INTRODUCTION

WHO'S WHO IN WORLD JEWRY, from its inception, was meant to fill the need for an authoritative record of notable Jews. This need is even greater now as a result of the increased unity between Jews that came about after June 1967. This new edition has been prepared to succeed the first two editions published in 1955 and 1965. But a growing closeness between Diaspora and Israeli Jews is reflected in this new third edition which was edited and printed entirely in the State of Israel, with the help of an editorial office in New York City.

An enormous amount of time and effort went into the compilation of this book. The immense task of contacting people and organizations to recommend nominees started in 1968. The gathering, compiling and processing of the data was painstaking, with constant, time-consuming checking and rechecking. Every effort was made to produce material as up-to-date as possible. Added to other difficulties, this is a record of a dynamic people, prominent in many fields, and constantly on the path of progress and advancement all over the world.

The personalities included were selected on the basis of their influence, positions, and accomplishments, and the data used was supplied by them. Many people who should have been included have not been, simply because in many cases, we received no data from them. Needless to say, the length of the biography is no indication of the relative importance of the subject, but merely depends on the editors' assessment of the relevance of the data submitted.

There are some 14 million Jews in the world today. This work includes some 10,000 biographies. The bulk of the subjects naturally come from the two major free centers of Jewish life today: Israel and the United States. There are also persons included from almost every country where Jews live, with two notable exceptions: the Soviet Union and the Arab countries.

It is the deep regret of the editors, that we could not obtain information about an estimated 3 million Jews living in the Soviet Union, as well as those Jews yet remaining in the once flourishing communities of the Arab countries. This of course is the major tragedy of the Jewish people today.

Especially gratifying to the editors is that this volume includes many more Israelis, often not well known outside their country, but already making their influence felt on World Jewry. We are also happy to welcome a new generation of Jewish leaders who have emerged since 1965.

A brief word on how to read this book: each biography starts with the subject's name, country of residence, occupation, place and date of birth, parents' names, with mother's maiden name in parentheses, followed by the father's last name, if it is different than that of the subject. Length of time in country of residence is indicated in cases of immigration. Higher education, including honorary degrees, and the names of wife and children follow.

The second sentence begins with the subject's present position, followed by his previous positions, usually in chronological order. Then come principal contributions, such as authorship, discoveries, patents or international and communal achievements. Indicated next are military, civic, and social activities. Books and other writings by the subject are recorded. Following is a listing of awards and honors he or she received. Hobbies or special interests follow. Finally, the subject's home and office addresses are given, as authorized by the biographees.

In the transliteration of Hebrew words, the editors tried to make them understandable to an English-reading public. A list of the most commonly used abbreviations is provided.

The editors wish to thank the many people who helped to produce this book. Although a great deal of conscientious and painstaking work has gone into this biographical dictionary, the editors know that, despite their best efforts to produce an accurate and comprehensive work, it may have faults of both omission and commission. At the same time we hope that this book will be a useful tool to the many who, we are sure, will continue to use it.

ACKNOWLEDGMENTS

MR. HARRY J. ALDERMAN, New York, N.Y.
Librarian, American Jewish Committee
