noah, descendant of a prominent American family of Portuguese Jews, a leader of the Tammany Society, who was sheriff in New York and American consul in Tunis, declared in 1824: "We will return to Zion as we went forth bringing back the faith we carried away with us." By way of experimenting for the coming Jewish state he attempted to set up a temporary "city of refuge for Jews" on Grand Island, near Buffalo, New York, but the romantic scheme was a failure. The poetess Emma Lazarus of New York city (1849-87) was among the first advocates of the Zionist idea in America. In the "Epistle to the Jews," she wrote of the need for "a free Jewish state . . . a home for the homeless . . . a nation for the denationalized."

Modern Zionism, dating from the establishment of the Chovevei Zion (Lovers of Zion) movement in Russia, was imported to America with the stream of Russian immigration in the 1880's. The first Chovevei Zion group was formed in New York by Joseph I. Bluestone in 1882. Another society was organized in Baltimore and a more ambitious Jewish colonization society was formed in 1890 under the name of Shave Zion. In Chicago, Bernard Horwich organized a Zion Society in 1895, which sent Leon Zolotkoff as a delegate to the first Zionist Congress in 1897.

After the Congress, Zionism in America began to assume the aspects of a nation-wide organization. In Chicago the first interstate Zionist body in America was chartered on October 28, 1897, under the name of Knights of Zion. Its leading figures were Bernard Horwich, Leon Zolotkoff and Max Shulman. In the East, Richard Gottheil, upon his return from a visit to Europe during which he attended the Zionist Congress, called a conference in New York which resulted in the formation of the Federation of American Zionists. The organization held its first convention in New York in 1898; Gottheil became its first president and Stephen S. Wise its first secretary. Between 1898 and 1900, over fifty Zionist societies were organized throughout the country. The Knights of Zion in Chicago, which in 1909 changed its name to Federated Zionist Societies of the Middle West, was merged with the Federation in 1913, retaining, however, its autonomy in the Middle Western states.

The leading personalities who influenced the early development of American Zionism were nearly all of Western background. They included Gustav Gottheil, Bernard Felsenthal of Chicago, Benjamin Szold and Dr. Aaron Friedenwald of Baltimore, Louis N. Dembitz of Louisville and Pereira Mendes of New York city. Of the younger men there were Stephen S. Wise, Max Heller, Judah L. Magnes, Max Raisin, Richard Gottheil, Cyrus Sulzberger and Louis Lipsky. But the movement derived its strength from the immigrant Jews of Eastern Europe. These, too, were for a time lukewarm, being for the most part preoccupied with economic adjustment and intellectually under the influence of Russian socialist revolutionary ideals. One of the principal figures responsible for reversing the trend was Zevi Hirsch Masliansky, known as the "national preacher," whose unusual eloquence and fervent Zionist idealism had a profound effect upon the thinking of countless thousands of immigrant Jews. He was followed by other propagandists from abroad, notably Shemarya Levin, who helped to strengthen the Zionist organization in America.

Up to the outbreak of war in 1914 the Federation of American Zionists made but slow progress. Gottheil was succeeded in the presidency of the organization in 1904 by Harry Friedenwald of Baltimore, who retained the office until 1912, when Louis Lipsky, who had begun to play a dominant role in the organization, of which he remained a key figure for the thirty years following, became chairman of the executive committee. Wise was succeeded as secretary after a year by Isidore D. Morrison, who gave way to Jacob de Haas upon the latter's arrival from London in 1902. When De Haas moved to Boston after a year, he was succeeded by Magnes. Upon the latter's resignation to take up leadership in the New York Kehillah he was succeeded by Joseph Jasin of Texas, who served for two years and gave way to Henrietta Szold.

The Federation established an English monthly magazine, *The Maccabean,* which made its appearance in 1901 with Lipsky as managing editor. In 1909, Senior

Early American members of the Jewish Agency for Palestine: (seated, l. to r.) Zevi Hirsch Masliansky, Cyrus Adler, Louis Lipsky; (standing) Stephen S. Wise, Julian W. Mack, Rose L. Halprin, Morris Rothenberg, William M. Lewis, Samuel Schulman, and Felix M. Warburg

Abel founded the Yiddish organ of the movement, *Dos Yiddishe Folk*. As part of the organization a fraternal insurance association was formed under the name of Order Sons of Zion. The Federation created Young Judea in 1907 as its junior department and in 1912 Henrietta Szold formed the Hadassah for special work among women. There was also created in 1915 the Intercollegiate Zionist Association to spread Zionism on the campus. Despite the apparent growth of organizational apparatus, the American Zionist organization was at that time limited in its influence, confined to dingy headquarters on the East Side, and generally regarded as unfashionable.

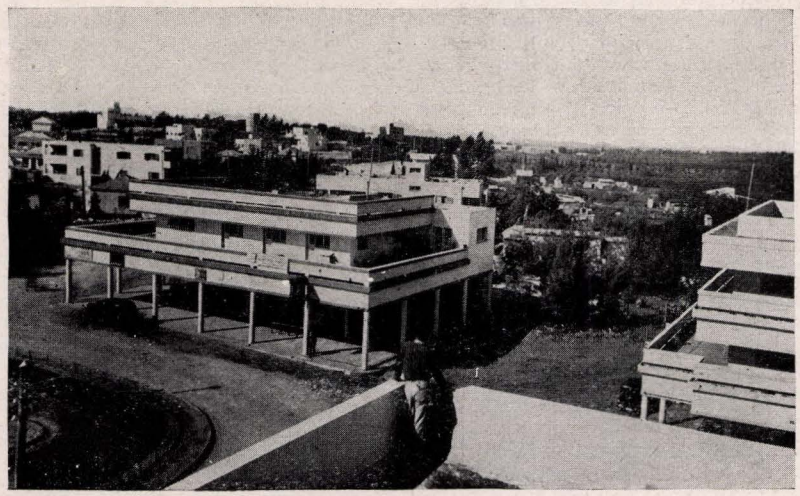
With the outbreak of war in 1914 the center of international Zionist activity shifted to the United States. Practically cut off from all contact with Allied and neutral countries, the Berlin headquarters of the world organization ceased to function and it became necessary to establish the seat of Zionist authority in New York. Shemarya Levin, a member of the World Zionist Executive, then visiting the United States and being unable to return to Europe because of the War, joined with Louis Lipsky in issuing a call for an extraordinary Zionist conference of all American Zionists, which was held on August 30, 1914, at the Hotel Marseilles in New York city. At this conference the Provisional Committee for General Zionist Affairs was formed with Louis D. Brandeis as its chairman. American Zionism entered a new phase.

Brandeis had expressed his interest in Zionism several years earlier in correspondence with Bernard G. Richards, then a newspaperman in Boston, and in meetings with Jacob de Haas, then editor of the Boston *Jewish Advocate*. In 1912 he came into contact with Nahum Sokolow, who was visiting this country, and he was profoundly influenced by this great Jewish scholar and Zionist leader. In accepting the chairmanship of the Provisional Committee, Brandeis assumed the responsibilities of American Zionist leadership which in fact involved a trusteeship for the world movement and the Zionist institutions in Palestine. He plunged into the work with vigor, drawing into the circle of Zionist action a number of able associates, among them Felix Frankfurter, Bernard Flexner, Louis Kirstein and Mrs. Mary Fels. Under his leadership the financial resources of the organization were greatly expanded and substantial aid to the Palestine institutions was furnished. The organization attracted not only individual men of prestige but also greater mass support. It gained steadily in political influence and was enabled to play a decisive role in the events which led to issuance of the Balfour Declaration in 1917, and in the award of the Palestine Mandate to Great Britain.

After Brandeis was elevated to the Supreme Court in 1916, he continued in the leadership of the Provisional Committee, but not as its active chairman. He ceased to appear in public and acted through committees and close associates. But the Provisional Committee, which included all Zionist parties, was dissolved by the withdrawal of the Poale Zion and the Mizrachi in 1916, and the Federation at its convention in 1917 merged all its branches into the Zionist Organization of America (Z.O.A.), establishing as its basis individual membership, segregated into territorial districts. Justice Brandeis was elected honorary president; Judge Julian W. Mack, president; Stephen S. Wise and Harry Friedenwald, vice-presidents; Jacob de Haas, executive secretary; Louis Lipsky, secretary for organization; Henrietta Szold, secretary for education; and E. W. Lewin Epstein, treasurer. The Brandeis administration continued in office until 1921.

After the War Brandeis visited Palestine to look over conditions in the land and he was unfavorably impressed by the prevalence of malaria. In 1920 he participated for the first time in an international Zionist conference at London. At that meeting the leadership of the world organization was offered to him, but he declined. By that time he had formed definite views on how to proceed with the building of the Jewish national home. He emphasized economics and health enterprises. He wanted the American Zionist organization to gather private capital for specific economic projects for Palestine, and he was opposed to the establishment of the Keren Hayesod, which was to be an all-inclusive fund subscribed by Jews all over the world, to lay the economic, social, sanitary and educational foundations for vast colonization work in Palestine. In these views he was at variance with Chaim Weizmann, who had been elected to the leadership of the world organization, and when the Keren Hayesod was proclaimed, a rift occurred in American Zionism by the refusal of the American leadership to accept the decision of the world organization.

The final clash came at the convention held in Cleveland in 1921, which was preceded by a great deal of public discussion and the setting up of a bureau for the Keren Hayesod by the opposition to Justice Brandeis' leadership. The latter was challenged in the convention and the administration was refused a vote of confidence. Thereupon Brandeis and his colleagues submitted a statement withdrawing from all responsibility. Lipsky, who was a member of the administration, had previously resigned to lead the opposition, and it was to him and his principal colleagues that the convention then entrusted the leadership. A collegium was set up which included, in addition to Lipsky, Abraham Goldberg, Morris Rothenberg, Emanuel Neumann, Bernard A. Rosenblatt, Hermann Conheim, Louis Topkis and Peter J. Schweitzer.



From then until 1930 Lipsky was the dominant figure in the American organization, and in that period it grew not only in numerical strength but also in political influence and in financial resources. It established the Keren Hayesod on a firm basis so that funds raised by it annually in America became the principal support of the Palestine budget. Several members of the Brandeis group, primarily Judge Mack, Stephen S. Wise and Abba Hillel Silver, resumed an active part and worked for the Keren Hayesod. Politically the organization scored its greatest success when the Congress of the United States adopted a joint resolution, approved by President Warren G. Harding on September 22, 1922, endorsing the Balfour Declaration.

The Arab riots in Palestine in 1929, coupled with the severe economic crisis which set in that year, had a depressing effect upon Zionist activity, and in order to bring about a reunion of all Zionist forces the 1930 convention in Cleveland laid the basis for the full return of the Brandeis group. Upon Lipsky's refusal to continue as president, the convention elected an executive committee of eighteen to constitute the administration with a predominance of the Brandeis group in its membership. Robert Szold was later named as chairman of the administration. He functioned until 1932 when Morris Rothenberg was elected president. Continuing for four years during which the membership of the organization, under the direction of the secretary, Morris Margulies, rose from 8,000 to 17,000, Rothenberg was succeeded by Stephen S. Wise in 1936. By a constitutional provision the president's term of office was limited to two years, and Wise was followed in 1938 by Solomon Goldman of Chicago,

Mass meeting (above) held at Madison Square Garden, New York, in protest against the Arab attacks upon Jews in 1929; (right) David Lloyd George (left) at a Zionist Conference held in Louisville, Ky.

(Left) Nathanyah, a settlement founded (1929) in honor of the American philanthropist Nathan Straus

then by Edmund I. Kaufmann of Washington, who was in office only one year. He was succeeded in 1941 by Judge Louis E. Levinthal of Philadelphia. By 1942, the membership of the Organization had reached 50,000.

Upon the outbreak of war in Europe in 1939, Weizmann authorized the formation in America of an agency similar to the Provisional Committee which functioned in the previous war. The situation, however, differed from what it was twenty-five years earlier, inasmuch as the various Zionist parties in America, including the Hadassah, which had become independent of the Z.O.A. and was numerically the largest Zionist organization, had developed their own identities and were reluctant to surrender their authority. There was thus formed the American Emergency Committee for Zionist Affairs, composed of representatives from the various Zionist organizations.

In 1943 the Central Conference of American Rabbis, which had originally strongly opposed Zionism, and as late as 1935 had passed a neutrality resolution, reversed its stand by declaring that Zionism and Reform Judaism were definitely compatible.

SAMUEL CAPLAN.

IV. Organization. The Zionist Organization was from the very beginning organized on democratic lines. Its membership consists of those who subscribe to the principles of the Basel Program and who pay annual dues of a shekel. These shekel-payers, in turn, elect the Zionist Congress; any shekel-payer over eighteen may vote, and any over twenty-four may hold office.

The Zionist Congress, which at first met annually, and later biennially, is the supreme governing body of the organization, determining all its policies on the basis of a majority vote, and electing the officers. When it first met in 1897 it was a combination of various Zionist societies all over the world, but in the years that followed it developed a more definite organization. For the periods between the sessions of the Congress, the latter elected an Actions Committee to carry on Zionist work; this has generally consisted of from thirty to fifty members, chosen from among all the groups and tendencies in Zionism. From this larger Actions Committee a smaller Actions Committee of about five to seven members was chosen to act as an Executive. Following the first World War and the Palestine Mandate the Executive was given a more definite form and authority and became the active administration of Zionist affairs, aided by a larger council which met twice a year. During the lifetime of Herzl the seat of the Executive was at Vienna; it then was located in Cologne and Berlin successively; in 1918 it was moved to London, and in 1935 to Jerusalem.

The constituent organizations which elect delegates to the Zionist Congress are of two types: regional and ideological. Regional organizations, of which there are over fifty, are grouped according to various countries and consist of a federation of local Zionist organizations. These exist in all countries where there are large numbers of Jews, with the exception of the Soviet Union and Mohammedan countries, where they are banned by the government. As a rule, the local organizations send delegates to national conventions, which in turn elect or supervise elections of delegates to the Zionist Congress. Thus the Zionist Organization of America, with its affiliated Hadassah organization, comprising a membership of about 200,000, is one of the most important national organizations. It maintains a central office at Washington, D.C., and a branch office, with a Zionist reference library, in New York city.

The ideological groups consist of such organizations as the Mizrachi, the Poale Zion, the Zeire Zion, and the Radical Zionists. The Zionist Revisionists, formerly such a group within the Zionist Organization, seceded in 1935 to form the New Zionist Organization.

Since the Palestine Mandate, the Zionist Organization has functioned largely through the Jewish Agency; the president of the Zionist Organization is always president of the Jewish Agency, and the Zionist representation in the Jewish Agency always includes the Executive. The Zionist Organization also maintains a Court of Justice and a Court of Honor to settle all disputes within the organization.

See also JEWISH AGENCY.

V. The Revisionist Movement. Dissatisfied with the policies which the majority of the Zionist Organization, in the face of mounting anti-Zionist trends in the British administration of Palestine, had adopted under Weizmann's leadership after 1921, a group was formed in 1923 under the leadership of Vladimir Jabotinsky as opposition within the Zionist Organization. It secured four elected delegates at the Fourteenth Zionist Congress in 1925, and held its first world conference in the same year, adopting the name Union of Zionist Revisionists. In 1935, upon seceding from the Zionist Organization, it adopted the name of New Zionist Organization.

The Revisionists' demand for a "revision" of Zionist policies was based on their acceptance of Herzl's fundamental thesis according to which the correct tactics to be pursued were those of "political" rather than "practical" Zionism. Weizmann's policy of steadily advancing Jewish economic positions in Palestine through voluntary Jewish contributions within the framework of the existing political situation was challenged by the Revisionists, who pointed out that as long as the controlling political regime in Palestine was anti-Zionist, no small-scale progress would prevent ultimate defeat.

