PREFACE

THIS second edition of WHO'S WHO IN AMERICAN JEWRY marks the establishment of the volume as a permanent work of reference. While there has been no change in the general plan of the work, the new edition was thoroughly revised and includes the biographies submitted too late for publication in the first edition as well as others whose names had not hitherto come to our research board. Other biographies required additional material which has now been added.

The chief object, however, in listing these persons was to secure as complete an account as possible of contemporary Jewish contributions to America's literature, drama, music, art, science and public service.

Because the Jewish origin of many professional, scientific and artistic celebrities is often unknown, this volume aims definitely to settle such doubts and uncertainties. Nevertheless, there are omissions, due to the fact that some will not reply even to repeated requests for data.

Not a single line in WHO'S WHO IN AMERICAN JEWRY *has been paid for.*

The data contained in this volume were secured after great difficulties inherent in the preparation of such a book. We are grateful to those who subscribed for the volume, making possible its publication.

We are under obligation to many editors and secretaries of important societies for their collaboration in this work. We wish to thank The American Philosophical Society, The American Sociological Society, The American Mathematical Society, The American Federation of Arts, The American Institute of Architects, The American Society of Biological Chemists, The American Physiological Society, and others too numerous to list for their valuable assistance in the compilation of names. Again we thank the members of our Advisory Board of Editors—Dr. Nathan Krass, Dr. A. A. Roback, Dr. Mordecai Soltes, Dr. Herbert S. Goldstein, Max D. Steuer, Joseph Barondess, Hon. Adolph Stern, Hon. Emanuel Celler and Hon. Abram I. Elkus—for the valuable assistance rendered by them.

"Against the vague anti-Semitic denunciations of Jewish characteristics, which are mainly the results of prejudice, and, in any case, cannot be checked or measured, we must set down the definite results of Jewish achievement."

Thus the eminent Jewish scholar, Dr. Joseph Jacobs, outlined the necessity of a statistical record of Jewish achievement in America. This is what WHO'S WHO IN AMERICAN JEWRY is.