The aim of Zionism, according to them, was "the establishment of a Jewish state on both sides of the Jordan, under the auspices of a Jewish majority." To insure the realization of this aim, they demanded vigorous political action in London and elsewhere that would secure a change of administration and would establish a "colonization regime" actively promoting Jewish colonization. This regime was to include a land reform which would put public and unused lands at the disposal of Jewish immigrants and of landless residents of Palestine, and a protective tariff policy. To carry out this policy, the Revisionists took the initiative in forming the League for the Seventh Dominion, a group of British and Jewish politicians favoring the future development of a Jewish Palestine as a dominion within the British Empire. After the anti-Zionist stand taken by the British government in 1929, the League was disbanded on the advice of its president, Laborite Member of Parliament Colonel (later Lord) Wedgewood.

To provide sufficient space for a large immigration, the Transjordan was to be reintegrated with Palestine. To reduce to a minimum the transitional period and to secure the future of Jewish Palestine against complications which might arise in the course of a long interval, the Revisionists insisted on the need to concentrate on rapid mass-immigration, on "bringing to Palestine the largest number within the shortest time," even at the cost of postponing until later various social, economic and educational improvements, however desirable these might be. To increase the capacity of the country to absorb large numbers of immigrants, the Revisionists advocated middle-class colonization and development of private enterprise, since the influx of private capital would provide many additional opportunities for work. For the same reason they advocated increased emphasis on industrialization and, in agriculture, intensive cultivation and truck-gardening.

Viewing the interim pending the establishment of a Jewish majority in Palestine as extremely hazardous, the Revisionists demanded that class strife be postponed during that period and that compulsory arbitration be substituted for strikes; to prevent further anti-Jewish outbreaks and, if necessary, to suppress them without having to call on British soldiers and policemen, the Revisionists insisted on the reestablishment of the Jewish Legion and on the formation of Jewish units within the Palestine police force.

The Revisionist program soon involved its authors in deep conflicts with various powerful elements within the Zionist Organization. The "practical" Zionists saw no need

to waste time on political action, and demanded concentration on economics. "Spiritual" Zionists who claimed the authority of Ahad Haam disliked the emphasis on numbers and statehood. An influential group of British Zionists resented the suggestion that Zionism place itself publicly on record as opposing a policy decided upon by the British government. Influenced by the universal demand for disarmament which prevailed at the time, many disliked the insistence on the reestablishment of a Jewish military unit. Others, proud of the educational and social work performed in Palestine, did not welcome the suggestion that these activities be relegated to the future. Most important of all, the Labor Zionists, intent on colonizing Palestine on a collectivist basis and on securing a dominant position for labor, were incensed over the advocacy of middle-class colonization and over Revisionist preachings of "harmony between the classes." The Revisionists were accused of militarism and fascism, an accusation that gained wide currency.

In the meantime, Revisionism continued to grow. It secured ten elected delegates to the 1927 Zionist Congress, twenty-one mandates to the 1929 Congress, and fifty-two delegates to the 1931 Congress. Its main strength was drawn from Eastern Europe, where the impoverished Jewish masses, anxious to emigrate in large numbers, rallied to the "maximalist" group which advocated speedy large-scale immigration. Revisionism became especially popular among the youth, and the outstanding Revisionist youth organization, the Brith Trumpeldor—a body which combined Halutz training with defense training—united about 100,000 Jewish youngsters led by A. Propes, Captain Jeremiah Helpern and B. Lubotzky. Other important youth groups were the Brith Hahayal, an association of former soldiers; the Yabneh Veyodefeth, an association of university students; and the Masada, an association of high school students.

Bitterness between Revisionists and Laborites increased, and with the Laborites largely in control of various Zionist agencies, the Revisionists soon complained of discrimination against their members in the distribution of land by the Jewish National Fund, in the issuance of immigration certificates, and in the provision of work by the labor exchanges of the Palestine Jewish Labor Federation. Gradually the Revisionists ceased participation in the Jewish National Fund and challenged the Jewish Agency's system of certificate distribution, while Revisionist workers in Palestine withdrew from the Federation and formed a parallel "National Labor Federation." More bitterness was engendered by Revisionist charges of electoral manipulations by the Laborites, whom they accused of purchasing wholesale blocks of Shekels (Zionist membership and voting certificates).

In 1929 the Revisionists made themselves still more unpopular with their fellow-Zionists by their strenuous opposition to the enlargement of the Jewish Agency. They argued that the non-Zionists, once they were given a 50 per cent part in the Agency, would further contribute to the whittling down of political Zionism. The Revisionists proposed having the Agency elected by universal Jewish suffrage regardless of partisanship or paid membership, but objected to a standing agreement giving a fifty-fifty participation to a group of non-Zionist notables.

At the Seventeenth Congress, in 1931, a majority, dissatisfied with Weizmann's minimalist policies, made ready to form a coalition Executive without Weizmann, and the Revisionists had at long last a chance to take part in the Executive. But the Congress tabled a Revisionist resolution proclaiming the Jewish state to be the aim of Zionism, and the Revisionists remained once more in opposition.

The events at the 1931 Congress deepened existing differences within the Revisionist movement. Moderate leaders, including Grossman, Stricker, Lichtheim, Soskin and Machover, considered that the party's ultimate purpose was to enter the Zionist Executive and to influence decisively the policies of the Zionist Organization. Jabotinsky, on the other hand, doubted the ability of the Zionist leadership ever to deal adequately with the Zionist problem, and believed it necessary to concentrate on independent political action in the interests of Herzlian Zionism. A rift resulted early in 1933, and the moderate leaders left the Revisionist ranks to form the Jewish State Party. Jabotinsky, followed, among better-known party leaders, by Tiomkin, Weinshall, Jacobi and Hoffman, and by practically all the rank and file, embarked upon political work.

Bitterness rose to a new pitch a few months later when, following the murder of the Mapai (Socialist Party) leader, Victor Hayim Arlosoroff, three Revisionists were accused of having committed the deed. At the 1933 Congress, elected in the midst of an unprecedented anti-Revisionist campaign, the Revisionists, weakened by the recent rift in their ranks, nevertheless secured forty-five elected delegates. After the acquittal of the accused Revisionists by the Palestine Criminal Courts, Jabotinsky and David Ben Gurion, the Laborite leader, drafted an agreement aiming at the reconciliation of the two powerful groups. The agreement was confirmed by the Revisionist Conference, but the rank and file of the Laborites in Palestine, by then indoctrinated with profound distrust of the Revisionists, rejected it.

Perturbed over indications that the Zionist Executive might commit the movement to various schemes which would compromise the future of Jewish Palestine (parity, the bi-national state, the legislative council with an Arab majority, and permanently restricted immigration), the Revisionists threw themselves into independent political action, seeking to enlist support for a Jewish state over the whole of Palestine, capable of absorbing millions of prospective immigrants. A petition to the League of Nations was organized in 1934 by J. Schechtman and other Revisionist leaders, and several hundred thousand signatures were assembled. The Zionist Actions Committee, however, adopted in 1935 a resolution forbidding independent political activities by members of the Organization. The Revisionists had to choose between abandoning their work and leaving the Zionist Organization. They left, and in the same year, in Vienna, convened the first Congress of the New Zionist Organization. 713,000 voters were announced to have taken part in the elections to the Congress, over 400,000 of them in Poland alone. Jacob de Haas presided over the Congress. Jabotinsky was elected president of the new organization. Its seat was first Paris, then (1936-40) London.

Working on the basis of the Revisionist program, the New Zionists were mainly impressed by the need to hasten the "evacuation" to Palestine of millions of European Jews desirous of escaping the impact of Hitlerism. In contrast to Weizmann's reliance on Great Britain, they pursued a "policy of alliances." Arguing on Herzlian lines, they stressed the universal importance of an adequate solution of the Jewish question, and tried to enlist the support of all governments (with the exception of the Nazi government in Germany and the Goga government in Roumania) in bringing pressure on Great Britain to open the gates of Palestine and in organizing international assistance for the evacuation scheme. Active diplomatic activity was developed. A "ten-year plan" for the economic absorption of mass migration to Palestine was elaborated by S. Klinger. Jabotinsky, testifying before the British Royal Commission in 1937, presented the case for the New Zionists. Benjamin Akzin opposed the partition plan before the Palestine Partition Commission in Jerusalem, and advocated the evacuation scheme before the Intergovernmental Refugee Committee in Evian, France, in 1938. When, after the annexation of Austria in 1938, the plight of the European Jews grew worse, and the British government further curtailed Jewish immigration to Palestine, Jabotinsky's son Eri and other leading Revisionists initiated a large-scale movement of so-called "illegal" immigration to Palestine which, practised also by other groups, resulted in the escape of about 30,000 Jews to Palestine between 1938 and 1940. Another development of the same period was the growth of the "Irgun" self-defense organization in Palestine, commonly considered as having been inspired by Revisionist teachings. Abandoning the policy of Hablagah (restraint), the Irgun was active in counter-attacking Arab bands during the Palestine riots of 1936 to 1939. In the second World War (1939 on), it cooperated with British military authorities in the Middle East.

After the outbreak of the second World War the New Zionists proposed the formation of a united Jewish representation to defend Jewish interests during and after the War, and the creation of a Jewish army to fight the Axis. Late in 1942 the New Zionists came out with the proposal to recognize the Jewish people as one of the United Nations. Repeated efforts were made to secure unity with the Zionist Organization, but nothing came of them.

Following the death of Jabotinsky in 1940, New Zionist work continued to be directed by contact between the

centers of the movement in Jerusalem, New York and London. Beside the men named above, outstanding New Zionist leaders included A. Abrahams (London), A. Altman (Palestine), E. Ben-Horin (New York), R. Briscoe (Dublin), J. Haskell (d. 1942) and Judes (South Africa), A. Kopelowicz (New York), J. Mirelman (Argentina), Rabbi Louis I. Newman (New York), and W. Weisl (Palestine). The American Organization was led successively by M. Danzis, J. Smertenko, Jacob de Haas, William B. Ziff, Rabbi M. Rose, E. Ginsburg, and Colonel M. Mendelsohn. The work for the creation of the Jewish army was largely taken over after 1941 by the non-sectarian American Committee for the Jewish Army, led by Pierre van Paassen and Peter Bergson, and by its London branch.

The chief publications of the New Zionist Organization in 1943 were: *Zionews* (New York), *Hamashkif* (Tel-Aviv), *Jewish Standard* (London), *Jewish Herold* (Johannesburg), *Idea Sionista* (Buenos Aires). BENJAMIN AKZIN.

VI. Opposition to Zionism. Before treating the history of the opposition to Zionism on the part of Jews, it is necessary to make clear one fact: the opposition is solely to the political aspects and ideology of Zionism, and not to the colonization of Palestine, particularly as a place of refuge for oppressed Jews. Non-Zionists or anti-Zionists have expressed their objections to the proposed plan for a Jewish state, to the Zionist concept of a separate Jewish nation, and to the Zionist solution of Jewish problems. On the other hand there has been no opposition to "practical Zionism," the resettlement of Jews in Palestine. After the doors to immigration into the United States were practically closed in 1924, all groups in Jewry recognized the necessity of building up Palestine as a place of refuge for Jews. In fact, a very considerable part of the funds that have been given for the development of the new Jewish settlement in Palestine has come from precisely those who are opposed to the Zionist ideology as such.

1. Ideological Basis. The philosophical and ideological basis for opposition to Jewish nationalism was widely and vocally expressed in every area of Jewish life long before Theodor Herzl's *Judenstaat* (1896) heralded the birth of modern Zionism. Decades before the first Zionist Congress in Basel (1897) at which the modern Jewish nationalist movement was brought into being, the attitude of rabbis, scholars, and leading laymen was voiced on this vital topic of interest to the Jew. In each instance the objections expressed the basic theological and philosophical principles of the protesters and emphasized the hopes for complete political and social emancipation of Jews in every land. All the disparities in Jewish life and thought are evident in this opposition even as they are to be found among those who are zealous for the building of a national homeland in Palestine. From the most Orthodox to those who were totally emancipated from Jewish religious ties, from those who lived on a plane of complete political and social equality in their native lands to those who suffered under the unenviable status of second-class citizenship, there were opponents of the aims of modern Zionism.

The extreme Orthodox rejected any attempt at the restoration of Palestine as the homeland of Israel through any agency other than divine intervention. Though they prayed daily that their "eyes might behold God's return to Zion," and that Israel be led "back from captivity," they believed that this devoutly sought end of Israel's sorrow could come only when God in His own good time would restore His people to the place He had chosen for them. This, however, must await the time when Israel's earlier guilt shall have been atoned, when Israel's mission to the peoples of the world shall have been completed, and when all mankind shall have acknowledged God. Samson Raphael Hirsch (1808-88) expressed the view of Orthodoxy when he declared: "For this future, which is promised us in the glorious predictions of the inspired prophets, whom God raised up for our ancestors, we hope and pray; but actively to accelerate its coming would be a sin, and is prohibited to us."

Such was the Orthodox viewpoint, and before large numbers of Orthodox Jews could be prevailed upon to lend their support to the cause of Political Zionism, they had to be persuaded that Zionism was compatible with the aims and operations of traditional Judaism. Many were drawn into the movement but vast numbers continued to withhold their support. The Agudath Israel (organized in 1912), a world-wide organization representing Orthodox Jews on matters religious, expressed its attitude toward Zionism in 1919 in a statement by Isaak Breuer, who called Zionism "the most formidable enemy that has ever risen against the Jewish people." Breuer, who believed that Zionism would deprive the Jewish people of its unique nature, proved the strength of his convictions by going to Palestine, at the head of a group of pious members of the Agudath Israel, for the purpose of preparing the land and the Jewish people for reunion under "the rule of God." Political Zionism, he maintained, only seeks to "change the galuth of Israel for the galuth of the nations" (*Judaism in a Changing World,* edit. Leo Jung, 1939, p. 186).

The opposition of Orthodox Jewry to Zionism was strengthened by the secular and political emphasis which Zionist leaders placed upon Jewish life. Since for the Orthodox any attempt to reestablish Zion as a homeland had to be bound up wholly with Israel's religion, they were not content with any program of salvation for the Jew which expresses itself solely in political aims. The leaders of Zionism, who were frequently warned by religious Zionists that the secular character of their movement would lose it many adherents, have been targets of the wrath of Orthodox leaders who fear that Zionism has become not only a substitute for Judaism but its most active rival for the loyalty of the Jewish masses.

The opposition of Liberal elements in Jewish life to Political Zionism was on a much broader plane than that of the Orthodox and it expressed itself more frequently in pronouncements from conferences and individual leaders. From Germany, which was in a sense the home of the modern movement because Herzl received his strongest early support in Cologne, came the greatest opposition. The first Zionist Congress was to be held in Munich but, as a result of the very violent protest by German Jewry, the place of meeting was changed to Basel, Switzerland.

2. In Europe. German Jewish opposition to Political Zionism dated from the 1840's when the Reform Movement was born and eliminated all references in its prayers to a return to Palestine. In 1842 the Frankfort Reform Society declared that they "do not expect or long for a Messiah who will lead the Jews back to Palestine, but regard the country to which they belong either by birth or citizenship as their only Fatherland." The central thought of the whole Reform Movement had been the disassociation in a large measure of religion and nationality. It insisted upon the universality of the Jewish religion. Dispersion was held to be providential and necessary for the propagation of the monotheistic faith of Israel.

Ludwig Geiger sounded the political attitude of German Jewish opposition when he declared, "Zionism is as dangerous to the German spirit as are social democracy and ultramontanism—the German Jew who has a voice in German

literature must look upon Germany alone as his Fatherland, upon the German language as his mother tongue, and the future of the German nation must remain the only one on which he bases his hopes. Any desire to form together with his co-religionists a people outside Germany is downright thanklessness towards the nation in whose midst he lives. For the German Jew is a German in his national peculiarities and Zion is for him the land only of the past, not of the future" (*Die Stimme der Wahrheit,* Berlin, 1905, p. 165 et seq.).

Earlier, the Association of Rabbis in Germany (July 16, 1897) voiced its objections on religious grounds when it declared, "The attempts of Zionism to found a Jewish national state in Palestine are contrary to Messianic promises of Judaism as laid down in Holy Writ. Judaism demands of its adherents to serve the state in which they live and in every way to further its national interests." This statement won for these rabbis, among them Maybaum (Berlin), Horowitz (Frankfort), Guttmann (Breslau), Auerbach (Halberstadt) and Werner (Munich), the name Protestrabbiner, a term which was revived later when a similar body in America made known its opposition to Political Zionism. That the Protestrabbiner did not stand alone is evidenced by the support given to their stand by the chief rabbi of Vienna, Moritz Güdemann (1835-1918), who declared that "Zion was nothing but a symbol of the future of Judaism and of the world, that the role of the Jew lies in the very opposite direction to that preached by Zionism—as solvers of nationalism and preachers of universalism" (Gottheil, *Zionism,* 100). This represented a reversal in Güdemann's thinking since, on receiving Herzl's *Judenstaat,* he declared: "I have read it through and find nothing to criticize." His opposition derived from the failure of the Zionist movement to emphasize the religious element in Jewish national rehabilitation. Hoping for a return to Zion in God's time, he opposed all efforts to eliminate references to Zion from the prayer-book.

In England the opposition was also formed out of a union of scholars, writers and intellectuals, all of whom occupied a distinguished place in Jewish communal affairs and on the religious and cultural plane. Lucien Wolf (1857-1933), a noted journalist and historian, a founder of the Jewish Historical Society of England, expressed his objections on the ground that the nationality of Judaism is that of a "holy nation and a kingdom of priests." He voiced his opinion in an article whose title left no doubt as to his stand, "The Zionist Peril" (*Jewish Quarterly Review,* vol. 17, pp. 1-25).

The most vocal opposition was expressed by Laurie Magnus (1872-1933), another journalist and essayist. In his publication, the *Jewish Guardian,* he espoused the cause of Liberal Judaism and anti-Zionism. He saw in Zionism a threat to the safety of Jews everywhere and called the Zionists "part authors of the anti-semitism which they propose to slay." He declared that European countries could not justify their retention of Jews if Jews concerned themselves with national aspirations elsewhere. He saw in the program of Zionism a change in the status of Jews who remained in lands outside of Palestine to the position of "Foreign Visitors" (*Aspects of the Jewish Question,* 1902). Five years later (1907) Magnus wrote of the "Travesty of Zionism" (*Religio Laici Judaici*). He saw in Zionism's methods a policy of flight and escape, a chimerical statecraft and a "decline from the prophetic ideal." He held that "Zionists should be excluded from Parliament and public office" on the ground that their loyalty is divided and temporary and conditioned on their obtaining a state of their own" (*Religio Laici Judaici,* 140). Theodor Herzl he describes as the Sabbatai Zevi of this revived Jewish nationalism. His (Herzl's) Zionism was material Messianism, the Golden Age achieved by gold (*The Jews in a Christian Era,* 1929, p. 393).

Claude G. Montefiore (1858-1938), scholar and deeply religious leader of Liberal Judaism in England, stood out as chief opponent of Zionism in Great Britain. In his *Liberal Judaism* (1907) he expresses his desire for a "denationalization of Judaism and support of the counter theory, an Englishman of the Jewish persuasion." He argued that a man can belong to only one country at a time, but "heart and soul an Englishman by nation, one can also be heart and soul a Jew by religion. But by religion only."

On May 17, 1907, Montefiore joined with David L. Alexander, president of the Board of Jewish Deputies, in a publicly announced refusal to cooperate with Zionism. Two reasons were set forth in the statement which appeared in the London *Times.* 1. "The Zionists claim that Jewish settlement in Palestine shall be recognized as possessing a national character in a political sense." They recognized in this basic principle of Political Zionism a danger to Jewry the world over because it regarded "all Jewish communities of the world as one homeless nationality incapable of complete social and political identification with nations among whom they dwell." Against this view these opponents of Zionism declared that the Jews of England regarded themselves primarily as a "religious community." They held Judaism to be a religious system with which their political status had no concern, and they maintained that Jews as citizens of the countries in which they lived were fully identified with the national spirit and interests of their countries. 2. The second objection to Zionism was the Zionist proposal to invest the Jewish settlers of Palestine with certain "special rights" in excess of those enjoyed by the rest of the population. This, Montefiore and Alexander declared, would be a "veritable calamity for the whole Jewish people." They argued that in countries in which Jews were still struggling for equal rights they would find themselves hopelessly compromised, while in countries where their rights had been secured, they would have great difficulty in defending them. A long list of names of men who played a significant part in every aspect of British Jewish affairs was added to those of the two leaders already mentioned.

In France, where the Jewish community was always numerically small and highly integrated, Jewish communal activities had always been under the strong influence of the Alliance Israélite Universelle. Founded in 1860 as a result of the Damascus Affair, the Alliance was organized to relieve the persecuted and disenfranchised Jews particularly in Eastern Europe and the Near East. Through diplomacy and financial subventions the Alliance interceded for Jews in stricken areas and as early as 1870 founded an agricultural school and colony, Mikveh Israel, near Jaffa in Palestine.

On the question of Jewish nationalism and Zionism, the Alliance had always been regarded as standing in opposition. It refused to participate in the First Zionist Congress in Basel. When the Sixth Zionist Congress was held in Basel (1903) the Alliance showed its antagonism by withholding cooperation. Later, in 1910, the Alliance again rejected overtures of the Zionists who sought its cooperation in dealing with the Ottoman Empire, and expressed the belief that "Zionism was incompatible with Ottomanism" (Gottheil, *Zionism,* 160). This was in keeping with the Alliance policy not to intrude upon existing political structures. It sought to effect its work by close cooperation with existing governmental agencies. Although the Alliance organized a number of educational institutions in Palestine, and is credited by Nahum Sokolow with doing "consciously or unconsciously Zionist work" (*History of Zionism,* vol. 1, p. 205) "the schools were the object of continued criticism, sometimes accompanied by violence, for the refusal to join with the Zionist organizations and accept Zionist supervision" (Edelman, Samuel, private communication).

3. In the United States and Palestine. In America opposition to Jewish nationalism was expressed by early Reform rabbis who drew their inspiration from the liberal teachers of Germany. On American soil were represented the same arguments that were voiced in Germany. In conferences held in Philadelphia in

1869 and in Pittsburgh in 1885, the Central Conference of American Rabbis rejected the hope of return to Palestine when the rabbis declared, "We consider ourselves no longer a nation but a religious community" (1885, Pittsburgh Platform). This viewpoint persisted in anti-Zionist ideology and debate since that day. Just a month before modern Zionism was born (1897) the opponents of Jewish nationalism looked upon the aspirations of the nationalists as "agitation that concerns us very little" (*Central Conference of American Rabbis Year Book*, 1897, p. 11). In spite of this, there was concern even in those days that Zionism might intrude upon American shores. Isaac M. Wise perceived in the great East European migration the carriers of the Zionist doctrine, and saw the danger that the whole of American Israel might be compromised by the supporters of the Herzlian plan, which he called the "momentary inebriation of morbid minds." The Basel Congress and the Zionist agitation Wise regarded as an "unpleasant episode" in Jewish history and he called upon his colleagues in the Reform rabbinate to voice their united opposition.

During the twenty years that followed, the Conference issued resolution after resolution rejecting and repudiating political Zionism. In 1899 Samuel Sale expressed the political thought of the Conference when he declared, "The American Jews are so intimately bound up with the history and destiny of this country that it seems to border on insanity to ask us to give up our glorious heritage for a mess of pottage elsewhere." Believing in the liberal forces at work in the world, the Reform rabbis charged the Zionists with exploiting the fears of the Jewish people by insisting on their world-wide homelessness. They felt that Zionist insistence on Jewish nationality and the emphasis on racism was merely baiting the trap for the enemies of Israel. The anti-Zionists turned to Jewish history to prove how little the "state" played a part in Israel's great and long history. Indeed, the "state" became a burden and a hindrance to the fullest expression of Israel's greatest beliefs. Deriving this inspiration from the prophets, they reiterated the inherent universalistic character of the religion of Israel and declared that it had outstripped the narrowly confining shackles of state and national life.

The strongest line of attack against Zionism was that it violated the "mission" ideal in Jewish history. The mission of Israel was not to Jews alone, but to all the world, and to follow the way of Zionism was regarded as the "complete and final isolation of the Jews as a people." Zionism's banner was said to be inscribed with the words "medievalism, sentimental romanticism, Zionism" (David Philipson, 1904).

When the Balfour Declaration was announced in 1917 and Zionism ceased to be an abstract topic of debate and became a concrete and real issue, the opponents of Zionism, deeply concerned with every offer of help for stricken Jews, expressed their gratitude to Great Britain for its gesture of generosity. Subsequently they declared, in a statement drafted by Samuel Schulman.

> We rejoice, indeed, at the present decision of the San Remo Conference to give to Great Britain a mandate over Palestine in line with the Balfour Declaration. . . . While we thus rejoice, we do not, however, admit that this historic event is what it has been called, the *Geulah* or the Redemption of Israel. Convinced that the mission of the Jew is to witness to God all over the world, emphasizing the religious function of Israel, and rejecting any assertion of Jewish nationality, which it has long ago outgrown, we hold that Israel's Redemption will only be realized when the Jew will have the right to live in any part of the world, and, all racial and religious prejudice and persecution ended, Israel will be free as a religious power and integral part of all nations to give world service. . . . In the present circumstances we believe that while nothing Jewish is alien to our Jewish hearts, and that while we are ready to help in the work of rebuilding Palestine for some Jews, we reemphasize the view of Jewish life for which our Conference stands—that Israel is not a nation, but a religious community; that Palestine is not *the* homeland for the Jewish People, but that the whole world ought to be its home (*Central Conference of American Rabbis Year Book*, vol. 30, 1920, pp. 141-42).

When in 1922 the Balfour Declaration came before the Congress of the United States for endorsement by that body, David Philipson appeared before a Congressional Committee to protest against the claim that all American Jews sought the endorsement of the Declaration. Philipson presented as evidence resolutions passed by the Union of American Hebrew Congregations and the Central Conference of American Rabbis over a period of years. He declared, "I wanted the committee to understand that Zionists do not speak for all American Jewry" (*My Life as an American Jew*, p. 303). The Union resolution began with the declaration, "We are unalterably opposed to political Zionism. The Jews are not a nation but a religious community" (1898). The resolutions by the rabbis included the sentiment, "We believe that Israel—the Jewish people—like every other religious communion has the right to live, to be at home, and to assert its message in every part of the world."

Opposition to Zionism was quiescent in the years following the riots in Palestine in 1929 and the advent of the Nazis to power in Germany in 1933. In 1935 the Conference resolved that a policy of neutrality and tolerance should be fostered in the Conference attitude toward Zionism. It was mutually agreed that the Conference take no official stand on the subject of Zionism. In 1942 this resolution was disregarded by the Zionists, who forced through the Conference a resolution supporting the establishment of a Jewish Army under a Jewish flag in Palestine. This action of the Zionists quickened to renewed life the opponents of political Zionism who for nearly twenty years had striven to cooperate in a program of unity with Zionists in aiding the cultural and economic development of Palestine. The opposition, headed by Samuel H. Goldenson, Louis Wolsey and Morris Lazaron, summoned their non-Zionist colleagues to a meeting in Atlantic City in June, 1942. This group, hastily convened and numbering ninety-five rabbis, who occupied leading pulpits in every section of the United States, having already declared its opposition to the formation of a Jewish Army, began the task of forming a permanent organization which would adopt as its program the de-emphasizing of nationalism and secularism in Jewish life and thought, and the re-emphasizing of religion as the basic and unique element in Judaism.

The newly organized group issued a statement of principles, declaring in part, "Jewish nationalism tends to confuse our fellowmen about our place and function in society and diverts our own attention from our historic role to live as a religious community wherever we may dwell." The statement recognized the necessity of aiding in the development of economic, cultural, and spiritual endeavors in Palestine but declared that the signers were "unable to subscribe to or support the political emphasis now paramount in the Zionist program." To make known their viewpoint and to win for it support among the masses of American Jewry, these opponents of Zionism organized, on December 7, 1942, a provisional "Council of American Judaism," which proposed to secure the cooperation of rabbis and Jewish laymen in every religious group in the United States.

The opposition of Jewish laymen in the United States was

expressed not only by those affiliated with the Union but by others who concerned themselves less specifically with religious matters in Jewish life. Among the many expressions of opposition by individuals were those of Ralph Boas and Morris Jastrow. Boas declared, "With Zion an independent state, every American Jew must become a Zionist and take the responsibility for the acts of Zionists or find some other name than Jew. But every Jew who values his independence and the Americanism of which he has become a part will object as never before to the complete Zionist program. Zionism is not merely a proposal to erect a new state in Palestine; it is a program of life for Jews everywhere" (New York *Times,* December 17, 1918). Morris Jastrow, a recognized authority on the Near East and head of the Semitics Department of the University of Pennsylvania, expressed his opposition thus, "The introduction of the political factor into Zionism—and that is necessarily involved in any planning for a nationalistic organization of the Jews—is bound to work mischief not only for the Jews of Palestine, but for those who are living and will continue to live in other countries" (*American Hebrew,* November 15, 1918).

Another opponent of Political Zionism was Congressman Julius Kahn, who for twenty-six years represented the state of California in the Congress of the United States. In an article, "Why Most American Jews Do Not Favor Zionism" (New York *Times,* February 16, 1919, magazine section, p. 7), he set forth his reasons for joining with one hundred and fifty others in sending a message to President Wilson opposing the Jewish state.

1. "It creates a divided allegiance between our country with its Stars and Stripes and Zion with its white flag and blue star. The American Jew knows but one flag, the Stars and Stripes.

2. "The Zionist doctrine is in conflict with our own free institutions.

3. "Palestine is small; it could never support the millions of Jews who live in countries where Jewish persecution is a matter of common occurrence.

4. "The greatest danger to the Jews in all those countries where they are on entire equality with every other class of citizens, is that with the establishment of a separate Jewish State they would be looked upon as aliens where today they are respected citizens."

The American Jewish Committee, organized in 1906 to obtain for the Jews in every part of the world civil and religious rights, declared in 1918, following the Balfour Declaration, "The Committee regards it as axiomatic that the Jews of the United States have here established a permanent home for themselves and their children" (*American Jewish Year Book,* vol. 21, p. 660). Fearing that the expressions of gratitude to England for the Balfour Declaration might be misunderstood, Louis Marshall, president of the Committee, declared, "We deem it our duty to give expression to our attitude toward the British declaration —and to file a caveat against future misrepresentation of the theory on which our acceptance of the Declaration is based" (*Jewish Opinion,* December, 1918).

Fearful of risking the rights of Jews in all lands a number of leading American Jews issued a "Statement to the Peace Conference," in which they indicated their "entire sympathy with the efforts of Zionism to secure a place of refuge in Palestine for Jews living in lands of oppression," but they warned and protested against the reorganization of Jews the world over as a national unit. This protest, submitted to President Wilson just prior to his departure for the Peace Conference in 1919, embodies the arguments raised by opponents of Zionism in America. The protest sought to clarify the place of the Jew in the world and in history and declared, "This demand (for a National Jewish State) not only misrepresents the trend of the history of the Jews, who ceased to be a nation two thousand years ago, but involves the limitations and possible annulment of the larger claims of Jews for full citizenship and human rights in all lands in which those rights are not yet secure." Demanding justice and equality for all the people of Palestine under the fundamental rules of democracy, the signers of the "Statement" saw in the Zionist plan for a national state in Palestine a spirit "totally contrary to the practices of free government," and they urged the "abandonment of such a basis for the reorganization of any state." They asked that Palestine be constituted as a "free and independent state, under a democratic form of government, recognizing no distinctions of creed or race or ethnic descent," and they declared, "We do not wish to see Palestine, either now or at any time in the future, organized as a Jewish State."

The objection of laymen to Political Zionism has been made not only by liberal religious leaders and laymen and representatives of the well-established sections of American Jewry, but also by the masses as represented in the American Jewish Labor Committee which has consistently refused to endorse Political Zionism and which in 1942 refused to join with the Zionists in their demands for a Jewish Army. The opposition of this group, which is of great importance numerically, has been a constant disappointment to the ardent Zionists who have consistently argued that opposition to their cause has come from assimilationists and representatives of the very wealthy. The nature of this resentment is reflected in the criticism of the Jewish Labor Committee in the editorial columns of *The Reconstructionist,* ardent champion of nationalism, of April 7, 1942, where it is recommended that subventions provided by Federation and Welfare funds be withheld from the American Jewish Labor Committee.

Yet another expression of opposition to the aims of political Zionism for a Jewish national state came from Palestine itself. Judah L. Magnes, head of the Hebrew University since its opening in 1925, and other prominent Jewish and Arab leaders predicted that inevitable conflicts would arise if Palestine became either a "Jewish state" or an "Arab state." Magnes warned (*Foreign Affairs,* January, 1943) of the danger of war between Jews and Arabs if some compromise was not made by the Jewish and Arab nationalists. He asked for the "union" of Jews and Arabs in the formation of a "binational state" and the creation of a federation which would include Palestine, Transjordan, Syria, and Lebanon in an economic and political federation. Magnes saw in this Federation an opportunity, not only for peace between Jews and Arabs living in Palestine, but also for the immigration of vast numbers of Jews to this greatly underpopulated area of the world. Zionists saw in the "Ihud" or union plan the destruction of their hopes for a National State. They called for the repudiation of Magnes and for his dismissal as head of the Hebrew University for declaring that Jewish nationalism is "unhappy, chauvinistic, narrow and terroristic in the best style of European Nationalism" (*New Palestine,* January 8, 1943). ZIONIST CONGRESSES. The Zionist Congresses were originally held every year, and after the Fifth Congress every second year. Both the first and the second World Wars prevented the World Zionist Organization from holding its regular meetings. The following is a list of the twenty-one Zionist Congresses that were held until the outbreak of the second World War in September, 1939:

First, Basel, 1897	Twelfth, Karlsbad, 1921
Second, Basel, 1898	Thirteenth, Karlsbad, 1923
Third, Basel, 1899	Fourteenth, Vienna, 1925
Fourth, London, 1900	Fifteenth, Basel, 1927
Fifth, Basel, 1901	Sixteenth, Zurich, 1929
Sixth, Basel, 1903	Seventeenth, Basel, 1931
Seventh, Basel, 1905	Eighteenth, Prague, 1933
Eighth, The Hague, 1907	Nineteenth, Lucerne, 1935
Ninth, Hamburg, 1909	Twentieth, Zurich, 1937
Tenth, Basel, 1911	Twenty-first, Geneva, 1939
Eleventh, Vienna, 1913	

ZIPPER, GERSCHON, Zionist leader, b. Monastersyzko, Galicia, 1868; d. 1920. Together with Adolph Stand, Osias Thon, Marcus Ehrenpreis and Markus Braude, he founded in 1892 the first Jewish national weekly in Polish, *Przyszlosc* (Future). He edited the first Jewish national pamphlet in Polish, dealing with the program of Jewish youth. In 1911 Zipper conducted a campaign for the founding of a Hebrew Gymnasium in Jerusalem. The movement was so successful that the opening of the school took place in the following year. After the first World War he undertook the leadership of the Zionist Organization in Eastern Galicia. In 1918 he founded at Lemberg the *Chwila,* the first Zionist newspaper in Polish.

Lit.: Insler, A., *Dr. Gerschon Zipper* (1923).

ZIPPES, JOSEF, soldier, b. Constantinople, 1904; d. Breslau, Germany, 1933. He was considered the youngest volunteer in the German Army in the first World War. He enlisted in 1918 (at the age of thirteen) in Constantinople, where he was first employed as interpreter. Through an accident, while on duty, he lost both legs and returned to Germany decorated with the Iron Cross and the Half Moon medals. By indomitable will he managed to pass examinations, won a master's certificate as goldsmith and became a trade school teacher in Breslau.

His wounds, which never healed completely, led to several operations, the last of which brought on his untimely death. Zippes was buried in the cemetery of Cosel, with many Upper Silesian persons participating in the final honors.

ZIPPORAH, daughter of Jethro and wife of Moses (*Ex.* 2:21). According to *Ex.* 4:20-26, she started out with Moses on his return to Egypt, and saved his life by circumcising their son, Gershom. Apparently she then returned to Midian, as *Ex.* 18:2 reports that Jethro brought her to Moses while the Israelites were encamped at Mount Sinai. The "Ethiopian" woman of whom Miriam speaks reproachfully in *Num.* 12:1 is probably Zipporah, since the word "Ethiopian" (*kushith*) is apparently a mistake for "Cushanite" (*kushanith*), that is, Midianite.

ZIRELSON, JUDAH LÖB, chief rabbi of Bessarabia, b. Koseles, province of Chernigov, Russia, 1859; d. Kishinev, Bessarabia, 1941. He became rabbi at Priluki (Poltava) at the age of twenty-one, serving from 1880 to 1909; in the latter year he was appointed chief rabbi of Kishinev. From 1910 to the Russian revolution of 1917 he was chairman of the rabbinical committee attached to the ministry of the interior at St. Petersburg. During the Beilis affair Zirelson published in the Russian newspapers and in the name of 315 rabbis a vehement protest against the ritual murder charge.

When Bessarabia came under Roumanian rule (1918) Zirelson was elected a deputy to the Chamber, serving from 1922 to 1926, when he became senator from Kishinev. He resigned his seat because the president of the Senate refused to insert in the *Monitorul Oficial* (the state's publication) the speech which he delivered on February 29, 1926, against the tolerance displayed by the Roumanian authorities toward anti-Semitic agitation and crimes. Zirelson was an active member of the Agudath Israel, and chairman of the two congresses held by that organization in Vienna (1923 and 1929).

Zirelson met a tragic death in the month of July, 1941, when, together with many Bessarabian Jewish leaders, he went to Kishinev to greet the Roumanian commander at the headquarters of the German-Roumanian army. This was shortly after the reoccupation of Bessarabia by the German and Roumanian troops, following the outbreak of the war between Russia and Germany-Roumania. The German and Roumanian commanders ordered the whole delegation, with Zirelson at its head, to be shot.

Known as a scholar, Zirelson published two volumes of responsa (*Gebul Yehudah* and *Arze Lebanon*), a volume of poetical literature (*Hegyon Leb*), and numerous articles in Hebrew periodicals. In 1920 he founded at Kishinev the Orthodox high school Magen David, and sponsored the Tarbuth Hebrew schools and organization for a great part of his life.

ZIRNDORF, HEINRICH, writer and rabbinical scholar, b. Fürth, Bavaria, Germany, 1829; d. Cincinnati, 1893. He was educated privately and at the Munich Gymnasium; in 1855 he went to Vienna, where he remained for two years and wrote the best of his verses. In 1856 his *Cassandra,* a tragedy in five acts, was produced on the stage. In 1857 he went to Frankfort, where he met Isaac Markus Jost; the result of his acquaintanceship was his chief work, *Isaac Markus Jost und seine Freunde* (Cincinnati, 1886). From 1860 to 1873 Zirndorf was a private tutor in London, returning then to Germany to become rector of the Hebrew teachers' institute at Münster. In 1876 he received a call to be rabbi of Temple Beth-El in Detroit, Mich. In 1884 he became professor of history and literature at the Hebrew Union College in Cincinnati, in which post he served until his death.

At the same time he became a regular contributor to the magazine *Deborah,* and subsequently he became its associate editor. A number of his sketches were translated into English and published under the title of *Some Jewish Women* (Philadelphia, 1892).

Lit.: Jewish Encyclopedia, vol. 12, p. 687.

ZITRON, SAMUEL LEIB, Hebrew and Yiddish writer, historian of the Hibbath Zion movement and of Hebrew and Yiddish journalism, b. Minsk, Russia, 1860; d. Vilna, Lithuania, 1930. He received a traditional education, but was taught Hebrew and Russian by private tutors. In 1875 his father sent him to study at the Yeshiva at Volozhin, where he remained for three years. He then went to Breslau to enter the rabbinical seminary there, but was not admitted because of his youth. He continued his travels, meeting some of the Hebrew writers of his time, and in Vienna encountered Perez Smolenskin, who encouraged him to write. His first essay appeared in *Hamaggid* in 1877, and his first story, "Kegavvena," was printed serially in the weekly *Hamabit* a year and a half later, but was never completely published owing to the suspension of the periodical. Zitron continued to write stories and to translate the works of Karl Emil Franzos, Lewanda and other authors. His stories were

published in the collections *Asefath Sippurim Mehayye Yisrael* (Warsaw, 1885), *Mishuk Hahayyim* (Warsaw, 1887) and *Yonah Pothah* (Warsaw, 1888). He also wrote numerous critical essays and book reviews.

Zitron was an early adherent of the Chovevei Zion (Hibbath Zion) movement. He translated the *Autoemanzipation* of Leo Pinsker into Hebrew under the title *Im En Ani Li Mi Li?* (Vilna, 1884). In 1886 he worked for the annual *Keneseth Yisrael*. He was one of the first to join the Zionist Movement, and attended three Zionist congresses as correspondent for various Hebrew periodicals. Up to 1903 he supported himself by teaching Hebrew, and his literary activity was only occasional; in that year he joined the staff of the *Tog*, published by Leon Rabbinowitz in St. Petersburg, and from that time on was a professional writer in Hebrew and Yiddish, in which latter language he had begun to write as early as 1878. In 1905 he became an editor of the newly created daily *Hazeman* at Vilna, where he remained until it ceased to be published in 1914. During this period Zitron began to write the history of Hebrew and Yiddish journalism, which appeared in instalments in *Haolam* and *Hashiloah* from 1911. These writings are especially valuable for their clear depiction of those who contributed to Jewish journalism.

During that time he wrote his *Toledoth Hibbath Tziyyon*, of which only the first part, dealing with the Chovevei Zion movement up to 1890, was published (Odessa, 1914). He was a fruitful, rapid skilful writer, with a flexible and pungent style and a gift for narrative and characterization. He wrote many books in various fields, of which the most important are: *Mapu Vesmolenskin Vesippurehem* (Cracow, 1888); *Yotzere Hasafruth Haibrith Hahadashah* (Vilna, 1922); *Lexikon Tziyyoni* (Warsaw, 1924); *Anashim Vesoferim*, reminiscences (Warsaw, 1923); a life of Theodor Herzl (Warsaw, 1921 and 1923); *Drei Literarishe Doiros* (Yiddish; Vilna, 1920-24); *Meshumadim* (Vilna, 1921; Warsaw, 1923); *Shetadlanim* (Warsaw, 1926); *Beruhmte Yiddishe Froien* (Yiddish; Warsaw, 1930). He translated the history of Heinrich Graetz and other works into Hebrew, and writings of Israel Zangwill and Martin Buber into Russian. A. R. MALACHI.

Lit.: *Sefer Zikkaron Lesofere Yisrael* (1889) 97; Ribalow, M., "S. L. Zitron, Dichter un Shaffer fun Neihebreish," *Literarishe Bletter* (1927) 181-82; Waxman, Meyer, *A History of Jewish Literature*, vol. 4 (1941) 420-21, 565, 798-99, 845-49.

ZIVIER, EZECHIEL, historian and archivist, b. Wielun, Germany, 1868; d. Breslau, Germany, 1925. His knowledge of Slavic languages enabled him to become the archivist of Prince Pless. He later undertook to complete the history of Poland begun by Richard Roepell in 1840 and continued by Jacob Caro as part of the encyclopedia, *Geschichte der europäischen Staaten*. In vol. 6 he deals with the period from 1507 to 1702, including many references to the Jews. In 1902 he founded the periodical *Oberschlesien*, which he edited for five years. It was due to Zivier's efforts that the German Jewish archives were founded in 1906, for he constantly called attention to the wealth of material to be found in the records of the Jewish communities, as well as in the public records. His other writings deal with such subjects as mountain law and the Jews of Eastern Europe.

Lit.: *C.-V. Zeitung*, Sept. 4, 1925.

ZIZ, *see* ANIMALS, FABULOUS.

ZLOCISTI, THEODOR, physician and writer, b. Borchestowa, near Danzig, 1874. He practised medicine in Berlin from 1900 to 1921, except from 1914 to 1918, when he was chief physician of the Red Cross Mission in Turkey and director of the Red Cross Hospital in Istanbul. In 1921 he emigrated to Palestine, settling in Tel-Aviv. He was a Zionist even before the appearance of Theodor Herzl, was a founder of the first association of Jewish students at the University of Berlin (1895), and was a delegate to the First Zionist Congress.

Zlocisti wrote a biography of Moses Hess (Berlin, 1905), and edited the latter's *Jüdische Schriften* (Berlin, 1905) and *Sozialistische Aufsätze* (Berlin, 1920). Zlocisti is the author of two volumes of poetry: *Vom Heimweg* (Brünn, 1903); *Am Tor des Abends* (Berlin, 1910).

ZLOTNIK, JUDAH LEIB, rabbi and writer, b. Plock, Poland, 1887. He studied Talmud in the Yeshiva of Volozhin, and at the same time pursued secular studies. In 1910 he was ordained rabbi, and at the age of twenty-four he was appointed rabbi in the city of Gombin, Poland. He was founder and organizer of the Mizrachi (Orthodox Zionists) organization in Poland, and its first general secretary. He continued to study modern languages and was well versed in Polish, German and English literature.

Zlotnik's first literary work was a biography in Hebrew of Jesus of Nazareth which was praised by Joseph Klausner; but it was not printed in book form due to the censorship in Czarist Russia. His chief literary contribution, however, was in the field of Jewish folklore and ethnography, on which subjects he wrote several books. Best known is his *Beliefs and Superstitions* (Yiddish; Warsaw, 1918) which he wrote under the pen-name of Judah Elzet. Also well known is his *Koheleth—the Man and the Book* (1929). In 1920 Zlotnik went to the United States and, after a short visit, he left for Canada, where he was elected president of the Mizrachi.

He lived in Montreal until 1936, holding several important positions in the Zionist movement, including that of executive director of the Jewish National Fund. During this time he published numerous articles on Jewish subjects in English, in which language he also wrote a series of poems which were praised by literary critics in Canada. From there he was called by the Jewish community in South Africa to head the Jewish Educational Department of that country, a position which he held from 1936 on with great distinction. There he wrote: *Bereshith Bamelitzah Haibrith* (1938) and *Maamarim Misefer Midrash Hamelitzah Haibrith* (1939), dealing with Hebrew phraseology; *Mahbaroth Mine Kedem* (1943), giving fragments of Maimonides' *Hilchoth Berachoth* from a newly discovered manuscript.

ZODIAC, *see* CONSTELLATIONS.

ZOFFANY, JOHN, portrait painter of the 18th cent., who lived from about 1723 to 1810, and was active chiefly in England. Light was not shed upon the question of his Jewishness until about 1920 and thereafter, chiefly by G. C. Williamson's biography of Zoffany which was published in 1920. According to the current view of investigators, it must be assumed that his father, under the name of Zaufely (which the son later changed), lived first in Prague as a high-class cabinetmaker and decorator, and from that city settled in Germany, where he adopted architecture as his career. He then became court architect of the prince of Thurn and Taxis in Regensburg; it was at this time, perhaps, that he became converted to Christianity. John Zoffany, his son, appears to have been born at Frankfort, Germany, previously, but spent his childhood in Regensburg. He soon left that city, while still a youth, and came by way of Vienna to Italy—restlessness and a spirit of adventure were in his blood, and did not leave him until he was on the threshold of old age.

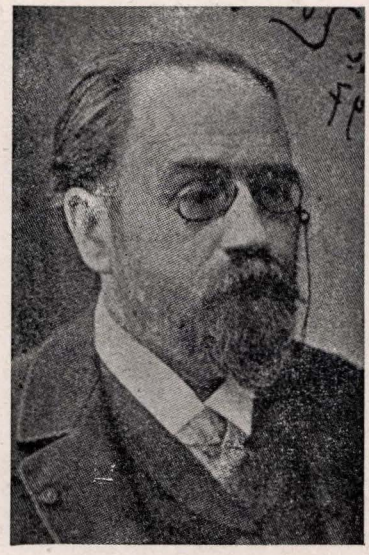
John Zoffany

All doubts as to Zoffany's Jewish origin are ended by the self-portraits which he left, especially the picture of 1762 and the group picture of 1771; in both the former and the latter, which shows him together with Captain James Cook, famous for his sea voyages, and with the natural scientist Sir Joseph Banks and two other persons, Zoffany's features are so unmistakably Jewish that no other origin is possible for him. The conversation represented as taking place in the latter picture is concerned, as the legend states, with a new expedition of Cook, who is presenting his plans. Zoffany wished to take part in it, but his purpose was not accomplished.

Zoffany remained in Italy until his father's death, and then returned to Germany, being active for a time in Coblenz on Rhine. Finally (about 1761) he tried his luck in England, where he at last gained recognition and popularity. In the long run, however, Zoffany was not able to maintain his eminent position; from 1773 to 1779 he was again in Italy, and in 1783 he undertook a journey to India from which he did not return until 1789. Thereafter he settled in London permanently.

Here Zoffany attained to a position as portraitist directly after the famous English masters of this branch, such as Reynolds, Gainsborough and Hoppner; by modern critics and connoisseurs he is considered one of the leading artists of the great English school of portrait painters. Among the persons whose portraits he painted are the most outstanding actors of the then flourishing London stage; he was on friendly terms especially with Garrick, the talented star of that period. His specialty was group pictures, of which mention has been made previously. He was unsurpassed in the difficult art of portraying on the corner of a canvas a number of persons in pictorial arrangement and yet without the slightest appearance of compulsion. What distinguishes his painting and his pictures is the free naturalness of his conception and portrayal.

Zoffany evidently was baptized at an early age, spent some time at Rome in the monastery of the Buon' Fratelli, both his wives were Christians, he painted pictures of saints for several churches, the Austrian Empress Maria Theresa granted him the title of baron, and he was buried in a Christian cemetery in London. Yet when, after his stormy youth, he came to London, he sought living quarters in this foreign world in a Jewish inn. He transmitted his typically Jewish countenance to posterity with manifest joy, indeed with pride in the characteristic formation and the interesting expression of his head. MAX OSBORN.



Lit.: Williamson, G. C., and Manners, Lady Victoria, *John Zoffany* (1920); John, C. H. S., *Bartolozzi, Zoffany and Kauffmann* (1924); Adler, Elkan Nathan, *London* (1930; contains, however, misleading data as to the reasons for Zoffany's journey to Italy as a youth); Landsberger, Franz, "Jewish Artists before the Period of Emancipation," *Hebrew Union College Annual,* vol. 16 (1941) 383-86.

ZOFITH, *see* COLONIES, AGRICULTURAL.

ZOHAR ("brightness"), the principal work of the Cabala. It appeared for the first time in Spain at the end of the 13th cent., having been issued by Moses ben Shemtob de Leon (b. province of Leon, Spain, 1250; d. Arevalo Spain, 1305) as the *Midrash of Rabbi Simeon ben Yohai,* by which it is known in the earlier sources. Simeon ben Yohai, a Tanna of the 2nd cent., was famed for his mystical tendencies, so it was natural to ascribe the work to him, or at least to declare that it was the development of his teachings. The ascription led on the one hand to numerous legends relating how this miraculous work had come to Spain, and on the other hand to hints as to the personality of Moses de Leon, who may have given literary form to a book that had been secretly transmitted orally and who may have put it into writing.

The Zohar, as now constituted, contains the following parts:

1. (no title), discursive commentaries on various passages from the Torah. This is the largest section of the work.
2. Sifra Ditzeniutha (Book of Concealment), a cryptic commentary on *Gen.* 1 to 6.
3. Idra Rabba (Greater Assembly). A systematic development of the preceding part on the basis of an assembly of Simeon ben Yohai and his followers.
4. Idra Zuta (Lesser Assembly). A dramatic depiction of the final speech and death of Simeon ben Yohai.
5. Idra Di Bemashkana (Assembly on the Occasion of a Lecture), an assembly devoted to various questions, especially prayer.
6. Hechaloth (Palaces), a description of the seven heavenly palaces.
7. Raza De Razin (Secret of Secrets), chapters on physiognomy, cheiromancy and the like.
8. Saba (The Old Man), a romantic story based on the appearance of a mysterious old man and his discourse.
9. Yenuka (The Child). A similar story about an infant prodigy.
10. Rab Methibta (Head of the Academy), description of a visionary journey through Paradise.
11. Sithre Torah (Secrets of the Torah), allegorical and mystical interpretations of passages from the Torah.
12. Mathnithin (Mishnahs), a Cabalistic imitation of the Mishnah and Tosefta.
13. Zohar to *Song of Songs,* a commentary.
14. Kab Hamiddah (Standard of Measure), a profound and searching interpretation of the meaning of the Shema (*Deut.* 6:4).
15. Sithre Othioth (Secrets of the Letters), on the letters of the Divine Name and the origins of creation.
16. (no title), a commentary on *Ezek.* 1 and 2 (the Merkabah).
17. Midrash Haneelam (Hidden Midrash), a Midrash on the Torah, containing explanations given by Simeon ben Yohai and other Talmudic authorities.
18. Midrash Haneelam on *Ruth,* of similar nature.
19. Raya Mehemna (Faithful Shepherd), Cabalistic interpretation of the 613 precepts in the Torah.
20. Tikkune Zohar (Supplements to the Zohar), a new commentary on the first part of the Torah, generally reprinted separately.
21. Zohar Hadash (New Zohar), new commentaries on the same fields.

Émile Zola

The question of the authorship of the Zohar was the subject of a dispute which is still not completely settled, with extreme views on the subject being represented by orthodox Cabalists on the one hand and by free-thinking rationalists on the other. Among those who opposed the traditional great age of the Zohar by critical arguments were Elijah Delmedigo, Leon da Modena, and, in more recent times, Nachman Krochmal, Adolf Jellinek and Heinrich Graetz. Its defenders included Azariah dei Rossi and David Luria. Others, such as Adolf Franck, David H. Joel and Hillel Zeitlin, have held that the core of the work antedates the period of Moses de Leon or is very old, while the final redaction came from the group of Moses de Leon and his friends. They point out that certain portions, such as the two Idras and the Sifra Ditzeniutha, as well as certain of the teachings point to a great age, while other portions contain anachronisms and hence are evidently of later origin. Gershom G. Scholem originally subscribed to this view, but later came to the conclusion that Moses de Leon himself was the sole author of parts 1 to 18; he based his conclusion on philological studies, similarity of ideas, and comparison with the known works of Moses de Leon.

The language of the Zohar is an Aramaic similar to that of the rabbis; its style is that of a free discourse. Despite its lack of systematic form, its main portions, with the exception of certain insertions or passages that have become incomprehensible through corruption of the text, form a consistent whole with passages of highly poetic fervor. As a rule the mystical interpretation of the Pentateuch, which is nothing more than the means of approach to the theme of the discourse, is accompanied by the citing of analogous expressions from other parts of the Bible, followed by explanations.

The Zohar's teachings combine practically all the elements of the older Cabala: the doctrines of the Primordial Man (Adam Kadmon), of the Sefiroth, of Creation and of the Merkabah, descriptions of the heavenly palaces (Hechaloth), symbolic interpretations of prayers and ceremonies, and number and letter mysticism, especially in reference to the names of God. The doctrines which are new in the Zohar include the ideas of "currents" and revelations from the higher realms, a spiritual conception of the Sefiroth, mystical interpretations of the Bible story and many of its chief characters, the central and symbolical meaning of the Sabbath, the structure, fate and ascent of the human soul, the happy fate of the pious, the mystic exile of the Shekinah and its future deliverance—all interwoven with a number of narratives of legendary nature. There is also a mystical explanation of the anatomy and physiology of the human body.

Cabalistic groups raised the Zohar to the same rank of importance and holiness as that given to the Bible and the Talmud. Isaac Luria and Israel Baal Shemtob, creators of later mystic movements in Judaism, both owed their deepest thoughts to its writings. The reading of the Zohar was regarded as a religious duty by the Hasidim and by Oriental Jews, and some parts of the Zohar were used liturgically. On the other hand, wherever mystical tendencies weakened, the study of the Zohar also lessened. The Zohar had few commentaries, but later Cabalistic works used it as a basis.

The first printed edition of the Zohar was at Mantua and Cremona in 1556. In 1557 Knorr von Rosenroth translated parts of it into Latin; other parts were later translated into modern languages. Jean de Pauly made a complete translation into French. A Hebrew manuscript of the 16th cent. in the Bodleian library at Oxford revealed a Hebrew translation which was made at that time. The so-called translation of Judah Rosenberg is rather a Hebrew anthology based on passages from the Bible. An English translation was first made by Harry Sperling and M. Simon (5 vols., London, 1931-34); this covers only selected portions.

ZOLA, ÉMILE, non-Jewish French novelist, one of the greatest in the last half of the 19th cent., b. Paris, 1840; d. Paris, 1902. Zola was the recognized leader of the naturalistic school, and his influence in the literary realm became world-wide. Author of the famous set of twenty novels, *Les Rougon-Macquart,* of many well-known short stories, essays, plays, critical studies and polemical discussions with the anti-naturalists, he was always social-minded, inclined with sympathy toward the poor classes, and was inspired by sincere liberal and progressive ideas. His works were translated into almost all the civilized languages, including Yiddish and Hebrew.

Many Jewish characters figure in his novels, and—on the basis of his views about financiers and wealthy businessmen—the Jewish money lenders, millionaires and bankers in *Nana,* in *Son Excellence Eugene Rougon* and *L'argent* are portrayed as unscrupulous and greedy persons, like the Christians of the same category. But in the same *L'argent* the banker's brother, Sigismond Busch, is idealized as a thoroughly honest and faithful man and socialist who knows nothing about money and gives his life for social justice.

Zola was, all his life, an outspoken opponent of anti-Semitic ideas. He wrote articles in opposition to the anti-Jewish movement initiated by Edouard Drumont. But that which raised his stature to great moral heights, besides his world-wide reputation as a novelist of extraordinary talent, was his role in the Dreyfus Affair. In that period (from 1890 on) Zola had reached

the zenith of his fame. Like most of the other writers and artists of his time, he lived quietly in the ivory tower, dedicated solely to his literary work. But the injustice done to Captain Alfred Dreyfus of the French Army gave him no rest. With great courage he stepped into the street and threw himself into the fight for the annulment of the verdict against Dreyfus. His famous letter "J'Accuse" (I Indict), published on January 13, 1897, in Georges Clemenceau's paper *L'Aurore,* made such a profound impression that the struggle for and against Dreyfus brought France to the brink of civil war. Through his action Zola won a great number of intellectuals, political leaders and workers for the cause of the revision of the Dreyfus trial. In "J'Accuse" Zola said, among other things:

"If you hide the truth under the earth, it gathers there and assumes such explosive force that on the day it bursts it blows up everything round about." And at the end of the letter he said: "I have only one passion, the passion for light and justice in the name of humanity, which suffers and has the right to happiness."

Zola became the center of the fight in behalf of Dreyfus; threats were made against his life, and he was brought before the court. Convicted for defamation of the army and sentenced to one year of prison, he went to London at the advice of his friends and in order to continue thence the struggle for justice. During that time he fought in all his articles against anti-Semitism. Accused of having been bought by a secret syndicate established by Jews with the aim of urging the revision of the Dreyfus trial, he wrote an article, "Le syndicat" (*Figaro,* 1938), in which he again attacked the anti-Semitic campaign forcibly.

The triumph gained by Zola and his supporters in the Dreyfus Affair brought to power the French leftist parties, completely annihilated the anti-Semitic movement in France for a half-century, and strengthened the democratic forces in Europe. Zola was able freely to return to Paris, and in his novel *La vérité* (1902) he once more condemned anti-Semitism. It was Zola who, during the struggle, coined what became a standing saying in France: "La vérité est en marche, et rien ne l'arrêtera plus" (Truth is on the march, and nothing will ever stop it any more).

At Zola's funeral Anatole France, another great non-Jewish (his maternal grandmother was a Jewess) French novelist, who had also fought on behalf of Dreyfus' rehabilitation, said: "Zola has been an instant of the human conscience." SANIEL LABIN.

ZÖLD, MÁRTON (DE SIÓAGÁRD), Hungarian general, b. Szekszárd, Hungary, 1865. He studied at the military academy and at the school for staff officers in Budapest. During the first World War he distinguished himself on three fronts, fighting successively against the Serbs, Russians and Italians. He received the Order of the Iron Crown, the military merit cross, the Order of Leopold, and several German distinctions. Emperor Francis Joseph also bestowed Hungarian nobility on him. In 1919 he joined the Hungarian national army organized by Admiral Nicholas Horthy, and subsequently was promoted to the rank of a general in the Hungarian honvéd army. Prior to the second World War Zöld contributed portions of his reminiscences to the *Egyenlöség* and other periodicals of Jewish interest.

See illustration in vol. 9, p. 615.

ZOLLER (ZOLLI), ISRAELE, rabbi and philologist, b. Brody, Poland, 1881. He studied philology and rabbinics in Vienna, and in 1910 was elected rabbi in Trieste. At the end of the first World War (1918) he was appointed chief rabbi of Trieste, which in that year was annexed to Italy. He taught Hebrew and Semitic languages at the University of Padua, Italy, and published numerous studies on Jewish history and philology in learned periodicals.

Zoller contributed essays and studies on Jewish subjects to the *Jüdisches Lexikon* and to the *Enciclopedia Italiana.* Of his many studies of particular significance are *Ideogenesi e morfologia dell'antico Sinaitico* (Trieste, 1925); *Israele: Studi storico-religiosi* (Udine, Istituto di Edizioni Accademiche). From 1939 on he was chief rabbi of Rome, succeeding David Prato, who left Italy and settled in Tel-Aviv, Palestine.

ZOLLSCHAN, IGNAZ, physician, anthropologist and Zionist theoretician, b. Erlach, Lower Austria, 1877. He studied medicine at the University of Vienna and was for a time a ship doctor. Later he settled at Karlsbad, Bohemia, where he published several works on X-ray research pertaining to the abdominal organs. In 1910 Zollschan published *Das Rassenproblem unter besonderer Berücksichtigung der theoretischen Grundlagen der jüdischen Rassenfrage* (5th ed., Vienna, 1925), a widely read refutation of Houston Stewart Chamberlain's anti-Semitic race theory.

In 1919 his book *Revision des jüdischen Nationalismus* aroused much discussion; therein he attacked the emphasis on Jewish nationalism in the Diaspora and the demand for national minority rights. In 1920 a second revised edition, with a supplement, "Der Weg zum Maximalismus," was issued. In *Krise und Sezessionsgefahr im Zionismus und deren Ursachen* (1921) he discussed the crisis of contemporary Zionism. Through his writings Zollschan influenced a group of German Zionists (Binyan Haaretz) of which he was one of the founders. At the third World Jewish Congress in Geneva (August, 1934) he challenged the Nazis to submit their racial theories to the judgment of a tribunal of unbiased scientists.

In 1942 Zollschan, who was living in London, was elected a guest member of the Royal Anthropological Institute. The announcement cited Zollschan for "your work in science and anthropology, especially as regards your important contributions in the sphere of racial studies and combatting Nazi racial theories." That year he also published *Racialism Contra Civilisation* (London, 1942).

Lit.: Aufbau, Jan. 29, 1943, p. 16.

ZON, RAPHAEL, forester, b. Simbirsk, Russia, 1874. After his graduation from the Imperial University of Kazan (B.S., 1896) he emigrated to the United States (1897), where he studied forest engineering at Cornell University. Zon entered the Forest Service of the United States Department of Agriculture in 1901 and was still active there in 1943. From 1907 to 1922 he was chief of forest investigations, and in 1922 he became director of the Lake States Forest Experiment Station.

Zon was professor of forestry at the Universities of Minnesota and Wisconsin and editor-in-chief of the *Journal of Forestry.* Together with W. N. Sparhawk he wrote *Forest Resources of the World* (2 vols., 1923).

ZONDEK, BERNARD, gynecologist, b. Wronke, Germany, 1891. He received his medical education at the University of Berlin (1911-1919); his studies were interrupted by the first World War, during which he served in German military hospitals. He was assistant in the obstetrical and gynecological department of the University of Berlin from 1920 to 1923, and in 1926 became an instructor in obstetrics and gynecology. His earliest investigative studies were supported by a

Bernard Zondek

grant from the Rockefeller Foundation. He received a Jacket-Cossman prize in gynecology, a reward that is distributed but once in ten years.

In 1927 Zondek demonstrated the interaction of the anterior pituitary gland and the ovary, pointing out that the pituitary was the "motor" for the ovaries. Following up this discovery he, together with Aschheim, developed the first satisfactory and reliable pregnancy test, which became the basis for later tests. In 1929 he was appointed head of the obstetrical and gynecological service of the municipal hospital, Berlin-Spandau, and continued as its chief until 1933. During these years he published a number of papers which confirmed and elaborated the pituitary-gonadotropic actions and in 1932 the first edition of a standard work, *Hormone des Ovariums und des Hypophysenvorderlappens* (2nd ed., 1935).

Forced to leave Germany after the rise of the Nazis, Zondek continued his work at the Biochemical Institute in Stockholm. He visited England and the United States, where he was elected an honorary fellow of the American Gynecological Society. In 1934 he settled in Palestine and became professor of obstetrics and gynecology at the Hebrew University and chief gynecologist and obstetrician at the Rothschild Hadassah hospital of Jerusalem. He was still serving in both capacities in 1943.

Another important investigation of Zondek dealt with the isolation of intermedine, the secretory product of the middle lobe of the hypophysis which controls the distribution of pigmentation, particularly in cold-blooded animals, but likewise has importance in relieving the polyuria of diabetes insipidus. His investigations at the Hebrew University were assembled and published as *Clinical and Experimental Investigations on the Genital Functions and Their Hormonal Regulations* (1941).

Zondek, a rare combination of active clinician and laboratory investigator, made practical application of his hormonal studies in the treatment of amenorrhea, dysmenorrhea and sterility as well as of other functional disturbances of the human female. In July, 1941, a special issue of the *Journal of the Palestine Jewish Medical Association,* written by his colleagues and pupils, was published in honor of his fiftieth birthday.

HERMANN ZONDEK (b. Wronke, 1887), brother of Bernard Zondek, was also a physician. From 1918 to 1933 he was on the faculty of the University of Berlin and from 1926 to 1933 director of the city hospital. His chief interest was research on the internal secretions of the human body, on which he wrote an important textbook. In 1943 he was serving at Bikkur Holim hospital in Jerusalem.

SAMUEL GEORG ZONDEK (b. Wronke, 1894), another brother, was professor of internal medicine at the University of Berlin and wrote *Die Elektrolyte* (1927). In 1943 he was serving at the Municipal Hospital in Tel-Aviv.

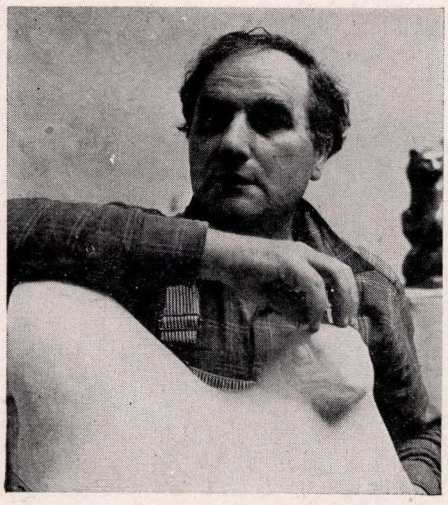
ROBERT T. FRANK.

ZONDEK, MAX, surgeon and urologist, b. Wronke, Posen, 1868; d. Berlin, 1933. He was the oldest of the five Jewish medical professors by the name of Zondek, in Berlin, and he was the uncle of Bernard, Hermann and Samuel Georg Zondek. Beginning as assistant in surgery at the University Clinics in Strasbourg and Breslau, he later became a pupil of James Israel, eminent surgeon, in Berlin. He then worked on amputations, with the physiologist R. du Bois-Reymond, and demonstrated his results in a series of experiments relating to inner bone tissues and fracture healing.

Zondek also worked on important problems in the field of surgery of urine organs. He established fundamentals on kidney surgery, and conducted research on the origin of kidney ailments and inflammation of the ureter. He amplified and improved upon the diagnosis of kidney trouble, and sharply outlined the method of kidney surgery.

In the field of surgery Zondek wrote numerous articles, and his book, *Surgery on Kidney Ailments and Inflammations of the Ureter,* won acclaim and wide circulation. He took a prominent part in the promotion of public health, and was chairman of OSE (Society for Health Protection of the Jews) in Germany, and a contributor to the *Ose-Rundschau.*

ZORACH, WILLIAM, sculptor, b. Eurburg, Lithuania, 1887. Four years later his father emigrated to the United States and became an American citizen. The Zorachs lived in Ohio. Theirs was a closeknit, fine Orthodox family life that left a permanent impress on William's character and affected the independence and stability of his art. He had no extended formal education. His approach to his career was in the commercial field of lithographic drawings. He studied for a while at the Cleveland School of Art, and later at the National Academy of Design in New York.



Going at the age of twenty-three to Paris for a year, he exhibited oil paintings at the Salon d'Automne (1911). His early work was influenced by Cubism, an influence not discernible in his splendid watercolors of later years, four of which were included in the exhibition at Paris (1938) of "Three Centuries of American Art." It is, however, as a sculptor, rather than as a painter, that Zorach has acquired his great reputation. Happening in 1918 to carve a boat for a child, he became so interested in sculpture that he subsequently devoted himself mainly to this form of art. Whether in wood, stone or marble, Zorach has carved directly, as he considers this a more creative method than prior modelling. Fertile in ideas, he sketches many subjects and then concentrates on those that appear to him most vital. Not influenced by any one man, but a serious student of the art of all ages, he makes evident his knowledge of Greek, Egyptian and Oriental sculpture, and of the primitive African. There is a profound human quality and often the element of timelessness in Zorach's art. Add to these the fine organization of his sculptural works, their rhythm, their

simplicity and their decorativeness, and there can be no question of the permanence of Zorach's reputation as one of the outstanding sculptors of his time.

Represented in various museums, the winner of medals for both sculpture and watercolors, a teacher at the Art Students League, a writer and lecturer, a supervisor of art instruction in numerous schools, Zorach—encouraged by his wife, Marguerite (an artist in her own right)—pursued his career with high and serious fidelity. He considered the following as his most important works: *Mother and Child, Youth, Affection, Spirit of the Dance, Child on Pony.* His statue of Benjamin Franklin, at Washington, is another of his notable achievements.

For a fuller list of his work and analysis of his art, consult the richly illustrated volume by Paul S. Wingert, entitled *The Sculpture of William Zorach.* In the April and May, 1941, issues of *The Magazine of Art* there is an autobiographical paper. Warren Wheelock discusses the art, philosophy and working habits of Zorach in the April, 1939, issue of *Art Instruction.* GEORGE S. HELLMAN.

Lit.: Current Biography, Feb., 1943, pp. 56-58.

William Zorach

ZSOLT, BÉLA, poet, novelist and journalist, b. Komárom, Hungary, 1895. He was educated at the University of Budapest and began his journalistic career at Nagyvárad.

From 1921 on he lived at Budapest, contributing to such leading liberal dailies as *Világ, Magyar Hirlap* and *Ujság.* The latter newspaper was originally the organ of Count István Tisza and his Liberal Labor Party, but after the first World War gradually came to be identified as the daily organ of the Jewish middle class.

Like the political figure Vilmos Vázsonyi before him (in city council and parliament), Zsolt, in the columns of *Ujság,* was the advocate of the petty bourgeois; and, since the petty bourgeois was at a special disadvantage if he happened to be a Jew, it was openly and expressly the Jewish petty bourgeois whom Zsolt defended in his articles. From 1938 on, when German Nazi influence became strong in Hungary, Zsolt rose from the defense of the underprivileged Jew to that of civil liberties and the democratic ideal. He braved threats to his life by currently attacking those actively engaged in the Nazification of Hungary.

Early in his career Zsolt had attracted attention by his verse which placed him among the best contemporary poets of his country. But he had greater influence as a novelist. In his novels as in his newspaper column, Zsolt was concerned with the Jewish petty bourgeois, but here his attitude was not that of the advocate, but of the dispassionate social psychologist.

In Zsolt's novels the Hungarian-Jewish petty bourgeois is a sorry figure, the product of societies past and present which have narrowly set for him the limits of his life, of his horizon. He is lacking not only in the physical possibility of going beyond his confines, but even in the courage to dream and to reach out for his dreams. The mood of several of these novels, like that of *Gerson és neje* (Mr. and Mrs. Gerson; 1931), depicting a mixed marriage, is tragicomical. The sarcasm of the author in exposing the pettiness and vulgarity, the helplessness of these human beings to attain what they want and to want anything worthwhile, masks his shame and anguish over this lost generation. In these Budapest Jews, for all their *couleur locale,* Zsolt at the same time portrayed the hopelessness and degradation of Europe. In *A királynő családja* (The Queen's Family; 1933) he still pointed to a way out for young people, pure and strong, from the quagmire of their environment. *Kinos ügy* (Distressing Affair; 1935) and *Arthur* end on a note of despair. Arthur, the hero of the latter novel, is never born. The novel tells of the vain hopes the father entertains about this son to be born to him. It is symbolical of the failure of Europe.

Early in his career Zsolt embraced Christianity, but later he returned to Judaism. As the most aggressive Jewish publicist, he contributed articles to *Egyenlőség,* the political organ of Hungarian Jewry. When the large Jewish masses of Hungary were gravely affected by anti-Jewish laws (1938-) which, however, spared Jewish-owned capital, Zsolt demanded that the leadership of the Jewish Community of Pest pass from the hands of big businessmen to that of the intellectuals.

Zsolt's novels not mentioned above include: *Házassággal végződik* (1926; English version, *It Ends in Marriage,* trans. by Louis Rittenberg, 1931); *Bellegarde* (1932; dramatic version *A Párizsi vonat* [Paris Train], 1934); *A Wesselényi-utcai összeesküvés* (The Conspiracy); *A Dunaparti nő* (Woman of the Danube Shores; 1936). He was also the author of such stage plays as *Oktogon* (1933) and *Tizenötezer pengő jutalom* (Fifteen Thousand Pengő Reward; 1934).

His poems were published in the volumes: *Zsolt Béla verseskönyve* (1915); *Hiába minden* (All in Vain; 1921); *Igaz könyv* (True Book; 1932); *Vadvizek* (1925). He was the author of a volume of short stories, *Harmincéves férfiak*

Béla Zsolt. Sketched by Jenö Horváth

(Men of Thirty; 1924). His works were translated into Italian, German, Dutch and other languages.

ANNA BETTELHEIM.

ZUCCA, MANA, *see* MANA-ZUCCA.

ZUCKER, AARON, *see* LUTZKY, AARON.

ZUCKER, PAUL, art historian and architect, b. Berlin, 1890. He designed numerous buildings in Germany, including the Prussian State Bank and the administration building of the Chamber of Physicians at Berlin, and gave lectures on the history of art at the Lessing Hochschule (1916-35) and at the Staatliche Akademie der Künste (1927-35). In 1937 he migrated to the United States, settling in New York city, where he became affiliated with the New School for Social Research (1937-), the Cooper Union Institute (1938-) and the Dramatic Workshop (1939-).

Zucker's writings include: *Die Brücke, Typologie und Geschichte ihrer künstlerischen Gestaltung* (Berlin, 1921); *Die Theaterdekoration des Barock* (1927); *Die Theaterdekoration des Klassizismus* (1927); *Deutsche Hansastädte* (Leipzig, 1928); *Deutsche Barockstädte* (1928); *Baukunst der Renaissance in Italien* (vol. 8 of *Das Handbuch der Kunstwissenschaft;* Potsdam, 1927); *Die Entwicklung des Stadtbildes* (Munich, 1929); *American Bridges and Dams* (New York, 1941). He contributed all the articles on architects in the letters A to M to Ulrich Thieme's and Felix Becker's *Allgemeines Lexikon der bildenden Künstler* (1907-34).

ZUCKERKANDL, EMIL, anatomist, b. Raab, Hungary, 1849; d. Vienna, 1910. He studied at the University of Vienna under Hyrtl, Rokitansky, Skoda and Brücke, and received his M.D. degree in 1874. After serving as an instructor at the Universities of Vienna and Utrecht (Holland), Zuckerkandl was appointed professor at the University of Graz, Austria (1882), and later at the University of Vienna (1888). He was regarded as one of the preeminent anatomists of his time and was an excellent pedagogue. Through his book, *Normale und pathologische Anatomie der Nasenhöhle und ihrer pneumatischen Anhänge* (2 vols., 1882-92), he became the pioneer of modern rhynology.

Zuckerkandl's other writings include *Zur Morphologie des Gesichtsschädels* (1877) and *Über eine bisher noch nicht beschriebene Drüse der regio Suprahyoidea* (1879). A bust of him, which had been placed in the University of Vienna in his honor, was removed by the Nazis in 1938.

ZUCKERMANDEL, MOSES SAMUEL, Talmudist, rabbi and author, b. Ungarisch-Brod, Moravia, 1836; d. Breslau, Germany, 1917. From 1856 to 1864 he studied at the Jewish Theological Seminary in Breslau, where he devoted himself to the study of the Talmud; in 1863 he received the Ph.D. degree from the University of Breslau. He officiated as rabbi of the Prussian community of Gnesen from 1864 to 1869, Märkisch-Friedland until 1876, Pasewalk until 1880, Trèves from 1881 to 1889, and Pleschen, Posen, until 1890; from 1898 until his death he occupied an administrative post at the Mora Leipsiger Foundation in Breslau.

Zuckermandel's outstanding work is the *Tossefta Ausgabe unter Zugrundelegung der Erfurter und Wiener Handschriften* (Pasewalk and Trèves, 1881-82), with a supplement entitled *Enthaltend Übersicht, Register und Glossen zur Tossefta* (Trèves, 1882). His other works include: *Tossefta, Mischna und Boraitha in ihrem Verhältnis zu einander* (2 vols., Frankfort, 1908-9); *Predigten* (Frankfort, 1911), a work on holiday sermons; and a number of articles dealing with Halachah, philology, exegesis, archeology, pedagogy, and homiletics.

Lit.: Frankl-Grun, *Geschichte der Juden in Ungarisch Brod* (1905) 56-57; *Hamburger Israelitisches Familienblatt,* 1906, No. 18; Brann, M., *Geschichte des Jüdisch-Theologischen Seminars in Breslau* (1904) 204; Zuckermandel, M. S., *Gesammelte Aufsätze,* vol. 2 (1912) 197-200.

ZUCKERMANN, HUGO, poet, b. Eger, Bohemia, 1881; d. Eger, 1914. As a college student, and later as an attorney, he was an ardent follower of Zionism. His poems often dealt with Jewish and Zionist topics. Zuckermann became known chiefly through his *Österreichisches Reiterlied,* published at the beginning of the first World War, in which the poet participated as a soldier in the Austrian-Hungarian army.

This song, which soon won great popularity and was set to music, was regarded as one of the finest war poems in German. Zuckermann died from the wounds received in battle. His collected poems and his translation of three plays by Isaac Loeb Peretz were published posthumously.

Lit.: Friedman, Arnold, *Hugo Zuckermann, ein Gedenkblatt* (1915).

ZUCKMAYER, CARL, German writer, b. Nackenhaim, near Mayence, Germany, 1898. He was an officer in the German Army during the first World War. He began his writing career in 1920 with the drama *Kreuzweg.* Zuckmayer became famous overnight with the première of his comedy *Der fröhliche Weinberg* in 1925. This was followed by a number of other plays, such as *Schinderhannes* (1927); *Katharina Knie* (1928); *Der Hauptmann von Köpenick* (1931); a satire of Germany under the Kaiser and a tremendous success); and *Der Schelm von Bergen* (1934). *Kakadu-Kakada,* a comedy for children, appeared in 1930.

Zuckmayer wrote also poems, collected in *Der Baum* (1926), several novelettes, and a novel, *Salware oder Magdalena von Bozen* (Vienna, 1936; English trans., *The Moons Ride Over,* New York, 1938). He adapted Maxwell Anderson's and Laurence Stallings' *What Price Glory?* and Ernest Hemingway's *Farewell to Arms* to the German stage.

An outstanding liberal, Zuckmayer left Berlin after the Nazis' rise to power and went to his estate at Hennsdorf, Austria. He fled to Switzerland just before the annexation of Austria in 1938. In the same year he came to the United States, settling on a farm in Vermont. He and Fritz Kortner wrote a play, *The Last Drop,* which was performed in New York city in 1941. He published the story of his flight in a sort of autobiography, *Second Wind* (New York, 1941). Zuckmayer embraced Catholicism.

ZUDECCHE (ZUECCA, GIUDECCA), *see* VENICE.

ZUGOTH ("pairs"), name given to five generations of Jewish religious leaders just before the Tannaitic period; these carried on the line of tradition from the Soferim to the Tannaim. According to the Mishnah (*Hag.* 2:2), each was composed of a Nasi (patriarch) and an Ab Beth Din (vice-president). According to some scholars, the leaders, like the Roman consuls, were chosen to represent patrician and plebeian groups, respectively, thus preserving a balance of authority among the teachers. The five pairs were:

1. Jose ben Joezer of Zeredah and Jose ben Johanan of Jerusalem.
2. Joshua ben Perahiah and Nittai of Arbela.
3. Judah ben Tabbai and Simeon ben Shetah.
4. Shemaiah and Abtalion.
5. Hillel and Shammai.

Lit.: Frankel, Z., *Hodegetica in Mishnam,* 29 et seq.; Finkelstein, L., *Akiba* (1936) 294-304.

Zukertort (left) and Steinitz in a chess match

ZUGSMITH, LEANE, writer, b. Louisville, Ky., 1903. She studied at Goucher College, the University of Pennsylvania and Columbia University. First associated with the publishing world as publicity director for Horace Liveright, she won attention in 1929 with the publication of her initial novel, *All Victories Are Alike.* This was followed by *Goodbye and Tomorrow* (1931); *Never Enough* (1932); *The Reckoning* (1934); *A Time to Remember* (1936); *The Summer Soldier* (1937); and *Home Is Where You Hang Your Childhood,* a volume of short stories (1937). From almost the very beginning of her career Leane Zugsmith represented that group of writers who considered the immediate political and economic strife of the period the motivating influence of contemporary life. Labor struggles, strikes, and the relation of the once secluded intellectual to these actualities offered the sources for her characters and their environment.

In 1942 she was the co-author, with her husband, Carl Randau, of *The Setting Sun of Japan,* a record of a trip through that part of the world which Japan considered its sphere—a trip made just before Japan attacked in all directions of that sphere in December, 1941. She was a contributor also to the leading periodicals in the United States, and was affiliated with the New York daily newspaper *PM.*

Lit.: Smith, Bernard, *The Democratic Tradition* (1941).

ZUKERMAN, T(OBIAS) DAVID, financial analyst, b. Myskievka, Russia, 1891. He was brought to the United States in 1896 and completed his education at Columbia University (A.B., 1913). He was with the Institute of Public Service, New York city (1916), staff member of the New York Bureau of Municipal Research (1918-20), budget director of the Federation for the Support of Jewish Philanthropic Societies (1920-23) and budget consultant of the Newark, N. J., Jewish Federation (1924). From 1924 to 1933 he was director of the Political Research Bureau in New York city, at the same time serving the Republican County Committee and serving as research assistant and publicity agent for Congresswoman Ruth Pratt. Subsequently he aided in research in Joseph V. McKee's mayoralty campaign (1933) and Joseph D. McGoldrick's campaign for the controllership (1934), and was a member of the governor's committee on unemployment (1935) and of the regents' inquiry into the character and cost of public education (1937).

From 1920 to 1929 Zukerman was a lecturer on the administration of public debts and sinking funds at the Training School for Public Service of the Institute for Public Administration. He wrote a large number of articles dealing with taxation and public finances.

ZUKERMAN, WILLIAM, journalist, b. Brest-Litovsk, Russia, 1885. He came to the United States at the age of seventeen. For a time he lived in Chicago, where he worked in factories, studied at the university, and finally became Chicago representative of the *Forward.* After the end of the first World War he was sent to London, where he established the European bureau of the *Morning Journal.* Until the beginning of the second World War he remained director of the bureau, traveling extensively throughout Europe on tours of investigation of Jewish affairs. Subsequently he transferred his home and major literary activities to New York, maintaining, however, even in 1943, his European contacts and journalistic outlets.

Although his first journalistic work was carried on in Yiddish, Zukerman subsequently wrote correspondence and special articles for various newspapers and periodicals in English. In addition to his journalistic activities, he also turned out belletristic studies, in which the search for a clarification of old disagreements between the faiths and among classes was apparent. His book, *The Jew in Revolt* (1937), was a survey of the situation of the Jew in the world of the time.

Zukerman's approach is that of a Jewish Socialist and internationalist, who considers the problems of the Jews as an integral part of the general social problems of mankind, and who believes that they cannot be solved by any nationalistic and segregative schemes. He is not opposed to the Jewish settlement of Palestine, but does not hold it to be an all-inclusive panacea.

Lit.: Reisen, Z., *Lexikon fun der Yiddisher Literatur, Presse un Filologie,* vol. 3 (1929) cols. 281-82.

ZUKERTORT, JOHANNES HERMANN, chessmaster, b. Lublin, Poland, 1842; d. London, 1888. He was the son of a Jew who had been baptized. He studied medicine and served as army physician in the Prussian wars of 1866 and 1870-71. He began to play chess when he was nineteen and by 1871 he was able to defeat Anderssen, who was then in the top rank of chess players. In 1872 he went to England to participate in a tourney and was so gratified with his reception there that he made that country his home for the rest of his life. He was especially famous as a blindfold-player. His record in various tournaments and matches was as follows:

1872. London, third prize.
1878. Paris, first prize.
1880. Won a match from Rosenthal.
1881. Berlin, second prize.
1882. Vienna, fifth prize.
1883. London, first prize.
1886. Nottingham, fourth prize.
1888. Match with Steinitz, in which he won the first four out of five games, but lost most of the remainder because of poor health.

He wrote numerous articles on chess and was editor of several chess publications, including *The Chess Monthly,* which he and L. Hoffer founded in 1879.

Lit.: *The Chess Monthly,* July, 1888.

ZUKOR, ADOLPH, motion picture producer, b. Ricse, Hungary, 1873. He came to the United States in 1888, settling first in New York, where he worked mostly as a furrier. In 1891 he went to Chicago, where he subsequently entered business for himself.

Returning to New York city early in the 20th cent., Zukor became interested in the newly-discovered methods of mechanical entertainment, particularly as exemplified by the Penny Arcades, in which moving picture machines, phonographs and other amusement devices were made avail-

Adolph Zukor

able through penny-slot machines. So successful were the Penny Arcades Zukor established in New York that, in partnership with Marcus Loew, a neighbor of his, he undertook the introduction of the idea to other cities. In 1905 still another device, known as Hales Tours, won his attention, and in 1905 he and William A. Brady formed a partnership for its development. Through this medium a travel tour was imitated by showing scenic pictures in a jolting imitation railroad carriage.

The motion picture itself, freed of its various infantile impedimenta, was emerging. Zukor, recognizing the trend, severed his connection with the secondary forms of entertainment and opened motion picture theatres to which the cost of admission was five cents. His foresight made him immediately impatient. The motion pictures available to exhibitors were limited to two reels; Zukor saw greater possibilities for the idea and sought to learn the art of producing. He also thought that motion pictures could draw from the legitimate stage the services of renowned actors.

Before his own producing companies were formed, however, Zukor proved the error of those who saw only a limited future for the motion picture by obtaining the American rights to *Queen Elizabeth,* with Sarah Bernhardt in the leading role. He paid $35,000 for the rights—a stupendous sum for the times. The four-reel picture had a long and successful presentation in the United States, and the argument that artistic, lengthy productions were undesirable was disproved. In 1912 Zukor finally entered the production field with Daniel Frohman, forming the Famous Players Film Company. His motto, "Famous Players in Famous Plays," had been chosen long before.

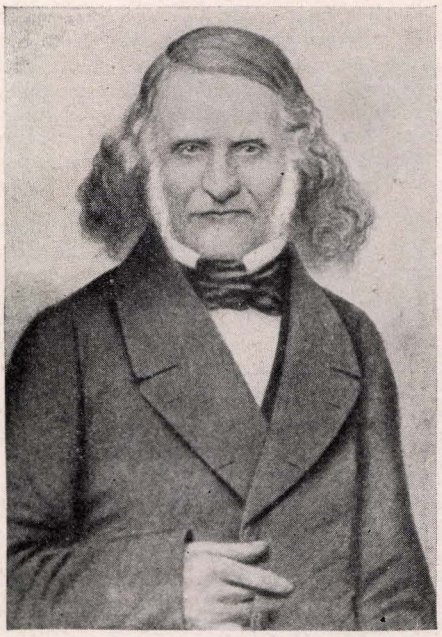
By obtaining the services of such well-known actors as James O'Neill, James K. Hackett and Minnie Maddern Fiske for the first productions of the company (*The Prisoner of Zenda, The Count of Monte Cristo* and *Tess of the D'Urbervilles*), Zukor gained another victory over the skeptics. Several members of the Barrymore family were among the earliest recruits from the legitimate stage, and before long the special talent of Mary Pickford was developed.

Combinations with other producing companies began to be effected. In 1916 the Famous Players-Lasky Corporation was formed, and in 1917, following other absorptions, the Paramount Pictures Corporation. Zukor was president of Paramount Pictures until 1935, when he became chairman of the board. Zukor was a generous contributor to Jewish and secular philanthropies. He remained sentimentally attached to the welfare of his native city in Hungary. He rebuilt both the church and the synagogue of Ricse, as well as the Reformed and Jewish schools, a hotel and the rabbi's residence. The main square of the city was named after him and in 1936 he was awarded the Hungarian Order of Merit. NATHAN RICARDO.

ZULATH, the third poetic insertion in the morning prayer for Sabbaths and festivals in the Orthodox Jewish ritual. In olden times the Zulath was the closing piece of the Yotzeroth. The name is derived from the fact that this Piyut follows immediately after the words *'en 'elohim zulathecha* ("there is no God but Thee") in the Emeth Veyatzib prayer. Such Zulath poems often make mention of contemporary sufferings and persecutions and express the hope for a better future.

Lit.: Elbogen, I., *Der jüdische Gottesdienst,* 210.

ZUNSER, ELIAKUM, Yiddish folk-poet, b. Vilna, Lithuania, 1845; d. New York city, 1913. He began to exercise the profession of Badhan in his youth, composing songs for weddings which he set to music of an Oriental character. He soon won a reputation for a more refined form of entertainment at such occasions and was able to command high fees. The themes of his poems were simple and intended to appeal to popular fancy, but show the influence of the new ideas of nationalism and of the desire to return to Palestine and till its soil. His first published book was *Shirim Hadashim* (Vilna, 1862).



In 1889 he migrated to the United States, where he toured the country singing and reciting his songs, many of which were newly written and dealt with American themes. In 1905 he settled in New York, where he set up a publishing house. He wrote more than 600 poems, which were published in sixty-five collections, some with music and some with translations into Hebrew.

Lit.: Reisen, Z., *Lexikon fun der Yiddisher Literatur, Presse un Filologie,* vol. 3 (1929), cols. 259-71; Zunser, E., *Selbstbiographie* (1905); Waxman, M., *A History of Jewish Literature,* vol. 4 (1941) 552.

ZUNTZ, NATHAN, physiological chemist, b. Bonn, Germany, 1847; d. Charlottenburg, Germany, 1920. He received his degree from the University of Bonn in 1870, became assistant professor of anatomy there in 1874, and later professor at the Berlin Academy of Agriculture. He did extensive research work in the field of metabolic assimilation, the relationship between the consumption of oxygen and the work performed, the digestive metabolic assimilation and the digestive organs of the herbivorous animals. Zuntz published a new method of gas analysis and devised an apparatus for the measurement of metabolic transformation of substance through respiration.

His most popular works, which were written in collaboration with Loewe, are: *Lehrbuch der Physiologie; Ernährung und Nahrungsmittel; Höhenklima und Bergwanderungen.* Zuntz became a Christian.

ZUNZ, LEOPOLD, founder of the Science of Judaism, b. Detmold, Germany, 1794; d. Berlin, 1886. Orphaned at an early age and delicate in health, he was enrolled in 1803 in the Samson School at Wolfenbüttel; its director, Samuel M. Ehrenberg (Zunz later wrote a biography of him), soon noticed his ability and declared that the boy at the age of eleven was "a distinguished mind, or rather a genius, in all branches of knowledge." In 1809 Zunz was the first Jew to attain the highest class of the classical high school at Wolfenbüttel, and in 1811 he received his diploma from

Leopold Zunz

that institution. In 1815, after serving as instructor for a time at the Samson School, he went to Berlin, where he spent most of the rest of his life; he attended the Universities of Berlin and Halle (Ph.D., 1821). His dissertation had been foreshadowed in his first writing, *Etwas zur rabbinischen Literatur* (1818), which may be regarded as the first outline of the tasks of the Science of Judaism. In it the entire richness and many-sided content of Jewish literature was set forth, arranged on a scientific basis according to historical periods; this opened up hitherto unknown perspectives for scientific investigation.

At the end of 1819 Zunz took part in the founding of the Verein für Cultur and Wissenschaft der Juden, and was the soul of the group; it was in behalf of it that in 1823 he became editor of the *Zeitschrift für die Wissenschaft des Judentums.* In this Zunz published his pioneer work, *Lebensbeschreibung Salomon ben Isaks, genannt Raschi,* a biography of the Talmudist and commentator Rashi (1040-1105). It was the first scholarly biography in Jewish literature; its secure mastery of the abundant material, and its penetrating insight into dark and untrodden realms, made a lasting impression, especially upon youthful students. Zunz' essays, *Über die in den hebräisch-jüdischen Schriften vorkommenden hispanischen Ortsnamen* and his *Grundlinien zu einer künftigen Statistik der Juden,* were of similar fundamental importance.

Although the efforts of the society ended in a lamentable failure, these little essays were sufficient to make Zunz assured, with an unshaken conviction, of the permanence of the Science of Judaism and to make it the purpose of his whole life. He never was able to secure an assured means of earning a livelihood; he was a man of fixed principles and of firm character and never hesitated to give up a favorable position, if the latter was not consistent with his ideas and purposes. As a student he had rejected the customary invitation to stay at the house of a rich man as an object of charity, and had preferred to earn his own living as a private tutor; later he was for a time preacher in the Berlin Temple founded by Israel Jacobson, and won general approval as a pulpit orator; yet he resigned, without any prospect of means whatsoever, when he found that the position was incompatible with his basic principles.

He left the *Haude- und Spenersche Zeitung* when the periodical adopted political views which were different from his own. From 1826 to 1830 he was director of the primary school of the Berlin Jewish community, and from 1840 to 1850 director of the Jewish teachers' seminary there; but he even gave up these positions because he could not make them fit in with his own intentions. Thus, except for short intervals, he lived a life of toil and deprivation, entirely devoted to the ideal of scholarly investigation.

In 1832 he made a rich contribution to the Science of Judaism in his *Die gottesdienstlichen Vorträge der Juden,* which has remained a classic to the present day. A Christian critic (Gefrörer) stated that it was the greatest contribution to knowledge made by a Jew since the time of Spinoza. This work was followed in 1845 by *Zur Geschichte und Literatur.* This book is a compilation of a number of essays on the history of literature, and on bibliography, on the ethics and culture of the Jews of the Middle Ages, as well as sciences auxiliary to history. It furnished a creative and illuminating treatment and presentation of chapters of history which had hitherto been entirely neglected. The book won Zunz such general recognition that he was considered the equal of such pioneer philologists as Böckh and Grimm.

He next undertook, in preparation for a history of the Jews, which was planned on a large scale, a careful study of Jewish martyrdom. This led him to the inexhaustible mine of Selihah poetry and eventually to Jewish liturgical poetry (Piyut) in general. He devoted decades to the work of assembling and organizing the materials from hundreds of manuscripts and rare printed books that had been recently discovered and made accessible.

The results of this unremitting labor appeared in three books: *Die synagogale Poesie des Mittelalters* (1855); *Der Ritus des synagogalen Gottesdienstes, geschichtlich entwickelt* (1859); *Literaturgeschichte der synagogalen Poesie* (1866), with a supplement (1867). The latter work was preceded by a visit to the great libraries of Italy, France and England. His shorter treatises and essays were collected in his *Gesammelte Schriften,* published in 1874, on the occasion of his eightieth birthday, under his direction.

His works, his lectures on Jewish literature and, last but not least, the firmness of his character had brought the quiet scholar to the attention of large groups. In 1864, on the occasion of his seventieth birthday, a Zunz Foundation (Zunz Stiftung) was created, "as a sign and testimony of honor and gratitude, in appreciation of the great sacrifices made by Dr. Zunz during his entire life for the work of scholarship, and which he is not tired of making even in high old age." This foundation consisted of a sum of money, the interest of which was to help support Zunz during his lifetime; after his death it was devoted to the promotion of scholarly works of the type which Zunz had worked out. The curators of this Zunz Foundation published a *Jubelschrift zum neunzigsten Geburtstag des Dr. Zunz* (1884); to this contributions were made by famous scholars of Germany and other countries in honor of the old master.

Zunz had a strong interest in politics. He demanded for the Jews "not rights, but right itself; not liberties, but liberty itself"; he took an active part in the campaign for civic emancipation. His speech on those who fell in the uprising of March, 1848, won him the general attention of democrats. He repeatedly took part in questions of suffrage, and his addresses on this subject are in the first volume of his collected works. Even after the union of Germany in 1871, when he

Arnold Zweig

was extremely old, he took a lively interest in public affairs, and in his *Deutsche Briefe* made an energetic appeal for the purity of the German language. After the death of his wife, Adelheid Beermann, who had taken an active part in his works during the period of their life together (1822-74), he lost his joy in life and creative ability; thus his sudden death was a release.

His rich achievements and his steadfast moral conduct were fittingly characterized by Heinrich Heine, who as a student had been a member of the Verein für Cultur. Zunz, said Heine, was "a noble man, who, in a period of wavering transition, always presented an unshakeable immutability; despite his acuteness, skepticism and scholarship he remained true to his self-assigned task, to the greathearted whim of his soul. A man of word and deed, he created and worked where others dreamed or dejectedly abandoned the struggle."

ZUR MOSHE, *see* COLONIES, AGRICULTURAL.

ZURICH, *see* SWITZERLAND.

ZWEIFEL, ELIEZER ZEBI (LAZAR), author and publicist, b. Mogilev, Russia, 1815; d. Glukhov, Ukraine, 1888. From 1853 to 1874 he taught at the Rabbinical Seminary of Zhitomir. His first work was *Minim Veugab* (Vilna, 1858), a collection of notes on various Biblical and Talmudical passages, poems and maxims.

Other works of his were: *Shalom Al Yisrael* (4 vols., Zhitomir, 1868-73), in which he attempted to reconcile Hasidism and rabbinical Judaism (his conciliatory efforts, however, met with the disapproval of the fanatical Maskilim), and *Musar Ab* (Zhitomir, 1885), containing the ethical prescriptions of Maimonides and Judah ibn Tibbon to their sons Abraham and Samuel, respectively.

ZWEIG, ARNOLD, author, b. Glogau, Germany, 1887. After having published, in 1911, a novel of minor importance, Zweig became famous in Germany at twenty-five through his *Novellen um Claudia* (1912). From this time on Zweig was regarded as a German master prosaist, capable of expressing alike the slightest shades of sentiment and deep emotion, and of elevating realistic description to poetic diction.

But Zweig was by no means a literary artist for art's sake. He was consciously a poetic chronicler and critic of his time, especially of German civilization. In this aim he was confirmed, while serving as a private in a German labor battalion in Northern France and later in the press section of the German high command on the eastern front during the first World War. During this activity Zweig penetrated the "underworld of Prussian brutality." He became one of the outstanding literary representatives of post-war disillusionment, challenging German nationalism and militarism by a trilogy of novels (written in German and translated into many languages) whose second part, *The Case of Sergeant Grischa,* was published in 1927; the first part, *Education Before Verdun,* in 1935; the third, *The Crowning of a King,* in 1938. In these novels personalities are delineated for their own sake as well as for their relations to the momentous issues and moral movements that characterize the era of the first World War and tendencies of German post-war nationalism.

Zweig opposed German nationalism by professing pacifism and his Jewish consciousness. In 1939, at the beginning of the second World War, Zweig publicly avowed that he no longer considered his radical post-war pacifism as a definite solution of the cultural problems of his time. As to his faithfulness to Judaism, he saw no reason to alter the point of view he had maintained all along.

As a German author Zweig constantly stressed his Jewish origin and his interest in Judaism. His literary debut itself, the novel *Aufzeichnungen über eine Familie Klopfer,* had a Jewish background. In almost all of his following novels Jewish characters are represented as champions of humanitarian civilization, or as typical personalities of modern culture. In 1915 Zweig published a dramatic version of the Tisza-Eszlár case, *Ritualmord in Ungarn,* which was performed with great success in Berlin and won the Kleist-Preis. A revised edition of the drama appeared in 1920 under the title *Die Sendung Semaels.* In 1925 Zweig published the drama *Die Umkehr eines Abtrünnigen,* performed in 1929, which dealt with the fate of a baptized Jew who became a bishop and his return to Judaism. Zweig revealed also his Jewish point of view in *Herkunft und Zukunft* (Origin and Future), a collection of essays, and presented a penetrating study of the psychological background of anti-Semitism in his book *Caliban* (1927). His personal experiences and the recent history of the Jews of Germany were the subject of his book *Insulted and Exiled,* published in German in 1934 and in English in 1937.

After the first World War, Zweig lived in Upper Bavaria while recovering from illness. He was forced to leave his home in Starnberg, Bavaria, by the Hitler Putsch of 1923. Then he lived in Berlin until he was expelled by the Nazis in 1933. He went to Palestine and established his home on Mount Carmel, Haifa. In 1936 the government of the Third Reich deprived Zweig of his citizenship, and confiscated all his property (left in Germany) in 1938. Suffering from a serious eye disease, Zweig was hindered in his literary creativity during and after the late 1930's. In 1939 he contributed a study of Baruch Spinoza to the *Living Thoughts* series of books.

HUGO BIEBER.

Jahrhunderts (1923); Meyer, Bertha, "Jews in Contemporary German Literature," *Jewish Forum,* March, 1934, p. 76; Zweig, Arnold, "Mentality and Crisis," *Opinion,* Jan., 1936, pp. 12-13; *ibid.,* June, 1938, p. 23; *American Hebrew,* Nov. 22, 1929, p. 43; April 3, 1931, p. 533; Sept. 30, 1932, p. 357.

ZWEIG, STEFAN, writer, b. Vienna, Austria, 1881; d. Petropolis, Brazil, 1942. He received his Ph.D. degree from the University of Vienna.

Zweig's literary career began in the traditional manner of the young Viennese lions of his generation. He tried to transform the cafés of Vienna on the Danube Canal into the images of the cafés on the Seine which drugged themselves with the inspiration of Baudelaire and Verlaine in the miracle-working atmosphere of the *fin-de-siècle.* It was then that he wrote the poems collected in the slender volume *Silberne Saiten.*

Zweig continued his work in the traditional way by turning to the Viennese newspapers' highly popular *feuilleton,* the short story, with which not even the great political dailies could dispense. It was there that Zweig's first short stories saw the light of the Vienna cafés, stories that were later collected in *Liebe der Erika Ewald* and *Amok, Novellen einer Leidenschaft.*

However, it is not as a poet or a short-story writer that Stefan Zweig is best remembered. His name is known throughout the world as the author of biographies and of historical miniatures that were translated into more than a score of languages. Most notable among his biographies are *Marie Antoinette* and *Joseph Fouché,* world "best-sellers." Others, such as *Erasmus von Rotterdam* and *Castellio gegen Calvin: Ein Gewissen gegen Gewalt,* were great artistic successes.

Zweig wrote several of his books in what may be called the "tryptich" form. They are biographies of three persons with related creative interests and complementary characters. The story of the healers of the mind was such a book: *Heilung durch den Geist: Mesmer, Mary Baker-Eddy, Freud,* also the story of three great demonic poets: *Der Kampf mit dem Daemon: Hölderlin, Kleist, Nietzsche.* Zweig considers Nietzsche a poet rather than a philosopher. A third book of the same type was *Adepts in Self-Portraiture: Casanova, Stendhal, Tolstoy.* Among the most popular of Zweig's books in republican Germany was *Drei Meister: Balzac, Dickens, Dostoievski.*

He was an extremely prolific writer. He paid his respects to his first literary gods by writing the biographies of Paul Verlaine and Emile Verhaeren. He paid his homage to the source of a later inspiration by writing the biography of Romain Rolland. Among his other famous books are *Conqueror of the Seas, The Story of Magellan,* and *The Tide of Fortune,* in which he portrayed twelve incidents that turned the tide of history. The last work of Zweig's to be published in his lifetime was about Brazil, in which he saw a country of the future. His autobiography, *The World of Yesterday,* appeared posthumously (New York, 1943).

Besides biographies and histories, he also wrote novels, dramas and even a comedy. The best known of his plays was *Jeremias,* a call to peace when there was still hope of peace. Among the young Jews of Germany this play was very popular. Zweig also translated the plays, poems and other writings of such fellow-searchers of life's essence as Pirandello and Rolland.

Zweig was too many-sided to be classified as a special type of writer. His intellectual curiosity was vast and he wanted to probe deep into the secrets of souls and events. But he realized that man and history are complex and made no attempt to find common denominators or all-inclusive terms of simplified interpretation. His portraits are mosaics, not splashes of color.

Stefan Zweig

He was a leader, and he showed the world that there was excitement even in such a contemplative life as that of Erasmus of Rotterdam. But he was also the creature of his age; he realized that the modern world distrusts the sparkling *aperçus* of an Oscar Wilde and prefers the less exciting but more trustworthy analytical treatment of the world stage and its players. The Germans called this the functional (*sachlich*) treatment.

Even in this analytical way, Zweig found the means to fight the battle of decent mankind against the forces of evil. His *Erasmus* was such a fighting book, because it showed that tolerance is creative, intolerance is destructive. The book about the struggle of Castellio and Calvin was also a fighting book. Castellio's body may have been consumed by fire but his soul found refuge in the very shrine which his fanatical opponent had tried to erect as the sanctuary of sanctified intolerance. Zweig makes it clear in this book that even failure may contribute to building the City of God.

In the last months of his life Zweig was collecting material for a life-story of Montaigne whom he came to regard as the quintessence of the noble spirit that understands the frailties to which the human flesh is heir. He himself was a disciple of Montaigne. Unfortunately, he lost courage and so failed to live up to his great prototype. His friend, the German author Berthold Viertel, believed that Zweig's was the voice of Europe and that he had to vanish in nirvana when Europe was destroyed. On the day on which Zweig committed suicide (February 23, 1942) intellectual Europe also suffered a great defeat. EMIL LENGYEL.

THE
UNIVERSAL JEWISH
ENCYCLOPEDIA

הרב גדליהו בן צבי וואלף
NEW YORK
RABBI
GEORGE WOLF

THIS SYMBOLIC PRESENTATION has been especially contributed to the tenth volume of the Universal Jewish Encyclopedia by the eminent artist Arthur Szyk as a memorial to the martyred Jews of Europe. It portrays the Jew as defiant and unafraid, marching confidently and dauntlessly into the future. In his arms he bears his most precious and eternal possession, the portable fatherland, the Torah. Draped round his shoulders is the mantle of royalty that eclipses the yellow badge he perforce must wear. In his right hand is the shepherd's staff of leadership; in his left, the jester's bauble betokening his unfailing sense of humor in the midst of adversity. Accompanied by the stag of eternity, he serenely goes his way in scorn of the bloated toad of pride, the arrogant parrot of vanity and the hissing serpent of treachery, coiled around the tree of life. Beneath is the Shield of David, bearing the scales of justice and the doves of peace, with its crest of the crown of a good name and its supporting lions of Judah. In the background are the brilliant clouds of hope and at the base are the grapes of fertility that promise a happier future.
